Swallows generally sit twice in the summer, and occasionally a third time. Their latest brood is often destroyed by the cold weather setting in before they are strong enough to escape it, in which case it is believed that they hide themselves in the cliffs of rocks, where they pass the winter in a torpid state. At least, this is the mode in which the supporters of the migration of Swallows account for the swarms which are occasionally, though not very often, found under such circumstances.

Esprit de corps.

Swallows, like many other animals, possess an *esprit de corps*, which induces them to flock together in order to repel a common enemy; such is the case when a Hawk is in sight, when they rise about him, as it were to make up for their weakness by endeavouring to intimidate him with numbers. They are also not slow to render assistance under other untoward circumstances, of which M. de Nemours in his *Mémoires* mentions a very interesting example. "A Martin was caught by the leg in a slip-knot of packthread, of which the other end was fastened to a gutter of the *Collège des Quatre Nations* at Paris. At his cries all the Martins of the large basin between the Tuileries and the Pont Neuf assembled about him, and, after striking with their

bills upon the packthread, succeeded in setting him at liberty."

HIRUNDO

Swallows do not remain with us all the year round; they are the harbingers of Spring, and their departure indicates the near approach of winter. The species which are found in England neither arrive nor leave it together. According to the observations of Mr. Gough, in the *Transactions of the Literary and Philosophical Society of Manchester*, the Sand Swallow arrives the earliest, making its appearance in Westmoreland (in which County his facts were collected) about the 12th of April. Next comes the Chimney Swallow, about four or five days subsequent, and in ten days from that time the Martin, or Window Swallow, makes its appearance, at least a fortnight after the Sand Swallow. The Chimney Swallow and Martin leave us about the latter end of September, but the Sand Swallow not till the middle of October; and it thus stays with us a full month longer than either of the other species, which may be easily accounted for by its habitation being so near the water, on which its insect food is found in larger quantities and with less trouble.

The disappearance of the Swallow kind has been the subject of much dispute amongst Naturalists, and three causes have been assigned for it.

By some it has been roundly asserted, that towards the autumn the bird becomes drowsy, and, feeling an inclination to torpor, dives to the bottom of ponds, and remains there torpid through the winter, till the changing temperature of the Spring induces it to leave its lurking place, and resume its station amongst the feathered tribes. This fable, for nothing else can it be considered, was first broached in the year 1555 by the celebrated Olaus Magnus, Bishop of Upsal, who states, that the fishermen of Norway frequently drew up in their nets, with the fish, heaps of Swallows, hooked together, beak to beak, foot to foot, and wing to wing, which, when transferred to the frying-pan, became speedily reanimated, as well they might under the application of so strong a stimulus. The fact, that the structure of the heart and lungs of Swallows is not fitted for submersion without destruction of life, is amply sufficient to overturn this ridiculous theory, without adverting to the experiments which have been made without number by putting live Swallows under water. One cannot, however, but be surprised, that so strong-minded a man as Linnæus should have been deceived into a belief of such folly.

Submersion.

The question then only rests between those who consider the Swallows as remaining here during the winter, but retiring into the stumps of old trees, caverns, &c. where they become torpid like Bats, and those who believe that they leave the Northern for the Southern latitudes in autumn, whence they return again in the Spring, both for the purposes of finding food and breeding. These points have given rise to great dispute. Mr. Daines Barrington and others holding the opinion of Aristotle and Pliny, that the Swallows remain torpid during the winter in the countries where they are found in the Spring and summer; whilst the Count de Buffon has, perhaps, the largest party in support of their passage from one Country to another at stated periods. As this point must be considered with reference to many other birds, and even beasts, it will be best to avoid entering at any length into the subject here, and to refer the reader to the observations on MIGRATION, in the *Essay on ZOOLOGY*.

Torpor. Migration.

HIRUNDO Mr. Barrington seems to found his notion rather on popular opinion than any satisfactory account of the dormitories of Swallows which have been discovered. And his assertion, "That the common labourers, who have the best chance of finding torpid birds, have scarcely any of them a doubt with regard to this point; and consequently, when they happen to see them in this state, make no mention of it to others, because they consider the discovery as neither uncommon nor interesting to any one," is by no means sufficient to support his theory. He adds "another reason why the instances of torpid Swallows may not be expected so frequently;" viz. "that the instinct of secreting themselves at the proper season of the year likewise suggests to them its being necessary to hide themselves in such holes and caverns, as may not only elude the search of man, but of every other animal which might prey upon them;" and he quotes an old Irish proverb,

"The Bat, the Bee, the Butterfly, and the Swallow,
The Corncreak, and the Stonechat, all sleep the winter thorough."

One strong objection to the theory of torpidity is derived from the observations of Mr. Pearson, who noticed a winter moult, which occurred in February, in some Swallows which he kept in a cage; a circumstance which, of course, would not happen were torpor the natural habit of the genus.

Capability
of domesti-
cation.

Though extremely tender and delicate, birds of this kind may be brought up in confinement, and even be tamed so as to return when set at liberty. Many instances of this fact are on record. The bird from which Mr. Bewick's figure of the Chimney Swallow, in his *History of British Birds*, was drawn, having been shot in the wing, was tamed; and he says, "It sat on the bench whilst the cut was engraved, and, from its having been fed by the hand with flies, when sitting for its portrait, watched every motion, and at every look of the eye, when pointedly directed towards it, ran close up to the graver in expectation of a fresh supply of food." Mr. Trevelyan, also, has mentioned another Swallow, which, having been taken when young, was so tamed by his children, as to follow them into the fields, and come to them for a fly when called by whistling. When able to shift for himself, he was turned out of doors, but was accustomed to come into the room at night, his roosting-place being commonly one of the children's heads, nor was he disturbed by the child moving about.

Swallows may be divided into Martins and true Swallows, the Martins having the legs covered with down, whilst in the true Swallows they are bare. The latter birds may also be divided into sections from the form of their tails, as will be hereafter noticed.

I. Martins. Feet covered with down, and tail forked.

H. Urbica, Lin. ; *l'Hirondelle à Croupion Blanc, ou de Fenêtre*, Buff. ; *Window Swallow, Martin, Martlet, or Martinet*, Ray, Willug. About four and a half inches in length; the upper parts, excepting the rump, black, glossed with violet; the under parts and rump white; wings, tail, and tail-coverts dusky brown, glossed with green on the edges; legs and feet scantily covered with brownish grey down; beak black. The Martin arrives about the latter end of April, and builds its nest under the eaves of houses, and sometimes against the sides of high cliffs near the sea. The nest forms a portion of a large

circle, covered above, and entered by a very narrow opening; it is composed of earth, either the droppings of worms, or such as the Martin has found in the road, or by pools, and manufactured with its beak and feet. As the bird often builds against a perpendicular wall, it commences by clinging fast with its claws, and at the same time propping itself up by inclining its tail against the wall; and being thus supported it plasters the mud against the bricks with its chin. But as the soft materials of which the walls of its growing habitation are constructed would not support their own weight if built up at once, it is curious to observe that the bird seems aware of this fact, and does not build more than half an inch in height at once, and this being done in the early part of the day, it gradually dries whilst the bird is out in search of food, and the next morning is able to support another tier; this process being continued daily, in the course of ten or twelve days the exterior of the nest is finished, and the accommodation is completed by lining the interior with soft grass, moss, and feathers, the last of which are not unfrequently snatched up by the Martin ere they reach the ground, when dropped from other birds in their flight. Though Martins appear to be very captious in determining the site of their dwelling, frequently commencing and leaving it unfinished, yet when once built, they return to it annually, except when, as not unfrequently happens during their absence, it becomes occupied by Sparrows, or some other bird stronger than itself. Under these circumstances it has been said occasionally to plaster up the intruder in his unjustly-obtained tenement. The contrary of this was observed at Welton, in America, by Mr. Smith. One morning he observed a pair of Martins making a great outcry near his habitation; and, on watching, he noticed that they made frequent attempts to get into a box, or cage, placed against the house, in which they had formerly built, but whenever they approached they seemed terrified and flew away, uttering the same noise which had attracted his notice. Soon after a little Wren came out, and, flying away, the Martins took quiet possession of their own domicile till the Wren returned, when they were quickly ousted. This contest continued during the whole of that day, but on the next, so soon as the Wren left, the Martins resumed their occupation, and, setting to work quickly, plastered up the entrance of the nest, and remained within it for two whole days without food; when the Wren, finding her endeavours to enter ineffectual, left them in quiet possession. The hen lays six round white eggs, which are hatched in about fifteen days; and there is usually a second, and sometimes a third brood. Whilst in the nest the parent birds, holding on by their claws, feed their young; which, when strong enough to fly, are fed whilst on the wing with a very quick motion, which is hardly discernible, unless the party watching be aware of the method.

Mode of
building.

Martins are chilly birds, and may be observed collecting early in the morning on the ridges of high houses facing towards the East, in order to warm themselves by the first rays of the sun. They have been observed in England as late as the middle of October, and even in November. As the time of their departure approaches they collect in large flocks, which increase daily till they swarm "in myriads," as Mr. White says, "round the villages on the Thames, darkening the face of the sky, as they frequent the islets of that river, where they roost." And he further observes,

HIRUNDO that "unless these birds are very short-lived indeed, or unless they do not return to the district where they have been bred, they must undergo vast devastations somehow and somewhere, for the birds that return yearly bear no manner of proportion to those that retire." Letter XVI.

H. Rupestris, Gmel.; *l'Hirondelle Grise des Rochers*, Buff.; *Crag and Rock Swallow*, Lath. About five inches long; upper parts light brown, primaries a little deeper; under parts white, clouded on the belly and sides with red; inferior tail-coverts light brown; tail quills of equal length, the middle two light brown, the others of the same colour, but marked with a large white oval spot on the inner web; the legs covered with a greyish down; beak and feet brown. Found in the Southern parts of Europe, in Africa and America, where they live entirely among the cliffs, never descending except after heavy rains, when they expect to find the insects which have left the higher stations.

H. Cayennensis, Lin.; *le Martinet à Collier Blanc*, Buff.; *White-collared Swallow*, Lath.; *White-collared Martin*. About the same size as the preceding, is entirely black, glossed with violet, excepting a white patch on the throat, which passes back on each side, forming a collar, another white spot in front of the eye and on each side of the belly. They build, in houses, a large nest resembling a truncated cone, the bottom of which forms a kind of stage, and the eggs are laid on a very soft wadding of the *apocynum*.

II. True Swallows. Feet naked.

a. Tail forked.

H. Rustica, Lin.; *l'Hirondelle de Cheminée, ou l'Hirondelle Domestique*, Buff.; *Chimney, or Common Swallow*, Pen. About six inches in length; it is distinguished from all the other Swallows by the remarkable forkiness of its tail, and the rusty red spot on the forehead and under the chin; all the upper parts, the sides of the neck, and a band across the chest black, with violet glossings; the breast and belly white, the latter in the male tinged with red; the tail, consisting of twelve quills, black, all of which, except the middle two, are barred with white near their tips; the outer quill feather on each side very long and slender, more especially in the male. The Swallow builds a hemi-cylindrical nest of clay, open at the top, and lines it within with feathers and soft grass; the old birds commonly build against the preceding year's nest, and in England most commonly in chimneys, whence is derived their trivial name; in Sweden they prefer barns, whence their name *Ladu Swala*, or Barn Swallows; but in other and hotter climates they choose galleries, porches, or open halls. But instances have occurred in which they have built in very extraordinary situations. At Camerton Hall, near Bath, a pair of Swallows built for three successive years in the frame of an old picture over a chimney-piece, to which they had access by a broken pane of glass. Another pair were known to build, during two following years, on the handles of a pair of garden shears stuck up in a tool-house. But the most remarkable was a nest exhibited at the Leverian Museum, which was built in the body of an owl, which hung up from the rafter of a barn flickering in the wind.

The Chimney Swallow appears in Europe about a

fortnight before the Martin, and immediately resorts to the haunts of men: it breeds earlier than any other species, and lays about six eggs, white, marked with little red spots; but if the eggs be removed, it has been known to deposit as many as nineteen. They have usually two broods, the former hatched towards the latter end of June, and the latter about the middle of August. As the nest is built five or six feet below the top of the chimney, the young birds cannot very easily get from it, and often, in their attempts, drop into the room below; if, however, they are successful, they are at first noticed perched on the chimney-pot, whence their next essay is to some leafless bush, on which they sit perched in rows, where the old birds come to feed them; after which they gradually learn to fly, but it is not till sometime after this that they are able to feed themselves. They sport about where the old birds watch for flies, and when sufficient for a meal are collected, at a signal the old and young bird fly towards each other, and, meeting at an angle, the food is conveyed from the one to the other whilst on the wing.

Mr. Gough, in the paper already noticed, has given the following account of the passage of the Swallow from Senegal to Drontheim; which, as he says, "shows that the bird does not rely on its agility, and loiter in the torrid zone longer than is necessary. The Swallow appears in the neighbourhood of Senegal on the 6th of October, and has been seen as late as February in the same country. It is said to arrive

At Athens,	lat. 37° 25',	Feb. 18.
Rome,	41° 45',	— 22.
Piacenza,	45°	March 20, A. D. 1738.

Kendal,	54° 20',	— 17. From a mean of twenty-three observations.
Upsal,	59° 30',	May 9. From one observation."

Towards the end of the summer, after the breeding season is over, the Swallows leave their nests, and are observed sitting on the lower branches of alder trees, by the side of streams, waiting for their prey, which is there more abundant than in the neighbourhood of houses, and, by degrees, form large flights, which increase to such numbers, that Pennant mentions, on an islet near Maidenhead bridge they were so thick, that, in order to catch fifty in less than half an hour, "they had nothing more to do than to draw the willow twigs through their hands, the birds never stirring till they were taken." This continues to the middle of September, when they leave us for warmer climates.

H. Riparia, Lin.; *l'Hirondelle de Rivage*, Buff.; *Sand Martin, Shore Bird*, Will.; *Sand Swallow*. This bird, which is the smallest of the Swallows, has all the upper parts, the cheeks, and a broad band across the chest of an ashy brown colour; the throat, front of the neck, belly, and under tail-coverts white; wings brownish black; four or five very small feathers are placed at the root of the hind toe. Temminck considers Le Vaillant's *Brown, or Marsh Swallow* merely a variety of this species. It lives in holes in sand-pits, in banks of rivers and cliffs, and sometimes of trees, boring some feet deep with its beak and claws, and lines its nest with straw and feathers. Although it does not arrive till after the Martin and Chimney Swallow, yet it brings

Appearance in Europe.

HIRUNDO out its young before that bird; and generally has two broods, one in June, the other in August.

H. Rufa, Gmel.; *l'Hirondelle à Ventre Roux de Cayenne*, Buff.; *Rufous-bellied Swallow*, Lath. Not quite the size of our Swallow; has the under parts of the body red, and a collar about the neck, which, as well as the upper parts, are black, excepting the forehead, which is brown; the caudal quills are spotted with white on their inner edge. This bird is a native of America, and suspends to the beams of houses its nest, composed externally of moss and dried leaves plastered together with a kind of gum, and lined with feathers; it is sometimes more than a foot in length, and has an entrance near the bottom.

H. Fasciata, Gmel.; *l'Hirondelle à Ceinture Blanche*, Buff.; *White-bellied Swallow*, Lath. Is about the size of the English bird, and entirely black, except a white band across the belly, and a white spot on the legs. Native of Cayenne, and frequently found living on floating timber.

H. Chalybæa, Briss.; *l'Hirondelle d'Amérique*, Buff.; *Chalybeate Swallow*, Lath. Upper parts black, glittering in the light with blue; under parts reddish grey, lighter on the belly, which is streaked with brown. Native of Cayenne.

H. Senegalensis, Gmel.; *la Grande Hirondelle à Ventre Roux du Sénégal*, Buff.; *Senegal Swallow*, Lath. Although not larger than the Chimney Swallow, it is near eight inches long, and has the tail much lengthened beyond the wings: the upper parts are shining black; the throat and under wing-coverts reddish white; the belly and rump red. Native of Senegal.

H. Capensis, Gmel.; *l'Hirondelle à Capuchon Rouge*, Buff.; *Cape Swallow*, Lath. Upper parts bluish black, under parts light yellow; top of the head black, top of the back of the neck and the rump red. The habits and cry of this bird nearly similar to the Chimney Swallow, with which it may be easily confounded. It is very common at the Cape of Good Hope, and builds within houses, attached to the ceiling or a beam, a nest resembling a hollow ball, connected with a long tube, through which the female enters. The *H. Rubifrons* of Vieillot, perhaps, a variety.

H. Indica, Gmel.; *Rufous-headed Swallow*, Lath. Upper parts brown, under whitish, head red.

H. Panayana, Gmel.; *l'Hirondelle d'Antigue à Gorge Couleur de Rouille*, Buff.; *Panayan Swallow*, Lath. Black above, duller on the quill feathers, white beneath; forehead and throat rusty yellow. Native of Panay, one of the Philippine Isles.

H. Violacea, Gmel.; *l'Hirondelle Bleu de la Louisiane*, Buff.; *H. Purpurea*, Gmel.; *Purple Martin*, Catesby; *Purple Swallow*, Lath.; *H. Subis*, Gmel.; *l'Hirondelle de la Baie de Hudson*, Buff.; *Great American Swallow*, Edwards. Are considered by Cuvier as forming three distinct species, but by Vieillot as variations in age; he notes the *H. Violacea* as the full grown bird, which, at first appearance, is black, but by varying the light assumes the different tints of blue, violet, and purple. They are natives of America from Hudson's Bay to Louisiana. In consequence of their setting up a loud cry when birds of prey are in the neighbourhood, they are considered as good sentinels against predatory attacks on poultry, and with this view the inhabitants entice them about their houses, by providing earthen pots, which they frequent and make their nests in.

The other species in this division are

H. Ambrosiaca, Gmel.; *l'Hirondelle Ambrée*, Buff.; *Ambergris Swallow*, Lath.

H. Tapera, Gmel.; *le Tapère*, Buff.; *Brazilian Swallow*, Lath.

H. Nigra, Gmel.; *le Petit Martinet Noir*, Buff.; *Black Swallow*, Lath.

H. Cristata, Vieill.; *l'Hirondelle Huppée*, Le Vaill.; *Crested Swallow*, Lath.

H. Fuciphaga, Act. Holm. 1812; *la Salangane*, Buff.; *Esculent Swallow*, Lath. About the size of the Sand Martin; the upper parts shining dusky black; under pale ash; tail black. According to Mr. Stephens's account, the *H. Esculenta*, described by Linnaeus, does not exist: it was taken from a drawing by Poivre, whose delineations are known to be inaccurate, and no individual resembling his drawing has been discovered more recently. M. Lamouroux, however, in his *Essai sur les Thalassiphytes non articulés*, published in 1815, says that he has seen three kinds of Esculent Swallow, of which the smallest never goes far from the coast, and its nests are most esteemed, whilst the latter proceed far inland. Dr. Horsfield speaks of two species, *H. Esculenta*, in which the plumage is uniformly of a blackish colour, and the *H. Fuciphaga*, the species above described. His *H. Klecho* may, perhaps, with the two just mentioned, be the three species alluded to by Lamouroux. These birds are found in the isles of the Indian Archipelago, and build in the hollows of the rocks, not only on the shore, but up the country.

The nests of the Esculent Swallows form a large article of commerce between the islanders and the Chinese, who highly esteem them as aphrodisiacs. In shape they resemble a flattened saucer, of which the flat surface is attached to the rock. They are composed of a semitransparent substance, which is generally white, or yellowish white, somewhat resembling isinglass, or fine gum dragon; occasionally, however, they are of a darker colour, but, as when moistened in water they all assume the same character, it is probable that this deeper colour only depends on the greater dryness of the nest. This substance is disposed of thin layers externally, and within of numerous fine threads of the same kind crossing in every direction, and matted together. Of this structure alone the nest is composed, neither feathers nor any other substance is found in it.

Great disputes have occurred about the materials of which these nests are composed. Some consider them as formed of a kind of *écume de mer*, others of fish-spawn; some of the mollusca which are found floating about in the sea, others of the juice of a tree called the *calambouc*, whilst some stoutly assert, that the substance is produced by the animal itself; and Sir Everard Home has fancied he has found a peculiar arrangement of the cardiac glands in these birds, in which he supposes this peculiar substance is prepared. It is not, however, at present satisfactorily made out what the real nature of the substance is; but according to the analysis of Dobereiner, (See Thomson's *Annals of Philosophy*, vol. vii.) it consists of mucus, albumen, a trace of gelatine, a peculiar substance insoluble in water, alcohol, and most other reagents, bearing some resemblance to fibrin, but constituting, in fact, a distinct animal body. Of this the greatest part of the nest is composed. It swells, becomes transparent and gelatinous like traga-

Esculent Swallows' nests.

Composition.

HIRUNDO canth, when boiled or digested in water, common salt, soda, lime, iron.

The best nests are those which are found in the bottom of deep caverns into which the sea dashes, as they then acquire a nitrous taste, which is considered to make them more piquant, and they are more valued if taken before the eggs are laid.

Sir G.
Staunton's
account of
these nests.

The following is the account given by Sir George Staunton of the nests and the mode of taking them. "In the Cass (a small island near Sumatra) were found two caverns running horizontally into the side of the rock; and in these were a number of those birds' nests so much prized by the Chinese epicures. They seem to be composed of fine filaments cemented together by a transparent viscous matter not unlike what is left by the foam of the sea upon stones alternately covered by the tide, or those gelatinous animal substances that are found floating on every coast. The nests adhere to each other and to the sides of the cavern mostly in rows without any break or interruption. The birds that build these nests are small grey Swallows with bellies of a dirty white colour. They were flying about in considerable numbers, but were so small, and their flight was so quick, that they escaped the shot fired at them. The same sort of nests are said also to be found in deep caverns at the foot of the highest mountains in the middle of Java, at a great distance from the sea. The Esculent Swallows feed on insects which they find hovering over stagnated pools between the mountains, and for the catching of which their wide opening beaks are particularly adapted. They prepare their nests from the best remnants of their food. Their greatest enemy is the Kite, which often intercepts them in their passage to and from the caverns. The nests are placed in horizontal rows, at different depths from fifty to five hundred feet. The colour and value of the nests depend on the quantity and quality of the insects caught; and, perhaps, also on the situation in which they are built. Their value is chiefly ascertained by the uniform fineness and delicacy of their texture; those that are white and transparent being most esteemed, and often fetching, in China, their weight in silver.

"These nests are a considerable object of traffic among the Javanese; many of whom are employed in it from their infancy. The birds after having spent nearly two months in preparing their nests, lay each two eggs, which are hatched in about fifteen days. When the young birds become fledged, is the proper time to take the nests; and this is regularly done three times a year, and is effected by means of ladders of bamboo and reeds, by which the people descend into the caverns: but when these are very deep, rope-ladders are preferred. This operation is attended with much danger. The inhabitants of the mountains, who obtain a livelihood by collecting the nests, always begin by sacrificing a Buffalo. They also pronounce certain prayers, anoint themselves with sweet-scented oil, and smoke the entrance of the cavern with gum-benjamin. Near some of the caverns a tutelar Goddess is worshipped; whose Priest burns incense, and lays his protecting hands on every person preparing to descend. A flambeau is at the same time carefully prepared, with a gum which exudes from a tree growing in the vicinity, and which is not easily extinguished by fixed air or subterraneous vapours."

The best nests sell in China at the rate of from a

thousand to fifteen hundred dollars the peckul, about twenty pounds of our weight, and the Dutch alone are said to export from Batavia a thousand peckuls annually.

Such being the value of the nests, it is not surprising if fictitious articles are sometimes exposed for sale, and this is the case, according to Kämpfer's account in his *History of Japan*, in which he states, that the Chinese fishermen told him they were accustomed to sell a composition made of polyps, which after being soaked a few days in a solution of alum, and afterwards rubbed, assumed the appearance and taste of the nests.

β. *With square tails.*

H. Dominicensis, Briss.; *le Grand Martinet Noir à Ventre Blanc*, Buff.; *St. Domingo Swallow*, Lath. Size of the Chimney Swallow; the upper parts black, glossed with steel blue, under parts white. It is said to resemble a Lark in its note. Is found in St. Domingo.

H. Torquata, Gmel.; *l'Hirondelle Brune et Blanche à Ceinture Brune*, Buff.; *Brown-collared Swallow*, Lath. The upper parts and stripe across the chest dusky brown; under parts and badge between the eyes and beak white. Native of the Cape of Good Hope.

To these may be added,

H. Leucoptera, Gmel.; *l'Hirondelle à Ventre Blanc de Cayenne*, Buff.; *White-winged Swallow*, Lath.

H. Francica, Gmel.; *l'Hirondelle de Bourbon*, Buff.; *Grey-rumped Swallow*, Lath.

H. Borbonica, Gmel.; *l'Hirondelle des Blés*, Buff.; *Wheat Swallow*, Lath.

H. Americana, Gmel.; *l'Hirondelle à Croupon Roux et Queue Quarrée*, Buff.; *Rufous-rumped Swallow*, Lath.

H. Flava, Le Vaill.; *Yellow Swallow*.

γ. *With short square tails, of which the quills are pointed and without webs.*

In America these birds assume the place of the Martins, and have generally but ten quills to the tail; their legs are very short, and not scaly; the hind toe placed higher than in the other species; the wings long and narrow, which enable them to mount high in the air, and to keep long on the wing, when closed cross the extremity of the tail. They are called by the natives *Mbiyui-mbopi*, which in their language signifies Swallow-Bat.

H. Pelagica, Lin.; *l'Hirondelle Brun Acutipenne*, Buff.; *Aculeated Swallow*, Pen. Back, tail, and belly brown; breast cinereous; head, neck, and wings dusky, the latter extending far beyond the tail, and the legs remarkably long. Native of North America, and builds in the chimneys, forming a nest about a third of a circle, and open at the top, of bits of stick, united by peach-gum; they make much noise by flying up and down the chimney, and, when they settle, stick fast to the wall with their feet, and at the same time steady themselves by applying their tail to it in the same manner as the Woodpecker.

H. Acuta, Gmel.; *l'Hirondelle Noire Acutipenne de la Martinique*, Buff.; *Sharp-tailed Swallow*, Lath. Differs little from the last, except in being black, and not larger than a Wren. Native of Martinique.

H. Caudacuta, Lath.; *Needle-tailed Swallow*. About twice the size of the last; is black, with white mingled on the wing-coverts, and a greenish gloss on the quills of the wings and tail, the points of the latter armed

HIRUNDO with sharp, needle-like processes. It feeds on a peculiar kind of Grasshopper, common in February.
 —
 HISPA. *H. Pacifica*, Lath.; *New Holland Swallow*. Nearly resembles the preceding, except in wanting the needle-like processes on the tail feathers.

Id. Ib. v. 3102.

Let bring a cart-whele here into this hall,
 But loke that it haue *his* [*i. e.* its] spokes all.
Id. The Sompnoures Tale, v. 7838.

What thing it liketh God to haue,
 It is great reason to ben *his*.
Gower. Conf. Am. book v. fol. 107.

His first-begot we know, and sore have felt,
 When *his* fierce thunder drove us to the deep;
 Who this is we must learn, for man he seems
 In all *his* lineaments, though in *his* face
 The glimpses of *his* Father's glory shine.
Milton. Paradise Regained, book i.

Is it for thee the lark ascends and sings?
 Joy tunes *his* voice, joy elevates *his* wings.
 Is it for thee the linnet pours *his* throat?
 Loves of *his* own, and raptures swell the note.
Pope. Essay on Man. Epistle 3.

— He is ours,
 T' administer, to guard, t' adorn the State,
 But not to warp or change it. We are *his*,
 To serve him nobly in the common cause,
 True to the death, but not to be *his* slaves.
Cowper. The Task, book v.

HISPA, in Zoology, a genus of Tetramerous, Coleopterous insects, established by Linnæus.

Generic character. The exterior and terminal lobe of the jaw narrower than the inner; two-jointed, having the form of *palpi*; lip rounded and nicked; *palpi* very short, filiform, and nearly of the same length; the lip longitudinal, entire, slightly cut at the tip; *antennæ*

inserted on the forehead, close together at their base, short, filiform.

The type of the genus is *H. atra*, Linnæus.

This genus is very nearly allied to *Alumus*, the type of which is *A. marginatus* of Fabricius.

HISPID, Lat. *hispidus*, which, as *hirsute*, Vossius thinks comes from the sound, *quem edunt setis horrentia*. Bristly, shaggy.

John of the wilderness? the hairy child?
 The hispid Thesbite? or what satyr wild?
More. Verses. Preface to Hall's Poems, 1646.

HISS, v. } A. S. *his-cean*, *ahisc-ean*; D. *hischen*;
 HISS, n. } Ger. *zwischen*, *sibilare*. All formed from
 HI'SSING. } the sound.

Hissing is used to express contempt, dislike, condemnation, disapproval. As in the Example cited from the Bible, it is sometimes applied to the object *hisséd*.

Whoes waltring tongs did lick their *hissing* mouthes.
Surrey. Virgil. Æneis, book ii.

All they that go by the, clappe theyr handes at the : *hissinge* and
 waggyng their head vpon the daughter Jerusalem.
Bible, Anno 1551. The Lamentations, ch. ii.

And I wil make this citie desolate and an *hissing*, [so that] euery
 one that passeth thereby, shal be astonished and *hisse* because of all
 the plagues thereof.
Id. Anno 1583. Jeremiah, ch. xix. v. 8.

Poore wormes, they *hisse* at me, whilst I at home
 Can be contented to applaud my selfe.
Ben Jonson. Every Man out of his Humour, act i. sc. 3.

— The spacious hall
 Thick swarm'd, both on the ground and in the air,
 Brusht with the *hiss* of rusling wings.
Milton. Paradise Lost, book i. l. 775.

— Thus was th' applause they meant
 Turn'd to exploding *hiss*, triumph to shame
 Cast on themselves from their own mouths.
Id. Ib. book x. l. 543.

— Dreadful was the din
 Of *hissing* through the hall, thick swarming now
 With complicated monsters head and taile,
 Scorpion and asp, and amphisbæna dire.
Id. Ib. book x. l. 523.

And fear'st thou not to see th' infernal bands,
 Their heads with snakes, with torches arm'd their hands,
 Full at thy face th' avenging brands to bear,
 And shake the serpents from their *hissing* hair?
Dryden. Ovid. Metamorphoses, book x.

Whence sudden shouts the neighbourhood surprise,
 And thundering claps and dreadful *hissings* rise.
Addison. The Playhouse.

About this time the prevalent taste for Italian operas inclined him to try what would be the effect of a musical drama in our own language. He therefore wrote the opera of Rosamond, which, when exhibited on the stage, was either *hisséd* or neglected.

Johnson. Life of Addison.

I heard a *hissing*: there are serpents here!
Goldsmith. Prologue to Zobeide.

HIST.
—
HISTORY.

HIST, apparently formed from the Latin *nota silentii*
'St. See the Quotations from Colman and Thornton.

And the mute silence *hist* along,
'Less Philomel will deign a song,
In her sweetest, saddest plight,
Smoothing the rugged brow of night.

Milton. *Il Penseroso*, l. 55.

DAVIES. *Hist!* hold awhile: (*hem, 'st, mane*)
I hear the creaking of Glycerium's door.

Colman. *Terence. The Andrian*, act iv. sc. 3.

CLEOSTRATA. 'St. Hold your tongue, and get you gone,
(*'St. tace atque abi.*)

Thornton. *Plautus. The Lots, (Casina,)* act ii. sc. 1.

EPIDICUS. *Hist!* silence! be of good heart.

Id. The Discovery. (Epidicus.)

PSEUDOLUS. 'St! 'st. This is my man.

Id. The Cheat, (Pseudolus,) act ii. sc. 2.

HISTER, in Zoology, a genus of *Pentamerous, Herbivorous, Coleopterous* insects, allied to the family *Sca-rabæidæ*, established by Linnæus.

Generic character. Maxillary *palpi* much shorter than the head, and longer than those which are labial, the latter ending in a long conical or hatchet-shaped joint; *antennæ*, inserted into a pectoral groove, of seven joints, the first very long, the last three forming an ovoid club; mandibles prominent, large, protected beneath by the prominent front of the sternum; body nearly globular; *elytra* truncated, squarish.

These insects live in dung, and also in putrid wood; they run rapidly, and when touched counterfeit being dead, by contracting their limbs and suspending all movements. Latreille has described the *larvæ* of one species, and Paykul (*Monog. Histeroides*, 1811) has published a description and figures of all the species of the genus, and he has divided from them the genus *Holopterus*, which of old formed part of it.

The species are very numerous: no less than thirty-five have been described. Of these the *H. semi-punctatus*, *Brunneus*, *Pygmæus*, *Depressus*, *Sulcatus*, *Dodecim striatus*, *Violaceus*, *Virescens*, *Piceus*, *Maculatus*, *Æneus*, *Parvus*, *Inæqualis*, *Quadrigitatus*, *Perpusillus*, and *Minimus*, all have been found in Britain.

Fr. *histoire*; It. and Sp. *historia*; Lat. *historia*; Gr. *ιστορία*, from *ἵστωρ*, science, knowing or having knowledge; from *ἵσθαι*, to know.

Knowledge; sc. of things done, of deeds or facts; also the tale or narration of them; the relation, the record of them.

So was his name, for it is no fable,
But known for an *historial* thing notable.

Chaucer. *The Doctoures Tale*, v. 12090.

These things to be true our prelates know by open *histories* as well, as whē it is noone, the sun is flat south.

Tyndall. *Exposition on 1 John*, ch. ii. fol. 398.

All the *historiall* partes of the Bible, be ryght necessary for to be redde of a noble man, after that he is mature in yeres.

Sir Thomas Elyot. *The Governour*, book i. ch. xi.

Among the Romayns Quintus Fabius for this qualitie [circum-spection] is soueraignely extolled amonge *historiens*.

Id. Ib. ch. xxiii.

That there are two manner faythes, an *historicall* fayth, and a *feelyng* fayth. The *historicall* fayth hangeth of the truth and honestie of the teller, or of the common fame and cōsent of many.

Tyndall. *Whether the Pope, &c. be of Christes Church*, fol. 267.

Now wyll I shewe *hystorycallye* the forme and fashyon of that popysh vowinge, that it may be knowne dyuerse frō y^e ceremonial vowes in y^e scriptures.

Bale. *Apology*, fol. 21.

And such as be *historiographers*,
Trust not to much, in euery tatlyng tong,
Nor blynded be, by partialitie.

Gascoigne. *The Steele Glas*.

Right well I wote, most mighty soveraine,
That all this famous antique *history*,
Of some th' aboundance of an idle braine
Will iudged be, and painted forgery
Rather then matter of iust memory.

Spenser. *Faerie Queene*, book ii. can. 1.

For it was well noted by that worthy gentleman Sir Philip Sidney, that *historians* do borrow of poets, not only much of their ornament, but somewhat of their substance.

Raleigh. *History of the World*, book ii. ch. xxi. sec. 6.

As it is true, that he [Xenophon] described in Cyrus the pattern of a most heroical prince, with much poetical addition: so it cannot be denied, but that the bulk and gross of his narration was founded upon mere *historical* truth.

Id. Ib. book iii. ch. ii. sec. 3.

He [Thucid.] setteth down *historically*, the kind and manner of this plague; as he might well do, having himself been taken with it, and oft in company with those who were sick thereof.

Usher. *Annals, Anno Mundi* 3574.

John de Hexam and Richard de Hexham (were) two notable *historicians*
Holinshed. Richard I. Anno 1199.

I must *historifie*, and not divine.

Stirling. *Doomes-day. The second Houre*.

Above proud princes, proudest in their theevery,
Thou art exalted high, and highly glorified;
Their weake attempt, thy valiant delivery,
Their spoile, thy conquest meete to be *historified*.

Sidney. *Psalm* 76.

In the beginning of this [the Peloponnesian] war, there flourished 3 noble *historiographers*, Hellicanus, of the age of 65, Herodotus, 53, and Thucidides, 40 years old.

Usher. *Annals. Anno Mundi* 3573.

Nothing further being fit to be recorded of them; the Holy Writer would not, like most *history-mongers*, try his skill to make up their story.

Grew. *Cosmo-Sacra*, book iv. ch. iii.

Secondly, we have likewise a most ancient and credible *history* of the beginning of the world; I mean the *history* of Moses, with which no book in the world in point of antiquity can contend.

Tillotson. *Sermon* 1.

It is sufficient to my present purpose that Moses have the ordinary credit of an *historian* given him, which none in reason can deny him, he being cited by the most ancient of the Heathen *historians*, and the antiquity of his writings never questioned by any of them, as Josephus assures us.

Id. Ib.

There were many that did see the ark, yet lost their lives, because they were without it. So many have an *historical* knowledge, yet because they are not united to Christ, they receive no benefit.

Bates. *On Divine Meditation*, ch. ix.

The schemes of the several writers have been for this end here re-presented; the grounds, occasion, and method of their writing *historically* related.

Nelson. *The Life of Dr. George Bull*.

Such have been willing to look into Queen Elizabeth's reformation, and to satisfy themselves about it at the first hand, and not implicitly to depend upon the later *historiographers* of these matters.

Strype. *Life of Parker. Epistle Dedicatory*.

Thucydides, an Athenian, hath compiled the *history* of the war between the Peloponnesians and the Athenians, as managed by each of the contending parties.

Smith. *Thucydides*, book i.

HISTORY. To rescue from oblivion the memory of former incidents, and to render a just tribute of renown to the many great and wonderful actions, both of Greeks and Barbarians, Herodotus of Halicarnassus produces this *historical* essay.

Beloe. Herodotus. Clio, ch. i.

My first introduction to the *historic* scenes, which have since engaged so many years of my life, must be ascribed to an accident.

Memoirs of the Life of Gibbon, (by himself.)

The obvious question (if each (the unbeliever and the advocate of religion) be willing to bring it to a speedy decision) will be, "Whether the extraordinary providence thus prophetically promised, and afterwards *historically* recorded to be performed, was real or pretended only?"

Warburton. The Divine Legation, book vi. sec. 6.

The beauties at Windsor are the Court of Paphos, and ought to be engraved for the *Mémoires* of its charming *historiographer*, Count Hamilton.

Walpole. Anecdotes of Painting, vol. iii. p. 28.

Even the *historian* takes great liberties with facts, in order to interest his readers, and make his narration more delightful; much greater right has the painter to do this, who though his work is called *history-painting*, gives in reality a poetical representation of facts.

Sir Joshua Reynolds. The Art of Painting, note 13. v. 119.

HISTRIONELLA, in *Zoology*, a genus of *Infusorial* animals, established by Bory St. Vincent, belonging to the family *Cercariæ*.

The type of the genus is *Enchelis pupula*, Muller, *Infus. pl. v. fig. 21. 24.*

HISTRIONICK, } For the origin of the word
HISTRIÓNICAL, } and its application, see the Quo-
HISTRIONISM. } tations from Plutarch and Livy.

Vossius prefers the account of the latter.

He who was of greatest reputation, and had carried the name longest in all theatres, for his rare gift and dexterity that way, was called *Hister*; of whose name all other afterward were termed *Histriones*.

Holland. Plutarch, fol. 725.

And heerevpon our owne countrie actors and artificiall professors of this feate were called *Histriones*, of *Hister*, a Tuscan word, which signifieth a player or dauncer.

Id. Livius, fol. 250.

The mischief proceeded wholly from the Presbyterian preachers, who by a long practised *histrionic* faculty preached up the rebellion powerfully.

Hobbes. Behemoth, part iv.

The crisp'd, perfum'd, belac'd, befooled Wights,

Jetting in *histrionick* pride I saw.

Beaumont, Psyche, can. 20.

When personations shall cease, and *histrionism* of happiness be over; when reality shall rule.

Brown. Christian Morality, vol. iii. p. 24.

In consequence of his [Edwards's] love and his knowledge of the *histrionick* art, he taught the choristers over which he presided to act plays; and they were formed into a company of players, like those of Saint Paul's Cathedral; by the Queen's license under the superintendency of Edwards.

Warton. History of English Poetry, vol. iii. p. 285.

HIT, v. } Minshew ingeniously (as Skinner
HIT, n. } thinks) derives from the Lat. *ictus*. Ju-
HITTING. } nius from the Danish *hitle*, *temerè* projicere, to throw out rashly; Lye from the Sw. *hitta*, which Serenius interprets *invenire*, *pertingere*, to find, to reach or touch. Robert of Gloucester writes *anhytt*; and it is not improbably from the A. S. *yttian*, *uttian*, to out, to throw out; and, consequentially,

To touch or reach the mark or object aimed at; to strike, to smite.

To hit or strike together; take the same aim, act in union, agree.

Þe kȳng Arture aȝen þe brest ȳs felawe uorst anhytte

Aȝen þe breste, þat he vel, & ne myȝte noleng sȳtte.

R. Gloucester, p. 185.

The archers and bowemen *hit* him, and he [Saul] was sore wounded of the archers.

Geneva Bible, Anno 1561. 1 Samuel, ch. xxxi. v. 3.

VOL. XXIII.

With such impetuous furie smote,
That whom they *hit*, none on their feet might stand,
Though standing else as rocks.

Milton. Paradise Lost, book vi. l. 592.

GON. There is further complement of leaue taking betweene France and him, pray you let vs sit [*hit*] together.

Shakspeare. Lear, fol. 285.

CHO. It is not vertue, wisdom, valour, wit,
Strength, comliness of shape, or amplest merit,
That woman's love can win or long inherit;
But what it is, hard is to say,
Harder to *hit*.

Milton. Samson Agonistes, v. 1014.

Their projects *hitting* (many a day in hand)
That to their purpose prosp'rously had thriv'd,
The base whereon a mighty frame must stand,
By all their cunning that had been contriv'd.

Drayton. The Barons' Wars, book iii.

HAM. Judgement.

OSR. A *hit*, a very palpable *hit*.

Shakspeare. Hamlet, fol. 280.

Take now any one of these renderings, and it will fully *hit* the sense of my text, and avoid all the absurdities that I have been speaking of.

Sharpe. Works, vol. vi. Sermon 18.

It happen'd, as beyond the reach of wit
Blind prophecies may have a lucky *hit*,
That this accomplished, or at least in part,
Gave great repute to their new Merlin's art.

Dryden. The Hind and the Panther.

For is it imaginable, that all those various prophecies, commenced in such different periods of time, could meet so exactly in Christ by mere accident, and be drawn down through so many generations to a concurrence in his person, only by a lucky *hit*?

South. Sermons, vol. viii. p. 281.

Just as we experience it in the flint and the steel; you may move them apart as long as you please to very little purpose: but 'tis the *hitting* and collision of them that must make them strike fire.

Bentley. Sermon 2. p. 70.

After long lucubration, I have *hit* upon such an expedient, and sent you the specimen of a poem upon the decease of a great man, in which the flattery is perfectly fine, and yet the poet perfectly innocent.

Goldsmith. Citizen of the World, let. 105.

HITCH, v. } Skinner says, a nautical term; to
HITCH, n. } catch or seize, and fix or affix any thing by a rope or *hook*, perhaps from the Fr. *ficher*, to fix. It is not improbably of the same origin as the word *hook*.

To raise or hoist, and, consequently, to *fix* upon a *hook*; to catch or fasten.

Another than dyd *hyche* her

And broughte a pottel *pycher*.

Skelton. Elinour Rummung.

We are told that there was an infinite innumerable company of little bodies, called atoms, from all eternity, flying and roving about in a void space, which at length *hitched* together and united; by which union and construction, they grew at length into this beautiful, curious, and most exact structure of the universe.

South. Sermons, vol. ix. p. 91.

Whoe'er offends at some unlucky time
Slides into verse, and *hitches* in a rhyme,
Sacred to ridicule his whole life long,
And the sad burthen of some merry song.

Pope. Horace, book ii. Satire 1.

I ask his pardon. At the time
He chanc'd to *hitch* into my rhyme--
But to our point.

Mason. The Dean and the Squire.

HITHE, A. S. *hyth*, *portus*, a haven or port. Somner. It is, perhaps, from the A. S. *ythian*, to flow or float. Applied to

The place where vessels *flow* or *float*, and, thus, a port or haven.

HITHE.
—
HITHER.

When the *hithe* fell into the hands of King Stephen, he bestowed it on William de Ypres, who, in his piety, gave it to the Convent of the Holy Trinity, within Aldgate. *Pennant. London*, p. 473.

HITHER, *adj.* } Goth. *hidre*; A. S. *hider*; Ger. *hieher*, *hier*; Sw. *hit*. *Hidre*, or *hider*, may be a compound of *hit* (*i. e.* the pronoun *it*) and *here*.
HITHER, *adv.* }
HITHERMOST, }
HITHERTO, } The adverb is used when the
HITHERWARD, } speaker means to express motion
HITHERWARDS. } to the place where he himself is.

To this place; to the place nearest; met. to this point, to this subject; to this effect, to this end.

Hither, *adj.* near.

Heore seyles heo spredeþ in þe se, & *hyder* comeþ y wis.
R. Gloucester, p. 133.

For Gyneman was for þe Stonhenge *hiderward* ȝet wroþ.
Id. p. 150.

Suane of Danmark at Sandwýche gan arýue,
& brouht *hider* with him his sonne, þat hight Knoute.
R. Brunne, p. 42.

He saith to Thomas, putte yn here thi fyngir, and se myne hondis, and putte *hider* thin hond & putte into my side, & nyle thou be un-bileful but feithful.
Wiclif. John, ch. xx.

Said he to Thomas; bringe thy fynger *hether*, and se my hædes, and brynge thy hande and thruste it into my side, and be not faithlesse, but beleuinge.
Bible, Anno 1551.

In an yuell tyme of the night that woman is come *hyder* to trouble vs.
Lord Berners. Froissart. Cronycle, vol. i. ch. 439.

Ambassadors were sent to the cities of the *hythermost* part of Spain vnto Aquitaine.
Arthur Goldyng. Cæsar. Commentaries, book iii. fol. 80.

Those things which haue been *hitherto*, although they haue sufficiently grieved vs, yet will we let them seeme more tollerable: but this most malicious deuise, and those which follow we cannot easily brooke.

Hakluyt. Voyages, &c. vol. i. fol. 578. *True State of Island.*

Sirs, aduyse you well, for Sir Johan Chandos is departed frō Poic- ters, with mō thā CC. speares, and is comyng *hyderward* in great hast, and hath gret desyre to fynd you here.

Lord Berners. Froissart. Cronycle, vol. i. ch. 266.

That which is eternal cannot be extended to a greater extent at the *hithermost* and concluding extreme, as I may call it, for at the *hither* end it is *quasi quid finitum*.

Hale. Origin of Mankind, sec. i. ch. vi.

After these,
But on the *hither* side a different sort
From the high neighbouring hills, which was their seat,
Down to the plain descended.

Milton. Paradise Lost, book xi.

Dear Country, O I have not *hither* brought
These arms to spoil, but for thy liberties:
The sin be on their head that this have wrought,
Who wrong'd me first, and thee do tyrannize.
Daniel. History of the Civil Wars, book i.

This evening from the sun's decline arriv'd
Who tells of some infernal spirit seen
Hitherward bent (who could have thought?) escap'd
The barrs of hell, on errand bad no doubt:
Such where ye find, seize fast, and *hither* bring.
Milton. Paradise Lost, book iv. l. 795.

— This subject for heroic song
Pleas'd me long choosing, and beginning late;
Not sedulous by Nature to indite
Warrs, *hitherto* the onely argument
Heroic deem'd.
Id. Ib. book ix. l. 28.

VERN. Pray God my newes be worth a welcome, Lord.
The Earle of Westmoreland, seuen thousand strong,
Is marching *hither-wards*, with Prince John.
Shakspeare. Henry IV. First Part, fol. 66.

That the money which should be raised upon the sale of those cannon, was the only means he had to remove himself out of France, which he intended shortly to do and to go into the *hither* parts of Germany.
Clarendon. History of the Rebellion, vol. iii. part ii. book xiv. p. 521.

HITHER.
—
HIZZ.

To these abodes our fleet Apollo sends;
Here Dardanus was born, and *hither* tends,
Where Thuscan Tiber rolls with rapid force,
And where Nomicus opes his holy source.
Dryden. Virgil. Æneis, book vii.

He that shall consider your lordship's proceeding with me from the beginning, as far as it is *hitherto* gone, may have reason to think, that the methods and management of that holy office [the Inquisition] are not wholly unknown to your lordship, nor have escaped your reading.

Locke. Works, vol. i. p. 435. *Second Reply to the Bishop of Worcester.*

If I succeed to God thy thanks repay,
Who for thy succour *hither* wing'd my way.
For Him alone be all thy vows fulfill'd,
To Him thy altars raise, thy temples build.
Hoole. Orlando Furioso, book xxxiii.

Europe, however, has *hitherto* derived much less advantage from its commerce with the East Indies, than from that with America.
Smith. Wealth of Nations, book iv. ch. i.

HIVE, *v.* } A. S. *hyfe*, perhaps, says Skinner,
HIVE, *n.* } from *hiwe*, a family, a house; and there
HIVELESS, } is little doubt that both are from the
HIVER. } A. S. *hiwan*, *formare*, *fabricare*, to frame or fashion, to fabricate.

A place framed, fabricated or built; (*e. g.* for bees.) Also applied to the family of bees themselves; to any swarm, or numerous assembly or company.

Al day as thick as beene flien from an *hive*.
Chaucer. Troilus, book iv. fol. 182.

But when bare beggrie bids them to beware,
And late repentance rules them to retire,
Like *hivelesse* bees they wander here and there
And hang on them who (earst) did dread their ire.
Gascoigne. Hearbes. Fruit of Reconciliation.

The bees are *hiv'd*, and hum their charm,
Whilst every house does seem a swarm.
Cotton. Evening Quatrains.

Thus we were made the bees of holy church, suffer'd to work and store our *hives* as well as we could; but when they waxed any thing weighty, his legates were sent to drive them and fetch away the honey.
Spelman. Dialogue on the Coin of the Kingdom.

— As bees
In Spring time, when the Sun with Taurus rides,
Pour forth their populous youth about the *hive*
In clusters.
Milton. Paradise Lost, book i. l. 770.

Whene'er their balmy sweets you mean to seize,
And take the liquid labours of the bees,
Spirt draughts of water from your mouth, and drive
A loathsome cloud of smoke amidst their *hive*.
Addison. Virgil. Georgic 4.

Let the *hiver* drink a cup of good beer, and wash his hands and face therewith.
Mortimer. Husbandry.

He [the indolent man] is a drone in the *hive* which consumes the honey of the laborious, and he retains all, who are unfortunately dependant upon him, in a state of poverty and want, from which his exertions might have extricated them.
Cogan. On the Passions, vol. iii. p. 67. *On the Virtue of Prudence.*

HIZZ, *i. e.* to hiss, *q. v.*

LEAR. To haue a thousand with red burning spits
Come *hizzing* in vpon 'em.
Shakspeare. Lear, fol. 299.

The wheels and horses' hoofs *hizz'd* as they pass'd them o'er.
Cowley. The Extasy.

That man who is not pierced with a mortal wound, yet if he is continually pulling arrows out of his flesh, and hearing bullets *hizzing* about his ears, and death passing by him but at a distance of an hair's breadth, has surely all that fear, and danger, and destruction, in the nearest approach of it, can contribute to make himself miserable.
South. Sermons, vol. vi. p. 266.

HO. } Like the Lat. *hoi*, *heu*, *eho*, seems to be a
HOA, } mere cry or call, to arrest attention, and the
HOH, } written word formed from the sound. It is
applied, as a warning that the person called to is seen;
that the thing doing is done sufficiently; and, conse-
quentially, a notice to desist, cease, stay, stop. As in
Lord Berners it is used as a noun, equivalent in signifi-
cation to

Stop, stay, cessation—in Ritson as a verb.

Archdeacon Nares remarks, that *Ho*, *Ho*, is an esta-
blished Dramatic exclamation given to the Devil when-
ever he makes his appearance upon the stage, and refers
to the passage cited below from Ben Jonson.

This duke his courser with his spurres smote,
And at a stert he was betwixt hem two,
And pulled out a swerd and cried, "Ho!
No more, up peine of lesing of your hed."

Chaucer. *The Knightes Tale*, v. 1709.

Then seyde dame Beulybon,
Syr, y rede, be Seynt John,
Of warre that ye *hoo*;
Ye have the wronge and he the ryght,
And that ye may see in syght,
Be thys and othyr moo.

Ritson. *Met. Rom.* vol. iii. fol. 99. *The Erle of Tolous*, l. 152.

For whan they mete there is a hard fight without sparynge; there
is no *hoo* bytwene them as longe as speares, swordes, axes, or daggers
wyll endure, but lay on eche vpon other.

Lord Berners. *Froissart. Cronycle*, vol. ii. ch. 142.

ROB. *Ho, ho, ho*; coward, why com'st thou not?

DEM. Abide me, if thou dar'st.

Shakspeare. *Midsummer Night's Dream*, fol. 156.

Here dwells my father. JEW. *Ho*, who's within?

Id. *Merchant of Venice*, fol. 170.

Hoh, hoh, hoh, hoh, hoh, hoh, hoh, hoh, &c.
To earth? and, why to earth, thou foolish Spirit?
What woldst thou do on earth?

Ben Jonson. *The Divell is an Asse*, act i. sc. 1.

HOAR, v.

HOAR, n.

HOAR, adj.

HO'ARY,

HO'ARINESS,

HO'ARISH,

HOAR-FROST,

HOAR-HEAD.

A. S. *har-ian*, *canescere*, to wax
grey or hoary, *it. mucescere*, to grow
musty, mouldy, or hoary, Somner.

To whiten, to be or become grey;
and, consequentially, mouldy, musty,
fenowed, or vinewed.

And panne mette ich with a man. on mydientes soneday
As *hor* as an haweporn.

Piers Plouhman. *Vision*, p. 314.

And yet ne greveth me nothing so sore,
As that the olde cherl, with lokkes *hore*,
Blasphemed hath oure holy covent eke.

Chaucer. *The Sompnoures Tale*, v. 7764.

And gan search, and seeke wonder sore
Among the hills and the holts *hore*.

Lidgate. *Story of Thebes*, part i.

But Nestor, whiche was olde and *hore*,
The salue sawe tofore the sore,
As he that was of counseile wise.

Gower. *Conf. Am.* book iii. fol. 58.

His *hore* heres were awaie,
And liche vnto the fresshe maie,
Whan passed bene the colde shoures:
Right so recouereh he his floures.

Id. *Ib.* book v. fol. 106.

Thys our prouysion of bread, we toke with vs out of our houses,
whotte, the day we departed to come vnto you. And now beholde,
it is dryed up and *hored*.

Bible, Anno 1551. *Joshua*, ch. ix.

The white and *horish* heeres, the messengers of age,
That shew like lines of true belief, that this life doth asswage.
Surrey. *No Age is content*, &c.

Their courage they let fall, his princely robes Latinus rentes,
His *hoarie* head (good man) an auntient beard with durt besprentes,
Amazed at his ladies death, and at the cities fall.

Phaer. *Virgil. Aeneidos*, book xii.

An old hare *hoare*, and an old hare *hoare* is very good meat in Lent.
But a hare that is *hoare* is too much for a score, when it *hoares* ere
it be spent.

Shakspeare. *Romeo and Juliet*, fol. 62.

That ferryman
With his stiff oares did brush the sea so strong,
That the *hoare* waters from his frigot ran.

Spenser. *Faerie Queene*, book ii. can. 12.

Hoariennesse, *vinewednesse*, or *mouldinessse*, comming of moisture,
for lacke of cleansing.

Barret. *Alvearie*.

For time in passing weares,
(As garments doen, which wexen olde above,)
And draweth newe delights with *hoarie* haire.

Spenser. *Shepherd's Calendar*. June.

In a *hoar-frost*, that which we call rime, is a multitude of qua-
drangular prisms, exactly figured, but piled without any order, one
above another.

Grew. *Cosmo-Sacra*, book i. ch. iv.

And, have I taken
Thy bawd, and thee, and thy companion,
This *hoarie-headed* letcher, this old goat,
Close at your villanie, and would'st thou 'scuse it,
With this stale harlot's jest, accusing mee?

Ben Jonson. *Every Man in his Humour*.

What grief, what shame,
Attend on Greece, and all the Grecian name!
How shall, alas! her *hoary* heroes mourn
Their sons degenerate, and their race a scorn.

Pope. *Homer. Iliad*, book vii.

He [Lycaon] grows a wolf, his *hoariness* remains,
And the same rage in other members reigns.

Dryden. *Ovid. Metamorphoses*, book i.

And now the mounting sun dispels the fog;
The ridged *hoar-frost* melts before his beam;
And hung on every spray, on every blade
Of grass, the myriad dew-drops twinkle round.

Thomson. *Autumn*.

Thy Muse may, like those feathery tribes which spring
From their rude rocks, extend her skirting wing.
Round the moist marge of each cold Hebrid Isle,
To that *hoar* pile, which still its ruin shows.

Collins. *Ode on the Popular Superstitions of the Highlands of Scotland*.

He hears the wilderness around him howl
With roaming monsters, while on his *hoar* head
The black-descending tempest ceaseless beats.

Warton. *The Pleasures of Melancholy*.

Is this the land, o'er Shenstone's recent urn
Where all the Loves and gentler Graces mourn?
And where, to crown the *hoary* bard of night,
The Muses and the Virtues all unite.

Beattie. *On a supposed Monument to Churchill*.

First arose in song
Hoar-headed Damon, venerable swain,
The southeast shepherd of the flowery vale.

Dyer. *The Fleece*, book i.

HOARD, v.

HOARD, n.

HO'ARDER,

HO'ARDING, n.

A. S. "*Hordan*, *thesaurizare*, to

hoard, treasure, store, lay or hide

up." Somner; and this from the

A. S. *hyrd-an*, *custodire*, to guard

or keep. See HERD.

A *hoard*, that which is *guarded* or *kept*, sc. as a store
or treasure.

To *hoard*; consequentially, to lay up, to store or
treasure up.

Hire mouth was swete as braket or the meth,
Or *hord* of apples, laid in hay or beth.

Chaucer. *The Milleres Tale*, v. 3262.

For he that gapes for good, and *hordeth* all his gayne,
Trauells in vayne to hide the sweet, that should releue his payne.

Surrey. *Ecclesiastes*, ch. iv

HOARD.
—
HOARSE.

Like to some rich churl *hoarding* up his pelf,
Both to wrong others, and to starve himself.
Drayton. Legend of Matilda.

And happy alwayes was it for that sonne
Whose father for his *hoording* went to hell.
Shakspeare. Henry VI. Third Part, fol. 154.

He disperseth, and is therefore not tenacious, doth not *hoard* up his goods, or keep them close to himself, for the gratifying his covetous humour, or nourishing his pride, or pampering his sensuality, but sendeth them abroad for the use and benefit of others.

Barrow. Sermon 31. vol. i.

It is not the spending-money a man has in his pocket, but his *hoards* in the chest, or in the bank, which must make him rich.

South. Sermons, vol. iv. p. 22.

One would think, that all man's gettings and *hoardings* up, during his youth, ought to pass but for charity and compassion to his old age; which must either live and subsist upon the stock of former acquisitions, or expect all that misery, which want, added to weakness, can bring upon it.

Id. Ib. vol. iv. p. 450.

The world is then properly used, when it is generously and beneficially enjoyed; neither *hoarded* up by avarice, nor squandered by ostentation.

Blair. Sermon 16. vol. iii.

As some lone miser, visiting his store,
Bends at his treasure, counts, recounts it o'er;
*Hoard*s after *hoards* his rising raptures fill,
Yet still he sighs, for *hoards* are wanting still:
Thus to my breast alternate passions rise,
Pleas'd with each good that heaven to man supplies,
Yet oft a sigh prevails, and sorrows fall,
To see the *hoard* of human bliss so small.

Goldsmith. The Traveller.

We can say nothing farther to the *hoarders* of this world; if they refuse to govern themselves by such enquiries, we must leave them to take their chance with him who pulled down his barns to build greater.

Gilpin. Sermon 5. vol. iv. p. 76.

HOARHOUND, A. S. *harahune, harhune*. Minshew thinks so called because it is *hoary*, and of service against the bites of mad dogs or *hounds*.

White Hoarhound is the trivial name of the *Marrubium alyson* of Linnæus. Black Hoarhound is the *Ballota nigra*.

And for all kind of poisons, few hearbs are so effectual as *horehound*; for it selfe alone, without any addition, cleanseth the stomacke and breast, by retching and fetching up the filthie and rotten fleame there engendred.

Holland. Plinie, book xx. ch. xxi.

This is the Clote bearing a yellow flower,
And this black *Hore-hound*, both are very good
For sheep or shepherd, bitten by a wood-
Dog's venom'd tooth.

Beaumont and Fletcher. The Faithful Shepherdess, act ii.

HOARSE,
HO'ARSELY,
HO'ARSENES,
HOARSE-RESOUNDING,
HOARSE-SOUNDING.

A. S. *has*; D. *hees, heesch*; Ger. *heisch, heiser*; Sw. *hees*; The English word, (says Wachter,) which alone retains *r* in the middle of it, seems to lead to *hreis, hreisch*, formed from the Lat. *raucus*. Skinner thinks the words all formed from the sound; *asperitate enim suâ raucedinem exprimunt*. Not improbably the same word as *harsh*, differently written and applied.

Harsh, rough, of sound, of voice.

And as I lay thus wonder lowde
Me thought I herde a hunt blowe
T' assay his great horne, and for to knowe
Whether it was clere, or horse of sowne.

Chaucer. The Dreame, fol. 241.

Or when by Padus riuer shoare
The *horcey* swannes do list their lay, the bankes the same do roare.

Phaer. Virgil. Æneidos, book xi.

The wodhacke that singeth churre
Horsley as hee had the murre.

Skelton. The Boke of Philip Sparow.

HOARSE.
—
HOB.

Then if the Muses can forbid to die,
As we their priests suppose, why may not I,
Although the least and *hoarsest* in the quire,
Cleare beames of blessed immortality inspire
To kepe thy blest remembrance euer young?
Beaumont. To the Memory of Lady Clifton.

I oft have heard him say, how hee admir'd
Men of your large profession, that could speak
To every cause, and things meere contraries,
Till they were *hoarse* againe, yet all be law.

Ben Jonson. The Fox, act i. sc. 3.

The winds have learn'd to sigh, and waters *hoarsely* groan.

G. Fletcher. Christ's Triumph over Death.

Soveraigne it is for the dropsie and *horsenesse* of the throat; for presently it scoureth the pipes, cleareth the voice and maketh it audible.

Holland. Plinie, book xxii. ch. xxiii.

So when Jove's block descended from on high,
(As sings thy great forefather Ogilby,)
Loud thunder to its bottom shook the bog,
And the *hoarse* nation croak'd, God save King Log.

Pope. The Dunciad, book i. v. 330.

Doth not bold Sutherland the trusty,
With heart so true, and voice so rusty,
(A loyal soul) thy troops affright,
While *hoarsely* he demands the fight.

Tickel. Horace, book ii. ode 15. An Imitation.

So when no more the storm sonorous sings,
But noisy Boreas hangs his weary wings;
In hollow groans the falling winds complain,
And murmur o'er the *hoarse-resounding* main.

Rowe. Lucan, book v.

Thus the *hoarse* tenants of the sylvan lake,
A Lycian race of old, to flight betake;
All, sudden plunging, leave the margin green,
And but their heads above the pool are seen.

Mickle. The Lusiad, book ii.

The symptoms that succeeded these were sneezing and *hoarseness*; and not long after the malady [the plague] descended to the breast, with a violent cough.

Smith. Thucydides, book ii. The Peloponnesian War, Year 2.

But who can number every sandy grain
Wash'd by Sicilia's *hoarse-resounding* main.

West. Olympic Odes.

Portentous now along the winding shores
Hoarse-sounding Pegasæan Neptune roars.

Id. Apollonius Rhodius.

HOB,
HOB-NAIL,
HOB-NAILED.

Serenius refers to the Ger. *hube*, *hufe*, (Low Lat. *hoba*.) *fundus rusticus*; whence Wachter deduces *hubne, colonus*; and *hube*, or *hufe*, he derives from the A. S. *hiwan, formare, fabricare*. (See *HIVE, ante.*) But it does not appear customary to derive from an A. S. root, through the medium of the German. *Hob* is, perhaps, (see *HOBBLE*.) from A. S. *hoppan*, to *hop*; applied to any irregular, uneven, and, thus, awkward, clumsy gait or motion; and then to

An awkward, clumsy, clownish fellow.

The *hobbes* as wise as grauist men,
rid from their trauaile sore
The most vntowarde and vntaught,
most contemptible clowne,
As perte as pye dothe presse amongst
the wysest of the towne.

Drant. Horace. The Arte of Poetry.

Contented to haue please the wyse,
lette go the skyllesse *hobbes*,
Who would esteeme the clappynge of
a flocke of luskyshe lobbes.

Id. Ib. Satire 10. book i.

Hemp and *hobnails*

Will bear no price now.

Beaumont and Fletcher. The Mad Lover, act i.

Hee has not so much as a good phrase in his belly, but all old yron, and rustie proverbs! a good commodity for some smith to make *hob-nayles* of.

Ben Jonson. Every Man in his Humour, act i. sc. 5.

HOB. Next, the word politician is not used to his maw, and therupon he plays the most notorious *hobby-horse*, jesting and striking in the luxury of his nonsense with such poor fetches to cog a laughter from us, that no antic *hob-nail* at a morris, but is more handsomely facetious.
Milton. *Colasterion*.

Come on clownes, forsake your dumps,
And bestirre your *hob-nail'd* stumps.
Ben Jonson. *A Particular Entertainment*, &c.

And some rogue soldier, with his *hob-nail'd* shoes,
Indents his legs behind in bloody rows.
Dryden. *Juvenal. Satire 3*.

The words HOB NOB are explained by Grose in his *Provincial Glossary* in a manner which all other Etymologists and commentators have rejected *und voce*. "This foolish custom is said to have originated in the days of good Queen Bess, thus: When great Chimneys were in fashion, there was at each corner of the Hearth or Grate a small elevated projection called the *Hob*, and behind it a seat. In winter time the Beer was placed on the *Hob* to warm, and the cold Beer was set on a small table said to have been called the *Nob*; so that the question, 'Will you have *Hob* or *Nob*?' seems only to have meant, will you have warm or cold Beer? *i. e.* Beer from the *Hob* or Beer from the *Nob*."

In like manner in an extract from a Newspaper, written in the year 1772, cited in a note on Brand's *Popular Antiq.* ii. 242, the phrase is considered to be a corruption of *Hob* or *no Hob*?

Blount and Skinner have derived the words (which seem to have been written indifferently *hab nab* or *hob nob*) from the Anglo-Saxon *habban*, to have, and *nabban*, not to have. According to this derivation, Archdeacon Nares fully explains the phrase "Have or have not; hit or miss; at a venture;" and thus it is frequently used—as in *Hudibras*, "set down *hab-nab*, at random." (ii. 3. 987.) Reed, in a note on *Twelfth Night*, (iii. 4.) has expounded the convivial application, "Do you choose a glass of wine, or will you rather let it alone?"

HO'BBLE, v. } The A. S. *hoppa*, *hoppetan*; Ger.
HO'BBLE, n. } *hupfen*; D. *hippelen*, *huppen*, *hup-*
HO'BBLER. } *pelen*, *hubbelen*; Sw. *hoppa*; sub-
silire, to hop; and of this *hobble* is a diminutive.

To move with a *hopping*, uneven, unsteady, irregular gait or step; to move or walk awkwardly, lamely; with pain and difficulty; to be, or cause to be, in difficulty, in perplexity, to perplex. And *hobble*, the noun, met.

A difficulty, perplexity, or embarrassment

We haunten no tauernes, ne *hobelen* abouten
At marketes, and miracles we medeley vs neuer.
Piers Plouhman. *Crede*, book iii.

HED. See, see, this is strange play!
ANA. 'Tis too full of uncertaine motion; he *hobbles* too much.
Ben Jonson. *Cynthia's Revells*, act v. sc. 4.

NUR. And dances like a town-top; and reels, and *hobbles*.
Beaumont and Fletcher. *The Night-Walker*, act i.

The same folly hinders a man from submitting his behaviour to his age, and makes Clodius, who was a celebrated dancer at five and twenty, still love to *hobble* in a minuet, though he is past threescore.
Spectator, No. 301.

An old woman, crooked with age, and cloathed in tatters, came *hobbling* on her little stick into the room, and, after heaving a groan, calmly sat down, dressed the child in its rags, then divided the loaf as far as it would go, and informed the poor man that the church-wardens, to whom she had gone, would send some relief.
Knox. *Essays*, No. 148.

Here, again, attention to his hoop will soon convince him of the truth of the axiom. If it *hobbles* in its motion, upon perfectly level ground, it cannot be a perfect circle.
Cogan. *Ethical Questions*, p. 418. note B

HO'BBY, } Fr. *hobin*; It. *ubino*. Skinner }
HO'BBY-HORSE, } derives from the Dan. *hoppa*, a mare. }
HO'BBLER. } Serenius thinks that *hobby*, and the }
Dan. and Isl. *hoppa* have the same origin as *hobble*, (q. v.) }
viz. the A. S. *hoppa*. If so, and it seems probable, the }
name must have been applied to the horse from its pace: }
—an easy, ambling pace, neither trot nor gallop; in }
which the feet are carried unevenly and not straight out.

Hobby-horse, a horse any one takes pleasure, from the easiness of its pace, in continually riding on; and thus, a favourite horse; and met. a favourite object or pursuit. Sterne coins the adjective and adverb, *hobby-horsical* and *hobby-horsically*, and seems, if not to have introduced, at least to have rendered popular, this met. usage.

Hobblers, (low Lat. *hobellarii*,) so called, because they rode on *hobbies*. See HOBBY.

Thereof the report grew, that the Irish *hobbie* will not hold out in traueiling. You shall haue of the third sort a bastard or mongrell *hobbie*, neere as tall as the horse of seruice, strong in traueiling, easie in ambling, and verie swift in running.

Holinshed. *Description of Ireland*, ch. ii.

Hauing with them to the number of eight hundred men of armes, five hundred *hoblers*, and ten thousand men on foot.

Id. *Edward II. Anno 1321*.

There was of earles, lords, knights, and gentlemen, to the number of two thousand men of armes; and of such armed men as they called *hoblers*, set fourth by burrowes and good townes twentie thousand.

Id. *History of Scotland, Anno 1342*.

The battels thus ordered, mounted on a white *hobby*, he rode from rank to rank to view them; encouraging every man that day to have regard to his right and honour.

Baker. *Edward III. Anno 1346*.

There should you see another of these cattle,
Give him a pound of silver for a rattle;
And there another, that would needsly scorse
A costly jewel for a *hobby-horse*.

Drayton. *The Moon-Calf*.

Sog. Signior, now you talk of a *hobby-horse*, I know where one is, will not be given for a brace of angells.

Ben Jonson. *Every Man out of his Humour*, act ii. sc. 1.

When members knit, and legs grow stronger,
Make use of such machine no longer;
But leap *pro libitu*, and scout
On horse call'd *kobby*, or without.

Prior. *Epistle to Fleetwood's Shepherd*, May 14, 1689.

Instead of wit, and humours, your delight
Was there to see two *hobby-horses* fight.

Dryden. *Epilogue 23*.

In like manner, when reason, by the assistance of grace, has prevailed over and outgrown the encroachments of sense, the delights of sensuality are to such an one but as an *hobby-horse* would be to a counsellor of state, or as tasteless as a bundle of hay to an hungry lion.

South. *Sermons*, vol. i. p. 10.

Bring me the bells, the rattle bring,
And bring the *hobby* I bestrode;
When, pleas'd in many a sportive ring,
Around the room I jovial rode.

Shenstone. *Ode to Memory, Anno 1748*.

The little horses of Wales and Cornwall, the *hobbies* of Ireland, and the shelties of Scotland, though admirably well adapted to the uses of those countries, could never have been equal to the work of war.

Pennant. *British Zoology. Horse*.

My wife often tells me, that boys are dirty things, and are always troublesome in a house; and declares that she has hated the sight of them ever since she saw lady Fondle's eldest son ride over a carpet with his *hobby-horse* all mire.

Johnson. *The Idler*, No. 13.

The HOBBY-HORSE, as we have already stated under the head DANCING, (xx. 549.) was one of the principal characters in the ancient Morris dance; and we have

HOBBY. there referred to Mr. Douce and Mr. Tollet as the fullest authorities concerning it. Most of the particulars collected by these writers may be found, also, in Brand's *Popular Antiquities*, i. 204, &c. Mr. Tollet, who has illustrated the Morris dance from a Painted window in his possession at Betley, in Staffordshire, supposed to date from the early part of the reign of Henry VIII., (an engraving of which may be found at the end of the Vth volume of Johnson and Steevens's *Shakspeare*, 1778,) is inclined to think that the Hobby-horse was intended, in these Games, to represent the King of May; and he founds his opinion upon the gorgeous accoutrements with which the Dancer was arrayed; a crimson foot-cloth fretted with gold, a golden bit, a purple bridle with a golden tassel and studded with gold, a purple mantle with a golden border latticed with purple, a golden crown, and a purple cap with a red feather and a golden knop, (knob.)

When the May Games were consigned to rustic celebration only, and were abandoned by the Court and the Nobles, the pasteboard horse and his rider degenerated into players of buffoon tricks. The horse exhibited his "reines, careeres, pranckers, ambles, false trots, smooth ambles, and Canterbury paces," (Sampson, *The Vowbreaker, or the Faire Mayde of Clifton*, 1636,) and the rider appeared to stick daggers in his cheeks, threaded a needle, tossed an egg from one hand to another, (the "travels of the Egg," as Ben Jonson calls it, *Every Man out of his Humour*, ii. 1.) and ran through all the known feats of legerdemain. At first a ladle was suspended at the Horse's mouth to receive money, but this afterwards was borne by the attendant Fool. Dr. Plot (*Hist. of Staffordshire*, 434.) mentions a Hobby-horse dance which, within memory, (he published in 1679,) was customarily celebrated at Abbot's or Paget's Bromley, at Christmas time, on New Year's day and Twelfth day. The rider of the Hobby in this merry-making carried a bow and arrow, the latter of which passing through a hole in the bow, and stopping on a shoulder, made a snapping noise when drawn to and fro, in time to the music. With this man danced six others, carrying on their shoulders rein-deer heads, three white and three red, with the arms of the chief families connected with the town, Paget, Bagot, and Wells, "depicted on the palms of them." Mr. Douce adds, that a short time before the Revolution in France, May Games with a Hobby-horse (*un cheval*) were observed in many parts of that Country. We cannot find the passage to which he refers when he continues, that "if the authority of Minshew be not questionable, the Spaniards have the same character under the name of *tarasca*." Minshew, *ad v. Morice dance*, gives the Spanish *danza al moresco*, but nothing further.

The bitter feelings with which the Puritans regarded these innocent gambols, may be amply perceived in two long passages extracted by Mr. Douce:—the one from Beaumont and Fletcher's *Women Pleased*, (iv. 1.) the other from Stubbes's *Anatomie of Abuses*, (f. M. 2.) Mr. Gifford, in a note on Ben Jonson's *Every Man out of his Humour*, (*ut supra*), has expressed himself in a widely different manner. The Hobby-horse, he says, is now forgotten in our country sports; "we are certainly more genteel in our rural amusements than our fathers, but I doubt whether we are quite as merry or even as wise."

HOBBY, a kind of hawk. Fr. *hobereau* or *hobreau*, of uncertain Etymology. See Menage.

Though a lark will flie as well from a man as from a *hobby*, yet because there is one cause more for his dislike against the *hobby* than against the man, (namely, the deformity of their constitutions,) he will flie into the man's hand, to avoid the hawk's talons.

Digby. *Of Bodies*, ch. xxxviii.

HOBGOBLIN, Skinner says, *q. d. Rob-goblins*, from *Robin Goodfellow*, or from *Oberon, terrestrium Dæmonum Rex*, King of the Fairies. Junius thinks *hobgoblins propriè dictas* empusas, (see **EMPUSE**), because they limped upon one foot rather than walked: deriving *Hob* (it must be presumed) from A. S. *hoppa*, *sub-salire*. And see **GOBLIN**.

To brnige in as a trim deuise
an ould wyfes chat, or tale
Of wiches buggs, and *hobgoblins*,
such trashe is nought to sayle.

Drant. *Horace. The Arte of Poetry*.

Scarce set on shore, but therewithal
He meeteth Puck, which most men call
Hobgoblin, and on him doth fall
With words from phrensy spoken:
"Hoh, hoh," quoth *Hob*, "God save thy grace,
Who dress'd thee in this piteous case?
He thus that spoil'd my sov'reign's face,
I would his neck were broken."

Drayton. *Nymphidia*.

I loath thee, and defy thee!
I'll now find out a purer Helicon,
Which wits may safely feast upon,
And baffle thy *hobgoblin* Don.

Brome. *Against Corrupted Sack*.

They both approach the lady's bower,
The squire t'inform, the knight to woo her.
She treats them with a masquerade,
By furies and *hobgoblins* made.

Butler. *Hudibras*, part iii. can. 1.

The text is made to assert the several different sorts of spirits which the fables of the heathens described, hags, fairies, *hobgoblins*, spectres, demons famished with hunger, and howling in the wilderness.

Farmer. *Letters to Dr. Worthington*, let. 2.

Minshew (*ad v. HOBGOBLIN*) is much more recondite in his Etymology than he has been under *Goblin*; *tradunt nonnulli hæc nomina*, Elves and Goblins, *manasse a crudelissimâ illâ factione*, Guelphorum adversus Ghibellinos. *Hobgoblin* is one of the aliases of Robin Goodfellow or Puck, the most merry, though sometimes not the least mischievous, of our British Fairies. (Percy's *Reliques of Anc. Poet.* iii. 203.) Hence it is very probable that Brand is right when (in accordance with Skinner above) he says that *Hob* "is nothing more than the usual contraction for *Robert*." (*Pop. Ant.* ii. 359.) Archdeacon Nares, however, has either overlooked or rejects this interpretation. "*Hob*," he says, (*ad v.*) "a frequent name in old times among the common people, particularly in the country. It is sometimes used, therefore, to signify a countryman; and *hob-goblin* meant, perhaps, originally, no more than clown-goblin, or bumkin-goblin." Nevertheless in each of the two passages which he brings forward in illustration, *Hob* may very obviously be received as the vulgar contraction of *Robert*—one is from *Coriolanus*, (ii. 3.) "*Hob* and Dick;" the other, very similar to it, from an *Old Prophecy*, which is said to have occasioned Ket's Insurrection, or at least to have decided the spot at which his followers should give battle to the Earl of Warwick.

The Countrey Kuffs, *Hob*, Dick, and Hick,
With clubs and clouted shoon,
Shall fill up Dussendale
With slaughter'd bodies soon.

Hayward. *Life and Reign of Edward VI. Anno 1549*, p. 299.

Mr. Nares shows, by other examples, that *Hob*, simply was used for *Hobgoblin*, as in our extract from Drayton above.

HOBBY.
—
HOBGOBLIN.

HOCK. }
HOD. }
HOCK, or } Dampier writes it *hocks*. A. S. *hoh*,
Hox, } the *hough* of a beast. See HOUGH
HOCKS, v. }
HOCKSER, n. } To cut or maim the *hough*.

If thou inclin'st that way, thou art a coward
Which *hoxes* honestie behind, restrayning
From course requir'd.

Shakspeare. *Winter's Tale*, fol. 279.

He used to come hither in a bark, with six or seven servants, and
spend two or three months in *hocksing* and killing cattle only for their
hides and tallo^w. Dampier. *Voyages*, Anno 1676.

This way of *hocksing* bullocks seems peculiar to the Spaniards;
especially to those that live hereabouts, who are very dextrous at it.
Id. Ib.

Neither he nor any other Spaniard ever came hither afterward to
hocks cattle. Id. Ib.

The *hockser* is mounted on a good horse, bred up to the sport, who
knows so well when to advance or retreat upon occasion, that the
rider has no trouble to manage him. Id. Ib.

His arms is a *hocksing* iron, which is made in the shape of a half-
moon, and from one corner to the other is about six or seven inches,
with a very sharp edge. Id. Ib.

HOCUS-POCUS. "There were two personages
feared in the North, whom we may mention here, as
words from their names have become familiar to our-
selves. One was *Ochus Bochus*, a magician and demon,
the other was *Neccus*, a malign deity, who frequented
the waters. It is probable (Mr. Turner adds) that we
here see the origin of *hocus pocus*, and *old Nick*." *Hist. of*
Anglo-Saxons, Appendix to book ii. ch. iii. Unless, how-
ever, some usage of these words, previous to the period
assigned for their origin by Tillotson, can be produced,
this coincidence of sound and application, however sin-
gular, must still be considered as accidental. And see
Brand, *Pop. Antiq.* vol. ii. p. 416. Grey's *Hudibras*, part
iii. ch. iii. note on v. 712, where the conjecture of Tillotson
is adopted. Pegge's account attributes the corruption
of *hoc est corpus* into *hocus pocus*, to the ignorance of
the Catholic priests themselves. Ihre thinks they may
be words formed *temerè et sine sensu*.

Malone considers the modern slang *hoax* as derived
from *hocus*, and Archdeacon Nares agrees with him.

Boy. Doe they thinke this Pen can juggle? I would we had *hokos-*
pokos for 'hem then; your people, or Travitanto Tudesko.

Ben Jonson. *Magnetick Lady*, act i. Chorus.

This gift of *hocus-pocussing* and of disguising matters is surprizing.
L'Estrange.

In all probability those common juggling words of *hocus pocus*, are
nothing else but a corruption of *hoc est corpus*, by way of ridiculous
imitation of the priests of the Church of Rome in their trick of Tran-
substantiation. Tillotson. *Sermon* 26.

Our author is playing *hocus pocus* in the very similitude he takes
from that juggler, and would slip upon you, as he phrases it, a counter
for a groat. Bentley. *Free Thinking*, p. 35.

Such *hocus-pocus* tricks, I own,
Belong to Gallic bards alone.

Mason. *Horace*. Ode 8. book iv. Ode to Sir Fletcher Norton.

HOD, perhaps *hoved*, *hov'd*, *hod*; past participle of
heaf-an, to *heave*.

That which is *heaved* or *raised*; applied to a raised,
three-sided tub or trough, used by bricklayers for carry-
ing mortar.

A fork and a hook, to be tampering in clay,
A lath-hammer, trowell, a *hod* or a tray.

Tusser. *Husbandly Furniture*.

Decker and others are high in mirth at the expense of the bricklayer,
and ring the changes on the "*hod* and trowel," the "*lime* and

mortar poet," very successfully, and, apparently, very much to their
own satisfaction. Gifford. *Memoirs of Ben Jonson*.

HO'DDY-DOD, } Examples sufficiently ancient,
HO'DDY-DODDY, } and various, have not occurred
HO'DDY-PEKE, } to warrant even a conjecture as
HO'DDY-POULE, } to the original meaning of these
HO'DMAN-DOD. } words. Holland renders *cochleæ*
hoddy-dods, or shell-snails, and these Bacon calls
hodman-dods. In these words the *hod* may be *hood*,
referring to the shell that covers them.

In some of the examples below, it is plainly used as
a term of contempt.

Wherat much I wonder
How such a *hoddy-poule*
So boldly dare controule
And so malapertly withstand
The kynges owne hand.

Skelton. *Why come ye not to Court*.

Those that cast their shell are, the lobster, the crab, the cra-fish,
the *hodmandod*, or *dodman*, the tortoise, &c.

Bacon. *Natural History*, cent 8. sec. 732.

KITE. Well, good wife bawd, Cob's wife, and you
That make your husband such a *hoddie-doddie*.

Ben Jonson. *Every Man in his Humour*, act iv. sc. 8.

The running mange or tettar, is a mischeefe peculiar unto the fig-
tree: as also, to breed certaine *hoddy-dods* or shell-snailes sticking
hard thereto and eating it.

Holland. *Plinie*, book xvii. ch. xxiv.

He has more goodness in his little finger, than you have in your
whole body:

My master is a parsonable man, and not a spindle-shank'd *hoddy-*
doddy.

Swift. *Mary the Cook Maid's Letter to Dr. Sheridan*.

HODGE-PODGE, see HOTCH-POT. Lat. *hodie*, i. e.
hoc-die; *hodiernus*, of this day.

I know that this is contrary to the common opinion, not only of the
schools, but even of divers *hodiern* mathematicians.

tube very short; filaments none; anthers conniving; berry two-celled, many-seeded, inferior.

One species, *H. pedunculata*, native of Jamaica.

HOFFMANSEGGIA, in *Botany*, a genus of the class *Decandria*, order *Monogynia*, natural order *Leguminosæ*. Generic character: calyx five-parted, persisting; corolla, petals five, with claws, spreading, glandular at the base; filaments with hairy glands; stigma club-shaped; pod linear, compressed, many seeded.

Two species, natives of central America.

HOFUL, A. S. *ho-full*, *hoh-full*, *hog-full*, prudent, considerate, careful, from A. S. *hog-an*; D. *huoghen*; to be careful or considerate.

Prudent, careful, considerate.

Sir Gregory, ever *hofull* of his doings and behaviour, directed especial letters unto him.

Stapleton. Fortress of the Faith, Anno 1565, fol. 97. b.

Women serving God *hofully* and chastely

Id. Ib. fol. 419. b.

HOG,

Ho'GGEREL,

Ho'GGISH,

Ho'GGISHLY,

Ho'GLING,

HOG-COTE,

HOG-HERD,

HOG-LOUSE,

HOG-STY,

HOG'S-GREASE,

HOG'S-LARD.

A hog (says Skinner) is a sheep two years old, or in the second year of its age, perhaps from the A. S. *hog-an*, *curare*, *observare*; because at that time they need the greatest care. The same reason will more especially apply to the young of swine; if to the young only of swine the name were ever restricted.

And he coueitide to fille his wombe of the coddis that the hoggis eeten, and no man gaf him.

Wiclif. Luke, ch. xv.

They shal be shrined in a *hogges* tord.

Chaucer. The Pardoner's Tale, v. 12890.

So doo our *hoglings* sinke foorthwith,

(their head a Baccus barge)

Wine is I tell you, burtheynous,
and passing ful of charge.

Drant. Horace. Satire 8. book ii.

And to the temples first they hast, and seeke

By sacrifice, with *hogreles* (*bidentes*) of two yeares,
Chosen as ought, to Ceres.

Surrey. Virgil. Æneis, book iv.

A sty for a boar, and a *hogscote* for hog,

A roost for thy hens, and a couch for thy dog.

Tusser. Husbandly Furniture.

Abandon lust, if not for sinne,

Yeat to auoyd the shame:

So *hogges* of Ithacus his men

The Latian witch did frame.

Warner. Albion's England, book iv. ch. xxii.

But this is got by casting pearls to *hogs*.

Milton. Sonnet 12.

It is kind and naturall for rammes to make no account of young *hogrels*, but to loath them: for they had rather follow old ewes.

Holland. Plinie, book viii. ch. lxvii.

Senselesse thy *hoggish* filth, and sense thou senseless makest.

Fletcher. The Purple Island, can. 8.

Neere to the shore that bord'red on the rocke

No merry swaine was seene to feed his flocke,

No lusty neat-heard thither drove his kine,

Nor boorish *hog-heard* fed his rooting swine.

Browne. Britannia's Pastorals, book ii. song 1.

Where now weake waters luxurie,
Must make my death blush; one heaven-bore, shall like a *hog-herd* die,
Drown'd in a durthe torrent's rage.

Chapman. Homer. Iliad, book xxi. fol. 293.

DAW. I'll be very melancholick, i'faith.

CLE. As a dog, if I were as you, sir John.

TRU. Or a snaile, or a *hog-louse*: I would roule myselfe up for this day, introth, they should not unwinde me.

Ben Jonson. The Silent Woman, act ii. sc. 4.

Doe not conceive that antipathy betweene us, and Hogs-den; as was betweene Jewes and *hogs-flesh*.

Id. Every Man in his Humour, act. i. sc. 2.

The same applied in a pultesse to the wens called the king's evill, bring them first to suppuration, and afterwards having *hogs-grease* put thereto, heale them thoroughly.

Holland. Plinie, book xxiv. ch. xv.

By this Theodatus king of the Gothes, when he was curious to know the successe of his warres against the Romans, an onomantical or name-wisard Jew willed him to shut up a number of swine in little *hog-sties*.

Camden. Remaines. Names, p. 51.

Instant her circling rod the goddess waves,
The *hogs* transform them, and the sty receives.

No more was seen the human form divine,
Head, face, and members bristle into swine;
Still curs'd with sense their minds remain alone,
And their own voice affrights them when they groan.

Pope. Homer. Odyssey, book x.

Is not a *hoggish* life the height of some men's wishes.

Shaftesbury. The Moralists, part ii. sec. 1.

With fresh *hogs-lard*, boil the herbs softly, till you have brought the mixture to be very green.

Boyle. Works, vol. v. p. 372. An Ointment for the Worms in Children.

Long did he there continue,
And all those parts much harmed,
Till a wise-woman which
Some call a white witch,
Him into a *hogsty* charmed.

Butler. A Ballad on Oliver Cromwell, part ii.

Your butler purloins your liquor and the brewer sells you *hogwash*.

Arbuthnot. History of John Bull.

The keeping of *hogs* in any city or market town is indictable as a public nuisance.

Blackstone. Commentaries, book iv. ch. xiii.

To be sure, one would have thought that, instead of being owner only of one poor little pig, I had been the greatest *hog-merchant* in England.

Fielding. History of a Foundling, ch. vi.

HOGH, perhaps from the A. S. *heah*; D. *hoogh*; Ger. *hooch*; *high*.

A high place.

That well can witnesse yet vnto this day

The westerne *hogh*.

Spenser. Faerie Queene, book ii. can. 10.

All doubtful to which party the victory would go
Upon that lofty place at Plymouth called the *Hoe*,
Those mighty wrestlers met.

Drayton. Poly-olbion, song 1.

HOGSHEAD, D. *Ockshood*, *Oghshood*, *Hockshoot*. Minshew, in his first Edition, asserts *ocks* to be the name of a certain measure in Brabant, and of *ocks*, this measure, and *houden*, to hold, he composed *ockshood*, *q. d.* a vessel holding that measure. He had also remarked that some thought *hogshead* to be so called *a forma* from its form or make. In his second Edition he has omitted all attempt at Etymology.

Amongst the rest, Richard Chancellor the captaine of the Edward Bonaventure, was not a little grieved with the feare of wanting victuals, part whereof was found to be corrupt and putrified at Harwich, and the *hoggesheads* of wine also leaked, and were not stanch.

Hakluyt. Voyages, &c. vol. i. fol. 245. Richard Chancellor.

Then will I fetch her, againe,
With aqua-vitæ, out of an old *hogs-head*!
While there are lees of wine, or dregs of beere,
I'le neuer want her!

Ben Jonson. The Divell is an Asse, act ii. sc. 1.

HOG.

HOGS-
HEAD.

HOGS-HEAD. Then the interpretation will be, you drink red wine out of a *hogs-head*; but I have scarcely vinegar enough.

Fawkes. Of the Idylliums of Theocritus, note 14.

HOHEN-ZOLLERN. About 96,000 *hogsheads* of tobacco are annually purchased in Virginia and Maryland with a part of the surplus produce of British industry.

Smith. Wealth of Nations, book ii. ch. v.

HOHENLOHE, a mediatized Principality of Germany, or, more properly, a series of Principalities, with an united extent of about 700 square miles, and a population of 90,000 souls. This territory, which is among the most fertile portions of Germany, is divided at present between the Kingdoms of Wirtemberg and Bavaria; the greater portion of it is comprised in the Circle of the Jaxt in the latter State. The name of Hohenlohe as a territorial designation ceased with the independent sovereignty of the Princes who bore that title.

The family of Hohenlohe is descended from Eberhard, Duke of Franconia, and brother of the German King, Conrad I., who died in 918. Antiquaries pretend to trace the original stock to Italy, where *Alta fiamma*, a name derived from the *Flaminii*, and of which *Hohenlohe* is the translation, is said to have been the family cognomen. Crato, a descendant of Eberhard, received, in the division of Franconia, an extensive district on the Tauber, the Jaxt, and Kocher. The Counts of Hohenlohe held the first rank among the Nobility of Franconia, and had the law of primogeniture been adopted by the House at an early period, so as to prevent the subdivision and dispersion of the patrimonial estates, they might have been reckoned among the most powerful petty Sovereigns of the Empire. It was in 1764 that the title of Prince was first conferred on all the lines of this numerous House, which is at present divided into two principal branches; these are *Hohenlohe-Neuenstein*, all the members of which, including the collateral branches, *H. Langenburg*, *H. Langenburg-Ohringen*, or *Ingelfingen*, and *H. Langenburg-Kirchberg*, are attached to the Protestant Religion; and *Hohenlohe-Waldenburg*, the Roman Catholic branch, to which belong the Princes of *Waldenburg-Bartenstein*, *H. Bartenstein-Jaxtberg*, and *H. Waldenburg-Schillingsfurst*.

The Prince who bears this last title acquired not a little celebrity a few years back, during his residence at Bamberg, by his pretension to the power of working miracles; he is at present Bishop of Grosswardein in Hungary. The great grandfather of this Prince, Louis, Count of Hohenlohe-Schillingsfurst, after having devoted a large portion of his life to Alchemy, Astrology, and superstitious follies, embraced the Roman Catholic Religion in 1667, and thus gave rise by his example to the Religious schism of the family. The ruins of the ancient town of Hohenlohe are still to be seen near Uffenheim.

HOHENZOLLERN, the title of an ancient race of German Princes, whose lineage may be traced, with tolerable certainty, up to Thassilo, Count of Zollern, who died about the year 800. Among the families most closely connected with their ancestry, are the noble Houses of Colonna, of Hapsburg, and of the Guelfs. Nay, there are some zealous Genealogists, who, allowing every sense of probability to be extinguished by the love of antiquity, maintain that the family of Zollern is derived from the Trojan Antenor. The House of Brandenburg is of this family, and the King of Prussia unites to his other titles

that of Count of Hohenzollern. It was not till the beginning of the XIIIth century that the Count Frederick IV. built the castle on the mountains of the Black Forest, which is regarded by the family as the cradle of their greatness, and from which the title of Hohenzollern is derived. Count Frederick IV. received from Maximilian I., in 1507, the high office of Grand Chamberlain of the Empire, a dignity which was soon after made hereditary in his family. At the close of the XVIth century, the Counts Frederick VI. and Charles II. divided between them the inheritance of the family, the former taking Hohenzollern, where he soon after built the Castle of Hechingen, and the other Sigmaringen. George, the son of Frederick, was raised, in 1623, to the rank of Prince of the Empire, a dignity soon after conferred on the eldest of the Sigmaringen branch also. The title of Prince was subsequently granted, however, by Leopold I., in 1692, to even the juniors of the family, with the exception of the line of Haigerloch. In 1806, the Prince of Hohenzollern joined the Confederacy of the Rhine: his sovereignty was in consequence confirmed, and in the College of Princes he ranks next after the Duke of Nassau.

HOHENZOLLERN-HECHINGEN, a Principality, having about 120 square miles in superficial extent, is situated in the Suabian Alps. The ramifications of the Schwarzwald, or Black Forest, intersect the country, which is enclosed on all sides by Wirtemberg, except on the South, where Sigmaringen adjoins it. Several of the mountains rise to the height of 2000 feet, the Zollenberg to that of 2700 above the sea. Thick forests cover them to their summits: the narrow valleys alone are capable of cultivation, and are in general remarkably fertile. Rapid mountain rivulets water the land, and are collected towards the South into a lake called the Burgersee, from which flows the Katzenbach into the Danube. The climate, notwithstanding the elevation of the soil, has the mildness of the South.

The narrow strips of land between the woods produce a sufficient supply of corn and potatoes; wood, however, and flax constitute the wealth of the land. The Parish of Hausen is remarkable for the cultivation of Gentian, and the natives of that district wander over all Germany with their little stocks of gentian and wooden ware. The peasantry in this Principality are not restrained from the pleasures of the chase, and the consequence is the almost entire extermination of game.

The population of this Principality, in 1822, was 14,500, all Roman Catholics, subject in spiritual matters to the See of Constance.

The Prince of Hohenzollern-Hechingen is not restrained in the exercise of his sovereignty by any Assemblies or Estates. In the close Diet he holds the sixteenth place, conjointly with Hohenzollern-Sigmaringen, Liechtenstein, Reuss, Lippe, and Waldeck, but in the *plenum* he has a separate vote. The family compacts of 1575, 1695, and 1707, framed for the regulation of succession, were revised and confirmed in 1821. The King of Prussia is acknowledged to be the head of the House. In case the lines of Hechingen and Sigmaringen shall either of them become extinct, its estates are to revert to the other. But if both lines fail, then all their possessions go to the House of Brandenburg.

The administration of justice and the powers of

HOHEN-ZOLLERN

Hohenzollern-Hechingen.

HOHEN-ZOLLERN. Government are intrusted to the same hands, but the Supreme Court of Appeal for both the Principalities of Hohenzollern is in Darmstadt. The revenues of the State amount to about 120,000 florins. The public debt is so heavy, that the Prince, to relieve his subjects, is obliged to observe the most exact economy, and to dispense with the usual equipage of a Court.

Hechingen. *Hechingen*, the Capital of the Principality, is situated on a hill, at the foot of which flows the Starzel. It is a small place, with three Churches and 2600 inhabitants. About a mile and a half from the town, on the summit of a conical mountain, 1200 feet in height, stands the celebrated Castle of Hohenzollern. The only approach to it is by a brick causeway, joined by drawbridges across the ravines. The rock on which the Castle is built is nearly perpendicular on all sides; the entrance is by a massive iron gate, and the fortifications stretch along the adjoining hills. Notwithstanding this appearance of strength, the Castle of Hohenzollern was often successfully attacked by the rude artillery of the middle Ages. In 1423, the Countess Henrietta of Wirtemberg burned and completely destroyed it. It was at that time a rendezvous of highway robbers, who, under the title of Knights Errant, abused the license of the feudal system. The reconstruction of the Castle took place in 1460, with a solemnity highly characteristic of the times. Nicholas, Count of Hohenzollern, Philip, Duke of Burgundy, Albert, Elector of Brandenburg, Charles, Margrave of Baden, and Albert, Duke of Austria, all provided with trowels and hammers of massy silver, assisted in laying the first stone of the edifice. The arsenal contained, till within these few years, a rich collection of ancient armour. Although the compacts of the family provide that the Castle shall be kept in good repair, yet it is falling fast to ruin. It is now wholly deserted, and the quantity of stones precipitated at times from the tottering walls make it dangerous to approach it.

Hohenzollern-Sigmaringen.

HOHENZOLLERN-SIGMARINGEN, lying to the South of the preceding Principality, is much more considerable than it, having an extent of 450 square miles, and a population of 38,000 souls. The Danube flows through it from West to East. The portion which lies to the North of that river, in the Suabian Alps, is a rocky and sterile country, with only some narrow strips of meadow land on the borders of the mountain rivers; but the territory to the South of the Danube is level and extremely rich, with a fine warm climate and luxuriant vegetation. Agriculture is the chief employment of the people, who manufacture only for domestic use.

This Principality holds the same rank in the German Confederation as that of Hohenzollern-Hechingen, and it is comprised, like the former State, in the See of Constance, and in the jurisdiction of the Court of Appeal at Darmstadt. The revenues of the Prince, however, are far more considerable than those of the House of Hechingen, amounting to at least 300,000 florins, of which sum more than one-third is derived from large domains in the Netherlands, and from sequestrated Abbey lands in Bavaria. Sigmaringen has an organized militia, but maintains no regular troops. The Prince of Furstenburg and the Prince of Thurn and Taxis both acknowledge the lordship paramount of Hohenzollern-Sigmaringen.

Sigmaringen.

Sigmaringen is a small village, with only 800 inha-

bitants, deriving their support chiefly from the expenditure of the Prince, who resides here. *Haigerloch*, the only town in the Principality, occupies a picturesque situation in a mountain hollow, the river Eyach winding below, and the Castle, a fine edifice, with extensive and well-planted gardens, stretching on the heights above it. The inhabitants are about 1500 in number.

HOID,

HOI'DEN, *n.*

HOI'DEN, *adj.*

Skinner says, *agrestis, rusticus*, clownish, rustic, from Ger. *heyde*, a heath, or country place, *q. d.* an inhabitant of a country place. It was applied to males, though now restricted to females. Cotgrave renders *grue*, "a sot, ass, goose-cap, *hoydon*." *Bejaune*, "a rude, unfashioned, home-bred *hoydon*." And see the Quotations from Heywood and Milton. Applied, as in Cotgrave, to

A rude, unfashioned, home-bred fellow; and to a romping, awkward, clownish, rustic girl.

Mr. Gifford, on the citation below from Ben Jonson, remarks, that from that passage, and several others which he had met with of a similar kind, he was induced to think that *hoiden* was the ancient term for a leveret; and that assuredly it was the name of some animal remarkable for the vivacity of its motions.

CLO. Then hearken oh you *hoyds*, and listen oh you illiterate.
Heywood. Love's Mistress, D. 2.

HILTS. You mean to make a *hoiden* or a hare
Of me, to hunt counter thus, and make these doubles.
Ben Jonson. A Tale of a Tub, act ii. sc. 1.

Shall I argue of conversation with this *hoyden*, to go and practise at his opportunities in the larder.

Milton. Works. Colasterion, vol. i. p. 303.

They throw their persons with a *hoyden* air
Across the room, and toss into the chair.

Young. Love of Fame. Satire 5.

First, giggling, plotting chambermaids arrive,
Hoydens and romps, led on by Gen'ral Clive.

Churchill. The Rosciad.

HOISE, or

HOIST.

Written *hawse* by Sir Thomas More. Fr. *hausser*; Sw. *hyssa*; Scotch *heis*, which Ruddiman, in his Glossary to Douglas, derives from the Fr. *haut*; (or, perhaps, from the A. S. *heahsian*, "a word," says Jamieson, "which I cannot find in any Lexicon.")

To raise or set up or aloft, to elevate, to heave or lift up.

Euery thig was *hawsed* above the mesure; amercemētes turned into fines, fines into raūsomes, &c.

Sir Thomas More. Workes, fol. 62. *Historie of Richard the thirde*.

Notwithstanding, after we had lost ancores, *hoising* vp the sailes for to get the ship acoast in some safer place, or when it should please God, it pleased his mercy suddenly, when no man looked for helpe, to fill our sailes with wind from the land, & so we escaped, thanks be to God.

Hakluyt. Voyages, &c. vol. ii. part ii. fol. 100. *Thomas Steuens*.

The sonne of God had of his own disposicion leat himself faire & sobrelly down into earth, to the end that being *hoighced* vp on y^e crosse, he might drawe vp al thinges vnto himself.

Udall. Luke, ch. iv.

Cleomenes *hoising* sail from the Isle of Ægialia, went into Africk, and was brought by the king's servants unto the city Alexandria.

Sir Thomas North. Plutarch, fol. 679. *Agis and Cleomenes*.

To intercept these, the Carthaginians *hoise* saile, and launch forth into the deep.

Ralegh. History of the World, book v. ch. i. sec. 4.

Let him take thee,
And *hoist* thee vp to the shouting plebeians.

Shakspeare. Antony and Cleopatra, fol. 361.

HOHEN-ZOLLERN.

HOISE.

Haigerloch.

HOISE.
—
HOKE-
DAY.

Shall they *hoyst* me vp,
And shew me to the showing varlotarie
Of censuring Rome?
Shakspeare. Antony and Cleopatra, fol. 365.

But here the rosy morn renew'd the day
While in th' embrace of pleasing sleep I lay,
Sudden, invited by auspicious gales,
They land my goods and *hoist* their flying sails.

Pope. Homer. Iliad, book xiii.

We saw abundance of coco-nuts swimming in the sea, (near Sumatra,) and we *hoysed* out our boat, and took up some of them.

Dampier. Voyages, Anno 1688.

We could soon perceive that our squadron had alarmed the coast, for we saw the two forts *hoist* their colours, and fire several guns, which we supposed were signals for assembling the inhabitants.

Anson. Voyage round the World, book i. ch. iv.

HOIT, or

HOYT,

HO'ITING,

HO'ITY-TO'ITY.

Perhaps *hoise*, or *hoist*. Cotgrave says, in *v. Moustache*, "This would make him raise his hope or thoughts to a very high pitch;" and in *v.*

Hausser, (to *hoise*,) he gives as an equivalent expression, "That would set him on the *hoight*."

To raise, to elevate, to elate; to be in high spirits; to throw or leap about, as in high spirits. We still use the expression, "He is in *hoity-toity* spirits."

And there he lives at home, and sings and *hoys*, and revels among his drunken companions.

Beaumont and Fletcher. Works, vol. ii. fol. 62. *The Knight of the Burning Pestle*, act iv. sc. 1.

We shall have such a *hoiting* here anon,
You'll wonder at it.

Webster. Thracian Wonder, act ii. sc. 1. repr. p. 31.

First that could make love faces, or could doe
The valter's sombersalts, or us'd to wooe
With *hoiting* gambols, his own bones to breake
To make his mistris merry.

Donne. Progress of the Soul, song 47.

If any thing be amiss they are sure Mr. Sleek will find fault; if any *hoity-toity* things make a fuss, they are sure to be taken to pieces the next visit.

Guardian, No. 10.

HOITZIA, in *Botany*, a genus of the class *Pentandria*, order *Monogynia*, natural order *Polemoniæ*. Generic character: calyx double, interior one-leaved, tubular, exterior mostly four to eight leaved, variously formed, serrated; corolla funnel-shaped, segments ovate; stigma three-parted; capsule triangular, three-celled, three-valved; seeds imbricated, margin membranaceous.

Three species, natives of Mexico.

HOKEDAY, HOC DAY, HOCTUESDAY, a Festival which has given rise to very lengthened discussion among Antiquaries with very little certain result. A bloody incident in our early History, recorded in the *Laws* of Edward the Confessor, (35.) and by Henry of Huntingdon, has been generally but falsely assigned as the origin of this celebration. The tale is thus related by the last-named Historian: *Millesimo 2 anno Emma Normannorum gemma venit in Angliam, et diadema nomenque Reginæ suscepit. Quo proventu Rex Adelred in superbiam elatus, et perfidiam prolatus, omnes Dacos qui cum pace erant in Angliâ clandestinâ proditiōe fecit mactari unâ eâdemque die, sc. in festivitâ S. Bricii, de quo scelere in pueritiâ nostrâ quosdam vetustissimos loqui audivimus: quod in unamquamque urbem Rex præfatus occultas miserit epistolas, secundum quas Angli Dacos omnes, eâdem die ac eâdem horâ gladiis truncaverunt impremeditados, vel igne simul cremaverunt subito comprehensos.* (VI. ad in.) Spelman, in his *Glossary*, (ad v.) has pointed out that the Feast of St. Brice, on which this Tragedy was enacted, falls on the 13th of November, and that Hokeday is kept in sum-

mer, though it be a *dies incerta et pro arbitrio vulgi et locorum*.

The massacre of the Danes is mentioned by many other authorities, which the research of Mr. Douce (cited in a note on Brand's *Pop. Ant.* i. 157.) has brought together; but not in any of them is it connected with Hoctide; which, according to other authorities of equally ancient date, generally fell on the Tuesday fortnight after Easter-day. Matthew Paris calls it *quindena Paschæ quæ vulgariter Hokeday appellatur*; (Hen. III. 1255, p. 904.) and an instrument, 42 Edw. III., given in Madox's *Formulare*, (225.) fixes it for the day after, *die Martis proximo post quindenam Paschæ qui vocatur Hokeday*. Dr. Plot reconciles the difference by stating, that in his own time two Hokedays were celebrated, Monday by the women, Tuesday, which is very inconsiderable, by the men. The passage is worth consulting at length. (*Oxfordshire*, c. 8. 24. &c.)

Another Historical origin has been traced in the sudden death of Hardicanute, which freed the English from Danish servitude. That Prince expired at a wedding feast, most probably by poison. Anno Mxlij Rex Anglorum *Heardecanutus, dum in convivio in quo Osgodus Clapa magnæ vir potentiæ filiam suam Githam Danico et præpotenti viro Tovio, Prudan cognomento, in loco qui dicitur Lamhithe; magnâ cum lætitiâ tradebat nuptui, lætus, sospes, et hylaris, cum sponsâ prædictâ et quibusdam viris bibens staret, repente inter bibendum miserabili casu ad terram corruit, et sic mutus permanens vi Idus Junii feriâ iij expiravit.* (Simeon Dunelm, ap. x. Script. 179.) Here, however, is an equal difficulty with that which we have noticed on the former assumption. The feast is not kept in June.

Mr. Denne, who has treated the question in the *Archæologia* (vii. 244.) at much length, and with very deep research, espouses this second hypothesis. He shows, that changes of the day on which an event was commemorated from the particular day on which the event absolutely occurred, were by no means unfrequent; and that, as the 8th of June was often very likely to fall on one of the Ember days in the Pentecost week, which was observed by all ranks as a strict Fast, there was good reason for transferring the Festival to a season unimpeded by such an obstacle. Mr. Denne's Memoir contains many particulars to which the curious reader will do well to have recourse.

The Etymology is no less uncertain than the cause of the Feast. Lambarde, (*Perambulation of Kent, Sandwich*,) referring its origin to the death of Hardicanute, thus deduces the name:—"Besides, that ever after, the common people, in joy of that deliverance, have celebrated the annual day of Hardicanute's death (as the Romans did the Feast of *Fugalia*, or chasing out of the Kings) with open pastime in the streets, calling it, even till this our time, *Hoctyde*, instead (as I think) of *huexyde*, that is to say, the time of scorning or mocking." (140.) Spelman (*loc. cit.*) deduces it from the German *hocken*, to bind; and supports his derivation upon a custom to which we shall presently advert, which gives this day the name of *Binding Tuesday*, or, as it sounds with more dignity in the learned Knight's Latin, *dies Martis ligatoria*. Verstegan (262.) speaks of "a feastival season they yet in the Netherlands use to call *Heughtyd*, that is to say, glad-tyde, for *Hugh*, or *Heughe*, both being one, signifieth Joy or Gladnes. It may be that our *Hoctyde*, now corruptly so pronounced, did first come of *Heughtyde*."

HOKK
DAY.

HOKE-
DAY.
—
HOLD.

Minshew and Skinner turn to the German *Hoge-zeit*, a time of feasting; but the former strangely confounds this Feast with St. Blaze's day. Junius gives the Icelandic *hogg*, murder, and *dag*, a day. Col. Vallancey inclines to the Erse and Irish, *Oach*, or *Oac*, rent or tribute: *La Oac*, the day of Hock, in April, was one of the two annual rent days. Mr. Bryant (*Observations on Rowley*, i. 295.) gives the German *Hoch*, high, *Hock-day*, high-day, which is equally applicable to every Festival. Mr. Denne reverts to *Hockzeit*, particularly applied to a wedding feast, and upon this derivation strengthens his conjecture as to the origin. Mr. Thompson, in his *Etymons of British Words*, traces a whole family to the Sw. *hog*, Teutonic, *hoch*, high. "*Hocktide*," he says, "the high time, was a name given to Festivals, particularly to those of Christmas and Easter. It afterwards became *hey day tide*, *hock day tide*, *hoity toity*, and *highly tighty*, to denote rural pastime. *Hock mune*, or Christmas, is literally the Festival of the lengthening day, from G. *muna*, to increase. The term continues to be used in Brittany and Scotland." (*ad v. Heyday*.) These assertions must be received with caution.

The most remarkable custom on this day was, that women in country places used to stop passengers with ropes and exact *hock* money from them; and this gave rise to Spelman's Etymology, to which he adds, *cur autem fœminæ rei obtinuerint magisterium ego non teneo*.

The *Hock tide*, *Hockey*, *Horkey*, or *Hawkey*, of HARVEST HOME, is a totally different celebration.

HOLCUS, in *Botany*, a genus of the class *Triandria*, order *Digynia*, natural order *Gramineæ*. Generic character: flower (polygamous) a panicle; calyx two-flowered, two-valved; corolla small, one of the valves aristate; nectary linear, two-parted; stigma nearly sessile.

Two species, *H. lanatus* and *mollis*, both natives of England; the other numerous species of the Linnæan genus *Holcus*, constitute the genus *Sorghum*.

HOLD, <i>v.</i>	} Goth. <i>hald-an</i> ; A. S. <i>haldan</i> , <i>heald-an</i> , <i>heoldan</i> ; D. <i>houden</i> ; Ger. <i>halt-en</i> ; Sw. <i>holla</i> . Formerly also written <i>halt</i> . (See HALT.)
HOLD, <i>n.</i>	
HO'LDER,	
HO'LDING,	
HOLD-BACK,	
HOLD-DOOR,	
HOLD-FAST,	
HO'LDER-FORTH.	] gripe, to grasp, to catch, to seize, to clutch.

To *hold* or keep, (*sub.* in motion,) to continue, to pursue, to proceed, to persist.

To *hold* or keep, (*sub.* from motion,) to stop, to stay, to refrain or restrain, to desist; to have or keep fast, or fixed, or firm—to retain, to confine.

To *hold* within; to contain.

To *hold* or keep from; to detain.

To *hold* or keep up; to maintain, to sustain, to support.

Wat *halt* it to telle longe?

OVER. You will not let him goe, brother, and loose him?

COK. Who can *hold* that will away? I had rather loose him then
the fayre, I wusse.

Id. Bartholomew Fayre, act i. sc. 5.

And pain and grief enforcing more and more,
Besieg'd the *hold* that could not long defend.

Daniel. History of the Civil Wars, book iv.

Before vs are our armed foes,
Behind vs are the seas,
On either side the foe hath *holdes*
Of succour, and for ease.

Warner. Albion's England, book iv. ch. xxii.

No man durst demaund the cause of his comming (with a number
about him) into the utmost parts of the Romane limit, as being now a
landed man, and a *holder* of possessions there.

Holland. Ammianus, fol. 111. *Constantianus and Julianus*.

— And struggling still with those

That 'gainst her rising pain their utmost strength oppose,
Starts, tosses, tumbles, strikes, turns, touses, spurns and sprauls,
Casting with furious limbs her *holders* to the walls.

Drayton. Poly-olbion, song 7.

HOLD.

HOLD.

The only *hold-back* is the affectionate and passionate love that we bear to our wealth, that lust or sensuality of the eye, as the Apostle calls it.

Hammond. *Works*, vol. iv. p. 555. *The Poor Man's Tithing*.

Brethren and sisters of the *hold-dore* trade,
Some two months hence, my will shall here be made.

Shakespeare. *Troilus and Cressida*, fol. 105

The cause of this *holding* of and delay that he made, was the feare of imminent dangers on every side, in so much as he would often say, hee *held* a wolfe by the eares.

Holland. *Suetonius*, fol. 100. *Tiberius Nero*.

If sovereign right by sovereign power they scan,
The same bold maxim *holds* in God and man :
God were not safe, his thunder could they shun ;
He should be forc'd to crown another son.

Dryden. *The Medal*.

Would any one think he in earnest went about to persuade men to be Christians, who should use that as an argument to recommend the Gospel, which he has observ'd men to lay *hold* on as an objection against it?

Locke. *A Vindication of the Reasonableness of Christianity*, &c.

We preach a company of plain lessons of peaceableness, and fidelity, and submission to our rulers ; such as the law of nature teaches, such as both Christ and his apostles did preach in all places wherever they came ; and such as will at this day *hold* in all the governments of the world, whether they be kingdoms or commonwealths.

Sharpe. *Works*, vol. ii. p. 40. *Sermon 2*.

[Nature] has furnished the several sorts of teeth with *hold-fasts* suitable to the stress that by reason of their different offices they are to be put to.

Ray. *On the Creation*, part ii.

Can any sober person think it reasonable that the public devotions of a whole congregation, should be under the conduct, and at the mercy of a pert, empty, conceited *holder-forth*, whose chief (if not sole) intent is to vaunt his spiritual clack, and (as I may so speak) to pray prizes.

South. *Sermons*, vol. ii. p. 117.

Nor can it be imagined, that all capacities should presently and immediately understand what they hear, when, possibly, the *holder-forth* himself understands not what he says.

Id. *Ib.* p. 156.

Indeed his (Cicero's) *holding-out* and delicateness in extending and looseing a note with incomparable softnesse and sweetnesse was admirable.

Evelyn. *Memoirs*, 19 April, 1687.

But we are, first, to find out what the principles are on which prophecy is founded, and by which it claims to be tried ; and then to see whether they will *hold* ; that is, whether they will aptly and properly apply to the particulars, of which it is compounded.

Hurd. *Works*, vol. v. *Sermon 3*.

A person lays *hold* upon a thing when he takes possession of it, and claims it as his right and property : in this sense the apostle speaks with much diffidence and humility of his hope of laying *hold* of his reward.

Horsley. *Sermon 27*. vol. ii.

The greatest trouble they gave us was to look after the buoys of our anchors, which were no sooner thrown out of the boats, or let go from the ship, than they got *hold* of them.

Cook. *Voyages*, vol. iv. book iii. ch. iv.

But of all modes of influence, in my opinion, a place under the government is the least disgraceful to the man who *holds* it, and by far the most safe to the country.

Burke. *On the Cause of the Present Discontents*.

This is the unity of the Christian church, the *holding* of Christ for the head ; and not (as the present church of Rome teaches) the *holding* of the pope for the visible head of it.

Pearce. *Sermon 2*. vol. iv.

HOLD, Skinner says, *sic dicitur contabulatio navis infima ubi penus navis conditur* ; either from the verb to *hold*, because it *holds* or contains the stores, &c. or *q. d.* the *hole* of a ship, the inmost cavity of the ship. Tooke ;—*hold*, as the *hold* of a ship ; in which things are *covered* ; or the *covered* part of a ship : the past participle of *hel-an*, to cover.

DOL. Can a weake emptie vessell beare such a huge full hog'shead ? There's a whole marchant's venture of Burdeaux stuffe in him : you haue not seene a hulke better stufft in the *hold*.

Shakespeare. *Henry IV. Second Part*, fol. 82.

Behold the youth just now set free
On land, immur'd again at sea ;

Stow'd with his cargo in the *hold*
In quest of other worlds for gold,

Somerville. *Fable 14. The Fortune-hunter*.

This was no time to indulge conjecture, nor was any effort remitted in despair of success : that no time might be lost, the water was immediately started in the *hold*, and pumped out.

Cook. *First Voyage*, book iii. ch. iii.

HOLD.

HOLLA.

HOLE, } See **WHOLE**.
HO'LY. }

HOLE, A. S. *hole*, *hale*, *hol* ; Ger., D., and Sw. *hol*, from A. S. *holian*, *uholan*, *cavare*, *excavare*, *fodere*, to *hollow*, to excavate. Skinner. In the opinion of some from *hel-an*, *tegere*, to cover. Lye. And Ihre thinks the Sw. might be formed from the Goth. verb, *huljan*, (A. S. *hel-an*.) to cover. Of this Goth. and A. S. verb, Tooke considers it to be the past participle, and to mean

Some place *covered* over.

To the objection, " Cannot I drill a *hole* in the centre of this shilling ? And then where will be the covering ? he answers : After you have so drilled it, break it diametrically : and then where will be the hole ? Of the two pieces each will have a notch in it ; but no hole will remain ?" To this may be added, that if each piece be set upright, with the notched side downwards, there will be a hole in each, formed by the perforated piece and the surface upon which it stands.

Norþ wynd þere y wys

Out of the erþe ofte comeþ, of *holes* as yt were,
And bloweþ vp of þilke *holes*, so þat yt wolde a rere
And bere vp grete cloþes, ȝef heo were þer ney,
And blowe hem here and þere vpon þe lofte on hey.

R. Gloucester, p. 7.

Boþe fox and fowel may fleo to *hole* and crepe.

Piers Plouhman. *Vision*, p. 394.

Whether a well of the same *hole* bringith forth sweete and salt watir ?

Wiclif. *James*, ch. iii.

He brake the barres, and through the timber pearst
So large a *hole* wherby they might discerne
The house, the court, the secret chambers eke
Of Priamus, and auncient kings of Troy,
And armed foes in the thentrie of the gate.

Surrey. *Virgil. Æneis*, book ii.

P. CA. ——— I ha' you in a *purse-net*,
Good master Picklocke, wi' your worming braine,
And wrigling ingine-head of maintenance,
Which I shall see you *hole* with very shortly :
A fine round head, when those two lugs are off,
To trundle through a pillory.

Ben Jonson. *The Staple of Newes*, act v. sc. 2.

His men yet pleas'd their hearts,
With throwing of the *holed* stone ; with hurling of their darts,
And shooting fairley one the shore.

Chapman. *Homer. Iliad*, book ii. fol. 31.

But thou, poor fountain, silly soul !

Thy head absconding in a *hole*
Run'st muddling on from place to place
Asham'd to show thy dirty face.

Yalden. *Fable 1. The River and the Fountains*.

When he had got about an hundred yards distance and thought himself secure of his prize, a musket was fired after him, which fortunately struck the boat just at the water's edge, and made two *holes* in her side.

Cook. *Voyages*, vol. i. book ii. ch. iii.

HOLEFUL, perhaps *holesome* or *wholesome*.

" I am," sayd he, " y^e sauyoure of poore men ; ye be poore & haue assayed y^e harde hādīs of ryche men ; now drawe ye therefore *holefull* water of lore of my wellys, & that w^t ioy, for y^e tyme of youre vysytacyon is comyn."

Fabyan. *Chronicle*, Anno 1188.

appear genteelly, might with artificial management save ten pound a
year, as instead of fine *holland* he might mourn in sackcloth.

Spectator, No. 360.

HOLLA.

HOLLAND.

HOLLAND.

Boundaries,
extent, &c.

HOLLAND, a Province of the Kingdom of the
Netherlands, has nearly the same extent which belonged
to it when an independent Republic, its territorial dimi-
nution being confined to some small districts on the
South side of the Maas and of the Hollandsdiep, at
present united to North Brabant. It lies between
51° 40' and 53° 10' North latitude, and 3° 56' and 5° 30'
East longitude. The German Ocean forms its boundary
on the West and North; the Zuydersee, Utrecht, and
Gueldres on the East; and on the South it has the Maas
and the estuary of that river, which successively takes
the names of the Biesboch, Hollandsdiep, Krammer, and
the Grevelinge, this last-named strait separating Holland
from Zeeland. Its greatest length from North to South
is about 80 miles, or 110 if we include the Islands of
Texel and Vlieland. The greatest breadth of the Pro-
vince is at its Southern limit, where it is about 45 miles
across, but as it decreases uniformly towards the North,
the average width may, perhaps, be taken at half that
distance; the superficial extent is estimated at 98½
German, or about 2216 English square miles.

Divisions.

This Province has been always divided into North
and South Holland; the peninsula to the North of the
Y, an inlet of the Zuydersee, running Westward to-
wards the Ocean, from which it is separated by an isthmus
not above eight miles across, (formerly constituting the
Government of North Holland, but at present the line
of demarcation between the Northern and Southern
Governments,) runs through the Sea of Haerlem, so as
to render the divisions more nearly equal. North Hol-
land was formerly called West Friesland, and is still so
denominated in some public Acts, though the Province
which properly bears that designation is situated wholly
to the East of the Zuydersee; (see **FRIESLAND**;) but
the Frisian Tribes appear to have anciently possessed all
the low countries to the North of the Rhine, and previous
to the natural convulsion which let in the waters of the
Ocean, and formed the Zuydersee, the districts which
they inhabited were immediately contiguous to one an-
other. Holland, from having been by far the most wealthy
and important of the Seven United Provinces, is not

unfrequently taken in a wider sense to signify the whole
confederated Republic, particularly when the commerce
and industry of the Dutch Provinces are the subject of
discourse. It is not our intention, however, to take
advantage of the latitude offered by the vague applica-
tion of the name, but to confine ourselves to the local
circumstances and topography of the modern Province;
and for all Political retrospects, statements of Commerce
and Finance, or questions of Social Economy, in which
the Associated Provinces are involved, we refer for once
and all to the Kingdom of the NETHERLANDS.

The surface of Holland is uniformly low and flat, de-
scending gradually towards the North and West. North
Holland is consequently lower than the Southern division,
and some portions of it, in the districts called Kenne-
merland and Waterland, are a few feet below the level
of the Ocean; the difference of absolute elevation in
the various districts, though abstractedly trifling, is
nevertheless, from the physical circumstances of the
country, and the manner in which it modifies the liability
to inundation from the Ocean or the rivers, sufficient to
create the greatest diversity in the character of the
landscape. From the mouth of the Maas to the village
of Petten in North Holland, extensive Downs, or sand-
hills, form a natural barrier against the irruptions of
the Ocean. This embankment, thrown up and renewed
by the steady operation of physical causes, extends
along a line of coast exceeding 60 miles in length;
where this ceases, a little beyond Petten, the efforts of
Man commence, and dams, heaped up by the labour
of Ages along the remaining shores of the German
Ocean on the West, and those of the Zuydersee on
the East, an indented line of more than 100 miles,
protect the green fields within from the waves which
break above them. The sand-hills are supposed to
increase uniformly, gaining on the Ocean as well as on
the cultivated ground, but the law of their formation is
so involved with the circumstances of season and cur-
rent, that great and violent changes often take place in
their disposition. It is stated in the Life of De Ruyter,
that when, in the year 1672, the fleets of France and

Surface.

Downs.

HOLLAND.

England cruised off the coasts of Holland, the sands were much altered and disarranged by the discharges of artillery. The Downs reach their greatest elevation in Kennemerland, near their termination, where they rise into hills 200 feet in height, occupying a wide extent of country, with broad valleys and marshes between them. Several streams also, converted by human ingenuity into navigable canals, take their rise from these sandy hillocks, and flow into the Y or the lakes of Waterland.

Dikes.

The Dikes, or Mounds, which to a stranger appear to constitute the most remarkable feature in the Dutch landscape, are generally supported on the land side by piles of wood and stone ramparts. They are ordinarily about 30 feet above the land, but in some places, as at Medenblick, where the shores of the Zuydersee face the North, and are thus directly exposed to the high tides driven by the gales of winter, both setting in from the same point, they are reared to double that elevation. The greatest care is taken to strengthen their surface by sods or marine grasses, and below high-water mark, where these will not vegetate, the beach is secured by a strong matting of flags, fastened down at every three or four yards by wooden pins. Further in the sea the matted covering is held down by stones. Large wooden posts, numbered in order, are ranged along the shore at the distance of 100 or 120 feet from each other, to afford an exact and easy reference to the spots demanding repair. Besides the precautions thus taken by public policy for the preservation of the mounds, the inhabitants of the shores take care, in tempestuous weather and high tides, when the sea frequently washes the summit of the Dike in exposed situations, to cover it over with sail-cloths, so as to complete its defence on the upper surface. It is not, however, from the sea alone that the Dutch seek to protect themselves by Dikes. All the numerous rivers which flow through the country, are obliged to be confined within their channels by similar mounds; and the lakes, as they communicate with the rivers or the ocean, rise to the same level with them, and render similar precautions necessary. Thus Holland is cut through in all directions by Dikes. The tracts of land lying between these are called *Polder*, and are kept drained by innumerable windmills, which pump the superfluous water into the adjacent canals. The roads, as well as the navigable canals, are generally on these Dikes, which are well planted with trees and kept in excellent order, as the slightest neglect might occasion serious losses. The annual expense of the Dikes is two millions of florins; and the tax levied for their repair is, in some parts of the country, heavier than the land-tax.

Polder.

In this way several lakes have been drained and converted into productive land. The Beemster, the most fertile district of North Holland, and the most remarkable spot in the Dutch Provinces from the great art and diligence required to make it available to human industry, is one of those drained hollows. Morasses, or shallow lakes, are still numerous; not less than eighty being reckoned in the Northern Government, where they are generally the results of superabundant water; in South Holland the pits from which peat is dug for fuel form so many unsightly ponds, which annually encroach on the productive soil.

Sea of Haerlem.

The Haerlemer Meer, or Sea of Haerlem, is the only lake of any consequence. This piece of water, 15 miles in length by 9 broad, was formerly a marsh; but

when the mouth of the old Rhine, which passes through Leyden, was choked up, an inundation ensued which united several small lakes in the neighbourhood. Hence the depth of water in the Haerlemer Meer is very unequal. The Southern portion of it, called the Sea of Leyden, is capable of bearing good-sized vessels; but ten or even six feet is the ordinary depth of the channel. The navigation of it is difficult from the numerous shallows, and has much declined since the construction of the canals between Leyden, Haerlem, and Amsterdam, which entirely supersede it as a means of regular communication between those places. In the year 1628 the son of Frederick, King of Bohemia, was drowned in the Sea of Leyden; his father, who sailed in company with him, and who witnessed his catastrophe, being prevented, by the fury of the tempest, from rendering him any assistance. This accident is said to have promoted the formation of the canals. The Haerlemer Meer is saltish in some places; vast forests of reeds grow along its margin and help to nourish great quantities of fish. This lake appeared to increase rapidly until the XVIIth century, when care was taken to confine it by embankments; and, since that time, the project of draining it has been frequently revived.

On the North, the lake of Haerlem communicates with the Y by a sluice; the neck of land separating it from that inlet can, with difficulty, be preserved by stone ramparts and wooden piles from the destruction threatened by the waves on both sides; in one place the isthmus is so narrow as not to allow room for the canal between Haerlem and Amsterdam, which is here intermitted, a portage of about half a mile supplying its place. The *Bies Boch*, or *Wood of Reeds*, the widest part of the estuary of the Maas, is by the Dutch Geographers denominated a lake; it has, indeed, the appearance of a great lake, spreading over more than 14 square leagues, and half covered with reeds. This great expanse of water was formed suddenly on the night of the 18th November, 1521, by an inundation of the Waal and Maas. According to tradition, 72 villages and 4000 families were destroyed by this unforeseen calamity.

Of the numerous rivers which flow through Holland, there is not one of any importance which takes its rise within the limits of the Province. The Leck, the Waal, the little Yssel, and the Vecht are all branches of the Rhine, the name of which river is preserved by a narrow and almost stagnant stream passing from Utrecht to Leyden, and thence to Catwyk on the sea-side, where it joins the sea by a canal cut through the Downs for a distance of two miles, recently constructed on a most magnificent scale. Previous to the formation of this canal, the Rhine was lost in the sands about four miles from Leyden. The numerous artificial mouths into which the waters of the Waal and Maas are diverted, as well as the numberless canals which they are made to supply, have the effect of diminishing the current of the principal channels, so that the depositions of mud are not carried forward to the sea with sufficient force, but, gradually accumulating, raise the beds of the rivers, and render necessary the continual increase of the embankments. The Y, an inlet of the Zuydersee, runs Westward towards the Sea of Haerlem, and afterwards towards the North, a distance altogether of about 20 miles; its general breadth is from two to four miles. For a description of the Zuydersee, the time and manner of its formation, with an account of the changes

HOLLAND.

Rivers.

HOLLAND.

Soil.

which are supposed to have taken place in the channels of the Rhine, we refer to our general paper on the Low Countries. (See Kingdom of the NETHERLANDS.)

The maxim of Political Philosophers that the most favourable circumstances in which Human Society can be placed, are those which make the existence of Arts and industry the indispensable preliminary conditions of its increase, is more perfectly illustrated by Holland than by any other Country. This Province, so remarkable for its dense population, for its commerce, and for the excellence of some even of its natural productions, possesses, in general, a meagre and ungrateful soil, and scarcely any which can be called excellent. One-fifth of the whole, according to Metelerkamp, is barren heath, sand, and unprofitable morass; some other writers, however, supported by public documents, make the portion of waste territory amount to one-third, and the quantity of productive land annually spoiled by the spreading of the sands or of peat-bogs, exceeds very much, it is said, the portion gained by draining. The soil of Holland is, generally, a thin vegetable mould resting on sand; but in many places the sand is found above the alluvial deposit; and, frequently, their alternating layers prove the successive inundations of the sea and the rivers. The whole of the level country has subsided since the efforts of man have protected it from the waters; hence it is that the fields are in some places six feet, in the Beemster, Purmer, and other drained lakes sixteen below the level of the Ocean. Of this subsidence and of subsequent inundations, the soil bears abundant proofs. The vestiges of forests, roads, and inhabited places are found not far below the surface in the soil which has been gained from the Ocean, and which at a greater depth contains marine *débris*, the bones of whales, and wrecks of vessels. North-West from the village of Koogh in the Isle of Texel, about a mile from the coast, large trees are found at the bottom of the sea. This submarine forest, called the *Orchard* by the fishermen, has an extent of nearly a square mile. The moisture of the drained lands in Holland adapts them to the cultivation of grasses and to pasturage; there is little arable land, and all the corn produced within the Province is not equal to a tenth of the consumption. Where the value of a crop, however, depends on careful management and application, the Dutch farmer is sure to succeed. The madder grown in Holland holds the first rank in commerce, and the flax also, chiefly owing to skilful treatment, is highly esteemed. The cultivation of tobacco has declined, perhaps, in consequence of its increase in other parts of Europe. The Dutch supply flax-seed to all Countries engaged in the linen manufacture; seeds of flowers and culinary vegetables are principal articles of commerce; but this, it must be observed, is not, perhaps, so much owing to their horticultural skill, as to the nature of their moist and heavy atmosphere, which, being unfavourable to fecundation in general, prevents the degeneration of vegetable species, resulting from the intermixture of several kinds. The tract of country within the Downs, from Alcaaar to the Hague, is that which is chiefly devoted to the growth of flowers and garden culture; in the neighbourhood of Haerlem, particularly, the skill of the Dutch gardeners and their love of tulips are conspicuous. The quantity of cheese and butter made in this Province, is astonishing; the exportation of the latter article alone brings in 18 millions of florins.

One of the causes assigned for the perfect success

with which the Dutch farmers cultivate their artificial soil, is the intimate acquaintance they have with its peculiarities in a country where the agricultural peasant is the owner of the soil, and the same spot of land descends from father to son through a long course of generations.

The farms are in general small, but yet large enough to support their possessors in simple affluence. The neatness which distinguishes the Dutch towns, is equally conspicuous in their farm houses; gardens and orchards surround the dwellings, and are securely enclosed by a trim green fence. The fields are, in general, separated by deep ditches filled with water, and capable of serving as canals to transport the produce of the farm. Canals on a larger scale connect the farms with the villages, and these with the great towns, so that facility of internal communication can hardly be conceived more perfect.

The exportation of the raw produce of Holland has much declined in every article, not even excepting flax-seed. The great revenue formerly derived from the sale of tulip-roots and flower-seeds, has, in particular, fallen away; and the madder of Alsace has risen to the highest estimation in commerce. This diminution of resources is not confined, however, to the produce of the soil, or to the Province of Holland. (See the NETHERLANDS.) The whale-fishery which, previous to the revolutionary wars, employed nearly 300 vessels, is totally extinct. The herring-fishery, carried on from the ports of Rotterdam, Briel, Delft, Schiedam, Enchuyssen, still exists, though in a crippled state. The cod-fishery, carried on for the most part on the Dogger bank, supplies not only the consumption of Holland, but forms one of the chief exports: the London market derives its principal supply of cod from the Dutch fishers.

The vicissitudes of the manufacturing and commercial interests of Holland, will be treated of, conjointly with the fortunes of the other United Provinces, under the head of the NETHERLANDS. We shall here briefly advert only to those instances of declining industry which have produced a local depression. The manufacture of fine linen was one of those in which the Dutch were for Ages preeminent, and it is still carried on at Haerlem on a considerable though very reduced scale. The Bleacheries of this place enjoy so high a reputation, that they prepare for market almost all the fine linen manufactured in Holland. The fabrication of linen being in most of its stages carried on by peasants, with whom it constitutes a chief branch of domestic industry, a decline in the demand for that article causes a widely diffused, rather than a local distress. But the depression of the woollen-cloth factories has depopulated Leyden, which in the beginning of the last century contained not less than 80,000 inhabitants, and at present is reduced to a third of that number. The fine cloth made here, in the year 1700, amounted to 25,000 pieces, and the camlet to 70,000; these numbers were reduced respectively, in 1802, to 7086 and 2700. Taking together all branches of the manufacture, the quantity fabricated at present is not more than one-tenth of the annual produce in flourishing times. Pains have been taken, of late years, to improve the home-grown wool, and flocks of merinos have increased in the Isles of Texel and Wieringen; but the improved fineness of the cloth has not as yet restored it to its place among the articles of exportation. The porcelain manufacture at

HOLLAND.

Delft affords another instance of decayed industry, and it is with difficulty that the Government of the Netherlands can prevent the importation of English earthenware. The Breweries of Holland were, at one time, a great source of employment and internal commerce; in 1518, there were 160 of them at Gouda, the chief seat of the brewing trade; this number regularly declined till 1802, when there remained but two; the consumption of gin has at the same time increased, and amounts annually to nearly four millions of gallons. There could not, perhaps, be any better test of the activity of trade and increase of capital in Holland, than that which is afforded by the quantity of bricks consumed, as these are the materials with which canals, causeways, and all public and private buildings are constructed in a country without stones or other minerals. The brick-kilns on the Issel produced, at the close of the XVIIth century, about 145 millions of bricks annually, and at the commencement of the present not quite 40 millions, or less than one-third.

Although the commerce of the Netherlands is mostly carried on from Amsterdam, Rotterdam, and the other great towns of Holland, yet as trade must be chiefly considered as a source of national aggrandizement, we shall not speak of the commerce of this Province until we come to treat of the Kingdom collectively. The falling off in the manufactures and the shipping of Holland during the last century, and particularly during the usurpation of the French, operated, as might be expected, to reduce the population. In the middle of the XVIth century, the population of this Province amounted, according to Vossius, to 550,000; in 1732 it was supposed to be at least 980,000; this number was reduced, in 1796, to 828,500, the inhabitants of towns alone being 495,000 in number. In the *Almanach Royal* for 1817, the population is stated at 747,600 souls, showing a difference of 80,000, a greater reduction than can be explained by the subtraction of a small territory on the South.

The commercial adversity under which Holland laboured for so many years subsequent to the French Revolution, and the almost total extinction of the export trade, naturally occasioned a great deal of distress among the lower Orders. The poverty and wretchedness of a dense population are sought to be relieved by a multitude of public institutions, of which we shall give an account in another place. The poor are, in general, reduced to live on potatoes; and the use of a vegetable food, which in wet lands and bad seasons is apt to be unwholesome, together with the increasing consumption of gin, impairs the health and vigour of the inferior classes. Some Dutch writers affirm that there is no Country of Europe in which the people are reduced to such a state of corruption and immorality as in Holland; and although this reproach cannot be admitted in its full extent, yet it is to be feared that the coarse licentiousness which characterises frequented sea-ports prevails throughout this Province. The higher Orders are almost wholly engrossed by the cares of making money; cleanliness, economy, and attention to business are the chief characteristics of the Dutch people; but notwithstanding their general habits of scrupulous neatness, many of their customs, particularly that of smoking, are offensive to foreigners.

The Province of Holland holds the ninth place in the States General, to which Assembly it sends 22 Members. In judicial matters it is included in the jurisdiction of the

VOL. XXIII.

Supreme Court at the Hague. The Provincial States are composed of 90 members, 14 from the nobility, 49 from the towns, and 27 deputed from the proprietors of land. Calvinism is the established Religion. The Synod of South Holland comprises 6 classes and 183 parishes, that of North Holland 5 classes and 148 parishes. The dignitaries of the Catholic Church are the Archpriest, as he is styled, of South Holland, and the Jansenist Bishop of Haerlem, who, together with the Archbishop of Utrecht, is disowned by the Pope.

Holland was included in the ancient Batavia and Frisia. When in the decline of the Empire the inhabitants of those Countries shook off the Roman yoke, they fell under that of the Saxons. The name of Holland is not met with before the IXth century, and appears to have been introduced by the Normans, who overran and settled in the Country after the time of Charlemagne. Some derive it from *hal* or *hol*, hollow and *land*, as if it were descriptive of the appearance of the country; but it appears more probable that the names of the islands in the Baltic, Zelandt and Olandt, were transferred by the Norman adventurers to their new settlements. Thierri, Duke of Alsace, created Count of Holland in 863, was the first who bore the title, which subsequently passed, by marriage, to the Princes of Burgundy, and afterwards to the House of Austria. Charles V. was the last Count.

There is nothing in Holland which makes so agreeable an impression on the mind of the stranger as the size and number of the towns and villages; the latter lie scattered at the distance of two or three miles from each other, and help to diversify the dead level of the plains which the traveller in the *Treckschuyt*, or canal-boat, usually sees around him. Their magnitude and population would, in many instances, entitle them to the rank of cities in other countries. The towns are all connected by canals and by roads perfectly level, paved with brick, and planted with elms or lime-trees. The general mode of travelling, however, is by the *Treckschuyt*, the exact regularity of which compensates, in some measure, for its want of expedition. In describing the topography of the Province we shall arrange the towns in the order in which they present themselves on the ordinary route from South to North.

In approaching the estuary of the Waal, the steeple of the church at *Goree* is the seaman's mark; the land is so low as to be hardly discernible at a league distance. After entering the *Quaks diep*, about 10 miles from the sea, *Helvoetsluys* makes its appearance. the houses being almost hidden by the masts which rise above them. This place, which is the regular station of the English packet-boats, derives its importance not from its size, the population not much exceeding 1200, but from its advantages as a naval arsenal. The only channels by which large vessels can approach it are close to the land, and are defended by strong batteries; within is an immense basin in which all the Dutch navy could find anchorage. The docks are in the centre of the fortifications, and a deep fosse filled with water surrounds the whole on the land side. For many miles to the West of the town the land is preserved by Dikes about 30 feet in height. From *Helvoetsluys* a narrow channel conducts into the old Maas. On approaching Rotterdam there occurs on the left hand *Schiedam*, a town with 10,000 inhabitants and above 200 distilleries; and *Delfshaven*, a fishing village with 3000 inhabitants.

HOL-
LAND.

Rotterdam.

Rotterdam, the second town in Holland in population and commercial importance, and by some considered the first in beauty, is situated on the right bank of the Maas, or Merve, as this Northern branch is properly called; a small river called the Rotte, from which it takes its name, flows through it. The town is extremely well built, particularly towards the river. The *Boom Quay*, or Quay of Trees, a terrace of great houses nearly a mile long and planted with trees, is considered the most commodious and magnificent landing-place in Europe. The city is intersected in all directions by canals, which enable the merchants to bring their cargoes to their own doors. Warehouses and stores adjoin the private dwellings, and, amidst all the bustle of a commercial and seafaring place, Dutch neatness and propriety are still conspicuous. The doors and windows are painted green, creeping plants adorn the vacant walls of the storehouses, and trees, planted along the sides of the canals, mix their boughs with the rigging of the ships; yet the streets are in general narrow, and the footway is only distinguished by being paved with yellow bricks. The principal buildings are the Exchange, a large and handsome edifice, surpassing that at Amsterdam, the Admiralty, the Palace of the late East India Company, and the great church of St. Lawrence, containing the monuments of the Dutch Admirals. The statue of Erasmus, who was a native of the place, raised on a handsome pedestal six feet high, adorns the *Maasbruck*, not far from the Exchange. The house in which he was born, in 1467, is still shown to strangers. The Old Men's Hospital and the *Landhuys*, or House of Assembly for the Committees appointed to superintend the dikes and canals, are also handsome buildings. The trade of Rotterdam still increases, notwithstanding that the accumulations of sand at the mouth of the Maas have, of late years, threatened to destroy it; the number of vessels entering in and clearing out is from 3500 to 4000 annually. The manufactures carried on here are also considerable, particularly of cotton goods, dye stuffs, and chemical preparations. Distilleries and sugar refineries are also numerous. The market of this town is the most frequented in Holland; the trade in flax, in French wine, and in tobacco, centres here. The population of Rotterdam is about 60,000, exclusive of strangers; a large proportion of the residents are English.

Delft.

From Rotterdam a canal of about 10 miles conducts to *Delft*, a large and well-built town, at present in a declining state. The banks of this canal are covered with the villas of the merchants of Rotterdam, each with its narrow garden of precious flowers. The chief curiosity at Delft is the Mausoleum of William I. Prince of Orange, in the new Church. This superb monument is 20 feet long, 15 broad, and 27 in height, and is surrounded by 22 columns of black Italian marble. There are two statues on it, one of bronze in complete armour, the other a marble figure in a reposing posture. In the same Church is the monument of Hugo Grotius, or De Groot, who was born here in 1645. The tower of the new Church is 300 feet high, and is distinguished as much by the merit of its *carrillons*, or chimes, as by its beauty. In the old Church are the Sarcophagi of Heinsius, Leuwenhoeck, and Van Tromp. The Town House, a good building, contains an excellent Gallery of Paintings. The population of Delft does not, at present, exceed 13,000. The manufacture of earthen-ware, for which the place was once so famous, is at present of

little account; instead of 7000, the number of men formerly engaged in it, there are hardly 150 employed. Some silk stuffs are made here, and the manufacture of fine cloth, from the improved wool of the Texel, appears to be increasing. The commerce of Delft depends wholly on that of Rotterdam.

The *Hague*, or *S'Grafen haag*, (the Count's Wood,) 10 miles North-West from Delft, is the Capital of South Holland, the seat of Government, and principal residence of the King of the Netherlands. It is situated at the foot of the Downs, about two miles from the sea; woods, gardens, and cultivated fields surround it on the other three sides. A deep fosse forms its only defence. All travellers extol the beauty of the Hague, the fertility of the adjoining country, (the most productive tract in South Holland,) the woods in its neighbourhood, the openness of the streets, and the numerous splendid houses which adorn them, the hotels erected by the Provinces under the old Constitution for the reception of their Deputies, all contribute to render the Hague more attractive than the other Dutch towns. The avenues, promenades, and public squares are shaded with limes and elms. In the Royal Palace are Galleries of Paintings and of Sculptures, a Cabinet of Medals, and a rich Library. The most remarkable public buildings are the Council House, the Corn Exchange, the new Church, and that of St. James. The great distinction of the Hague, however, is the general magnificence of the private hotels. The population is about 45,000, supported chiefly by revenue and the expenditure of the Court. The industry of the place is confined to the manufacture of sealing-wax and articles of jewellery. The society at the Hague, as might be expected in the Capital of a commercial Country, itself undisturbed by the cares of business, is the most refined and agreeable in the Dutch Provinces. Societies for the promotion of Science, Literature, and the Arts are numerous; but, above all, the study of Natural History is here zealously cultivated. The impulse given by Camper, a native of the town, still operates, and the Hague can boast more Museums illustrative of Natural History, than any city in Europe. The wood from which the town takes its name is at no great distance; it is doubly precious in the eyes of the Dutch from the general absence of woods in Holland. The great roads to Amsterdam, Haerlem, and Leyden pass through it, and in the centre of it is placed the ancient chateau of the Princes of Orange, called the House of Orange, or House in the Wood. This grove appeared so pleasing to Philip II. that it was spared by his orders in 1574, when the Hague was besieged. The praises bestowed on him for this instance of tasteful mercy, may perhaps have induced Louis XIV., a century later, to spare the Mall at Utrecht.

The avenue conducting to *Scheveling*, a village on the sea-shore, inhabited by fishermen, is always pointed out to strangers as one of the beauties of the Hague. It is about two miles long, perfectly straight and level, planted with four rows of stately elms, and with the steeple of the village Church in the vista. *Scheveling* is remarkable for the pertinacity with which its inhabitants, about 3000 in number, adhere to the old costume and usages of the Country.

Leyden, seven miles North-East of Hague, was formerly the second city in Holland. The Old Rhine, which here divides itself into several channels, flows round it, and is joined by some small streams, the Does,

NEW
HOL-
LAND.

Vliet, Mare, and Zyl; the numerous islands into which the town is divided by all these canals are connected by 150 bridges. The district of country round about, called the *Rhynlande*, is the garden of Holland, and furnishes in large quantities the much prized Leyden butter. Leyden is famous for its University, founded in 1575, and which, distinguished for a time by its proficiency in Oriental literature, so successfully cultivated by Golius, Erpenius, and Schultens, enjoyed a more lasting reputation as a School of Medicine and Anatomy. From the great brick walls surrounding Leyden, a rich prospect of the neighbouring country may be enjoyed. In the Guard House, or Citadel, are preserved the portraits of the old Counts of Holland. The Council House and St. Peter's Church, in which is the Sarcophagus of Boerhave, are the only remarkable edifices. The buildings of the University were much injured, and part of the city entirely destroyed, particularly the handsome street called the Raapenburg, by the accidental explosion of a barge laden with gunpowder, which took place in one of the canals in 1807. The population of Leyden is reduced at present to 28,600. The wool trade of Holland, and manufactures of camlets and woollen cloths, still centre here. The book trade also is very considerable, and, though not absolutely increased, has gained in relative importance. The Botanic Gardens at Leyden, the Cabinets of Natural History, the Library of the University, rich in Oriental manuscripts, and the Paintings of Lucas and Rembrandt, both natives of the place, seldom fail to prolong the visit of the stranger.

Haerlem.

A canal about 16 miles in length conducts from Leyden to *Haerlem*, through a highly cultivated country; this latter place is one of the handsomest towns in Holland, intersected by canals, and planted with trees; the sea of Haerlem lies at no great distance on the East; the German Ocean is about four miles off on the West; canals connect the town with Leyden and Amsterdam. Like the other interior towns of Holland, Haerlem has much declined, and its population does not exceed 21,000, about half of its former amount. In the market-place stands a statue, erected, in 1801, to Lawrence Coster, to whom the Dutch ascribe the invention of the Art of Printing. The Cathedral, the largest and handsomest church in Holland, is remarkable for its great organ, containing 8000 pipes and 92 stops. At Haerlem is a Royal Academy of Science, with rich Museums, an Observatory, and a public Library, containing many curious specimens of early Typography, particularly the Works printed by Coster, a native of the place. The neighbourhood of Haerlem has always been the flower-garden of Holland,

and although the trade in choice flowers is no longer what it was in the middle of the XVIIth century, when single tulip roots were sold for 10,000 florins, still there are numerous great nurseries adjoining the town, which, through the weekly markets at Amsterdam, supply all Holland. Haerlem is famous for the excellence of its bleacheries; it is likewise the seat of almost all that remains in Holland of the silk manufacture, which formerly employed here 3000 looms, and at present about 60. In the *wood* of Haerlem, a grove of about 26 acres in extent, is a Royal Lodge, formerly the villa of the Banker, Mr. Hope.

AMSTERDAM, which lies 12 miles East of Haerlem, and is next in the route, has been already noticed in alphabetical order. *Saardam*, on the North of the Y, though called a village, contains 10,500 inhabitants. It is distinguished even in Holland for its neatness and the number of its canals. The inhabitants are all either merchants or shipbuilders. The houses are built of wood, painted green in fanciful patterns, and surrounded by canals, so as with their gardens to form little islands. The house in which Peter the Great resided here, while learning the Art of shipbuilding, is still shown to strangers. Six miles to the North of Saardam is *Alcmaar*, with a population of 8500 souls, and a few miles to the West of this town, on the Zuydersee, is *Horn*, with 9600 inhabitants, and a great trade in cheese and cattle. The navigator Schouten, a native of this place, gave its name to Cape Horn, which he discovered in 1616. We must not omit to mention *Gouda*, in South Holland, built on the Gouwe, which here joins the Yssel, a town of considerable trade, and with a population of 12,000. The Church of St. John is remarkable for its great size, its organ, and stained glass windows. DORT has been already mentioned in its place.

Gouda.

The islands which lie in a chain across the mouth of the Zuydersee, viz. Texel, Wieringen, Vlieland, and Schelling, are becoming daily more important from the success which has attended the introduction into them of the fine woolled sheep. The inhabitants of the islands, about 8500 in number, of whom 5000 belong to the Texel, are almost all pilots or fishermen. The stock of sheep at present exceeds 60,000. Strong fortifications have of late years been erected on the Texel, to defend the roadstead and straits.

The Islands.

NEW HOLLAND.

NEW HOLLAND, the *Terra Australis* of old maps, is an Island of vast extent, lying directly South of the Western chain of the Indian Archipelago, or Spice Islands. The magnitude of New Holland justly entitles it to the designation of a Continent: its most Northern extremity, Cape York, is in 10° 45' North latitude, while Cape Wilson, on the South-Eastern shore, is in latitude 39°, a coast line of above 2000 miles extending

between them. The greatest breadth is from Point Escarpé, in 113° 15', on the Western coast, to Cape Moreton in the same latitude, and in longitude 153° on the Eastern, a direct distance of 2600 miles. The superficial extent of this great Island may be estimated at about three and a half millions of square miles; or, if compared with that of the Continent of Europe, may be taken to bear towards it the ratio of 15 to 17.

NEW
HOL-
LAND.

An account of the successive discoveries and laborious voyages by which this extensive Country has been gradually made known to us, has already been given under the head AUSTRALIA; we shall here, therefore, confine ourselves to the Geographical survey of it, as far as research has hitherto penetrated, with some description of its natural productions and aboriginal inhabitants: but as far as regards the circumstances of the British Colonies on the Eastern coast, with the details of the regions they possess, the soil, the climate, the mineral riches, and other particulars, deriving importance from their relation to Civilized Man, we refer, for more satisfactory information, to NEW SOUTH WALES.

Scarcely any thing is yet known of the Geography of New Holland beyond the coast; great chains of mountains, which might serve to elucidate the physical distribution of the Country, are nowhere visible, except on the Eastern side, where the Blue Mountains run parallel to and at no great distance from the shore; nor have any great rivers been as yet discovered, the course of which might lead us to conjecture the situation of those mountain ranges, which it is hard to conceive wanting in so extensive a Country. As far, however, as observation has reached, the greater part of New Holland appears to be a dead flat, or gradually to assume that appearance towards the interior. As the voyages of Captain King, in 1818 and 1822, complete (with the exception of a few little breaks) the survey of the whole coast, which preceding navigators had left unfinished, we are now enabled to trace an authenticated outline of the Australian Continent.

Eastern
coast.

On approaching the Eastern coast, above Cape Howe, the shore appears bold and picturesque; the country behind rising higher and higher into swelling hills of no great elevation, but crowned with evergreen forest trees, and close brushwood, exhibiting a gloomy and scathed verdure, extremely different from the fresh appearance of vegetation in the forests of America, or even in our own climate. The creeks and rivers of the South-Eastern shore appear to be still but imperfectly known; and the Clyde, in latitude $35^{\circ} 40'$, is, we believe, the Southern limit of the explored country. The minerals met with along this river are sandstone, clayslate, and greywacke, lying, where they are found, indurated in vertical strata, extending from South-West to North-East: this Geological phenomenon is of some importance, as it may serve to explain why many of the rivers of New South Wales run, for the greater part of their courses, in a direction parallel to the coast. Jervis's Bay, in latitude 35° , is said by Mr. Berry, who examined it, to be superior to many of the best frequented harbours in the world, being easy of access, affording good shelter, and safe anchorage. For some hundred miles North of this the shore is generally bold, of sandstone cliffs, sometimes interrupted by low sandy beaches, or banks of soft mud, covered with mangroves to the water's edge. The soil towards the shore is poor and uninviting, but from five to ten miles inland commences an elevated terrace of fertile land.

Rivers.

The Bris-
bane.

The principal rivers known are the Clyde, Shoal-Haven River, Pigeon-House River, George's River, the Hawkesbury, Hunter's River, the Hastings, the Tweed, and the Brisbane. This last is a magnificent stream, opening into Moreton Bay, in latitude $27^{\circ} 25'$, and navigable for ships of large burthen above 60 miles from its mouth. Where the exploration of it ceased, the river had decreased but little in breadth or depth, and the tide still

rose four feet, being only one foot less than at the mouth, so that it resembles a canal flowing through a level country; the country along its banks is of the richest description, abounding with good timber. No mountains appear to the Westward, so that Mr. Oxley, who discovered and examined the river in 1823, was disposed to consider it as the outlet of the great interior waters which he had previously discovered in 1818. The Brisbane is by far the most important river as yet discovered in New South Wales, not only from its magnitude and the fertility of the circumjacent country, but also because it appears to be exempt from those violent floods which at times commit such ravages on the banks of the Nepean and Hunter's River. The advantages of the situation were not overlooked by the Colonial Government, but a convict settlement was immediately established at Red Cliffs, in Moreton Bay, about 10 miles below the mouth of the Brisbane, and 450 from Port Jackson. Thus the Colonies extend from the Illiwarra, or Five Island district to Moreton Bay, a distance of above 500 miles. In this space there are two harbours, in which the largest navies can at all times ride in safety, but the shore in general offers few havens for ships of burthen; most of the inlets as well as rivers are barred by sand-banks, as if the natural process of forming channels were not yet completed; not a few rivers, indeed, terminate in lagoons, which only occasionally communicate with the sea across the intervening sands. The Boyne, a considerable stream, falling into Port Curtis, in latitude $23^{\circ} 56' 30''$, has also been surveyed with a view to a settlement, which will be made here probably at no distant period. Between the latitude of 22° and Torres Strait, a distance of 700 miles, no investigation for the discovery of rivers has been yet made, and Captain King, who sailed close enough to the shore in 1819 to have the sea-beach almost always in view, says that nothing like an opening of any consequence was observed; this negative testimony, however, will appear of less weight when we consider how long the Hastings, Tweed, and Brisbane escaped the notice of navigators. Whenever he landed within this distance the soil appeared shallow, the timber small and stunted. But in some parts, particularly about latitude 17° , the country was verdant and well wooded. The form of the coast near Cape Bowling Green, latitude $19^{\circ} 19'$, and a wide chasm in the distant mountains, led him to surmise the existence of considerable rivers thereabouts, a conjecture which circumstances did not allow him an opportunity of confirming. In latitude $15^{\circ} 27'$ is Endeavour River, so called by Captain Cook, who hauled down and repaired his ship in this moderate-sized stream, after having lain three and twenty hours on a coral reef. Beyond this all semblance of fertility ceases, and the remainder of the coast to the North Cape, a distance of 300 miles, is low, sandy, and barren. At this spot also the granitic rocks cease to appear. The East coast of New Holland, in these latitudes, is so closely beset with innumerable islands, united among themselves and with the main by coral reefs, as to render the navigation extremely difficult. The coral reefs, indeed, commence in a high latitude, at a distance of 25 or 35 leagues from land, but approaching nearer as they run to the North; being only 20 leagues from Broad Sound, 9 from Cape Gloucester, and at Cape Tribulation reaching close to the shore. On the East, or outside of these reefs, the sea breaks with great fury, and is of unfathomable depth, but the enclosed arm is generally smooth,

NEW
HOL-
LAND.

Coral reefs.

NEW
HOL-
LAND.

with from 60 to 30 fathoms, thus possessing unusual advantages for a coasting trade. Two deep channels across the coral barrier were found by Captain Flinders, and an accurate survey will probably discover more

Gulf of
Carpentaria.

The voyage to the North coast lies through Torres Strait, which is crowded with small islands. Immediately to the Westward of Cape York, the most Northern point of New Holland, is the *Gulf of Carpentaria*, the shores of which measure a space of 900 miles, the gulf itself being 400 miles deep, and 300 broad. In old Dutch maps many outlets and openings of rivers are marked along its shores, so that it was thought to receive the principal streams of the Australian Continent; but the accurate survey made of it by Flinders overturned this hypothesis. The Eastern side is low and sandy, the Western has many fine harbours, and is bordered by some large islands, but the land in the vicinity of the coast is low and barren. Wellesley's Islands, a group at the bottom of the gulf, abound in iron ore; the soil of even the best parts is far below fertility; but the small trees and bushes which grow there, with the grass in some open places, save the larger islands from the reproach of absolute sterility. The principal rock formation in the gulf is a close-grained sandstone. From Cape Wessel, which is the projection that forms the North-West head of the Gulf of Carpentaria, and is the extremity of a group of low barren islands, to Cape Van Diemen, the country is named *Arnhem's Land*. The coast here is low, and the shore in general a sandy beach, intersected towards the West by projecting rocky heads, and presenting many fine ports and harbours. About midway between the capes is a river, called Liverpool River by Captain King, who ascended it about 40 miles without finding any improvement in the nature of the soil; no hills were seen, but the country was everywhere flat, and bore the appearance of being occasionally inundated. Alligators and a few birds were the only animals seen. Near the Western extremity of the North coast, in the ancient charts, is a deep opening called Van Diemen's Bay. This has been discovered by the late survey to be a strait 70 miles deep, and 40 broad, separating from the main land two large islands, the North-Western extremity of which bore the name of Cape Van Diemen. In the gulf on the South-East side of this strait are some rivers, winding through a vast plain of level land, bearing the marks of great inundations. These, to which Captain King gave the name of Alligator Rivers, have the same character; flowing between low muddy banks covered with mangroves, with little current, and apparently navigable a long way up. They will, in all probability, prove to be the mouths of some great river, by which the waters of the interior are carried to the sea. The soil here is in general a stiff clay of no great fertility, but the climate is in the highest degree favourable to vegetation, so that palm and gum trees, acacias and mangroves, with an immense variety of tropical flowers, grow exuberantly on the very beach.

Alligator
Rivers.Melville
Island.

The islands separated from the main by Van Diemen's Gulf, are called Melville and Bathurst Islands. A narrow channel from one to three miles wide, and 40 in length, named Apsley Strait by Captain King, who sailed through it, imagining that he had made the discovery of a great river, runs between them. *Melville Island*, on the East of the strait, is of considerable size,

the circumference of it being at least 200 miles. It is fertile and more elevated than the main land to the Eastward, possessing many good harbours besides Apsley Strait. *Bathurst Island* has a circumference of about 120 miles. The Northern coast of New Holland, and those islands in particular, are rendered more interesting by the circumstance of their being now included in the possessions of Great Britain.

In the commencement of 1824 Captain Bremer was despatched in the *Tamar* to take possession of Arnhem's Land, on the North coast of the Continent, and to form an establishment on the most eligible spot that could be found for a mercantile depot. The *Tamar* anchored first in Port Essington, a deep inlet in the promontory to the North-East of Van Diemen's Gulf, and, a union-jack being fixed on a conspicuous point, formal possession was taken of the North coast of Australia, between the meridians of 129° and 136° East of Greenwich. An eligible situation, however, for the new settlement was not met with till the ship entered *Port Cockburn*, the mouth of Apsley Strait; here a small rivulet and plenty of water were discovered on Melville Island. A projection of land was fixed on for the site of the town, and a fort, called Fort Dundas, was constructed. The first settlers were 45 convicts, including three or four women, with a detachment of military and marines. The soil and climate of Melville and Bathurst Islands are capable of bearing all the valuable productions of the East, particularly spices; and the situation of the new settlement is well adapted for mercantile speculation. This coast is annually visited by the Malays, who come here in large fleets to fish for the *Trepang*, or *Bêche de mer*, and, perhaps, the intention of making this settlement was to open a commerce by their means with the Eastern portion of the Indian Archipelago, where at present all trade is engrossed by the Dutch. The new Colony, nevertheless, however bright may be its future prospects, has not yet attained a flourishing condition. The want of females and of cattle, the heat of the climate, and the constant hostility of the natives, are the principal drawbacks on its prosperity. The importation of some Chinese labourers is, perhaps, the measure best calculated to relieve it from its present languishing state.

To the West of Clarence Strait, which separates Bathurst Island from the main, the coast trends to the South, but continues to bear the same low and sterile character as far as *Cambridge Gulf*. This is a deep and extraordinary salt-water inlet, in East longitude 128°, extending for upwards of 60 miles through a circuitous channel, which, being narrowed in many places to the width of half a mile, causes a rushing tide. Here the coast assumes a new appearance, high and precipitous ranges of detached hills rise suddenly from a level plain, which is so low as to be occasionally covered by the high spring-tides. These waters are so quickly evaporated by the great heat, as to leave the ground incrustated with saline crystallizations, which give it the appearance of being covered with snow, and, by reflecting the sun's rays, severely afflict the eyes. This extraordinary gulf terminates in numerous shallow, muddy, salt-water inlets, which in the rainy season would probably furnish plenty of fresh water. Westward from the gulf the coast assumes a new appearance, and is intersected by numerous fine ports, bays, and some rivers. One of the rivers (Prince Regent's) runs inland for upwards of 60 miles, and terminates in a fresh-water

NEW
HOL-
LAND.Bathurst
Island.Colony at
Port Cock-
burn.Cambridge
Gulf.

NEW
HOL-
LAND.

stream. The nature of the country, however, is even worse than to the East; it is a huge mass of rocks heaped one upon the other, the interstices being filled with *spinifex*, a prickly, useless grass, of powerfully aromatic smell. The Geology of this part of the coast consists of a silicious sandstone, of a very hard and fine grain; much of it is coloured by a ferruginous oxide, and a small quantity of native iron, imbedded in a quartzose rock with copper pyrites, was also found here. This high land, distinguished by its numerous great inlets, which deserve to be carefully explored, extends from Cambridge Gulf, facing the North, to Prince Regent's River on the West.

De Witt's
Land.

The remainder of the North-West coast, as far as North-West Cape, an extent of 1000 miles, marked in the maps as *De Witt's Land*, is a low, sandy, and unpromising country, in many places so low as not to be visible from a greater distance than 12 or 14 miles. It is consequently dangerous of approach, and has perhaps, on that account, been less accurately surveyed than the other shores of Australia. Numerous islands are scattered at no great distance from the main, to which they are generally superior in verdure and fertility; among them is the *Rosemary Island* of Dampier, in the neighbourhood of which is good anchorage. A small species of *Ficus* is the chief productions of the vegetable kingdom in this Archipelago, but the sea affords plenty of trepang and of shell-fish, particularly oysters. To the East of North-West Cape is *Exmouth Gulf*, a deep inlet of the sea, 45 miles in length, but presenting little short of absolute sterility. The coast is here protected from inroads of the sea by a barrier of sand 10 or 20 feet high, on which grow a variety of plants, particularly a species of convolvulus of gigantic size. Behind the sand-hills the country is flat, and in general below the level of the sea, so that at high tides the land is occasionally inundated, and the water being quickly evaporated by the intense heat of the sun, a salt incrustation covers the plains: enormous ant-hills were seen here, some of which measured 8 feet in height, and 26 in circumference. The North-East, or land breeze, at this part of the coast, is a most oppressive hot wind, resembling the North-West wind in New South Wales, a circumstance which seems to prove the existence of some central deserts of arid sand.

Rosemary
Island.Exmouth
Gulf.Endracht's
Land.

Endracht's, *Edel's*, and *Leeuwin's Land* are the names of the successive portions of the Western coast, from North-West Cape to Cape Leeuwin, a distance of 800 miles. The coasts of *Endracht's Land* are very low and unpromising, but chains of mountains are visible in the interior, at the distance of 25 or 30 miles. Dwarf gum trees and mangroves in some places overrun the shore. Almost all the flowers seen here were of a blue colour. The shells, and even vegetables, on this coast, are, according to M. Peron, frequently seen covered with a strong incrustation, which appears to be formed with unaccountable rapidity. "Another Perseus," to use the words of M. Riche, Naturalist to the French expedition, "seems to have carried the head of Medusa along these strange shores." The remainder of the West coast is difficult to be approached from the roughness of the shores and numerous coral reefs. The country has everywhere nearly the same arid unproductive appearance. The only openings of importance are *Sharks' Bay* and *Swan River*. This latter acquires importance, having been selected by the British Government as the situa-

tion of a Western Australian Colony. The expedition destined to form the settlement is at the present moment (January, 1829) about to depart. The *Swan River*, so called from the great number of black swans seen upon it, was explored for nearly 60 miles from its mouth by Mr. Bailly, Mineralogist to the expedition of Baudin and Hamelin, who found it to flow over calcareous rocks, and through a tolerably good soil covered with thick forests of gum trees. High mountains were visible in the distance. The river is shoal throughout, and particularly at its entrance, where the channel is not more than six or eight feet deep; within, it expands, being in some places a mile wide, with sufficient depth of water for large boats. At the point where the examination of the French officers ceased, the river was still a third of a mile in width, and flowed with a very slow current. A group of islands opposite to the mouth of the river offers some roadsteads with safe anchorage for large vessels.

NEW
HOL-
LAND.

Swan River.

The South coast of New Holland, extending above 1200 miles between Cape Leeuwin and Cape Howe, trends to the Northward from both extremities, so as to form a wide gulf. The Western portion of it, called *Nuyt's Land*, has been examined by the navigator whose name it bears, by Vancouver and d'Entrecasteaux; of the remainder nothing was known before the voyages of Flinders and Baudin, who encountered each other in the middle of the gulf pursuing opposite courses. The former, who sailed from the East, was of course the first discoverer of the long extent of coast to which the latter gave the name of *Terre Napoleon*. A little to the East of Cape Leeuwin is *King George the Third's Sound*, a deep bay with two good harbours, called *Princess Royal* and *Oyster Harbour*, affording abundance of wood and fresh water. In the rear are high mountains, the white and pointed summits of which resemble piles of ruins. Mount Gardner, in this vicinity, has the form of a volcano. Many of the promontories here are formed of coral, which is even found on the summits of hills 1000 feet above the sea. The rocks are chiefly granitic, the soil in many places chalky and covered with marshes. The coast, as we proceed towards the East, becomes miserably dry and barren, and for about 500 miles near the centre of the gulf presents nothing but uniform sandy cliffs, from 400 to 600 feet high, with few trees on them, and totally excluding the view of the interior country. Of these cliffs Captain Flinders remarks, that the equality of their elevation, and their evident calcareous nature, seem to bespeak them to have been the edge of a vast coral reef, which is always more elevated than the interior part. From the gradual subsiding of the sea, or from some convulsion of nature, this bank may have attained its present height; and upon this supposition it may be concluded, that the country within is a low sandy plain, or perhaps that the bank is a barrier between external and internal seas. Further to the East are two great inlets, *Spencer's* and *St. Vincent's Gulfs*, respectively named by the French navigators *Golfe Bonaparte* and *Baie Josephine*, separated by a neck of land, called *Cape York*, or *Cambaceres*. *Spencer's Gulf* runs 190 miles inland, where it terminates in mangrove swamps without any appearance of a river; in breadth it varies from 30 to 70 miles. Near the entrance is a magnificent harbour, *Port Lincoln*, or *Champagne*, formed by three basins. The largest ships can anchor close to the shore in twelve fathoms. The land is high

South coast.

Nuyt's Land

Spencer's
Gulf.

NEW
HOL-
LAND.

and covered with timber: the general appearance of vegetation was such, as to give reason to suppose the existence here of some fresh-water streams, though none were found by our navigators. *St. Vincent's Gulf* is about 30 leagues long by 8 or 10 in breadth; at its entrance is *Kangaroo Island*, covered with timber, and apparently very fertile.

Mount
Brown.

At the head of *Spencer's Gulf* is a range of lofty hills, one of which, named *Mount Brown*, from the celebrated botanist who ascended it, is above 3000 feet high. The rock forming the ridge is argillaceous, of a reddish colour, close-grained, and heavy. From the summit of the mountain no rivers or lakes could be seen; in every direction the eye traverses an uninterruptedly flat, woody country, the only exceptions being the ridge of mountains running North and South, and the waters of the Gulf to the South-Westward. *Kangaroo Island*, as well as the coasts of the main and the small islands in *Bass's Straits*, supports a few runaway convicts from New South Wales, who prefer the miseries of a savage life to plenty coupled with restraint and labour. Half naked and half starved they are numerous enough to supply a few small vessels with kangaroo and seal skins in exchange for brandy and wearing apparel. The coast near *Bass's Straits* is of the most sterile description; it has, however, two fine harbours, *Port Western* and *Port Philip*, in the neighbourhood of which the country assumes a better appearance, the vegetation being various and luxuriant. *Port Philip*, with an entrance only half a mile wide, expands to a basin 150 miles in circuit. A Colony was about to be established here in 1805, and Captain Tuckey was despatched for that purpose, but the deficiency of fresh water throughout the shores of this great harbour frustrated the intention of Government. *Port Western*, which is equally verdant, and abundantly supplied with running streams, will probably soon be chosen as the seat of a settlement. *Cape Howe*, the promontory forming the South-East point of New Holland, is a vast mass of granite joined to the Continent by a narrow isthmus; an unbroken continuity of low sandy beach stretches to a great distance on both sides of it.

Port Philip.

Fort
Western.

We have thus made the circuit of New Holland, and it will have been perceived how very small a portion of the coast presents an appearance of even tolerable fertility, how insignificant are the mountain ranges discernible from the sea, and what a remarkable deficiency there is of rivers flowing from this extensive Continent.

Comparatively little is known of the interior of this vast Country, and that little is calculated to increase our anxiety for its further examination. A description of the fine country discovered to the West of the Blue Mountains will be found under the head NEW SOUTH WALES: we shall at present confine ourselves to mention the course of the interior waters there met with, the determination of whose outlet is the most embarrassing problem in the Physical Geography of that Continent.

The Mac-
quarie
River.

The *Macquarie* rises in a group of hills about 80 miles to the West of *Port Jackson*, and flows, with the exception of minor sinuosities, in a regular North-Western course. The country which it waters at first is varied and beautiful in a high degree, rich prairie lands and fine woods alternating on its banks. Great hopes were awakened by the discovery of this fine river, and in June, 1818, Mr. Oxley, the surveyor of the Colony, descended it in the hopes of reaching the sea. After having followed its course for a month, a flood in the

NEW
HOL-
LAND.

river made the surrounding country a perfect sea; the banks were still heavily timbered, and many large spaces covered with the common reed were also encircled with trees. "On the 3d July," says Mr. Oxley, "the main channel of the river was much contracted but very deep, the banks being under water from a foot to eighteen inches. The stream continued for about twenty miles further, when we lost sight of land and trees; the channel of the river winding through reeds, among which the water was about three feet deep, the current having the same direction as the river. It continued in this manner for about four miles more, when all at once it eluded further pursuit by spreading at all points, from North-West to North-East, over the plain of reeds which surrounded us; the river decreasing in depth from upwards of twenty to less than five feet, and flowing over a bottom of tenacious blue mud, and the current still running with the same rapidity as before. The point at which the *Macquarie* unites with the interior waters is in latitude $30^{\circ} 45'$ South, and longitude $147^{\circ} 10'$ East."

The *Lachlan* has its sources a few miles Westward from those of the *Macquarie*. Its course was explored by Mr. Oxley for about 1200 miles, when the river gradually diminished by spreading itself over lagoons communicating with its channel; and, at last, when only about 20 feet wide and three deep, terminated in a boundless marsh. The place at which the *Lachlan* is thus lost is about 500 miles West of Sydney, and nearly in the same parallel. The *Macquarie*, the navigable course of which does not perhaps exceed 800 miles, receives nevertheless more tributaries than the *Lachlan*, and pours down a more copious flood of water. Mr. Oxley having traced the *Macquarie* to its termination in the marshes, crossed the country in an Easterly direction nearly in the parallel of 31° , and found that it was a land of running waters, every valley pouring along its contribution; and his route being intersected by several great rivers, one of which, the *Castlereagh*, appeared very much to exceed the *Macquarie* in magnitude. Where, then, have these waters their outlet? or are we to suppose them wasted over shallow lagoons, or absorbed in sandy deserts? In all probability it will be discovered that they discharge themselves into a great lake, which again communicates with the sea by many openings, as the *Alligator Rivers*, the *Swan* and *Prince Regent's River*, or the *Brisbane*. Such a discovery would satisfy all the contending hypotheses. The *Alligator Rivers* are unquestionably the mouths of a single river; as, from the Physical character of the country through which they flow, the existence of separate basins of independent rivers would be quite inexplicable. It deserves also to be remarked, that the slow current and very gradual diminution of the *Brisbane* and chief rivers on the Western coast indicate a very great length of course, quite sufficient at least to reach the internal sea into which the *Macquarie* is discharged.

The Lach-
lan.

The Geology of New Holland, as far as it is known, presents no remarkable phenomena. The minerals found along its coast correspond exactly with those already known. On the Eastern coast granite is found at the Southern angle, and afterwards for a space of 500 miles from *Cape Cleveland* to *Lizard Island*. It occurs again on the North coast at *Melville Island*. Where the granite intermits on the Eastern shore the interval is filled by rocks of the trap formation and by

Geology.

NEW
HOL-
LAND.

red sandstone, supporting coal exactly resembling the sandstone of the coal formation in England. A calcareous stone, having the appearance of concretions, but without any distinct ramifications, and sometimes resembling coral, forms a great part of the Western coast about Swan River, and was found in some islands in the Gulf of Carpentaria. No rocks were seen of recent volcanic origin. Sandstone is the most common formation, and limestone hardly makes its appearance on these many thousand miles of coast.

Botany.

The Natural History of the Australian Continent is defective not merely in the mineral kingdom. The fruits of the Scientific researches made in the neighbourhood of the Colonies will be found detailed in our account of NEW SOUTH WALES. We shall here confine ourselves to the few general observations which apply to the whole Continent. The leading characteristic of Australian vegetation is the great abundance of the *Eucalyptus*, or gum tree, and the *Acacia*. These two genera, considered in reference to their size as well as frequency, are equal, Mr. Brown says, to all the rest of the vegetation put together. Of the *Eucalyptus* above 200 species are known; and within the parallels of 33' and 35', where the Australian character is most strongly marked in the vegetable kingdom, they form four-fifths of the forests. Some kinds rise to the height of 80 feet, with straight branches, or stems, and even to 100 and 120 feet on the Southern shores and Van Diemen's Land. The faded hue of these sombre evergreens, their naked stems, and the decayed ragged appearance of the bark, give a gloomy character to those extensive forests.

The leafless *Acacia*, the most abundant of its genus, produces the same effect. Its leaves are truly expanded footstalks placed vertically, and with the edge towards the stem. Towards the tropic the Palm tree and Norfolk Island Pine make their appearance. The Palms are comparatively few even in the tropical portion of the country. In the islands on the West coast, about the latitude of 15°, has been found a *Capparis*, which, in the enormous bulk of its stem and general ramification, bears a striking analogy to the *Adansonia* of Western Africa. It has been remarked, that few edible plants are found here, and the timber is in general extremely hard, brittle, and internally decayed. The Cabbage Palm, however, and Betel nut are occasionally met with, and the Sago Palm is abundant on all parts of the North coast. An Indigo plant has been found, and two species of Nutmeg, but none of them fit for use. No species of plants is so common as to be found on the opposite coasts, with a few exceptions towards the North-West. Not less than 3900 species of Australian plants were added by Mr. Brown to the 300 previously known, and the *Flora* of New Holland has been recently much increased by the Scientific exertions of Mr. Allan Cunningham. A great majority of the genera discovered are peculiar to the country. Of the remainder some are common to the African *Flora*, and still more to that of South America.

Zoology.

Almost all the animals of New Holland are marsupial, that is, are provided with a pouch to carry their young. The species of the kangaroo already known exceed 20. The dingo, or native dog, the flying fox, and the wombat, which bears some resemblance to the sloth and to the honey bear, are met with on all the coasts; but the anomalous animal, the *Ornithorhynchus paradoxus*, or water mole, which unites the bill of a

duck to the limbs of a quadruped, inhabits the banks of rivers and the lakes of the interior. It appears to be anomalous not only in its form but in its whole economy. The feathered tribes appear to be by no means numerous, nor do they present any striking singularity of appearance. Our acquaintance indeed with the ornithology, and with the other animal kingdoms of New Holland, is almost wholly confined to the East coast.

The shores of New Holland are but thinly peopled, and there is reason to believe, from the late excursions, that the inhabitants of the interior are still fewer in number. They appear to be all of the same race, combining the features of the Malay and the Papuan negro. They are in general of the middle size, but with limbs remarkably attenuated. Their eyes are half closed, their noses flat, their mouths of monstrous size, and their countenances altogether hideous in the extreme. Their deportment, however, is erect and graceful, and their females frequently possess great elegance of form. The strength of the natives of New South Wales, as derived from experiments made by Baudin with the Dynamometer, was, compared with that of a European, in the proportion of five to seven. The Tribes of this great Continent, though resembling each other in Physical conformation, yet each speak a different language, and our acquaintance with these numerous tongues is as yet too imperfect to allow us to trace their mutual relationship. They all anoint their bodies with grease, oil, or bees' wax, and paint it with chalk and ochre. In some places they cut the skin in stripes, so as to raise large scars, and these are conspicuously coloured. The natives of King George's Sound alone bear any clothing, and they carry only a kangaroo skin on their shoulders, but they use no covering suggested by modesty. In the vicinity of Port Jackson the native Tribes are among the most degraded and miserable of the human species. They depend for food chiefly on the supply of shell-fish thrown on shore; they are without any trace of government or social combination, their families consisting in general of few individuals living separately, and sheltered by a wretched hut, formed of a few sticks and some strips of bark. Their marriages are effected by brutal violence, the female being usually struck down unawares by the ardent bridegroom, who carries her off as a spoil. The women among these Tribes are deprived of two joints of the little finger of the left hand, and those met with recently in the interior were all deprived of an eye. One Tribe, or rather family, has the singular privilege of extracting two front teeth from the upper jaw of all the rest. This tribute of teeth appears to be collected from their Youth every four years. The attempts made in the Colony to civilize these people have not met with any success, and an unfortunate opinion prevails there that the Australian natives are totally incapable of Civilization. Yet they are unequalled in quickness of perception and powers of imitation: they in general speak English without the slightest fault of foreign accent, and mimic the Colonists with astonishing fidelity. The Tribes met with to the South of the Colonies, and to the North of Moreton Bay, are very much superior in character and appearance. Some shipwrecked seamen were treated by the latter with unremitting kindness and hospitality. They acknowledged a Chief, and lived together in considerable numbers. The quarrels between the Tribes were settled by pitched

NEW
HOL-
LAND

Natives.

NEW
HOL-
LAND.
—
HOLLOW.

battles or duels, conducted with order, and not necessarily fatal. The women were treated with kindness. The canoes were of better construction, being in some instances capable of carrying two persons; the huts were large enough to shelter a family of eight or ten, and some industry was evinced in the making of fishing-nets from rushes. The females of this Tribe possess, it is said, in some instances, an elegance of form which a white woman might not despise. These people pierce the nose like the natives to the South, and hang ornaments from it. The Tribes on the North coast are engaged in constant hostility with the Malays, a circumstance which renders it difficult for white men to hold any intercourse with them. They frequently steal the Malay proas, which may hereafter serve them as models in the construction of their canoes.

Their weapons are stones and spears, but they appear unacquainted with the club so common in New South Wales. Their spear is the same which is used in every part of the Australian Continent. Though not deficient in courage and audacity, they have but little dexterity, and their spears, thrown from a distance of a few yards, but rarely take effect. Proofs of the imitative or copying talents of the Australian Indians were found on Clack's Island, on the North-East coast, by Mr. Cunningham the Botanist, who accompanied Captain King. In some caverns were observed curious drawings, executed by dots of a white argillaceous earth, which had been

worked up into a paste, on a ground of red ochre, rubbed on the sides of the cavern. They represented tolerable figures of sharks, porpoises, turtles, lizards, trepang, star-fish, canoes, water-gourds, and some quadrupeds, probably intended for kangaroos and dogs. The figures were not only marked in outline with the dots, but were also decorated with the same pigment in dotted transverse belts. Some representations of a similar kind were found by Mr. White, carved on stone, in the neighbourhood of Port Jackson, and Captain Flinders discovered figures on Chasm Island, in the Gulf of Carpentaria, drawn with a burned stick; but those on Clack's Island were executed with much greater care, and are a favourable specimen of Australian Art. On the Western coast, about Dampier's Archipelago, the natives seemed, to Captain King, to be quite as ignorant and miserable as those of Port Jackson. Instead of canoes they use decayed trunks of mangroves, on which they sit astride and paddle with their hands. They viewed with indifference the axes, chisels, and other tools which were offered to them.

LAND.
—
HOLLOW.

HO'LLOW, *v.*

HO'LLOW, *n.*

HO'LLOW, *adj.*

HO'LLOWLY,

HO'LLOWNESS,

HO'LLOW-EYED,

HO'LLOW-HEARTED,

HO'LLOW-HEARTEDNESS,

HO'LLOW-SOUNDING.

A. S. *hol-ian*, *aholan*; *excavare*, *perfordere*, to dig, to make *hollow*; Ger. and D. *hol-en*; Sw. *holka*.

To excavate, to dig out the solid contents; and thus *hollow*, the *adj.*, is, met.

Unsolid, unsubstantial,

faithless.

A *hollow* sound; as if issuing or proceeding from a *hollow* place.

For in the Idus of October atte Wynchecombe suche a stroke cam doune, that hit threst so that on side of the tour of the stepille, that hit *holwed* the stonene walle to a manne's gretnesse.

R. Gloucester, p. 415, note.

"Doþ out þis water," quoth Merlyn, " & wen it is a weye, ge schul bi neþe get y fynde *holwe* stones tweye, And in eyþer a dragon þer inne slepe faste." Id. p. 131.

As lene was his hors as is a rake,
And he was not right fat, I undertake;
But loked *holwe*, and therto soberly.

Chaucer. *The Prologue*, v. 291.

And whan that he was slain in this manere
His light ghost, ful blisfully is went
Up to the *holownesse* of the seuenth sphere.

Id. *Troilus*, book v. fol. 194.

These lockes that hang unkempt, these *hollowe* dazled eyes
These chattering teeth, this trebling tongue, well tewed with carefull cries.

Gascoigne. *Flowers. The Anatomye of a Louer.*

Of the iuye and the vyne leaues they made themselves garlands,
& ran up & downe after a dissolute maner, all the *hollowes* & valleys
thereabout rebounding with the voice of so many thousands, calling
vpon Bacchus, to whom that place was dedicate.

Brende. *Quintus Curtius*, book viii. fol. 236.

Which trembling stack, and shoke within the side,
Wherwith the caues gan *hollowly* resound.

Surrey. *Virgil. Æneis*, book ii.

VOL. XXIII.

Whan was *holowe-herted* flatterye and craftye deceauyng, more practiced, and lesse hertye frendeshyp steryng, than now?

Udall. *Ephesians. The Prologue.*

For it is not ynoughe to haue geuen ouer theft, whoredom & murdre, in baptisme, except al *hollow-hartednes* be also plucked quite out of y^e mind, & in stede of hate, charitie come in place.

Id. 1 John, ch. ii.

Hollow your body more sir, thus. Now stand fast o' your left leg, note your distance, keep your due proportion of time.

Ben Jonson. *Every Man in his Humour*, act i. sc. 5.

For like to pillars most they seem'd,
Or *hollow'd* bodies made of oak or firr
With branches lopt, in wood or mountain fell'd.

Milton. *Paradise Lost*, book vi. l. 574.

Thus as they two of kindnesse treated long,
There them by chance encountred on the way
An armed knight, vpon a courser strong,
Whose trampling feet vpon the *hollow* lay
Seemed to thunder.

Spenser. *Faerie Queene*, book iii. can. 8.

FER. O heauen; O earth, beare witnesse to this sound,
And crowne what I professe with kinde euent
If I speake true: if *hollowly*, inuert
What best is boaded me, to mischiefe.

Shakspeare. *Tempest*, fol. 11.

Yet it has been noted, that many old trees (quite decayed with an inward *hollowness*) have born as full burdens, and constantly, as the very soundest.

Evelyn. *Pomona*, ch. iii.

A needy, *hollow-ey'd*, sharpe-looking wretch.

Shakspeare. *Comedy of Errors*, fol. 98.

RAT. Most mightie soueraigne, on the Western coast
Rideth a puissant nauie: to our shores
Throng many doubtfull, *hollow-hearted* friends,
Vnarm'd, and vnresolu'd to beat them backe.

Id. *Richard III.* fol. 199.

Some log, perhaps, upon the waters swam
An useless drift, which, rudely cut within,
And, *hollow'd*, first a floating trough became,
And cross some riv'let passage did begin.

Dryden. *Annus Mirabilis*, st. 156.

2 T

HOLLOW.
—
HOLLY.

And up among the loose disjointed cliffs,
And fractur'd mountains wild, the brawling brook
And cave, presageful send a hollow moan,
Resounding long in listening Fancy's ear.

Thomson. Winter.

Yet is not the hollow of the bones altogether useless, but serves to contain the marrow; which supplies the oyl for the maintaining and inunction of the bones and ligaments, and so facilitating their motion in the articulations.

Ray. On the Creation, part ii.

Let such pretenders suspect the sandiness and hollowness of their foundation.

South. Sermons, vol. iii. p. 153.

— The distant water-fall
Swells in the breeze; and, with the hasty tread
Of traveller, the hollow-sounding plain
Shakes from afar.

Thomson. Winter.

The [canoe's] bottom was sharp, with straight sides like a wedge, and consisted of three lengths, hollowed out to about two inches, or an inch and a half thick, and well fastened together with strong plaiting.

Cook. Voyages, vol. ii. book ii. ch. x.

The gale continued, with heavy squalls and a large hollow sea, all the afternoon.

Id. Ib. book ii. ch. vii.

HOLLY,
HO'LLY-BUSH,
HO'LLY-LEAVED,
HO'LLY-SET,
HOLM,
HOLMTREE.

A. S. *holegn*. *Aquifolium*, *rusca sylvestris*. The holly, or holm-tree. Somner. The Fr. *houx* is derived by Menage from the Gr. *ὄξυς*, sharp; the Lat. *aquifolium*, by Vossius, from *acuti folium*; and for the same reason, viz. the sharpness, the prickleness of the leaves, Skinner suggests that the name *hol-egn* was applied, from *hal* or *hol*, and *ecge*, the edge, *all edge*, or sharpness.

Holm, applied both to the *aquifolium* and the *ilex*, Skinner thinks may be from the A. S. *holm*, a river island, because these trees flourish in moist and watery places. It is not improbably corrupted from *hollen*, *holn*, and, by change of *n* into *m*, *holm*.

The trivial name of the *Ilex aquifolium* of Linnæus.

As oke, fir, birch, aspe, alder, *holm*, poplere.

Chaucer. The Knightes Tale, v. 2923.

And fast some water fetch, some crackling fier bring in their hand,
In surplice white of linen clad, and temples compast round
With wreath of veruine soote, and holly herbes together bound.

Phaer. Virgil. Æneidos, book xii.

Leave me those hilles where harbrough nis to see,
Nor holly-bush, nor brere, nor winding ditch.

Spenser. Shepherd's Calendar. June.

The holly leaves, and all the kinds of *holme*, are set with sharp pricks.

Holland. Plinie, book xvi. ch. xxiv.

Hee joied so much that in the Iland Capreæ, the boughs of a very old *holmtree* hanging and drouping now for age down to the ground, became fresh againe at his comming thither, that he would needes make an exchaug with the State of Naples, and in lieu of that Iland geve them Ænaria.

Holland. Suetonius, fol. 79. Octavius Cæsar Augustus.

But above all the naturall greens which inrich our home-born store, there is none certainly to be compar'd to the holly.

Evelyn. Sylva, ch. xxv.

And yet there is an expedient to effect it more insensibly, by planting it with the quick: let every fift or sixt be an *holly-set*.

Id. Ib.

— Some to the holly-hedge
Nestling repair, and to the thicket some.

Thomson. Spring.

The tree which produceth the winter's bark, is found here in the woods, as is the *hol'y leaved* barbary.

Cook. Voyages, vol. iv. book iv. ch. iii.

Beneath an *holm-tree's* friendly shade
Was Reason's little cottage made.

Smart. Reason and Imagination.

HO'LLYHOCK, or } *Hoc*, or *hoc-leaf*, is in A. S. HOLLY-
HO'LLY-OAK. } the mallow; and Skinner HOCK.
thinks that holly is *holy*; i. e. large or great; the great HOLO-
mallow. LEPTA.

The trivial name of the *Alcea* of Linnæus.

The chequ'd and purple ringed daffodillies,
Bright crowne-imperiall, king's-speare, *holy-hocks*.

Ben Jonson. Masques. Pan's Anniversarie.

Nonius supposes the tall rosea, arborescent *holihocks*, that bears the broad flower, for the best, and very laxative.

Evelyn. Acetaria.

HOLMSKIOLDIA, in Botany, a genus of the class *Didynamia*, order *Angiospermia*. Generic character: calyx coloured, large, bell-shaped, spreading, border nearly entire, rather shorter than the ringent corolla; the surface of the unripe fruit granular.

One species, *H. rubra*, native of the coast of Coromandel.

HOLOCAUST, Fr. *holocauste*; It. and Sp. *holocausto*; Lat. *holocaustum*; Gr. *ὁλόκαυστον*; because the whole was burned, from *ὅλος*, whole, and *καυστός*, burned, from *καίειν*, to burn. Cotgrave calls it

"A sacrifice killed and layed whole on the altar;" used met.

And in case ye shal see these wordes which I shal speake now not to be vaine; but to haue theyr present efficacie & strength, doubt ye not but that the sonne of man hath power in yearth to forgiue sinnes, and that not by sacrifices, or *holocaustes*, but by simple and plaine worde.

Udall. Matthew, ch. ix.

And she, thus left alone, might sooner prove
The perfect *holocaust* of generous love.

Beaumont. Psyche, can. 24. st. 194.

When the fathers opposed their sacrificial fire (viz. the fire of the spirit) to the sacrificial fire of the Jews and Pagans, they supposed it to enlighten, inflame, and spiritualize, not the elements, but the persons: therefore the persons were the true and acceptable sacrifices, living sacrifices, burning and shining *holocausts*.

Waterland. Works, vol. viii. p. 319. Distinctions of Sacrifice.

HOLOCENTRUS, from the Greek *ὅλος*, whole, and *κέντρον*, a spine; Artedi. In Zoology, a genus of animals belonging to the family *Percordes*, order *Acanthopterygii*, class *Pisces*.

Generic character. Muzzle short, mouth toothless, and little tensile; head bare and striated; the rest of the body covered with strong, thick, denticulated scales; the preopercule armed with a strong spine at the lower, and the opercule with one or two at the upper part; the dorsal and anal spines very strong, the former enveloped in the soft part of the fin.

This genus, according to Lacepede and Schneider, is very large, but Cuvier confines it to the three species.

H. Sogo; the *Welchman* of Jamaica; the *Squirrel* of Carolina.

H. Diadema.

H. Angularis; *Labre Anguleux*, Lacep.

They are found in the waters of warm climates.

See Cuvier, Règne Animal.

HOLOLEPTA, in Zoology, a genus of *Pentamerous*, *Clavicorn*, *Coleopterous* insects, established by Paykul, and adopted by Latreille.

Generic character. Body very flat, with the chin deeply nicked, the outer lobe of the jaws and their *palpi* long; the joints of the *palpi* cylindrical, the *presternum* not covering the mouth.

The *Hololeptæ* live under the bark of trees, where they undergo all the metamorphoses. Those of Europe are generally of a small size, but some of the exotic species are much larger

HOLO-
LEPTA.HOL-
STEIN.

These insects are usually of a black colour, and their *larvæ* resemble those of *Hister*.

The type of the genus is *Hister depressus* of Fabricius. This species is found in England.

HOLOSTEUM, in *Botany*, a genus of the class *Triandria*, order *Trigynia*, natural order *Caryophyllæ*. Generic character: calyx five-leaved; corolla, petals five; capsule one-celled, cylindrical, bursting at the apex.

Four species, natives of the Northern hemisphere. *H. umbellatum* is a native of England.

HOLOTHURIA, in *Zoology*, a genus, or rather family of radiated animals, allied to the Sea Eggs.

The following is the character of the restricted genus. The body free, cylindrical, thick, soft, and very contractile; skin coriaceous, generally papillary; mouth terminal, surrounded by laterally divided, rather branchy, or pinnated gills, armed with bony or calcareous teeth; vent near the hinder extremity.

These animals, from the peculiarities of their form, attracted the attention of the older Naturalists. Linnæus first described the genus under the name of *Priapus*; but in his latter editions he altered it to *Holothuria*, which name has been adopted by most modern Naturalists, though those of older date confounded them with the *Sea Anemonie*, or *Actina*, which is of a much more simple organization.

The anatomy of these animals has been examined by Cuvier, and more minutely of late by Chiage, the continuator of Poli's superb work.

They live on animal substances, which they draw to their mouth by their gills. Their stomachs are filled with pieces of coral, which are, perhaps, useful in assisting digestion; although not provided with fins, they swim with great facility.

HOLOUR, Mr. Tyrwhitt says, Sax. a whore-monger. Skinner adds, *q. d. hold-whore*, one who keeps a *whore*. Junius from *hol*, a *hole* or cave, because such persons frequented such places for meeting.

And if that she be faire, though veray knave,
Thou sayst that every *holour* wol hire have.

Chaucer. *The Wif of Bathes Prologue*, v. 5836.

And if he repreve him uncharitably of sinne, as thou *holour*, thou dronkelowe harlot, and so forth.

Id. *The Persones Tale*, vol. ii. p. 337.

HOLSTEIN, the Duchy of, called *Nordalbingia*, or *Transalbingia*, when it was added to the Empire of Charlemagne in 811, consisted of four Districts, *viz.* Holstein, Stormar, Ditmarsh, and Wagria, which were all united, in 1106, under the first of these names, and raised to the rank of a County. It stretches from the neck of the Peninsula of Jutland on the North to the Elbe on the South, and from the German Ocean on the West to Sleswick and the Baltic on the East. Within these limits, however, are also enclosed some small territories belonging to Lubeck and Hamburg. The superficial extent of the Duchy is about 3500 square miles.

Surface.

Through the middle of the country stretches a barren, sandy range of hills, from North to South, comprising extensive heaths and moors. To the East of these branch numerous hills of great fertility, highly cultivated, and in some places covered with timber of great size and beauty. This district, called in the language of the Country the *Geest*, is sometimes flattered with the appellation of the Northern Switzerland, though the total absence of high mountains demonstrates the

injustice of such a comparison. Between the hills are collected numerous lakes, some of which, as the Plo-nersee, the Selentersee, and Westensee, are of considerable magnitude. These, together with the majestic growth and rich foliage of the trees, form landscapes of great beauty; for the vigorous ramification and freshness of colour which characterise the forests of the North are particularly conspicuous in Holstein. On the West of the Heaths the country is a marsh, or low land, defended from the sea by dikes as in Holland, but far surpassing in fertility the richest of the Dutch *polder*. In this level plain an isolated limestone hill, the Segeberg, attracts the notice of Geologists. The Aue and Stor, both navigable, with the Bille, Alster, Pinaue, and some other small streams, run into the Elbe. The Eider, which rises in the middle of the Duchy, and flows through some of its lakes, soon becomes navigable, and, forming part of the boundary between Sleswick and Holstein, falls into the German Ocean.

The climate of Holstein is stormy and severe; from the position of the country between two seas, violent gales and rapid changes of weather are frequent. Tender fruits are reared with difficulty, and the mortality is greater than in Sleswick.

There is no part of continental Europe in which the land is cultivated with so much skill, diligence, and success as in Holstein. Hops, flax, wheat, and other grains are produced in abundance. The fields are all divided by high green fences and hedge-row timber. The culture of garden vegetables is neglected, perhaps from the uncertainty of the climate; but that of potatoes has latterly much increased. In order to encourage the growth of timber, two nursery gardens are maintained at the Royal expense, from which young trees are given gratis to farmers who wish to plant. The cattle of Holstein constitute its chief wealth; there is no Country, except Switzerland, wherein the produce of the dairy constitutes so important an article of subsistence. Milch cows also and oxen are exported. The horses are no less valuable; they are the original stock of the large breeds met with in Hanover, Flanders, and England. The Heaths feed a few sheep, but are chiefly tenanted by immense quantities of game. The salt-pits at Oldeslohe, the only depository of this precious mineral in the Danish dominions, yield annually about 18,000 tons.

The coast of Holstein is lined by sand-banks, among which only small and flat-bottomed vessels can navigate with safety; the only harbours are at the mouths of rivers, hence the coast fishery is but little attended to. Many vessels, however, from Kiel and Altona are engaged in the herring-fishery, and 18 or 20 ships from the latter place are annually equipped for the whale-fishery in the Greenland seas.

There are no manufactures except those of yarn and linen for domestic consumption. In Altona, indeed, are numerous refineries and manufactures, such as are always to be found in a place of trade. The exports of raw produce, cattle, butter, and cheese, are very considerable, and the proximity of such towns as Hamburg and Lubeck, makes it easy to find a market. In weights and measures, as well as in the current money, Holstein is quite distinct from Denmark, and the paper money of this latter Kingdom has never found admission into it.

The population of the Duchy is about 380,000, nearly all Lutherans. The Holsteiners are the de-

scendants of the ancient Saxons, and, in their bravery, love of liberty, and manly spirit, are not unworthy of their ancestors, whose original seat they now occupy. The people of Ditmarsh, in particular, on the sea-shore, have always obstinately maintained their independence. The Counts of Stade and the Archbishops of Bremen long tried in vain to reduce them to feudal subjection. Though united to Denmark as the patrimonial dominions of the Royal house, the people of Holstein have suffered no change in their old Laws or Constitution. Previous to 1804 the peasantry were in a state of vassalage on the lands of the Nobility, but the revolutions of modern times have very much lightened the burdens of the feudal system. There are no longer any Royal domains exempted from the ordinary jurisdictions. The Nobility are numerous and wealthy. In the administration of government, Holstein is united with Sleswick, where the Governor has his residence at Gottorp. The chief Court of Justice is at Gluckstadt. The laws and constitution differ in the different districts of the Duchy, and rest entirely on ancient usage.

Holstein belongs to the German Confederation, and the King of Denmark, in right of this Duchy and of Lauenburg, has three votes in the Diet. The Representative Constitution promised to this, as well as to the other German States, in 1815, has not been yet promulged.

There are no towns in Holstein of any importance except ALTONA, which has been already noticed in its place, and Kiel, a neat little town, with 7000 inhabitants, situated near the Baltic, where the Sleswick and Holstein Canal unites that sea with the German Ocean. From the advantages of its situation Kiel is enabled to carry on a considerable trade, and is the station for the Copenhagen and Hamburg packets. Here also is an University, founded in 1605, with an Observatory, a Library of 60,000 volumes, an Anatomical Theatre, and about 30 Professors. Gluckstadt, the chief town of the Duchy, is the residence of the Provincial authorities. Its situation on the Elbe enables it to take a share in the whale-fishery, but it is not likely to become a commercial place. Population about 5000. Rendsburg, a strong fortification on an island of the Eider, is remarkable for the ancient inscription over one of its gates, *Eydora. Rom. Imp. Terminus.*

HOLSTER, Ger. *pistolenhalster*; Sw. *pistol-hoelster*. The A. S. *heolstra*, is a hiding-place; probably from *hel-an*, to cover, to hide. And *Ihre* derives the Sw. *hoelster* from *hoelja*, to cover, to hide. Applied to

A case for pistols; to cover, to protect them.

In th' holsters, at his saddle-bow,
Two aged pistols he did stow,
Among the surplus of such meat
As in his hose he could not get.

Butler. *Hudibras*, part i. can. 1. v. 391.

HOLT, Skinner says, denotes a grove, or a multitude of trees set or planted close or thick together. And Tooke asserts it to be the past participle of the A. S. verb *hel-an*, to cover. Serenius also refers to the Sw. verb *hoelja*, to cover.

"A rising ground or knoll covered with trees."
Tooke.

Whan Zephyrus eke with his sote brethe
Enspired hath in every holt and heth
The tendre croppes. Chaucer. *The Prologue*, v. 6.

And gan search, and seeke wonder sore
Among the hils, and the holts hore.

Lidgate. *Story of Thebes*, part i.

But upon a rayny day hyt befel
An huntynge wente Syr Launfal,
To chafy in holtes hore.

Ritson. *Met. Rom.* vol. i. *Launfal*, v. 171.

Yee that frequent the hilles
and highest holtes of all,
Assist mee with your skilful quilles
and listen when I call.

Turbervile. *On the Death of Elizabeth Arkundle.*

Whose holts that view the East, do wisely stand to look
Upon the winding course of Lee's delightful brook.

Drayton. *Poly-olbion*, song 16.

For first they wasted and destroyed their holts, graunges, and farme
houses, afterwards certaine wicks and villages also, robbing and
rifling as they went, to the great dishonour of the king.

Holland. *Livius*, fol. 1075.

Such noise their passions make, as when one heares
The hoarse sea waues rore, hollow rocks betwixt;
Or as the winde in hoults and shady greaues,
A murmur makes, among the boughes and leaues.

Fairfax. *Godfrey of Bulloigne*, book iii. st. 6.

The otter works upwards to the surface of the earth, and forms,
before it reaches the top, several holts, or lodges, that in case of high
floods it may have a retreat, for no animal affects lying drier.

This day I have begot whom I declare
 My onely Son, and on this *holy* hill
 Him have anointed, whom ye now behold
 At my right hand; your head I him appoint.
Milton. Paradise Lost, book v. l. 604.

On whom the angel haile
 Bestow'd, the *holy* salutation us'd
 Long after to blest Marie, second Eve.
Id. Ib. l. 386.

But if I do live *holity*, I do not think that I deserve heaven, it is
 the cross of Christ that procures me grace; it is the Spirit of Christ
 that gives me grace; it is the mercy and the free gift of Christ that
 brings me unto glory.
Taylor. Sermon 3. part iii.

Yet at length, giving place to their greedy desire to be revenged
 of their enemies, they spurned all reverence of blood, and *holiness* of
 friendship, at their feet.
Sir Thomas North. Plutarch, fol. 760. Antonius.

Be not so *holy-cruell*: loue is *holie*,
 And my integritie ne'er knew the crafts
 That you do charge men with.
Shakspeare. All's Well that End's Well, fol. 246.

Tho. It was upon a *holiday*,
 When shepheards groomes han leave to play,
 I cast to go a shooting.
Spenser. Shepherd's Calendar. March.

— Lords are lordliest in their wine;
 And the well-feasted Priest then soonest fir'd
 With zeal, if aught Religion seem concern'd:

No less the people on their *holy-days*
 Impetuous, insolent, unquenchable.
Milton. Samson Agonistes, l. 1421.

Were I in England now (as once I was) and had but this fish
 painted: not a *holiday-foole* there but would giue a peece of siluer.
Shakspeare. Tempest, fol. 9.

CEL. They are but burs, cosen, throwne vpon thee in *holiday-*
foolerie, if we walke not in the trodden paths our very petty-coates
 will catch them.
Id. As You Like It, fol. 188.

MIST. PAGE. What, haue I scap'd loue-letters in the *holly-day-time*
 of my beauty, and am I now a subject for them.
Id. Merry Wives of Windsor, fol. 43.

Then told'st her doubting how these things could be
 To her a virgin, that on her should come
 The *Holy Ghost*, and the power of the Highest
 O'er-shadow her.
Milton. Paradise Regained, book i. l. 139.

— Such delight hath God in men
 Obedient to his will, that He vouchsafes
 Among them to set up His tabernacle,
 The *Holy One* with mortal men to dwell.
Id. Paradise Lost, book xii. l. 248.

On *Holy-Roode* day, the gallant Hotspurre there,
 Young Harry Percy, and braue Arcnibald,
 That euer-vaillant and approoued Scot,
 At Holmeden met,
 Where they did spend a sad and bloody houre.
Shakspeare. Henry IV. First Part, fol. 48.

MAR. Morall? no by my troth, I haue no morall meaning, I
 meant plaine *holy-thissell*.
Id. Much Ado about Nothing, fol. 113.

For it had been an auuncient tree,
 Sacred with many a mysteree,
 And often crost with the priestes crewes,
 And often hallowed with *holy-water* dewe.
Spenser. Shepherd's Calendar. February.

— Trifles light as ayre
 Are to the iealous, confirmations strong,
 As proofes of *Holy-Writ*.
Shakspeare. Othello, fol. 325.

To this I have a short and plain answer: "let him study the *holy*
 Scripture, especially the New Testament." Therein are contained
 the words of eternal life; it hath God for its author, salvation for
 its end, and truth, without any mixture of error, for its matter.
Locke. A Letter to the Rev. Mr. Richard King.

Then shall all the powers and faculties that have been given us,
 all the favours and benefits we have enjoyed, all the means and
 opportunities that have been afforded us for the living virtuously and
holity, and thereby bringing honour and glory to our Master, be
 brought into our view, and an account be demanded of them.
Sharpe. Works, vol. vi. p. 191. Sermon 10.

Sooner than I'll from vow'd revenge desist,
 His *Holiness* shall turn a Quietist.
Garth. The Dispensary, can. 5.

There were also diuers articles contained in it, which were, touch-
 ing the king's supremacy; his power of appointing or dispensing
 with *holy-days* and feasts.
Burnet. History of the Reformation, Anno 1550.

When Christ not only triumphed over hell and the grave, but was
 exalted to the right hand of God, He then not only bestowed these
 miraculous gifts of the *Holy-Ghost* on the Apostles, but settled a
 constant order of such in the Church, who were to attend to the
 necessities of it, till there will be no further need of instruction.
Stillingfleet. Sermon 5. vol. iii.

Many of these jests about confession, praying to saints, *holy-*
water, and the other ceremonies of the church, were complained of.
Burnet. History of the Reformation, Anno 1536.

Ye distant spires, ye antique towers,
 That crown the wat'ry glade,
 Where grateful Science still adores
 Her Henry's *holy* shade.
Gray. On a distant Prospect of Eton College.

The *holy* sufferer bowing his head, and crying, It is finished, gave
 up the ghost.—To this great event was afterwards added Christ's
 glorious resurrection from the dead.
Gilpin. Sermon 21. vol. i.

HOLY.

HOLY.
—
HOLY-
HEAD.

Dr. Horne, the Bishop of Norwich, who discovered a genuine spirit of piety in his writings, and displayed the beauty of holiness in all its charms, has attacked the philosophy of Hume with the arms of ridicule. *Kncx. Winter Evenings*, even. 62.

The same bell that called the great man to his table, invited the neighbourhood all round, and proclaimed a holiday to the whole country.

Hurd. Works, vol. iii. p. 182. *The Age of Queen Elizabeth*.

But the name and nature of an *holy-war* demands a more rigorous scrutiny, nor can we hastily believe that the servants of the Prince of Peace would unsheathe his sword of destruction, unless the motive were pure, the quarrel legitimate, and the necessity inevitable. *Gibbon. Decline and Fall of the Roman Empire*, ch. lviii.

HOLY ROOD DAY is the 14th of September, the Festival of the *Exaltation of the Holy Cross*, q. v. (xx. 404.)

HOLY THISTLE is the trivial name of the *Carduus Benedictus*, the *Centaurea Benedicta* of Linnæus; and as Hero and Margaret, in the citation above from *Much Ado about Nothing*, are rallying Beatrice on her love for Benedict, the allusion is sufficiently obvious.

The use of HOLY WATER was instituted by Pope Alexander I. whose Canon, as cited by Durand, runs in the following words: *Aqua; sale aspersam populis benediximus, ut eâ cuncti aspersi sacrificentur et purificentur: quod et omnibus sacerdotibus faciendum esse mandamus; nam si cinis vitulæ aspersus populum sanctificabat atque mundabat, scilicet a venialibus, multo magis aqua sale aspersa divinisque precibus sacrata populum sacrificat atque mundat a venialibus; et si aspersa per belyscum sterilitas aquæ sanata est, quanto magis divinis precibus sacratus sal sterilitatem aufert rerum humanarum, et coinquinatos sanctificat et purgat, et cætera bona multiplicat, et insidias Diaboli avertit et a fantasmatibus versutiâ homines defendit.* (Rat. iv. 4.) Where also may be found full explanations of the mystery and the virtues of this preparation.

The vessels in which this water was to be kept fixed in Churches, were to be made either of metal or marble, and any porous substance which could suck it up was carefully to be avoided. That in which it was carried abroad was termed *Ama*, or *Amula*, *ab amolendis periculis*; (Staveley on Churches, 190.) a sense and a derivation neither of which are to be found in the pages of Du Cange. He recognises *Aspersol*, *Aspergillum*, and *Aspersorium*, as the vessels from which the Priests sprinkled the water, and *Guadalerium* as that which contained it. The first three are plainly the same as the *περιερραντήριον* of Paganism; to the Lustral Water of which Institution the modern Holy Water may be traced. Bingham (viii. 3. 7.) has pointed to a singular mistake (in the text of Sozomen, vi. 6.) in which *νόμῳ ἐκκλησιαστικῷ* has been read for *νόμῳ ἑλληνικῷ*, arising out of this coincidence.

HOLYHEAD, in Ancient British *Caer Cybi*, (the fortified place of Cybi, who flourished in the VIth century, and is called by Pennant, Corinæus, a son of Solomon Duke of Cornwall,) a Market Town, on a small Island, or rather Peninsula, *Inys Cybi*, on the North-Western extremity of Anglesey. It contains many relics either of Roman or early British workmanship. The Church-yard, on a rock close to the sea at the bottom of the harbour, is a parallelogram about 220 feet long by 130 broad. Three of its sides are protected by massive walls, 6 feet thick and 17 in height; the fourth, towards the sea, has a low parapet; at each angle is a circular tower, and in the course of the walls are two rows of circular openings, smoothly plastered,

and each 4 inches in diameter. The entrance is by a rude stone gateway. On the summit of *Pen Caer Cybi* stands a circular building 10 feet in diameter, *Caer twr*, supposed to have been a Roman Pharos. A Religious House in this place is attributed to as early a date as the close of the VIth century. A College was certainly founded here by Hwfa ap Cynddelw, Lord of Llys Llifon, before the middle of the XIIth. The revenues of it are now possessed by Jesus College, Oxford, for the maintenance of two Fellows and two Scholars. Its Church, now appropriated to Parochial service, is a handsome specimen of the style of Edward III., with a nave, aisles, and transept, and a square tower surmounted by a low spire. The chief porch and the exterior of the transept are ornamented with grotesque work. The Vicarage is in the patronage of Jesus College, Oxford. A School-house, erected in 1745, was constructed from the remains of an ancient Religious building, *Llan y Gwyddel*, the Irish Church, in which, at the shrine of Sirigi, a Hibernian Saint, miracles were long reputed to be worked. The town consists of one principal street. It is now much frequented as a Bathing-place; and, according to the Census of 1821, had a population of 4071. In the neighbourhood are several remarkable caverns. One in South Stack, a mountain overhanging the town, is commonly known as the *Parliament House*, and is accessible by boats only at half ebb-tide. The cliffs are thronged with aquatic birds, especially Puffins. The passage from Holyhead to Dublin is about twenty leagues, and is performed on an average in twelve hours. It has sometimes been run in half that time. Holyhead is distant from London 278 miles. The harbour has been materially improved by the erection of a Pier and two Light-houses, on points called the Skerries and South Stack.

HOLY ISLAND, so called from having been the Episcopal seat of the See of Durham in the early Ages of British Christianity; *Lindisfarne*, from the little river Lindis, on the opposite coast of Northumberland; *Fahreen*, a recess; and *Inis Medicante*; an Island about two miles from the coast of Northumberland, but in Civil matters included within the County of Durham. It has nowhere been more correctly described than in a few lines from the pen of a distinguished living Poet. (Marmion, ii.) Bede also writes concerning it, with great propriety, *qui locus accedente ac recedente reumate bis quotidie, instar insulæ, maris circumfluitur undis, bis renudato littore contiguus terræ redditur*; for though surrounded by the sea at high water, the ebb of the tide leaves it accessible on sands, which, however, are too dangerous to be crossed without a guide. In the quaint language of the *Legend of St. Cuthbert*, it is said to be "embraced by Neptune only at full tide, and at ebb to shake hands with the Continent." (10.) It consists of one unbroken plain, about nine miles in circumference, with a surface of rather more than 1000 acres, 500 of which are sand-banks. On the North-East extends a ridge of land about a mile in length, and in some places not more than sixty yards broad, on which the tide may be seen, at the same moment, ebbing on the East and flowing on the West. Till an enclosure in the year 1792, not more than forty acres were under tillage. The richness of the soil may be determined by the increase of rental in five years from that date: in 1792 it was £320, in 1797 £926. The town stands in the West, and bears evident marks of larger ancient extent than it at present possesses: its inhabitants

ISLAND.

HOLY
ISLAND.
HOMAGE.

now are chiefly fishermen, though of late years the Island has been frequented by bathers. Population, in 1821, 660. Between the town and the Castle is a harbour defended by a battery. The Castle is situated on the summit of a whinstone rock, about 60 feet perpendicularly high on the South-East of the Island. It is accessible only by a narrow winding path. During the Great Rebellion it was garrisoned by the Parliament as an important Northern post, and in 1715 it was romantically seized by Lancelot Errington, a partisan of the Pretender. An account of his exploit, extracted from Grose, is given in a note in Hutchinson's *Hist. of County of Durham*. (iii. 362.)

The Church was founded in the VIIth century; and though it has been deprived of the relics of St. Cuthbert, and is now in ruins, it presents ample signs of former magnificence. The Eastern wall has fallen, the others remain for the most part. The body is 138 feet in length, 36 in breadth. The architecture is principally Saxon, and the redness of the stone bears testimony to the rage of the Danes, by whom it was burned, probably more than once, in the VIIIth and IXth centuries. On the South are some fragments of a Priory. The succession of the Bishops of Lindisfarne may be found in the First Volume of Hutchinson's *Hist. of County of Durham*. The Parish Church, a large edifice of the pointed style, is to the West; and on the East is the pedestal of a Cross, St. Cuthbert's, once in high esteem for sanctity, now called the *Pelling Stone*, and still bearing a superstition attached to it. Evil attends the marriage in which the bride cannot step the length of this Cross. The Saint, however, has long deserted this monument; and though he still haunts the neighbourhood, his seat is upon a rock, where he employs another as his anvil, forging his *Beads*, as those *entrochi* are locally called which are found on the shores.

The Parish of Holy Island is likewise called *Islandshire*, and contains the Chapelries of Kyloe, Lowick, Ancooft, and Tweedmouth. The Town is distant from London 331 miles, from Belford 6.

My proud sails swelling with a prosp'rous wind,
The boist'rous seas did *homage* to mine eyes,
And much above their usual course were kind.
Drayton. The Legend of Pierce Gaveston.

All these are Spirits of air, and woods, and springs,
Thy gentle ministers, who come to pay
Thee *homage*, and acknowledge Thee their Lord:
What doubt'st thou Son of God? sit down and eat.
Milton. Paradise Regained, book ii. l. 376.

Among the rest, the Earls of Flanders and Holland were most considerable; but of them two he of Holland being *homageable* to none, and having Friesland and Zealand added, was the more potent.

Howell. Letter 15. book i. sec. 2.

This aggravates a grudge that the French king hath to the duke, for siding with the imperialists, and for things reflecting upon the dutchy of Bar; for which he is *homageable* to the crown of France, as he is to the emperor for Lorain.

Id. Letter 12. book i. sec. 6.

King John not appearing, is condemned of a traiterous outrage; for that, careless of his oath made to the French, he, though an vnkle, had murdered his elder brother's son, being an *homager* to the French, and that within the French territories.

Speed. John, Anno 1202. book ix. ch. viii. sec. 20.

For plead they will, and maintaine the cause of the cities in Greece, saying, they ought to be set free and at liberty; which being once obtained, who can make doubt, but ready they will be to withdraw from our obeisance, not only the cities which shall be freed, but also those which have been *homagers* and tributaries unto us of old time.

Holland. Livius, fol. 975.

I sought no *homage* from the race that write;
I kept, like Asian monarchs, from their sight.
Pope. Prologue to the Satires.

The vassal or tenant upon investiture did usually *homage* to his lord; openly and humbly kneeling, being ungirt, uncovered, and holding up his hands both together between those of the lord, who sate before him; and there professing, that "he did become his man, from that day forth, of life and limb and earthly honour:" and then he received a kiss from his lord. Which ceremony was denominated *homagium*, or manhood, by the feudists, from the stated form of words, *devenio vester homo*.

Blackstone. Commentaries, book ii. ch. iv.

Blackstone, in his note upon the account of HOMAGE cited above, has remarked, that in one of our boyish sports, *The King I am*, the *Basilinda* of Julius Pollux, (*Onom.* ix. 7. § 110.) the ceremonies and language of feudal Homage are preserved with great exactness. The modern childish game of *Questions and Commands*, is stated by Strutt (*Sports and Pastimes*, iv. 4. 14.) to be a modification of *Basilinda*. With the *King I Am* we are unacquainted; but in the *Questions and Commands* we do not recollect any thing connected with Homage.

The precise words of the Homage enjoined by 17 Edw. II. 2. are given as below by Rastall:—"I become your man from this day forth, for life, for member, and for worldly honour, and shall owe you my faith for the landes that I holde of you; saving the faith that I owe unto our Sovereigne Lorde the King and to mine other Lords." Sir Edward Coke explains the particulars of the ceremonial as follows: the tenant must be ungirt, "for that he must never be armed against or opposite to his Lord . . . the holding up of the tenant's hands betokeneth reverence and subjection, and the Lord's enclosing of the tenant's hands between his own betokeneth protection and defence." (§ 85.)

This promise was exacted in the feudal system from all tenants in fee. Married women performed it by their husbands, or jointly with them, because it especially related to services in war. A single woman paid Fealty, not Homage; (see a note on *Glanville* by Beames, 217.) and Littleton gives the reason for this difference of tenure somewhat quaintly: "Also if a woman sole shall doe Homage, (for so he calls it,) she shal not say,

HOMAGE.

HOMAGE. I become your woman, for it is not fitting that a woman should say that she will become a woman to any man but to her husband when she is married, but she shall say, I do to you Homage," &c. (§ 87.) Corporations did not perform it, because it was personal, and they only can appear by their attorneys. In *liege Homage*, which included Fealty, the tenant swore to bear faith to his Sovereign Lord without any exception of others; in *simple Homage* he only made the acknowledgment of tenure. Hence, when a Sovereign Prince did Homage to another for lands held under his authority, great care was taken to distinguish the species of Homage performed. When Edward III., in 1329, did Homage for his Ducal dominions to Philip VI. of France, the question of simple or liege Homage was warmly disputed. It was at last adjusted by the performance of Homage in general terms, and time was given to Edward to examine his own archives, in order to determine which was due. (*Modern Univ. Hist.* xxiii. 420.; where the authorities cited are Walter Hemingford and Polydore Vergil.) *Auncestral Homage* was, when a man and his ancestors had immemorially held land of another and his ancestors by the service of Homage. This bound the Lord to warranty, the Homage being an evidence of a feudal grant; (*Blackstone*, ii. 20.) or, as Sir Edward Coke has very beautifully expressed himself, Homage Auncestrall belongs to "ancient families enjoying with their blood the ancient inheritance of their forefathers, as a great blessing of the Almighty." (§ 85.)

The Statute 12 Ch. II. 24. discharges all tenures from the incident of Homage, so that the Laws relating to it are now obsolete. Till the 25th Henry VIII. 20. a Bishop was only held to perform Fealty for his Barony. Now, however, as soon as he is consecrated and confirmed, he receives restitution of his temporalities from the King, to whom the custody of the lay revenues, lands, tenements, and Barony reverted on the vacancy of the See, and for those the new Bishop does Homage to his Sovereign; and then, and not sooner, he has a fee simple in his Bishopric, and may maintain an action for the profits. (*Blackstone*, i. 8.)

It is somewhat remarkable that in this Statute, (25 Henry VIII. 20.) upon which the forms at present used in proceeding to a Bishopric are founded, the word Homage does not once occur. After election the Bishop is to make "such othe and feautie onli to the Kinges Majestie, his heyres and successours, as shall be appoynted for the same." So also an Archbishop shall make "such othe and feautie onely to the Kinges Majestie, his heires and successours, as shall be limitted for the same." And yet more particular is the omission of the word in the following recapitulatory clause: "And be it farther enacted by auctoritie aforeseide, that every person and persons beyng hereafter chosen, elected, nominate, presented, invested, and consecrated to the dignitie or office of any Archbyshop or Bishop within this realme, or within any other the Kinges dominions, accordynge to the fourme, tenure, and effects of the presente acte, and suyng their temporalities out of the Kynges hands, his heires or successours, as hath been accustomed, and makynge a corporalle othe to the Kynges Highness, and to none other, in fourme as is afore rehersed, shall and may from henceforthe be trononised or installed as the case shall require; and shall have and take then only restitution out of the Kynges hands, of all the possessions and profites, spiritual and

temporal, belonging to the said Archbishoprick or Bishoprick wherunto they shall be elected or presented." &c. HOMAGE
HOME.

Spelman (*Reliq.* 34.) considers Homage as unknown to the Anglo-Saxons. Nevertheless, it was exacted from their Nobles by the Conqueror immediately after his coronation, *deinde homagiis a magnatibus cum fidelitatis juramento, obsidibusque acceptis, in regno confirmatus, omnibus qui ad regnum adspiraverant factus est terrori.*—*Matt. Paris, sub ann. 1067.*

HOMALIUM, in *Botany*, a genus of the class *Polyandria*, order *Trigynia*, natural order *Rosaceæ*. Generic character: calyx six or seven parted; corolla, petals six or seven; stamens twenty-one, aggregated in parcels of three; capsule one-celled, many-seeded.

Three species, natives of the West Indies and South America.

His daughter 'tis, who holds this *homeless-driuen*
Still mourning with her.

Chapman. *Homer. Odyssey*, book i. fol. 3.

Vnder these lyeth a little strond or shore, the *homeling* inhabitants
call it Achileos-dromon, a place memorable in times past for the ex-
ercise ther of that Thessalian commaunder.

Holland. *Ammianus*, fol. 200. *Julianus*.

The lawes of Mulmutius indured in execution among the Britons,
so long as our *homelings* had the dominion of this ile.

Holinshed. *Description of England*, ch. ix.

You not consider sir,
The great disparitie is in their bloods,
Estates, and fortunes: there's the rich beauty
Which this poor *homeliness* is not endowed with;
There's difference enough.

Beaumont and Fletcher. *The Maid in the Mill*, act ii.

Each little village yields his short and *homely* fare.

Drayton. *Poly-olbion*, song 13.

It is for *homely* features to keep *home*.
They had their name thence.

Milton. *Comus*, l. 748.

There he was welcom'd of that honest syre,
And of his aged beldame *homely* well:
Who him besought himselfe to disattyre,
And rest himselfe, till supper time befell.

Spenser. *Faerie Queene*, book vi. can. 9.

Which seene, the pensive boy, halfe in despyght,
Arose and *homeward* drove his sunny sheepe,
Whose hanging heades did seem his carefull case to weepe.

Id. *Shepherd's Calendar. January*.

Mislike, and ciuill quarrels, when
The Grecians *homewards* drewe,
Did well neere waste the remnant kings
That Phrigia did subdewe.

Warner. *Albion's England*, book iii. ch. xiii.

It [this last storm] wrought more powerfully, and frighted them
from their design of cruising before Manila, fearing another storm
there. Now every man wisht himself at *home*, as they had done an
hundred times before.

Dampier. *Voyages*, Anno 1687.

I tell this passage freely, as I do all the rest; as the only thing I
could imagine the king could ever take ill of me; and yet I know
not how it could be a fault, more than in a point of manners neither,
or the *homeliness* of expression.

Sir William Temple. *Works*, vol. ii. p. 554. *Memoirs from the
Peace in 1679*.

Blush as thou may'st, my little book, with shame,
Nor hope with *homely* verse to purchase fame;
For such thy maker chose; and so design'd
Thy simple style to suit thy lowly kind.

Dryden. *The Flower and the Leaf*.

We parted thus; I *homeward* sped my way
Bewilder'd in the wood till dawn of day:
And met the merry crew who danc'd about the May.

Id. *Ib.*

The Scottish lords had sent to confer with them (Sir Marmaduke
Langdale and Sir Philip Musgrave) as they passed through the northern
parts *homewards*, and had then conferred with them.

Clarendon. *History of Rebellion*, book xi.

Mr. Webber was pitched upon, and engaged to embark with me,
for the express purpose of supplying the unavoidable imperfections of
written accounts, by enabling us to preserve, and to bring *home*, such
drawings of the most memorable scenes of our transactions, as could
only be executed by a personal and skilful artist.

Cook. *Voyages*, vol. v. book i. ch. i.

But, in many cases, more direct and *home* remonstrances to the
faulty are necessary; which, therefore, such, as with propriety can,
are bound to make.

Secker. *Sermon 28.* vol. i.

Thou wast born the child of misery, the outcast of society; friend-
less, *homeless*, unbeloved, unregarded, unknown, and unknowing of
the means and motives of an honest industry.

Knox. *Essays*, No. 145.

Henry the Fourth wished that he might live to see a fowl in the
pot of every peasant in his kingdom. That sentiment of *homely* be-
nevolence was worth all the splendid sayings that are recorded of
kings.

Burke. *On Mr. Fox's East India Bill*.

Liberty has charms enough to attach the mind, wherever the
place of her abode be; and I have never heard that the loveliness of
her form is impaired, or even disgraced, by the *homeliness* of her habi-
tation.

Hurd. *Of the Uses of Foreign Travel. Dialogue 8*.

But the scene is changed as you come *homeward*, and atheism or
treason may be the names given in Britain, to what would be reason
and truth if asserted of China.

Burke. *A Vindication of Natural Society*.

Put the case, that a man was so framed by nature as to hold out a
thousand years in his native air, and to be hourly in danger of
death in foreign parts, and at best able to hold out but sixty or eighty
years at most; how eagerly would such a man press *homewards*, if
ever he found himself in another country.

Sherlock. *Discourse 23.* vol. i.

HOME.

HOME, in Composition.

No marchants, neither *homeborne*, nor strangers, may in any wise transgresse the tenour of the foresaide charter.

Hakluyt. Voyages, &c. vol. i. fol. 143. The Staple. Ed. 2.

Hauing sped thus fortunately abroad in three severall wars, the *senatours* and commons were not carelesse of *home-affaires*, what would be the issue thereof.

Holland. Livius, fol. 64.

Lorde Marshall, command our officers at armes,
Be readie to direct these *home alarmes*.

Shakspeare. Richard II. fol. 24.

As for government ecclesiasticall and ciuill, which is the very soule of a kingdome, I need to say nothing, when as I write to *home-borne*, and not to strangers.

Camden. Remaines, p. 2. Britaine.

And as the sailers sing,
Loaden with wealth on wanton seas, so we
Shall make our *home-bound* voyage cheerefully.

F. Beaumont. The Mad Lover. Prologue.

But if of daunger, which hereby doth dwell,
And *homebread* evil ye desire to heare;
Of a straunge man I can you tidings tell,
That wasteth all this countrie farre and neare.

Spenser. Faerie Queene, book i. can. 1.

For she had oft been present, though vnseene,
Among the shepherds' daughters on the greene,
Where eu'ry *homebred* swaine desires to proue
His oaten pipe and flet before his loue.

Beaumont. The Shepherdesse.

Here now were Pride, Oppression, Usury,
(The canker-eating mischiefs of the State)
Call'd forth to prey upon the enemy;
Whilst the *home-burthen'd* better lighten'd sat.

Daniel. History of Civil Wars, book v.

They in pleasing slumber lull'd the sense,
And in sweet madness robb'd it of itself;
But such a sacred and *home-felt* delight,
Such sober certainty of waking bliss
I never heard till now.

Milton. Comus, l. 262.

Epaminondas sitting at a feast with his companions and colleagues in government, dranke wine as sharpe as vinegar, and when they asked him why he did so, and whether it made for his health? I know not that, (quoth he,) but well I wot this, that good it is to put me in mind of my *home diet*.

Holland. Plutarch, fol. 547.

Which since not ours begot, but an invasive war,
Amongst our *home-fought* fields, hath no description here.

Drayton. Poly-olbion, song 22.

Home-keeping youth, haue ever *homely* wits.

Shakspeare. Two Gentlemen of Verona, fol. 20.

I will not aske, nor doe I care
What beautie, wealth, or wit,
Your here-found mistres hath, why you
Should *home-left* love forget.

Warner. Albion's England, book xii. ch. lxxvi.

Tho, having fed his fill, he there besyde
Saw a faire damzell, which did weare a crowne
Of sundry flowres with silken ribbands tyde,
Yclad in *home-made* greene that her owne hands had dyde.

Spenser. Faerie Queene, book vi. can. 9.

They stoop lower yet, and vent our wares,
Home-manufactures to thicke popular fairs.

Donne. On Mr. T. Coryat's Crudities.

And they
(To spur heroick spirits on to vertue)
Enacted that what man so ere he were,
Did noblest in the field aginst his enemy,
So by the general voice approu'd, and known,
Mighte at his *home-returne*, make his demand
For satisfaction and reward.

Beaumont and Fletcher. The Laws of Candy, act v.

Two sutes he hath, the one of blew,
The other *home-spun* gray:
And yet he meanes to make a new
Against next reuell day.

Browne. The Shepheard's Pipe, ecl. 2.

Rob. What hempen *home-spuns* haue we swaggering here,
So neere the cradle of the faerie queene?

Shakspeare. Midsummer Night's Dream, fol. 152.

For come I am to recover those lands of ours which they occupied, and not to seize upon their *home-stalles*.

Holland. Plutarch, fol. 386.

Then the *home-tarriers* and house-doves that kept Rome still, began to repent them that it was not their hap to go with him.

Sir Thomas North. Plutarch, fol. 190. Coriolanus.

For if the rule of all men's workes be will,
And his will, his way goes: mine stands inclin'd
T'attend the *home-turne* of my neerer kind.

Chapman. Homer. Odyssey, book xvi. fol. 247.

And priests, and party zealots, numerous bands
With *home-born* lies, or tales from foreign lands,
Each talk'd aloud, or in some secret place,
And wild impatience star'd in every face.

Pope. The Temple of Fame.

Whom, when their *homebred* honesty is lost,
We disemogue on some far Indian coast:
Thieves, panders, paillards, sins of every sort;
Those are the manufactures we export.

Dryden. The Hind and the Panther.

No sooner she th' advantage found,
But in she flew; and seconding,
With *home-made* thrust, the heavy swing,
She laid him flat upon his side.

Butler. Hudibras, part i. can. 3.

With curious eye, O traveller survey
This statue's form, and *home-returning* say,
"At Teos late with infinite regard,
I saw the image of the sweetest bard,
Anacreon."

Fawkes. Epigrams of Theocritus. xvi.

He may look back to the speeches of our ancestors in parliament. He will find 'em, generally speaking, to have been very short and plain, but coarse, and what we properly call *home-spun*.

Shaftesbury. Miscellaneous Reflections, misc. 3. ch. i.

Both house and *home-stead* into seas are borne,
And rocks are from their old foundations torn.

Dryden. Horace. Ode 29. book iii.

It is a genuine produce of the ancient, rustic, manly, *home-bred* sense of this country.

Burke. On Conciliation with America.

And cheerfull, without sin, regale
With good *home-brew'd*, and nappy ale.

Lloyd. The Cobbler of Tessionington's Letter.

If he carried them to public warehouse, no duty (was) to be paid till they are taken out for *home-consumption*.

Smith. Wealth of Nations, book v. ch. ii.

Unmindful of his tender wife,
And ev'ry *homefelt* bliss of life,
The huntsman, in th' unshelter'd plains,
Heav'n's whole inclemency sustains.

Blacklock. Horace. Ode 1.

Not sumptuously adorn'd, not needing aid,
Like *homely-featur'd* night, of clust'ring gems.

Cowper. The Task, book iv.

Almost the whole expense of the farmer, and the far greater part even of that of the landlord, is in *home-made* commodities.

Smith. Wealth of Nations, book iv. ch. v.

Their monopoly secures them against all competitors in the *home-market*, and they have the same chance for foreign markets with the traders of other nations.

Id. Ib. book iv. ch. vii.

Perhaps a hint from you may induce our vicar to suit his doctrines and his language to the understandings of his *homespun* hearers.

Knox. Winter Evenings, even. 48.

And thou hast found again
Thy cocoas and bananas, palms and yams,
And *homestall* thatch'd with leaves.

Cowper. The Task, book i.

Yet your mild *homesteads*, ever blooming, smile
Among embracing woods.

Dyer. The Fleece, book i.

To prevent their *homeward-bound* ships from falling in with these smugglers, and to put a stop to this illicit trade, the Dutton was ordered to steer the course above mentioned.

Cook. Voyages, vol. iv. book iv. ch. x.

HOME.

HOMI-
CIDE.

HO'MICIDE, } Fr. *homicide*, It. *homicida*; Sp.
Ho'MICIDAL. } *homecida*; Lat. *homicida*, *homici-*
dium, a manslayer, manslaying; for the English noun
is applied to the agent and the act; from *homo*, a man,
and *cædere*, to kill or slay.

See the Quotation from Blackstone.

This every lewed vicar and parson
Can say, how ire engendreth *homicide*;
Ire is in soth executour of pride.

Chaucer. *The Sompnoures Tale*, v. 305.

He that hateth his brother, is an *homicide*.

Id. *The Persones Tale*, vol. ii. p. 330.

Another *homicide* is don for necessitee, as whan a man sleeth an-
other in his defence, and that he ne may non otherwise escapen fro
his owen deth: but certain, as he may escape withouten slaughter of
his adversarie, he doth sinne, and he shal bere penance as for dedly
sinne.

Id. *Ib.*

So sit it wel to taken hede,
And for to loke on euery side
Er that thou falle in *homicide*:
Whiche sinne is now so generall,
That it wel nie stant ouerall
In holy church.

Gower. *Conf. Am.* book iii. fol. 61.

Wherefore procuring all the world's despite,
A tyrant loath'd, a *homicide* convented,
Poison'd he [John] dies, disgrac'd, and unlamented.

Daniel. *History of Civil Wars*, book i.

Yet thence his lustful orgies he enlarg'd,
Even to that hill of scandal, by the grove
Of Moloch *homicide*, Lu't hard by Hate;
Till good Josiah drove them thence to hell.

Milton. *Paradise Lost*, book i. l. 417

Next with libations meet and prayer she ply'd
Jove, who acquits the suppliant *homicide*.

Fawkes. *Argonauticks of Apollonius Rhodius*, book iv.

— The royal guest,
Thoughtless of ill, accepts the fraudulent feast:
The troop, forth issuing from the dark recess,
With *homicidal* rage the king oppress.

Pope. *Homer. Odyssey*, book iv. l. 718.

The subject, therefore, of the present chapter will be the offence of
homicide, or *destroying the life of man*, in its several stages of guilt,
arising from the particular circumstances of mitigation or aggravation
which attend it.

Blackstone. *Commentaries*, book iv. ch. xiv.

HOMICIDE, in *Law*, is divided into, 1. *Justifiable*. 2. *Excusable*. 3. *Felonious*. I. *Justifiable Homicide* is
committed, 1. by unavoidable necessity, without any
will, intention, or desire, and without any inadvertence
or negligence; such is the *legal* performance of his
office by the *authorized* public executioner. 2. For the
advancement of public justice, as when an officer or any
private person kills one charged with felony, (though
he be innocent,) or one to be arrested or who has been
arrested in a civil action, and has afterwards escaped,
who resists the capture; or, in like manner, when
officers are endeavouring to disperse a riotous assembly,
or to prevent the escape of prisoners in gaol or on the
way to gaol, who assault their keeper; or to secure
trespassers in forests, parks, chaces, or warrens, who
refuse to surrender; by the Statute 21 Edward I. 1. and
3 and 4 William and Mary, 10.; which last, however,
was repealed by 16 George III. 30. In these cases,
absolute necessity must be proven. 3. Before the abo-
lition of Wager by Battle, the death of one of the
Champions by the hands of the other, was Justifiable
Homicide. 4. Such as is committed for the prevention
of forcible and atrocious crimes, as in defence of a

man's person against a murderer, or of his house and
property against a burglar, or an incendiary in the
night-time, or against one who breaks open his house
in the day with an attempt at robbery; or in defence of
personal chastity, or that of a wife or daughter if forcibly
attempted. In all these cases the act of slaying is
rather commendable than to be blamed. This, however,
is not so in, II. *Excusable Homicide*, in which the Law
imputes an error deserving a certain degree of punish-
ment. This offence is distinguished into two kinds;
1. *per infortunium*, by *misadventure*, as the accidental
slaying of another by a man in the performance of a
lawful act; and this extends to such cases as the fol-
lowing: if death ensues when a parent is *moderately*
correcting his child, a master his apprentice or scholar,
or an officer a criminal. Of old, also, the Law consid-
ered it only a misadventure if a Knight killed his
antagonist in a tournament *commanded by the King*.
2. *Se defendendo*, in *self-defence*, not as in the cases of
Justifiable Homicide, to prevent the perpetration of
crime, but in a sudden affray, which the Law terms
Chance-medley, (a *casual* broil,) or *Chaud-medley*, (a
broil in *heat* of passion.) In order to render this ex-
cusable, the slayer must prove that he has retreated as
far as he possibly could with safety and convenience
before he turned upon the assailant. But this must be
done, *bonâ fide*, in a sudden quarrel, not under any de-
liberate agreement to fight. In each of these above-
named cases, the Law presumes either some want of
sufficient caution, or a *necessitas culpabilis*; and, there-
fore, does not consider the slayer to be absolutely free
from guilt. He must be put upon his trial, and if not
acquitted, (which he generally is by the direction of the
Judge,) he shall have his pardon, and be freed from
forfeiture of goods (awarded by the old law) as a matter
of course and right, by paying for and suing out a writ
of restitution. III. *Felonious Homicide* is the slaying
of a human creature without justification or excuse.
This includes, 1. *Self-murder*, which we have already
considered under FELONY; 2. *Manslaughter*, the unlawful
or rather felonious killing of another without malice
express or implied; and this is either, 1. voluntarily upon
a sudden heat, as when two persons suddenly quarrel
and fight and one kills the other; nor is it more if they
go out and fight in a field, if it can be shown that it is
one continued act of passion; or when a man, suddenly
provoked by great indignity or wrong, immediately kills
the aggressor, provided that in all such cases it can be
manifestly proved that sufficient time for the regulation
and subsidence of passion did not elapse; as if a man
takes another in the act of adultery with his wife and
kills him on the spot, it is Manslaughter; if he kills him
at a subsequent time, it is Murder. 2. Involuntarily,
when in the commission of an unlawful act, as in prize
fighting or in the perpetration of any Civil trespass.
In both these species the Homicide amounts to Felony,
which, by the old Law, was within Benefit of Clergy,
and subjected the offender to burning in the hand, for-
feiture of all goods and chattels, and imprisonment for
a term not exceeding 12 months. By 3 George IV. 38.
this punishment is changed to transportation for life or
a term, imprisonment with or without hard labour for
any term not exceeding three years, or a fine at the dis-
cretion of the Court. 3. *Murder*, thus defined by Sir
Edward Coke, "When a man of sound memory, and of
the age of discretion, unlawfully killeth, within any
County of the Realm, any reasonable creature, *in rerum*

HOMI-
CIDE.

HOMI-
CIDE.

naturâ, under the King's peace with malice forethought, either expressed by the party or implied by the Law, so as the party wounded or hurt, &c. dies of the wound or hurt, &c. within a year and a day after the same." Lunatics, therefore, and Infants, of an age too tender to be conscious of wrong, cannot commit Murder. The mode of unlawfully killing must be correctly stated, so far as the species of death is concerned, and the party killed must die within a year and a day of the imputed cause, the whole day in which the alleged act was committed being reckoned first in that computation. Even if the wound inflicted be not mortal, but the wounded party from neglect or want of help dies within the above-named time, it is Murder; so, also, even if he had a mortal disease upon him, if it be proved that his end was hastened; not so if he dies in consequence of the want of skill of his medical attendants. All persons present, aiding or assisting, when Murder is committed, are considered as much principals as the one who gives the fatal stroke. A child in the womb was formerly not supposed to be included within the definition of reasonable creatures; therefore the killing of such was considered only as a great misprision. Special provisions have since rendered it Murder; and any one who advises a woman to kill her child after it be born, is deemed an accessory to Murder if she should kill it whenever it is born. But the malice aforethought is the grand criterion of Murder. This includes deliberate duelling, wherever it may be presumed that sufficient time has elapsed from the quarrel to permit the blood to cool; and the seconds of the slayer, if death ensues, are held equally guilty with the slayer himself. Again, the killing a man by a party in the commission of a felony, is Murder; as in shooting at a tame fowl with intent to steal it; for the act is *malum in se*; if it were but *malum prohibitum*, as shooting at wild fowl by an unqualified person, it would not amount to Murder. Even when death is not intended, if death ensues, and evil design be proved, the crime is Murder; as in cruel infliction of immoderate correction, or even when the unlawful act was not directed against the suffering individual, as in wantonly discharging fire-arms into a crowd, for here the slayer is considered a general enemy. The slayer of an officer of justice in the execution either of a criminal or Civil duty, is a Murderer. So, too, he who intending to kill one person, by mistake kills another against whom he did not entertain malice. The punishment annexed to Murder by the English Law, (25 George II. 37.) is death on the next day but one (provided it be not Sunday) after sentence, which is to be immediately pronounced, and anatomization of the body, which may afterwards be hung in chains, but in nowise be buried without dissection. Between conviction and execution, the condemned is to be fed on bread and water only. The Judge, upon good and sufficient cause, has power to respite the execution, and relax the restraint of this Statute. This Statute extends, in all particulars, to Peers.

The Statute 25 Edward III. 2. recognises a yet higher degree of Murder, *Petit Treason*, which may happen in three ways: 1. by a servant killing his master, his master's wife, or his mistress; 2. by a wife killing her husband; 3. by an ecclesiastical person, secular or regular, killing his superior, to whom he owes faith and obedience. The punishment for this crime, in a man, is to be drawn to the place of execution and hanged; and so it is, now, also for a woman by 30

George III. 48. Before that Statute was passed, women were drawn and burned. Sir M. Foster's *Reports*. To the late Editions are added, *Discourses upon a few branches of the Crown Law, viz. High Treason, Homicide, &c.* Beville, *Treatise on the Law of Homicide*, 1799.

HOMILY, } Fr. *homilie*; It. and Sp. *homilia*;
HOMILIST, } Lat. *homilia*; Gr. *ὁμιλία*, *concio*,
HOMILETICAL. } *sermo*; *sermo* (sc.) *ad populum*;
sermo (sc.) *de sacris*.

A discourse or sermon to the people, upon sacred subjects.

Homiletical, in the citation from Atterbury below, is used strictly in its Greek sense; social.

The Queene's most excellent Majesty hath, by the advice of her most honourable counsellours, for her discharge in this behalfe, caused a booke of *homilies*, which heretofore was set forth by her loving brother, a prince of most worthy memory, Edward the Sixth, to be printed a new. *Homilies. The Preface.*

All his care was, his service well to saine,
And to read *homilies* upon holidayes.

Spenser. Mother Hubbard's Tale.

To this good *homelist* I have been ever stubborn, which God forgive me for and mend my manners.

Beaumont and Fletcher. The Scornful Lady, act iv.

Where, through poverty, or any other impediment, ministers are incapable of discharging this duty as they ought, he directed them to use the *homilies* of the church, and sometimes to read a chapter to the people out of that excellent book, called *The Whole Duty of Man*.

Nelson. Life of Dr. George Bull, sec. 73.

His life was holy, and when he had leisure for retirement, severe: his virtues active chiefly and *homiletical*: not those lazy sullen ones of the cloister.

Atterbury. Character of Luther.

One of the chief objections urged by Gardiner against the new *homilies*, was, that they defined, with the most metaphysical precision, the doctrines of grace, and of justification by faith; points, he thought, which it was superfluous for any man to know exactly, and which certainly much exceeded the comprehension of the vulgar.

Hume. Edward VI. Anno 1547, ch. xxxiv.

In modern acceptation, HOMILY is, for the most part, restrained to a Discourse read out of a Book, but not composed by the reader. But in the earlier days of the Church, Sermon and Homily appear to have been used indifferently for any discourse of instruction addressed to the people. This was delivered by the Bishop, or some one whom he appointed, immediately after the reading of the Psalms and Lessons, before the Catechumens withdrew. (Bingham, *Antiq.* xiv. 4. 1.) St. Augustin plainly uses the word Homily as synonymous with Sermon in the following passage, *Sermones qui proferuntur in populum quos Græci ὁμιλίας vocant.* (in *Ps.* 118. *Pref.*) But Photius distinguishes the two, making the Homily a familiar conversation, in which the Bishop (who alone was allowed to preach before the Vth century) interrogated the people and received their answers. He is remarking upon three volumes of *Homilies on Genesis* by St. Chrysostom: *ἐνεστι δὲ συνιδεῖν ὡς εἰ καὶ ΛΟΓΟΙ ἔχει τὴν ἐπιγραφὴν τὸ βιβλίον· ἔτι γὰρ εὖρον ἐν οἷς ἀνέγνω· ἀλλὰ μᾶλλον εὐόκασιν ὈΜΙΛΙΑΙΣ, τὰ τε ἄλλα, καὶ ὅτι ἐν πολλοῖς πολλάκις ὡς παρόντας ὁρῶν τοὺς ἀκροατὰς, οὕτω πρὸς αὐτὰς ἀποτείνεται, καὶ ἐρωτᾷ καὶ ἀποκρίνεται καὶ ὑπισχνεῖται.* (172.)

A very celebrated collection of Homilies (*Homiliarium*) from the writings of the early Christians, was compiled by Paulus Diaconus and Alcuin in the VIIIth century, at the command of Charlemagne. A particular account of this precious volume may be found in Seelen's *Selecta Litteraria*, (252.) and a brief notice of many others of a similar nature by which it was followed is given by Mosheim. (*Cent.* viii. part ii. iii. 6.)

The Homilies authorized by the Church of England

HOMI-
CIDE

HOMILY.

HOMILY. consist of two Books; the first published in 1547, containing twelve Discourses, supposed for the most part to be written by Archbishop Cranmer; the second in 1562, and attributed to Bishop Jewell. Their object is sufficiently explained in the Preface to the second Book, "to supply the defects of some," namely, such of the Clergy as were notoriously illiterate, "and to oblige the rest to preach according to the form of sound doctrine," or, in other words, to correct the tendency towards Popery which naturally biassed many during the infancy of the Reformation, "two Books of Homilies were prepared; the first was published in King Edward VIth's time; the second was not finished till about the time of his death; so it was not published before Queen Elizabeth's time." The XXXVth Article of Religion avouches, that both these Books "contain a godly and wholesome doctrine and necessary for these times . . . and, therefore, we judge them to be read in Churches by the Ministers, diligently and distinctly, that they may be understood of the People." Their necessity for the times in which they were written cannot be doubted, nor is it to be denied that their doctrine, for the most part, is godly and wholesome; nevertheless, from their antiquated style, from the change of circumstances in the Church, and from the possibility of misinterpretation, to which in some instances they are exposed, it can scarcely be regretted that their public reading, as now unaccompanied with the benefit it once produced, has fallen into desuetude. It is remarkable that the titles of the Homilies, as set forth by the XXXVth Article, are not precisely the same as those contained in the Collection itself. A curious Letter from Bishop Gardiner to the Duke of Somerset objecting to the promulgation of the Book of Homilies, which, he contends, "teacheth the clene contrary to the doctrine established by the Act of Parliament," is printed by Strype, *Memorials of Cranmer*, (ii. 786.) from the Cottonian Collection. (*Vesp. D.* 18. fol. 139.)

HOMOGE'NE, } Fr. *homogene*; It. and Sp. *homogeneo*; Gr. *ὁμογενής*, *ejusdem generis*, of the same kind or sort, from *ὁμός*, the same, and *γεν-έσθαι*, to be or become, to be born.

Being of the same kind or sort; having the same nature.

Know you the sapor pontick? sapor styptick?
Or, what is *homogene*, or *heterogene*?

Ben Jonson. *The Alchemist*, act ii. sc. 5.

Let us then confidently conclude, that all generation is made of a fitting, but remote, *homogenial* compounded substance.

Digby. *Of Bodies*, ch. xxiv.

I say, That it cannot but be a very strong presumption, that Nature intends an utter *homogeneity* of matter before she fall upon her work of efformation; shes constantly bringing it to as perfect *homogeneity* as we can possibly discern with our senses.

More. *Antidote against Atheism*, Appendix, ch. xi. sec. 8.

He [Lord Strafford] did conceive that it was against the first principles of Nature, and false, that a heap or accumulation should be, and not be of *homogeneous* things, and therefore that which in its first being is not treasonable, can never confer to make up an accumulative treason.

State Trials. 16 Charles I. Anno 1640.

The reason is, that the distill'd water, which seems to be an *homogeneous* body, is composed of small bodies of discrepant figures.

Digby. *Of the Powder of Sympathy*.

The fifth [means to induce and accelerate putrefaction] is, either by the exhaling, or by the driving back of the principall spirits, which preserve the consistence of the body; so that when their government is dissolved, every part returneth to his nature, or *homogeny*.

Bacon. *Natural History*, Cent. 4. sec. 333.

Therefore the poets have reduced all to one single action under one and the same design, and in a body whose members and parts should be *homogeneous*. Pope. *View of the Iliad and Odyssey*, sec. 1.

Gold, though confessedly the most *homogeneous*, and the least mutable of metals, may be in a very short time (perhaps not amounting to many minutes) exceedingly changed, both as to malleableness, colour, *homogeneity*, and which is more, specific gravity.

Boyle. *Works*, vol. iv. p. 378. *Historical Account of a Degradation of Gold*.

Of all *homogeneous* truths, at least of all truths respecting the same general end, in whatever series they may be produced, a concatenation by intermediate ideas may be formed, such as, when it is once shown, shall appear natural. Johnson. *The Life of Pope*.

HOMOLOGOUS, Fr. *homologue*; Gr. *ὁμολόγος*, from *ὁμός*, alike, the same, and *λόγος*, having the same opinion, agreeing, consenting.

The measures of the altar were 3 cubits in height, 5 in length, and 5 in breadth; and therefore in *homologous* proportion one to another.

Grew. *Cosmo Sacra*, book iv. ch. viii. sec. 74.

The arithmetical proportion, which belonged to the table and candlestick, being less perfect than the *homologous*. Id. *Ib*.

And comparing the *homologous* or correspondent members on both sides, we find that as the first member of the expression, &c.

Bishop Berkley. *Analyst*, sec. 29.

HOMONOIA, in *Botany*, a genus of the class *Dioecia*, order *Polyadelphia*. Generic character: male flower, a three-scaled catkin; perianth three-leaved; corolla none; stamens two hundred, divided into twenty parals: female flower, scales of the catkin many-cleft; no perianth or corolla; stigmas three, capsule three-celled, one-seeded.

One species, *H. riparia*, a small tree, native of the banks of rivers in Cochin China. Loureiro.

HOMO'NYMY, } Fr. *homonymie*; Gr. *ὁμώνυμος*, } having the same name; from *ὁμός*, alike, the same, and *ὄνομα*, a name. Applied to things

Having a similar or the same name, and, thus, consequentially, equivocal, ambiguous.

It is a rule in art, that words which are *homonymous*, of various and ambiguous significations, ought ever in the first place to be distinguished.

Bishop Bramhall against Hobbes, p. 19.

[John Smith] became fellow and proctor of the University [of Cambridge] when past sixty years of age; when the prevaricators gave him this *homonymous* salute, "Ave, Pater."

Fuller. *Worthies*. Lancashire.

As for that in the book of *Psalms*, *Vir justus ut phoenix florebit*, as Epiphanius and Tertullian render it, it was onely a mistake upon the *homonymy* of the Greek word *phoenix*, which signifies a palm-tree. Sir Thomas Brown. *Vulgar Errours*, book iii. ch. xii.

To begin therefore with them let us advertize and teach young men, that poets in using the names of Gods, sometimes meane thereby their very nature and essence: otherwhiles they attribute the *homonymy* of the same names to the powers and vertues which the Gods do give, and whereof they be the authors.

Holland. *Plutarch*, fol. 24.

HONCKENYA, in *Botany*, a genus of the class *Octandria*, order *Monogynia*, natural order *Tiliaceæ*. Generic character: calyx five-leaved, coriaceous, the exterior hirsute, interior coloured; corolla, petals five, oblong; anthers oblong; stigma six-toothed; capsule spiny, five-celled, five-valved; seeds arillate.

One species, *H. ficifolia*, native of Guinea. Decandolle.

HONDURAS, or **COMAYAGUA**, a Province of the Kingdom of Guatemala, situated to the North and West of Nicaragua, extending from East to West 350 miles in length, and 150 miles in its greatest breadth. On the North it is washed in its whole extent by the Caribbean Sea, to which flow innumerable small streams through low and marshy lands, thus communicating a moisture to the atmosphere in the highest

**HOMO-
GENE.**

**HONDU-
RAS.**

HONDURAS.

degree noxious. The great depth (*hondura*) of the sea off the coasts of this Province, which was discovered by Columbus in 1502, procured for the vast Bay between the Peninsula of Yucatan and this Province the name which it at present bears. The Spaniards also called this shore *Hibueras*, or *Calabazes*, from the great number of pumpkins they found growing on it. The land in general is uneven, but fertile in the extreme, producing maize, cocoa, sugar, cotton, &c. Three crops of maize are frequently raised in the same year, and the vines bear twice within the same period. The rivers are very numerous. On the Western limits of the Province the Camalecon, descending from the district of St. Pedro Sula, is navigable for piraguas, or large canoes, for more than 50 leagues; the next in order are the Uluá and Leon, or Leones, each navigable about 30 leagues; the Aguan, still further to the Eastward, is much more considerable; to these succeed the Limones, the Tinto, and the Platanos, all of which might be made subservient to a brisk internal commerce. On the coast are six harbours, at Omoa, Puerto Caballos, Puerto de Sal, Triunfo de la Cruz, Truxillo, and Cartago. The whole of this coast was conquered by Christoval de Olid, acting under a commission from Cortes, in 1523, but the interior was subdued by Pedro de Alvarado in 1530 and following years. The Province is governed by an Intendant, resident at Valladolid, and is divided into two districts, Comayagua, comprehending the Western, and Tegucigalpa, extending over the Eastern part. The population may be estimated at 130,000.

The valley of Olancho is memorable for the immense riches that have been collected from the river Guayape, which flows through it, and even at present the purest gold collected in the whole Kingdom is found in its sands.

The valley of Copan is as remarkable now for its excellent tobacco as it was formerly for an opulent city, the Court of the Cazique Copan Calel, the conquest of which cost Hernando de Chaves much time and trouble. Francisco de Fuentes, who wrote the Chronicles of this Kingdom, assures us, that in his time, 1700, the great Circus of Copan still remained entire: this was a circular space, surrounded by stone pyramids, six yards high, adorned with figures, both male and female, of excellent sculpture, and which then retained the colours they had been enamelled with. Not far from the Circus is the Cave of Tibulca, a Temple of great size, hollowed out of the side of a hill, and adorned with columns, having bases, pedestals, capitals, and crowns, all accurately adjusted to symmetrical proportions.

New Valladolid, or *Comayagua*, the Capital of the Province, is situated in a beautiful plain, through which winds a large river, affording an abundant supply of excellent fish. It was founded, in 1540, by Alonzo de Caceres, and obtained, in 1557, the title and honour of a city. It is at present the seat of the Provincial authorities. There are three Convents here, and a handsome Cathedral Church; but a decreasing population languishes for want of industry. *Truxillo*, formerly the Capital of the Province, is now reduced to a miserable village, inhabited by 80 or 100 Spaniards, and about 300 Negroes. The harbour was fortified in 1789, and is now protected by three forts, in a good state of defence. In April, 1797, two English ships of war and a brig attacked the place, but were repulsed. (See GUATEMALA.)

The English possessions in the Bay of Honduras are

all in the Peninsula of YUCATAN, and will be described under that head. In the vagueness of ordinary discourse, the name of Honduras is not confined to the Spanish Province, properly so called, but is used to comprehend all the Countries bordering on the great bay. See the *Statistical Description of Guatemala* by Domingo Juarros, 1823.

HONE, Skinner has no doubt that *hæn*, a stone, as well as *hænan*, *lapidare*, was formerly in use; and Tooke, that *hone* (petrified wood) is the past participle of *hæn-an*, *lapidescere*, to become stone.

Then some their whittles rubbed
On whetstone, and on *hone*:
Some threw them under the table,
And swore that they had none.

The Boy and the Mantle, l. 150. in *Percy*, vol. iii. fol. 346

A *hone* and a parer, like sole of a boot,
To pare away grass, and to raise up the root.

Tusser. March's Husbandry, st. 9.

HONE, *v.* to *hone* after a thing, to seek any thing anxiously. A word, Junius adds, familiar in Devonshire; from the A. S. *hongian*, *hogian*, to be anxious, to sigh or groan after.

He desires to confer with some of her acquaintance, for his heart is still with her, to talke of her, admiring and commending her, lamenting, *honing*, [in some ed. *moaning*,] wishing himselfe any thing for her sake, to have opportunity to see her, O that he might but enjoy her presence.

Burton. Anatomy of Melancholy, fol. 525.

HO'NEST, *v.*

HO'NEST, *adj.*

HONESTA'TION,

HO'NESTLY,

HO'NESTY,

HO'NEST-HEARTED,

HO'NEST-MINDED,

HO'NEST-NATURE.

Fr. *honeste*; It. and Sp. *honesto*, from the Lat. *honestus*, which Vossius thinks may be from the Gr. *ὄνειαυ*, *ὄνειαυ*, *juvo*, *prosum*, or by the change of a long vowel into a short, from *ὄνιος*, *merx*, *pretium*; *qui in honore est, is in pretio esse*

dicitur; Scheidius considers *ὄνειαυ* to have meant, primitively, *tollo*; and, thus, *honos*, *vel honor*, *dicitur id quod tollit ex humili loco in altum, extollitque homines*; that which raises from a low to a high station; and exalts or elevates mankind.

To *honest* (in Ben Jonson) is to honour, to confer honour or dignity; and the noun *honesty* is in old writers used as equivalent to

Honour, credit, reputation. As in Chaucer, decency, good manners. And *honest*, to honourable, creditable, reputable. More usually,

Acting according or agreeably to promise or engagement or obligation, expressed or implied; faithful, trusty or trustworthy, upright, virtuous; fair and open in dealings; open, frank.

On the usage in English, varying from the Latin and French, see the Quotation from Temple.

He sent his sister Jone with mykelle *honeste*.

R. Brunne, p. 151.

Therefore britheren, loue ghe to profecie, and uyle ghe forbode to speke in tungis. but be alle thingis doon *honestly* and bi due ordre in ghous.

Wiclif. 1 Corinthians, ch. xiv

Wherefore brethren couet to prophecy, & forbid not to speake with tongues. And let all thynges be done *honestlye* and in order.

Bible, Anno 1551.

And thilke that we gessen to be the unworthiere membris of the bodi we ghyuen more *honour* to hem. and tho membris that ben *unhonest* han more *honestee*. of oure *honeste* membris han nede of noon.

Wiclif. 1 Corinthians, ch. xii.

And vpon those membres of the body which we thynke lest *honest*, put we moste *honestie* on. And oure vngodlye partyes haue most beautye on. For our *honeste* membres nede it not.

Bible, Anno 1551.

HONE.

HONEST

HONEST.

And for he saw that under low degree
Was *honest* vertue hid, the peple him held
A prudent man, and that is seen ful seld.
Chaucer. The Clerkes Tale, v. 8302.

Our firste fo, the serpent Sathanas,
That hath in Jewes herte his waspes nest,
Up swale, and saide, O Ebraike peple, alas!
Is this to you a thing that is *honest*.
Id. The Prioresses Tale, v. 13491.

For which, my dere wife, I thee beseke
As be to every wight buxom and meke,
And for to kepe our good be curious,
And *honestly* governe wel our hous.
Id. The Shipmannes Tale, v. 13174.

This worthy limitour, this noble frere,
He made alway a maner louring chere
Upon the sompnour, but for *honestee*
No vilains word as yet to him spake he.
Id. The Freres Prologue, v. 6849.

Thus Walter lowly, nay but really,
Wedded with fortunat *honestetee*,
In Goddes pees liveth ful esily
At home, and grace ynough outward had he.
Id. The Clerkes Tale, v. 8298.

So manly was this Julius of herte,
And so well loved estatly *honestee*,
That though his dedly woundes sore smerte,
His mantel over his hippes caste hee.
Id. The Monkes Tale, v. 14630.

For there no stormy weder falleth,
Whiche might greue man or best:
And eke the londe is so *honest*,
That it is plentuous and plaine,
There is no idell ground in vaine.
Gower. Conf. Am. book vii. fol. 146.

For he bath first his loue founded
Honestly as for to wedde,
Honestly his loue he spedde,
And had chyldren with his wife,
And as him liste he led his life.
Id. Ib. book viii. fol. 183.

It [economike] techeth thilke *honestee*,
Through whiche a kynge in his degree
His wife and childe shall reule and gie,
So forth with all the companie.
Id. Ib. book vii. fol. 150.

And than it shall accorde with this sayinge of Aristotle, a valyant
man susteineth, and dothe that, whiche belongeth to fortitude, for
cause of *honestie*.

Sir Thomas Elyot. The Governour, book iii. ch. ix.

And now for the better contentation and 'satisfaction of such wor-
shipful, *honest-minded*, and well disposed merchants, as haue a desire
to the furtherance of euery good and coramendable action, I will first
say vnto them.

Hakluyt. Voyages, &c. vol. iii. fol. 174. Westerne Planting.

CLE. Sir Amorous! you have *honested* my lodging with your
presence.
Ben Jonson. The Silent Woman, act i. sc. 4.

One to his Country constantly that stood
As time should say, "I forth a man will bring,
So plain and *honest*, as on him I'll rest
The age he liv'd in, as the only best."
Drayton. The Miseries of Queen Margaret.

Therefore, whosoever maketh any promise, binding himself there-
unto by an oath: let him foresee that the thing which he promiseth,
be good, and *honest*, and not against the commandement of God, and
that it be in his owne power to performe it iustly.

Homilies. Sermon of Swearing, part ii.

By which virtuous qualities and *honestations* [humane prudence
and sagacity] they have been more happy then others in their appli-
cations to move the mindes of men.

Montague. Devoute Essays, Treat. 10. sec. 6.

Lady, mistake me not—never did I
Make war with women, nor us'd woman's war,
Revenge; but prosecuted *honestly*
My right, not men.
Daniel. History of Civil Wars, book viii.

Let not a desperate action more engage you,
Than safety should: and wicked friendship force
What *honesty* and vertue cannot work.

Ben Jonson. Catiline, act iii.

LEAR. What art thou?

KENT. A very *honest-hearted* fellow, and as poore as the king.
Shakspeare. Lear, fol. 287.

God and St. Dennis
Keep *honest-minded* young men batchelors.
Beaumont and Fletcher. The Noble Gentleman, act i.

But for all this (my *honest-natur'd* friends)
I must needs say you haue a little fault,
Marry 'tis not monstrous in you, neither wish I
You take much paines to mend.
Shakspeare. Timon of Athens, fol. 96.

Others thought kings an useless heavy load,
Who cost too much, and did too little good.
These were for laying *honest* David by,
On principles of pure good husbandry.
Dryden. Absalom and Achitophel.

But what is it to live *honestly*? Why, every body knows the
meaning of that phrase: it is to frame our lives according to the laws
of virtue and religion; it is to deny ungodliness and worldly lusts,
and to live righteously, soberly, and godlily in this present world.
Sharpe. Works, vol. iii. Sermon 16.

Goodness is that which makes men prefer their duty and their
promise, before their passions or their interest; and is properly the
object of trust: in our language, it goes rather by the name of
honesty; though what we call an *honest* man, the Romans called a
good man: and *honesty* in their language, as well as in French, rather
signifies a composition of those qualities which generally acquire
honour and esteem to those who possess them.
*Sir Wm. Temple. Essay upon the Original and Nature of Govern-
ment.*

The sincere and *honest-hearted* Jews would have surrendered to
such an evidence, as they did afterwards to that which was given by
the Apostles; but the malicious and obstinate would have found out
colours and excuses, to evade the force of it.

Atterbury. Sermon 7. vol. iii.

The Christian is assured, that in all his conflicts with his spiritual
enemies, if he exert, with *honest* sincerity, the powers of nature, he
shall be further aided by those of grace.

Gilpin. Hints for Sermons, vol. i. p. 346.

The stripling is often sent from the place of superficial education
to the banks of the Ganges, there to heap up enormous riches, *honestly*
if he can; but at all events to fulfil the ultimate end of his mission.

Knox. Winter Evenings, even. 76.

HO'NEY, v. } A. S. *hunigh*; D. *honig*; Ger. *ho-*
HO'NEY, n. } *nig*; Sw. *honung*. In Mark, ch. i.
HO'NEYLES } v. 6. the Gothic version reads *milith*;
HO'NIED. } Lat. *mel*; Gr. *μέλι*. Junius derives
ab hymello, Wachter *ab oivoχοείν*, *vinum fundere*, to
pour forth wine. Ihre asserts, that it is wholly uncer-
tain whence we have the word. Skinner believes it to
have the same origin as *hive*, q. v. A. S. *hiwe*, *familia*,
q. d. *hiwnig*, that is, *victus familiaris seu domesticus*;
because stored for the food of families, or hives of bees.

Honey (the produce of the bee) is used as a general
term (lit. and met.) for

Sweetness. Also, as a term of fondness or affection.

Honey-suckle, in BOTANY, the trivial name of the
Lonicera caprifolium of Linnæus.

Hony and mylk per ys muche. mony folk & bolde.

R. Gloucester, p. 43.

The man þat muce *honeje* eet, is mawe hit engleymeth.

Piers Ploughman. Vision, p. 275.

And this Jon hadde clothing of camel's heris and a girdle of skyn
aboute his leendis and his mete was *hony-soukis* and *hony* of the wode.
Wiclif. Matthew, ch. iii.

Thys John had hys garmet of camel's heere, and a gyrdle of a
skinne aboute his loynes. His meate was locustes and wyld *hony*.
Bible, Anno 1551.

HONEST.

HONEY.

HONEY.

The jangling bird that singeth on the hye braches that is to saine, in the wood, and after is enclosed in a strait cage, although the plying besinesse of men yeue hem *honed* drinkes and large meates with swete study: yet natheles if thilke birde &c. she twireth desiring the wood, &c.

Chaucer. *The thirde Booke of Boecius*, fol. 222.

But the bees finiding the litle babe [Hiero] withoute healpe of man, wroughte their combes aboute him, and nourished him with *hony* many dayes together.

Arthur Goldyng. *Justine*, book xxiii. fol. 105.

HAM. Nay, but to liue
In the ranke sweat of an enseamed bed
Stew'd in corruption; *honying* and making loue
Ouer the nasty sty.

Shakspeare. *Hamlet*, fol. 271.

And, when she spake,
Sweete wordes, like dropping *hony*, she did shed;
And 'twixt the perles and rubies softly brake
A silversound, that heavenly musicke seem'd to make.

Spenser. *Faerie Queene*, book ii. can. 3.

And in no respect differ they from those, who thinke the sailes, cables, cordage, and anchor are the pilot; or that the thread and yarn, the warp and woof, be the weaver; or that the goblet and potion cup, the ptisane or the mede and *honed* water is the physician.

Holland. *Plutarch*, fol. 1068.

When he speakes,
The ayre, a charter'd libertine, is still,
And the mute wonder lurketh in men's eares,
To steale his sweet and *honeyed* sentences.

Shakspeare. *Henry V.* fol. 70.

But for your words, they rob the Hibla bees,
And leaue them *hony-lesse*.

Id. *Julius Cæsar*, fol. 127.

Venus, fast as Vulcan wrought,
Ting'd them in a *honey'd* draught:
But her son in bitter gall
Ting'd them, doubly-ting'd them all.

Fawkes. *Ode 45. Cupid's Darts*.

For know when Hermes infant Bacchus bore,
Snatch'd from the flames, to fair Eubœa's shore;
Macris embrac'd him with a mother's love,
And there, awhile, she nurs'd the seed of Jove,
And there with *honey* fed.

Id. *Argonautics of Apollonius Rhodius*, book iv.

Where'er he [man] turns, enjoyment and delight,
Or present, or in prospect, meet his sight;
Those open on the spot their *honey'd* store,
These call him loudly to pursuit of more.

Cowper. *The Progress of Errour*. Horace. *Ode 2*, book iv.

HONEY, in Composition.

And thei profriden to him a part of a fisch roostyd, and an *hony-comb*.

Wiclif. *Luke*, ch. xxiv.

And they gaue hym a pece of a broyled fyshe, and of an *hony-combe*.

Bible, Anno 1551.

What do ye *honycombe*, swete Alisoun?

Chaucer. *The Miller's Tale*, v. 3698.

For which this January, of whom I told,
Considered bath within his dayes old
The lusty lif, the vertuous quite,
That is in mariage *hony-swete*.

Id. *The Marchantes Tale*, v. 9270.

The apparell of the & their horses was blacke veluet, couered all ouer with brauches of *hony-suckels*.

Hall. *Henry VIII. The eighth Yere*.

Good monsieur haue a care the *hony-bag* breake not, I would be loth to haue you ouer-flowne with a *honey-bag*.

Shakspeare. *Midsummer Night's Dream*, fol. 157.

For so worke the *honey-bees*,
Creatures that by a rule in Nature teach
The art of order to a peopled kingdome.

Id. *Henry V.* fol. 71.

And as for the term Melichriis, that is *hony-coloured*, it is alwayes (verily) a flattering word, devised by a louer, to mitigate and diminish the odiousnesse of a pale hue, which he seemeth by that sweet name not to mislike, but to take in the best part.

Holland. *Plutarch*, fol. 77.

HONEY.

Thou shalt be pinch'd
As thicke as *hony-combe*, each pinch more stinging
Then bees that made 'em.

Shakspeare. *Tempest*, fol. 4.

Therefore the vulgar did about him flocke,
And cluster thicke unto his leasings vaine;
Like foolish flies about an *hony-crooke*.

Spenser. *Faerie Queene*, book v. can. 2.

And there are *honey-dews*, many times, found upon the leaves of some trees.

Grew. *Cosmo Sacra*, book iv. ch. v. sec. 27.

Touching the grass, the *honey-dropping* dew,
Which falls in tears before my limber shoe,
Upon my feet consumes in weeping still,
As it would say, "why went'st thou to this ill?"

Drayton. *England's Heroical Epistles. Rosamond to King Henry*.

Looketh one pale and yellow,—then to cover, and mollifie in some sort that ill colour, he useth to call him *honey-face*.

Holland. *Plutarch*, fol. 49.

Boy; Lucius: fast asleepe? It is no matter,
Enioy the *hony-heavy* dew of slumber.

Shakspeare. *Julius Cæsar*, fol. 115.

Thou fool! if madness be so rife,
That, spite of wit, thou'lt have a wife,
I'll tell thee what thou must expect,
After the *honey-moon* neglect,
All the sad days of thy whole life.

Cotton. *Rondeau*.

Ile take't vpon me—
If I proue *hony-mouth'd*, let my tongue blister.

Shakspeare. *Winter's Tale*, fol. 283.

I will enchant the old Andronicus,
With words more sweet, and yet more dangerous
Then baits to fish, or *hony-stalkes* to sheepe.

Id. *Titus Andronicus*, fol. 47.

Then with these marygolds I'll make
My garland somewhat swelling,
These *honey-suckles* then I'll take,
Whose sweets shall help their smelling.

Drayton. *The Muses' Elysium. Nymphal 6*.

Vp to both sweet-spoken Nestor stood,
The cunning Pylian orator; whose tongue pour'd forth a flood
Of more than *hony-sweet* discourse.

Chapman. *Homer. Iliad*, book i. fol. 6.

He saw a vernal smile, sweetly disfigure
Winter's sad face, and, through the flow'ry lands
Of fair Engaddi, *honey-sweating* fountains
With manna, milk, and balm, new broach the mountains.

Crashaw. *Steps to the Temple. Sospetto D'Herode*.

And consciences that will not die in debt,
Pay him the dutie of *hony-tongued* Boyet.

Shakspeare. *Love's Labour Lost*, fol. 139.

Let those that were wont, though not so often, in a stated course, to hear him in this place, with all other his more occasional hearers, mourn, that they are to hear no more his weighty sentences, his sweet *honey-dropping* words.

Howe. *A Funeral Sermon on the Death of Dr. W. Bates*.

While Nature's seen in all her forms to shine,
And mix with beauties drawn from truth divine;
Sweet beauties (sweet affection's endless rill)
That in the soul like *honey-drops* distil.

Parnell. *The Gift of Poetry*.

Two *honey-harvests* fall in every year,
First, when the pleasing Pleiades appear,
And, springing upward spurn the briny seas,
Again, when their affrighted quire surveys
The wat'ry Scorpion mend his pace behind.

Dryden. *Georgics*, book iv.

Sometimes the parties fly asunder, even in the midst of courtship, and sometimes grow cool in the very *honey-moon*.

Tatler, No. 192.

But Cleora was in the flower of her age, and it was yet but *honey-moon* with Cleomenes.

Dryden. *Preface to Cleomenes*.

Then milfoil beat, and *honey-suckles* pound,
With these alluring savours strew the ground
And mix with tinkling brass the cymbal's droning sound.

Id. *Georgics*, book iv.

HONEY. At the top of the germ sits a nectary, composed of five shaggy bodies, arched like horse-shoes, with external honey-bearing cavities.
 HONOUR. Sir William Jones. *Works*, vol. v. p. 107. *Botanical Observations on Indian Plants*.

The honey-bee kiss'd you, you cannot disown.
 Cunningham. *The Rose and Butterfly*.

The rock, that forms the sides of the valley, and which seems to be the same with that seen by us at different parts of the coast, is a greyish black, ponderous stone; but honey-combed, with some very minute shining particles and some spots of a rusty colour interspersed.
 Cook. *Voyages*, vol. vi. book iii. ch. xii.

Observe the honey-loaded bee,
 The beech embower'd cottage see,
 Beside yon sloping hill.
 Dr. Warton. *To a Lady who hates the Country*.

And you, who late the public taste have hit,
 And still enjoy the honey-moon of wit,
 Attentive hear me.

Whitehead. *A Charge to the Poets*.

Others with Bela's grains were heap'd,
 And mild papayas, honey-steep'd. Jones. *Tales*.

The next morning the sun arose with peculiar warmth for the season; so that we agreed to breakfast together on the honey-suckle bank: where, while we sate, my youngest daughter, at my request, joined her voice to the concert of the trees about us.

Goldsmith. *The Vicar of Wakefield*, ch. xxiv.

Where pleasure rolls her honey-trickling streams,
 Of blooming health and laughter-dimpled joy.
 Thompson. *Sickness*, book i.

HONITON, a Borough and Market Town in Devonshire, stands in a beautiful valley on the banks of the Otter. It is mentioned in *Domesday Book* as the property of Robert Earl of Mortaigne. The market dates from the reign of John; and the Borough first returned two Members to Parliament in the 28th Edward I. This privilege, however, was exercised only on one other occasion before the time of Charles I. The town has twice been nearly destroyed by fire, in 1747, and again in 1765: and it suffered from a like catastrophe both in 1790 and 1797. It now consists of one broad, handsome street, intersected by a small stream, running East and West, and a second which crosses it at right angles. The Church stands on rising ground, about half a mile from the town. It was originally a Chapel for Mendicant Friars, and of that building the present chancel presents a specimen; but, towards the close of the XVth century, it was enlarged by Bishop Courtenay, and ornamented with a tower, and a very curious skreen separating the chancel from the nave. An ancient Parochial Church is supposed to have stood on a spot which is now the site of a modern Chapel. The first Devonshire manufactory of serge is believed to have been established in this town; at present the poorer classes are chiefly engaged in working broad lace and edgings. Honiton also supplies large quantities of butter to the London market. A hill at the entrance of the town is remarkable for the magnificence of its prospect. Population, in 1821, 3296. Distant from London 148 miles, from Axminster 9½ East.

HONOUR, v.	} Fr. <i>honneur</i> ; It. <i>honore</i> ; Sp. <i>honor</i> ; Lat. <i>honor</i> . See HONEST, ante. To honour, To confer or bestow fame, credit, reputation; to raise, to elevate to rank or dignity; to dignify; to hold in reverence or veneration; to revere or venerate. Honour, the noun, is used as equivalent to
HO'NOUR, n.	
HO'NOURABLE,	
HO'NOURABLY,	
HO'NOURABLENESS,	
HO'NOURANCE,	
HO'NOURARY,	
HO'NOURER,	
HO'NOURING,	
HO'NOURLESS.	

VOL. XXIII.

Fame, reputation, glory: rank or dignity; nobleness; HONOUR. Reverence or veneration. And see the Quotations from Raleigh and Paley.

þe quene & eke þe býssop, þe wule hii alýue were,
 Muche honoured Seýn Swythyn fram zere to zere.
 R. Gloucester, p. 341.

"Knýztes," he seýde, "wat wolle ze þencheþ chese?
 Ne see ze, þat her hors beþ suýftore þan zoure be?
 þat ze beþ dede anon, zýf ze wolleþ fle?
 Deýe we raþer wyþ honour, & syweþ me in þýs place."
 Id. p. 397.

At þat ilk stoure was slaýn on our side
 God men of honour, þat wald to þe bataile bide.
 R. Brunne, p. 297.

Thei biseke Edward
 þat he mot him zelde tille him in a forward
 þat were honorable to kepe wod or beste.
 Id. p. 324.

And on God þat al bý gan. whith goode herte þei honoureþ.
 Piers Plouhman. *Vision*, p. 292.

Clerkes knewen the comete. and comen with here p̄sentes
 And dude here homage honorably. to hým þat was al myghtý.
 Id. *Ib.* p. 234.

Ypocritis, Ysaie the prophet profeciede wel of you and seide, This peple honourith me with lipps: but her herte is fer fro me.
 Wiclif. *Matthew*, ch. xv.

Ypocrites, well prophesied of you Esayas saying: This people draweth nye vnto me with their mouthes; & honoureth me wyth their lyppes, how be it their heartes are farre from me.
 Bible, Anno 1551.

And Jhesus seide to hem that a prophete is not withoute honour but in his owne cuntrey and among his kyn and in hise hous.
 Wiclif. *Mark*, ch. vi.

He festeth hem, and doth so gret labour
 To esen hem, and don hem all honour,
 That yet men wenen that no mannes wit
 Of non estat ne coud amenden it.
 Chaucer. *The Knightes Tale*, v. 2196.

And many other folke haue boughte, honorable renoume of this worlde, by the price of glorious death.
 Id. *Boecius*, book iv. fol. 235.

And in this wise thou shalt seie,
 That he do thilke astate aweie
 Of pope, of whiche he stant honoured.
 Gower. *Conf. Am.* book ii. fol. 42.

For if a kynge his tresour lasseth
 With out honour, and thankelesse passeth,
 Whan he himself will so begile,
 I not who shall compleine his while,
 Ne who by right him shall releve.
 Id. *Ib.* book vii. fol. 153.

My sonne it is well reasonable
 In place, whiche is honorable,
 If that a man his herte sette,
 That than he for no slouth lette
 To do what longeth to manhede.
 Id. *Ib.* book vii. fol. 74.

Three thinges made Pallas honorable; virginitie, strength, and wisdom.
 Vives. *The Instruction of a Christian Woman*, book i. ch. vi.

Honorableness is a noble ordering of weightie matters, with a lustie heart, and a liberall vsing of his wealth, to encrease of honour.
 Wilson. *The Arte of Rhetorique*, fol. 35.

And so they went from thence religiously to Rome on pilgrimage with great deuotion ii. and ii. together and were honourably receiued ther of the pope and his cleargy.
 Bale. *English Votaries*, part i. p. 25.

With his death fyrste pacifying God's wrath, and then with his doctrine alluryng alle the worlde, to the trewe honouryng of God.
 Udall. *Galathians*, ch. iii.

HONOUR. Nat withstandynge, in the *honouryng* of those goddes, suche as they were, they supposed always to be the chiefe parte of iustice.
Sir Thomas Elyot. The Governour, book iii. ch. ii.

The resdue, and the hugie heape of such as there lay slayne,
 Both numbrelesse, and *honourlesse* they burne, the fields full wyde
 With plenty flaminge fiers, bright shiuinge shew on euery syde.
Phaer. Virgil. Æneidos, book ii.

Then would I sing of thine immortal praise
 And heavenly hymne, such as the angels sing;
 And thy triumphant name then would I raise
 'Bove all the gods, thee only *honoring*.
Spenser. Hymne in Honour of Love.

Nor thou, magnan'mous Leigh, must not be left
 In darkness, for thy rare fidelity;
 To save thy faith, content to lose thy head;
 That rev'rent head, of good men *honoured*.
Daniel. History of Civil Wars, book ii.

But what is this *honour*, I mean *honour* indeed, and that which ought to be so dear unto us, other than a kind of history, or fame following actions of virtue, actions accompanied with difficulty or danger, and undertaken for the publick good.

Ralegh. History of the World, book v. ch. iii. sec. 2.

Full many countreyes they did overranne,
 From the uprising to the setting sunne,
 And many hard adventures did atchieve;
 Of all the which they *honour* ever wonne,
 Seeking the weake oppressed to relieve,
 And to recover right for such as wrong did grieve.
Spenser. Faerie Queene, book iii. can. 1.

Nought is more *honourable* to a knight,
 Ne better doth beseeme brave chevalry,
 Then to defend the feeble in their right,
 And wrong redresse in such as wend awry.
Id. Ib. book v. can. 2.

A gallant Hebrew (in the height of life)
 Amram, a Levite *honourably* bred,
 Of the same offspring won a beauteous wife
 And no less virtuous, goodly Jacobed.
Drayton. Moses his Birth and Miracles, book i.

Let us study dayly and diligently, to shew our selues to be the true *honourers* and lovers of God.

Homilies. Sermon against the Feare of Death, part iii.

A Tyrian colony; from Tiber far;
 Rich, rough, and brave, and exercis'd in war.
 Which Juno far above all realms, above
 Her own dear Samos, *honoured* with her love.
Pitt. Virgil. Æneid, book i.

Honour's a sacred tie, the law of kings,
 The noble mind's distinguishing perfection,
 That aids and strengthens Virtue where it meets her,
 And imitates her actions, where she is not:
 It ought not to be sported with.
Addison. Cato, act ii. sc. 1.

And he who master of the field is found,
 Returns with *honorary* garlands crown'd.
Faukes. Idylliums of Theocritus, id. xiv.

As *honour* is in *honourance*, in him that *honours* rather than him that is *honoured*, so disgrace is in him that casts it, not in him that endures it.
South. Sermons, vol. viii. p. 244.

Of action eager, and intent on thought,
 The chiefs their *honourable* danger sought.
Dryden. Ovid. Metamorphoses, book viii.

What is that refined sense of the word, wherein he allows the angels to be worshipped? He partly tells us afterward, in the same book, in the place already cited, viz. as the word may signify *εὐφραίνω* και *μακαρίζω*, to think and speak *honourably* of them, and to proclaim them blessed.

Bull. Works, vol. i. p. 291. The Existence of Angels and their Nature.

When they carefully do such things, then do they indeed approve themselves worthy *honourers* of their high master and heavenly king.
Barrow. Sermon 4. vol. i.

During the early reign of Solomon, and while he conducted him-

self in a manner correspondent with the superior wisdom with which he was endowed, he was *honoured* with evidences of the divine favour.

Cogan. Works, vol. iv. p. 291. On the Jewish Dispensation.

The law of *honour* is a system of rules constructed by people of fashion and calculated to facilitate their intercourse with one another, and for no other purpose.

Paley. Moral Philosophy, ch. ii.

In some universities, the salary makes but a part, and frequently but a small part, of the emoluments of the teacher, of which the greater part arises from *honoraries* or fees of his pupils.

Smith. Wealth of Nations, book v. ch. i.

Honour makes a great part of the reward of all *honourable* professions.
Id. Ib. book i. ch. x.

First, the wages of labour vary with the ease or hardship, the cleanliness or dirtiness, the *honourableness* or dishonourableness, of the employment.
Id. Ib.

I had served the city of Bristol *honourably*; and the city of Bristol had no reason to think that the means of *honourable* service to the publick were become indifferent to me.

Burke. Speech at Bristol, previous to the Election.

That religion, which renders void the first precept in my text, by taking away the fear of God, will always be for introducing a form of government which renders void the second by taking away the *honour* from the king. And so, reciprocally, will an *honourless* king promote the worship of a fearless God.

Warburton. Sermon 14. vol. ix.

An **HONOUR**, in *Law*, is a more especially noble Seignory, a superior manor upon which other manors or lordships depend, and which, in strict propriety of speech, ought sometime to have belonged to an ancient feudal Baron, or to the Crown. The mode of creating an Honour may be gathered from 31 Henry VIII. c. 5. by which Hampton Court is so created, or from 33d of the same King, c. 37, 38, in like manner respectively addressed to Amptill and Grafton. Of these Statutes Spelman (*Gloss. ad v.*) has spoken in a manner very characteristic of the Prince by whom they were enacted. *Cum Rex Henricus VIII. in locis quibusdam fastui Regio haud satis paribus ædes augustissimas condidisset, et non solum eximia latifundia potioresque delitias, sed et nobilia multa maneria auctoritate Parliamenti eisdem annexiss. t, ne vulgari deinceps laborarent nomine, Honores decrevit appellanda.*

As the preambles of the first two of these Acts are redolent of the spirit of the times in which they were promulgated, we may be allowed to transcribe them below. "Forasmuch as it hath plesed the Kyng our most excellent and most drad soverayne Lorde, of late to erecte, build and make a goodly, sumptuous, beautiful, and princely manour, decent and cōvenient for a King, and the same hath ornated with parkes, gardens, orchardes and other thinges of gret cōmodite and plesure therunto adjoyning, mete and partinent to his Royal Majestie, most requisite for the prosperous continuance of his most Royall person, whiche the subjectes of this his Realme most entierly above all wordly thinges chiefly desyre of Almightye God: his Grace isuyng the advancement and amplification of his resonable and princely cōmodities, to be nie unto his said manour, heretofore of late hath assigned and limitted a certeyne terrytory or grounde for a Chace thereof to be made for nourishyng, generacion and feedyng of beastes of venery and of foules of warden," &c. And again of Amptill: "Consideryng that the Kynges most excellent Majestie myndeth and intendeth by the Grace of God to erect, build and edifie upon his Grace's Manour of Amptyll in the County of Bedf. sumptuose, stately,

HONOUR. beautyfull and princely buyldynges, structures and edifices, and the same as his Hyghness hath alreedy with goodly and parkely parkes, so hereafter with dyvers and sundry other like thynges of plesure, delite and commoditee, to beautifie, adorne and decorate, mete, apte and convenient for the long conservation of the Kynges most Royall person, at suche tyme and tymes as his Majesty shall have accesse to the same: It seemeth therefore very behovefull, expedient and requisite that not alonely to such a palace Royall, manours, possessions and other hereditaments shoulde be knitte, united and annexed, correspondent and agreable to the worthines and dignity therof, but also ought of al conveniency in reason to be ornated and set forth with the name and title of and (an) Honour, thereby insinuating and declaryng that the thing shall be no less honorable and princely in riche and fayre possessions, than stately and commodiouse, as well in thinges of plesure as in sumptuose and costly buildynges, wherefore be it enacted," &c.

An Honour ought to consist of lands, liberties, and franchises; a forest may be appended to it. It must be created by the King, and it must be holden of the King, but the King cannot make an Honour by Grant without an Act of Parliament. *Honour Courts* are Courts held within Honours.

The following places within the realm are reckoned Honours:

Amptill, Aquila, (formerly Pevensey,) Arundel, Abergavenny.

Boloine, Berkhamstead, Beaulieu, Barnard's Castle, Bullingbroke, Barnstaple, Bononia, Brecknock, Brember, Bedford.

Clare, Crevecure, Clun, Christchurch, Cockermouth, Cormayle, Candicut, Carisbrook, Clifford Castle, Chester, Caermarthen, Cardigan.

Donny Castle, Dudley, Dover Castle.

Eye, Egremond.

Folkingham.

Greenwich East and West, Glamorgan, Gloucester, Grentmesnil, Gower, Grafton.

Haganet, Hampton Court, Huntindon, (in Herefordshire,) Heveningham, Hawarden Castle, Hertford, Halton, Hinckley.

Lancaster, Leicester, Lincoln, Lovelot.

Kingston upon Hull, Kington.

Maidstone, Middleham, Montgomery, Mowbray.

Nottingham, Newelm.

Oakhampton, St. Osith, Oxford.

Plimpton, Peverel, Pickering.

Raleigh, Richard's Castle.

Skipton, Stafford, Strigul.

Tickhil, Tremanton, Totness, Theony, Tamworth, Tutbury.

Wigmore, Willingford, Westminster, Windsor, Wormgay, Whirwelton, (in Yorkshire,) Werk, Whitchurch, Warwick, Webley.

HOOD, v.

HOOD, n.

HO'ODLESS,

HO'ODWINK,

HO'ODMANBLIND.

A. S. *hod*; D. *hoed*; Ger. *hut*; which Skinner derives from the D. *hueden*; Ger. *hueten*, *tegere*, *protegere*, to cover, to protect.

See **HAT**. Tooke observes, that from the regular past tense of the verb to *heave*, by the change of the characteristic, *hove*, and by adding *ed*, was formed the participle *hoved*; and that this participle *hoved* or *hov'd* has left behind it in modern language the supposed substantive, but really unsuspected parti-

ciples *howve*, or *hood*, *hat* or *hut*. *Diversions of Purley*, vol. ii. p. 91, 92. A *hood*, then, is

A raised covering for the head; for the eyes (of a Hawk.) To *hoodwink*.

To cover the eyes with a *hood*; to cover the eyes; to blink or blind; and, consequentially, to deceive, to delude, to lead astray.

For hure *hefd* was worth half a mark, and hus *hod* not a grote.

Piers Plouhman. Vision, p. 82.

A yeman hadde he, and servantes no mo

At that time, for him luste to ride so;

And he was cladde in cote and *hode* of grene.

Chaucer. The Prologue, v. 103.

Go *hoodlesse* into the dry see.

Id. The Dreame, fol. 244.

And in the mornynge the spyas brought report, howe the white *hoodes* were determyned to abyde there all that day, wherwith these lordes and knyghtes were right ioyfull.

Lord Berners. Froissart. Cronycle, vol. i. ch. 379.

Conrad Celtes observes, to be in an abbey at the foot of Vichtelberg hill, near Voitland, six statues of stone, set in the church wall, some seven foot, every one tall, bare head and foot, cloked and *hooded*, &c.

Selden on Drayton's Poly-olbion, song 9, note.

When he [Scipio] was at Alexandria and disbarked, as he came first to land, he went *hooded*, as it were with his robe cast over his head.

Holland. Plutarch, fol. 358.

Marsyas the minstrell (as it is thought) devized first with a certain *hood* and muzzle fastned round about the moutn, as well to restraine and keep down the violence of the blast enclosed thus by force, as also to correct and hide the deformity and undecent inequality of the visage.

Id. Ib. fol. 101.

What diuell was't

That thus hath cousen'd you at *hoodman-blinde*?

Shakspeare. Hamlet, fol. 271.

Go, lictor, goe bind those hands fast, which armed a little before wan the people of Rome their dominion: go, I say, and *hoodwinke* his head, who saved and delivered this cittie from bondage, hang him by the necke, and strangle him upon a cursed tree.

Holland. Livius, fol. 19

Expell'd for this, and for their lands, they fled;

And sister Partlet with her *hooded* head,

Was booted hence, because she would not pray abed.

Dryden. The Hind and the Panther.

In a corner, on the floor, is an antient monument of a man recumbent, his hands closed as in prayer, his hair lank, his chin beardless; his lady by him in a long *hood*.

Pennant. London, p. 402.

Books are not seldom talismans and spells,

By which the magic art of shrewder wits

Holds an unthinking multitude enthral'd.

Some to the fascination of a name

Surrender judgment *hood-wink'd*.

Cowper. The Task, book vi.

HOOD. Warton says, *thy headless hood* is for "thy heedlessness;" *hood* is a termination denoting estate, as *manhood*, &c. Skinner;—D. *heyd*; Ger. *heit*; A. S. *had*, *hade*, *conditio*, as in *knighthood*, *priesthood*, *maidenhead*, &c. To the same purport Somner, Verstegan, &c. Wachter, in his *Prologomena*, sec. 6. writes upon the various applications of the Ger. *heit*, which, he remarks, was a word (*vocula*) before it was *particula postpositiva*. There seems no reason to suppose that this postpositive particle is any other word than *hood*, (*ante*), something *raised*, as *priesthood*, *knighthood*, *raised* to be or to the state or rank of a priest, (*heuedes* of holy church), of a knight; *manhood*, *maidenhood* or *head*, *childhood*, *raised* to be or become to the state, rank, or condition,—of a man, from a youth or lad,

HOOD. — of a maiden from a girl,—of a child from an infant ;
and subsequently applied generally to
HOOK. The state, condition, degree, order, rank or quality,
kind or sort.

Cuddy, I wot thou kenst little good,
So vainly to advance thy headlesse hood.

Spenser. *Shepherd's Calendar*. February.

HOOF, } A. S. *hof*; D. *hoef*; Ger. *huff*; Sw.
Ho'OFED. } *hoof*; which Junius and others derive
from the Gr. ὄπλη.—Tooke from the A. S. *heaf-an*, to
heave or raise, formed from the past participle *hove*:
and he quotes three instances from the *Byrth of Man-*
kynde, where the word is written *hove*. The *houe* of
an asse, the *houe* of a horse, a calf's *houe*. *Diversions*
of Purley, vol. ii. p. 92, 93. The *hoof* is
The raised or *heaved* or *hoven* part of the foot.

With the *hoffs* of his horse fete, shal he tread downe al thy stretes.
Bible, Anno 1551. *Ezechiel*, ch. xxvi.

Some climbing to his ears, do never leave their hold,
Till falling on the ground, they have him as they would,
With many of his kind, which, when he us'd to wend,
What with their horns and *hoofs*, could then themselves defend.
Drayton. *Poly-olbion*, song 22.

In India, there be found bæufes whole *hoofed*, with single hornes.
Holland. *Plinie*, book viii. ch. xxi.

This said, his brasse *hou'd* winged horse, he did to chariot binde,
Whose crest was fring'd with manes of gold, and golden garments
shin'd.

Chapman. *Homer*. *Iliad*, book viii. fol. 106.

Beyond these, if I pleas'd, I to your praise could bring,
In sacred Tempe, how (about the *hoof-ploughed* spring)
The Heliconian maids, upon that hallowed ground,
Recounting heavenly hymns, eternally are crown'd.
Drayton. *Poly-olbion*, song 15.

Nature the bull with horns supplies,
The horse with *hoofs* she fortifies.

Philips. *Anacreon*. Ode 2. On Women.

HOOK, v. } A. S. *hoce*; D. *haeck*, *hoeck*;
HOOK, n. } Ger. *hak*; Sw. *hake*; perhaps
Ho'OKED, } (says Skinner) from the Lat.
HOOK-HANDED, } *uncus*; not improbably from
HOOK-NOSED, } A. S. *hog-an*, *complecti*, to hug;
HOOK-SHOULDERED. } the Dutch have the verb *haeck-*
en, *unco figere*, *inuncare*, *aduncare*, *fibulare*. Kilian.
A hook,

Any thing crooked, bent, or curved so as to catch or
hold; also to cut or reap with; a catch or snare. To
hook,

To catch or hold, to hale or draw with a *hook*; or
as with a *hook*; to catch or ensnare.

Eremýtes on an hep. w^t *hoked* staves
Wenten to Walsyngham.

Piers Plouhman. *Vision*, p. 3.

Nettles, thornes, and *hoked* briers.
Chaucer. *The Romant of the Rose*, fol. 123.

After which band of horsmē there folowed C. *hooked* wagons.
Brende. *Quintus Curtius*, book iv. fol. 85.

The wheles were also full of irō pikes right forthe, and of great
hookes both vpward & downward wherwith al thing was cut a sūder
y^t came in their waye. *Id.* *Ib.* fol. 76.

By brybes geuyng, by craft and deceyte, by *hooke* or by *croke*, by
rygnt or by wrong, they desyre lordshyp, soueraigne rule, & dignities.
Udall. *Mark*, ch. iii.

Neighbourhood bred acquaintance, acquaintance waffed in the
Irish toong, the Irish *hooked* with it attire, attire haled rudenesse, &c.
Holinshed. *Description of Ireland*, ch. i.

Some say he [Romulus] took it [the city of Fidenā] upon a
sudden, having sent before certain hors-men to break down the *hooks*

and hinges with force, which the gates hang by. and himself came
after with the rest of his army, and stole upon them, before the city
mistrusted any thing.

Sir Thomas North. *Plutarch*, fol. 27. *Romulus*.

The claws [of caterpillars] are *hooked*, to take the better hold, in
climbing from twig to twig, and hanging on the backsides of leaves.
Grew. *Cosmo Sacra*, book ii. ch. viii. sec. 10.

Even so dolor and pain having many crotchets and *hooked* spurns
of roots, which it putteth forth and spreadeth here and there, inserteth
and interlaceth itselfe within the flesh, and there abideth, not only
for a night and a day, but also for certain seasons of whole yeers.

Holland. *Plutarch*, fol. 479.

But when I read or heare of names so rife,
Of hirelings, wranglers, stitchers-to of strife,
Hook-handed harpies.

Ben Jonson. *Vnder-woods*. Epigram to the Counsellor that plead-
ed, &c.

They called him Phiscon and Grypos: as ye would say, gore-
belly, and *hook-nosed*.

Sir Thomas North. *Plutarch*, fol. 189. *Coriolanus*.

Ye (mountains) with your *hook-shouldered* height,
The earth deform, and heaven fright.
Marvell. *Poems*. On the Hill and Grove at Billborow.

Thereafter, all that mucky pelfe he tooke,
The spoyle of people's euill gotten good,
The which her sire had scrap't by *hooke* and *crooke*,
And burning all to ashes, pour'd it downe the brooke.
Spenser. *Faerie Queene*, book v. can. 2.

Not caring which way he goes to work, whether it be by *hook* or
crook, so that he may gain and profit thereby.

Holland. *Plutarch*, fol. 173.

Is not thy potent energy, unseen,
Myriads of little salts, or *hook'd*, or shap'd
Like double wedges, and diffus'd immense
Through water, earth, and ether?

Thomson. *Winter*.

There is nothing which each of these powers will not *hook* within
the verge of its cognizance and jurisdiction.

Barrow. *Works*, vol. i. part ii. fol. 143. *A Treatise of the Pope's*
Supremacy.

I myself have known some white men, that have lost the use of
their hands, only by a small prick with the fin of these fish. [the cat
fish.] Therefore when we catch them with a *hook*, we tread on them
to take the *hook* out of their mouths.

Dampier. *Voyages*, Anno 1684.

Scaliger, the father, derives the word *satyre* from *Satyrus*, that
mixed kind of animal, or, as the ancients thought him, rural god,
made up betwixt a man and a goat; with a humane head, *hook'd* nose,
pouting lips, &c. *Dryden*. *Juvenal*. *The Dedication*.

My old friend angles for a trout the best of any man in England.
May-flies come in late this season, or I myself should, before now,
have had a trout of his *hooking*.

Guardian, No. 67.

This Solomon [King James] caught at the bait which was thrown
out to him, and hung fast on the *hook* for seven years together.

Bolingbroke. *Remarks on the History of England*. Letter 23.

The bill is strong, short, and very much *hooked*, armed, near the
end of the upper mandible, with a very sharp process.

Pennant. *British Zoology*. *Peregrine Falcon*.

Hook, says Mr. Todd, (*ad v.*) is the same as *Crook*,
and therefore the phrase by *Hook* or by *crook* means no
more than by one means or other. Warton, in his
Observations on Spenser, (280. 1st edit.) had already
shown the falsehood of the vulgar belief, that this ex-
pression originated with two lawyers in Charles I.'s time,
Judge Hooke and Judge Crooke; implying that a
difficult cause was to be gained by one of them. The
phrase was doubtless applied to them; but, as the cita-
tion given above from Udall shows, is much older than
their days, for Udall died *circiter* 1557. The places to
which Warton points, are *Faerie Queene*, v. ii. 27. (cited
above,) and iii. i. 17.; he says, also, that the phrase is
used by Skelton.

HOOKAH, more properly spelt *НУССАН*, or *ННОС-*

HOOK.

HOOKAH.

HOOKAH. *CAH*, is an Arabic word, signifying bowl or cup, technically employed to express the bowls, cups, or gallipots, used by grocers and apothecaries; hence it came, in India, to mean peculiarly the bowl attached to the long spiral pipe which the natives of that Country delight in using, and, by an easy metonymy, the pipe itself, together with all its appurtenances. It is nothing more than a covered basin of glass or metal, in which one extremity of the pipe and a perpendicular tube to hold the tobacco are inserted; the *Hhuccah* is then nearly filled with water, through which the smoke inhaled must necessarily pass, and, being cooled, is rendered much more agreeable to the smoker. In Turkey and Persia the *Hhuccah* is never seen, but the *caliyán*, *caliyún*, or *nárgileh*, are often substituted for it by the rich and luxurious. It is usually a slender bottle of cut glass ornamented with gilt flowers, into the neck of which the pipe and bowl for the tobacco are introduced. The Turkish and Persian pipes, though much shorter than those used with the *Hhuccah*, are sometimes so long and flexible, that the luxurious Persian may, without any interruption of his progress, smoke through the pliant tube as he rides along, while a servant by his side carries the *caliyán*. (Sir W. Ouseley's *Trav.* i. 344.) On ordinary occasions the basin of the *Hhuccah* is placed on a stool or on the ground. The word *caliyán* is pronounced *caliyún* by the Persians, and therefore spelt *callion* by Chardin, (iii. 304.) who gives a description and figure of this sort of pipe. (pl. xix.) A lady smoking the *caliyán* is delineated by Sir William Ouseley, (pl. lxi. ii.); and it is well represented by Kämpfer. (*Amœnitates*, p. 641.) The violence of the inspiration required by this contrivance for cooling the smoke is said to be very injurious to the lungs. Every great man in India has his *Hookah burdar*, (*Hhuccah berdár*), or pipe-bearer, whose business it is to clean, fill, bring, and bear the pipe whenever it is wanted.

Sir W. Ouseley's *Travels*; Kämpfer's *Amœnitates Exoticæ*; *Voyages de Chardin*; Niebuhr's *Reisebeschreibung*; Scott; Waring's *Travels*; Morier's *Travels*.

HOOKERIA, in *Botany*, a genus of the class *Cryptogamia*, natural order *Musci*. Generic character: capsule ovate, reticulated, produced from a scaly perichætium; exterior of the peristome sixteen-toothed; interior membranaceous, sixteen-toothed; veil cellular, reticulated, entire.

A genus of Mosses divided from *Hypnum*. Native of both hemispheres.

H. lucens is a native of England.

HOOP, v. } A. S. *hop*; D. *hoep*, *hoepel*. Junius
HOOP, n. } thinks, that by the change of *c* into the
Ho'OPER, } aspirate, *hoop* is formed from *coop*, (*q.v.*)
Ho'OPING. } to keep, keep in, or confine. And

A *hoop* is that which keeps together, confines, or surrounds, sc. the staves of a cask or barrel: applied generally to any thing circular; formed with a resemblance to the *hoop* of a barrel.

To *hoop*; to confine, bind, surround with a *hoop*; also, generally.

The couper's house is heelde by *hooping* fattes.
Gascoigne. *The Fruites of Warre*.

Their women all without exception weare a great round ring in one of their nostrels, of golde, siluer, or yron, according to their ability, and about their armes and smalles of their legs they haue *hoops* of golde, siluer, or yron.

Hakluyt. *Voyages*, &c. vol. ii. fol. 269. M. John Eldred.

Every tinker, tailour, *hooper*, hostler, cardmaker, and horsekeeper, might as they did compare in learning, and all other offices, above a doctour of divinity.

Martin. *Marriage of Priests*, Anno 1554. Ll. ii. b.

There shall be in England, seuen halfe peny loaves sold for a peny: the three *hoop'd* pot shall haue ten *hoopes*, and I wil make it felony to drink small beere.

Shakspeare. *Henry Sixt. Second Part*, fol. 138.

If euer henceforth thou
These rurall latches, to his entrance open,
Or *hope* his body more with thy embraces,
I will devise a death, as cruell for thee,
As thou art tender to't.

Id. *Winter's Tale*, fol. 295.

Of the aspen our woodmen make *hoops*, fire-wood, and coals, &c
Evelyn. *Sylva*, ch. xvii. sec. 6.

The jolly members of a toping club,
Like pipe staves, are but *hoop'd* into a tub,
And in a close confederacy link,
For nothing else but only to hold drink.

Butler. *Epigram on a Club of Sots*.

'Twas vain to hide th' apparent load,
For *hoops* were not then à la mode.
Somerville. *Fables*, &c. *The Night Walker Reclaimed*.

And kettle-drums, whose sullen dub
Sounds like the *hooping* of a tub.

Butler. *Hudibras*, part ii. can. 2.

Now we know, that in a drum, the pelt is carried over a *hoop*, and braced as occasion requires, by the means of strings attached to its circumference.

Paley. *Natural Theology*, ch. iii.

The upper ends were let fall, and hung down in folds to the ground, over the other, so as to bear some resemblance to a circular *hoop-peticoat*.

Cook. *Voyages*, vol. vi. book iii. ch. iii.

HOOP, or } Fr. *houper*. Junius, in his *Goth.*
WHOOP, v. } Gloss. (*v. wopyan*, *clamare*) says, is
HOOP, n. } to call with a loud voice to those who
Ho'OPING. } are at a distance. Huntsmen, especially, are said to *hoop* and *hallow*, when they fill the woods and valleys with their shouts, to cheer the dogs, to rouse the game, or to give a warning to their comrades. Skinner thinks the French and English are formed from the sound.

Now by Crist quap Peers. y shal apeyre zow alle
And *hoped* after hunger. pat herde at þe ferste.

Piers Plouhman. *Vision*, p. 137.

Of bras they broughten beemes and of box,
Of horne and bone, in which they blew and pouped,
And therewithal they shrieked and they *houped*.

Chaucer. *The Nonnes Prestes Tale*, v. 15406.

They came vp to vs again and gaue vs a great fight with much hallowing and *hooping*, making accompt either to boorde vs or els to sinke vs.

Hakluyt. *Voyages*, &c. vol. ii. part ii. fol. 63. M. George Fenner.

Which is the cause of reciprocall voices called ecchoes, answering one another in many places, when a man doth holla or *houpe* among them.

Holland. *Plinie*, book ii. ch. xlv.

You have run them all down with *hoops* and holla's, i. e. with noise and confidence.

Bishop Parker. *Repr. Rehears. Transpr.* p. 26.

The Gaules stood upon the banke with distant *hooping*, hollaing, yelling, and singing, after their manner.

Holland. *Livius*, fol. 408.

HOOT, v. } Fr. *huer*; formed, say Skinner and
HOOT, n. } Lye, from the sound. As the Fr.
Ho'OTING. } "To shout, exclaim, cry out, make hue and cry." Cotgrave also gives, "Hou, hou, hou, hootings or whoopings; voices wherewith swine are scared, or infamous old women disgraced."

He was nawer welcome. for hus merry tales
Over all *houted* out.

Piers Plouhman. *Vision*, p. 35.

HOOP.
HOOT.

HOOT.

HOP.

PAUL. That she is living,
Were it but told you, should be *hooted* at
Like an old tale : but it appears she lives,
Though yet she speake not.
Shakspeare. Winter's Tale, fol. 303.

— You are they
That made the ayre vnwholesome, when you cast
Your stinking, greasie caps, in *hooting* at
Coriolanus' exile.
Id. Coriolanus, fol. 24.

Its assertion would be entertained with the *hoot* of the rabble : the very mention of it as possible, is among the most ridiculous ; and they are likely most severely to judge it, who least understand the cause.
Glanvil. The Vanity of Dogmatizing, ch. ix.

— Your *whootings* and your clamors,
Your private whispers, and your broad fleerings,
Can no more vex my soul, than this base carriage.
Beaumont and Fletcher. Philaster, act ii.

How will the Latians *hoot* their hero's flight !
Gods ! how will Drances point them to the sight.
Pitt. Virgil. Aeneid, book xii.

He [an owl] shows insatiate thirst of praise,
Ambitious of the poet's bays.
Perch'd on Parnassus all night long,
He *hoots* a sonnet or a song.

Cotton. A Fable.

HOOVE. See HOVE.

HOP, v.

HOP, n.

HOP-BAG,

HOP-BIND,

HOP-GARDEN,

HOP-GARLAND,

HOP-GROUND,

HOP-HILL,

HOP-LAND,

HOP-LEAVES,

HOP-POLE,

HOP-PROP,

HOP-STRING,

HOP-VINE,

HOP-YARD.

D. *hoppe* ; Ger. *hopfen* ; Fr. *houblon* ; from *hoppén*, *salire*, (Kilian,) *quod saliat, sive ascendat arbores*. Skinner is decisive for the Lat. *lupulus* ; and Menage, in v. *Houblon*.

The trivial name of the *Lupulus humulus* of Linnæus.

The continuance of the drinke is alwaie determined after the quantitie of the *hops*, so that being well *hopped* it lasteth longer.

Holinshed. Description of England, ch. vi.

These [who accuse *hops* for noxious] plead the petition presented in Parliament in the reign of King Henry the Sixth against the wicked weed called *hops*.

Fuller. Worthies of England. Essex.

Mustachios look'd like heroes' trophies
Behind their arms i' th' herald's office ;
The perpendicular beard appear'd
Like *hop-poles* in a *hop-yard* rear'd.

Cotton. To John Bradshaw, Esq.

The timber [of the poplar] is incomparable for all sorts of white wooden vessels, as trays, bowls, and other turner's ware ; likewise to make carts, because it is exceeding light ; for vine, and *hop-props*, and divers viminious works.

Evelyn. Sylva, ch. xvii. sec. 6.

Gruels made of grains, broths, malt-drink not much *hopped*, posset-drinks, and, in general, whatever relaxeth, have the same effect, [sc. increase milk.]

Arbuthnot. On Aliments, ch. v. sec. 26.

The stone is said to have first come amongst us after *hops* were introduced here, and the staleness of beer brought into custom by preserving it long.

Sir Wm. Temple. Of Health and Long Life.

Two or three times in a day the bin must be emptied into a *hop-bag* made of coarse linen cloth.

Miller. Gardener's Dictionary, (the Hop.)

They accounting new land best for *hops*, the Kentish planters plant their *hop-gardens* with apple trees at a large distance, and with cherry trees between.

Id. Ib.

Lay a line across it from the hedge, in which knots have been tied, at a distance you design your *hop-hills* to be at.

Miller. Gardener's Dictionary, (the Hop.)

It may be known when they are well dried, by the bitterness of the stalks and the easy falling off of the *hop-leaves*.

Id. Ib.

Next to thistles [in making glass] are *hop-strings*, cut after the flowers are gathered.

Derham. Physico-Theology, book x. note 3.

The *hop-vines* on the outsides of gardens, where they are most exposed to the air, are short and poor, in comparison of those in the middle of the ground.

Miller. Gardener's Dictionary, (the Hop.)

The planting of *hops* increased much in England during this reign.

Hume. History of England. James I. Appendix.

By statute 6 Geo. II. c. 37. and 10 Geo. II. c. 32. it is also made felony without the benefit of clergy, to cut any *hop-binds* growing in a plantation of lands.

Blackstone. Commentaries, book iv. ch. xvii.

Once more (so prophesies the Muse) thy sons
Shall triumph, emulous of their sires—till then
With olive, and with *hop-garlands* crown'd,
O'er all thy land reign Plenty, reign fair Peace.

Smart. The Hop-Garden, book i.

On Kent's rich plains, green *hop-grounds* scent the gales :

And apple groves deck Hereford's golden vales.

Scot. Amæban Eclogues.

At length the Muse her destin'd task resumes
With joy ; again o'er all her *hop-land* groves
She seeks t' expatiate free of wing.

Smart. The Hop-Garden, book ii.

Young chorus of fair Bacchanals, descend,
And leave awhile the sickle ; yonder hill,
Where stand the loaded *hop-poles*, claims your care.

Id. Ib.

Beckman (*History of Inventions*, iv. 325.) has stated numerous particulars concerning Hops. The plant grows wild in most parts of Europe, and is very common in the hedges of Germany. The foliaceous cones of the female plants are the only parts used in Brewing, and these are added to Beer to give it an agreeable bitterness, and the power of *keeping*, as it is called. It does not appear that either the Greeks or Romans were acquainted with Hops. The *smilax* of Theophrastus, and *smilax aspera* of Dioscorides, is most probably the plant which Linnæus has described under the latter name. Of the *Lupus salictarius*, Pliny only remarks that it is esculent, and grows among willows ; and it is nothing more than the similarity of sound between *lupus* and *lupulus* which has led to a belief in the identity of the two.

The first certain mention of Hops occurs in a Letter of donation by King Pepin, which speaks of *Humolarie*, to which no other meaning can be assigned than that of Hop-gardens. There are other documents of the IXth century in which similar terms are to be found ; and the usage of Hops in Beer, though at that time adopted by the Germans, seems scarcely to have extended beyond that people. The name *lupulus* has not occurred to Beckman earlier than the XIIIth century. About the beginning of the following century Hops were introduced into the Breweries of the Netherlands, which were of great celebrity ; but even at that date, although they were supposed to preserve Beer from corruption, they were accused of drying up the body and increasing melancholy. Beckman denies a very common assertion, that in consequence of the Petition noticed in our citation above from Fuller's *Worthies*, Henry VI. forbade the planting them. He searched in vain for any such prohibition, and he

HOP.

HOP. inclines to a belief, supported by Houghton (*Collect. for Improvement of Husbandry and Trade*, by Bradley, No. 372—380, vol. ii. p. 440.) and Anderson, (*History of Commerce*, ii. 45.) that they were unknown in England till they were brought by some people from Artois about the year 1524. A well-known distich is cited by the last-named writer in confirmation of that date:

Turkeys, Carp, Piccarel and Beer,
Came into England all in one year:

or, as the first line is varied by a Rhymer in 1546,

Hops, Reformation, Bays and Beer.

Until, however, it be clearly ascertained that Turkeys, Carp, Piccarel, Reformation, Bays, and Beer all date in England from 1524, we do not see that much is gained towards the chronology of Hops. Henry VIII. appears to have been prejudiced against them, for in the *Archæologia* (iii. 157.) may be found some extracts from a MS. dated Eltham, mense Jan., 22 Henry VIII., and entitled, *Articles devised by his Royal Highness with advice of his Council for the establishment of good order and reformation of sundry errors and abuses in his Household and Chambers*. In this document, at p. 92, occurs an *Injunction to the Brewer not to put any Hops or Brimstone into the Ale*. In the 5 and 6 Edward VI., lands "set or to be set with Hoppes" are among the exemptions in "An Act for the Maintenance of Tillage and Encrease of Corn;" but even as late as the reign of James I., England did not grow enough to supply her own consumption. An Act was passed in the first year of that King's reign (c. 18.) *for avoiding of deceitful buying and spending corrupt and unwholesome Hops*. In this Statute the loss by such fraud is stated to have amounted to £20,000 yearly for some time past; and that out of the imported packages not more than one-third contained Hops, the rest being dross and soil. The regulation of Hops is now a matter of Excise Law, and is controlled by numerous Statutes.

Hops require a rich, strong soil; if it be rocky within two or three feet of the surface, so much the better, but they will not thrive in stiff clay or wet spongy land. They are planted by cuttings in October or March, five on each hill, and the hills in quincunx. About the middle of April, when the shoots begin to sprout, they are fit for poling: three poles are sufficient for each hill; such buds as do not of themselves clasp the pole must be guided to it and lightly bound with dry rushes. They begin to blow in July, and about Bartholomewtide their strong smell, hardness, and the brownness of the seed, declares them fit for picking. This is done in frames of wood (bins,) with a cloth hanging on tenter-hooks within them to receive the buds. They should be picked very clean from leaves and stalks, and be carried as soon as possible to a kiln in order to be dried. The drying is a delicate operation, and usually occupies about 12 hours. After it they become brittle, and require three weeks or a month before they are fit for bagging. Hops should seldom, if ever, be picked till the second season after planting; and if the gardens are carefully looked after, they will continue bearing without renewal for more than twenty years. According to the soil and season, Hops vary in produce from 2 cwt. to 20 cwt. per acre; from 10 cwt. to 14 cwt. is a favourable crop. The expense of forming a new ground is frequently little less than £100 per acre. Warm seasons without wet are required for good crops. Great heat after rains, and high

winds are particularly destructive, and they are exposed to numerous diseases and the ravages of many insects so that their culture is both expensive and uncertain.

HOP, v. } D. *huppen*, *huppelen*; Ger. *hupfen*; Sw. *hoppa*. "A. S. *hoppa*,
HOP, n. } *salire*, *saltare*, *gestire*, to *hop*, skip,
HO'PPER, } leap, or dance, to leap or skip for
HO'PPESTERE. } joy." Somner.

"To *hoppe* (says Mr. Tyrwhitt) in Saxon signifies exactly the same as to *dance*, though with us it has acquired a ludicrous sense; and the termination *stre*, or *ster*, was used to denote a *female*, like *trix* in Latin." "A female *hopper*, or dancer, was called an *Hoppes-tere*."

He *huppte* hym vp fram þe bord, in gret wrappe ynou,
And hente þys Lof by þe top, fram þe borde hym drou,
And defouled hym vnder hym myd honde & myd fote.

R. Gloucester, p. 277.

And nat in Engelounde to *huppe* aboute.

Piers Plouhman. Vision, p. 301.

At every bridale would he sing and *hoppe*;

He loved bet the taverne than the shoppe.

Chaucer. The Cokes Tale, v. 4574.

Yet saw I brent the shippes *hoppes-teres*.

Id. The Knightes Tale, v. 2019.

And *hoppe* in hazard by their headie meanes.

Gascoigne. The Fruites of Warre

When they [birds] have met with a straw or other fit material, they flie not with it directly to their nest, but first to a bough of some tree, or to the top of a house; and there they *hop* and dance a while with it in their beaks, and from thence skip to another place, where they entertain themselves in like manner, and at last they get to their nest.

Digby. Of Bodies, ch. xxxvii.

ENO. I saw her once

Hop forty paces through the publicke streete,
And hauing lost her breath, she spoke, and panted
That she did make defect, perfection.

Shakspeare. Antony and Cleopatra, fol. 347.

No commodity starteth so soon or sinketh so suddainly in the price (as *hops*), whence some will have them so named from *hopping* in a little time betwixt a great distance in valuation.

Fuller. Worthies of England. Essex.

The limping Smith observ'd the sadden'd feast,
And *hopping* here and there (himself a jest,)
Put in his word, that neither might offend.

Dryden. Homer. Iliad, book i.

With eager expedition he prepares
His choicest twigs, his bird-lime, and his snares,
And in a neighbouring covert smiles to see
How here and there he skipt, and *hopt* from tree to tree.

Fawkes. Bion. Idyl. 2. Cupid and the Fowler.

HOPE, v.

HOPE, n.

HO'PEFUL,

HO'PEFULLY,

HO'PEFULNESS,

HO'PELESS,

HO'PELESSLY,

HO'PELESSNESS,

HO'PER,

HO'PINGLY,

HOPE-BUILT,

HOPE-FLUSHED.

A. S. *hop-ian*; D. *hopen*; Ger. *hoffen*; in A. S. also written *opian*, without the aspirate, and is probably from *open-ian*, *yppan*; D. *openen*; Ger. *offnen*, *aperire*, *pandere*, to *open*, to expand, *sub.* the eyes; and, thus, consequentially, signifying, to look out or after, to stare after, *sc.* with eagerness, with desire, with anticipation of some good. In like manner to *gape*, *q. v.* (A. S. *ge-yppan*)

has been explained, to *open*, *sub.* the mouth, as young birds eagerly for food; and thus, to crave, to desire or covet eagerly, &c.

In the passages from Chaucer, Shakspeare, and Ford, and also in the lines quoted from Ritson, to *hope* is merely to look for, to expect. And Mr. Tyrwhitt says, it signifies the mere expectation of a future event, whether good or evil, as *ἐλπίς*, Gr. and *spero*, Lat. often do.

HOP.

HOPE.

HOPE. **Ritson** says, suppose, fear, am afraid. To *hope*, then, is

To look out or after, to expect, (sc. with open, out-stretched eyes,) to expect, *sub.* with desire, with anticipation of, with trust or confidence in, some good.

And *hoped* to wýnne Rome, wanne he come eft age.
R. Gloucester, p. 220.

Of prowess me mot take gome, þat me býneþe ne go
Vor pur mýseyse, & vor *hope* þat þer beþ mo.
Id. p. 456.

þan *hopes* þou, said þe erle, þat for me was he dede.
R. Brunne, p. 55.

þe pape set þat terme, for his *hopyng* was,
þe pes þei suld afferme, for drede of hardere kas.
Id. p. 316.

Thuse solaceþ þe soule til hym self be falle
In a wele good *hope* for he wroghte so. among worthy seyntes.
Piers Plouhman. Vision, p. 116.

But bi *hope* we ben maad saaf. for *hope* that is seien is not *hope*. for
who *hopith* that thing that he seeth? and if we *hopen* that thing that
we seen not, we abiden bi pacience.

Wiclif. Romaynes, ch. viii.

For we are saued by *hope*. But *hope* that is sene is no *hope*. For
how can a man *hope* for that which he seeth? But and if we *hope*
for that we se not, then do we with pacience abyde for it.
Bible, Anno 1551.

Our manciple I *hope* he wol be ded.
Chaucer. The Reves Tale, v. 4027.

And he hadde be somtime in chevachie,
In Flaundres, in Artois, and in Picardie.
And borne him wel, as of so litel space,
In *hope* to stonden in his ladies grace.
Id. The Prologue, v. 88

And thus I laie in *hope* of grace.
Gower. Conf. Am. book viii.

The weder made me so will of rede
I *hoped* sone to have my dede;
And, sertes, if it lang had last,
I *hope* I had never thethin [thence] past.
Ritson. Met. Rom. vol. i. fol. 17. *Ywayne and Gawin*, v. 380.

Souldiours behold and captaynes marke it well,
How *hope* is harbenger of all misshape,
Some *hope* in honour for to beare the bell,
Some *hope* for gaine and venture many a clappe,
Some *hope* for trust and light in treason's lappe.
Hope leades the way our lodging to prepare,
Where high mishap (ofte) keepes an inne of care.
Gascoigne. The Fruites of Warre.

Or he: that dreading chaunce to cum,
a litle doth desyre,
And keepes it well, and warylye
to helpe in *hopelesse* tyde.
Drant. Horace. Satire 2. book ii.

Thus is my sommer worne away and wasted,
Thus is my harvest hastened all to rathe;
The eare that budded fayre is burnt and blasted,
And all my *hoped* gaine is turn'd to scathe.
Spenser. Shepherd's Calendar. December.

MENE. I cannot *hope*,
Cæsar and Anthony shall well greet together.
Shakspeare. Anthony and Cleopatra, fol. 345.

FERN. The duke is hors'd for Lucca: how now, coz,
How prosper you in love?

ROS. As still I *hoped*.—
My lord, you are undone.
Ford. Love's Sacrifice, act iv. sc. 2.

Hope, thou darling, and delight
Of unforeseeing reckless minds,
Thou deceiving parasite,
Which no where entertainment finds
But with the wretched or the vain;
'Tis they alone fond *Hope* maintain.

Cotton. Hope.

Horse could never passe;
Much lesse their chariots, after them: yet for the foot there was
Some *hopefull* service, which they wisht.

Chapman. Homer. Iliad, book xii. fol. 160.

But others conceive, that humane may be subordinate to spiritual
means; to prevent, not the falling, but the hurting of this dew in such
a degree, and *hopefully* expect the remedy from the ingenuity of the
next generations.

Fuller. Worthies. Middleser.

Now here then will lie the whole business, to set down before-hand
certain signatures of *hopefulness*, or characters, (as I will rather call
them, because that word hath gotten already some entertainment
among us,) whereby may be timely described what the child will
prove in probability.

Reliquiæ Wottonianæ, p. 77.

Shall I *hopeless* then pursue
A fair shadow, that still flies me?
Shall I still adore and woo
A proud heart, that does despise me?

Sherburne. Originals. Love once, Love ever.

For thus their sense informeth them, and herein their reason can-
not rectifie them; and therefore *hopelessly* continuing in mistakes,
they live and die in their absurdities.

Sir Thomas Brown. Vulgar Errors, book i. ch. iii.

So that not every not *hoping* for heaven is the sin of despair, but
rather the peremptory contempt of the condition, which is the ground
of *hope*; the going on (not only in terroures and amazement of con-
science, but also) boldly, *hopingly*, confidently, in wilful habits of sin,
which therefore is called desperateness also.

Hammond. Practical Catechism, book i. sec. 3.

When they enter'd in
They thought the place could sanctify a sin;
Like those that vainly *hop'd* kind heaven would wink,
While to excess on martyrs' tombs they drink.

Dryden. Astræa Redux.

Hope is that pleasure in the mind, which every one finds in himself
upon the thought of a profitable future enjoyment of a thing, which
is apt to delight him.

Locke. Of Human Understanding, book ii. ch. xxi. sec. 9.

Wherefore I may (without being too much sanguine) affirm, that
(since this rebellion) my affairs were never in so fair and *hopefull* a
way.

Ludlow. Memoirs, vol. iii. p. 226.

The embassadour would confer with such of the king's friends
who were then at London, and whose relation had been most eminent
towards his majesty; and receive advice from them, how he might
most *hopefully* prevail over particular men, and thereby with the
parliament.

Clarendon. History of the Rebellion, book xi.

While he was thus a student here, [Cambridge,] such notice was
taken of his parts and *hopefulness*, that the knowledge of him came
to King Henry.

Strype. Life of Sir Thomas Smith, ch. ii.

These words [*Ezek.* ch. xxxvii. v. 3.] are part of that vision of the
valley of bones, wherein the prophet Ezekiel doth, in a very lofty and
lively manner, set out the lost and *hopeless* state of Israel, then under
captivity.

Atterbury. Sermon 7. vol. iii.

What would you say to your debtor, if, on calling him to account,
he should tell you, that none of the articles against him were large
sums—and therefore he *hoped* you would consider the debt of little
consequence?

Gilpin. Sermon 38. vol. iii.

But thou, O *Hope*, with eyes so fair,
What was thy delighted measure?
Still it whispered promis'd pleasure
And bade the lovely scenes at distance hail.

Collins. Ode on the Passions.

But then let no superstitious fancies, that our habitual vices may
be indulged under the ample cloak of charity, defeat these *hopeful*
means of a beginning reconciliation with our offended master.

Warburton. Sermon 31. vol. x.

Our Lord's declaration that every man will at last find himself in
the station which eternal justice has ordained that he shall hold, cuts
off all *hope* but what is founded on an active and sincere repentance:
on such a repentance as may entitle to the benefit of the Redeemer's
expiation, which is ever to be kept in view; for without that our
Saviour's declaration would render every man altogether *hopeless*.

Horsley. Sermon 3. p. 299.

— The sole business of the rich and great,
Was to that *hope-built* temple to resort,
And round their earthly god in glory wait.

West. On the Abuse of Travelling.

HOPE.

HORDE.

Who dreams of nature, free from nature's strife?

Who dreams of constant happiness below?

The *hope-flush'd* ent'rer on the stage of life;

The youth to knowledge unchastis'd by woe.

Scott. *Elegy 3. written in Harvest.*

HOPEA, in *Botany*, a genus of the class *Monadelphia*, order *Polyandria*, natural order *Guaiacanae*. Generic character: calyx five-cleft, superior, petals five; stamens numerous, collected into five bundles; style one; drupe three-celled, two of the cells usually abortive.

One species, *H. tinctoria*, native of North America. Nuttall.

HOPLIA, in *Zoology*, a genus of *Lamellicorn*, *Pentamerous* insects, belonging to the family *Scarabaeidae*, established by Illiger.

Generic character. *Elytra* sinuated on the outer side near the base; legs not having any distinct spur at their extremity. These insects are generally of a small size; their *antennae* formed of nine or ten joints, of which the three last are foliaceous.

The type of the genus is *H. philanthus*, *Melolontha pulverulenta*, Fabricius, Olivier, pl. iii. fig. 22. Common in France. These insects are confined to the warm and temperate parts of the old continent.

HOPPER has received its name, says Junius, from *hopp*, *subsilire*, because it is always in motion. It is called by the French *trémie*, or *trémuye d'un moulin*.

The wooden trough in a mill, in which the corn is placed in order to be ground. The use of which is well described in the Quotation from Arbuthnot.

And heng his *hoper* on hus hals. in stede of scrippe.

Piers Plouhman. *Vision*, p. 131.

By God, right by the *hopper* wol I stand,
(Quod John) and seen how that the corn gas in.

Yet saw I never by my fader kin,

How that the *hopper* wagges till and fro.

Chaucer. *The Reves Tale*, v. 4009.

Sometimes they [chrystals] are pyramidal and plain, without and within, like the *hopper* of a mill.

Grew. *Cosmo Sacra*, book i. ch. iii. sec. 25.

Granivorous birds have the mechanism of a mill; their maw is the *hopper*, which holds and softens the grain, letting it drop by degrees into the stomach, where it is ground by two strong muscles, in which action they are assisted by small stones, which they swallow for the purpose.

Arbuthnot. *On Aliments*, prop. 8. sec. 20.

HORAL, } Lat. *hora*; Gr. *ᾠρα*, *tempus*, for *ᾠρα*;
HO'RARY. } and this from *ᾠρος*, *terminus*; *ᾠρα* signifying a definite, fixed, or established point or period of time.

Pertaining to an hour; lasting or continuing for an hour.

Thereby was declared the propinquity of their desolation; and that their tranquillity was of no longer duration than these *horary* or soon decaying fruits of summer.

Sir Thomas Brown. *Vulgar Errours*, book vii. ch. i.

But, if the *horal* orbit ceases,
The whole stands still and breaks to pieces.

Prior. *Alma*, can. 3.

I will (altho' I've done't before)
Demonstrate to your sense once more,
And draw a figure that shall tell you
What you, perhaps, forgot befell you,
By way of *horary* inspection.

Butler. *Hudibras*, part ii. can. 3.

The famous doctor in Moorfields, who gained so much reputation for his *horary* predictions, is said to have had in his parlour different ropes to little bells which hung in a room above stairs, where the doctor thought fit to be oraculous.

Spectator, No. 193.

HORDE. This word is said to have been introduced from Tartary, but appears to be merely a consequential

VOL. XXIII.

usage of *hoard*, to store up, to accumulate, to collect; and signifying

A collection or multitude of people.

Nor oughte canne thee deterre

From huntynge after hurtfull *horde*.

Drant. *Horace. Satyre 1. book i.*

Master George Barkly, a merchant in London, having travelled Livonia, Russia, Lithuania, and Poland, went from Cracovia with a Tartar Duke, and stayed with him in his *hord* (which consisted of about a thousand households of a kindred) six moneths.

Purchas. *Pilgrimage*, book iv. ch. xv. sec. 1.

Their government [Britain] was like that of the ancient Gauls, of several small nations under several petty Princes, which seem the original governments of the world, and deduced from the natural force and right of paternal dominion: such were the *hords* among the Goths, the clans in Scotland, and septs in Ireland.

Temple. *Introduction to the History of England*.

I hardly shall allow that with the *horde* of regicides we could by any selection of time or use of means, obtain any thing at all deserving the name of peace.

Burke. *On a Regicide Peace*.

HORDEUM, in *Botany*, a genus of the class *Triandria*, order *Digynia*, natural order *Gramineae*. Generic character: flowers in spikes; calyx one and two flowered, six-leaved, forming an involucre; leaflets in pairs, bristled; the three intermediate florets sessile; corolla stipitate, two-valved, acute, the exterior valve aristate.

Thirteen species, natives of the Northern hemisphere. *H. vulgare*, *hexastichon*, and *distichon*, are the Spring, Winter, and common cultivated species of Barley. The native Country of all of these is unknown: *H. vulgare* is said to have been found wild in Sicily; there are three species of the genus. Common grasses, natives of England.

HORE, } See WHORE.

HO'REDOM. }

HORIA, in *Zoology*, a genus of *Heteromorous*, *Coleopterous* insects, forming the type of the sub-family *Horiadae*, established by Fabricius and adopted by most authors.

Generic character. All the claws of the *tarsi* toothed beneath, and accompanied with bristle-like appendages. The *thorax* square, the body thick, long, cylindrical.

The type of the genus is *H. maculata*, Fabricius, found in the Brazils and the West Indies. The *larvæ* of this genus live parasitically in the nest of certain *Hymenopterous* insects. This account has recently been verified by a paper in the *Linnæan Transactions*, in which the *Horia* is described as laying an egg in each nest of the *Xylocopa teredo*: when the *larvæ* are hatched, they eat the food placed in the nest for the nourishment of the *larvæ* of the *Hymenopterous* insect, which are consequently starved. The *larva* changes into an oblong *nympha*, which, after a time, arrives at its perfect state, and eats its way out of the cell.

HORI'ZON, } Fr. *horizon*; It. and Sp. *hori-*
HO'RIZONTAL, } zonte; Lat. *horizon*; Gr. *ὁρίζων*,
HO'RIZONTALLY. } from *ὁρίζ-ειν*, *definire*, *terminare*,
to define, bound, terminate, or limit.

The line which bounds, or terminates, *sc.* the sight, the view.

Horizontal, parallel to the plane of the *Horizon*. And see ASTRONOMY. *ENCYCLOPÆDIA, First Division*.

By the position of the sphere under the pole, the *horizon* and the equinoctial are all one.

Hakluyt. *Voyages*, &c. vol. iii. fol. 56. M. Frobisher.

And so I leave you and your fellow stars, as you term them, of either *horizon*, meaning, I suppose, either hemisphere, unless you will be

HORIZON
—
HORN.

ridiculous in your astronomy: for the rational *horizon* in heaven is but one; and the sensible *horizons* in earth are innumerable; so that your allusion was as erroneous as your stars.

Milton. Apology for Smectymnuus, sec. 10.

And several little shrubs will grow from one *horizontal* bed of salt.
Grew. Cosmo Sacra, book i. ch. iii. sec. 29.

For, first, whether beasts' hearts lie directly *horizontally*, or whether the basis be fastened somewhat higher than the tip reaches, and so makes their heart hang inclining downwards; still the motion of gravity hath its effect in them.

Digby. Of Bodies, ch. xxvi.

The sky looked very black in that quarter, and the black clouds began to rise apace and moved towards us; having hung all the morning in the *horizon*.

Dampier. Voyages. Anno 1687.

The way that they get this juice, is by cutting a great gap *horizontally* in the body of the tree (the Tar-tree) half through, and about a foot from the ground; and then cutting the upper part of the body *aslope* inwardly downward, till in the middle of the tree it meet with the transverse cutting or plain. In this plain *horizontal* semicircular stump, they make a hollow like a bason, that may contain a quart or two.

Id. Ib.

Whilst the authors of all these evils were idly and stupidly gazing on this menacing meteor, which blackened all their *horizon*, it suddenly burst, and poured down the whole of its contents upon the plains of the Carnatic.

Burke. On the Nabob of Arcot's Debts.

It is occasionally requisite that the object-end of the instrument be moved up and down as well as *horizontally* or equatorially.

Paley. Natural Theology, p. 84.

HORMINUM, in *Botany*, a genus of the class *Didynamia*, order *Gymnospermia*. Generic character: calyx two-lipped, aristate, the throat smooth; corolla, superior lip two-lobed, inferior three-lobed; segments nearly equal, (leaves radical.)

Three species, natives of Europe and Mexico.

HORN, *v.* Goth. *hauru*; A. S. *horn*; D. *horen*,
HORN, *n.* horn; Ger. *horn*; Sw. *horn*; usually
HO'RNED, derived from the Lat. *cornu*. But
HO'RNED, Wachter says that *fastigium vel sum-*
HO'RNED, *mitas cujuscunque rei*, the top or sum-
HO'RNED, mit, from *her*, (A. S. *heah*.) high, is
HO'RNIFY, the true meaning of the word, and the
HO'RNIFY, source of all its usages. The *horn* of
HO'RNISH, an animal,
HO'RNLESS, That which riseth, projecteth, is
HO'RNLET, prominent or eminent, *sc.* from its head.

A *horn*, to blow or sound, to drink out of, because first made of the *horn* of an animal.

Horn, the matter or substance of which *horns* consist. Also applied to

Any thing shaped like a *horn*.

To *horn*, *met.* to plant or bestow *horns*.

Oh have an *horne* and be haywarde. and ligger out a nyghtes.

Piers Plouhman. Vision, p. 76.

And I sigh a beeste styng up the see hauynge seuene heedis and ten *hornys*: and on hise *hornys* ten diademys.

Wiclif. Apocalips, ch. xiii.

And I saw a beaste rise out of the sea, hauing vii. heades, and x. *hornes*, & vpon hys *hornes* x. crownes.

Bible. Anno 1551.

Ther saw he hartes with hir *hornes* hie,
The greatest that were ever seen with eie.

Chaucer. The Fraunkleines Tale, v. 11503.

In Feuerier, whan the frosty moone
Was *horned*, full of Phebus fry light.

Id. The Floure of Curtesie, fol. 248.

These oxen drawe the great houses of the Moals: and their *hornes* are slender, long, streighte, and most sharpe pointed: insomuch that their owners are faine to cut off the endes of them.

Hakluyt. Voyages, &c. vol. i. fol. 116. The Tartars.

Death where is now thy styng? Hell where is thy victory? oh thou forlorne beast where be thy *v. hornes*? where is thy seculare swerde and arme? where be both thy *horned* seculare & spiritual powrs.

Joye. Exposition of Daniel, ch. vii.

No beast that hath *horns* hath upper teeth.

Bacon. Natural History, sec. 753.

LAM. Vnder your patience gentle Emprise,

'Tis thought you haue a goodly gift in *horning*.

Shakspeare. Titus Andronicus, fol. 37.

Like as a mastiffe having at a bay

A salvage bull, whose cruell *hornes* doe threat

Desperate daunger, if he them assay,

Traceth his ground, and round about doth beat,

To spy where he may some advantage get.

Spenser. Faerie Queene, book vi. can. 7.

And manie nymphes about them flocking round,

And many Tritons which their *hornes* did sound.

Id. Muopotmos.

These knights of Malta, but a handful to

Your armies, that drink rivers up, have stood

Your fury at the height, and with their crosses

Struck pale your *horned* moons.

Massinger. The Renegado, act ii. sc. 5.

My force the Erymanthean bore

Should brauely ouermatch.

The swift-foote golden *horned* stag

I, running, would orecatch.

Warner. Albion's England, book vii. ch. xxxv.

CORNEL. A — s' your poeticall veine: this versifying my wife has *hornified* me.

Beaumont and Fletcher. Four Playes in One.

Him thought, he by the Brook of Cherith stood

And saw the ravens with their *horny* beaks

Food to Elijah bringing even and morn,

Though ravenous.

Milton. Paradise Regained, book ii. l. 267.

— To the strong ram

Tie fast the rash offender. See, at first

His *horn'd* companion, fearful and amaz'd,

Still drag him trembling o'er the rugged ground.

Somerville. The Chase, book iv.

London a fruitful soil, yet never bore

So plentiful a crop of *horns* before.

Dryden. Prologues and Epilogues, ep. xliii.

Reach me the weapons of the shooting god,

Apollo's gift, the shafts, and *horny* bow;

With these he bad me drive the fiends away

When cruel they attack me.

Hughes. Orestes. Electra.

The ox is the only *horned* animal, in these islands, that will apply his strength to the service of mankind.

Pennant. British Zoology. The Ox.

The *horns*, or extremities of the bow, were two large tufts of cocoanut-trees; and much the greater part of the arch was covered with trees of different height, figure, and hue.

Cook. Voyages, vol. i. book i. ch. vii.

Even the *horns* of cattle are prohibited to be exported; and the two insignificant trades of the *horner* and comb-maker enjoy, in this respect, a monopoly against the graziers.

Smith. Wealth of Nations, book iv. ch. viii.

The cattle of the highlands of Scotland are exceedingly small, and many of them, males as well as females, are *hornless*.

Pennant. British Zoology. The Ox.

Wings embracing the keel and the *hornlets* of the awning.

Sir William Jones. Works, vol. v. p. 143. Botanical Observations on select Indian Plants.

In the eel, which was to work its head through sand and gravel, the roughest and harshest substances, there is placed before the eye, and at some distance from it, a transparent, *horny* convex case or covering, which, without obstructing the sight, defends the organ.

Paley. Natural Theology, ch. iii. p. 31

HORN, in Composition.

Heere wee haue no temple but the wood, no assembly but *horne-beasts*.

Shakspeare. As You Like It, fol. 198.

HORN.

PAOR. Yes, yes, he teaches boyes the *horne-booke*.
Shakspeare. *Love's Labour Lost*, fol. 136.

Mað franticke man,
That did not inlie quake:
With *horn-foote* horses, and brasse wheeles
Joue's stormes to emulate.
Hakewill. *Apologie*, book iii. ch. x. fol. 279.

Myne honours euer due, and euer gifts thou shalt haue good,
Hornfronted kyngly god, of westerne streames imperiall flood,
Be with vs, o this time, and al thy grace do prosper full.
Phaer. *Virgil. Æneidos*, book viii.

CORV. Beleeve it, I have no such humour, I.
All that I speak, I meane; yet I am not mad:
Not *horne-mad*, see you?
Ben Jonson. *The Fox*, act iii. sc. 7.

ORL. Vertue is no *horne-maker*: and my Rosalind is vertuous.
Shakspeare. *As You Like It*, fol. 201.

Before them yode a lustie tabrere,
That to the many a *horn-pype* play'd,
Whereto they dauncen eche one with his mayd.
Spenser. *Shepherd's Calendar*. May.

ITEM. What had she then? only a fit o' the mother!
They burnt old shoes, goose-feathers, assafœtida,
A few *horne-shavings*, with a bone or two,
And she is well againe, about the house.
Ben Jonson. *Magnetick Lady*, act v. sc. 1.

I come t' invite your ladship
To be a witnesse; I will be your partner,
And give it a *horne-spoone*, and a treene dish.
Id. *Ib.* act iv. sc. 8.

MOO. What meane you by that, Master Arthur?

JUS. I meane a child of the *horne-thumb*, a babe of booty, boy.
Id. *Bartholomew Fayre*, act ii. sc. 3.

Nothing that I know has been considered of this kind out of the
ordinary road of the *horn-book*, primer, psalter, Testament, and
Bible.
Locke. *Of Education*, sec. 157.

I must not pass over in silence a Lancashire *hornpipe*, by which I
would signify a young country lady, who with a great deal of mirth
and innocence diverted the company very agreeably.
Tatler, No. 157.

The bill, near an inch long, is dusky, lighter at the base of the under
mandible, and inclining to pink, the tip *horn-colour*.
Pennant. *British Zoology*. *Sclavonian Grebe*.

I would not, brother Toby, continued my father,—I declare I would
not have my head so full of curtains and *hornworks*.—I dare say you
would not, quoth Dr. Slop, interrupting him, and laughing most immoderately
at his pun.
Sterne. *Tristram Shandy*, vol. ii. ch. xii.

Brande in his *Pop. Ant.* (ii. 401.) gives several pages
“On the saying that the Husbands of false women wear
HORNS.” He appears to be very justly dissatisfied with
the many far-fetched explanations which have been at-
tempted, and which are not enough to the purpose to
be cited here. No other seems so little improbable as
that which refers it to a similar origin with the *digitus*
infamis of Classical Antiquity, the *Fico* of the modern
Italians, which we have already explained under FIG.
In Hogarth's print of the *Skimmington* in *Hudibras*,
and in that one of his Series of the *Industrious and Idle*
Apprentices, in which the latter is represented as going
on shipboard, the Horns are signified by throwing out
the little and fore fingers.

HORN Book is the Alphabet set in a frame and covered
with a thin plate of *horn* to prevent the injurious effects
of the much thumbing to which it was exposed. It is
now almost, if not quite, antiquated as an instrument of
elementary education.

HORN mad is said by Thomson (*Etymons*, ad v.) to
signify brain mad; and is deduced from Ger. *huarn*,

Dan. *hierne*, Sw. *hiern*. Teut. *hirn*, Sax. *hiernas*, Scot.
hern; all of which signify brain. It is more proba-
bly, according to the derivation of *horn* which we have
given above, *high-mad*, i. e. mad to a great height or
extent.

HORNSPIPE, of which we have already spoken briefly
under DANCING, is thus more fully explained by Sir
John Hawkins.

“That the Hornpipe was invented by the English,
seems to be generally agreed: that it was not unusual
to give to certain airs the names of the instruments on
which they were commonly played, may be instanced in
the word *Geig*, which, with a little variation, is made to
signify both a fiddle and the air called a *Jig*, and pro-
perly adapted to it. Indeed we have no such instru-
ment as the Hornpipe; but in Wales it is so common
that even the shepherd-boys play on it. In the Welsh
language it has the name of the *Pib-corn*, i. e. the *horn-*
pipe; and it is so called as consisting of a wooden pipe
with holes at stated distances, and a horn at each end;
the one to collect the wind blown into it by the mouth,
and the other to carry off the sounds as modulated by
the performer.” (*Hist. of Mus.* iv. 390.)

Mr. Daines Barrington, in like manner, in *Some Ac-*
count of two Musical Instruments used in Wales, ad-
dressed to the Society of Antiquaries, May 3, 1770,
describes “a very rude musical instrument which is
scarcely used in any other part of North Wales, except
the Isle of Anglesey, where it is called a *Pib-corn*, and
where Mr. Wynn, of Penhescedd, gives an annual prize
for the best performer. I heard, lately, one of the lads
(who had obtained this honour) play several tunes upon
this instrument. The tone, considering the materials
of which the *Pib-corn* is composed, is really very tole-
rable, and resembles an indifferent hautbois. As the
name of it signifies the Horn-pipe, (literally the Pipe-
horn,) I have little doubt but that the musical movement
which is thus called to this day, was, originally, made
for dances which were performed to this instrument.”
(*Archæologia*, iii. 33. where there is an engraving of
the *Pib-corn*.)

HORN thumb is explained by Mr. Gifford, in a note
on the passage cited above from Ben Jonson's *Bartho-*
lomew Fair, to mean a Pickpocket, as we now say, or
rather, as the profession was really practised in earlier
days, a cut-purse. The purse was generally hung at
the belt, and the ingenious thieves wore on their thumb
a thimble of *horn*, against which they cut with security.

A HORN work, in FORTIFICATION, is an outwork, com-
posed, as the name implies, of a front and two branches.

HORNIE is frequently used as a substantive by Burns,
and for very obvious reasons is a title appropriated to
the Evil Spirit.

HORN-BEAM. Perhaps, says Skinner, so called, a
corneâ duritie, from its *horny* hardness.

The trivial name of the *Carpinus betulus* of Linnæus.

The *horn-beam*, in Latine the *Carpinus*, is planted of sets; though
it may likewise be raised from the seeds, which being mature in
August should be sown in October.

Evelyn. *Sylva*, ch. xii. sec. 1.

With thee, where Easna's *horn-beam* grove
Its foliage o'er me interwove
Along the lonely path I've stray'd.

Scott. *Ode to Leisure*.

HORNERA, in Zoology, a genus of stony corals,
belonging to the family *Milleporidæ*, established by
Lamaroux.

HOR-
NERA.
—
HORO-
METRY.

Generic character. Coral stony, treelike, brittle, compressed, and irregularly twisted; the stem and branches are furnished with cells only on their outer face; cells small, far apart, and placed in a quincuncial order, the under side slightly grooved.

The type of the genus is *H. frondiculata*, Lamaroux, *Expos. Gén.* pl. lxxiv. fig. 7—9, the *Millepora frondiculata* of Linnæus, who says that it is found in the Southern Ocean. It is also found in the Mediterranean and the North Seas, as far North as Norway and Kamtschatka. The genus is named in honour of Dr. Horner, the astronomer to Dr. Krusenstern's expedition round the world, who first gave the specimen to Lamaroux.

HORNET, A. S. *hyrnet*, because, says Skinner, it bears or carries *horns* in its head.

Applied met. to those who sting like *hornets*.

The trivial name of the *Vespa crabro* of Linnæus.

When as those archers there in ambush laid,
Having their broad-side as they came along,
With their barb'd arrows the French horses paid,
And in their flanks like cruel *hornets* stung.

Drayton. *The Battle of Agincourt*.

Wasps use to build them nests on high, of earth and clay, and herein doe make their roomes and cells of wax. *Hornets*, in caves and holes under the ground.

Holland. *Plinie*, book xi. ch. xxi.

Hornets and wasps have strong jaws, toothed, wherewith they can dig into fruits, for their food; as also gnaw and scrape wood, whole mouthfuls of which they carry away to make their combs.

Derham. *Physico-Theology*, book iv. ch. xi. note 21.

He [Ambrose] heaps together thoughts and expressions, which are rather declamations than arguments, as Du Pin observes very fairly; and hints his dislike to such doctrines, though he dared not speak out, and provoke the *hornets*.

Jortin. *Remarks on Ecclesiastical History*, vol. ii. p. 333.

HORNSTEDTIA, in *Botany*, a genus of the class *Monandria*, order *Monogynia*, natural order *Scitamineæ*. *Generic character*: calyx two-cleft; corolla, tube long and slender; border double, the exterior three-parted; nectary tubular; capsule three-celled, oblong.

Two species, natives of the woods of Malacca.

HO'ROLOGE, } Fr. *horologe*; It. *orologio*; Lat.
HORO'LOGY. } *horologium*; Gr. ὥρολόγιον, from ὥρα, an hour, and λέγειν, to tell.

That which tells the *hour*; a dial, clock, watch, time-piece.

I, whom thou seest with *horyloge* in hande,
Am named Tyme, the lord of euery howre,
I shall in space destroy both see and lande.

Sir Thomas More. *Workes*, ch. iii. *The Seventh Pageant*. Tyme.

Before the fyre began, the Duke of Burgoyne caused an *horaloge* to be taken downe, y^e moost fayrest and goodlyest that coude be founde on that syde of the see; the whiche *horaloge* was taken downe by peces and layed in charres and the bell also; and after, it was caryed to Diyon in Burgoyne, and there it was sette vp, and there sowned the xxiiii. houres of y^e day and night.

Lord Berners. *Froissart*. *Cronycle*, vol. i. ch. 425.

[Anaximenes the Milesian] was the first that shewed in Lacedæmon the *horologe* or diall, which they call Sciolericon.

Holland. *Plinie*, book ii. ch. lxxvi.

He betaketh himselfe to the refreshing of his bodie, which is noted and set downe by the Greek letters of the diall (wherewith the Romane *horologies* were marked, as ours be with their numerall letters) whereby the time is described.

Holinshed. *Description of England*, ch. vii.

HOROMETRY, Gr. ὥρα, an hour, and μέτρο-ειν, to measure. The *measurement of hours*.

It is, I confess, no easie wonder how the *horometry* of antiquity discovered not this artifice (of wheels,) how Architas, that contrived the

moving dove, or rather the helicosophie of Archimedes, fell not upon this way.

Sir Thomas Brown. *Vulgar Errours*, book v. ch. xviii.

HO'ROSCOPE, } Gr. ὥροσκοπεῖον, from ὥρα, an
HO'ROSCOPER, } hour, and σκοπεῖν, *videre*, obser-
HO'ROSCOPY. } vare, to see, to observe. Applied
as the Fr. "*Horoscope*, the *horoscope*, or ascendant of a nativity; a diligent observation of the just time wherein one was born." Cotgrave.

Sometimes in the aspect of the stars at their nativity; which was called *horoscopy*, and esteemed a part of judicial astrology.

Hobbes. *Leviathan*, part i. ch. xii.

Augustus then anone conceived so greate a confidence in his fortunes, that he divulged his *horoscope*, and the ascendent of his natiuitie. (thema.)

Holland. *Suetonius*, fol. 82. *Augustus*.

He had been long towards mathematics,
Optics, philosophy, and statics,
Magic, *horoscopy*, astrology,
And was old dog at physiology.

Butler. *Hudibras*, part ii. can. 3.

The astrologers, *horoscopers*, and other such, are pleas'd to honour themselves with the title of Mathematicians.

Shaftesbury. *Advice to an Author*, part iii. sec. 1.

Under his eye the selfsame views combin'd
Our studies, and one *horoscope* conjoin'd.

Hart. *Macarius*; or, the Confessor.

The **HOROSCOPE**, as explained in the very words of a celebrated Astrologer himself, is as follows; *Illud temporis momentum quo quisque nascitur, sub quocunque signo oriente vel supra finitorem orientalem emergente, Genethliaci Græco vocabulo Horoscopum appellant, quasi horæ notationem et inspectionem, ea quippe hora quâ quis venit in lucem a Mathematicis plurimum observatur. Dicitur autem Horoscopus ab Hora et Scopos, quod idem est quod consideratio sive notatio et inspectio.* Gauricus, *Opera*, ii. 949. Perhaps no better English explanation of the term has been given than that which may be found in a note by Sheridan, in his *Translation of Persius*. "To give some little notion of the Ancients concerning Horoscopes. The *Ascendant* was understood to be that part of Heaven which arises in the East the moment of the Child's Birth. This, containing 30 Degrees, was called the *First House*; in this point the Astrologers observed the position of the celestial constellations, the Planets, and the Fixed Stars, placing the Planets and the Signs of the Zodiack in a *Figure*, which they divided into 12 Houses, representing the whole circumference of the Heaven. The first was *angulus Orientis*, showing the form and complexion of the child then born; and likewise the rest had their several significations, too long to be inserted here, because of no use in the least." (in *Sat.* v. 49.)

The two chief places in a Horoscope are termed the *Hyleg*, or Lord of Life, and the *Anareta*, or Destroyer of Life. The various qualities of the mind, Riches, Poverty, Rank, Marriage, Children, Travelling, Friendship, Professions, &c. all fall under the regulation of Genethliacal Astrology. The computations by which these contingencies are to be discovered, may be traced in the works of Ptolemy, Firmicus, Censorinus, Alchabitius, Junctinus, Marcolini da Forli, Cardan, Allæus, Chavigny, Guynaud, Kottero, the Collection of *Astrologica* by Camerarius, and in countless others; or with equal certainty in the more modern labours of Messrs. Sibly and Varley, in the *Astrologer of the XIXth Century*, (1825;) or yet later, in the *Manual of Astrology*, (1828,) by the same author. To such writers we must refer the inquisitive reader for details.

Suetonius tells us, in the passage which we have partly cited above from Holland's translation, that

HORO-
METRY.

HORO-
SCOPE.

HOROSCOPE.

HOROSCOPE.

Octavius, went to consult Theogenes, in his Observatory (*pergula*) at Apollonia. Agrippa was his only companion, to whom the Sage, having erected a figure, predicted such high and scarcely credible good fortune, that Octavius, not willing to find himself inferior, refused to furnish the requisite materials for his own Horoscope. Theogenes, however, at length prevailed, and when he viewed the configuration, immediately prostrated himself at the feet of the future Emperor; in consequence of which action, *tantam mox fiduciam fati Augustus habuit ut thema suum vulga verit, nummumque argenteum notâ Sideris Capricorni quo natus est percusserit.* Firmicus (*Mat. viii.*) has assured us that Capricorn in the Horoscope is an infallible sign of Regality. After all, from another passage in Suetonius, (*Oct. 5.*) which describes the nativity of Augustus as occurring a little before sunrise, *paulo ante solis exortum IX Kal. Octob.* at which time Capricorn could not be in the Horoscope, great doubt is thrown on the prognostic of Theogenes. Joseph Scaliger (*ad loc.*) cuts the knot by affirming that Augustus, in reality, was born at sunset. Perhaps, in point of fact, it matters little which was the hour.

This foolery has not been without a modern parallel. Even so late as the middle of the XVIIth century, when Campanella announced that at the birth of Louis XIV. the Sun was not distant from the Earth more than 55,000 leagues, Morinus presented the Horoscope of that Prince to Cardinal Richelieu. It was rectified by many other hands, and then stamped on a medal by order of the Government. This medal is engraved in his *Hist. de Louis le Grand*, (4.) by Menestrier, who thus describes it: *Cette médaille représente la disposition du ciel au point de la naissance du Roy le 5 de Septembre 1638, à onze heures 22 minutes avant midy. La France conduit le char du Soleil parce qu'il naquit au milieu des Victoires de son Père.* The courtly Jesuit might have added, that it was neither Apollo himself, nor even Phœbus, who was represented as sitting in the Car of Day, but in conformity with the legend, *Ortus Solis Gallici*, the infant Prince was the presiding charioteer. In more than one point—in the consequences of his ambition, as well as in his ambition itself—if we look to his after fortunes in war, did the *Grand Monarque* resemble the pseudo Phœbus.

The reader who seeks a refutation of the Horoscopers, either from the weight of authority or of reasoning, may turn to *Le Tombeau de l'Astrologie Judiciaire par le R. P. Jacques de Billy, Religieux de la Compagnie de Jésus*, 1657. In his 1st Chapter, the learned writer cites no less than sixteen of the Fathers against the pernicious Art of Astrology; and in his XVIth he argues upon the futility of divination by the 12 Houses, because it is highly improbable that all the myriads who perished in the Deluge should have been born under the same configuration of the Stars, which they manifestly ought to have been, in order to encounter a like fate; an argument in which he has been anticipated by Cicero, who, reasoning in a similar manner, asks *Quinesne qui Cannensi pugna ceciderint uno astro fuerint.* (*De Div. Exortus quidem omnium unus et idem fuit.*) (*De Div. ii. 47.*) De Billy refers to a *Life of Father Paul* for an amusing story of William Duke of Mantua, which, we think, he tells better even than it is given in the original. The Duke, who was "a fellow of infinite jest," *ch' alle cure gravi del governo fra metteva volentieri il piacere delle burle, e facette, temperando sapientemente le sue noie con detti e fatti gioviali e piacevoli*, employed Paul

carefully to note the Horoscope of a foal born in his stables, *volse che Frà Paolo stasse tutta una notte in quale s'aspettava, con i stromenti astronomichi, perche notasse, come fece l'horoscopo e'l ponto natale di quella bestia, il sito del cielo e la positura delle stelle.* (19.) This document was widely circulated among the Astrologers of the time, as that of a natural son of the Prince; and their replies were well adapted to the supposed child. By some he was destined to become a great Warrior, by others a learned Ecclesiastic. He was exalted to the Mitre, to the Cardinal's Cap, nay even to the Pontifical Chair; and it was not until he had fully satisfied his humour that the Prince divulged the secret.

De Billy's XIXth Chapter contains a long list of false predictions which have resulted from Horoscopes, and the whole Work concludes with an earnest prayer for such unhappy persons as may still pertinaciously adhere to a belief in the Stars: *Je prie Dieu qu'il vous esclaire et qu'il vous fasse connoistre l'abysme de vostre erreur.*

Our own times have given birth to an equally grave opponent of the Art. In 1803, (there is a much later edition also,) Mr. G. Beaumont published at Leeds a Pamphlet entitled *Fixed Stars, or an Analyzation and Refutation of Astrology*. The method of this profound writer may be determined from a single citation. "Astrology is opposed to the Bible, and the Bible to it; therefore, those who choose the one, must of necessity renounce the other: and I'll beg leave to add, what I believe but few will deny, namely, that those men amongst us who have been deepest in the Science of Astrology, and its counterpart, Magic, have generally carried about with them the visible curse of God, and their estates have frequently exhibited manifest tokens of their infernal profession, and the blasting breath of the Almighty's vengeance." (28.)

Sundry Horoscopes of the birthday of the Earth are given by Gauricus, (*Opera*, i. 636.) but unhappily since neither the year, the season, nor the hour of that event is determined, they exhibit considerable variation from each other. A subject, also, far too sacred for levity of comment, has been rashly implicated in these superstitious dreamings, and Cardan, among others, has cast the Horoscope of our Saviour, which he has erected on the midnight following the 25th of December. Naudé, in his *Judicium de Cardano*, remarks that Joseph Scaliger is unjust in considering that writer to be the first who indulged himself in this profane speculation. Though Naudé is plainly right in his defence, the eloquent words of Scaliger are worth citation. *Impiam dicam magis, an jocularum audaciam quæ et dominum stellarum stellis subjecerit, et natum eo tempore putârit quod adhuc in lite positum est, ut vanitas cum impietate certaret.* (*Proleg. ad Manil.*) Cardan had no less than four equally injudicious predecessors, Albumasar, Albertus Magnus, Petrus Alliacensis, (a Cardinal and Bishop of Cambray under the Pontificate of Martin V.,) and Tiberius Russilianus Sextus de Calabriâ, which last, in the time of Leo X., published three schemes of our blessed Lord's Nativity. Cardan, however, assuredly sought the not doubtful praise of this invention; for he carefully suppressed the names of those who had gone before him. The point is discussed at some length by Bayle, (*Cardan*), from whom we borrow the above information; and a yet graver refutation may be found in the very learned Tract by Selden, *Of the Birthday of our Saviour*. (sec. 5.)

Perhaps no better estimate of the emptiness of Haro-

HORO-
SCOPE.

Or for to shunne the *horrible* mischiefe,
With which he saw my cruell foes me pained,
And his pure streames with guiltles bloud oft stained.

Spenser. *The Ruins of Time*.

The *horribleness* of the mischief was such, as Pyrocles could not at
first believe his own senses, but bent his woful eyes to discern it
better.

Sidney. *Arcadia*, book iii.

And oftentimes great grones, and grievous stownds,
When too huge toile and labour them constraines;
And oftentimes loud strokes and ringing sowndes
From under that deepe rock most *horribly* reboundes.

Spenser. *Faerie Queene*, book iii. can. 3.

His haughtie helmet, *horrid* all with gold,
Both glorious brightness, and great terrour bredd.

Id. *Ib.* book i. can. 7.

Whence we saw
How *horridly* Charybdis' throat did draw
The brackish sea vp, which, when all abroad
She spit againe out.

Chapman. *Homer. Odyssey*, book xii. fol. 167.

When lo, each dreadful page appeared fill'd
With crouds of such transcendent prodigies,
As quite absolv'd from *Horridness's* guilt
Those fiends of which her regiments were built.

Beaumont. *Psyche*, can. 14. st. 168.

All objects of the senses, which are very offensive, doe cause the
spirits to retire; and upon their flight, the parts are (in some degree)
destitute; and so there is induced in them a trepidation and *horror*.

Bacon. *Natural History*, sec. 793.

By chance I heard
The song as of an angel in the yard;
A song that would have charm'd th' infernal Gods,
And banish'd *horror* from the dark abodes.

Dryden. *The Cock and the Fox*.

Swift in her walk, more swift her winged haste:
A monstrous phantom, *horrible* and vast;
As many plumes as raise her lofty flight,
So many piercing eyes enlarge her sight.

Id. *Virgil. Æneid*, book iv.

It [prayer] is a duty which we do so indispensably owe to God,
that we must be *horribly* injurious to Him, as well as to ourselves, if
we neglect it.

Sharpe. *Works*, vol. iv. *Sermon 2*.

Thus when black clouds draw down the labouring skies,
Ere yet abroad the winged thunder flies,
An *horrid* stillness first invades the ear,
And in that silence we the tempest fear.

Dryden. *Astræa Redux*.

He did not by any pretended prerogative excuse or protect them,
but delivered them up into the hands of that justice which the *horrid-*
ness of the fact did undoubtedly demerit.

Ludlow. *Memoirs*, vol. iii. p. 333. *Appendix*.

Strip from the branching Alps their piny load;
The huge encumbrance of *horrific* woods
From Asian Taurus, from Imaus stretch'd
Athwart the roving Tartar's sullen bounds.

Thomson. *Autumn*.

Consider now whether so dreadful a preparation for Christ's coming
to judgment be not one great reason why it should be called the ter-
ror of the Lord? for can any thing be imagined more full of *horror*
and amazement than to see the whole world in a flame about us.

Stillingfleet. *Sermon 11*. vol. i.

His populous towns
Pour'd out such troops perpetual, drest in arms,
Horrent in mail, and gay in spangled pride.

Watts. *Lyric Poems*, book ii. *Victory of the Poles*.

Yet Science, falsely so called, may be pernicious beyond any thing:
especially that *horrible* sort, which dissolves the ties of Religion and
Morals, and supplants the hopes of eternal happiness.

Secker. *Sermon 4*. vol. iv.

She is herself every whit as fond of powder, and tails, and hog's
lard, as he; to speak my secret sentiments, most reverent Fum, the
ladies here are *horribly* ugly.

Goldsmith. *Citizen of the World*, let. 3.

I fired them at the same time with general indignation against the
impudent attempts of the *horrid* Minotaur; for so I may well call
those combined adversaries of yours, Calvisius and Taurus.

Melmoth. *Cicero to Cornificius*, book xiii. let. 21

The Gin-alley is much superior, *horridly* fine, but disgusting.

Walpole. *Anecdotes of Painting*, vol. iv. p. 157.

Horror is that very strong and painful emotion, which is excited
by the view or contemplation of something peculiarly atrocious in the
conduct of another; by some vice which exceeds the usual extrava-
gance of vice; enormities that surpass the bounds of common de-
pravity.

H O R S E.

HORSE **HORSE, v.** } Of uncertain Etymology. A. S.
HORSE, n. } *hors.* *Belgis olim* (says Somner) *ors*,
HORSELY, } *horse, or hors; hodiè vero, r per meta-*
HORSEY. } *thesin transposito ros.* Ger. *ross*; Sw.
oers, hors; and Fr. *rosse*; It. *rozza*; Sp. *rozin*; a
horse of an inferior kind. Somner considers the A. S.
hors to mean *cornipes*, that which hath a hard or horn
hoof. Wachter derives the Ger. *ross* from the Ger.
verb *reiten, vehi*, (A. S. *rid-an, rit-an*, to ride.) And
hors, he thinks, may be the same word as *ross* (*per*
metathesis in ors.) or so called from its industry and speed.
That *hors* in A. S. had such signification he infers from
the compound *horslic*, which Somner interprets *gnavi-*
ter, diligenter, diligently, earnestly.

Horse is much used in Composition.

Here folc heo loren in þe se þorg tempest monyon,
Wat in batayle wat in se, & heore *horses* ney echon.
R. Gloucester, p. 50.

Sir Eýmer had inowe, þat *horsid* him ageýn,
Roberte's men þei slowe, þe numbres vncerteýn.
R. Brunne, p. 334.

It was on a day Edward þouht a wile,
He said he wild asaý þer *hors* alle in a mile.
Id. p. 219.

And the gostis that ben in heuene suiden him on white *horsis*
clothid with bissyn.
Wichf. Apocalips, ch. xix.

Gret was the prees, that swarmed to and fro
To gauren on this *hors* that stondeþ so:
For it so high was, and so brod and long,
So wel proportioned for to be strong,
Right as it were a stede of Lumbardie;
Therwith so *horsly*, and so quik of eye,
As it a gentil Poileis courser were.
Chaucer. The Squieres Tale, v. 10504.

The *hors* on whiche she rode was blacke,
All lene, and galled vpon the backe.
Gower. Conf. Am. book iv. fol. 70.

At the first metynge there was a sore iuste, and diuerse cast to the
enthe on bothe parties, for they wer all well *horsed*.
Lord Berners. Froissart. Cronycle, vol. i. ch. 211.

Here came men vnto vs euery day, more or lesse, but one day
especialy there came two men on *horse-backe*, whom we tooke to be
officers, being lusty men, and very well *horsed*.

stantinople.

Astonnied some the scathefull gift beheld,
Behight by vow vnto the chaste Minerve:
All wondring at the hugeness of the *horse*.
Surrey. Virgil. Æneis, book ii.

————— Ferraw doth guide
The chiefest flour, and the chief host of Spaine,
Well arm'd, well *hors'd*, well furnished beside.
Harrington. Orlando, book xiv. st. 14.

Like to the Thracian tyrant, who they say
Unto his *horses* gave his guests for meat,
Till he himselfe was made their greedie pray,
And torne in pieces by Alcides great.
Spenser. Faerie Queene, book v. can. 8.

Nor how th' halfe *horsy* people, Centaures hight,
Fought with the bloudie Lapithæes at bord.
Id. Virgil's Gnat.

The spirit *hors'd* him, like a sack,
Upon the vehicle his back,
And bore him headlong into th' hall
With some few rubs against the wall.
Butler. Hudibras, part iii. can. 1.

Fix'd on the goal his eye fore-runs the course,
His hand unerring steers the steady *horse*;
And now contracts or now extends the rein,
Observing still the foremost on the plain.
Pope. Homer. Iliad, book xxiii.

He too is witness, noblest of the train
That wait on man, the flight-performing *horse*;
With unsuspecting readiness he takes
His murd'rer on his back, and, push'd all day
With bleeding sides, and flanks, that heave for life,
To the far distant goal, arrives and dies.
Cowper. The Task, book vi.

HORSE, in Composition.

þider he seide he wolde hym self, þaȝ ne ne myȝte on fote go,
geþ any *horsbere* wolde hym bere, to wreke hym of ys fo.
Myd god wille he wende forþ in an *horse-bere*,
And ys folc forþ with hym, þat þe balder for hym were.
R. Gloucester, p. 163.

Eueriche of hem, did his businesse
On *horse-backe*.
Chaucer. The History of Thebes, fol. 373.

And am but her *horse-knaue*,
None other office I ne haue.
Gower. Conf. Am. book iv. fol. 71.

And often changing our *horses*, wee spared no *horse-fleshe*, but rode
swiftly and without intermission as fast as our *horses* could trot.
Hakluyt. Voyages, &c. vol. i. fol. 67. *The Tartars*

This water is ful of *hors-leches*, & bloud-suckers, & of precious
stones also.
Id. Ib. vol. ii. fol. 58. *Odoricus*.

Assone as the monkes were fallen, then sprang these begging fryers
out of hell, the last kynde of caterpillers, in a more vile apparell, and
a more strait religion, that (if ought of reliefe were left among the
laye men for poor people) these *horse-leeches* might sucke that also.
Tyndall. The Practise of Popishe Prelates, fol. 355.

When the king rideth abroad, he rideth with a great guard, and
many noblemen, oftentimes vpon an elephant with a fine castle vpon
him, very fairely gilded with golde; and sometimes vpon a great
frame like an *hors-litter*, which hath a little house vpon it covered
ouer head, but open on the sides.
Hakluyt. Voyages, &c. vol. ii. fol. 260. *M. Ralph Kitch*.

The Heluetians being puffed vp with the successe of this skirmish,
because that with five hundred *horsemen* they hadde geuen repulse
to so many of our *horsemen*, began to stay more boldly than they
were wonte.
Arthur Goldyng. Cesar. Commentaries, book i. fol. 11.

The fift being a ship about 1000 tunnes in burthen, laden with
iron-spikes, nailes, yron hoopes, *horse-shoes*, and other like necessa-
ries bound for the West Indies.

Hakluyt. Voyages, &c. vol. ii. part. ii. fol. 122. *Sir Francis Drake*.

Whan he had sayde his pleasure, he then cōmaundyd hir [Brune-
chield] to be boūdyn to a wyld *horse-tayle* by y* here of hir hed, &
so to be drawn whyle she were dede.

Fabyan. Chronicle, ch. 126.

Their *horse-trappers* were of blacke ueluet.
Hall. The second Yere of King Henry VIII.

The knight, as ye did see, on *horsebacke* was,
And this his ladie, that him ill became,
On her faire feet by his *horse-side* did pas
Through thicke and thinne, unfit for any dame.
Spenser. Faerie Queene, book vi. can. 2.

This sanguine coward, this bed-presser, this *horsback-breaker*, this
huge hill of flesh.

Shakspeare. Henry IV. First Part, fol. 57.

Therefore they covenanted that Eunones should fight the *horse-*
tattles, and the Romans should look to the besieging of their cities.
Usher. Annals. Anno Mundi 4050.

HORSE.

Now the number of *horse-boys*, and foot-boys, and of hangers on, and the tarpailians in the corn-ships, and others, he thinks to be greater rather than lesse, than that of the souldiers came unto.

Usher. Annals. Anno Mundi 3524.

SORD. You thread-bare, *horse-bread-eating* rascals, if you would needs have been meddling, could you not have untied it?

Ben Jonson. Every Man out of his Humour, act iii. sc. 8.

In the mean time, I wish we did more universally propagate the *horse-chess-nut*, which being easily increas'd from layers grows into a goodly standard, and bears a most glorious flower, even in our cold country.

Evelyn. Sylva, ch. vii. sec. 4.

Let her not live
To be the mistriss of a farmer's heir
And to be confin'd ever to a searge,
Far coarser than my *horse-cloth*.

And it is tried, that the great *horse-muscle* with the fine shell, that breedeth in ponds, hath bred within thirty years.

Bacon. Natural History, Cent. 9. sec. 875.

Alas! we ask not prodigies: we'd boast,
Had we but what is at one *horse-race* lost.

Cartwright. On the Imperfection of Christ Church Buildings.

And so are they deceived in the name of *horse-raddish*, *horse-mint*, bull-rush, and many more; conceiving therein some prenominal consideration; whereas indeed that expression is a Grecism; by the prefix of *hippos* and *bous*, that is, *horse* and *bull*, intending no more then great.

Sir Thomas Brown. Vulgar Errors, book ii. ch. vii.

Who, thinke you, will be content with a dictatorship of sixe moneths, or with an interreigne for five dayes and no more? Whom may a man boldly and confidently create dictator either to fasten a spike or great naile? or for the stately playes and games, or *horse-running*, and such like?

Holland. Livius, fol. 338.

Among Roman coins there [Camelot, South-cadbury] found, and other works of antiquity, Stow speaks of a silver *horse-shoe* there digged up in the memory of our fathers.

Drayton. Poly-olbion, song 4. note.

CEL. Yes, I thinke he is not a picke purse, nor a *horse-stealer*.

Shakspeare. As You Like It, fol. 199.

Not long after his brother David also is taken in Wales, and judged in England to an ignominious death; first drawn at a *horse-tail* about the city of Shrewsbury, then beheaded.

Baker. Edward I. Anno 1283.

The tombe, advanc't once, all the towne
In Jove nurst Priam's court partooke, a passing sumptuous feast,
And so *horse-taming* Hector's rites, gave up his soule to rest.

Chapman. Homer. Iliad, book xxiv. fol. 341.

The *horse-trick* comes the nearest.

Lys. Thou say'st true, i' faith,
They must be *horsed* indeed, else there's no keeping them,
And *horse-play* at fourscore is not so ready.

MAST. Look you, here's your worship's *horse-trick*, sir.

[Gives a spring.]

Massinger. The Old Law, act iii. sc. 2.

At the making of this statute [24 Henry VIII. cap. 5.] there was a question amongst the lawyers, in case one man should kill another, that attempted feloniously to rob or murder him, in or near any common high-way, court-way, *horse-way*, or foot-way, or in his mansion, messuage, or dwelling place; whether, for the death of such a man, one shall forfeit his goods and chattels, as a man should do for killing another by chance-medley, or in his own defence?

Hobbes. Dialogue on the Common Laws of England.

But there is another sort of coire cables (as they are called) that are black and more strong and lasting; and are made of strings that grow, like *horse-hair*, at the heads of certain trees, almost like the coco-nut tree.

Dampier. Voyages, Anno 1686.

HORSE.

HORSE. In the surf of the sea, close by the shore, you find abundance of shell-fish, called by the English *horse-hoofs*, because the under part or belly of the fish is flat, and somewhat resembling that figure in shape and magnitude. *Dampier. Voyages, Anno 1675.*

The *horse-laugh*, or the *Sardonick*, is made use of with great success in all kinds of disputation. *The Guardian, No. 29.*

Sir Leonard Dacre being called upon by them, repaired unto the Earl of Northumberland to know his pleasure herein; either that his men might receive wages, or to be told what way might be taken with the creditors for victuals and *horse-meat*.

Strype. Memorials. Queen Mary, Anno 1557.

Besides that, he is too much given to *horse-play* in his raillery; and comes to battle like a dictatour from the plough.

Dryden. Preface to Fables.

But by reason that it is always a *horse-quarter* in the winter season, who use great licence, it is so poor, that those good houses have only walls.

Clarendon. History of the Rebellion, book xv. vol. iii. p. 645.

On the 4th of this instant, May, a great *horse-rider*, named Sir James Granado, rid before the king and queen in the privy-garden; but the bridle bit breaking, his horse ran away and threw him against the wall, whereby he brake his neck, and his brains were dashed out.

Strype. Memorials. Queen Mary, Anno 1557.

All the apparatus of science was furnished in as great plenty and perfection out of the dogmatick and polemick magazines, the old *horse-armoury* of the schoolmen, among whom the Rev. Dr. Ball was bred, as they can be supplied from the new arsenal at Hackney.

Burke. Appeal from the New to the Old Whigs.

Body little bigger than a *horse-bean*, almost round.

Pennant. British Zoology. Cancer Crab.

The *horse-bridge* over the Trent, adjoining to Heywood, was not less remarkable, for I remember it to have consisted of two and forty arches; but the number at present is much lessened.

Id. Journey from Chester, p. 90.

The earliest imports were salt, earthen ware, and works in brass, polished bits of bones, emulating ivory, *horse-collars*, toys of amber and glasses, and other articles of the same material.

Id. London, p. 7.

Thus highwayman, woodman, and *horse-courser*, require an explanation; but of thief-like, or coach-driver, no notice was needed, because the primitives contain the meaning of the compounds.

Johnson. Preface to the English Dictionary.

But while the builder, the draper, the tailor, the butcher, the baker, and the Chandler, remain unpaid, the jockey and the *horse-dealer*, the mistress and the brother-gamster, receive ready money with ostentatious profusion.

Knox. Essays, No. 97.

[The magazines of coal] give to their poor good fuel, instead of the wretched substitute of *horse-dung*, which they collect in scanty portions for that purpose.

Pennant. Journey from Chester.

Horse-faced sylvans, apes, fish, and a variety of birds.

They produced an heir, who took after his mother in his great love to good eating, and his father in a violent affection for *horse-flesh*.

Goldsmith. Citizen of the World, let. 31.

One of my tenants so much neglected his own interest, as to supply me, in a whole summer, with only two *horse-flies*, and those of little more than the common size.

Johnson. The Rambler, No. 82.

Some were sow-gelders and some *horse-gelders*, with tinkers and cobblers.

Pennant. London, p. 339.

Being by the Duke of Monmouth opposed in his pretensions to the post troop of *horse-guards*, he, in return, made Monmouth suspected to the Duke of York.

Johnson. Life of Sheffield Duke of Buckinghamshire.

"What! has she married her *horse-keeper*?" "Yes, madam," replied my Lord Burleigh, "and she says your majesty would like to do so too."—Leicester was master of the *horse*.

Walpole. Anecdotes of Painting, vol. i. p. 226.

The considerate reader must obviously have stared on being informed that such a term and such a trade had been extant in 1464, but his wonder would have ceased, had he been convinced as I am, that in a public part of Bristol, full in sight of every passer by, was a sadler's shop, over which was inscribed A or B, (no matter which) *horse-milliner*. On the outside of one of the windows of the same operator, stood

VOL. XXIII.

(and I suppose yet stands) a wooden *horse* dressed out with ribbons, to explain the nature of *horse-millinery*.

Chatterton. Balade of Charitie, Note by Stevens.

Yes, I shall remember the *horse-pond* as long as I live; I have caught my death in it.

Goldsmith. She Stoops to Conquer, act v.

Philip Earl of Pembroke, an half length, a complete contrast to his brother William, was rude, reprobate, boisterous and devoted to his dogs and *horses*: so mean as to receive tamely a *horse-whipping* from one Ramsay, a Scotchman, at a public *horse-race*.

Pennant. Journey from Chester, p. 312.

"The gentleman, indeed!" replied the pettifogger, "a pretty gentleman, truly! Why, he's the bastard of a fellow who was hanged for *horse-stealing*."

Fielding. The History of a Foundling, book viii. ch. viii.

In many cases of simple larceny the benefit of clergy is taken away by statute: as for *horse-stealing* in the principals, and accessories both before and after the fact.

Blackstone. Commentaries, book iv. ch. xvii.

It was said at table, that the modern Aristophanes (so Foote was called) had been *horse-whipped* by a Dublin apothecary, for mimicking him on the stage.

Murphy. On the Life, &c. of Dr. Johnson.

If the little Mogul affect spirit, then he talks in his ire of *horse-whips*, kicking down stairs, breaking every bone in the skin of the wretched operator.

Knox. The Spirit of Despotism, sec. 24.

An inquiry into the origin of HORSEMANSHIP appears to be a very idle pursuit, since, like most other beginnings, the commencement of this Art is lost in obscurity. Blundevili, a writer whom we shall presently have occasion to mention more at length, tells us in his preliminary "Examples from Gryson. This Bellerophon, as some men say, was the first that invented riding on Horseback. And the Pelitrons, a people of Lapithia, found out afterward ye maner of bridles, bittes, and ringes to guide Horses withall. But they of Thessalia were the first that used the service of Horses in the wars; which, as Gryson sayeth, procedeth of a judgement no less profitable than devine."

In a similar strain proceed most of the other writers on Inventions. Polydore Vergil, with much gravity, cites Horace in favour of Bellerophon, and Diodorus Siculus Virgil and Lucan in behalf of Neptune, and he recounts the legend of Erichthonius, apparently with but little misgiving as to its truth. The Centaurs also claim their share; and the single commentary of the learned Archdeacon upon these marvels is couched in the following words: *vera sunt igitur extra omnem controversiam, ut etiam Lactantius loquitur, quæ loquuntur Poetæ; sed figmento aliquo specieque velata. (De Inv. rer. ii. 12.)*

Without pursuing this solemn trifling to a greater extent than it merits, it may be sufficient to state that Horsemen are mentioned in the Funeral procession of Jacob, (*Genesis*, ch. l. v. 9.) and in the army with which Pharaoh chased the Israelites on their departure from Egypt. (*Exodus*, ch. xiv. v. 9.) The word used in the first instance is unequivocal, פרשים, equites, and its radix

פרק, dilaceravit, implies, perhaps, the use of spurs. In the second instance, כל-סוסים רכב, omnis equitatus et currus as it is rendered, the conjunction is not found in the original; and סוסים is rather equus than equitatus. It is doubtful, therefore, whether the words should be understood Horsemen and Chariots, Horses and Chariots, or Horse-Chariots.

The warriors of Homer engage from Chariots not on Horseback, and there is no instance in which he represents them as mounted in battle; yet Diomedes and Ulysses, in their night expedition, plainly, returned to the

Silence of Homer.

HORSE-
MANSHIP.

camp on the Horses of Rhesus, and the latter plied his bow vigorously in lieu of a switch. They had not time to carry off the Chariot with them, and the Poet does not notice their backing the Horses as a new or extraordinary occurrence. (*Il. K. 513.*) Vaulting on Horses (*κελητιζέειν*) is also mentioned by Homer as a feat of agility which attracted the admiration of crowds, *Λαοφύρον καθ' ὁδόν*, (*O. 679.*) and it is evident that this is an exhibition which is not likely to occur until the generality of people are acquainted with the practice of common riding. Lastly, the shipwrecked Ulysses, in words which cannot be mistaken, bestrides a log in the attitude of a man on Horseback :

Ἀμφ' ἐνὶ δούρατι βαίνει, κέλῃθ' ὡς Ἴππον ἱλαύνων.

Od. E. 371.

Saddles.

Of the many nations mentioned by Herodotus, few seem to have been unacquainted with the Art of Riding. At first it is probable that the bare back was the only seat; but the use of some covering must soon have been prompted by convenience, till a complete saddle was generated; and he must have been brave, indeed, who ever trusted himself to the will of so fiery an animal as an untamed Horse, without the power of correcting him by some kind of bridle. The progress of these inventions and of other Horse-accoutrements is discussed with his usual copiousness by Beckman. (*History of Inventions*, ii. 247.) He thinks it probable that saddles, properly speaking, had their birth in the middle of the IVth century; and that the *στράματα*, *strata*, *stragula*, and *ephippia*, of which such frequent mention occurs in writers of an earlier date, were no more than cloths and coverlids. A passage is cited by him from the *Codex Theodosianus*, (viii. 5. 47.) containing an order from the Emperor who framed it, issued in the year 385, prohibiting such as used *sellæ* from employing any which weighed more than sixty pounds. These cumbrous machines must have been the elements of our present saddles. Leo I., in the following century, forbade the use of pearls, emeralds, and hyacinths on saddles; (*Codex Justin.* xi. 11.) a sumptuary law, which shows the rapid progress of luxury in their decoration.

Stirrups.

The antiquity of stirrups has employed much time and labour. Beckman cites no less than sixteen principal writers from whom information on this subject may be gained. He contends that stirrups were wholly unknown to the Ancients, and that they are nowhere mentioned before the occurrence of the word *σκάλαι*, in the *Ars Militaris*, attributed to the Emperor Maurice in the VIth century; *staffa*, *stapia*, *staphium*, *stapha*, *stapedium*, *stapeda*, and *stapes* (all words of the same family) are the coinage of modern Latinity; *scansuæ*, *scandilia*, *astraba*, *tabella*, *ἀναβολεύς* and *ἐγκεντρίς*, are of equally late origin.

Shoes.

Shoes are considered by Beckman to be no less modern; although both the Greeks and Romans occasionally employed some protection for their Horses' hoofs, which he inclines to think was a sort of boot. He finds no certain trace of the existence of our present shoes till the mention of *πεδίκλα σελεναία σιδήρα* in the *Tactica* of the Emperor Leo, a Work of the IXth century. But we do not think his arguments on this point have so much strength as those which he uses concerning saddles and stirrups. He by no means explains satisfactorily, according to his own theory, the statement of Suetonius, (30.) that the Mules of Nero were shod with silver, nor the similar account of Pliny, (xxxiii. 10.) that Poppæa, the consort of the same Imperial monster,

employed gold for a like purpose. It is difficult to conceive that such shoes as these were of other than the modern fashion.

HORSE-
MANSHIP.

Beckman's account of these matters abounds with information and entertainment, and the reader cannot do better than consult it in detail. A Chapter in Pancirollus (ii. 16.) has afforded him many of his materials. The last-named writer cites an amusing anecdote from the *Carolus Magnus redivivus* of Stukius, (p. 40.) in order to show that stirrups were not always in use, even so late as in the reign of Charlemagne. That Monarch had advanced a certain Priest to a Bishopric, and the Ecclesiastic, overjoyed at his preferment, vaulted at one jump upon his Horse, in order to go and take possession of his See,—*absque scamno sive suppedaneo, uno impetu, alacriter in equum insiluit*. The Emperor observing his agility, called him back, and having praised his Horsemanship, said he was too active a man to be lost to the field, that he must serve him in battle, and leave the management of his flock to some more weak and ignoble spirit. It appears that for the purpose of mounting, stone steps were placed at intervals by the Roman Commissioners of Highways (*Viocuri*) as carefully as milestones themselves.

Anecdote of
Charle-
magne.

A dissertation by M. le Beaux in vol. xxxix. of the *Mémoires de l'Académie des Inscriptions*, (529.) *sur la Légion Romaine, de l'équipement du Cavalier légionnaire, et de la fourniture des habits*, offers some additional particulars respecting early Horsemanship; and the *Shoeing of Horses amongst the Ancients* has been discussed with much research by the indefatigable Pegge, in a Paper in the *Archæologia*. (iii. 39.) In the *Encyclopédie Méthodique, Histoire II., ad v. Equitation*, may be found a very lengthy Paper on the antiquity of Horsemanship, which is principally directed against an argument by M. Freret, in the *Mémoires de l'Académie des Inscriptions*, (vii. 286.) who maintains that the Art of Riding was unknown to the Greeks before the Trojan War.

Xenophon is the earliest writer on Horsemanship who has descended to us. In his Treatise ΠΕΡΙ ΙΠΠΙΚΗΣ he professes to instruct his younger friends in such rules as were familiar to himself from very long experience. He refers to a Work which had preceded him by Simon, who had dedicated, in the *Eleusinium* at Athens, a brazen Horse, upon the base of which he had sculptured his own actions. Pausanias does not mention this statue, deterred, probably, by the dream which he tells us induced him to forbear from detailing the wonders of that mystic Temple; (i. 14.) but there can be little doubt that the Artist named by Xenophon is the same Simon of Ægina, whose Olympic Horse is noticed, together with the "wondrous steed" of Phormis, of whose qualities we have already spoken at sufficient length, under the head HIPPOMANES. It does not seem that we are deprived of any information in consequence of the loss of Simon's Work. Xenophon avows that his pride in agreeing with so skilful an equestrian, induces him to retain in his own pages all passages which may excite attention and demand belief by resting on such high authority; and he undertakes, moreover, to supply from himself whatever his predecessor may appear to have omitted.

Xenophon,
de Equitatu.Treatise by
Simon.

He begins wisely by cautions to a purchaser, teaching him how to avoid being taken in,—*ὥς ἂν τις ἥκιστα ἐξαπατωτο ἐν ἱππωνείᾳ*—and his directions appear to be very sound. Thus he recommends especial attention to the legs and hoofs, and names many points of a

Xenophon's
instructions
to a pur-
chaser.

HORSEMANSHIP. Horse in which the modern jockeys will accord with him. He then touches upon the duties of the Horse-breaker, at the same time expressly stating that he considers this craft unworthy close attention from a liberal youth, who should rather employ himself in learning how to manage a Horse than in teaching a Horse how to be managed. The few precepts which he gives for this purpose are distinguished by their humanity. The colt is to be trained to know and love his master by gentleness, and especial pains are to be taken to indulge him with all which may gratify sight and feeling, and to secure him from the inroads of sudden alarm. Next, reverting to the selection of a Horse, Xenophon marks the teeth as a sure criterion of age. The qualities which it is most necessary should be inquired into are tractability in admitting the rider to bridle and mount him, tenderness of mouth, obedience to whip and spur, and readiness in paces. We must not omit that, throughout, it is military Horsemanship to which the writer's views are directed. The Horse is a War-horse; the rider is an armed soldier. Instructions are next given for stabling, feeding, and exercise; and a passage occurs distinctly proving that the Greek Horses at this time were not shod. It is recommended that an outer court should be strewn with four or five waggon loads of small round stones, confined by an iron rim; so that by constant treading upon these, the hoofs may acquire necessary hardness. The duties of a Groom are to know how to fasten the Horse properly to his manger, to keep the stalls clean, to curry the body and wash the head, tail, and mane. The legs are not to be washed, from a belief that damp softens the hoofs, and also that it is so much labour lost, for that they soon become dirty again. Hand-rubbing is recommended, and thought sufficient, ἀρκεῖ ἡ τῶν σκελῶν ψῆξις αὐταῖς ταῖς χερσὶ γιγνομένη. A very salutary caution follows, to beware of the heels in cleaning; and then a golden precept, never on any occasion to deal angrily with a Horse; τὸ δὲ μή ποτε σὺν ὀργῇ τῷ ἵππῳ προσφέρεσθαι, ἐν τούτῳ καὶ δίδαγμα καὶ ἐθισμα πρὸς ἵππον, ἀριστον. ἀπρονόητον γὰρ ἡ ὀργή, ὥστε πολλάκις ἐξεργάζεται ὦν μεταμελεῖν ἀνάγκη. Thus a Horse is to be led up gently to any object which startles him; and the rider himself will do well to handle it before him. Blows are carefully to be avoided on such occasions, for the Horse always attributes its ill usage to the object by which it was terrified, and feels an increase of fear accordingly.

Mounting. Directions for mounting follow next. The Horseman is first to gather the lower part of the reins with his left hand, the upper part, with a portion of the mane, is to be grasped with his right, and then taking great care that he does not jerk the Horse's mouth by the suddenness of his motion, he is to vault at once into his seat. Such is the manner in which also the *Rutuli* of *Virgil* prepare for the field:

*corpora saltu
Subjiciunt in equos.*

Æn. xii. 288.

It will be right if he accustoms himself to do this on either side, for in battle on many occasions he may find this change very useful. Sometimes the rider assists himself by his spear, ἀπὸ δόρατος ἀναπηδᾷ, (7. 1.) a mode of expression which must be carefully distinguished from ἐξ ὀρν. The latter only means that he mounts from the right, from the *spear side*: Winckelman has illustrated the former from a Gem, in the Collection of the Baron Stosch, in which the right foot of a soldier, while

mounting, rests on a sort of cramp-iron, affixed to the body of his spear, which raises him to the height of the Horse's knee. (*Monum. ined. 202.*) The seat when gained, whether it be on the bare back or on the saddle, *ἐάν τε ἐπὶ ψιλοῦ, εἴαν τε ἐπὶ τῇ ἐφιππίῳ*, is to be sufficiently erect, the thighs grasping the body of the Horse firmly, the legs, from the knees downwards, playing somewhat loosely. In order to teach a Horse to leap, he should be led up to a ditch, which the rider, dismounted, and keeping the halter in his hand, should himself first jump over; and here, if the Horse refuses, Xenophon permits a sound application of the whip by some one behind. As soon as the Horse feels it he will be sure to leap over a much broader space than is necessary, and he will ever afterwards do the same if he knows that any body is behind him. When the rider is on his back he should always employ the spur at a leap, *παισάτω τῷ μύῳπι*, as a safeguard against leaping short. In leaping upwards the rider is permitted to lay hold of the mane, and in a down leap he should throw himself as much as possible backwards. In order to obtain a good seat he is *not to be blamed* if he sometimes goes out Hunting, *ἄμεμπτος ἢ ἐν θήρῃσι μελέτη τῆς ἱππικῆς*; and an assiduous exercise in sham-fighting on Horseback is strenuously recommended.

The management of a fiery and high-couraged Horse is next briefly taught; how to soothe and how to animate him, *τῷ πομπυσμῷ μὲν πρᾶννεσθαι, κλωσμῷ δὲ ἐγείρεσθαι*, a language even now equally in use for like purposes; what bits are fittest, and what is the proper management of each sort. Then follow instructions for the best exhibition of a Horse in public spectacles and triumphant shows; such Horses as Gods and Heroes are sculptured on. Dexterity in rearing appears to be considered the highest excellence in an animal trained for these pomps; and the passage which describes this quality is written with such infinite fire and spirit, so entirely *con amore*, that it would be unjust to present it in any other than the original terms: οὕτω δὲ καὶ ἔστιν ὁ μετεωρίζων ἑαυτὸν ἵππος σφόδρα ἢ καλὸν, ἢ θαυμαστὸν, ἢ αγαστὸν, ὥς πάντων τῶν ὀρώντων καὶ νέων καὶ γεραιτέρων τὰ ὄμματα κατέχει· ἔδεις γοῦν ἢ τε ἀπολείπει αὐτὸν, ἢ τε ἀπαγορεύει θεώμενος, ἔστ' ἂν περ ἐπιδεικνύηται τὴν λαμπρότητα. Who, in these words, does not acknowledge the firm and graceful seat of the writer, and almost hear the shouts of his admiring Citizens, as he reins some mettled courser amid their ranks in the splendour of the Panathenaic procession?

The concluding Chapter is occupied with a description of the armour which is necessary both for the Horseman and his Horse, and upon this, as it does not bear upon our present purpose, we forbear to dwell. For the same reason we shall speak but briefly of another Tract, believed to have been addressed by Xenophon to his son Gryllus, *ἹΠΠΑΡΙΚΟΣ*; which is, in truth, nothing more than a manual for a cavalry officer. In this Work he more than once expresses a strong and very natural aversion against kicking Horses, which he recommends should be carefully drafted out of every troop. He repeats also his instructions for hardening the hoofs by exercise on stones. The remainder is mostly filled with directions for the performance of military duties, and its chief interest, exclusive of the curiosity of the subject, arises from the fervent air of piety which it breathes: ταῦτα δὲ πάντα Θεῶν συνεθελόντων γένοιτ' ἂν, is in different forms the perpetually recurring burden; and the Tract concludes with an advice, that reference

HORSE-
MANSHIP.

should be made to Heaven at all seasons; not only when necessity compels us to solicit its assistance; but in those more prosperous moments in which our prayers and offerings are the result of a disinterested gratitude for the bounty of Providence.

No Roman writer on the Art of Horsemanship, if any such ever existed, has descended to us. The Treatises of Columella and Vegetius are confined to Hippiatrics. The breeding and training of Horses must have been studied practically to a great extent by the warlike Barbarians who overthrew the Empire of the West; and among the chief duties of Chivalry must have been the care and guidance of that animal, from which the Institution derived its name. But whatever knowledge was attained in those days has perished with them; and we must pass on to Italy, as late as the XVIth century, before we discover any additional writings on Horsemanship. Of the date of the earliest modern Work we cannot speak with precision, but it must have appeared at the beginning of that century, and it issued from Naples, which was at that time the chief School of European Horsemanship. It is entitled *Gli ordini di cavalcare di Federigo Grisone, Gentil 'huomo Napolitano*; and the greater portion of it soon appeared in an English dress, under which form we shall most conveniently notice it.

Grisone.

Blundevill.

Thomas Blundevill, of Newton Flatman in Norfolk, who wrote in the reign of Elizabeth, addressed his Work, *A new Booke containing the Arte of ryding and breakinge great Horses, together with the Shapes and Figures of many and divers kyndes of Byttes, mete to serve divers mouthes, very necessary for all Gentlemen, Souldyours, Servingmen, and for any man that delighteth in a Horse*, to the Earl of Leicester, who at that time was "Master of the Queenes Highnes Horses." It was his first intention to have translated the Italian work of Gryson, which we have just mentioned, but he found it so full of "doubtful phrases," and "so confuse an order of writing," (which, as he tells us afterwards in his Preface, was "ynough to confound the memory of a very discrete reader," Gryson "being in dede a farre better doer than a writer,") that he determined in the end upon composing a fresh Treatise of his own. He afterwards published nearly the same Work under the title of *The Four Chiefest Offices belonging to Horsemanship*; but neither this Work, nor that which we have before mentioned, bear any date in the first impressions.

Two classes
of Horses.

Horses, says Blundevill, may be divided into two classes, "Horses of service, or els Horses of pleasure, called Styrrers:" the chief points in the first are "to trot clean and lustely, to stoppe lightly, to turn on both handes redely, to gallop strongly, to manegge with single turn surely, and last of all to passe a carrer swiftly. And in all his doings from the begining to thending, to reane well, and to beare his head stedely. All which things are also common to the Styrrer. But then it is requisite that the Styrrer besydes all this, learne to bounde a lofte with all foure, and to yarken withall, to gallop the gallop gallyard, to fetch the Capriole, to daunce the Corvetti, and such like kind of saults." Of this knowledge the English, it appears, had great lack, as is clearly demonstrated by the description which follows, of "a Muster when the Queenes Majesty hath nede of Hors and Horsemen; where oftymes you shall see some that sit on their Horses like wind-shaken redes, handling their hands and legs, like weavours. Or if the Horsemen be good, then the

Ignorance
of the Eng-
lish.

Hors for hys parte shall be so evel broken, as when he is spurrd to go forward, he shall go backward. And when his ryder shall have him to turn on the right hande he will turn cleane contrary. And when he should stop, he will arme him selfe and runne away, or els stoppe sooner than his rider woulde have him, or use such like toyes."

HORSE-
MANSHIP

Such laxity, it must be confessed, required discipline, and Blundevill addressed himself to the task with the help of Gryson, and of his "deare frende M. John Astely, (perhaps an ancestor of the great Equestrian of our own days,) Master of the Queenes Majesties Jewell House," who had brought two Horses, "and specially that whiche he calleth his Balle," to very extraordinary perfection.

We shall not stop long upon the preliminary advice regarding the choice of a Horse, which is partly founded on the fashionable doctrine of the day, as to the four Elements. A Horse that hath more of the Earth than of the rest is melancholy, heavy, and fainthearted, and of colour, a black, a russett, a bright or dark brown. If he have more of the Water, he is flegmatique, slow, dull, and apt to lose flesh, and of colour most commonly milk-white. If of the Air, then he is sanguine, and therefore pleasant, nimble, and of a temperate moving, and of colour most commonly a bay. And, "if of the Fier, then he is cholorique, and therefore light, whot, and fiery, a sterer, and seldom of any great strength, and is wont to be of coulour a bright sorel." Those which possess a gracious and justly proportioned admixture of all four Elements are mostly "a browne baye, a duple graye, a blacke full of sylver heares, a blacke lyke a moore, or a fayre rone, which kindes of Horses are most commendable, most temperate, strongest, and of gentlest nature." (i. 1.)

Elementary
characters.

Blundevill, we regret to state, differs widely from Xenophon in temper. His first step when bringing a Horse to the block, that he may stand still to be mounted, is full of severity. If he hesitates, "then al to rate him with a terrible voyce, and beate him your selfe with a good sticke upon the head, between the eares, not leaving him until you have made him to come to the blocke, whether he wil or not." (i. 4.)

Severity of
training.

A good seat is thus described. "See that you doe not onely sit him boldly and without feare, but also conceyve with youre selfe that he and you doe make as it were but one body, and that you both have but one sence and one will; and accompanye him with your bodye in any movynge that he maketh, alwayes beholding his heade right betwixte his eares, so as your nose maye directly aunswere his foretop. Which shal be a signe unto you to know therby whether you sit right in your sadell or not, and whether your horse beareth his head right or not; and let the ridge bone of your back be even with his; and let youre lefte hande holdinge the reanes of the bridell be even with his creast, and in any wise kepe your thighes and knees close to the sadell, holdinge downe your legges straight, like as when you are on foote. And let your feete rest uppon the stirrups in their due places, both hele and toe standing in such sort, as when you shal tourne your head as farre as you can on the one side, without movinge your bodye, and lokinge downwarde to your stirrup you shal perceyve that your toe doeth directly aunswere the tip of your nose. And accordinge as the sadell is made so shal you ride him longe or shorte. But alwayes let your right stirrup be shorter than the other by halfe a

Seat.

HORSE- whole, (hole) and kepe your stirrup leather alwayes
MANSHIP. under your knees." (i. 5.)

Qualifica-
tions of a
Horseman.

It seems that Grisone had laid down three things requisite to make a perfect Horseman, "besides the helpe of a good constellacion enclinyng you to followe continuallye with a fervent zeale the scoole of Mars." These are, "1st, to knowe howe and when to helpe your Horse; 2dly, howe and when to correct him; and 3dly, howe and when to coye him, and to make muche of hym." Accordingly Blundevill expatiates upon these three things more particularly, and proceeds to show that "you may helpe your Horse vii maner of wayes. That is to say with your voice, with your tong, with your rod, with the bridel, with the caulfes of youre legs, with your stirrup, and with youre spurres. Againe you may correct him vii maner of wayes, that is to say, with your voice, rod, cauffes of your legges, bridle, stirrup, spurres, and with treading the ringe in such sort as shal be hereafter expressed. But you can cherishe or coye him no more but ii maner of ways, that is to saye, eyther with your voyce in speakinge to hym gently, or else by scratching him on the necke with your hand, or with the nether ende of the rodde." (i. 6.)

How to rate
a Horse.

We by no means intend to follow this writer through all his details. It may suffice to touch upon a few of the more prominent particulars. Thus we are told that "the wand or rod serveth to correct the disordering of his head, and to drive shrewed toyes out of his minde. The spurres do not only make him stedy and just, but also subiecte and quicke to understand his rider's mind." If you rate him with the voice, it should be done terribly, "saiyng to him, Ah traitor! ah villain! tourne here, stop there, and such like." In helping him you are to use milder tones, saying, "Hey, hey; or nowe, nowe," or "Backe, hoye, backe I say;" or else, cheerfully, "Hup, hup; or hoyse, hoyse." The following passage satisfactorily explains the ποπυσμός and κλώσμος of Xenophon, the meaning of which we by no means, however, suspect Blundevill of having learned from the Greek. He directs the use of "that sound which you commonly make by tourninge up the topp of your tonge, almoste into the midde palet of youre mouthe, and then sodenlie loosen it againe from thence with a chicke. There is also another sounde of the lippes. and that is made by closinge your lips hard together, and then in opening them again somewhat wide, to yelde a certain sounde, pronouncinge as it were this woorde *poughe*." (i. 8.)

How to
cheer him.

Use of the
spurs.

We have already mentioned Blundevill as an advocate for strict discipline. He seems aware that objections are sometimes raised against severity, and therefore in his Chapter, "Of the Rod," he takes pains to assure us that "with a stubborne Horse it hath no felowe." So, too, in the 13th, "Of the Spur," he objects to those who have forborne the use of this instrument till the Horses are at such an advanced age, that "so soone as they feele it they will leape and flynge and take on like Sprites." Neither is this movement to be wondered at if we take into consideration the nature of one of the spurrings which he has already described in Chapter 2: "You must sticke your Horse in the spurring place iii or iiii times together with one leg after another, so fast as youre legges may walk, which kind of strokes Grisone calleth *Botti roris pondenti*, (we have hunted in vain in Grisone to ascertain what are the real Italian words,) but in our tounge, me think it was not amisse to call it the bouchinge stroke, because your legs must goe like ii bouching betles. Or else the clinching stroke,

fetching a similitude from the botewrightes, whose hammers when they clinche ye nayles do answere one another."

HORSE-
MANSHIP

The Martingal, we are told, was first invented by Evangelista, "an excellent ryder, and a great Horse-master of Myllan. . . . yet Grison semeth not greatly to allow it;" and with this information the 1st Book concludes.

The Mar-
tingal.

The IId Book chiefly concerns the Horse's lessons. A Horse is on an average supposed to continue in his goodness from six years to fifteen. His whole course of education, as may readily be imagined from our preceding extracts, is one of suffering. Thus in order that he may learn to perform his turns well, you are to "helpe him continuallye wyth youre spurres, beatyng hym therewith in such sorte that he may have bloody sides by the girthes, and though he seameth as then to care but little for it, yet in riding him againe the nexte daye folowinge, when his sides shall be sore by meanes of the former prickes, being then colde and tender, and not whote, as they were the day before, you shal see that the spurre wil quicken him after an other sort, and make him to remember wherfore he was last corrected." (ii. 17.)

Spurs again.

The Italians under their term *maneggiare** embrace four kinds of exercise, the last only of which is understood by the English *managing*, namely, galloping and turning to and fro on the same path. The *capriol* and the *corvet*, which belong especially to the trained Horse, are thus explained at length. "*Capra*, in Latin or Italion, is a beast whyche wee call a Goat. Which beast beinge dysposed to playe, useth in his runninge a prety kinde of jumpinge and doublyng with hys legges above grounde, making a certaine semblaunce of yarking, and yet yarketh not in dede. Whiche kinde of saulte or leape, because the Italions have not onelye counterfitted in their dauncyng, but also have taught their Horses to imetate the same, (for when the Horse boundeth alofte he must advance his rompe, and make as though he would yarke and yet do not,) it is called, therefore, by the name of *capriole*, which if you will in English you may tearme the Goate's leape. But, forasmuch as Goates be not everywhere to represente that kinde of leape, I woulde wishe you therefore, for youre better understandinge, sometyme to beholde our little lambes, whilst they runne and playe together, and you shall see them livelye to do the same. The *Corvet* is a certaine continuall prauncyng and dauncyng uppe and downe still in one place, and sometime sydleyng to and fro, wherin the Horse maketh as though he woulde faine runne and cannot be suffred. The name is derived of this Spanyshe woorde *Corva*, whyche is as muche as to saye as thelbowe, or hynder heele of the Horse, because in doinge this feate, he doeth laboure muche upon his hinde legges." (ii. 28.)

Manege.

A capriol.

Curvet.

The IIId Book treats of the correction of a Horse's vices and the different kinds of Bits. From the following passage in Chapter 7, we probably obtain an explanation of a homely expression even now in common use: "If your Horse in his going listeth up one eare and holdeth downe the other, and fareth as though there were a *fley* in that eare, then I advise you take hede to youre selfe; for most commonlye when he doeth so, he mindeth to play you some shrewed toye,

Flea in the
ear.

* The English *manege* or *manage* is borrowed exactly from the French, and that again from the Italian *maneggio*, which by some is traced to the Latin *manu agendo*.

HORSE-
MANSHIP.Cures for
restiveness.

as to plunge alofte, to run overthwarte, or to fal downe, or to do some like desperate acte. Wherefore sodenlye interrupt him of his purpose, by geving him two or thre strokes with the contrary spur on the contrary side to that eare which he most moveth."

For restiveness, when a Horse refuses to move, there are many corrections. We begin with those of a comparatively milder nature. Ride your Horse into a long close lane in which he cannot get out at the sides, "but at the one end thereof cause certayne men to stand behinde your Horse with staves and stones in their handes. And if he wil not go forward, then let theym sodenlye strike him with their staves upon his hams and legges behinde, and likewise whorle their stones at the same places, al to rating him in that same instant with a terrible voice. During which time you your selfe must sit stil, keping silence. And let them not cease beating and crying out unto him until they have made him to go orderly forward as he should do. Which when he doth then immediatly let them stay both hand (and) voyce, and make you much of him by clawinge him on the necke . . . and to thintent he may be the sooner and the more thoroughly corrected of this vice, you may besides all this tey a good longe corde unto his taile, winding it about, like as you do when you trim your Horse's taile with a ribbon or lace, the last knot whereof woulde be fastned together with some of the heares, for feare of slippinge, which knotte if you can not make, then teye the upper ende of the corde unto the hinder buckle of the saddle, saving the croper, and so it shall not slippe awaye. The nether ende of which corde must hange downe and traile after the Horse upon the ground, and when your Horse will not go forward or goeth backward, let one of the footmen pulle the corde harde unto him, which when the Horse feleth, the feare to be pulled and hayled will make him to spring forward. And so doing the footman must in the self same instaunt let go the corde; and, to be sure, besides the pulling of the corde let the rest of the footmen also al to rate the Horse with their voyces, laying on with their staves and whorlinge their stones, and by using him thus a while you shal correct him of this vice well enough." (iii. 10.)

Other
corrections.

This was the ordinary discipline; for extraordinary occasions there were remedies of a more powerful description. "Other corrections to be used agaynst restiveness, when the rider lacketh art, and knoweth not by order of ridinge howe to gette the masterye of his Horse, and to make him to know his fault, Chap. 12. Let a footman stand behind you with a shrewed Catte teyed at the one ende of a long pole, with her belye upward, so as shee maye have her mouth and clawes at liberty. And when your Horse doth stay or go backward, let him thrust the Catte betwixt his thyes so as shee may scratch and bite him, sometime by the thighes, sometime by the rompe. But let the footman and al the standers by threaten the Horse with a terrible noyse, and you shall see it will make him goe as you would have him. And in so doing be ready to make much of him. Also the shirle crye of a hedgehog beinge strait teyed by the foote under the Horse's taile is a remedye of like force, which was proved by Maister Vincentio Respino, a Napolytan, who corrected by this meanes an old restive Horse of ye Kinges in such sort as he had much a do afterwarde to kepe him from the contrarye vice of running away. The like correction also may be geven with a whelp or some other loud

cryinge and biting beast being teyed to the crooper, so as he may hange downe under the Horse's taile having a longe corde fastned unto him. Which corde passynge betweene the Horse's thyes, the rider shall hold in his right hand to molest the Horse therewith, by pulling it and letting it go again, as he shall see it nedefull. Or in stede of such a beast there may be teyed a peece of iron of a foote in length, or more, and three fingers broade, made full of pryckes like thornes, with a cord fastned thereunto as before. But note that all these wayes rehearsed are not to be commonly used but onely in time of nede, and that with greate discretion. For otherwise you shall but amaze youre Horse and drive him into dispaire so as he shall never understande your meaning." The Chapter concludes with a correction so mischievously cruel, and so ludicrously inadequate to its object, that were it not for the impenetrable gravity with which Blundevill is encased, we should suspect that he was slily amusing himself with his readers, and writing, by anticipation, in the lighter strain of his great successor, Geoffry Gambado.

A piece of advice which follows in the next Chapter (iii. 13.) is not likely to be thrown away, and, indeed, as we imagine, spontaneously suggests itself to most Horsemen. "If you chaunce then upon a Horse accustomed to run away when he should stoppe, you must beginne to ride hym with more respecte than you woulde do a colte." If he will not stop, you are advised as before, to plant a footman at the end of his course with "a cogell to give him a good blow upon the snoute," and "stones in his hand to whorle" at him; but for a directly opposite purpose, namely, to check not to excite him. "Or if you wil, you may cause ii footmen to stande before him, eche of them havinge a good long staffe in his hand; at the upper ende wherof woulde be teyed a little boundell of streawe, whiche beinge kindled, let the footmenne when the Horse will not stoppe, thrust them into his nose, the feare of the flame whereof flashinge before hys eyes, and the fier perching his skinne, together with the smoke entring into his nose, wil make him to stoppe."

Cudgels and staves are also of great use to correct a Horse who has a trick of lying down with his rider on his back. In this case the footmen are to take heed "to fray him with a terrible voice, jesture, countenance, and by cruelly loking him alwaies in ye face, more or les according as time and occasion shall require;"—moreover, they are "to holde him up whether he will or not, cruelly correcting him both with their voices and also with their staves, by beating him upon the head betwyxt the eares or upon any part of his bodye next to hande. And if this do not correcte his vice, truelye the fault is in the footmen lacking perhaps such terrible voyces, cruell lookes, and gestures, and such order and tyme of correcting as should serve the purpose. And, therefore, it were good for such menne to have in their handes fiery staves made in such sort as is before declared in the last Chapter save one, the feare and smart wherof will keepe him from lying downe, whether he will or not, which correction maye bee used for a restive Horse, by fyinge hym behinde betwyxt the thighes."

There are Horses, however, who choose to lie down in a yet worse manner than on dry land, namely, in passing through water; and we are assured in Chapter 16, that "this vyce undoubtedly proceedeth of a natural disposition incident to that Horse which is foled under the signe of Leo, whiche is a hote and fiery signe. Albeit

HORSE
MANSHIP.For a run-
away Horse.For a Horse
which lies
down.

In the water.

HORSEMANSHIP. all Horses foled under this signe have not this fault in dede; neythar can it be knowen by the Ostriche feather in the Horse's necke; nor yet certaynely discerned at the chaunging of his teeth, what so ever other men say, but only by his plaine liying downe in the water. For the which fault there is no better remedy than this here folowing. Cause a servaunte to ride him into some river or water not over depe, (in this instance Blundevill is careful to recommend a proxy as the Horseman,) and appoint ii other footmen with cogels in their hands to folow him hard at the heles into the water, to thintent that when the Horse beginneth to lie down, they may be readye to leape upon him, and with the helpe of the rider to force him to ducke his heade downe under the water, so as the water may enter into his eares. Not suffringe him to lift up his head again of a good while together, but make him by main force to kepe it still under, continuallie beateinge him all ye while with their cogels and rating him with loude and terrible voyces. That done let him onely lift up his head to take breath and aire. During which time cease not also to beat him still upon the heade betwixte the eares; which done, ducke his head with like violence once again into the water. And then let him rise up upon his fete. And whilst he is passing through the water let the men folow after, beating him and rating him al the way, until he be clean out of the water, and then leave. For otherwise it were disorder. Then ye next day folowing let him be ridden againe into the same water. And so sone as his rider seeth that the Horse maketh any offer to lie downe, yea and sometime before he perceyveth it, let him immediatly prevent him of his purpose by touching him with his spurres and by beateinge him upon the head betwixt ye eares and upon ye flank with his stick, threatning him with a terrible voice. And you shall see it will make him forget his lying downe and to passe through quickly." (iii. 16.)

For a fearful Horse.

After these fearful schoolings, the reader may be surprised to meet with a precept more in accordance with the milder doctrines of Xenophon, and couched almost, indeed, in his very words. If a young Horse should start at some new object, "see that in no wise ye do beate him for the same, lest he take the thinge which he beholdeth and shoneth to be the cause of his smart, and so become more fearful than he was before." Another mode of increasing the general courage of a Horse requires the use of a little simple machinery. "It is good for a certayne dayes to let him weare such a whurlguigge as children run withal against the winde, made like windmill sayles, fastned to hys headstal, upon his foretop, or on ye one side of his head under his eare. For besides that the swift turning about therof before his eies doth helpe much to assure him, the whitenes also of the same whilst it turneth about doth take awaye those impressions of shadowes from his sight, whiche before were wont to fraye him." This whirlingig, as we are told afterwards, may be of any colour, "blacke, redde, yealow, or blewe, according as you shall thinke it most nedeful for the assuring of your Horse." But it should in no wise be continued if, as seems not improbable, it makes him worse rather than better.

Bitts.

Here we must leave Blundevill, for we cannot follow him through his labyrinth "of the kindes of bittes together with their names and partes belonging to the same," notwithstanding the many Plates with which he has illustrated this portion of his very amusing Volume. A

few of the terms, which probably are now forgotten, **HORSEMANSHIP** may be presented as a specimen.—Bits are close or open; open Bits are sometimes called Port Bits. Of these Ports, some are whole, some are broken. Of the broken Ports some are fashioned like geese necks, and they be round; some like cats' feet, and they be square. Both close and open Bits are named according to their fashion, as Canon Bits, Scaches, Melon Bits, Campanel or Bel Bits, and Bastonets; and the parts of these are cheeks, eyes, gyves, rolls, rings, and buttons, the whole port, the broken port or upset mouth, with one plight within another, or with piece, the trench, the flap, the top roll, the water chain, the nether chains, and the kurble, "and divers other termes belonging to their art, not here nedfull to be rehearsed." (23.)

The next Work in order of time with which we meet, **Baret's Hip-ponomie.** is *An Hipponomie, or the Vineyard of Horsemanship, &c.* by Michaell Baret, *Practitioner and Professor of the same Art*, 1618. This author, in his Preface, protests against any mean opinion which may be formed of his Work, on account of his residence at Holland, in Lincolnshire, a country of no esteem for Horsemanship, and his education, in not having been brought up among Horsemen. The first objection he combats by arguing that Lincolnshire *may* produce just as good riders as Yorkshire; the second by pleading experience, and the anxious desire of a whole life to gain information. His Work is framed with strict regard to rule, and much in a scholastic form. Thus he begins by definition:—"I will (so well as I can) define what a true-going Horse is, that you may better conceive when you have gotten the period of your desire. Therefore a true and well going Horse is a certaine free and easie obedience in his going, not onely of the will and appetite but also of the body, with a durable and comely carriage of the same and neate handling of the other members." (i. 4.) A large portion of the Ist Book is dedicated to the Morals of Horsemanship, whereby a Rider is taught to regulate his Will and Passions. One Chapter (10.) directs a Horseman that he "should not be fierce or angry;" another (11.) that he "should be loving and gentle." Nevertheless, though recommending lenity, he enjoins the man, in his affection for his Horse, always to be ruled by Reason, and to discipline him into obedience. Among the directions for obtaining a good seat, is one not "to carry his legs out staring like stilts without joynts, as Saint George painted on Horsebacke, before his Horse's fore shoulder." Another, that he is to bear "his shoulders straight, not lurking downe as if he were to carry a jackanapes;" again, "to keepe his hands so stayed that they flye not up and downe as birds wings doe;" and, contrary to Blundevill, Baret recommends an even length for both stirrups, founding his position on the Geometrical Axiom, "Put even things to uneven, and that which remaineth (the whole) will be uneven."

A true going Horse.

In Chapter 38, Baret describes at some length the qualities of good and bad shape in a Horse. In the first, **Shape of a Horse.** "his ribbes should bear out in rotundity like a barrell, his short ribbes being close shut up to his huckle bone, within the compasse of foure fingers, with a proportionable long buttocke, although he be a little high rump, if he be well let downe from the outside of his huckle bone, it would fall perpendicularly upon the outside of the brawne of his thighe; and as for his fillet if he have these two properties, aforesaid, it must necessarily follow to be good, to the which if he have a broad

HORSE-
MANSHIP.

breast, then he must upon necessity be well let downe in the chest, for it is a granted request in Geometry, if equall things be put to equall, that which remaineth will be equall." For the second, the animal which he describes, is such as it has scarcely entered into the wildest imagination of man to conceive. "And for the other sort of Horses whose shape is in another kinde, being *adversa*, for if it were *contraria*, then it should be a monster cleane degenerating from Nature, if they be flat ribd, weake fillited, being very spacious betwixt the short ribs and the huckle bone, pinne rumpt, thin in the gasking place, narrow breasted, shallow chested, short necked, thicke crested, cubbe headed, it being stuntly set on, bangle eard, narrow jawed, pincke eyed, thin faced, little nostrelles, and a narrow mouth, or if his body and all his other parts be thicke and strongly set together, then may the man imagine that he is of a sad and dogged disposition."

The Ist Book "of the Theorick Part" proceeds very much by Simile and Allegory; and, as we have shown above by reference to Geometry, the IId Book "of the Practicke Part" is largely aided by Logic, and the precepts are occasionally moulded in the direct form of Syllogisms. The following is a specimen of the figure *Celarent*.

Syllogisms.

"Nothing that doth tend to violence doth worke according to the true Art of Horsemanship.

"But all hard Cavezans, Bittes, and Snaffles doe tend to violence.

"*Ergo* no hard Cavezans, Bittes, and Snaffles doe tend to the true Art of Horsemanship."

In this the major and the minor are both proved from Aristotle's Ethics. (iii. 1.)

Again we meet with an example in *Darii*.

"Whatsoever things will reforme any one evill quality in all Horses, will reforme all evil qualities in any one Horse.

"But this Head-straine and trench (in their right uses) will reforme any one evill quality in all Horses.

"*Ergo* this Head-straine and trench (in their right uses) will reforme all evil qualities in any one Horse."

Dedications.

The Ist Book is dedicated to King James, and the Author, probably, has adapted his style to the taste of his Patron, for we have seldom toiled through pages more encumbered with unnecessary display of learning. The IId is inscribed to Thomas (Dove) Lord Bishop of Peterborough, and the Author thinks it necessary to apologize for prefixing the name of one whose calling is "seraphicall," to a Work which treats of things animal, by showing that God originally gave all creatures to the service of man, and therefore that the Prelate, "descending from that Stocke which received that prerogative, may lawfully use them by an hereditary succession, and not any way violate your calling." The Patron of the IIIId Book is Sir Francis Fayers; it was to have borne the name of Sir Anthony Mildemay if he had lived, but "fatall and inevitable-death prevented," and "Horses themselves may with *Æthon*, the Horse of Pallantis, (*Pallas*), as Virgill recordeth, poure forth teares for loosing such a worthy maister." This Book contains the application of the Precepts of the first two to Hunting and Running Horses, and from it, in conclusion, we must extract a single passage as a choice specimen of the Author's manner.

Rates of
speed.

"I will now prove my former assertion that a Horse which runneth hot at hand, but will not hold it, cannot be truely said to be of such speed as another Horse

that is not altogether so speedy as the first, but yet durable.

HORSE-
MANSHIP

"For instance, take a number, as 20, and divide it first into two equal parts, as 10 and 10, and let that bee supposed the rough or whole runing Course; then take the same number againe and divide it into two unequal parts, as 15 and 5, and let that be imagined the hot runing Horse. Now multiply 10 by 10, and the product will bee 100; then multiply 15 by 5, and that product will arise but to 75; and yet you see that 15 and 5 added together maketh 20, as well as 10 and 10 maketh 20, although the product of that is not so great as the product of this by 25. And the reason is that the difference of the excesse from 10, which is the meane, (being 5,) is not multiplyed equally in itselfe: for 5 being the multiplier, multiply 10 by 5, and it yeeldeth 50, and multiply 5 by 5 because it is the excesse and it produceth 25, which being added to 50, maketh 75 as afore: but multiply 5 again by itselfe and it bringeth 25 more, which being added to 75 maketh 100, answerable to the product of 10 and 10; so that you see though 15 is more than 10 and hath the vantage at the first, yet 5 is lesse than the other 10 by the square of 5, which is the excesse, and so looseth that advantage by the quantity of the square of the excesse as is demonstrated.

"Even so the whole runing Horse (though not altogether so speedy at the first) holdeth his speed from the first to the last, whereby there is no losse, but produceth the best advantage, as it doth being multiplyed in itselfe, but the unequall or false runing Horse, although he have the advantage at the first, as 15 hath of 10 to the outward sense, and so may holde it halfe the Course, nay it may be $\frac{3}{4}$ as to 75, yet by reason that his runing tended not to the meane, but to the excesse, he will loose that advantage at the latter end, in as much as he hath a less proportion of strength and winde to maintaine him at the last, and so the further he runneth the more he setleth, as the last 5 doth of the last 10. Whereby it is playne that long and true training doth not pull a Horse from his speed, but rather increases it, although he runne not so violently fast at the first as hee did, seeing true and whole runing Horses are to bee accompted the swiftest Horses, and do worse the other, which rested to be proved."

We come next to an elaborate production, the folio of Salomon de la Broue, *Escuyer d'Escuirie du Roy*, (Henri IV.) *et de Monseigneur Le Due d'Espéron*, *Le Cavalerie François*, 1602.* This Work is composed in a very grave and dignified style. Each of its Books is introduced by recommendatory sonnets and stanzas, and preceding the Ist is a Preliminary Discourse, *Sur le Devvoir de l'Escuyer de Grande Ecurie*, from which it may plainly be discovered that the Sieur de la Broue conceived no other office to be equally solemn, exalted, and important. The precepts in the main Volume are chiefly derived from De la Broue's Master, Pignatelli of Naples, than whom, at that time, none stood higher in esteem. All the young Nobles of France and Germany thronged to his Lessons.

De la Broue

This Work was followed by another, remarkable for the beauty of its Engravings, *Manceige Royale où l'on pouvait remarquer le défaut et la perfection du Cheva-*

Pluvinel.

* There is an earlier edition of this Work, but not so complete, printed at La Rochelle, 1593, 1594, under the title *Préceptes que les bons cavaliers François doivent observer*.

HORSE-
MANSHIP. *lier, en tous les exercices de cet Art digne des Princes, fait et pratiqué en l'instruction du Roy. (Louis XIII.) Par Antoine Pluvinel, son Escuyer Principal, Conseiller en son Conseil d'Estat, son Chambellan ordinaire et sous Gouverneur de sa Majesté. Le tout gravé et représenté en grandes figures de taille douce par Crispian de Pas, Flamand à l'honneur du Roy et à la Mémoire de M. de Pluvinel. Paris, 1624.** The letter-press consists of conversations, in which the King, MM. Le Grand, and Pluvinel are interlocutors. The King inquires, and Pluvinel conveys precepts on Horsemanship; and without this Royal desire for information, such was the reserved disposition of the Chief Esquire, if we may judge from the following passage, that all his learning would have been lost to posterity. *Sire, le commandement et la louable curiosité de Vostre Majesté, sera la seule cause que le public par aventure profitera de ce que j'ay à luy représenter en peu de mots, n'estant de mon humeur ne de ce dessein de parler beaucoup, croyant que l'homme a pour le moins autant de mérite à mettre judicieusement le silence en usage, qu'à parler et discourir vainement à tous propos; car tel sçait parler qu'il ne sçait pas taire. (31.)* In the second interview, *Sa Majesté commence de monter à Cheval* and receives instructions *pour courir la bague*. But the chief interest of the Work consists in its finely executed illustrative Plates. All the processes of the Manege are represented in them, and the King himself is, for the most part, the chief performer. The Book has been several times reprinted.

René de
Menou.

The system of Pluvinel was strongly advocated a few years after the last-described publication in *La Pratique du Cavalier, par René de Menou, Seigneur de Charnizay, Gentilhomme Tourangeau, 1629.* This Work contains a few plain rules for the Manege.

But the chief place, in Works on Horsemanship, is generally accorded to that which we are next about to mention.

Duke of
Newcastle.

William Cavendish, successively Earl, Marquess, and Duke of Newcastle, during his tedious exile, published at Antwerp, in 1658, a magnificent folio, *Méthode et Invention Nouvelle de dresser les Chevaux*. Only fifty copies of this Work were printed for presentation, and the plates were then destroyed, so that it is now a rare treasure in Bibliography. Such is the statement of M. de la Guerinière, (*Ecole de Cavalerie, 61.*) but a somewhat different account is given by Brunet in his *Manuel du Libraire*. He mentions that the rarity of this Volume arises from the greater part of the copies having been burned accidentally in a Bookseller's warehouse. The date of the Work in the *printed* title, which is sometimes wanting, and which ought to follow the engraved title, is MDCLVII, to which I have been added by a pen. The Work contains a frontispiece and 42 well-executed Plates. It was reprinted by Brindley in 1737, and a translation of it, by the same, in 1743, in two Volumes folio. Lord Orford, who indulges in much unmerited sarcasm against the Duke, states that this Work was originally written in English, and translated into French by a Walloon. (*Royal and Noble Authors, iii. 180. Park's Ed.*)

The character which Lord Clarendon has given of the Duke of Newcastle, is in the highest degree favourable. As far as relates to the subject before us, he states that

“he was a very fine Gentleman, and most accomplished in those qualities of Horsemanship, Dancing, and Fencing, which accompany good breeding, in which his delight was. (book viii.) Later Writers have endeavoured to detract from this eulogy. Warburton, with much causticity, terms him “a poor fantastic General,” and “a fantastical virtuoso on Horseback;” (*Notes on Clarendon, vol. iv. 422. 512. Ed. 1826.*) and in other places speaks slightly both of his principles and his abilities.

The Duke, in his Dedication to his Pupil, (he was Governor to Charles II. when Prince of Wales,) reminds him that he was the first who placed his Majesty on Horseback, and adds, that such was the Royal precocity that, at between nine and ten years of age, the young Prince had attained the most firm and beautiful seat which ever was beheld, and managed a Horse through all his airs and paces with the greatest address and judgment. *Votre Majesté monta deux chevaux dispos Desperato et Balot, quoyque très-rebours, avec tant de bonne grace, d'aire et de justesse, que les meilleurs Cavaliers qui étoient d'auprès d'elle, et la regardoient avec admiration, en étoient tous étonnés. Quelques-un qui étoient là, et qui avoient appris aux Académies étrangères, eussent été, sinon tout à fait, au moins presque jettés par terre par les mesmes chevaux. Le Roy, votre Pere, de glorieuse mémoire, disoit, qu'il n'avoit jamais vu aucun de votre âge, qui vous approchat de bien loin à monter à cheval; (Sa Majesté étoit très-capable d'en juger;) il disoit qu'il cherchoit quelque faute mais qu'il n'en pouvoit trouver.* Having thus praised the King, he proceeds to eulogize Horses; assuring Charles that a Monarch never is accompanied with so much majesty even upon his throne as upon the back of a handsome Horse; and in a strain of very Courtly allegory he goes on to show, that he who is the best Horseman will infallibly be the best political Governor; for that he will know how to ride his People, not putting them out of breath so that they may turn restive and take the bridle in their teeth; nor allowing others to mount them, but reserving them for the Royal saddle only. *La République, n'ayant qu'un corps, elle ne doit avoir qu'une paire d'éperons, et qui doivent être ceux de votre Majesté, contre lesquels ils ne se rebelleront jamais, mais obéiront toujours, et les prendront pour une Aide plutôt que pour un Châtiment.* This was a doctrine which, it may be thought, had been experimentally disproved both to the Duke and to his Pupil.

Every page of this costly Volume breathes the Writer's fervent devotion to his Art. He warns his sons to study his precepts because Man is most manly when on Horseback; and he assures all the *honorable Cavaliers et très-excellens Cavallerizzes*, to whom he addresses himself in general, that such is the necessity of application to it, that if two youths of equal abilities should be sent at the same time, the one to the Schools and the other to the Riding-house, the first would become a sound Philosopher before the second was even a moderate Horseman.

The system pursued by the Duke is one of much gentleness. A maxim, of which he expresses high approbation in the outset, is, that the Art is intended *pour mettre un Cheval à la raison*; and he holds that, even in punishing a Horse, a good rider ought to consider himself *comme une espèce de Divinité au dessus de luy*.

The Plates of this Volume are very interesting. On one of the first the Duke himself is represented mounted

* This is the second Edition, the first was published in the preceding year. We notice that of 1624, because it is that Edition which we have consulted.

HORSE-
MANSHIP.

on Pegasus, who is performing a lofty capriole in mid air, and vehemently jerking out behind. Below is a semicircle of eleven Horses, each on his haunches, and with the fore feet elevated as if in deep obeisance. Above is seated the full conclave of Olympus; and in one corner two Cupids bear a scroll with the following legend.

*Il monte avec la main, les éperons et gaulle,
Le Cheval de Pégase qui volle en Capriole;
Il monte si haut qu'il touche de sa teste les Cieux,
Et par ses merveilles ravit en extases les Dieux.
Les Chevaux corruptibles qui là bas sur terre sont
En courbettes, demi-airs, terre à terre, vont;
Avec humilité, soumission et bassesse,
L'adorer comme Dieu, et auteur de leur adresse.*

In another Plate we find his Grace seated in a triumphal car, drawn by two Centaurs, one of whom bears his armour; nineteen surrounding Steeds are paying reverence on their knees. In those which represent the several lessons, the Marquess is on foot, standing or seated, giving his instructions to mounted Scholars; or *le Capitaine Mazin*, his Esquire, is on foot, and the Marquess on Horseback. The background of the Plates, occasionally, is formed by a view of some seat of the Noble Writer. Thus we have Welbeck in Nottinghamshire, with its superb Riding-house, 120 feet by 40, and the magnificent stables, in which the roof, pavement, stalls, and mangers were of stone; along the latter ran a perpetual stream of fresh water from a fountain, and little chimneys above each rack, with valves which opened and shut at pleasure, regulated the temperature. In others we are presented with Bolsover in Derbyshire, while the Marquess curvets, demivolts, caprioles, or performs groupades and ballotades in front. Both these princely Mansions are well known in History from the rich entertainments given at them by their noble owner to his unfortunate Master. Clarendon has recorded the sumptuous reception of Charles I. at Welbeck, on his way to his Coronation in Scotland. (i. 139. *Ed.* 1826.) The second, at Bolsover, is believed to have been still more magnificent. Ogle, in Northumberland, is likewise engraved, a fine moated building, erected in the reign of Edward IV., in the grounds of which a Hawking party is represented. So, too, is Bothel, in the same County, where we witness a stag hunt. The last Plate in the Volume presents a splendid Pavilion, divided into five separate arched compartments, each occupied by two persons seated. That in the centre contains the Marquess and Marchioness themselves, immediately on their right are the Earl and Countess of Bridgewater, next to them the Viscountess Mansfield and Madame Cavendysshe; on the right are the Earl and Countess of Bolingbroke, and adjoining, Monsieur Cheyne and Madame Jeanne, *sa femme*. In front, exhibiting on Horseback before their parents, are *Le Seigneur Charles Vicomte de Mansfield l'Ené*, and *le Seigneur Henry Cavendysshe le Cadet*; and a legend informs us, that *Les deux Seigneurs qui sont à Cheval et les trois Dames qui les regardent sont tous enfans de Monseigneur le Marquis, et les trois hommes sont maris de ces trois Dames filles de Monseigneur le Marquis*. It is indeed a most goodly family portraiture.

Rudeness of
Riding-
masters.

The Riding-masters in the Duke's time appear to have treated their Scholars quite as ill as they did their Horses. He protests earnestly against such instructors as were in the habit of beating their pupils *avec la houssine ou une longue perche*; who fill their pockets with stones to throw at them; and who are perpetually reviling them with some such phrases as the following:

O pauvre homme! je vous baise les mains. Hà le lordaut! il se tient à Cheval comme une valise; Innocent! tournez votre main, aidez-vous de vos jambes, donnez les éperons, soutenez. Hà le diable! Quel sot! all which language he considers highly ungentle, and likely to displease.

HORSE-
MANSHIP.

Of the Scientific precepts of this splendid Work it is impossible to attempt any abridgement, and we proceed to a short notice of another Volume from the same distinguished pen, in English, *A new Method and extraordinary Invention to dress Horses*, London, 1667, which, as stated in the *Preface*, is "neither a Translation of the first, nor an absolutely necessary addition to it." In the outset, the Duke, with a little natural and amusing vanity, informs us of some of his equestrian feats while at Antwerp. When the Spaniards who accompanied Don John of Austria returned from visiting his Manège, the Prince asked "Whether the Horses were as rare as their reputation was great? to which they answered, that my Horses were such that they wanted nothing of reasonable creatures but speaking. And the Marquess of Seralvo, Master of the Horse to his Highness, and Governor of the Castle of Antwerp, told his Highness, that he had asked me what Horses I lik'd best? And that I answered there were good and bad of all nations; but that the Barbes were the Gentlemen of Horse kind, and Spanish Horses the Princes. Which answer did infinitely please the Spaniards." Again, when he rode before the Marquess of Carasena, that Grandee "seem'd to be very well satisfied, and some Spaniards that were with him cross'd themselves and cried *Miraculo*." So, also, some Frenchmen of high quality affirmed, "*Par Dieu, Monsieur, il est bien hardi qui monte devant vous*. And another said at another time, *Il n'y a plus de Seigneur comme vous en Angleterre*."

Duke of
Newcastle's
New
Method.His own
Horseman-
ship.

The opening Chapter contains a brief sketch "Of the several authors that have written of Horsemanship both Italian, French, and English." This notices some of the writers whom we have already mentioned. The Art is said to have been invented in Italy, and most cultivated at Naples, where Grison took the lead as the first writer, "and truly he writ like a Horseman and a great master in the Art for those times. Henry VIII. sent for two Italians that were his Schollars to come to him into England; and of one of them came all our Alexanders, and their Schollars fill'd the kingdom with Horsemen." Sir Philip Sidney brought over two Italians, Romano and Prospero. The Earl of Leicester sent for Claudio Curtio, whose Book is "very much stolen out of Grison. Laurentius Cassius is another author, none of the best, with horrible Bitts. Then there is Cæsar Fieske,* who hath writ a Book much out of Grison too, where he meddles with Musick." The Author of the *Gloria del Cavallo*, and Pietro Antonio in his *Cavallo Frenato*, both largely "stole" from Grison. Pignatelli, a Neapolitan, was the most celebrated Horseman ever produced by Italy; but he did not write. His Scholars, De la Broue, De Pluvinel, and St. Anthoine, introduced the Art into France, which thenceforward became famous for its Masters. Of De la Broue's Work the Duke of Newcastle speaks but unfavourably. It was (he believes) the first written by any Frenchman, but it is "very tedious, many words for little matter, and his first Book is absolutely ali-

HORSE-
MANSHIP.

stolen out of Grison, and his second Book from Signor Pignatelli's Lessons." "Pluvinel was a good Horseman, but his invention of the *three Pillars* is naught. St. Anthoine, also, was a very good Horseman, and was sent over to England by Henry IV. to teach Henry Prince of Wales. Two of his Scholars, Boyden and Founteney, rode well, but did not write. One Signor Hannibal, a Neapolitan, came into England, and served the Lord Walden." Of the Italian writers on Horsemanship in general, the noble author entertains a very contemptuous opinion. "I must tell you they are tedious, and write more of Marks, Colours, Temperatures, Elements, Moons, Stars, Winds, and Bleedings, than of the Art of Riding, only to make up a Book, though they wanted Horsemanship." Blundevill, as may be expected, meets with little quarter as to his knowledge of Riding; though he is handsomely mentioned in general terms. He is described as "a better Schollar than a Horseman, and was indeed a fine Gentleman, well travelled, an excellent Schollar, a good translator, and puts things in an excellent method; but tyed himself too much to old authors, who knew as little as he in Horsemanship; and so authority abused him, having no knowledge himself in the Art, and totally wanting experience in it." His Treatise on Dieting is admitted to be learned. "His cures of diseases are most admirable, and indeed he is the Father of all that business, and the rarest that hath writ upon that subject. Markham is but Blundevill with other names, and will not acknowledge it." (42.)

In the Duke's opinion, naturally enough, "the best Horseman that ever I knew is one of my own breeding, and rides by my method, which is Captain Mazine, now a Query to the King;" and as for his own Book, "it is stolen out of no Book, nor any man's practice but my own, and is as true as it is new; and if any man do not like it, it is a great signe he understands it not; for there is no way for dressing Horses like it; if it be not good I am sure it is the best that has been writ yet; what will be writ hereafter I know not."

Scale of
Horses of
different
Countries.

The Duke classes Horses in the scale of intellect as follows. "You must know that of all Horses in the world, of what nation soever they be, Spanish Horses are the wisest, far the wisest and strangely wise beyond any man's imagination;" 300 or 400 pistoles were a common price for them; 1000 have been given. "The Barb is next to the Spanish Horse for wisdom, but not near so wise." In Barbary a very fine Horse may be purchased for from £20 to £30; in Languedoc and Provence fine imported Barbs bring from 40 to 50 pistoles. The English Horses are less wise than the Barb, fearful and skittish, dogged and rebellious, and not apt to learn; nevertheless, from their miscellaneous composition of qualities they are the best Horses in the world for all uses whatsoever, from the cart to the Manege. The best places for purchasing them are at the Fairs in Northampton and Leicestershire, Rowel, Harborough, and Melton. The Frison is less wise than the English, but he is good in the Manege, useful in war, hardy, manly, and "fit for every thing but running away." The Dane is an excellent leaper. Holland supplies many geldings for French Coach Horses. It is a mistake to suppose that the Germans have none but Cart Horses, some of their breeds are particularly fine. The Neapolitan breed has completely run to decay. The Turkish are "brave Horses." Of the boasted Arabs the Duke had seen but one, a Bay,

little Horse, with no rarity of shape, sold to King James for £500, and, after training, beaten by every Horse with which he ran. The Hungarian Horses are not worth speaking of. The Poles, notwithstanding the magnificence of their trappings, are but common and ordinary in shape. In the Swedish Horses there is no great matter. The Iceland Horses are curled like their Dogs, so that no currycomb will touch them, and they are but dull jades. "Sir Walter Rawley told me that in the West Indies there were the finest shap't Horses and the finest colours in the World, beyond all Spanish Horses and Barbs that ever he saw, and they knew there so little of the use of Horses that they killed them for their skins."

HORSE-
MANSHIP

But few other Works on Horsemanship demand any notice. *Le parfait Mareschal, par le Sieur de Solleysel, Ecuyer, Sieur du Clapier, l'un des Chefs de l'Académie Royale*, appears to have been received with great applause. The Edition which we have consulted is the eighth; it was printed during the author's lifetime, and bears date 1691. The Work was translated into English by the indefatigable Scotch Gymnasiarch, Sir William Hope, whose skill in FENCING we have already acknowledged. To his version he added a *Treatise on the Art of Riding*, from which we shall presently have occasion to borrow a few particulars.

Solleysel.

Sir William
Hope.

In 1732 was published *Ecole de la Cavalerie, par M. de la Gueriniere, Ecuyer du Roy*, Paris. This is a handsome folio, with well-executed Plates. The 3d Chapter of Part II. contains a good explanation of the chief terms used in the French *Manège*, terms which the Writers on Horsemanship, for the most part, use too freely without previous definition. A yet later French Work, *Les vrais Principes de la Cavalerie, par M. Gaspar Saunier, Ecuyer de l'Académie de l'Université de Leyde*, is equally clear and distinct with that last mentioned, by pursuing a similar method. Among ourselves, Henry Earl of Pembroke is among the latest Writers on the Art. He published, in 1761, *A Method of breaking Horses and teaching Soldiers to ride, designed for the Use of the Army*, from which we principally learn the ill discipline which at that time prevailed among our Cavalry Regiments.

De la Gue-
riniere.

Saunier.

Earl of
Pembroke.

It is not our intention in this place to give detailed directions either for the training or managing of Horses, both of which will be far better learned from any of the numerous express Treatises on those subjects, than from an abridgement of them; we shall content ourselves with a very rapid, general outline of the received methods, and a brief explanation of a few of the more common technical terms of the Manege. Horses are taught their paces at first, by being made to run in circles without any rider backing them. The breaker stands in the middle, holding a *longe*, or long rein; and a *cavesson* (a noseband of wood, leather, or iron) is put on the Horse's nose; if it be necessary, a second man follows with a whip, (*chambrière*,) but great care must be taken to proceed with gentleness and by slow degrees. The three natural paces are a Walk, a Trot, and a Gallop, to which some Horses of themselves add an Amble. In a *Walk* a Horse lifts two legs on a side one after the other, beginning with the hind leg first. In an *Amble* he lifts two legs on a side at the same time. In a *Trot* he lifts two legs at the same time, and keeps two on the ground crosswise, or, as Sir William Hope, from whom we are borrowing our explanations, expresses himself with becoming nationality, "in the form

Breaking.

Natural
paces.

Amble.

Trot.

HORSEMANSHIP. of a St. Andrew's Cross." In *Galloping* straight forward a Horse may lead with what fore leg he pleases, but unless the hind leg on the same side follows it, the legs are said to be *disunited*; in this pace all four legs are off the ground at the same time. In *Galloping* in a circle, the innermost fore leg should lead, or he is said to *Gallop false*. The *Canter*, or *Hand Gallop*, is not considered a natural pace; it is an easier *Gallop*, in which the *Hand* presses on the bridle to restrain the speed.

Canter.

Airs.

The artificial motions, or *Airs* of a Horse are seven. *Terra a Terra*; a *Demy Air*, or *Demy Volt*; a *Corvet*; a *Capriole*; a *Croupade*; a *Balotade*; and a *Step* and a *Leap*, (*un pas et un sault*.) These are explained as follows by Sir William Hope, not very distinctly as we fear; but we know not how to improve his definitions, and they at least gain some raciness by being reported in his own words.

Terra a Terra.

"*Terra a Terra* is nothing else but a short and prest *Gallop* with the *Croup* in, in which a Horse's legs do move more quick than in an ordinary *Gallop*, and mark but two times as *Pa, Ta*, and not four as in the *Gallop*.

Demy Volt.

A *Demy Air*, or *Demy Volt*, is an *Air* in which the fore-parts of the Horse are more raised than in *Terra a Terra*, also the motion of the Horse's legs is more quick in *Terra a Terra* than in the *Demy Volt*. A

Corvet.

Corvet is an *Air* whenever the Horse's legs are yet more raised than in the *Demy Volt*, being a kind of leap up and a little forwards, wherein the Horse raiseth both his fore legs at once, equally advanced, (that is, when he is going straight forwards and not in a circle,) and as his fore legs are falling, he immediately raises his hind legs, as he did the fore, that is, equally advanced, and not one before the other, so that all his four legs are in the air at once, and as he sets them down he marks but two times with them. A *Capriole* is when a Horse at the full height of his leap yerks or strikes out his hind legs as near and even together, and as far out as ever he can stretch them, in which action he makes a noise, or *claque* with them." This yerking, in the technical language of the French *Manège*, was called *nouer l'aiguillette*. "A *Croupade* is a leap, wherein the Horse pulls up his hind legs, as if he drew them up to his belly. A *Balotade* is a leap, wherein the Horse offers to strike out with his hind legs but doth it not, only making an offer, and showing the shoes of his hind feet, but does not strike. Of these three last leaps, the *Capriole* is most esteemed, being the most perfect leap of all. A *Step* and a *Leap* is, as it were, three *Airs*; the pace or step is *Terra a Terra*, the raising is a *Corvet*, and then the *Leap* finishes it."

Capriole.

Croupade.

Balotade.

Step and Leap.

Falcade.

Passage.

Pesate.

Pirouette.

Piafer.

Passade.

Mezair.

Epaule en dedans.

A *Falcade* is made by a Horse throwing himself upon his haunches two or three times, as in very quick *Curvets*.

A *Passage* is raising the outward hind leg and inward fore leg together, alternately with the other two cross legs, never gaining above a foot of ground at a time.

A *Pesate* is a rising upon the haunches with the fore legs bent up to the body.

In a *Pirouette* a Horse turns upon the inward hind leg, the other three being lifted from the ground. A Horse is said to *Piafer*, when he continues to make *Passages* without advancing, retreating, or sidling.

A *Passade* is a course in a straight line and back again, turning at each end with a *Demi Volt*.

A *Mezair* is a lower, quicker *Curvet*.

In the *Epaule en dedans*, or shoulder turned inwards, one of the most important lessons, the Horse is said to

move on two *pistes*, i. e. his fore and hinder parts move on different lines. In the *Epaule en dedans* he looks the contrary way to that which he goes; in *passaging* the same way.

The following brief general directions seem applicable to all species of *Horsemanship*.

Every Horse should be accustomed to stand still while he is mounted. In mounting, the Horseman should stand rather before than behind the stirrup, and then taking the bridle short together with the mane in the left hand, he should help himself into the stirrup with his right, taking care that his toe does not touch the Horse. While the foot is in the stirrup he should move on the right till he faces the side of the Horse looking across the saddle. Then with his right hand he should grasp the hinder part of the saddle, and with that and the left, which holds the bridle and the mane, should lift himself upright on his left foot. Remaining thus but for a moment, so as to divide the action into two motions, he should throw his leg over and gain his seat.

In dismounting, the bridle and mane should be held as before in the left hand, the right hand should be placed on the pommel of the saddle, and when the leg has been thrown over the back of the Horse, that hand should grasp the hinder part of the saddle. There should be a moment's pause on the stirrup, and the action should be in all respects the converse of mounting; especial care is to be taken not to bend the right knee lest the Horse be rubbed by the spur.

The seat should be square, the left shoulder not pulled forward by the bridle, but the body even. The reins should be held with the whole grasp of the hand, and divided with the little finger, the thumb uppermost and placed on the bridle, the wrist bent a little outward. The hand in pulling the bridle should be raised towards the breast. If it be thought fit to ride the Horse with a loosish rein, advance the arm but not the shoulder.

The body, instead of being stiffened by an unnatural grasp of the knees to the saddle, should be pliable and gently yielding to the Horse's motions; the legs should be kept straight down, the thighs, knees, and toes rather inclined inwards, the stirrup rather on the ball of the foot than home to the instep. The grasp should chiefly be made with the hollow of the thighs; the stirrups in a hunting saddle should for the most part be of such length as to afford the breadth of four fingers between the seat and the saddle when the rider stands in them.

A Horse should never be spurred by a kick; if it be necessary to spur him briskly, the heels should be kept close to his sides, the pressure increased or slackened as requisite. If he be vicious, the reins should be taken separately one in each hand, and the arms being advanced forward he should be held very short, thus his head being raised high, and his nose thrown a little out, he can rise neither before nor behind; with a headstrong Horse, repeated pulls are better than one continued strain.

The Duke of Newcastle has one anecdote which almost contains the essence of *Horsemanship*. He was once endeavouring to persuade Mr. Germain, a fine gentleman, and the best scholar in Du Plessis's Academy, to mount one of his Horses, which he was unwilling to do. "I told him, if you will but sit still I warrant you the Horse will go well with you. But a man, said he with a great oath, cannot sit still, which

HORSEMANSHIP

Mounting.

Dismounting.

Seat.

Sitting still.

HORSE-MANSHIP. was said knowingly, and like a Horseman, for to sit still belongs only to a great master." A Post-boy, he adds, can ride a hundred miles a day, a Groom can leap a hedge or a ditch, "my Lord Mayor when he goes to weigh butter sits a leg of either side the Horse very gravely," "many wenches ride astride and gallop," but none of these are to be thought skilled in Horsemanship.

When mounted, he advises the rider to "look a little gay and pleasantly, but not laughing," nor to be "stiff like a stake, or like a statue on Horseback, for I never saw any formality but methought it lookt something of the simple and foolish." "There is no man," he further assures us, "that hath not a musical head that can be a good Horseman," and unless his hand and heel go together, "it will be ill music on Horseback."

Vaulting.

We have already spoken of Homer's allusion to the Art of Vaulting on Horseback, and, in concluding, we may add, that this amusement appears to have been carried to very high perfection in the latter part of the XIIth century, by some wandering Egyptians, twenty in number, who were seen by Nicephoras Gregorius at Constantinople during the reign of the elder Andronicus. They appear to have practised feats of strength, agility, and sleight of hand, such as no man before had ever witnessed or suspected to be possible; and it is not a little to the credit of the Historian, that although he declares their tricks to have been prodigious and most wonderful, *τερατώδη καὶ θαύματος πλήρη*, he distinctly acquits the practitioners of any dealings with the Devil. We subjoin the original description, which may remind some of our readers of sights which themselves have enjoyed in Astley's Amphitheatre: *ἐτερος δ' ἐφ' ἵππου καθήμενος τρέχειν ἐμάστιζε, καὶ τοῦ ἵππου τρέχοντος, ὀρθίως αὐτὸς νῦν μὲν ἐπὶ τῆς ἐφεστρίδος ἵστατο, νῦν δ' ἐμπροσθεν ἐπὶ τῆς τοῦ ἵππου χαίτης, νῦν δ' ὀπίσθεν ἐπὶ τῶν τοῦ ἵππου γλουτῶν, εὐφυνῶς αἰεὶ παραλλάττων τοὺς πόδας, καὶ ὥσπερ ἱπτάμενος δίκην πτηνοῦ· νῦν δ' αὖθις ἀποβαίνων τοῦ ἵππου τρέχοντος, καὶ τῆς οὐρᾶς δραττόμενος, καὶ ἐναλλόμενος ἐπὶ τῆς ἐφεστρίδος, αὖθις ἐωρᾶτο καθήμενος· κἀκεῖθεν αὖθις χαλῶν ἑαυτὸν ἐκ θατέρου τῆς ἐφεστρίδος μέρους, καὶ κάτωθεν διὰ τῆς τοῦ ἵππου κοίλιας περιστρεφόμενος, εὐπετῶς ἐκ θατέρου μέρους ἀνῆει καὶ ἐπωχεῖτο αὖθις. τούτοις δ' ἀσχολῶν ἑαυτὸν ἰδὲ τοῦ τὸν ἵππον πρὸς δρόμον ἐπείγειν ἡμέλει τῇ μάστιγι. ταῦτα μὲν αἷ καὶ οὗτος τῶν τερατοποιῶν ἐκείνων ἐποίει. (Hist. Byz. viii. 3.)*

Stokes's
Art of
Vaulting.

A Volume on this Art, *The Vaulting Master*, was published by William Stokes, at Oxford, in 1652. From this Work, which is illustrated by Plates, the reader may learn how to execute several wondrous Passes. *The John O'Neale, the Miller's Pass, the Hercules Leap, the Poysado, the Pegasus, Over three Horses at once, Pomados at the head, the tail, the hind legs or the bow of the saddle.* A notice of one only must suffice; it is called *The Mistress Command*, and in the engraving a well-dressed Lady appears very patiently seated on a pillion, while a Cavalier is flourishing his heels close to her face. The instructions are as follows: "Your Horse ready, and your Gentlewoman seated, leave the raines of the bridle on the neck of the Horse, then fixing the left hand on the fore pummel, mount, clapping the right hand on the hind pummel: but be sure the right leg move in the same time with the right hand, that so you may readily motion the right thigh

towards the Gentlewoman's lap, and then reverse the same leg over the fore pummel into the saddle without molesting her. If you will do this Passe after another fashion, take the bridle in your left hand, and putting it over the head of the Horse, place your hand on the poll, then taking your true spring from the ground, clap your right hand on the fore pummel, thrust your right leg thorow betwixt both the pummells, and you are in the saddle, the woman not so much as touched."

HORSE-MANSHIP

Dr. Johnson has warned us in the citation given above from the *Preface* to his *Dictionary*, that the term HORSE-COURSER needs explanation; and we give one as we find it set down by himself. "Junius derives it from *Horse*, and *Cose*, an old Scotch word, which signifies to change; and it should therefore, he thinks, be written *Horsecoser*. The word now used in Scotland is *Horsecouper*, to note a jockey, seller, or rather changer of Horses. It may well be derived from *Course*, as he that sells Horses may be supposed to *course* or exercise them." Under the word *Scourse*, however, Dr. Johnson notices the Italian *scorsa*, exchange, whence, he adds, a *Horse-scourser*. Under *Scorse* Mr. Todd writes "*scoja*, 'Sueth vulgo commutare, præcipue equos. Serenius.' The Exmore dialect has *scoace*, or *scorce*, to exchange. Grose. Sherwood notices this word as *scourse*, to exchange, and adds to it a *Horse-scourser*."

Minshew seems to understand it as derived a *cur-rendo*, and gives the similar Italian *cozzone*.

Mr. Gifford, in a note on the *Induction* to Ben Jonson's *Bartholomew Fair*, (*Works*, iv. 369.) says, "In the *Dramatis Personæ*, Knockem is called a Horse-Courser. A Horse-Courser, as old Fitzherbert says, differs from a Horse-master. 'A Corser is he that byeth all ryders' Horses, and selleth them agayne; the Horse-mayster is he that byeth wylde Horses and breketh them and then selleth them.' This, perhaps, was more than Jonson knew. It is sufficient to say that he uses the word, as his contemporaries did, for a Horse-dealer." Considering the almost boundless variety and extent of information on the most unexpected subjects, which Jonson on every occasion displays, we should feel no slight hesitation in predicting his want of knowledge even in the mysteries of Horse-Coursing. Knockem, indeed, throughout, speaks sufficiently in character to prove Jonson's acquaintance with the minutiae of his trade. The whole of his conversation, as Mr. Gifford observes in another place, is made up of scraps from the stable.

Fitzherbert's own words are much too pointed to be omitted. "The diversity between a Horse-maister, a Courser, and a Horse-leach. A Horse-maister is he that buieth wild Colts or Horses, or breedeth them, and selleth them agayne wild, or breaketh part of them and maketh them lame,* and then selleth them. A Courser is he that buieth all ridden Horses, and selleth them agayne. A Horse-leach is he that taketh upon him to cure and mende all manner of diseases and sorances that Horses have, and when these three be met, if you have a Pothicary to make the fourth, you might have such foure that it were hard to trust the best of them." *Booke of Husbandrie*, ii. 57.

* So it stands in the original; (*Ed.* 1598;) *lame* is probably a misprint for *tame*; but the compositor's error (if it be one) can be no matter of surprise when we read the context.

HORS-
FIELDIA.
—
HORTI-
CULTURE.

HORSFIELDIA, in *Botany*, a genus of the class *Dioecia*, order *Monadelphia*. Generic character: male flower, calyx none; corolla tubular, three-angled, border conniving; anthers connate: female flower, calyx none, corolla as the male; style none; stigma obscurely spotted; drupe superior, one-seeded.

One species, *H. odorata*, a moderate-sized tree, native of Ceylon, and cultivated in Java; the flowers have the fragrance of the violet.

HORSHAM, a Borough and Market Town in the County of Sussex, on the banks of the river Adur or Beeding. It stands in a very pleasing country, which once formed a continued forest. The Church is of large dimensions, and is a fine specimen of the pointed style; the living is a vicarage in the gift of the Archbishop of Canterbury. A Market House, a Town Hall, in which, and at Lewes, the Summer Assizes are held alternately, and a County Gaol, are the other public buildings. Hill Place, an ancient mansion belonging to the Duke of Norfolk, Cool Hurst, a seat of the Earl of Galloway, Denn Park, Springfield and Horsham Park, are all in the immediate neighbourhood. Horsham has returned two Members to Parliament since the reign of Edward I. Population, in 1821, 4575. Distant from Dorking 11½ miles, from London 36.

HORTATION, } Lat. *hortor, atus*. The ancient
Ho'RTATIVE, } Romans (Vossius says) wrote it
Ho'RTATORY. } *her-ior*; and *honor*, he conceives
to be from *ὁρτύνειν*, *incitare*, to incite, to encourage, or
from *ὄρ-ειν*, *excitare*. See to **EXHORT**.

Encouragement, admonition, advice, persuasion.

In *hortatives*, and pleadings, as truth or disguise serveth best to the design in hand, so is the judgement or the fancy most required.

Hobbes. Leviathan part i. ch. viii.

He animated his souldiers with many *hortatorie* orations.

Holland. Ammianus, fol. 202. *Julianus*.

And as to the second, that he should by his *hortation* set the commons against the nobility and gentlemen, he said that he never spake any word, but some of the commissioners were present; who he doubted not would testify for him in this part to his accuser's shame.

Strype. Memorials. Edward VI. Anno 1548.

HORTIA, in *Botany*, a genus of the class *Pentandria*, order *Monogynia*, natural order *Rutaceæ*. Generic character: calyx five-toothed, persisting; corolla, petals five, reflexed, acuminate, glandular, hairs at the base; style sessile, stigma capitate; capsule five-celled, sells one-seeded.

One species, *H. Braziliæna*, a tree, native of Brazil. Decandolle.

HORTICULTURE, } Lat. *hortus*, a garden, and
HORTICU'LTURAL, } *cultura*, from *colere*, *cultum*,
HORTICU'LTURIST, } to till.
Ho'RTULAN, } The tillage of gardens;
HORTE'NSIAL. } or of such plants as are
usually grown or cultivated in gardens.

Hortus siccus, literally a dry garden; a collection of dried plants.

Such as are sative and *hortensial*.

Evelyn. Introduction, sec. 3.

What I humbly offer your lordship is (as I said) part of natural history, the product of *horticulture* and the field, dignified by the most illustrious, and sometimes tilled *laureato vomere*.

Id. Acetaria. Epistle Dedicatory.

This *hortulan* kalendar is yours, mindful of the honour once conferred on it, when you were pleased to suspend your nobler raptures, and think it worthy your transcribing.

Id. Kalendarium Hortense. Epistle Dedicatory to A. Cowley.

The *hortulan* paradoxes were sent above six weeks ago, and I conclude they are lost from us.

Boyle. Works, vol. vi. p. 132. *Letter from Hartlib*.

The garden affords him many sources of amusement. He attends not indeed to the olitory, and his strength will not permit him to take an active part in the labours of *horticulture*.

Knox. Winter Evenings, ev. 7.

Beautiful as are all the features of the modern garden, I should not hesitate to allot the first place, in an estimate of *horticultural* graces, to the weeping willow.

Id. Essays, No. 115.

It would certainly be a valuable addition of nondescripts to the ample collection of known classes, genera, and species, which at present beautify the *hortus siccus* of dissent.

Burke. Reflections on the Revolution in France.

HORTYARD, now written *orchard*, *q. v. A. S. ortgeard, orceard, orceard, orcyrd*. Of these Junius thinks *ortgeard* the most ancient, and that it is formed from *weortgeard*, that is *wyrt geard*, or a *yard*, or place prepared for *worts* or herbs. Now applied to

A *yard* or garden for fruit trees.

Whiles they passe now and then among their enemies' *hortyards* and vineyards they neyther desire nor touch ought, for feare of poyson and secret arts.

Holland. Ammianus, fol. 237. *Julianus*.

He would have men purchase houses that had more store of arable land and pasture, then of fine *hortyards* or gardens.

Sir Thomas North. Plutarch, fol. 290. *Marcus Cato*.

And even in these our daies, under the name of gardens and *hortyards*, there goe many daintie places of pleasure within the very citie.

Holland. Plinie, book xix. ch. iv.

HOSANNA, Gr. ὡσαννά. See the Quotation from Hammond.

The word *hosanna* is contracted of *הושיענו*, *hōshien*, save I beseech thee. A form of acclamation, which the Jews were wont to use in their feasts of tabernacles, in which also they used to carry boughs in their hands, (see *Neh. ch. viii. v. 15. I Mac. ch. xiii. v. 5. 2 Mac. ch. x. v. 7*.) and also to sing psalms, as it is in the Maccabees, that is, to cry *hosanna*.

Hammond. Annotations on Matthew, ch. xxi. v. 9.

Heav'n rung
With jubilee, and loud *hosannas* fill'd
Th' eternal regions.

Milton. Paradise Lost, book iii. l. 348.

From the full choir, when loud *hosannas* rise,
And swell the pomp of dreadful sacrifice,
Amid that scene if some relenting eye
Glance on the stone where our cold relics lie,
Devotion's self shall steal a thought from heaven,
One human tear shall drop, and be forgiven.

Pope. Eloisa to Abelard.

Damascus, Bishop of Rome, corresponded with Saint Jerome upon the exposition of difficult texts of Scripture; and, in a letter still remaining, desires Jerome to give him a clear explanation of the word *hosanna* found in the New Testament.

Paley. Evidences, part i. ch. xii. sec. 9.

HOSE, } A. S. *hosa*; D. *hosa*; Ger. *hosen*;
Ho'SIER, } which Wachter derives from Ger.
HOSE-HEELER. } *hut-en*, (i. e. A. S. *hyd-an*, to hide,) to cover; applied to various parts of the clothes or raiment, because covering different parts of the body: the breech, thighs, legs, feet.

The breeches, the stockings.

As hys chamberleyn hym brogte, as he ros aday,
A morwe vorto werye, a peyre hose of say.

R. Gloucester, p. 390.

His *hosen* ouer hongen his hokshynes, on euerich a syde.

Piers Plouhman. Crede, sig. C. iii.

And the aungel seide to him girde thee, and do on thin *hoses* (*caligas*) and he dede so.

Wiclif. The Dedis of Apostlis, ch. xii.

That all things which shal first be spoken, may seeme to agree with the matter, and not made as a shippe man's hose to serue for every legge.

Wilson. Arte of Rhetorique, fol. 102.

[The Volsceans] seeing themselves on every side beaten downe and slaine, turned from fighting to intreating, delivered up their captaine,

HORTI-
CULTURE.
—
HOSE.

HOSE. yeilded up their weapons, were driven under the gallows, and in their single doublet and *hose* with great shame and calamitie, were let go and sent away. *Holland. Livius, fol. 146.*

HOSPI-TABLE. It happened that a book came over into the hands of the English exiles, written against the marriage of ministers, by one Miles Hog-gard, a silly *hosier* in London, but highly opinioned of his learning. *Fuller. Worthies. Nottinghamshire.*

Pac. Why thou iron-pated smith: and thou woollen-witted *hose-heeler*: hear what I will speak indifferently (and according to antient writers) of our three professions.

Beaumont and Fletcher. The Martial Maid, act. ii.

For, as we said, he always chose
To carry vittle in his *hose*,
That often tempted rats and mice
The ammunition to surprise.

Butler. Hudibras, part i. can. 1.

And a good number besides of ordinary tradesmen, as smiths, tailors, sadlers, *hosiers*, haberdashers.

Strype. Life of Aylmer, ch. x.

The legs and feet were clothed in long *hose* and open sandals. *Gibbon. Decline and Fall, ch. lxx.*

This the dusk hatter asks: another shines,
Tempting the clothier; that the *hosier* seeks.

Dyer. The Fleece.

HOSLUNDIA, in Botany, a genus of the class *Didynamia*, order *Gymnospermia*. Generic character: calyx tubular, five-toothed; corolla ringent, superior lip concave; two of the stamens sterile, four seeds in the berry-formed calyx.

Two species, natives of Africa.

HO'SPITABLE,	} Fr. <i>hospitable</i> ; It. <i>ospitale</i> ; Sp. <i>hospedable</i> ; Lat. <i>hospita-</i> <i>talis</i> , from <i>hospes</i> , which Vos- sius thinks he can discover in <i>hostis</i> , (<i>t</i> changed into <i>p</i> .) See HOSTILE. <i>Hospes</i> was applied to a stranger, received and entertained in the house. <i>Hospitable</i> ; receiving and entertaining strangers; liberal,
HO'SPITABLENESS,	
HO'SPITABLY,	
HO'SPITAGE,	
HO'SPITAL, <i>n</i> .	
HO'SPITAL, <i>adj</i> .	
HOSPITA'LITY,	
HO'SPITALLER,	
HO'SPITATE,	}
HOSPI'TIOUS.	

kind, to strangers, to visitors.

Hospital; a place for the reception and entertain-ment of strangers: as now restricted, of the poor or sick.

To temples in Acres he quath five thousand marke, & five thousand to *pe hospitale*. *R. Brunne, p. 135.*

He toke it wikkedly out of *pe hospiteler* hond. *Id. p. 178.*

But holdynge *hospitalite*, benygne, prudent, sobre, &c. *Wiclif. Tyte, ch. i.*

Yet ben ther mo spices of this cursed sinne, as whan that on of hem is religious, or elles both, or of folk that ben entred into ordre, as sub-deken, deken, or preest, or *hospitalers*.

Chaucer. The Persones Tale, vol. ii. p. 367.

Beyond Russia lieth the countrey of Prussia, which the Dutch knights of the order of Saint Maries *hospitale* of Jerusalem haue of late wholly conquered and subdued.

Hakluyt. Voyages, &c. vol. i. fol. 102. The Tartars.

I [King Richard] therfore biquethe my pryde to the hyghe mynded Templars and *hospyteler*s, for they are as proude as helle.

Bale. English Votaries, part ii. sig. T. ii.

But as abroad in war, he spent of his estate;
Returning to his home, his *hospitable* gate
The richer and the poor stood open to receive.

Drayton. Poly-olbion, song ii.

With common speech

He courted her, yet bayted euery word,
That his vngentle hoste n'ote him appeach
Of vile vngentleness, or *hospitages* breach.

Spenser. Faerie Queene, book iii. can. 10.

When as they spyde a goodly castle, plac't
Foreby a riuer in a pleasant dale;
Which choosing for that euening's *hospitale*,
They thither march.

Spenser. Faerie Queene, book ii. can. 9.

I tooke him of a child, up, at my doore,
And christ'ned him, gave him mine owne name Thomas,
Since bred him at the *hospitall*.

Ben Jonson. Every Man in his Humour, act. ii. sc. 1.

I am to be a guest to this *hospital* maid [Venice] a good while yet, and if you want any commodity that she can afford (and what cannot she afford for human pleasure or delight?) do but write, and it shall be sent you.

Howell. Letters, book i. sec. 1. let. 35.

Yet nevertheles this complot was discovered, and intelligence thereof given at Rome, by meanes of certaine persons linked to the Romanes in private acquaintance and mutuall *hospitalitie*.

Holland. Livius, fol. 282.

That always chooses an empty shell, and this *hospitales* with the living animal in the same shell. *Grew. Museum.*

For signe of amitie 'twixt us, and that all these may know
We glory in th' *hospitious* rites, our grandsires did commend,
Change we our armes before them all.

Chapman. Homer. Iliad, book vi. fol. 88.

Take shame, and feare the indignation
Of him that thunders from the highest throne
(*Hospitious* Joue) who, at the back, prepares
Paines of abhor'd effect, of him that dares
The pieties breake, of his *hospitious* squares.

Id. Homer. To Mariners.

For harbour at a thousand doors they knock'd,
Not one of all the thousand but was lock'd;
At last an *hospitable* house they found,
A homely shed; the roof, not far from ground,
Was thatch'd with reeds and straw together bound.

Dryden. Ovid. Metamorphoses, book viii.

In the story of our father Abraham, his benignity to strangers, and *hospitableness*, is remarkable among all his deeds of goodness, being propounded to us as a pattern and encouragement to the like practice.

Barrow. Sermon 31. vol. i.

Among the many and various *hospitals* that are in every man's curiosity and talk that travels their country, I was affected with none more than that of the aged seamen at Enchuysen.

Sir William Temple. Observations upon the United Provinces, &c. ch. iv.

With a provisio, that after the expiration of certain leases of the said *hospital-lands*, about twenty-one years to come, the said number of the poor, and the said portions, should be further increased.

Strype. Life of Whitgift, Anno 1584.

Hospitality sometimes degenerates into profuseness, and ends in madness and folly: when it doth so it ill deserves the name of virtue.

Atterbury. Sermon 3. vol. ii.

My lords, the storm of antichristian persecution, which has raged in France since her Revolution, has driven numbers both of the secular clergy, and persons of both sexes of the religious orders, to take shelter in this *hospitable* land, by the natural generosity of Britons, and the influence of the benevolent principles of the Protestant Religion, the universal asylum of the persecuted and distressed.

Bishop Horsley. Speeches, p. 311.

The clergy must be contented, in the present temper of the Irish, with what they can get; yet it ought to be so liberal a commutation, as will enable every parson to live creditably and *hospitably* in the midst of his parishioners.

Anecdotes of the Life of Bishop Watson, vol. i. p. 257.

When a private founder gives his college or *hospital* a name, he does it only as a godfather; and by that same name the king baptizes the incorporation.

Blackstone. Commentaries, book i. ch. xviii.

The expence of *hospitality* she [Elizabeth] somewhat encouraged by the frequent visits she paid her nobility, and the sumptuous feasts which she received from them.

Hume. History of England. Appendix, iii.

William of Tyre relates the ignoble origin and early insolence of the *hospitallers*, who soon deserted their humble patron, St. John the Eleemosynary, for the more august character of Saint John the Baptist.

Gibbon. Decline and Fall, ch. lvi.

HOST.

HOST, *v.*
 HOST, *n.*
 HO'STESS,
 HO'STLESS,
 HO'STEL,
 HO'STELER,
 HO'STELRY,
 HO'STRY,
 HO'STESS-SHIP. } Fr. *hoste*, or *hote*; It. *oste*; Sp. *huesped*, from the Lat. *hospes*.
 (See HOSPITABLE.) Udall writes
hospte and *hospetes*, i. e. *host* and
hostess.
 One who receives and enter-
 tains a stranger, guest, visitor; an
 innkeeper, landlord of an inn.
 To *host*; to dwell or abide, as a
 stranger, guest, or visitor: to receive and entertain one.
 And took two pans to *be hosteler*. to take kepe to hym.
Piers Plouhman. Vision, p. 325.

And he leyde him on his beest, and ledde into an *ostrye* (*stabulum*)
 and dide the cure of him. And another day he broughte forth tweie
pens, and gaf to the *osteler* (*stabulario*) and seyde haue thou cure of
 him, and whateuer thou schalt geue ouer: I schal yelde to thee
 whanne I come agen.
Wichf. Luke, ch. x.

Gret chere made oure *hoste* us everich one,
 And to the super sette he us anon:
 And served us with vitaille of the beste.

Chaucer. The Prologue, v. 749.

Hold vp thine heed, for all is well
 Saint Julian lo, bonne *hostell*,
 See here the house of Fame lo.

Id. The Second Booke of Fame, fol. 279.

But now is time to you for to telle,
 How that we baren us that ilke night,
 Whan we were in that *hostelrie* alight.

Id. The Prologue, v. 724.

Therto he strong was as a champioun,
 And knew wel the tavernes in every toun,
 And every *hosteler* and gay tapstere.

Id. Ib. v. 241.

He *hosteth* at a certayne mannes house in Joppa, whose name is
 Symon, a Tanner by hys occupacion, and dwelleth by the sea syde.

Udall. Actes, ch. x.

The apostles were content to accomlishe theyr request, and
 whan they were out of prison, they wente into the house of Lidia,
 where they had been first *hosted*.

Id. Ib. ch. xvii.

And caused hym to be *hosted* with a worshypfull man of that citie
 called Chremes.

Sir Thomas Elyot. The Governour, book ii. ch. xii.

And this Samaritane Jesus too, hath his *hostes* and inneholders, to
 whom he leauing the earth, and ascending into heauen, dooeth com-
 mitte the wounded man to be wel looked vnto: promising a reward
 in heauen, if through the aboundance of charitie thei shal have laid
 out any thing more then was commaunded for the healing of the piteous
 bodie.

Udall. Luke, ch. x.

Salute Prisilla and Aquila myne *hospte* and myne *hospetes*, and
 Onesiphorus householde, vnto whom I am very much bounden.

Id. 2 Timothy, ch. iv.

And by these inholders are to be understaunded the Apostles, and
 their successours, by whom euen at this daie he doeth cure and help
 mankinde, and gathereth the same from the violence of theues, into
 the *hostrie* of the churche, where the woundes of sinne are healed.

Id. Luke, ch. x.

Jone (was) borne in Burgoyne in a toun called Droymy beside
 Vancolour, whiche was a greate space a chamberlein in a commen
hostrey, and was a rampe of suche boldnesse, that she would course
 horssees and ride them to water.

Hall. Henry VI. The sixth Yere.

Syr Ywayn and his damysell
 In the town toke thaire *hostell*.

Ritson. Met. Rom. vol. i. p. 143. *Ywayne and Gawin*, v. 3404.

But our Grekis, their Greke so wel haue applied
 That they cannot say in Greke, riding by the way,
 How *hosteler*, fetch me my horse a bottel of hay.

Skelton. Speake Parrot.

WID. The troope is past: come, pilgrim, I wil bring you, where
 you shall *host*.

Shakspeare. All's Well that Ends Well, fol. 243.

ANT. Go beare it to the Centaure, where we *host*,
 And stay there, Dromio, till I come to thee,

Id. Comedy of Errours, fol. 86.

The gentle knight, as he that did excell
 In courtesie and well could doe and say,
 For so great kindnesse as he found that day
 Gan greatly thanke his *host* and his good wife.

Spenser. Faerie Queene, book vi. can. 9.

Another shifting gallant to forecast
 To gull his *hostess* for a month's repast,
 With some gall'd trunk, ballast with straw and stone,
 Left for the pawn of his provision.

Hall. Satire 5. book iv.

It is my father's will, I should take on mee
 The *hostesseship* o' th' day.

Shakspeare. Winter's Tale, fol. 291.

Who with Sir Satyrane (as earst yee red)
 Forth riding from Malbecco's *hostlesse* hous,
 Farre off espide a young man, the which fled
 From an huge giant.

Spenser. Faerie Queene, book iii. can. 11.

There are also in Oxford certeine *hostels* or hals, which may right
 well be called by the names of colleges, if it were not that there is
 more libertie in them, than is to be seen in the other.

Holinshed. Description of England, ch. iii.

The students also that remaine in them, are called *hostelers* or
 halliers. Hereof it came of late to passe, that the right reuerend
 father in God Thomas late Archbishop of Canturburie being brought
 vp in such an house at Cambridge, was of the ignorant sort of Lon-
 doners called an *hosteler*, supposing that he had serued with some
 inholder in the stable, and therefore in despite diuerse hanged vp
 bottles of haie at his gate, when he began to preach the gospell.

Id. Ib.

When they had laid hold upon his servants, who for love of their
 lord and master began to make resistance, the swords were brought
 forth out of all the blind corners of the *hostelrie* open to be seene.

Holland. Livius, fol. 36.

Vpon Stane-more, not far from an homely *hostilerie* called the
 Spittle, a stone crosse (on the one side of whose shaft stood the picture
 and armes of the King of England, and on the other the image &
 armes of the king and kingdome of Scotland, vpon that occasion called
 the *Roi-crosse*) was erected, to shew the limits of either kingdome.

Speed. William the Conqueror, Anno 1073, book ix. ch. ii. sec. 32.

Onely these marishes, and miry bogs,

In which the fearfull ewfies do build their bowres,

Yeeld me an *hostry*, mong the croking frogs

And harbour heere in safety from those rauinous dogs.

Spenser. Faerie Queene, book v. can. 10.

When he had observed them, he told the *host* of the house, "that
 one of those horses had travelled far, and he was sure his four shoes
 had been made in four several counties."

Clarendon. History of the Rebellion, book xiii.

But the kind *hosts* their entertainment grace,

With hearty welcome, and an open face.

Dryden. Ovid. Metamorphoses, book iv. *Baucis and Philemon*.

Then taking him apart, she warns him to beware of the mischie-
 vious practices of the *hostess* Pamphilia.

Warburton. The Divine Legation, book ii. sec. 4.

It was now the dusk of the evening, when a grave person rode into
 the inn, and committing his horse to the *hostler*, went directly into
 the kitchen, and, having called for a pipe of tobacco, took his place
 by the fire-side.

Fielding. Joseph Andrews, ch. xiv.

In Stow's time it was altered to a common *hosterie* or inn, having
 a black bell for a sign.

Pennant. London, p. 458.

HOST, } Fr. *hoste*; It. *oste*; Sp. *hueste*; Low
 HO'STAGE, } Lat. *hostes*, which Wachter labours to
 HO'STING. } show is from *host*, *equus*; Swed. *hæst*;
 Dan. *hæst*; Isl. *hest*; applied originally to horse-
 soldiers, then, generally, to an army of horse and foot;
equitatus and *exercitus*, *equitatio* and *expeditio* were, he
 observes, used by the writers of the middle ages as
 synonymous. For the various feudal applications of
 the Low Lat, *hostis*, see Du Cange. Skinner says,
 that *host* is, *aliquantum deflexo sensu*, from the Lat.
hostis, an enemy: applied thus; to

The enemy, assembled; assembled in battle array,
 in battalions; then generally, to battalions, an army,
 any large assemblage, or collected body.

HOST.

HOST.

Heo garkedden hem to gedere, þat a fair *ost* yt was.
R. Gloucester, p. 12.

HOSTAGE

Whan he sauh he ne myght passe on non wise,
 In þre parties to fight his *oste* he did deuise.
R. Brunne, p. 187.

And the *oostis* that ben in heuene sudden him on white horsis
 clothid with bissyn.
Wiclif. Apocalips, ch. xix.

And whan this worthy duk had thus ydon,
 He toke his *host*, and home he rit anon
 With laurer crowned as a conquerer.
Chaucer. The Knightes Tale, v. 1028.

The fore ryders came rynnynge to the barrers skyrmyshyng, and
 the *hoost* taryed styll on y^e mount tyll the next day.
Lord Berners. Froissart. Cronycle, vol. i. ch. xxxix.

Slaughter alike invadeth either *host*,
 Whilst still the battle strongly doth abide,
 Which ev'ry where runs raking through the coast,
 As't pleas'd outrageous fury it to guide.
Drayton. The Barons' Wars, book ii.

And this I have often heard, that when the lord deputy hath
 raised any generall *hostings*, the noble men have claimed the leading
 of them; by graunt from the kings of England, under the greate
 seale exhibited; so as the deputies could not refuse them to have the
 leading of them, or, if they did, they would so worke, as none of
 their followers should rise forth to the *hostage*.
Spenser. View of the State of Ireland.

Strange to us it seem'd
 At first, that angel should with angel war,
 And in fierce *hosting* meet, who wont to meet
 So oft in festivals of joy and love
 Unanimous, as sons of one great sire,
 Hymning th' eternal father.
Milton. Paradise Lost, book vi. l. 93.

Haste, goddess, haste! the flying *host* detain
 Nor let one sail be hoisted on the main.
Pope. Homer. Iliad, book ii.

No less in other parts the battle rag'd,
 Nor less the throng of warring chiefs engag'd;
 High o'er the *hosts* the Stygian fiends repair,
 And Hell's black myriads fill the fields of air.
Hoole. Jerusalem Delivered, book ix.

Host, } Fr. *hostie*; It. *ostia*; Sp. *hostia*; Lat.
 Ho'stie. } *hostia*; a sacrifice. Servius and Isidorus
 approve the Etymology of Ovid. *Hostibus a victis*
hostia nomen habet. Festus from the ancient *hostire*,
sive ferire, to strike

The true teachyng is, that Christes very body is present under the
 forme of bread, in as many *hoostes* as be cōsecrate, in how many places
 soever the *hoostes* be cōsecrate, and is there really and substancially,
 whiche wordes really and substācially be implied, whē we say truly
 presēt.
*Steven Bishop of Wynchester. An Explication of the true Catho-
 lique Fayth*.

Now, say it go for current and be constantly believed, that it is an
 undoubted and infallible signe, that the God will give answer, when
 the *host* or sacrifice thus drenched doth stir; and contrariwise, that
 he will not answer, if the beast quetch not: I see nothing herein re-
 pugnant unto that, which we have before delivered.
Holland. Plutarch, fol. 1097.

On the contrary, he hath been taught to believe that they are neces-
 sary duties, and he cannot be a good catholick, unless he thus
 worships images, and saints, and the bread of the *host*.
Sharpe. Sermons, vol. ii. *A Discourse of Conscience*.

Lord Feversham opened the door once, and called for a glass of
 water. The *hostie* stuck in his [the King's] throat: and that was
 the occasion of calling for a glass of water.
Burnet. Own Times. Charles II. 1685.

HO'STAGE, } Fr. *hostage*; It. *ostagio*; Low Lat.
 Ho'stager, } *hostiagius*. The Etymologies are va-
 rious. From *hospes*, q. d. *hospitagium*; or from *obses*,
 q. d. *obsidagium*; or from *hostis*, quia *obsides ab hosti-
 bus exiguntur*. See Menage, Vossius, de *Vitiis*, lib. iii.
 VOL. XXIII.

c. 14. The usages of *obsidatus* by Eutropius and Ammianus, quoted by Vossius, give some plausibility
 to his decision, that the Fr. *hostage*, or *ostage*, is, κατά
 συγκοπὴν, ex *obsidage*.
 HOSTAGE
 HOSTILE.

Any person or thing delivered to an enemy to be
 kept in pledge or security for the performance of certain
 stipulations or conditions.

þo þe emperour herde þis, he ne tryste not wel her to,
 With oute siker *ostage*, such þing to do.
 þe erl þritti noble men, þat were of ys blod,
 Sende hym and ys owne sone, þat were *ostages* god.
R. Gloucester, p. 55.

& of his crueltes he [William the Conqueror] gynnes for to assuage,
 & gaf ageyn þo fees, of whilk he toke *ostages*.
R. Brunne, p. 78.

þe castels & *ostagers* he gald þorgh curteysie.
Id. p. 139.

He asked of me than *ostages*.
Chaucer. The Romant of the Rose, fol. 125.

And there vpon to make an ende
 The soudan his *hostage* sende
 To Rome, of princes sonnes twelue.
Gower. Conf. Am. book ii. fol. 30.

The same season ther wer styll in England *hostagers*, the erle
 Dolphyn of Auvergne, therle of Porseen, the lorde of Mallurer,
 and dyuers other.

Lord Berners. Froissart. Cronycle, vol. i. ch. 246.

Which being reported to the king, [Porsena] he at first stormed at
 it, and was all in a rage, and sent unto Rome certain oratours to de-
 maund againe his *hostage* Clælia by name.

Holland. Livius, book ii. p. 53.

The king consented to the parley; upon which a cessation was
 concluded; *hostages* interchangeably delivered.

Clarendon. History of the Rebellion, book viii.

Mr. Gore intimated that he was ready to attend them, but they
 desired that two of our people might be left ashore as *hostages*, and
 in this also they were indulged.

Cook. Voyages, vol. ii. book iii. ch. viii.

HO'STILE, } Fr. *hostile*; It. *ostile*; Sp. *hos-*
 HOSTI'LITY, } *tel*; Lat. *hostilis*, from the Lat.
 Ho'stilement. } *hostis*, a stranger, a foreigner; and
 as the Fr. *forain*, from Lat. *foris*, and the Gr. *θυραῖος*,
externus, from *θυρά*, *ostium*, so, from this same *ostium*,
 Martinius and Vossius derive *hostis*, a foreigner, one
 (*forinsecus*) out of doors; and, consequentially, an
 enemy.

Inimical, unfriendly; like, or of or pertaining to, a
 foe or an enemy; adverse.

For why, certes it nedeth of full many helpings, to kepen the
 diuersite of precious *hostilements*.

Chaucer. Boecius, book ii. fol. 219.

Duryng the more part of his reigne, he was lytle or nothyng in-
 quieted without warre *hostilitie* or martiall busynesse.

Sir Thomas Elyot. The Governour, book i. ch. xxiv.

Th' vnaltered law
 Of Fate presaging; that Troy then should end,
 When th' *hostile* horse she should receiue to friend.

Chapman. Homer. Odyssey, book viii. fol. 122.

Thither when he came he began to do many acts of *hostility*
 against the Romans: first in secret, afterwards more openly and
 boldly. *Ralegh. History of the World*, book v. ch. iii. sec. 15.

Thus great in glory from the din of war
 Safe he return'd without one *hostile* scar.

Pope. Homer. Odyssey, book xi.

If others reposit their young in holes and dens, and secure them-
 selves also therein, it is because such guard, such security is wanting,
 their lives being sought either by the *hostility* of man, or to satisfy
 the appetite of rapacious creatures.

Derham. Physico-Theology, book iv. ch. xiii.

They were all armed, but they came on in so confused and strag-
 gling a manner that we scarcely suspected they meant us any harm,
 and we were determined that *hostilities* should not begin on our part.

Cook. Voyages, vol. i. book ii. ch. v

HOT.

HOT, } A. S. *hæt, hat*; the past participle of
Ho'tly. } *hæt-an, calefacere*. See to HEAT.

Opposed to cold. Met. fervent, ardent, inflamed;
fiery; violent, vehement; animated to excess; (*sub.*)
with desire, and, thus, lustful.

I woot thi werkis, for neither thou art coold, neither thou art *hoot*,
I wolde that thou were coold either *hoot*, but for thou art lewe, and
neither coold neither *hoot*, I schal bigynne to caste thee out of my
mouthe. *Wiclif. Apocalips, ch. iii.*

I know thy workes that thou arte neyther colde nor *hotte*: I
wolde thou were colde or *hotte*. So then because thou arte betwene
bothe, and nether cold nor *hot*, I wil spew the out of my mouth.
Bible, Anno 1551.

Another sayd, the fire was ouer *hote*.
But be it *hote* or colde, I dare say this,
That we concluden ever more amis.

Chaucer. The Chanones Yemannes Tale, v. 16422.

And thus the pride whiche was *hote*,
Whan he most in his strengthe wende
Was brent, and lost withouten ende.

Gower. Conf. Am. book i. fol. 19.

Whereupon thinking good not to praetermit the occasyon whiles
the hope was *hotte* in their hartes, [Amintas] conueied them into
Egipt, and entred the hauen at Pelusium, vnder pretence that hee had
bene sent thither by Darius.

Brende. Quintus Curtius, book iv. fol. 51.

They answered the kynge and sayd, Sir, we haue well harde the
knightes of Fraunce, howe they wolde haue you *hotely* to sette on
your enemyes.

Lord Berners. Froissart. Cronycle, vol. ii. ch. xxxiv.

Moderation may become a fault. To be but warm, when God
commands us to be *hot*, is sinfull.

Feltham. Resolve 45. part i.

His aunt Lepida, likewise being in trouble, he deposed against, in
the open face of the court, thereby to gratifie his mother her heauie
friend, and who followed the suite *hotly* against her.

Holland. Suetonius, fol. 182. Nero Claudius Caesar.

Where such an one hears the name of God profaned, religion
scoffed at, and abused; his blood broils and his heart grows *hot* within
him, and he cannot but vindicate the honour of his Maker, in re-
proving the blasphemers to his teeth.

South. Sermons, vol. xi. p. 151.

And can we think, that a mere speculative point that hath no in-
fluence upon our practice, should be worth so *hotly* contending for?

Sharpe. Works, vol. vii. Sermon 13.

God! thou hast said, that Nature shall decay,
And all yon starr'd expansion pass away:
That in thy wrath, pollution shall expire,
The Sun himself consume with *hotter* fire.

Brookes. Redemption.

I believe it will not be *hotly* disputed, that those resources which
lie heavy on the subject ought not to be objects of preference; that
they ought not to be the very first choice, to an honest representa-
tive of the people.

Burke. On the Economical Reform.

Hot, in Composition. *

For peace and concorde can not possibly continue among them,
that are *hote-stomacked* and hygge-minded.

Udall. Phillippians, ch. ii.

But can such things be fit
In Damasippus? He ev'n now to those
Large *hot-bath* draughts, and titled curtains goes,
More fit for the Armenian warlike ranks;
For the Rhene, Ister and the Syrian banks;
To keep great Nero's careful breast secure.

Holiday. Juvenal. Satire 8.

The bed we call a *hot-bed*, and the manner of it is this. There
was taken horse-dung, old, and well rotted; this was laid upon a
bank, half a foot high, and supported round about with planks; and
upon the top was cast sifted earth, some two fingers deep; and then
the seed sprinkled on it.

Bacon. Natural History, Cent. 5. sec. 401.

Returne with her?

Why the *hot-bloodied* France, that dowerlesse tooke
Our youngest borne, I could as well be brought

To knee his throne, and squire-like pension beg,
To keepe base life a foote; returne with her?

Shakspeare. Lear, fol. 295.

Such devils steal effects from lightless hell;
For Sinon in his fire doth quake with cold,
And in that cold, *hot-burning* fire doth dwell.

Id. Rape of Lucrece.

If I can dye with a fillip, or depart
At *hot-cockles*, what's that to any man.

Beaumont and Fletcher. Wit at several Weapons, act iii.

Flaminius, an *hot-headed* popular orator, having once been robbed
(as he thought) of his consulship, by a device of the senators, was
afraid to be served so again, unless he quickly finished the war.

Ralegh. History of the World, book v. ch. iii. sec. 5.

And now she professes a *hot-house*; which I thinke is a very ill
house too.

Shakspeare. Measure for Measure, fol. 65.

But shortly after, as they were rubbing of him with oil in his stove
or *hot-house*, stark naked as he was, they slew him by treason.

Sir Thomas North. Plutarch, fol. 410. Cimon.

And therefore he was not yet so wearie of the world, as like an
headlong *hotspur* voluntarilie to run to his vtter and vndoubted de-
struction.

Holinshed. Chronicles of Ireland, Anno 1539.

The *hot-spurre* youth so scorning to be crost,
Take then to you this dame of mine, quoth hee,
And I without your perill or your cost,
Will challenge yond same other for my fee.

Spenser. Faerie Queene, book iv. can. 1.

To draw Mars like a young Hippolytus, with an effeminate coun-
tenance, or Venus like that *hot-spurred* Harpalice in Virgil, this pro-
ceedeth from a senseless judgement.

Peacham.

In vain the sight dejected to the ground
Stoops for relief; thence *hot-ascending* steams,
And keen reflection pain.

Thomson. Summer

When Lee makes temperate Scipio fret and rave,
And Hannibal a whining amorous slave,
I laugh, and wish the *hot-brain'd* fustian fool
In Busby's hands, to be well lash'd at school

Rochester. An allusion to the Tenth Satire of the first Book of Horace.

I fear my people's faith:
The *hot-mouthed* beast that bears against the curb,
Hard to be broken even by lawful kings.

Dryden. The Spanish Fryer.

Contiguous to the cold bath is another of a moderate degree of
heat, which enjoys the kindly warmth of the sun, but not so intensely
as that of the *hot-bath*, which projects further.

Melmoth. Pliny to Apollinaris, book v. let. 6.

Hail, genial *hot-bed* [St. Stephen's], whose prolific soil
So well repays all North's perennial toil,
Whence he can raise, if want or whim inclines,
A crop of votes, as plentiful as pines.

Mason. Epistle to Dr. Shebbeare.

By means of glasses, *hot-beds* and *hot-walls*, very good grapes can
be raised in Scotland, and very good wine too can be made of them,
at about thirty times the expence for which at least equally good can
be brought from foreign countries.

Smith. Wealth of Nations, book iv. ch. xi.

HOTCH-POT, or } Fr. *hoche-pot*; D. *hutspot*.
HODGE-PODGE, } Kilian says, "so called a *concu-*
HODGE-PUDDING. } *tiendo*, from *hutsen*, or *hutselen*,
to shake, (Engl. *hustle*,) because the meats cut to pieces
and boiled in their own liquor, are *shaken* and tossed
and turned about by the cook."

A mixture of various things *shaken* together in the
same pot. Tyrwhitt.

Ye han cast alle hir wordes in an *hoche-pot*.

Chaucer. The Tale of Melibeus, vol. ii. p. 95.

[He] thrusteth them in together, makynge of them an *hoche-poche*,
all contrarye to the wholesome doctryne of Saynt Paule.

Bale. Apology, fol. 33.

A goodly *hotch-potch*! when vile russetings
Are match'd with monarchs, and with mighty kings.

Hall. Satire 3. book i.

HOT.

HOTCH-
POT.

HOTCH-
POT.

FORD. What, a *hodge-pudding*? A bag of flax?
MIST. PAGE. A puffed man.
Shakspeare. Merry Wives of Windsor, fol. 60.
The first delighting in *hodge-podge*, gallimaufries, forced meats, &c.
King. Art of Cookery.

A bad artist will make but a mere *hodge-podge* with the same materials that one of a good taste shall prepare an excellent olio.
Lansdown. The British Enchantress.

This word, *satura*, has been afterward applied to many other sorts of mixtures; as Festus calls it, a kind of olla, or *hotch-potch* made of several sorts of meats.

Dryden. On the Origin and Progress of Satire.

But what can all this rambling mean?
Was ever such an *hodge-podge* seen.

Lloyd. A Tale.

With us it is denominated bringing those lands into *hotch-pot*, which term I shall explain in the very words of Littleton: "it seemeth that this word *hotch-pot* is in English a pudding; for in a pudding is not commonly put one thing alone, but one thing with other things together."

Blackstone. Commentaries, book ii. ch. xii.

Sir Edward Coke (*Lit. iii. 12.*) has given numerous examples of Legal HOTCHPOT; the following may be accepted as one of the most simple. If a man seized of thirty acres of land in Fee hath issue only two daughters, and he gives with one of them ten acres in marriage to the man who marries her, and dies seized of the other twenty acres, in order to gain her share of those twenty, she must put her ten into Hotchpot; or, in other words, she must refuse the sole profits to which she is already entitled, and cause her land to be mingled with the other, so that an equal division may be made of the whole.

"By this housewifely metaphor," continues Blackstone in the passage of which we have already cited part above, "our ancestors meant to inform us that the lands, both those given in Frankmarriage, and those descending in Fee Simple, should be mixed and blended together, and then divided in equal portions among all the daughters. But this was left to the choice of the donee in Frankmarriage, and if she did not chuse to put her lands into Hotchpot, she was presumed to be sufficiently provided for, and the rest of the inheritance was divided among her other sisters. The Law of Hotchpot took place then only when the other lands descending from the ancestor were Fee Simple; for if they descended in Tail, the donee in Frankmarriage was entitled to her share without bringing her lands so given into Hotchpot. And the reason is, because lands descending in Fee Simple are distributed by the policy of the Law for the maintenance of all the daughters: and if one has a sufficient maintenance out of the same inheritance equal to the rest, it is not reasonable that she should have more; but lands descending in Tail are not distributed by the operation of the Law, but by the designation of the giver, *per formam doni*; it matters not, therefore, how unequal this distribution may be. Also, no lands but such as are given in Frankmarriage shall be brought into Hotchpot, for no others are looked upon in Law as given for the advancement of the Woman, or by way of marriage portion. And, therefore, as gifts in Frankmarriage are fallen into disuse, I should hardly have mentioned the Law of Hotchpot, had not this method of division been revived and copied by the Statute for distribution of personal estates."

By that Statute, 22 and 23 Car. II. c. 10, money may be brought into Hotchpot. As where a certain sum is to be raised and paid to a daughter for her portion by a marriage settlement, this has been determined to be

an advancement by the Father in his lifetime, though future and contingent. If, therefore, the daughter would have benefit of her father's estate, she must bring this money into Hotchpot.

COLLATIO BONORUM, in the Civil Law, answers to Hotchpot. If a child advanced by the father, after the father's decease challenges a child's part with the rest, he must call in all that he formerly received, and then take out an equal share with the others.

In the custom of London there is a term Hotchpot, whereby the children of a Freeman are to have an equal share of one-third part of his estate after his decease.

HOTTONIA, in Botany, a genus of the class *Pentandria*, order *Monogynia*. Generic character: corolla salver-shaped; stamens placed in the tube of the corolla; stigma globular; capsule one-celled.

Four species, natives of Europe and the East Indies. *H. palustris* is an elegant native of England, growing in watery places.

HOVE, } Past tense and past participle of the
Ho'VED, } verb to *heave*, and upon which the verb to
Ho'VEN. } *hove* is formed.

See to HUFF; and the Quotations there from Holland's Pliny.

Tom Piper hath *hoven* and puffed up cheeks,
If cheese be so *hoven*, make Ciss to seek creeks.

Tusser. April's Husbandry. Lesson for Dairy Maid.

But if it thunder withall, then sodainly they shut hard at once, and breed only those excrescences which be called *physemata*, like unto bladders puffed up and *hooved* with wind, and no corporall substance at all.

Holland. Plinie, book ix. ch. xxxv.

The earth also for her part, by this meanes well soaked, swelleth and *hooveth* as it were with a leaven, and lieh thereby more light and mellow.

Id. Ib. book xvii. ch. ii.

At last, all things being prepared, they, on 22nd of February, in the morning, *hove* out the first course of the Centurion's starboard side, and had the satisfaction to find her bottom appeared sound and good.

Anson. Voyage round the World, ch. vii. book iii.

HOVE. See to HOVER. To *heave*, or be *heaved* or raised aloft, (sc.) suspended; to be or remain in suspense, to remain, to stay, to abide.

Morond, Erl of Gloucestre, myd ys ost by syde
In an valeye *houede*, þe endynge vorto abyde.

R. Gloucester, p. 218.

But at the yate there she should out ride
With certain folke he *houed* her to abide.

Chaucer. Troilus, book v. fol. 184.

And he his hors head aside
Tho torned, and to hir he rode,
And there he *houed*, and abode
To wit what she wolde mene.

Gower. Conf. Am. book i. fol. 16.

Upon Candelmas euen, the maior being warned that the king should come to Westminster, he with the more part of the aldermen came vnto Knights Bridge, and *houed* there to salute the king, and to know his further pleasure.

Grafton. Henry III. The forty-first Yere.

One day, as he forepassed by the plaine
With weary pase, he farre away espide
A couple (seeming well to be his twaine)
Which *houed* close vnder a forest side,
As if they lay in wait, or else themselues did hide.

Spenser. Faerie Queene, book iii. can. 10.

But I by that which little while I prooued,
Some part of those enormities did see,
The which in court continually *houed*,
And followed those which happy seem'd to be.

Id. Colin Clout's come home again.

HOTCH-
POT.
—
HOVE.

HOVEA.

HOVER.

HOVEA, in *Botany*, a genus of the class *Diadelphica*, order *Decandria*, natural order *Leguminosæ*.
Generic character: calyx two-lipped, superior lip slightly two-cleft, retuse; all the stamens connected; keel of the corolla obtuse; pod sessile, roundish, inflated, two-seeded.

Two species, natives of New South Wales.

HO'VEL, v. } Henshaw (in Skinner) derives from
 Ho'VEL, n. } A. S. *hove*, a house. Tooke considers
 Ho'VEL-POST. } it to be the diminutive of *hove*,
 (whence also probably the *hove* of Henshaw,) the past
 participle of *heave*. *Hovel*, therefore, is
 A small raised building.

And was't thou faine (poore father)
 To *houell* thee with swine and rogues forlorne,
 In short, and musty straw.

Shakspeare. *Lear*, fol. 305.

No town in Spain, from our metropolis
 Unto the rudest *hovel*, but is great
 With your assured valors daily proofs.

Beaumont and Fletcher. *The Martial Maid*, act v.

LAU. Do I look like a cudgell or a *houell*-post, a staffe or a prop.
 Shakspeare. *Merchant of Venice*, fol. 168.

And Penury and Sloth of squalid mien
 Beneath the roofless palace walls are seen
 In savage *hovels*, where the tapst'ried floor
 Was trod by nobles and by kings before.

Mickle. *Almada Hill*.

HOVENIA, in *Botany*, a genus of the class *Pentandria*, order *Monogynia*. **Generic character**: calyx five-parted; corolla, petals five, convoluted; stigma three-cleft; capsule three-celled, three-valved, cells one-seeded.

One species, *H. dulcis*, a tree, native of Japan; the stalk of the fruit is fleshy and eatable.

HO'VER, v. } Skinner thinks may be either from
 Ho'VER, n. } the A. S. *heaf-ian*, to heave, to raise,
 Ho'VERER, } to elevate; or from the verb to *cover*.
 Ho'VERLY. } There is little doubt that *hover* (with-
 out the aspirate—*Over*—q. v.) is from the past tense
hove, of the verb to *heave*.

To raise or rise aloft, to stay or remain aloft or *over*,
 (sub. in flight; fluttering;) to be or remain in suspense;
 to keep or move near or about, (sc. as if to pounce upon
 —like a bird of prey.)

And as a sillie kight (not falcon like that flie,
 Nor yet presume to *houver* by mount Hellycon on hie)
 I frendly yet presume, vpon my frend's request,
 In barreine verse to shew my skill, then take it for the best.
 Gascoigne. *Hearbes*. Councell to Duglasse Diue.

This fleete *houered* about the Streights of Gibralter.

Hakluyt. *Voyages*, &c. vol. ii. fol. 286. *Fight in the Levant*.

My mynde was but *houerly* and faintlye moued to synne, euen as
 we are wonte sklenderlye to loue suche thinges, whereof we maie,
 when we luste, haue our pleasure.

Udall. *Romaines*, ch. vii.

Had not this been, I would haue commen to you now, but I would
 not see you now *houerly*, & in my passage.

Id. 1 *Corinthians*, ch. xvi.

Thus scarcely said the Muse, but *hovering* while she hung
 Upon the Celtic wastes.

Drayton. *Poly-olbion*, song 1.

The soaring kite there scantled his large wings,
 And to the ark the *hovering* castril brings.

Id. *Noah's Flood*.

But it was scornefull Braggadochio,

That with his servant Trompart *hover'd* there,
 Sith late he fled from his too earnest foe.

Spenser. *Faerie Queene*, book iii. can. 10. st. 23

The pond also breedeth crabs, eels, and shrimps; and in the be-
 ginning, oysters grew upon the boughs of trees, (an Indian miracle)
 which were cast in thither to serue as a *houer* for the fish.

Carew. *Survey of Cornwall*.

About him flew the clamors of the dead,
 Like fowles; and still stoopt cuffing at his head.
 He with his bow, like Night, stalkt vp and downe;
 His shaft still nockt: and hurling round his frowne,
 At those vext *houerers*, aiming at them still.

Chapman. *Homer. Odyssey*, book xi. fol. 177.

Did not his arm the ranks of war deform,
 And point the *hovering* tumult where to storm.

Pitt. *On the Death of the late Earl Stanhope*.

He [Gray] too, perchance, (for well I know
 His heart can melt with friendly woe)
 He, too, perchance, when these poor limbs are laid,
 Will heave one tuneful sigh, and sooth my *hov'ring* shade.

Mason. *Ode 7*.

HOUGH, v. } A. S. *hoh*, poples, the ham of
 HOUGH, n. } one's leg behind the knee; *it. suf-*
 HOUGH-STRING. } *frago*, the *hough* of a beast. Som-
 ner.

To *hough* or *hock* the hamstrings is to cut, to *hew* the
 hamstrings; and the *hough*, or *hack*, the part cut or
howed.

To cut, (hew or hoe,) *sub.* the ham or hamstrings.

Thou shalt *hough* theyr horses, and burne their charettes with fyre.
 Bible, Anno 1551. *Josua*, ch. xi.

He then drew his sword, and bare off the blows as well as he
 could, untill they *hought* him, that he fell to the ground.

Sir Thomas North. *Plutarch*, fol. 867. *Galba*.

Vpon the formost hatches or rowers banks stood armed men close
 together with their shields couched thick over their heads, others
 also behind them stooping somewhat lower, and a third sort by de-
 grees bending their bodies down: so as the hindmost resting upon
 their *houghes* or *hammes*, made a shew of an arched building.

Holland. *Ammianus*, fol. 298. *Valentinianus and Valens*.

Many men for old age feeble, and women also now farre stricken
 in yeares, when they fainted upon sundrie causes, as being offended
 with travailling so farre, casting off all desire to live any longer, had
 the calves of their legges or *hough-strings* cut, and so were left
 behind.

Id. *Ib.* fol. 129. *Constantius and Julianus*.

————— Hath he not *ham-strings*

That thou must *hough*.

Heywood. *A Woman kill'd with Kindness*.

HOUGH, i. e. to hawk or haw, q. v.

HOUND, v. } Goth. *hunds*; A. S. *hund*; D. *hond*;
 HOUND, n. } Ger. and Sw. *hand*. From the A. S.
 HOUND-FISH. } *huntian*, *hent-an*, to pursue, to search

after. Wachter objects that the name was applied
 generally to all dogs, not merely to *hunting* dogs; and
 would derive the verb from the noun. Skinner doubts.

—To *hound*, is

To hunt, to pursue or cause to pursue; to set on,
 in chase of, in attack upon, the game, the prey.

War vor hii nolde for non man nanmore to hem wende,
 þan to so many *houndes*, bote yt were hem to ssende.

R. Gloucester, p. 234.

þe kȳng biheld him a stound, & sauh no repentance,
 He bad drawe away þat *hound*, God has taken vengeance.

R. Brunne, p. 55.

With *houndes* bred and hors bred. nele þem when þei hungren.
 Piers Plouhman. *Vision*, p. 139.

And no man gaf to him, but *houndis* camen and likkiden hise bylis.
 Wiclif. *Luke*, ch. xvi.

Of smale *houndes* hadde she, that she fedde
 With rosted flesh, and milk, and wastel brede.

Chaucer. *The Prologue*, v. 146.

With thicke bristles of his berd unsoft,
 Like to the skin of *houndfish*. sharp as brere.

Id. *The Marchantes Tale*, v. 9699.

HOVER.

HOUND.

HOUND.
—
HOUR.

This Acteon, as he well might
About all other cast his chere,
And used it from yere to yere,
With *houndes*.

Gower. *Conf. Am.* book i. fol. 9.

Hold good sword, but this day,
And bite hard where I *hound* thee, and hereafter
I'll make a relique of thee, for young souldiers
To come like pilgrimes to, and kiss for conquests.
Beaumont and Fletcher. Bonduca, act iii.

All as the shepheard that did fetch his dame
From Plutoes balefull bowre withouten leave;
His musickes might the hellish *hound* did tame.
Spenser. Shepherd's Calendar. October.

But yet much adoe they haue and hard hold with these *hound-fishes*
notwithstanding; for they lay at their bellies and groines, at their
heelles and snap at everie part of their bodies that they can perceive
to be white.
Holland. Plinie, book ix. ch. xlvi.

CAIUS MAR. I shall be *hounded* up and down the world,
Now every villain, that is wretch enough
To take the price of blood, dreams of my throat.
Otway. Caius Marius, act iv. sc. 2.

See there with countenance blithe
And with a courtly grin, the fawning *hound*
Salutes thee cowering, his wide opening nose
Upward he curls, and his large sloe-black eyes
Melt in soft blandishment, and humble joy.
Somerville. The Chase.

HOUR, } Fr. *heure*; It. and Sp. *hora*;
HO'URLY, *adj.* } Lat. *hora*. See HORAL, *ante*.
HO'URLY, *adv.* } A determinate portion of time;
HOUR-GLASS, } certain fixed or determinate por-
HOUR-LINE. } tions of time, into which the day is
divided; into which the surface of a dial or timepiece
is divided.

Hours,—as used by Bale and Spenser, (See *Heures*
in Cotgrave, and *Hora Canonica* in Du Cange,) prayers
or devotions at stated *hours*; also a book of prayers or
devotions.

be soure & twenty *houres* he spende in holy life.
be ferst. viii. *houres* in praier alderbest,
be toper. viii. *houres* in slepe and in rest.
be prid. viii. *houres* he studied, how he myght
Mayntene be lond with lawe, his folk hald to right.
R. Brunne, p. 23.

And aboute the nynthe our Jhesus cried with a greet vois and seide,
Hely, Hely, lamasabatany, that is, my God, my God, whi hast thou
forsaken me?
Wiclif. Matthew, ch. xxvii.

And aboute the ninth *houre* Jhesus cried wyth a loud voyce, sayinge;
Eli, Eli, lama asbathani. That is to say: My God, my God, why
hast thou forsake me?
Bible, Anno 1551.

And on a day befell, that in that *houre*,
Whan that his mete wont was to be brought,
The gailer shette the dores of the toure;
He hered it wel, but he spake right nought.
Chaucer. The Monkes Tale, v. 14733.

His *hours* of astronomie
He kepeth.
Gower. Conf. Am. book vi. fol. 134.

None ende is there of their babiling prayers, their portases, bedes
temples, aulters songes, *houres*, &c.
Bale. Image of both Churches. Preface.

The Dukes of Clarence, Gloucester and Yorke were of the same
opinion, thinkyng it most conuenient to marche towarde theyr enemies
with al spede & celeritie, least in prolongyng of tyme and arguynge
of *opinions*, the Frenche armye might more and more increase &
hourly multiply.
Hall. Henry V. The thyrd Yere.

We coude learne nothyng therof by enquiry: but we saw it tryed
bi *houre-glasses* of water, that the nightes were shorter there, then
in the firme lande.
Arthur Goldyng. Caesar. Commentaries, book v. fol. 117.

For from the first that I her love profest,
Unto this *houre*, this present lucklesse *houre*,
I never ioyed happinesse nor rest.
Spenser. Faerie Queene, book iv. can. 9.

Therein the hermite, which his life here led
In straight obseruance of religious vow,
Was wont his *houres* and holy things to bed.
Spenser. Faerie Queene, book vi. can. 5.

Whose silver gates (by which there sat an hory
Old aged sire, with *hower-glasse* in hand,
Hight Time) she entred, were he lief or sory.
Id. Ib. Two Cantos of Mutabilitie, can. 6.

And solitude in a dark cave,
Where all things hush'd, and silent be,
Resembleth so the quiet grave,
That there I would prepare to flee,
With death, that *hourly* waits for me.
Cotton. The World.

Latona, and her carelesse Nymphs,
(Regardless of my sorrowes) bathe themselves
In *hourely* pleasures.
Ben Jonson. Cynthia's Revells, act i. sc. 2.

The same first mover certain bounds has plac'd,
How long these perishable forms shall last;
Nor can they last beyond the time assign'd
By that all-seeing and all-making mind:
Shorten their *hours* they may; for will is free;
But never pass th' appointed destiny.
Dryden. The Cock and the Fox.

A thousand unforeseen accidents will ever be crossing his designs.
Nor will there be wanting some little thing or other, almost *hourly*,
to put him out of humour.
Sharpe. Works, vol. i. Sermon 2.

None could owne it [the Christian religion] but he must at the
same time deny all his temporal interests, quit his friends, his repu-
tation, and all his fortunes in this world, and live in *hourly* expecta-
tion of a martyrdom.
Id. Ib. Sermon 6.

The schoolmen's notion of times depending on the motions or exist-
ence of the material world, is as senseless, as the supposing it to de-
pend on the turning of the *hour-glass*.
Clarke. On the Attributes, p. 491.

It is no more than to think, that had the sun shone then on the
dial, and mov'd after the same rate it doth now, the shadow on the
dial would have pass'd from one *hour-line* to another, whilst that
flame of the candle lasted.
Locke. Of Human Understanding, book ii. ch. xiv. sec. 28.

The boast of heraldry, the pomp of power,
And all that beauty, all that wealth e'er gave,
Await alike th' inevitable *hour*,
The paths of glory lead but to the grave.
Gray. Elegy written in a Country Churchyard.

You stand in daily and *hourly* need of some superior aid, without
which the very ground you stand upon, firm and sure as it seems to
be, may sink under your feet.
Porteus. Tracts. To the Inhabitants of Manchester, &c.

He adds, that Mons. le Blon had another picture by Holbein of a
learned man, and Death with an *hour-glass*, and a building behind.
Walpole. Anecdotes of Painting, vol. i. p. 120, note.

HOUSE, *v.* } A. S. *hus*; D. *huys*; Ger. *hauss*;
HOUSE, *n.* } Sw. *hus*. Wachter decides for the
HO'USELESS, } Ger. *huten, tegere*, (i. e. A. S. *hid-an*,
HO'USING. } to hide,) to conceal, to cover. From
the A. S. *hiwan, formare, fabricare*, was formed the
A. S. *hi-we*, a house, and *hi-wisce*, familia, a family or
household; and it is not improbable, that *hus*, a house,
had the same origin; meaning,

Any thing framed or built; *sc.* for covering, shelter,
or protection, dwelling or abiding, for a place of resi-
dence; also applied to the family so dwelling, or who
have so dwelt; to persons assembling under one roof;
to the mode or manner of living. And see the Quota-
tion from Smith's *Commonwealth*.

To house, to build, raise or erect a house; to cover,
shelter, or protect; to dwell, abide, or reside; to cause
to shelter, or take shelter, to drive to shelter.

House is much used in Composition.

HOUR.
—
HOUSE.

HOUSE. *House-leek*, in Botany, the trivial name of the *Sempervivum tinctorium* of Linnæus.

Heo *howsede* and bulde faste, and ered and sewe,
So þat in lutel while gode cornes hem grew.
R. Gloucester, p. 21.

Fram Rome he broȝte an heste, that me here nome
Petre's peni of ech *hous*, that smoke out of come.
Id. p. 493.

Saynt Cutberte's clerkes in hidnes euer gede,
At Geruans set þer merkes, a *hous* þe gan vpspede.
R. Brunne, p. 77.

As wel freres as oper folk, folleliche spenden
In *housing* and in helyyng.
Piers Plouhman. Vision, p. 276.

And every man that forsakith *hous*, brethren or sistren, fadir or
modir, wyf either children or feeldis for my name, he shall have an
hundrid fold, and shal welde everlastyng lyf.
Wiclif. Matthew, ch. xix.

And whosoever forsaketh *houses*, or brethren, or systers, other
father or mother, or wyfe or chyliden, or landes for my name's sake,
the same shal receaue an hundred folde, and shall inherit euerlastyng
lyfe.
Bible, Anno 1551.

Yet wolde his herte on other fall,
And thinke hem more delicious,
Than he hath in his owne *hous*.
Gower. Conf. Am. book vi. fol. 132.

That I by night maie arise,
At some wyndowe and loken out,
And see the *howsinge* al about.
Id. Ib. book v. fol. 120.

Ah God! too long heere wander I banished,
Too long abiding barbarous injury;
With Kedar and with Mesech harbour'd,
How? in a tent, in a *houselesse* harbour.
Sidney. Psalm cxx.

If the rent of any kind of *housing* or ground within the city of Lon-
don were raised, as there was indeed very much, from ten shillings to
twenty shillings, then might the parson, who had before but 16. d. ob.
by virtue of this act demand 2. s. q. the double.
Crowly in Strype. Memorials. Edward VI. Anno 1548.

So fourth they far'd; but he behind them stay'd,
Maulgre his host, who grudged grivously
To *house* a guest that would be needes obay'd,
And of his owne him left not liberty.
Spenser. Faerie Queene, book iii. can 10.

Sog. In good time, sir; nay, good sir, *house* your head.
Ben Jonson. Every Man in his Humour, act iii. sc. 6.

The *house* I call here the man, the woman, their children, their
seruant's bond and free, their cattle, their *household-stuffe*, and all other
things which are reckoned in their possession, so long as all these
remaiue together in one.

Smith. Commonwealth, book i. ch. xi.
How shall your *houselesse* heads and vnfed sides,
Your lop'd, and window'd raggednesse defend you
From seasons such as these?
Shakspeare. King Lear, fol. 297.

And not as sommer birds, by and by in the fall of the leafe, to looke
about and seeke for *housing*, harbour, and covert.
Holland. Livius, fol. 183.

He and two of his men had picked out their match to assault one
of his men, three against one, and yet the said Bishop, as he under-
stood, his single man *housed* them all.
Strype. Life of Bishop Aylmer.

And, *housing* in the lion's hateful sign,
Bought Senates and deserting troops are mine.
Dryden. Palamon and Arcite, book iii.

Then thus the Prince: "To these shall we afford
A fate so pure as by the martial sword?
To these, the nightly prostitutes to shame
And base revilers of our *house* and name."
Pope. Homer. Odyssey, book xx.

If thither comes a warrior when the place
No knight has *hous'd*, the lord with courteous grace
Admits the entering guest, but makes him swear
That should a new one to the rock repair,
His arm the stranger on the plain shall meet.
Hoole. Orlando Furioso, book xxiii. l. 467.

The *houses* at Rome are of stone but plastered as at Vienna, Berlin,
and other transalpine cities; the plaster, or stucco, is extremely hard,
and in a climate so dry may equal stone in solidity and duration.
Eustace. Classical Tour through Italy, vol. ii. ch. i.

Why scornful Folly from her gaudy couch
At starving *houseless* Virtue points reproach.
Warton. Fashion, a Satire.

HOUSE, in Composition. And see **HUSWIFE.**

And Abraam for al hus good, hadde muche teerre
In gret poverté was y put. a pryns as hit were
By nom hym ys *housewif*, and heeld here hymself.
Piers Plouhman. Vision, p. 214.

If thei han clepid the housbonde man Belzebub: how myche more
hise *household* meynnee?
Wiclif. Matthew, ch. x.

If they haue called the Lord of the *house* Belzebub: how much more
shall they call them of hys *householde* so?
Bible. Anno 1551.

Therefore I wole, that ghongere widewis be weddid and brynge forth
children and be *housewyues* to ghyue noon occasion to the aduersarie
bi cause of cursid thing.
Wiclif. 1 Timothy, ch. v.

For wel ye know, a lord in his *household*
Ne hath nat every vessell all of gold:
Som ben of tree.
Chaucer. The Wif of Bathes Prologue, v. 5681.

An *householder*, and that a grete was he;
Seint Julian he was in his contree.
Id. The Prologue, v. 341.

Dame Richesse on her honde gan lede
A yong man full of semely hede
That she best loued of any thing
His lust was much in *householding*.
Id. The Romant of the Rose, fol. 121.

In case he shewe hym selfe there a vigilaunt *housekeeper*, yf he kepe
all thyng in ordre, yf he haue obedyent and diligent children, yf they
be so taughte that in sobre stylnes and comely manners they maye
appeare to be brought vp vnder a godly parent, it is a good hope that
he is wel hable to take the publique charge of all, that in the admi-
nistration of his owne *householde* busynes gyueh so good a presidence
of himselfe.
Udall. Timothy, ch. iii.

To furnish *house* with *householdry*,
And make provision skilfully.
Tusser. The Ladder to Thrift.

And if a plotte for *houseroume* muste
be sowght for, first of all: &c.
Drant. Horace. Epistle to Fuscus Aretius.

And ofte the owle with ruful song complain'd
From the *house-top*, drawing long dolefull tones.
Surrey. Virgil. Æneis, book iv.

Housewife, like to doe the worke of a wife. She doeth the duety
of a good wife: Ergo she is a wife. She handlet al things *house-
wifely*: Ergo she is a good *housewife*.
Wilson. Arte of Logike, fol. 58.

These things to heare
Would Desdemona seriously incline:
But still the *house-affaires* would draw her hence.
Shakspeare. Othello, fol. 314.

Of domesticall and tame *house-bees*, there are two sorts.
Holland. Plinie, book xi. ch. xviii.

Cruelty (being fleshed as it were, exercised and inured in these and
such like slaughters) proceeded even to the poor labouring ox, to the
silly sheepe, that doth clad and trim our bodies, yea, and to the *house-
cock*.
Id. Plutarch, fol. 475.

We see men present heere before us, which never went from the
smoke of the chimney, nor carried away any blows in the field, being
crammed at home like women and *house-doves*.
Sir Thomas North. Plutarch, fol. 218. *Paulus Æmylius*.

HOUSE.

Sparrowes must not build in his *house-eeues*.

Shakspeare. Measure for Measure, fol. 74.

With their haire loose hanging downe their shoulders, and in other most poor array and ruffull habit, able to have moved pittie and compassion, they were fled into a privat oratorie or chappell unto their *house-gods*, to save themselves.

Holland. Livius, fol. 526.

The rankness of *house-keeping* brake not out into any riot; and a chapter was constantly read every meal, by one kept for that purpose.

Fuller. Worthies. Hant-shire.

The marble pavement hid with desert weed,
With *house-leek*, thistle, dock, and hemlock-seed.

Hall. Satire 2. book v.

Hymfrey, Germ. for Humfred, *house-peace*, a louely and happy name, if it could turne *home-warres* betweene man and wife into peace.

Camden. Remaines. Names, p. 75.

But go thy waies to him, and fro me say
That here is at his gate an errant knight,
That *house-roome* craves.

Spenser. Faerie Queene, book vi. can. 3.

A part whereof is *œconomia*, commonly called *house-rule*, considering that a city is no other, then an assembly of many *housholds* and *houses* together.

Sir Thomas North. Plutarch, fol. 303. *Aristides and Cato*.

Oswold, Germ. *house-ruler* or steward: for wold, in old English and high Dutch, is a ruler.

Camden. Remaines. Names, p. 82.

In that extream want and scarcitie that then was, every man out of his *house-store* and provision spared from himselfe, and for to give him one thing or another, defrauded his owne bellie.

Holland. Livius, fol. 51.

A gentleman of Ægina dying, left three daughters; the one was beauteous and wanton; the second a lover of wine and gay pleasures; and the third a good spinster, and a great follower of countrey *house-wifery*.

Taylor. Rule of Conscience. Preface.

Where Venus, onely soft-skinn'd wench fills
With wanton *house-works*, and suggests those skills
Still to their studies.

Chapman. Homer. Hymn to Venus.

She is always seeing apparitions, and hearing death-watches; and was the other day almost frightened out of her wits by the great *house-dog* that howled in the stable at a time when she lay ill with the tooth-ach.

Spectator, No. 7.

But still you bring your exil'd gods along:
And will endeavour, in succeeding space,
Those *household-puppets* on our hearths to place.

Dryden. The Hind and Panther.

With thee, thy sons, and tender wife, prepare
The toils of war and banishment to bear;
And holy *household-gods* thy sorrows share.

Rowe. Lucan, book ii.

If they are accidentally discovered, they will remove again; which they can easily do; their *household-goods* being little else but their cotton hammacks, and their callabashes.

Dampier. Voyages, Anno 1676.

In the often-cited digression about respiration, there is mention made of the great vivaciousness of *house-snails*, as they call them.

Boyle. Works, vol. iii. p. 385. *Pneumatical Experiments*.

This being a day of business with me, I must make the present entertainment like a treat at an *house-warming*, out of such presents as have been sent me by my guests.

Spectator. No. 518.

They were not (in their refined sense) godly and regenerate; nor allowed to be godly, because they would not espouse a faction by resorting to their congregational *house-warming* meetings.

South. Sermons, vol. iv. p. 64.

The Saxon word *bote*, is used by us as synonymous to the French *atouers*, (that is necessities, from *estoffer*, to furnish,) and therefore *house-bote* is a sufficient allowance of wood to burn in the house.

Blackstone. Commentaries, book ii. ch. iii.

Any one who attends to all their own descriptions, narratives, and dissertations, will find in that whole place more of the air of a body of assassins, banditti, *house-breakers*, and outlawed smugglers, than any thing of the refined and perfected virtues, or the polished, mitigated vices of a great capital.

Burke. On a Regicide Peace, let. 4.

II. Burglary, or nocturnal *housebreaking*, *burgi latrocinium*, which by our ancient law was called *hamesecken*, as it is in Scotland to this day, has always been looked upon as a very heinous offence.

Blackstone. Commentaries, book iv. ch. xvi.

The cat, in its savage state, is three or four times as large as the *house-cat*, the head larger, and the face flatter.

Pennant. British Zoology. Wild Cat.

On his [Henry Cooke] return, neither rich nor known, he lived obscurely in Knave's-acre in partnership with a *house-painter*.

Walpole. Anecdotes of Painting, vol. iii. p. 223.

His [Inigo Jones] fee as surveyor was eight shillings and four pence per day, with an allowance of forty-six pounds a year for *house-rent*, besides a clerk, and incidental expences.

Id. Ib. vol. ii. p. 267.

HOUSE, v. } The Fr. *houseau*, Cotgrave calls,
HOUSE, n. } "a coarse drawer worn over a stocking
HO'USING. } instead of a boot." It appears to be
the same word as *hose*; q. v. Applied to
The coverings of a horse.

He [the Protector] was carried from Somerset-house in a velvet bed of state drawn by six horses, *houss'd* wth y^e same.

Evelyn. Memoirs, Oct. 22, 1658.

The cattle used for draught in this country [Bologna] are cover'd with *houssings* of linnen fring'd at the bottome, that dangle about them, preserving them from flies, w^{ch} in sum'er are very troublesome.

Id. Ib. 1645.

Ev'n still, methinks, I see Phæocomes;
Strange was his habit, and as odd his dress.
Six Lyons' hides, with thongs together fast;
His upper part defended to his waist;
And where man ended, the continued vest
Spread on his back the *houss* and trappings of a beast.

Dryden. Ovid. Metamorphoses, book xii. *The Lapithæ and the Centaurs*.

By help mechanic of equestrian block,
Yet shall he mount, with classic *houssings* grac'd,
And, all unheedful of the critic mock,
Drive his light courser o'er the bounds of taste.

Lloyd. Two Odes, ode 1.

HO'USEL, v. } A. S. *husel*, the Eucharist or Sacra-
HO'USEL, n. } ment of the Lord's Supper, perhaps
HO'USEL-BOX, } from *hostia*. *Huslian*, to administer
HO'USLING. } or give the communion, to *housle*.
Somner. Junius derives from the Goth. *hunsl*, a victim,
a sacrifice, (n. *abjecto*.) Skinner prefers *hostiola* to
Somner's *hostia*.

Heo let hÿre ssrÿue & hosely.

R. Gloucester, p. 392.

_____ & deÿde without spech,
Wÿpoute ssrÿft & hosel, anon þer was Gode's wreche.

Id. p. 419.

_____ Consailest thou ous to gelde
Al þat we owen enÿ wÿght, er we go to housle.

Piers Plouhman. Vision, p. 386.

And certes ones a yere at the lest way it is lawful to be *housled*,
for sothely ones a yere all thinges in the erthe renovelan.

Chaucer. The Persones Tale, vol. ii. p. 383.

But for as moch as man and wife
Shuld shew her parish Priest her life
Ones a yere, as saith the boke
Er any wight his *housel* toke.

Id. The Romant of the Rose, fol. 145.

And he schrofe hym and *hoselde* on that grounde,
And assoyled hym.

Ritson. Met. Rom. vol. iii. p. 33. *Le Bone Florence of Rome*, v. 776.

And they haue a cloake vpon their left shoulder descending before
and behind vnder their right arme, like vnto a deacon carrying the
houssel-box, in time of Lent.

Hakluyt. Voyages, &c. vol. i. fol. 115. *The Tartars*.

Antalcidas making means to be admitted into the confraternity of the
Samothracian religion, when the priest his confessor, in *housing*
and shriving him, demanded which was the greatest sin that ever he

HOUSE.

HOUSEL.

HOUSEL. had committed in all his life? If (quoth he) I have committed any sin all my lifetime, the gods know the same well enough themselves.
HOW. *Holland. Plutarch, fol. 374.*

His owne two hands the holy knots did knit,
 That none but death for euer can diuide;
 His owne two hands, for such a turne most fit,
 The *housing* fire did kindle and prouide,
 And holy water thereon sprinkled wide.
Spenser. Faerie Queene, book i. can. 12.

We fast the eaue, we feast the day
 Of euery saint they make,
 Their *housing*s, shrifts, and sacraments,
 Most reuerently we take.

Warner. Albion's England, book v. ch. xxiii.

HOUSTONIA, in *Botany*, a genus of the class *Te-trandria*, order *Monogynia*. Generic character: corolla of one petal, funnel-shaped; capsule two-celled, two-seeded, superior.

A genus chiefly of North American plants; their flowers are elegant, particularly *H. coccinea*, native of Mexico.

HOUTTUYNIA, in *Botany*, a genus of the class *Polyandria*, order *Polygynia*. Generic character: calyx four-leaved; corolla none; stamens intermixed with the pistils; capsule three-angled.

One species, *H. cordata*, native of Japan.

HOW, } A. S. *hu*; D. *hoe*; Ger. *wie*;
HOW-BE-IT, } perhaps from the A. S. *heow*, *hiwe*,
HOW-EVER, } *hiewe*, from *hiwan*, to form or
HOW-SO, } frame; and, thus, meaning the form
HOW-SO-EVER, } or fashion, the hue. Applied to
HOW-D'YE. } The form or fashion in which;
 extended to, the manner or means, in which; the state
 or condition,—the degree, quality, quantity, number.

Now gos þis Thomas, his treson to purchase,
 Bot *how* Edward was warned þorgh Gode's (grace).
R. Brunne, p. 268.

Ich Trojanus a trywe knyght. ich tak witness of pope
How ich was ded and dampned, to dwellen in helle
 For an uncristene creature.

Piers Plouhman. Vision, p. 205.

Hou ofte wolde I gedre to gider thi children as an henne gederith
 togidere here chykens undir hir wyngis and thou woldist not?

Wiclif. Matthew, ch. xxiii.

Go up (quod he unto his knave) anon;
 Clepe at his dore or knocke with a ston:
 Loke *how* it is, and tell me boldely.

Chaucer. The Miller's Tale, v. 3433.

Sei forth (quod she) and tell me *how*.

Gower. Conf. Am. book i. fol. 8.

So felle this clerke in pouerte,
 And wist not *how* for to rise.

Id. Ib. book v. fol. 122.

The Catholique teachyng is, that the maner of Christes presence
 in the sacrament, is spiritual and supernatural, not corporal, not car-
 nall, not naturall, not sensible, not perceptible, but onely spirituall,
 the (*howe*) and maner whereof, God knoweth.

Stephen, Bishop of Winchester. On the Presence of Christes Body,
&c. fol. 55.

Cornelia, daughter vnto Scipio, was married vnto an hous, which
 was in deede great and famous, and honorable, *howbeit*, nothing able
 to bee compared with her fathers, beeing her selfe of the best bloud
 of Rome, and one of the most chief of that bloud.

Vives. Instruction of a Christian Woman, book ii. ch. v.

Whereas yet there is of al men but one God, of whome the power
 and actiutie of al thinges, *howsoever* they be wrought in men, haue
 theyr begynnynge. *Udall. 1 Corinthians, ch. xii.*

Howbeit vndoubtedly, a proper and certaine reason there is of euery
 finite work of God, in as much as there is a law imposed vpon it.

Hooker. Ecclesiastical Polity, book i.

However yet they mee despise and spight,
 I feede on sweet contentment of my thought,
 And please my selfe with mine owne selfe-delight,
 In contemplations of things heavenly wrought.

Spenser. The Teares of the Muses.

And welcome home, *howso* unfortunate;
 I will applaud what others do despise.
 I love thee for thyself, not for thy state.

Daniel. History of Civil Wars, book ii.

Howsoever, the author's conceit thus chosen is very apt.

Drayton. Poly-olbion, song 4. Note by Selden.

Howbeit, notwithstanding so plain an address (as the resurrection)
 both to men's reason and sense too, neither has this course proved so
 successful for convincing the world of a resurrection from the dead,
 and a future estate consequent thereupon, but that unbelief has been
 still putting in its objections against it.

South. Sermons, vol. iii. p. 381.

His patent has not been pass'd above eight and forty-hours and he
 has already sent *how do-ye's* to all the town to make 'em acquainted
 with his title.

Vanbrugh. Virtue in Danger, act ii. sc. 1.

However, my lord, I have laid hold on the interval, and managed
 the small stock, which age has left me, to the best advantage in per-
 forming this inconsiderable service to my lady's memory.

Dryden. Elegy 5. Eleanora. Ded.

But this I may presume to advance, that since these doctrines were
 not revealed by God, to his servant Moses, it is highly probable, that
 this legislator made a scruple of teaching them to the Israelites, *how-*
soever well instructed he might be in them himself and *howsoever*
 useful to government he might think them.

Bolingbroke. Fragments or Minutes of Essays, vol. viii. p. 63.

HOWITZER, Germ. *haubitze*; Fr. *obus*; a kind of
 mortar mounted like a gun on a field carriage; its trun-
 nions being fixed in the middle. It was invented by
 the Germans at the close of the XVIth century. (Grose,
Mil. Ant. i. 407. and see **ARTILLERY**.) The original
 name was *haufenitz*, from *haufen*, to cram, as the piece
 was usually charged to the muzzle with nails and slugs.

HOWL, *v.* } D. *huylen*; Ger. *heulen*; like the
HOWL, *n.* } Lat. *ululare*; Fr. *hurler*; It. *ululare*;
HOWLING. } Sp. *aular*; appear to be words formed
 from the sound, or noise, or cry, of certain animals,
 especially the dog and wolf.

To utter the cry or noise of, or similar to, that of, a
 dog or wolf; of a wild beast; consequentially, of dis-
 tress, lamentation, or bewailing.

Shright Emelie, and *houleth* Palamon.

Chaucer. The Knightes Tale, v. 2819.

As the twilight beginneth, you shall haue about you two or three
 hundred foxes, which make a marueilous wawling or *howling*.

Hakluyt. Voyages, &c. vol. i. fol. 400. Geffry Duckett.

When ominous signs to show themselves began
 That now at hand this monstrous birth foreran;
 About at noon flew the affrighted owl,
 And dogs in corners set them down to *howl*.

Drayton. Poly-olbion. The Moon-Calf.

Whiles the mad mothers, with their *howles* confus'd,
 Do breake the clouds.

Shakspeare. Henry V. fol. 79.

Such *howling*, such lamentations, such skriches shal be heard in
 every corner, that the hearts of men shall tremble and wither for very
 feare and expectation of those things which at that day shall befall
 them.

Hakewill. Apologie, book iv. ch. xiv. sec. 2.

Thy charming verse, and fair translations show
 How their own laurel first began to grow;
 How wild Lycaon, chang'd by angry gods,
 And frighted at himself, ran *howling* through the woods.

Addison. To Dryden.

I intreat you, my dear countrymen, not to be under the least con-
 cern upon these, and the like rumours, which are no more than the
 last *howls* of a dog dissected alive, as I hope he hath sufficiently been.

Swift. Drapier's Letters, let. 4.

Groans, cries, and *howlings* fill the crouded place,
 And unaffected sorrow sat on every face.

Dryden. Palamon and Arcite.

I have more than once observed in dogs, under an apprehension of
 punishment, that they have writhed their bodies, and yelped, and
howled, as if they had actually felt the blows.

Burke. On the Sublime and Beautiful.

HOW.
HOWL.

HOWL. We remained the whole night undisturbed except by the *howlings* and lamentations which were heard on shore.

Cook. *Voyages*, vol. vii. book v. ch. iv.

HUA-
NACA.

HOWLET, or OWLET, the diminutive of *owl*, *q. v.* so called, says Junius, *a ferali querulæ vocis gemitu*.

It is a pretie sight to see the wit and dexteritie of these *howlets*, when they fight with other birds: for when they are overlaid and beset with a multitude of them, they lie upon their backs, and with their feet make shift to resist them.

Holland. *Plinie*, book x. ch. xvii.

HOWVE, *i. e.* his hood, hood and cap being equally coverings for the head; to set a man's *howve*, is the same as to set his cap. Tyrwhitt. A similar explanation is given by Tooke, who forms *howve* from *hoved*, *hov'd*, the past participle of the verb to *heave*.

A *howve* above a call signifies a hood above a cap. Tyrwhitt.

Now, sires, quod this Osewold the Reve,
I pray you alle, that ye not you greve,
Though I answere, and somdel set this *howve*,
For leful is with force force off to showve.

Chaucer. *The Reves Prologue*, v. 3909.

To hold in loue a man in hond
And him her lefe and dere hart call
And maken him a *howve* above a call
I mene, as loue another in this mene while
The doth her selfe a shame, and him a gile.

Id. *Troilus and Cressida*, book iii. fol. 170.

HOX. See HOCK.

HOY, } Fr. *heus*; which Menage considers to
Ho'YMAN. } be the same word as the D. *hulcke*; Eng.
hulk, *q. v.* Pegge (*Anecdotes of the English Language*) suggests that "the little trading vessel, termed a *hoy*, may have received its name from *stopping* at different small places in its voyage, to take in goods or passengers, when called to or hailed from the shore." See Ho.

She was immediately assaulted by diuers English pinasses, *hoyes*, and drumblers.

Hakluyt. *Voyages*, &c. vol. i. fol. 601. *The Spanish Armada*.

But Philip had turned the staple and all the trade and negotiation by sea from thence to Demetrias, and having gotten hulkes and *hoyes*, caused them to baulke and passe by Thebes, and direct their course for Demetrias.

Holland. *Livius*, fol. 1038.

The recompence could not make him liable for a mere casualty, as if a *hoy* in good condition, shooting a bridge at a proper time, were driven against a pier by a sudden breeze, and overset by the violence of the shock.

Sir William Jones. *The Law of Bailments*.

It soon became necessary for the Courts to declare, as they did in the reign of James I., that a common *hoyman*, like a common waggoner, is responsible for goods committed to his custody, even if he be robbed of them.

Id. *Ib.*

HOYA, in Botany, a genus of the class *Pentandria*, order *Digynia*, natural order *Asclepiadæ*. Generic character: masses of pollen shining, ten, erect, conniving; anthers terminating in a membrane; crown of stamens five-leaved; leaflets depressed, the interior angle produced, forming a tooth incumbent on the anther.

Three species of this elegant genus have been discovered, natives of Asia. The *H. carnosia* has been long a favourite climbing plant in green-houses: its flowers have the appearance of being artificially made of porcelain and wax.

One species, *H. acaulis*, native of central America.

HUANACA, in Botany, a genus of the class *Pentandria*, order *Digynia*. Generic character: calyx minutely toothed, persisting; corolla, petals lanceolate,

VOL. XXIII.

spreading; fruit ovate, acute, striated; universal involucre two-leaved; partial involucre many leaved.

HUBBUB, also written *whoobub*; probably formed from the repetition of *hoop* or *whoop*; *q. d.* *hoop-hoop*, *hoob-hoob*, hubbub. See Hoop.

Now when amid the thickest woodes they were,

They heard a noise of many bagpipes shrill,

And shrieking *hububs* them approaching nere,

Which all the forest did with horrore fill.

Spenser. *Faerie Queene*, book iii. can. 10.

But the bishop and some other of the commissioners, allowed him burial there; but that it should be late at night, for the preventing any *hubbub* among the people.

Strype. *Life of Grindal*, Anno 1569.

When the first *hubbub* of sounds was over, the trap-door being left open, the voices came up more separate and distinct.

Spectator, No. 391.

HUBERIA, in Botany, a genus of the class *Octandria*, order *Monogynia*, natural order *Melastomaceæ*. Generic character: calyx tubular, constricted at the apex, border four or five lobed; corolla, petals four or five, obovate; style filiform, acute; capsule four or five celled.

Three species, shrubs, natives of the Brazils. Decandolle.

HUCK,

HU'CKSTER, *v.*

HU'CKSTER, *n.*

HU'CKSTERER,

HU'CKSTERAGE,

HU'CKSTER-LIKE.

Junius derives from the D. *hoecker*, a retailer, a victualler, which, he says, is manifestly from *hoeck* or *haeck*, a hook, because they endeavour to *hook* or draw in strangers. *Huck* is sometimes considered as connected with the Fr. *harceler*. See to HIGGLE.

Howbeit hee continued still obstinately counterfeiting and pretending his needinesse and povertie, and after much base *hucking*, and rising by little and little, one while hafting and wrangling, another while praying and entreating, (and that with whining and putting finger in the eye) he was fetcht over at length, and came off to pay a good hundred talents of silver.

Holland. *Livius*, fol. 991.

In which year [1438] happened a great and general famine, caused much by unseasonable weather, but more by some (*huckstering* husbandmen) who properly may be termed knaves in grain, inso-much that wheat was sold for three shillings a bushel.

Fuller. *Worthies*. Northumberland.

And of necessitie, for the maintenance of his state and dignity, he went so low as to make gaines by *huckster's* trade, pampering beastes for better sale.

Holland. *Suetonius*, fol. 241. *Vespasianus Augustus*.

And now the ape wanting his *huckster* man

That wont provide his necessities.

Spenser. *Mother Hubbard's Tale*.

The gentle and benevolent mediocrity of church maintenance, without the ignoble *hucksterage* of piddling tithes.

Milton. *Of Reformation in England*.

Therefore, I seek no applause from the disgrace of others, nor will I *huckster-like* discredit any man's ware, to recommend mine own.

Glanvil. *The Vanity of Dogmatizing*. Preface.

Besides the cost of getting drunk (which is usually the case) they must pay ten pence, or a shilling, for changing their piece into silver to some *huckstering* fellow, who follows that trade.

Swift. *The Intelligencer*, No. 19.

He then added compulsion to complaint, force to his words, and drove out those *hucksters* in the face of danger, and in spite of resistance, fearing neither the authority of the rulers, nor the insolence of the rabble.

South. *Sermons*, vol. xi. p. 152.

But I never could drive a hard bargain in my life, concerning any matter whatever; and least of all do I know how to haggle and *huckster* with merit.

Burke. *Letter to a Noble Lord*.

NACA.

HUCK.

HUCKLE.

HUE.

HU'CKLE, } The *huckle-bone*, *cora*, *coxendix*,
 HU'CKLE-BONE. } the hip, or joint of the hip, perhaps,
 says Skinner, from the D. *hucken*; Ger. *hocken*, *desi-*
dere, to sit down, (in Sw. *huka*.) And Wachter thinks
 that these may be from *hock*, a hook or corner.

The hip-bone or joint of the hip.

Sycknesses of autumne are ache in the *huckle-bones*.

Sir Thomas Elyot. Castel of Helth, book iv. ch. vii.

Such as be troubled with the sciatica or gout in the *huckle-bone*,
 find remedie by a plastre or cataplasme, made with the seed and
 leaves both of madder.

Holland. Phisie, book xxvi. ch. viii.

For getting up on stump and *huckle*,
 He with his foe began to buckle.

Butler. Hudibras, part i. can. 2.

You leave the road that's rough and stony,
 To pace and whistle with your poney;
 Sad proof to us you're lazy grown,
 And fear to gall your *huckle-bone*.

Lloyd. The Cobbler of Cripplegate to Mr. Lloyd.

HUD, *i. e.* hooded, covered as with hoods.

But Valerius and his company did resist them, and moreover
huddled them with their gowns over their heads, and by force brought
 them (do what they could) into the market-place.

Sir Thomas North. Plutarch, fol. 84. *Publicola*.

HU'DDLE, *v.* } Perhaps a diminutive of *hud* or
 HU'DDLE, *n.* } hood:

To cover up in a heap, a confused heap, to put or
 throw together in confusion; in haste or a hurry; to
 put or throw on in confusion.

Lusill (I wene) was parent of this nipping ryme:
 Next *hudling* Horace braue in Satyre's grace.

Drant. Horace. Priscus Grammaticus de Satyra.

For that grand lev'ler death *huddles* to one place
 Rich, poor, wise, foolish, noble and the base.

Brome. Elegy on the Death of his Schoolmaster, Mr. W. H.

By them the half is not told us; and vulgar spectators see them,
 but as a confused *huddle* of petty illuminants.

Glanvil. The Vanity of Dogmatizing, ch. xxiv.

And all to leave what with his toil he won,
 To that unfeather'd two-legg'd thing, a son,
 Got; while his soul did *huddled* notions try;
 And born a shapeless lump, like anarchy.

Dryden. Absalom and Achitophel.

Fools *huddle* on, and always are in haste,
 Act without thought, and thoughtless words they waste.

Rowe. Golden Verses of Pythagoras.

The outward forms of worshipping the deity wanted a reformation.
 Stately buildings, costly ornaments, peculiar and uncouth habits, and
 a numerous *huddle* of pompous, phantastical, cumbersome ceremonies,
 every where attended divine worship.

Locke. Works, vol. ii. p. 536. *The Reasonableness of Christianity*.

Cry—hem; and reading what they never wrote
 Just fifteen minutes, *huddle* up their work,
 And with a well-bred whisper close the scene!

Cowper. The Task, book ii.

The enraged beau, threatened such perdition and destruction that it
 frightened the women, who were all got in a *huddle* together, out of
 their wits, even to hear the denunciations of vengeance.

Fielding. Joseph Andrews, book iv. ch. xi.

HUDSONIA, in *Botany*, a genus of the class *Dode-*
candria, order *Monogynia*, natural order *Ericæ*. Ge-
 neric character: calyx three-leaved, tubular; corolla,
 petals five; stamens fifteen to twenty; capsule one-
 celled, three-valved, three-seeded.

Three species, natives of North America.

HUE, } Formerly written *hew*; and probably the
 HU'ED. } same word as *hew*, (*q. v.*) to form or fashion,
 extended in its application as the A. S. *hiwe*, *effigies*,

color; from the form, frame, or figure, to the general
 appearance or representation.

The complexion or countenance; the colour.

Phebus waxe old, and *hewed* like laton.

Chaucer. The Frankleines Tale, v. 11557.

But thus muche I dare saine that she
 Was white, rody, fresh and lifely *hewed*
 And euery day her beaute newed.

Id. The Dreame, fol. 242.

For of the well, this is the fine
 In world is none so clere of *hewe*
 The water is euer fresh and newe.

Id. The Romant of the Rose, fol. 123.

Wherof he beareth the pale *hewe*.

Gower. Conf. Am. book i. fol. 12.

Their heads ar compas knit with garlond floures right fresh of *hewe*.
Phaer. Virgil. Aeneidos, book vi.

Mutius held out his right hand over the fire, and boldly looking the
 king full in his face, whiles the flesh of his hand did fry off, he never
 changed *hew* nor countenance.

Sir Thomas North. Plutarch, fol. 39. *Publicola*.

Iris there with humid bow
 Waters the odorous banks, that blow
 Flowers of more mingled *hue*
 Than her purfled scarf can shew.

Milton. Comus, l. 994.

But when she saw her lord prepar'd to part,
 A deadly cold ran shivering to her heart:
 Her faded cheeks are chang'd to boxen *hue*,
 And in her eyes the tears are ever new.

Dryden. Ovid. Metamorphoses, book x.

His robes, with lucid pearls besprinkled o'er,
 Receives a snowy *hue* unknown before.

Hoole. Tasso. Jerusalem Delivered, book xviii.

HUE, } Fr. *huer*, to hoot, shout, exclaim, cry out,
 HU'ER. } make *hue* and cry. Cotgrave.

Earnest regard to be had by the said justices to the execution of
 the statutes against rebellion, vagabonds, retainers, &c.; and for
 keeping the statutes of *hue* and cry: and watches to begin the 20th
 of April.

Strype. Memorials. Queen Mary. Anno 1555.

When Judas had betray'd and sold him, and no man made *huy* and
 cry after him, his conscience was his pursuer, judge, and executioner
Hammond. Works, vol. iv. p. 655. *Sermon 14*.

They lie hovering upon the coast, and are directed by a balker or
huer, who standeth on the cliff-side, and from thence discerneth the
 course of the pilchard.

Carew. Survey of Cornwall.

An *hue* (from *huer*, to shout) and cry, *hutesum et clamor*, is
 the old common law process of pursuing, with horn and with voice,
 all felons, and such as have dangerously wounded another.

Blackstone. Commentaries, book iv. ch. xxi.

HUE AND CRY, in our old Records *Hutesium et Cla-*
mor, as stated by Blackstone above, probably in its ori-
 ginal meaning intends *hooting* by the horn and *crying* by
 the voice, for such by the old Books appears to have been
 the ancient custom of pursuing Felons, (Coke, 2 *Inst.*
 173.) and so Skene describes it in Scotland, *ad v. Hute-*
sium. "The Normans," says Minshew, "had such a
 pursuit with a Crie after offenders, as this is which they
 called *Haro*, wherof you may reade in the *Grand Custo-*
marie, cap. 54. Some call it *Harol*, the reason whereof
 they give to be this. That there was a Duke of Nor-
 mandie called *Rol*, a man of greate justice and severitie
 against grievous offenders: and that thereupon when
 they follow any in this pursuit they crie *Ha-Rol*, as if
 they should say, 'Ah *Rol*, where art thou that wert wont
 to redresse this, or what shouldest thou doe against these
 wretches if thou now wert living?' In which call they
 that are within hearing must make pursuit or pay a
 fine."

HUE.

HUE AND
CRY.

HUE AND
CRY.

Hue and Cry is mentioned by the Statute of Westminster, 1. 3 Edward I. c. 9. and 4 Edward I. c. 2. *de off. coronatoris*. But the principal Statute relative to it is that of Winchester, 13 Edward I. c. 1. and 4., which directs that, immediately upon the commission of robberies and felonies, Hue and Cry shall be raised and carried on from town to town till the offender be taken. By this Statute, unless the offender be taken, the Hundred is answerable for the robbery, and hence arises the Action against the Hundred in case of loss by robbery.

The several particulars relative to Hue and Cry must be sought in the Statutes which regulate it. It may be sufficient here to state, that it may be levied without a Warrant from a Justice; that the Constable having raised the power of the town, has liberty of search, and, *if the suspected person be in a house*, may break open doors in pursuit of him, after giving notice, demanding entrance, and being refused. This violence is at his own peril if the offender should not be in the house. Notice should be given to the neighbouring towns, with a description of the things stolen, and the person of the thief, or, in case the latter is unknown, of the fact of robbery. All persons are bound to follow the Hue and Cry, and it seems that if the offender cannot be otherwise taken, he may be killed in the pursuit. Though the supposed offender be really innocent, he may be taken and imprisoned till he can be examined by a Justice, if a Hue and Cry be once raised after him. It is the raiser only who is punishable.

The chief Statutes which regulate the Action against the Hundred are 27 Elizabeth, c. 13. 29 Charles I. c. 7. 8 George II. c. 16. 22 George II. c. 24. By these the Hundred is not answerable for robberies committed in a house in the night-time, nor on persons travelling on a Sunday, nor where the felons or any one of them is taken before the Action is commenced. No Action can be commenced after a year from the date of the robbery, or before forty days after its commission. The Hundred is allowed forty days for the capture of the felon after public notice of the robbery has been given in the *London Gazette*. The party robbed must, with all convenient speed, give notice of the robbery to some of the neighbouring inhabitants and some Peace Officer, and describe, as well as he can, the person of the thief and the place of robbery. He must also, within twenty days, cause a similar notice and description to be given in the *London Gazette*. Within the same time he must be examined on oath by some neighbouring Justice of the County, as to his knowledge of the robbers, and must enter into recognisance to prosecute. Likewise, he must enter into a bond to the Hundred Constable in the penal sum of £100, with two sufficient sureties, for the payment of costs in case of judgment passing against him. No person can recover more than £200, unless there were at least two persons together at the time of the robbery, so as to attest it. The process of Action must be served against the Hundred Constable, who himself appears and defends it. If the Hundred be cast, the Sheriff does not levy, but an assessment is made by two Justices residing within or near the Hundred, on all places within it, for the damages and costs of the party recovering and the necessary expenses of defence. The Sheriff is allowed six days for the return of the Writ.

These provisions are materially altered by 7 and 8 George IV. c. 27 and 31. By the last-named of these Statutes, *An Act for consolidating and amending the*

Laws relative to Remedies against Hundreds, among other matters a notice in writing to the High Constable of the Hundred or District, and a similar Notice to be placed, on two Sundays preceding the day of holding the Petty Session, on the door of the Church or Chapel, or some other conspicuous part of the Parish, &c. is substituted in lieu of the notice in the *London Gazette*.

A Police Gazette, named the *Hue and Cry*, describing offences and offenders, is published twice a week in London under the authority of the Home Department.

Coleridge, *Note on Blackstone*, vol. iv. p. 21.

HUERNIA, in *Botany*, a genus of the class *Pentandria*, order *Digynia*, natural order *Asclepiadæ*. Generic character: corolla bell-shaped, acutely ten-cleft, the alternate segments long, the strap-shaped nectaries connected from the bottom of the corolla to half their length.

A genus divided from *Stapelia*, from which it chiefly differs in the campanulate corolla. About ten species are known, natives of sandy plains in the South of Africa.

HUERTIA, in *Botany*, a genus of the class *Pentandria*, order *Monogynia*. Generic character: calyx five-toothed, inferior; petals ovate, sessile; stigma two-cleft, acute; drupe obovate, nut one-celled.

One species, *H. glandulosa*, a considerable tree, native of Peru. Persoon.

HUFF, *v.* } *Huff*, the noun, Skinner thinks, may
HUFF, *n.* } be from the A. S. *heof-an*, *elevatus*, *i. e.*
HU'FFER, } *heaved*, raised. And Tooke considers
HU'FFING, } it to be formed from *hove*, the regular
HUFF-CAP. } past tense of the verb to *heave*. To
huff is

To *heave* or raise; to swell; to inflate, to puff out; to bluster.

See to HOVE, and the Quotations there from Holland's Pliny.

The same cause is to be rendred of some new hill or peece of ground, not seene before; when the said wind within the earth, able to huffe up the ground, was not of power sufficient to breake forth and make issue. *Holland. Plinie*, book ii. ch. lxxxv.

Therefore not to make much noise to disturbe these infallible huffers (and they cannot hear a litte for their own), I softly step by them. *Glanvil. On Witchcraft. Preface.*

FOL. Your husband hath already got a wife,
A huffing wench yfaith, whose ruffling silks
Make, with their motion, musicke unto love.
A Pleasant Conceited Comedy, 1608.

When he conceives upon his faigned stage
The stalking steps of his great personage,
Graced with huff-cap terms and thund'ring threats,
That his poor hearers' hair quite upright sets.
Hall. Satire 3. book i.

Men would often see what a small pittance of reason and truth, or possibly none at all, is mixed with those huffing opinions they are swell'd with; if they would but look beyond fashionable sounds, and observe what ideas are or are not comprehended under those words with which they are so arm'd at all points, and with which they so confidently lay about them.

Locke. Of Human Understanding, book iii. ch. vi. sec. 16.

Shall I fear an anger that lasts but a moment, and can do but little while it lasts? an anger that is but as the spleen of a wasp, a short phester and huff of passion. *South. Sermons*, vol. vii. p. 242.

Nor have I hazarded my art,
And neck, so long on the state's part
To be expos'd, i' th' end, to suffer
By such a braggadocio huffer.
Butler. Hudibras, part ii. can. 3.

HUE AND
CRY.

HUFF.

HUFF.

HUGE.

But when *huffing* and hectoring must be look'd upon as the only badges of gallantry and courage, what can recommend the exercise of patience against the disgrace of it?

South. Sermons, vol. x. p. 120.

The deed is done, thy foes are dead,
No longer, England, shalt thou dread
Such Presbyterian *huffers*.

And there Aeneas from the seas beheld a *hugy* wood,
Where fleeting swift with whirling streames most pleasant Tyber flood
Breakes out itselfe in seas.

Phaer. Virgil. Aeneidos, book vii.

The knight himselfe even trembled at his fall,
So *huge* and horrible a masse it seem'd.

Spenser. Faerie Queene, book i. can. 11.

So fiersly, when these knights had breathed once,
They gan to fight retourne; increasing more
Their puissant force, and cruell rage attonce,
With heaped strokes more *hugely* then before.

Id. Ib. book i. can. 6.

They trusting in their strenght and *hougenesse* of their bodyes,
with armour that they had inuented, oppressed all men.

Grafton. The First Age.

And round about were portrai'd heere and there
The *hugie* hosts, Darius and his power,
His kings, princes, his peeres, and all his flower.
Mirroure for Magistrates, fol. 266. *M. Sackuill's Induction.*

The high, *huge-bellied* mountains skip like rams
Amongst their ewes, the little hills like lambs.

Milton. Psalm 114. l. 11.

The world with age is broke, the earth outworne,
And shee of whom what euer liues was borne
And once brought forth *huge-bodied* beasts, with paine
A small race now begets.

Hakewill. Apologie, book i. ch. v. sec. 3. fol. 59. (*from Lucretius*.)

Yet shall she not invoke the Muses to her aid;
But thee, Diana bright, a goddess and a maid;
In many a *huge-grown* wood, and many a shady grove.

Drayton. Poly-olbion, song 13.

Here might you see
Barons and peasants on th' embattled field
Slain, or half dead, in one *huge*, ghastly heap
Promiscuously amass'd.

J. Philips. Cider, book ii.

Most of the heathen gods, who were so solemnly worshipped in
Greece and Rome, owed their ἀποθίσις to such slender benefits to
mankind, that sure the world was very barbarous or *hugely* grateful,
when they could think them no less than gods who found out such
things for men.

Stillington. Sermons, vol. i.

What would have fed a thousand mouths was sunk
To fill his own, (an elephant's,) by *hugeous* length of trunk,
He grew to monstrous grandeur, liv'd a show;
And stones high rais'd told where he was laid low.

*Byrom. Verses spoken at the Breaking-up of the Free Grammar
School in Manchester.*

HUGGER-MUGGER. This is the common way of
writing this word from Udall to the present time. Sir
Thomas More is said to have written it *hoker moker*;
others write *hucker mucker*, and Ascham *hudder-mother*.
No probable Etymology has yet been given. The
Scotch (see Jamieson) have *hudge mudge*, *huggrie*
muggrie; and to *hugger-mugger*. *Huggrie-muggrie*,
Dr. Jamieson interprets, "in a confused state, disorderly;"
and similar to this is the usage of the English in
vulgar speech at the present time. The reading of
Ascham (though single) suggests the conjecture, that
these words, however written, are formed from *hood* or
hud, and *mud*; *q. d. hud-mud*, the diminutives *hud-*

HUGGER-

MUGGER.

HUGGER. *dle-muddle, hudder-mudder, hugger-mugger*: the mean-
MUGGER. *ing* will then be

— Confusedly and dirtily; and, therefore, thrown out of
HUGUE- sight; consequentially, concealedly, covertly, secretly,
NOT. privily.

For God cannot abide to haue his benefites kept secrete in *hugger-*
mugger. *Udall. Luke, ch. xvii.*

How they haue wrought in *hugger-mugger* to steale awaye the
hartes of Englishe subiectes, manye poore widdowes and wretched
orphanes at this day in the north part of England with heauye harts
can testifye.

Bale. Pageant of Popes by Studly, book vii. fol. 197.

If shootinge fault at any time, it hydes it not, it lurkes not in
corners and *hudder-mother*; but openlye accuseth and bewrayeth
itselfe. *Ascham. Works, p. 69. Torophilus.*

And as we bee sonnes of the world so wide,
Let us our father's heritage divide;
And chalenge to our selves our portions dew
Of all the patrimonie, which a few
Now hold in *hugger-mugger* in their hand.

Spenser. Mother Hubberd's Tale.

Then Antonius thinking good his testament should be read openly,
and also that his body shoulde be honourably buried, and not in
hugger-mugger, lest the people might thereby take occasion to be
worse offended if they did otherwise; Cassius stoutly spoke against it.

Sir Thomas North. Plutarch, fol. 823. Brutus.

— The people muddled,
Thicke and vnwholesome in their thoughts, and whispers
For good Polonius' death; and we haue done but greenly
In *hugger-mugger* to interre him

Shakspeare. Hamlet, fol. 273.

So as it might be done in *hugger-mugger*.

Harrington. Orlando, book xliii. st. 133.

— Give my flame but vent,
Now in close *hugger-mugger* pent,
And shine upon me but benignly.

Butler. Hudibras, part ii. can. 1.

HUGHESIA, in Zoology, a genus of fixed, soft,
radiated animals.

Generic character. Body subpedicelled, simple, very
contractile, fixed at its base; mouth central, furnished
with four movable filaments, and surrounded with 20
petaloid tentacula.

The type of the genus is *Actinia calendula* of Ellis,
described by him from Hughes, the historian of Bar-
badoes, who is the only person that appears to have seen
it. Lamaroux, without ever having examined the
animal, has ventured to describe it as a distinct genus;
and, against all the rules of Zoological nomenclature,
has given it the name of the original describer.

HUGONIA, in Botany, a genus of the class *Mona-*
delphia, order *Decandria*, natural order *Malvaceæ*.
Generic character: calyx five-parted, unequal; corolla,
petals five; styles five; drupe one-seeded; nut striated,
usually ten-celled.

Three species, natives of the East Indian Islands.

HUGUENOT, a name given to the Protestants of
the French Reformed Church, and variously derived.
Mishew says, from Becan, *Reformatæ Religionis Cal-*
vinianæ primum ita dicti a quodam Hugone eorum
ore, aut a portâ quâdam oppidi Turonis in Galliâ
ubi Hugon ubi solebant convenire, aut ut alii affir-
mant a principio Protestationis illorum his verbis, Huc
nos venimus. Apud Flandros vocantur Oheus, i. e.
men dicit, et in Poloniâ Picarditi tanquam ex Picardiâ
Provinciâ oriundi.

This, it must be confessed, is not quite satisfactory.
From Mezeray we learn that the French, till the year
1560, were called *Luthériens*, though in many points

they differed from Luther. Others called them *Sacra-*
mentaires, from their denial of the Real Presence. At
the time just named they received the name of Hugue-
nots, because, as is said above, they met by night at the
gate Hugon, in Tours; or because they ventured out
only in the dark, like a certain *Lutin*, or midnight Spirit,
le Roy Hugon, which is commonly believed to haunt
the streets of that city. The Historian himself prefers a
Swiss word, *Eidgenossen*, (*Ligue, confederati*), which
he thinks was first corrupted at Geneva, and then intro-
duced into France by the Reformed themselves, not as
a term of reproach but as a distinctive title. (*Abrégé*
Chron. François II. tom. v. 23.) *Eidgenossen* was the
title used by those Genevese who allied themselves with
the Swiss Cantons against the tyranny of Charles III.
of Savoy.

Maclaine, in a note on Mosheim, speaks much to the
same purpose; and adds, that the Count Villars, in a
letter written to the King of France from the Province
of Languedoc, where he was Lieutenant General, and
dated the 11th of November, 1560, calls the riotous
Calvinists of the Cevennes Huguenots; and this is the
first time that this term is found in the Registers of that
Province applied to the Protestants. (Note a. Cent. xvi.
sec. 3. p. 2. ch. ii.) Garnier (*Hist. de France, xiv.*
434.) states, that the Reformed assembled by night at
the Gate of the evil-minded Hugon, who rode on horse-
back in that quarter, and beat every one whom he met,
so that he had become a bugbear used by mothers for
naughty children. The Reformed adroitly adopted the
soubriquet, and deprived it of its injurious application
by founding it on their attachment to the descendants
of Hugh Capet. Thuanus also has recognised King
Hugo. *Nec de nihilo suspecta erat Cæsarodunensium*
in eâ re fides, quippe quorum plerique novam Relligionem
amplectebantur, adeo ut ab eo loco tunc primum Hugo-
noti ridiculum simul et odiosum nomen innotuerit, quo
qui antea Lutherani dicebantur, passim postea in Galliâ
vocari cæpere. Hujus autem hæc origo fuit, quod cum
singulæ urbes apud nos peculiaria nomina habeant,
quibus mormones, mures, manducos et cætera hujusmodi
monstra inania, anilibus fabulis ad incutiendum infantibus
ac simplicibus fæminis terrorem, vulgo indigetant,
Cæsaroduni Hugo Rex celebratur, qui noctu pomæria
civitatis obequitare et obvios homines pulsare ac rapere
dicitur. Ab eo Hugonoti appellati, qui ad ea loca ad
conciones audiendas ac preces faciendas itidem noctu,
quia interdum non licebat, agminatim in occulto convenie-
bant. (Lib. iv. vol. i. p. 741. Ed. 1620.) Pasquier has
an entire Chapter on the origin of the name, (*Recherches*
de la France, viii. 53.) in which he adduces most of
the above statement, and adds, on mere conjecture, that
Huguenot is a corruption of the Swiss *Henes quenaux*,
which tallies with the French *Gens seditieux*. Père
Daniel, in his *Histoire de France*, (v. 666.) has re-
counted the customary derivations without offering any
new one.

Moreri, to the derivations given above, adds the fol-
lowing, that the Calvinists having embraced the errors
of John Huss, were named *les Guenons de Huss*, Huss's
Monkeys, or, as Skinner gives it, "*les Guenots de*
Hus, John Husses Imps;" or, that they espoused the
pretensions of the line of *Hugh Capet* to the Crown in
opposition to the House of Guise; or, that they followed
the teaching of one *Hugues, hérétique sacramentaire*,
in the reign of Charles VI.; or, that in reference to a
small piece of money, a *huguenote*, struck in the time of

HUGUE-
NOT.

HUGUE-

—
HULK.

Hugh Capet, and current for a *maille*, (half a *denier*,) the Protestants were so called in contempt, as *ne vallant pas une maille*; or, by another version of an origin before mentioned, that a German, who was arrested and questioned concerning the conspiracy of Amboise before the Cardinal of Lorraine, stopped short in his defence after he had uttered the words *Huc nos venimus*; whence the bystanders, not understanding Latin, said the prisoners were people who came from *Huc nos*. It is unfortunate for the author of this story that he forgot that, in order to verify it, it was necessary his bystanders should at least understand the meaning of *venimus*.

Davila, who derives the name from the gate of Hugon in Tours, seems to have formed a just estimate of the other Etymologies. *Si chiamavano questi comunemente Ugonotii, perchè le prime radunanze che si fecero di loro nella città di Turs, ove prese da principio nervo e aumento questa credenza, furono fatte in certe cave sotterranee vicine alla porta, che si chiamava di Ugone, onde dal volgo per questo furono chiamati Ugonotii, si come in Fiandra, perchè andavano travestiti in habito di mendichi, furono nominati Gheusei. Altri raccontano ridicole e favolose inventioni di questo nome. (I. sub ann. 1559.)*

For a catalogue of the numerous Works on the History of the Huguenots, the reader may turn to thirty pages in Le Long's *Bibliothèque Historique de la France*, i. 378—409.

HUISHER, Fr. *huissier*, an usher, *q. v.*

At this time it doth befall,
We are the *huisher* to a morrise.

Ben Jonson. *A Particular Entertainment of the Queene*, &c. 25th of June, 1603.

HUKE, Low Lat. *huca*; Fr. *huque*, which Cotgrave calls "a Dutch mantle, or Dutch woman's mantle;" to the same purport is Skinner, who derives the English and French from the D. *huyke*. And Kilian, *dicitur huycke, q. d. hoedke, a hoeden i. a tuendo sicut toga, a tegendo*. From Menage and Du Cange it appears not to have been confined to women.

Her *huke* of Lyncole grene
It hadde bene hers I wene
More then fortye yere. Skelton. *Elinour Rumming*.

As we were thus in conference, there came one that seemed to be a messenger, in a rich *huke*, that spake with the Jew.

Bacon. *New Atlantis*, p. 24.

HULFERE, Skinner suggests either from English *hold* and A. S. *feor*, *longè*, far or long, a plant that lasts long; or *Hold fair*, a tree that retains the beauty or fairness of its leaves for the whole year.

This herber was full of floures gende
Into the which, as I beholde gan
Betwixt an *Hulfer* and a Woodbende
As I was ware, I saw where lay a man.
Chaucer. *Complaint of the Blacke Knight*, fol. 270.

As touching the *Holly*, or *Hulver-tree*, if it be planted about an house, whether it be within a citie, or standing in the countrey, it serveth for a countrecharm, and keepeth away all ill spels or incantments.

Holland. *Plinie*, book xxiv. ch. xiii.

HULK, Sw. *holk*; D. *hulcke*; Fr. *heux* and *hulque*, *hulque* or *oulque*; It. *hulca*; Low Lat. *hulca*; Lat. *holcas*; Gr. *ὄλκας*; *navis oneraria*, from *ἐλκε-ειν*, *trahere*, to draw. (Menage.) But Ihre and Serenius derive from Sw. *holka*, or *hulka*, to *hollow*, to excavate; the former observes, that the first vessels of the Scythian nations were large trunks of trees *hollowed out*; *holka* (Ihre) from *hol caverna*, and *hol*, from the Goth. *hul-*

jan, tegere, to cover; thus tracing it to the same source as *hull*, *q. v.*

The *hull* or hold of a ship; a ship or vessel of large *hull* or hold; and, thus, a ship of bulk or burden. Any thing bulky or burdensome.

The *Hulks*; vessels of large *hulls*, or holds, for the confinement of convicts.

Having assembled together about fowerscore *hulkes*, (*navibus onerariis*;) and as manye as he thought suffycient to conuey ouer two legions, he distributed all the gallyes that he had to the thesauror & his lieutenants, and the chief officers of hys camp.

Arthur Goldyng. *Cæsar. Commentaries*, book iv. fol. 98.

The harkes are battered sore, the gallies gald with shot,
The *hulks* are hit, and euery man must stand vnto his lot.

Gascoigne. *Flowers. Deuise of a Maske*.

He sent huge *hulks*, which did like mountains move,
As townes for traffique, palaces for ease.

Stirling. *Doomes-day. The Fourth Houre*.

I received another letter from your secretary, wherein he writeth, that two *hulks*, wherein certain goods appertaining to Englishmen were lately taken by Frenchmen, the one being conveyed to Boleyn, and the other to Frith in Scotland.

Strype. *Memorials. Wolsey to Henry VIII. Anno 1524*.

Nay, even the *hulks* of the ships that carried them, though not converted into constellations in the heavens, used to be honoured and visited as sacred relics upon earth.

Cook. *Voyages*, vol. v. book i. ch. i.

HULK, *v.* See HULK, *ante*. Applied, consequentially, To *hollow out*, to disembowel, to eviscerate.

I could *hulk* your grace, and hang you up cross-leg'd,
Like a hare at a poulter's.

Beaumont and Fletcher. *Philaster*, act v.

The HULKS were appropriated as a place of punishment for prisoners sentenced to transportation, by an Act 16 George III. c. 43. passed in 1776, during the American War, when the intercourse with our Colonies was interrupted. This was only a temporary Act, and confinement in the Hulks is not a sentence formally pronounced for any offence; but by subsequent statutes male offenders under sentence of death, and reprieved during pleasure, or under sentence of transportation, may be sent to them till transportation is put in effect; and it often happens, that convicts sentenced to transportation for fourteen years pass seven of that period, or for seven years five, as a commutation, in the Hulks. A Report upon the state of these prisons was made by a Committee of the House of Commons (*on Penitentiaries*) in 1812, and an Act for their regulation and reform was framed in consequence. Each Hulk is under the control of a resident overseer, with a sufficient number of officers and guards. His powers and responsibilities are similar to those of a gaoler, and he may inflict moderate punishment for disorderly conduct. A superintendant is placed over the whole establishment, who inspects all the Hulks at least four times a year, and makes not less than two annual Reports on their condition to the Home Secretary, which are laid before Parliament.

The number of Hulks, in 1812, was one at Woolwich, one at Sheerness, two at Portsmouth, and one at Langston Harbour. The convicts for the most part, during the daytime, are employed in hard labour on shore. Very full information respecting their management and condition may be found in the *Parliamentary Report* above noticed. The details of their state at that time are of a very painful description, and the Committee is compelled to admit, that "the situation of the convicts imprisoned on board the Hulks upon the pre-

HULK.
—
HULKS.

HULKS. sent plan was one from which those persons must be expected to return into Society with more depraved habits and dispositions than those with which they went into confinement." The expenses of the whole establishment in 1810, for 2003 convicts, were £59,290. 13s. 2½d., or rather more than £29. 12s. per head; in 1811, £66,328. 15s. 7½d. for 2044, about £32. 9s. per head. But in this sum must be included £4250 for fitting up an additional Hulk at Sheerness. These convicts' labour, during the same years, valued at 1s. 6d. a day for an artificer, 1s. for a labourer, gives a return, for 1810, of £20,371. 14s. 6d.; during 1811, of £21,173. 14s. But this latter calculation is entangled in many points, and can scarcely be depended upon.

The following is an account of the state of the Hulks (in which six are mentioned) from the 1st of January, 1804, to 31st of December, 1811:—

CAPTIVITY.				LAUREL.				PRUDENTIA.			
	Average No. on Board.	Deaths	Es- capes.	Average No. on Board.	Deaths	Es- capes.		Average No. on Board.	Deaths	Es- capes.	
1804	446	10	4	130				249	14	2	
1805	477	5	6	214	7			308	10	7	
1806	432	16	11	219	5			311	13	3	
1807	418	5	2	197	8	1		304	13	3	
1808	427	8	6	190	2			330	18	3	
1809	481	6	3	202	4			353	13	7	
1810	512	5	4	219	5	1					
1811	507	18	10	249	6						

PORTLAND.				RETRIBUTION.				ZEALAND.			
	Average No. on Board.	Deaths	Es- capes.	Average No. on Board.	Deaths	Es- capes.		Average No. on Board.	Deaths	Es- capes.	
1804	216	5		415	17	4					
1805	247	4	2	470	15	9					
1806	301	3	2	501	10	1					
1807	300	6	4	471	54	7					
1808	268	8	5	490	28	3					
1809	262	7	3	555	19	7					
1810	322	1	2	486	15	5		464	5	3	
1811	327	2		480	12	29		481	8	4	

Of these vessels, the Retribution was stationed at Woolwich, the Zealand at Sheerness, the Captivity and Laurel at Portsmouth, and the Portland at Langston Harbour. The station of the Prudentia is not mentioned in the Report.

HULL, v. } The hull—of a nut, &c.; that by
HULL, n. } which the nut is covered. Hull of a ship; that part which is covered in the water. The participle of the A. S. verb *hel-an, tegere*, (to cover; *huljan*; Ger. *hullen*.) See Tooke, ii. 377. 379. And see HULK, ante.

To hull. "A ship is said to hull when she is dismasted, and only her hull, or hulk, is left at the direction and mercy of the waves." Steevens. Consequentially, to float or swim, as carried or driven by wind or water.

To hull is also to take out of, or take off, the hull or covering; as to hull peas.

—Thus *hulling* in
 The wild sea of my conscience, I did steere

Toward this remedy, whereupon we are
 Now present heere together.

Shakspeare. Henry VIII. fol. 217.

Who bearing himself upon a barke or corke under him, *hulled* along the Tyber down the water to the cittie.

Holland. Livius, fol. 209.

The fish (as it should seem) smelling this new and strange smell, fell to be drowsie and sleepe, and *hulled* too and fro with the waves, as if it had beene halfe head. *Id. Plinie*, book ix. ch. viii.

ISAB. She never saw above one voyage, Luce; and credit me after another, her *hull* will serve again, a right good merchant.

Beaumont and Fletcher. Wit without Money, act i.

And as the built, so different is the fight;
 Their mounting shot is on our sails design'd;
 Deep in their *hulls* our deadly bullets light,
 And through the yielding planks a passage find.

Dryden. Annus Mirabilis, st. 60.

Borne o'er a latent reef the *hull* impends,
 Then thund'ring on the marble crags descends.

Falconer. The Shipwreck, can. 3.

HULSTRED, A. S. *heolstra, latebra*, a lurking or hiding place. Hidden, Tyrwhitt. (Probably of the same origin as *hull*, q. v.)

Shortly I woll herberowe me

There I hope best to *hulstred* be.

Chaucer. The Romant of the Rose, fol. 144.

HUM, v.

HUM, n.

HU'MMING,

HU'MMER,

HU'MBUG,

HU'MBUGGER,

HU'MBUGGING.

D. hommelen; Ger. *hummen*; formed from the sound.

To *hum* was formerly at public places a mode of expressing approbation or applause; (see the Quotations from *State Trials*, King, and Dr. Johnson;) and being hence extended to flattery, to cajolery: to *hum* is, consequentially,

To cajole; to trick or delude by flattery, soothing, or coaxing. Hence also *humbug*. See BUG.

The priestes and curates reade the good Homylies al ready set forth, and the Scriptures with cuttyng, hackynge, *hummyng*, cheeping, and mynceing after such sort.

Udall. Ephesians. Prologue to the Reader.

By which time [morning] one of them [the bees] awaketh, and raiseth all the rest with two or three big *hums* or buzzes that it giveth, to warne them, as it were, with sound of trumpet.

Holland. Plinie, book xi. ch. x.

I cry'd *hum*, and well, goe too,
 But mark'd him not a word.

Shakspeare. Henry IV. First Part, fol. 61.

Toward evening, their noise beginneth to slacke and grow lesse and lesse; untill such time as one of them fleeth about with the same loud *humming*, wherewith she waked them in the morning, and thereby giveth a signall (as it were) and commandement to go to rest.

Holland. Plinie, book xi. ch. x.

The *humming* of bees is an unequall buzzing, and is conceived by some of the ancients, not to come forth at their mouth, but to be an inward sound; but (it may be) it is neither, but from the motion of their wings; for it is not heard but when they stirre.

Bacon. Natural History, sec. 175.

Yet the discoveries of America, and even of our own plantations, have showed one far lesse [than the wren]; that is, the *humbird*, not much exceeding a beetle.

Sir Thomas Brown. Vulgar Errours, book vi. ch. viii.

(Here the spectators *hummed*.) Lord Chief Baron.—Gentlemen, this *humming* is not at all becoming the gravity of this court. It is more fitting for a stage play than for a court of justice.

State Trials, 12 Charles II. 1660. *Thomas Harrison*.

—She secret stands
 Within her woven cell; the *humming* prey,
 Regardless of their fate, rush on the toils
 Inextricable, nor will ought avail
 Their arts, or arms, or shapes of lovely hue.

J. Philips. The Splendid Shilling.

HUM
—
HUMAN.

The vestry all applauded with a *hum*,
And the seven wisest of them bade him come.
King. The Vestry.
Yet by some object every brain is stirr'd;
The dull may waken to a *humming-bird*.
Pope. The Dunciad, book iv.

There prevailed in those days an indecent custom; when the preacher touched any favourite topick in a manner that delighted his audience, their approbation was expressed by a loud *hum*, continued, in proportion to their zeal or pleasure. When Burnet preached, part of his congregation *hummed* so loudly and so long, that he sat down to enjoy it, and rubbed his face with his handkerchief. When Sprat preached, he likewise was honoured with the like animating *hum*, but he stretched out his hand to the congregation, and cried, "Peace, peace; I pray you, peace."

Johnson. Life of Sprat.

The *humming-bird*, both in shape and colouring, yields to none of the winged species, of which it is the least; and perhaps his beauty is enhanced by his smallness.

Burke. On the Sublime and Beautiful, part iv. sec. 24.

But what are all *hummers*, their tricks and their arts
To yon roguish round, the *humbuggers* of hearts—
By whose sweet enchantment, grey wisdom is fool'd,
And prowess is conquer'd, and courage is cool'd?
For beauty, by ancient tradition, we find,
Has delightfully *hummed* the whole race of mankind.

Brookes. Epilogue on Humbugging.

Of all trades and arts in repute or oppression,
Humbugging is held the most ancient profession.
Twixt nations and parties, and state politicians,
Prim shop-keepers, jobbers, smooth lawyers, physicians;
Of worth and of wisdom the trial and test
Is—mark ye, my friends!—who shall *humbug* the best.

Id. Ib.

HUMMING. *Hum* (says Gifford) I have always understood to be an infusion of spirits in ale or beer. Note on Ben Jonson quoted below.

It may have been so called from the buzzing, *humming* noise which brisk liquors will make when poured or drawn.

Therefore look to't
Except you do provide me *hum* enough
And lour to bouze with.
Beaumont and Fletcher. Beggar's Bush, act ii.

Are got into the yellow starch, and chimney sweepers
To their tobacco, and strong-waters, *hum*,
Meath, and Obarni.
Ben Jonson. The Divell is an Asse, act i. sc. 1.

Now is seen
The midnight parson posting o'er the green,
With gown tuck'd up, to wakes; for Sunday next
With *humming* ale encouraging his text.

Dryden. The Wife of Bath's Tale.

HU'MAN,	}	Fr. <i>humain</i> ; It. and Sp. <i>humano</i> ; Lat. <i>humanus</i> ; from <i>homo</i> , man; of unknown Etymology.
HU'MANATE,		
HU'MANE,		
HUMA'NELY,		
HU'MANIST,		
HU'MANITY,		
HUMANI'TIAN,		
HU'MANIZE,		
HUMANIZA'TION,	}	<i>Manly</i> : having the nature or qualities of <i>man</i> , having the feelings proper to or becoming <i>man</i> : feeling for <i>man</i> ; compassionate, benevolent; kind, having kindness of heart.
HU'MANLY.		

Human and *humane*, *humanly* and *humanely*, are now distinguished but were not so formerly.

Humanity; *mankind*; the nature of *man*; the feelings proper to or becoming *man*, is also applied to that which, to the Arts which, civilize him; to what is commonly called, Polite Literature.

O noble markis, your *humanitee*
Assureth us and yeveth us hardinesse,
As oft as time is of necessitee,
That we to you mow tell our hevinesse.
Chaucer. The Clerkes Tale, v. 7968.

But fynally to consider how vnable we be borne, and are enuyronned with so many ylles, beyng subiect to so many miseries, I meruayle not of the *inhumanities* that y^e *humain* people committeth.
Golden Boke. The eleventh Letter, sig G g. 7.

Of your saying it followeth, that the bread is *humanate* or incarnate.

Archbishop Cranmer. Answer to Bishop Gardiner, p. 369.

The nature and condition of man, wherein he is lesse than God Almighty, and excellenye not withstanding al other creatures in erth, is called *humanitie*: whiche is a generall name to those vertues, in whom semeth to be a mutuall concorde and loue, in the nature of man.

Sir Thomas Elyot. The Governour, book ii. ch. viii.

Whose angel eye, by powerful influence,
Doth utter more than *human* eloquence.

Drayton. England's Heroical Epistles. Queen Margaret to William De la Poole.

Mars, Mars, (said he) thou plague of men, smear'd with the dust and bloud

Of *humanes*, and their ruin'd wals; yet thinks the God-head good,
To fright this Furie from the field.

Chapman. Homer. Iliad, book v. fol. 72.

The which [his life] was certes in great ieopardy,
Had not a wondrous chance his reskue wrought,
And saved from his cruell villany:
Such chaunces oft exceed all *humaine* thought.

Spenser. Faerie Queene, book vi. can. 3.

He [Hector Boethius] was not only notably learned in the liberal sciences above the condition of those times, but also of an exceeding courteous and *humane* inclination.

Spotswood. Church of Scotland, Anno 1539, book ii.

Can the drunken old Poets make up my vines? (I know they can drink 'em) or your excellent *humanists* sell 'em the merchants for my best advantage?

Beaumont and Fletcher. The Elder Brother, act ii.

For you shall have of them [physicians], antiquaries, poets, *humanists*, statesmen, merchants, divines, and in every of these better seen than in their profession.

Bacon. On the Advancement of Learning, book ii.

This being said, there was an orator there, a man of great reading, a singular scholar, and an excellent *humanitian*, who cryed out in this manner, "And is it so indeed?"

Holland. Plutarch, fol. 588.

In the verie beginning therefore of the ioynt or knitting together, where the Riphæan mountains do end, dwell the Arimaspi, righteous men, and for ther meekenesse and *humanitie* wel known.

Id. Ammianus, fol. 200. Julianus.

Being polished with *humanitie*, and the studies of wittie sciences, he shall peise and examine by uncorrupt iudgement the deserts for well and evill doing.

Id. Ib. fol. 313. Valentinianus and Valens.

She [the queen of Sheba] may that day be parallell'd with some,
When *humaniz'd* our Saviour did remaine,
Who one (more great than Solomon) at home,
Not sought, not heard, but did when found disdaine.

Stirling. Doomes-day. The fifth Houre.

You, Polymnis, esteem and admire Socrates as a personage, who by his plain simplicity, without any counterfeit vanity whatsoever, hath *humanized*, as I may so say, philosophy, and attributed it to *humane* reason.

Holland. Plutarch, fol. 986.

By way of consolation we exhorted and perswaded them to bear the common accidents of this life with a common course of patience, and *humane* cases, *humanely*.

Id. Ib. fol. 435.

And tho' (speaking *humanly*) the beginning of empire may be ascribed to reason and necessity; yet it was God himself that first kindled this light in the minds of men, whereby they saw that they could not live and be preserved without a ruler and conductor.

Ralegh. History of the World, book i. ch. ix. sec. 1.

By fatal bands whilst present empires fall,
Thine from the grave past monarchies recall;
So much more thanks from *human-kind* does merit
The poet's fury than the zealot's spirit.

Cowley. To Sir William Davenant.

HUMAN.

Alas, what stay is there in *human* state,
Or who can shun inevitable fate?

Dryden. The Cock and the Fox.

HUMBLE.

If to any person we should wish things, suitable, commodious, and advantageous, by obtaining which he, without any wrong or prejudice to others, might be considerably benefitted, we shall herein act *humanely*, and like good friends.

Barrow. Sermon 28. vol. iii.

When Christians conversing together on earth mutually desire the assistance of each other's prayers, they being by sense and experience thoroughly acquainted with their common *humanity*, and the frailty attending it, there is no danger of idolatry in this case.

Bull. Works, vol. i. p. 292.

It is a rule of equity and *humanity*, built upon plain reason, that rather a nocent person should be permitted to escape, than an innocent should be constrained to suffer: for the impunity of the one is but an inconvenience, the suffering of the other is wrong; the punishment of the guilty, yieldeth onely a remote probable benefit; the affliction of the blameless, involveth a near certain mischief.

Barrow. Sermon 20. vol. i.

Though learn'd, well-bred; and though well-bred sincere;
Modestly bold and *humanly* severe.

Pope. Essay on Criticism.

Delight of *human-kind* and gods above,
Parent of Rome, propitious queen of love,
Whose vital power, air, earth, and sea supplies,
And breeds whate'er is born beneath the rolling skies.

Dryden. Lucretius, book i.

So soon did Christianity (the most compassionate and *humane* religion in the world, the religion which, above all others, was founded upon love, upon the love of God to mankind in Christ Jesus) begin to bring forth the fruits of that universal love and benevolence, which was to be the distinguishing mark of our holy profession.

Peurce. Sermon 14. vol. iv.

Perhaps a grave physician, gath'ring fees
Punctually paid for length'ning out disease;
No Cotton, whose *humanity* sheds rays,
That make superior skill his second praise.

Cowper. Hope.

It [Christianity] hath *humanised* the conduct of wars; it hath ceased to excite them.

Paley. Evidences, part iii. ch. vii.

The eastern world happily discovered, and for ever indissolubly joined and given to the western, the grand Portuguese empire in the east founded; the *humanization* of mankind, and universal commerce the consequence.

Mickle. Discourses on the Lusiad.

Philology, or polite literature, or the *humanities*, as they are called, did not, with all these encouragements, keep pace with other branches of knowledge.

Jortin. Remarks on Ecclesiastical History, Anno 1292.

HUMATION, Lat. *humatio*, from *humare*, to cover with earth, (*humus*.)

Interment.

Lancashire gave me breath
And Cambridge education

Middlesex gave me death

And this church my *humation*.

Fædler. Worthies. Lancashire. John Weever, Epitaph for himself.

HUMBLE, *v.*

HUMBLE, *adj.*

HUMBLESS,

HUMBLING,

HUMBLY,

HUMBLENESS,

HUMILE,

HUMILIATE,

HUMILIATION,

HUMILITY,

HUMBLE-MINDED,

HUMBLE-MOUTHED,

HUMBLE-VISAGED.

Fr. *humble*; It. *humile*; Sp. *humildo*; Lat. *humilis*, from *humus*, the ground, *terra madida et irrigata*; (Lennep;) from *vw, pluo, irrigo*. Scaliger and Lennep.

To lower, or bring low; to subject, to bring or cast down, to submit or cause to submit, to subdue, to degrade, to deject.

Humility is now generally applied, to our own sense of

the humbleness or lowliness of our own qualifications.
See the Quotation from Chaucer.

VOL. XXIII.

HUMILIATION, to an act or state of dejection, debasement, or degradation.

I never held me lady ne maistresse,
But *humble* servant to your worthinesse,
And ever shal, while that my life may dure,
Aboven every worldly creature.

Chaucer. The Clerkes Tale, v. 8700.

That lord hath litel of discretion,
That in swiche cas can no division:
But weigheth pride and *humbleness* after on.

Id. The Knightes Tale, v. 1783.

By wisdom, manhode, and by gret labour,
From *humblehede* to real majestee
Up rose he Julius the conquerour.

Id. The Monkes Tale, v. 14591.

And I answered ful *humbly*
Gladly sir, at your bidding
I woll me yelde in all thing.

Id. The Romant of the Rose, fol. 124.

And the fourth [maner of *humilitee*] is, whan he is not sorry of his *humiliation*.

Id. The Persones Tale, vol. ii. p. 321.

Humilitee or mekenesse is the remedy ayenst pride; that is a vertue, thurgh which a man hath veray knowlege of himself, and holdeth of himself no deintee, ne no pris, as in regard of his desertes, considering ever his freeltie.

Id. Ib. p. 320.

Upon hir knees she gan downe fall
With *humble* herte, and to nim call
And saide: O good father dere,
Why make ye thus heuy chere.

Gower. Conf. Am. book i. fol. 25.

And eke this maie I wel auowe
So lowe couthe I neuer bowe
To feigne *humilitee*.

Id. Ib. book i. fol. 11.

Our heavenly soueraygne lord and prince had for our sakes adbassed & *humiled* himself down euen to swadlyng cloutes, to the cradle to crying in his swathing bandes as other childre dooe.

Udall. Luke, ch. ii.

Reuerence is an *humbleness* in outward behauour, when we doe our duetie to them, that are our betters, or vnto such as are called to serue the king in some great vocation.

Wilson. Arte of Rhetorique, fol. 34.

None deserueth worthelye to bee exalted on hyghe, but onely throughe lowliness and *humbleyng* of hymselfe.

Udall. Ephesians, ch. iv.

This enemy the deuill hath *humiled* my lyfe, hath set me in a vyle offyce folowyng worldly pleasures and y^e fylthy desyres of the fleshe.

Fisher. On the Seuen Penitentiall Psalmes.

And whan king Dāpeter of Castell was come to the prince, to the cyte of Burdeux, he *humyled* hymselfe right swetely to the prince.

Lord Berners. Froissart. Cronycle, vol. i. ch. 231.

For God his wyll is, that we should *humiliate* and deiect our selues in the sight of his maiestie, vtterly confessyng and acknowledgyng, that of our owne power and strength it is vnpossible that we should do well.

Fisher. On Prayer, sig. C. 4.

And these vowes were only for offeringes & for *humylyacions* of the sprete, and not for chastyte of body.

Bale. Apology, fol. 152.

So he perswaded them with homage due
Themselves to *humble* to the ape prostrate,
Who, gently to them bowing in his gate,
Receyved them with chearefull entertayne.

Spenser. Mother Hubbard's Tale.

In *humble* dales is footing fast
The trode is not so tickle,
And though one fall through heedless hast
Yet is his misse not mickle.

Id. Shepherd's Calendar. July.

And, running all with greedie ioyfulness
To faire Irena, at her feet did fall,
And her adored with due *humbleness*
As their true liege and princesse naturall.

Id. Faerie Queene, book v. can. 12

3 D

HUMBLE.

HUM-
BLING.

Who, when to her they came,
Themselves to ground with gracious *humblesse* bent,
And her ador'd by honourable name,
Lifting to heauen her euerlasting fame.
Spenser. Faerie Queene, book i. can. 12.

Yearly enjoyn'd, some say, to undergo
This annual *humbling* certain number'd days,
To dash their pride, and joy for man seduc't.
Milton. Paradise Lost, book x. l. 576.

Therefore these two, her eldest sonnes, she sent
To seeke for succour of this ladies gift:
To whom their sute they *humblly* did present
In th' hearing of full many knights and ladies gent.
Spenser. Faerie Queene, book v. can. 10.

The due consideration of God's working in us, is the greatest in-
ducement imaginable to a self-debasing *humiliation*.
Hopkins. Sermons, fol. 588.

QUEEN. My lord, my lord,
I am a simple woman, much too weake
T' oppose your cunning. Y'are meek, & *humble-mouth'd*.
You signe your place, and calling, in full seeming,
With meekenesse and *humilitie*.
Shakspeare. Henry V. fol. 216.

Haste, signifie so much while we attend,
Like *humble-visag'd* suters, his high will.
Id. Love's Labour Lost, fol. 126.

The plain meaning of the apostle, is to declare, (in one continued
sentence,) that Christ, when he was in the form of God, *humbl'd*
himself by condescending to take upon him the form of man; and
not only so, but *humbl'd* himself yet further, by condescending to die
even the death of a malefactor.

Clarke. On the Trinity, ch. ii. sec. 5.

Thy sum of duty let two words contain,
(O may they graven in thy heart remain)
Be *humble*, and be just.

Prior. Solomon. Power, book iii.

Repining much, and griev'd at war's delay
Impatient Cæsar often chides his stay,
Oft he is heard to threat, and *humblly* oft to pray.

Rowe. Lucan, book v.

I will invite all manner of persons of what manners or dispositions
soever, whether the ambitious or *humble-minded*, the proud or pitiful,
ingenuous, or base-minded, &c.
Spectator, No. 442.

The 26th instant (June 1709) was observed as a day of fasting
and *humiliation*, to implore a blessing on the arms of the allies this en-
suing campaign.
Tatler, No. 33.

But, as high turrets, for their airy steep,
Require foundations, in proportion deep;
And lofty cedars as far upward shoot,
As to the nether heavens they drive the root:
So low did her secure foundation lie,
She was not *humble*, but *humility*.

Dryden. Eleonora.

Many of them came readily on board, crouching down upon the
deck, and not quitting that *humble* posture, till they were desired to
get up.
Cook. Voyages, vol. vi. book iii. ch. viii.

Let us endeavour to purify our hearts from all the pride and vanity
of this world, that we may possess such *humbleness* of mind as alone
can qualify us for receiving these truths.

Gilpin. Sermon 20. vol. iv.

The third is the class of artificers, manufacturers, and merchants,
whom they endeavour to degrade by the *humiliating* appellation of
the barren or unproductive class.

Smith. Wealth of Nations, book iv. ch. ix.

It may seem to require a very small degree of the grace of *humility*
to acknowledge that God is stronger than man; but it is the *humility*
and contrition of the heart that gives force to prayer; and this either
in prosperity or distress.
Ogden. Sermon 4.

HUMBLING, *i. e.* the *humming*. The *humble* bee,
the *humming* bee, from the loudness of its *hum*.

Or els like the *humbling*
After the clap of a thundering
When Jouis hath the eyre ybete.

Chaucer. The second Booke of Fame.

The honie-bags steale from the *humble-bees*.
Shakspeare. Midsummer Night's Dream, fol. 153.

Full merrily the *humble-bee* doth sing
Till he hath lost his hony and his sting.
Id. Troilus and Cressida, fol. 105.

HUMBOLDTIA, in *Botany*, a genus of the class
Pentandria, order *Monogynia*, natural order *Legumi-
nosæ*. Generic character: calyx four-parted; corolla,
petals five; pod oblong, compressed.

One species, *H. laurifolia*, a tree, native of Ceylon.

HUMDRUM, see *HUM*, *ante*; *drum*, (*q. v.*) droning,
dull.

"Shall we," quoth she, "stand still *hum-drum*,
And see stout Bruin all alone
By numbers basely overthrown?"

Butler. Hudibras, part i. can. 3.

If he be phlegmatic, he may sit in silence at the *Hum drum* club
in Ivy-lane.
Goldsmith. Essay 1.

HUMEA, in *Botany*, a genus of the class *Synge-
nesia*, order *Polygamia æqualis*. Generic character:
receptacle minute, glandular; down none; calyx loosely
imbricated, membranaceous, florets usually three; an-
thers aristate.

One species, *H. elegans*, a native of New South
Wales.

HUME'CT,	} Lat. <i>humectare</i> , <i>humidus</i> ; Fr. <i>humecter</i> , <i>humide</i> ; It. <i>humido</i> ; Sp. <i>humedo</i> ; from <i>humere</i> , to wet or moisten, and this from <i>humus</i> . See HUMBLE, <i>ante</i> .
HUME'CTATE,	
HUMECTA'TION,	
HUME'CTIVE,	
HU'MID,	
HUMI'DITY.	To wet or water, to moisten, to damp.

Galen wyll not permytte, that pure wyne, without alaye of water,
shulde in any wyse be gyuen to chyldren, for as moch as it *humecteth*
the body, or maketh it moyster and hotter, than is conueniente.

Sir Thomas Elyot. The Governour, book i. ch. xi.

More ouer, that all and syngular partes of the body, be therewith
somwhat *humected*, wherby it hapneth, that thinges harde be mol-
lified, moyste thynges are extenuate, and the poores of the bodye
are more opened.

Id. The Castel of Helth, book ii. ch. xxxi.

Yet thinke not but it dooeth brenne my heart, so that with the in-
warde great heate is consumed the *humiditee* of the eies outward.

Golden Boke. The eighth Letter, sig. E. e. 6.

When we eat Nature draws a moisture into our mouth, to *humec-
rate* our meat and convey the tast of it into the nervs of the tongue,
which are to make report of it to the brain.

Digby. Of Bodies, ch. xxxv.

Native Lucca olives afford [an oyl], fit to allay the tartness of
vinegar and other acids, yet gently to warm and *humectate* where it
passes.
Evelyn. Acetaria.

That which is concreted by exsiccation or expression of *humidity*,
will be resolved by *humectation*, as earth, dirt, and clay.

Sir Thomas Brown. Vulgar Errours, book ii. ch. i.

The sun that light imparts to all, receives
From all his alimental recompence
In *humid* exhalations, and at even
Supps with the ocean.

Milton. Paradise Lost, book v. l. 425.

The calm and wholesome ayre which now is purged from its noxi-
ous reeks and vapours, and abounds with their saline spirituous *humidity*,
will questionlesse be very propitious to those tender inchoations of
life.
Digby. Preeistence of Souls.

She clasps as still alive, and with her hand
Extends his body on the grassy strand;
With her soft hair his *humid* visage dries,
And adds these words, a sequel to her cries.

Lewis. The Thebaid of Statius, book ix.

He [Dr. Sangrado] would sometimes say, "Drink, my children:
health consists in the suppleness and *humectation* of the parts; drink
water in great abundance."

Smollett. Gil Blas, book ii. ch. iii.

HUM-
BLING.

HUMECT

HUMECT. It enables the animal to keep the principal part of the surface of the eye under cover, and to preserve it in a due state of *humidity* without shutting out the light.

Paley. Natural Theology, ch. xvi. sec. 7.

HUMIRIA, in *Botany*, a genus of the class *Polyandria*, order *Monogynia*, natural order *Meliaceæ*. Generic character: calyx five-toothed, obtuse; corolla, petals five, oblong; stamens about twenty, united into a tube; anthers erect; stigma five-rayed, pericarp five-celled, cells one-seeded.

One species, *H. balsamifera*, native of Cayenne Decandolle.

HUMMOCK, a word common among our voyagers, and by which they appear to mean

A mound, or hillock.

It has a high *hummock* towards the Western part, which descends gradually, at the last terminates in a low point to the Eastward.

Anson. Voyage round the World, book ii. ch. ix.

We discovered an elevated land to the South of this. It first appeared in detached *hummocks*, but we judged it to be connected.

Cook. Voyages, vol. iv. book iii. ch. iv.

HU'MOUR, *v.* } Fr. *humeur*; It. *humore*;
HU'MOUR, *n.* } Sp. *humor*; Lat. *humor*. For
HU'MORAL, } the Etymology see **HUMECT**,
HU'MOURIST, or } *ante*.
HU'MORIST, } The healthy or unhealthy
HU'MOUROUS, } temperament or disposition of
HU'MOUROUSLY, } the body was supposed to de-
HU'MOUROUSNESS, } pend upon four principal hu-
HU'MOURSOME, } mours. See the Quotation from
HU'MOURSOMELY. } the *Castel of Helth*; and the
word was early applied, met. to the temperament or disposition of the mind. In Ben Jonson's time it appears to have been further extended in an extravagant degree to the whims or peculiarities of the temper or disposition. See the *Induction to Every Man out of his Humour*; also *Every Man in his Humour*, act iii. And see Nares.

Humour, literally, moisture. *Humourous*, in Shakspeare and Ben Jonson, (and also in Chapman and Drayton, quoted by Steevens in his note on Shakspeare,) as we now use *humid*; also, as *humoursome*.

Humour is applied, emphatically, to a diseased state in the quantity or quality of *humours* in the body. Met. the temperament, temper, or disposition of mind, general or particular; the peculiar whim, caprice, or fancy.

For some especial usages of *humour* and *humourist*, see the Quotations from Temple, Swift, the *Spectator*, *Rambler*, and Goldsmith.

Swevenes engendren of repletions,
 And oft of fume, and of complexions,
 Whan humours ben to habundant in a wight.

Chaucer. The Nonnes Preestes Tale, v. 14932.

In the body of man be foure principall *humours*, which contynuiuge in the proportion, that nature hath lymyted. the body is free from all sykenesse; whiche [*humours*] be these folowinge. Bloudde, fleume, choler, melancoly.

Sir Thomas Elyot. The Castel of Helth, fol. 8.

Therefore as one lackynge the quyeche *humore* of deuocion, I cannot long contynue in prayer.

Fisher. On the Seuen Penitentiall Psalmes, sig. O. 1.

PET. Your grace shall give me leave not to believe ye;
 I know you are a woman, and so *humour'd*.

Beaumont and Fletcher. The Loyal Subject, act i.

Or as the Cyprian Goddess, newly borne
 Of th' ocean's fruitful froth, did first appeare:
 Such seemed they, and so their yellow heare
 Christalline *humor* dropped downe apace.

Spenser. Faerie Queene, book i. can. 12.

And ner against sweet Cheerefulness was placed,
 Whose eyes, like twinkling stars in evening cleare,
 Were deckt with smyles that all sad *humors* chased,
 And darted forth delights the which her goodly graced.
Spenser. Faerie Queene, book iv. can. 10.

ÆMIL. Is he not iealous?

DES. Who, he? I thinke the sun where he was borne,
 Drew all such *humors* from him.

Shakspeare. Othello, fol. 327.

Now gentlemen, I goe
 To turne an actor, and a *humorist*,
 Where (ere I doe resume my present person)
 We hope to make the circles of your eyes
 Flow with distilled laughter.

Ben Jonson. Every Man out of his Humour, fol. 71.

BEN. Come he hath hid himselfe among these trees
 To be consorted with the *humorous* night.

Shakspeare. Romeo and Juliet, fol. 59.

Begin, and (more to grace thy cunning voyce)
 The *humorous* ayre shall mix her solemne tunes,
 With thy sad words.

Ben Jonson. Cynthia's Revels, act i. sc. 2.

Or, self-conceited, play the *humorous* Platonist,
 Which boldly dares affirm, that spirits themselves supply,
 With bodies, to commix with frail mortality.

Drayton. Poly-olbion, song 5.

The divine way of working is not parti-colour or *humoursome*,
 but uniform, and consonant to the laws of exactest wisdom.

Glanvil. Preeexistence of Souls, ch. ii.

The difference being only this; that this was a thing intelligible,
 but *humoursomely* expressed, whereas the other seems to be perfect
 nonsense.

Cudworth. Intellectual System, book i. ch. iii. fol. 107.

Such excellent persons must in all things be *humoured*, and
 cockered, otherwise you greatly wrong them.

Barrow. Sermon 29. vol. iii.

I am deceived if our English has not in some kind excelled both
 the modern and the antient [drama poetry] which has been by force
 of a vein natural perhaps to our country, and which with us is called
humour, a word peculiar to our language too, and hard to be expressed
 in any other.—Thus we come to have more originals, and more that
 appear what they are; we have more *humour* because every man
 follows his own, and takes a pleasure, perhaps a pride, to shew it.

Sir William Temple. Works, vol. iii. p. 437. Of Poetry.

As this taste of *humour* is purely natural, so is *humour* itself;
 neither is it a talent confined to men of wit or learning; for we ob-
 serve it sometimes among common servants, and the meanest of the
 people, while the very owners are often ignorant of the gift they
 possess.

Swift. The Intelligencer, No. 3.

If a *humoral* tumour be made by any external cause, as by a
 wound, bruise, &c. it is easily discerned.

Wiseman. Surgery, book i. ch. ii.

These poor gentlemen endeavour to gain themselves the reputation
 of wits and *humourists*, by such monstrous conceits as almost qualify
 them for Bedlam; not considering that *humour* should always lie
 under the check of reason, and that it requires the direction of the
 nicest judgment, by so much the more as it indulges itself in the
 most boundless freedoms.

Spectator, No. 35.

He lived as a lodger at a house of a widow-woman, and was a
 great *humourist* in all the parts of his life.

Id. No. 101.

A rule, that by adding discretion to devotion, will both keep him
 from being *humoursome*, singular, and phantastick in his preparations
 before the sacrament, and (which is worse, and must fatally unravel
 all again) from being (as most are) loose and remiss after it.

South. Sermons, vol. ii. p. 312.

By *humouring* the mind in trifles, we teach it to presume on its
 own importunity, in greater matters: and it will be found a conve-
 nient rule in the management of our passions, as of our children, to
 refuse a compliance with them, not merely when they ask improper
 things, but when they ask any thing with impatience.

Hurd. Works, vol. vii. p. 306. Sermon 48.

Wit raises human nature above its level; *humour* acts a contrary
 part and equally depresses it. To expect exalted *humour* is a con-
 tradiction in terms; and the critic, by demanding an impossibility
 from the comic poet, has in effect banished new comedy from the
 stage.

Goldsmith. The Present State of Polite Learning, ch. xi.

HUMOUR.
—
HUN-
DRED.

Good *humour* may be defined a habit of being pleased; a constant and perennial softness of manner, easiness of approach, and suavity of disposition: it is a state between gaiety and unconcern; the act or emanation of a mind at leisure to regard the gratification of another.

Johnson. *Rambler*, No. 72.

When a thing is *humourously* described, our burst of laughter proceeds from a very different cause; we compare the absurdity of the character represented with our own, and triumph in conscious superiority.

Goldsmith. *The Present State of Polite Learning*, ch. xi.

HUMP, *n.* } Perhaps from the A. S. *imp-*
HU'MPED, } *an, inserere, implantare*, to im-
HUMP-BACK, *n.* } plant, to ingraft; but no very an-
HUMP-BACK, *adj.* } cient examples of the word have
occurred, nor is it to be found in our old Lexicographers.

Applied to

A lump or bump planted or fixed upon the back.

Observing one advancing towards the heap with a larger cargo than ordinary upon his back, I found upon his near approach that it was only a natural *hump*, which he disposed of with great joy of heart among this collection of human miseries.

Spectator, No. 558.

The eldest son of Philip, then chief of the family, [was] born with an *hump-back* and very high nose.

Tatler, No. 75.

Upon a third trial found I him a straight-shouldered man as one would desire to see, but a little unfortunate in a *humpt-back*.

Guardian, No. 102.

I could not from my heart forbear pitying the poor *hump-backed* gentleman mentioned in the former paper, who went off a very well-shaped person with a stone in his bladder.

Spectator, No. 529.

If the back be *humped*, the man is deformed; because his back has an unusual figure, and what carries with it the idea of some disease or misfortune.

Burke. *On the Suolime and Beautiful*, sec. 5.

Tight stays they find oft end in *humps*.

Lloyd. *The Cobbler of Cripplegate's Letter*.

HUMULUS, in *Botany*, a genus of the class *Dioecia*, order *Hexandria*, natural order *Urticæ*. Generic character: male flower, calyx five-leaved; corolla none: female flower, calyx one-leaved, obliquely spreading, entire; styles two; one seed within a leaf-like calyx.

The only species of this genus is the Hop plant, a native of Europe, but more generally cultivated in England than any other country.

HUNCH, *v.* } *Hunch-back'd*, (says Skinner,)
HUNCH, *n.* } *gibbosus*, from the Ger. *hocker*,
HUNCH-BACKED. } *gibbus*; D. *hucken*, in *terram desidere*, to sit down upon the ground; *huck-schouderen*, *humeros contrahere*; to contract the shoulders. To *hunch*, he derives from the Ger. *husche*, a blow of the fist. To *hunch* appears to mean,

To press, squeeze, or push against.

A *hunch*, a lump or bump occasioned by pressure; a bump or thump.

A *hunch* of bread; a piece of bread. Grose. A good big slice, or lump, of bread or meat. Moor.

Then Jack's friends began to *hunch* and push one another. "Why don't you go and cut the poor fellow down? Why don't you?"

History of John Bull, ch. xiii.

He is as stupid and as venomous as a *hunch-back'd* toad.

Dennis. *Reflections on the Essay on Criticism*.

In a lake called Lyn Rathlyn, in Meireonethshire, is a very singular variety of perch: the back is quite *hunched*, and the lower part of the back bone, next the tail, strangely distorted.

Pennant. *British Zoology*. Common Perch.

HUNDRED, *n.* } D. *hondred*; Ger. *hundert*;
HU'NDRED, *adj.* } Sw. *hundrade*. "It is in the
HU'NDREDOR, } highest degree probable (says
HU'NDREDTH, } Tooke) that all numeration was
HU'NDREDFOLD. } originally performed by the fin

gers, the actual resort of the ignorant; for the number of the fingers is still the utmost extent of numeration. The hands doubled, closed, shut in, include and conclude all number; and might therefore well be denominated *tyn* or *ten*." (*i. e.* closed, from the A. S. verb *tyn-an*, to enclose. See *TEN*.) And Wachter conjectures that the Goth. and A. S. *hund*, is no other word than *hand*, *manus*, in many dialects written *hond*; and that in numeration it was originally used to signify *ten*; he further observes that our forefathers numerated not only units, but decads, by the fingers, and that hence *hund* became applied to *decies decem*, or ten times ten: *i. e.* it may be added, to the number denoted by the fingers of the hand ten times closed. In the A. S. notation, it is evident, *hund* was not always applied to 100; for instance, 70 was expressed by *hund seofontig*, which, if we connect the interpretations of Tooke and Wachter, would be the *hand*, or fingers of the *hand*, seven times closed; 80, *hund eahtatig*, or the *hand* eight times closed; and in this manner they proceeded to 120, *hund twelftig*, or the hand twelve times closed. The termination *ert*, *red*, *rude*, *rade*, Wachter supposes to be *rat*, *numerus*, from the Ger. *rat-en*, (in A. S. *ræd-an*.) to count, to calculate; and, thus, *hundert* will be, *q. d.* *numerus centenarius*; or, rather, consistently with his own Etymology, the number denoted by the hand, or fingers of the hand, ten times counted. Junius traces and explains *hund*, and the A. S. manner of using it, differently: the A. S. *tyn*, or 10, is in Goth. *taihun*, and 100, or 10 times 10, *taihuntaihund*, or *taihuntehund*; and he supposes that the cause of this reduplication not being observed, the terminating syllable *hund* became separately written, thus, *taihuntai hund*, or *taihunte hund*; and that the Anglo-Saxons, misled by this corrupt manner of writing, prefixed *hund*, *veluti ex supervacuo*, to their higher cardinal numbers, and even denominated 100, *hund teontig*, *i. e.* *hund* ten times. According to this interpretation, the superfluous *hund* became in time alone retained, and the significant *teontig* discarded.

Aftur an *hundred* Picars into Scotlonde he sende
By certeyn messageres, so þat heo gonne brynge

"Honour'd by Jove above the lot of man!
King of a *hundred* kings! to whom resign'd
The strongest, bravest, greatest of mankind."

Pope. *Homer. Odyssey*, book xxiv.

They found, by some *hundreds* of precedents, that in some bills the lords began, the clauses that set the fines; and at other times they changed the use to which they were applied.

Burnet. *Own Times. Queen Anne*, Anno 1702.

These promotions, the *hundred-gun* ships you put into commission, and the horse and dragoons you raise, may well frighten Spain.
The Life of Lord Bellingbrooke, p. 171. *Letter to Sir Wm. Wyndham*.

As ten families of freeholders made up a town or tithing, so ten tithings composed a superior division called a *hundred*, as consisting of ten times ten families.

Blackstone. *Commentaries, Introduction*, sec. 4.

Twelve freeholders were chosen; who, having sworn, together with the *hundreder*, or presiding magistrate of that division, to administer impartial justice, proceeded to the examination of that cause which was submitted to their jurisdiction.

Hume. *History of England*, ch. ii. *Alfred*.

The division of England into HUNDREDS is universally ascribed to Alfred. To cite only two authorities, Brompton, the Abbot of Jorval, (*non ignobile cœnobium Ordinis Cisterciensis in agro Richmondensi*), who wrote in the time of Edward III., speaks thus in his *Chronicle*, *Et licet inter arma Leges sileant, ipse tamen Aluredus Rex inter fremitus armorum Leges tulit, et Centurias quas Hundredas dicunt et Decurias quas Trithingas vocant instituit.* (*Dec. Script.* 818.) And Thorne, a Monk of St. Augustin at Canterbury, *omnium accuratissimus*, who flourished about 1380, says yet more briefly, *Iste Elfredus fuit primus Rex Angliæ qui inunctus erat. Hic constituit Hundred et Lestes.* (*Lathes.*) (*Ib.* 1777.) There is some difference, however, respecting the origin of the name. Lamberd, *ad v. Centuria*, says as follows: *Aluredus Rex ubi cum Guthruno Daco fœdus inierat, prudentissimum illud olim a Jethrone Moysi datum secutus consilium, Angliam primus in Satrapias, Centurias et Decurias partitus est: i. e. into Shires, Hundreds, and Tithings.* Brompton and Giraldus Cambrensis derive the title Hundred from the portion of land assigned to it containing 100 *villæ*. The former,

in describing the Province of York, enumerates certain districts *quæ etiam usitato vocabulo dicuntur Hundredi sive Wapentakes*. *Hundredus* Latinè, dicitur *Walliæ et Hiberniæ* Cantredus, et continet centum villas. *Wapentake* Anglicè idem est quod arma capere, eò quod in primo adventu novi domini solebant tenentes pro homagio reddere arma sua. (*Ib.* 956.) The latter writer, speaking of the Isle of Man, states, *Monam Insulam 343 villas habere et pro tribus Cantredis (Hundreds) reputari*. Now in the Isle of Man there do not exist above 40 villages, and as Spelman has sufficiently remarked, (*Gloss. ad v.*) *Nusquam, quod scio, reperiuntur 100 villæ in aliquo Hundredo per totam Angliam. Nescio an medietas. Magni habentur qui vel 40 vel 30 numerant. Multi ne 10: quidam duas tantum, et nonnulli, ut Hundredi de Chetham, Marden et in Comitatu Cantii, unicâ sunt contenti. Villa, therefore, as above used, must be understood for a farm-house or family; and this interpretation explains a Hundred to mean such portion of a County as could furnish 100 fidejussors of the King's Peace, of which the Tithing or tenth part furnished ten. These from the Hundred were named Hundredors.*

Spelman (*loc. cit.*) may be consulted for fuller details of the antiquity and early jurisdiction of the *Hundredarii*, and Selden has much learning on them in his *Analecta Anglo-Britannica*, v. Hundreds were introduced, but not invented, by Alfred; for a passage in Tacitus distinctly shows that these establishments existed among the Germans long anterior to the reign of the Anglo-Saxon Monarch. The words have been often quoted; but they bear so strongly on the point, that we must once again repeat them. *CENTENI ex singulis pagis sunt, idque ipsum inter suos vocantur, et quod primo numerus fuit, jam nomen et honor est.* (*de Mor. Germ.* 6.)

The *Hundred Court* is called by Blackstone (iii. 4.) a larger Court Baron, being held for all the inhabitants of a particular Hundred instead of for a Manor. The Free Suitors are also Judges, and the Steward Registrar, as in the Court Baron. Mr. Coleridge, in his note on this passage, remarks, that "there is scarcely any point of Legal antiquity more obscure than the history and functions of the Hundred Court. It seems to have been originally a King's Court, and to have been held by some subordinate officer of the Sheriff. But as holding this Court was a source of profit, it was common both for the Sheriff to let his Hundred Courts to farm, and for the Crown to sever them from his jurisdiction, either wholly or in part, and to grant them out as franchises to individuals." The first of these inconvenient practices was restrained by 25 Henry VI. c. 9.

Each Hundred is still governed by a High Constable or Bailiff, but the trial of Causes in the Hundred Courts has fallen into disuse, and is merged into the County Courts. By various Statutes, Hundreds are liable to actions for injuries sustained by riots, robbery, malicious mischiefs, &c.; and the mode of proceeding in these actions may be learned from Sir Edmond Saunders's *Reports*, (394.) and the note thereon by Sergeant Williams. See above HUE AND CRY.

Modus tenendi unum Hundredum, 1546; Sheppard, *Survey of the County Judicatories*, 1656; Turner, *Duty of High Constables of Hundreds*, 1761; G. Sharpe, *Account of the Ancient Division of the English Nation into Hundreds and Tithings*, 1784.

HUN-
DRED.

H U N G A R Y.

HUN-
GARY.

HUNGARY, a Kingdom united to the Austrian Empire, lies between $44^{\circ} 30'$ and $49^{\circ} 36'$ North latitude, and between $15^{\circ} 43'$ and $26^{\circ} 32'$ East longitude; hence its extreme length is about 183 leagues, and its greatest breadth about 130. Hungary properly so called is bounded on the North-West by Moravia; on the North-East by Galicia; on the East by Transylvania; on the South by the Regiments, or Military Frontiers, which separate it from Bosnia and Turkey; on the South-West by Illyria, and on the West by Styria and Austria below the Ens.

Extent.

The Kingdom of Hungary, or Magyar Ország, once embraced within its limits many Countries which have long ceased to be the heritage of its Princes. Bulgaria, Walachia, Moldavia, Transylvania, Galicia, Servia, Bosnia, Croatia, &c. have been taken from it at different periods, by the jealousy of the Poles, the victories of the Ottomans, or by Austrian encroachments. There remained, therefore, previous to 1809, only Slavonia, part of Croatia and Dalmatia, including some of the Islands in the Adriatic; but by the Treaty of Vienna, made in that year, Hungarian Dalmatia, part of Croatia and of the Military Frontiers were united to Carniola and part of Carinthia, to form the *Provinces Illyriennes*, attached to the French Empire. Thus the Kingdom of Hungary was reduced within the Save at Zagrab, (Agram,) and the same limit still continues; for although the ceded Provinces were restored to Austria in 1814, yet they were not reunited to Hungary, but were incorporated with Friuli and some adjoining Provinces to form the Kingdom of ILLYRIA. This loss of territory amounts to 844 square leagues.

The dominions inherited with the crown of Hungary are, the Kingdom properly so called, with the remnants of Slavonia and Croatia; the Principality of Transylvania, or the *Siebenbürgen*, i. e. Seven Castles, as the Germans call it, the Military Frontiers, and the Dalmatian Provinces. The superficial extent of all these dominions are estimated by Hassel at 6074.76, and by Beudant, from the Maps of Lipsky and Görög, at 5597 square German miles. These calculations, however, exceed very far those of a more ancient date. The measurements of Hermann, Templemann, Busching, De Luca, and Jacobi, average only 4763 square miles. If we take, however, the Maps of Lipsky as a standard, the area of Hungary properly so called, together with the Military Frontiers, will be about 4981 German, or 112,100 English square miles.

Surface.

There is no Country in Europe which exhibits so great a variety of appearances as Hungary, or which is on the whole so much indebted to the bounties of Nature. High mountains, in some places reaching the limits of perpetual snow, nearly surround it, while in the centre are level plains of some thousand miles in extent. Dry wastes and deep morasses, alluvial soils of exuberant fertility, and extensive sandy deserts, an immense tract of open country, and the finest woods in Europe, are here found together.

Mountains.

We shall commence our account of the mountains with those on the Northern limits. The Carpathians, extending from West to East in a semicircular line of

200 leagues, are, according to Beudant, not so much a chain as a high terrace, sprinkled with isolated groups, and terminated at both extremities by great mountain masses. The name of these mountains, pronounced Crapats by the Poles and Bohemians, appears to be of Northern derivation, the word *Chrebet* signifying *mountains* in Russian. Ptolemy is the first ancient Geographer who mentions them; but their name appears to have been known to the Greeks in the earliest Ages, and the isle of Carpathos is frequently noticed by Homer. The mountains of the North-West are the Carpathians, or Crapatsk, properly so called; among these is the lofty group of *Tatra*, the summits of which exceed the height of 8000 feet above the sea: a little to the South-West of the former are the groups of mountains denominated *Fatra*, and celebrated for their mineral riches. Numerous groups, without any general name, and apparently without any connection, lie at the foot of these, and, detached from them all, the group of *Matra* rises abruptly to a great elevation above the plain between the rivers Zagyva and Tarna. A chain of hills runs Southward from Eperies to Tokay, comprised between the rivers Hernat, Topla, and Bodrog, and surrounded on every side by extensive plains. These are the celebrated *Hégy Allya*, or lower hills, the Southern portion of which are covered with the most valuable vineyards in Europe. The Carpathians on the North-East are become, it would appear, a mere sandy ridge of easy access and moderate elevation. "They descend on both sides," says Beudant, "by an easy slope to lose themselves in the plains. Here and there points of solid rock pierce through the sandy strata, and seem to indicate the connection of the Transylvanian mountains and those of Tatra. The mountain masses of Transylvania and the Western Carpathians appear like towers at the entrance of an immense gulf, the ridge between them is like a great bar, with rounded summits and sides gently sloped. This inferior chain is composed wholly of fine sand, more or less compact, so that an alluvion of arenaceous materials seems to have filled up the ancient connection between the plains of Poland and those of Hungary."

This is evidently the language of a Geologist whose attention was directed to the mechanical agency of water in effecting the revolutions whose traces are visible on the surface of the globe. On the other hand, M. Kitaibel, a Hungarian Naturalist, while he admits the inferior elevation and the roundness of the North-Eastern Carpathians, does not so absolutely divest them of the character of a natural barrier. The mountains of TRANSYLVANIA, rendered so interesting by their mines, will be described under that head. On the South the mountains of the Bannat, of no great elevation, but presenting bare rocks and bold precipices, are separated from those of Servia only by the contracted channel of the Danube. On the South-West, also, some branches of the Styrian Alps run parallel to the Drave, and stretching Northward form the *Bakony* hills to the North of Lake Balaton; further to the South, in Syrmia, are the picturesque hills of *Fruska-Gora*. The Julian Alps, commencing in Carniola, spread through Croatia and

HUN-
GARY.

Carpathians

Alps.

HUN-
GARY.

Hungarian Dalmatia, so as to form a connection with the system of Mount Hæmus. Thus the Kingdom of Hungary, in the larger sense, is a great basin, embraced by the Carpathians on the Northern, and by the branches of the Alps and of Hæmus on the Southern side. A portion, however, of the South-Eastern frontier is formed by the Danube, and consequently unprotected by the mountain barrier towards the South, which, with the Province of Servia, is in the dominions of the Porte.

The plains.

Between these mountain groups are the most extensive plains in Europe; one of these extends from the hills of Presburg, which separate it from the plains of Austria and Moravia, to the mountains of Bakony on the South-East. This plain, which is of an elliptical form, has 40 leagues in its greatest diameter from Stein am Anger to Freistadt, and 25 in its least between Presburg and Dotis. Its medium height is about 400 feet above the sea; its rise towards the mountains is insensible. But the great central plain far exceeds this, having 120 leagues from the hills of Vihorlet in the North, to the Danube in the South, with 80 leagues in breadth from the mountains of Bakony to those of Transylvania. This immense plain presents in many places the appearance, and in summer has the burning heat, of the African deserts. Bare and shifting sands, covered with saline incrustations, sometimes extend as far as the eye can reach; hot winds, and the appearances of *mirage*, are common. Near the great rivers, the Danube and Theiss, which wind in parallel directions along the margins of this plain, immense marshes, producing nothing but reeds, and in floods presenting the appearance of a sea, give birth to thick fogs and unwholesome exhalations. In the burning sands between Pesth and Szolnock no tree flourishes; in the neighbourhood of Debreczin again is a barren sandy tract of more than 70 miles in compass.

Danube.

All the rivers flowing from this amphitheatre of mountains are collected by the Danube, with the exception of the Poprad, which finds its way Northward from Zips till it joins the Dunajec, and falls into the Vistula. The Danube, the Hungarian name for which, *Duna*, is a general name for river, derived from a dialect of the Persian, enters Hungary at Deven, where it receives the river March on the left. Below Presburg it is divided into three branches, embracing a great number of islands; one of these rejoins the main branch at Raab after receiving the rivers *Raab* and *Laita*; the other at Comorn, increased by the waters of the *Wag* or *Vag*. The river then runs Eastward by Gran and Ypoly; but at Vartz, where it reaches the great plain of Lower Hungary, it turns suddenly to the South in a slow and winding course, passing by Buda and Pesth, and receiving the Drave with some smaller rivers on the right bank. The direction of its course to the South continues till it reaches the hills of Fruska-Gora on the limits of Slavonia, when it again bends towards the East; and being greatly augmented by the waters of the Theiss, of the Save at Belgrade, the Temes at Pantsova, and numerous lesser streams, it quits Hungary at Neu Orsova with an accelerated and foaming current in a channel contracted by the Servian mountains. Having forced its way into the plains of Walachia and Moldavia, it resumes its slow and tranquil course, and falls by several mouths into the Black Sea. The Danube is well stocked with fish, and the sturgeon is taken as high

up as Presburg. From the slowness of its course in the low plains its banks are, in many places, covered with stagnant marshes, particularly in the Counties of Pest, Bars, and Tolna. This circumstance, together with its numerous sinuosities, and the difficulty of stemming its current lower down among the Servian mountains, are obstacles to its navigation which require to be corrected by the ingenuity and industry of Man.

The *Theiss* (*Tisza* Hung.) rises in the recesses of the North-Eastern Carpathians; and, after a very winding course of about 600 miles, during which it receives all the waters of Transylvania, and almost all those of the North of Hungary, falls into the Danube between Peterwaradin and Semlin. This river, notwithstanding its magnitude, is of little use for internal navigation, owing to the low and marshy nature of its banks, on which it is impossible to construct track-ways. It is, in consequence, ascended by boats no higher than Szegedin, where it is above 600 feet wide. Many rivers, however, of great magnitude fall into it higher up, which, with a little art, might be made to afford an easy communication between all parts of Lower Hungary. Among these are the *Szamos* and the *Körös*; the latter uniting three great branches, and flowing through a marshy country, which it frequently inundates. The *Maros*, itself a great river, and serving as the communication with Transylvania, being navigable to Carlsburg, falls into the Theiss at Szegedin. Towards the North the *Bodrog*, running through the fertile country of Tokay, and the *Hernat*, from the industrious country of Zips, flow into the Theiss with considerable streams. The quantity of fish in this river is so great as to give rise to a vulgar saying, that the Theiss consists of two-thirds water and one-third fish. To shorten the communication between it and the Danube the Canal of the Emperor Francis was constructed, about 70 miles in length and 60 feet wide.

The *Save* rises in the mountains of Carniola, and enters Hungary near Zagrab. It has a slow course, and frequently inundates the country through which it flows; the dikes raised to confine its channel being often swept away by the impetuosity of its increase. The Save is a large river navigable through a great part of its course, and is the ordinary channel of exportation to Dalmatia and Italy. The boats laden with corn and tobacco ascend to Szisseg, whence they proceed up the Kulpa to Carldstadt, where the navigation terminates. The *Drave* has its origin in the Tyrol, and, taking a South-Eastern course, falls into the Danube at Eszeck. This river forms the natural boundary between Hungary Proper and the Provinces of Slavonia and Croatia, as the Save constitutes the Southern limits of the Hungarian States in general. The Drave is also slow in its course, and liable to inundate the adjoining country. A great deal of morass in consequence lies along its bank, particularly near its embouchure.

Among the lakes of Hungary two are of considerable size. The *Neusiedler see* (*Fertő*, Hung.) extends about 22 miles in length between the Counties of Ödenburg and Wieselburg, with a mean breadth of four miles. It is too shallow to admit of navigation. Its shores are flat and marshy, overgrown with reeds, and frequented by wild fowl. The Latin name *Peiso* is erroneously given to this lake; for the *Lacus Peiso* of the Ancients was in the vicinity of Presburg, once called Peisburg; and the name still lives in the free town of Pösing, or Peisung. The site of the lake now, for the

Lakes.

HUN-
GARY.

most part, dried up, may be traced by the extensive marshes which remain. The water of the Neusiedler see has become salt since 1728, and can only be used as a medicine; 77 parts in a 100 of the residue from evaporation are sulphate of soda, or Glauber's salts. The lake frequently rises to a great height in summer, without any increase of the streams that fall into it. During the earthquake of 1763, the agitation of this lake was remarkable. The Rabza, its only outlet, connects it with the Danube.

The Bala-
ton.

The *Plattensee*, or Lake *Balaton*, is surrounded by the Counties of Szala, Sümegh, and Weszprim. Its length, from South-West to North-East, is 45 miles, with a breadth varying from three to nine miles. Its surface, including indeed the adjoining marshes, has been estimated at 500 square miles. The greater part of it is shallow, and the canoes with which it is generally navigated, hollowed out of the trunks of trees, are rarely large enough to hold two persons. The quantity of water which flows into it from the Szala and numerous small streams, appears abundant in proportion to its surface, and is chiefly carried off by evaporation; for the river *Sio*, which seems to unite it with the Danube, is little else than a stagnant canal surrounded by marshes. The Balaton is richly supplied with fish and water fowl; the bitterns, which inhabit its margin, are taken in great numbers for the sake of their down. Several unsuccessful attempts have been made to unite this lake with the Danube.

Numerous other lakes are enumerated by native Geographers, most of them situated in the mountains, and of small extent; attracting attention nevertheless, from the popular opinion that they communicate with the sea. Others are confounded with the surrounding marshes: of this description is the lake of Palics, near Theresianstadt, nearly twelve miles in compass, and with an uniform depth of six fathoms. It has a hard bottom, incrustated with alkaline salts. The waters of this lake are deemed highly efficacious in removing nervous and cutaneous diseases. There are numerous other small lakes, from the borders of which natron is collected in large quantities in summer time.

Morasses.

Morasses occupy a great extent in Hungary, and the Hungarian language is rich in terms to discriminate the different kinds of swampy ground. Bogs, covered with reeds, are called *motsar*, and the name of *lap* is given to sheets of water nourishing aquatic plants. The area occupied by those unwholesome swamps is estimated by the Baron de Liechtenstein at 300 square leagues, which is in all probability below the truth. The draining of these lands is a favourite project of patriotic Hungarians, and could undoubtedly be accomplished at comparatively small expense, if the Government were to enter cordially into the views of the people. In the neighbourhood of Lake Balaton considerable tracts have been recently reclaimed by the exertions of private individuals.

Climate.

Hungary is called by the Austrians the churchyard of Germany. But this censure of its climate must be understood with great limitations. A great diversity of temperature is to be found in its several districts. The summits of Tatra are covered with eternal snows, and on many other mountains the snow remains unthawed till the middle of July. In the Northern Counties, Arva, Liptau, Zips, and Marmaros, the rigours of winter endure for six months; snow often

falls in September, and does not disappear till the beginning of June.

Corn is ripe in the plain before it begins to shoot in the highlands. The sides, however, of the lower mountains are covered with magnificent beech and oak forests, and the valleys are fertile in grain. A line drawn through Vacz, Gyongyos, Erlau, and Tokay marks the commencement of a milder region, within which the vine reaches its perfection, and the mulberry grows luxuriantly. In the low plains melons cover the fields, but the fogs of the marshes injure the quality of the corn. The heat of the day is excessive, and often succeeded at night by piercing and humid coldness. The nitrous exhalations, dry winds, and the impurity of the water render an abode here extremely disagreeable. Although the insalubrity of Hungary has been unquestionably exaggerated, yet it must be admitted that a mephitic atmosphere is breathed in the neighbourhood of the marshes, and that malignant fevers are very prevalent. As it is generally supposed that the majority of those who fall victims to the climate are Germans or other strangers, it has been argued that the sole cause of the mortality is excessive indulgence in the wines and other luxuries in which Hungary abounds; and this opinion has been adopted by an intelligent English traveller, Dr. Bright. But a near examination of facts overturns this hypothesis, inasmuch as those most exposed to the scurvy and endemic diseases are the poorer class, and particularly the Walachians, who are obliged by the precepts of their Religion to fast rigidly 238 days in the year: the women, who live on vegetables and water, are the most unhealthy.

Those who wish for a Geognostical description of Hungary, will find all the information they can desire in Beudant's admirable *Voyage Minéralogique*. A very general sketch, notwithstanding the difficulty in such a case of being at once accurate and general, is all for which we can here afford room. The lower mountains of the Western Carpathians are composed generally of syenitic porphyry, surrounded by a rock which M. Beudant has named *trachyte*, a species of greenstone porphyry. This trachyte, rich in metallic veins, again appears in Transylvania. Granite appears only in the summits of Tatra and of the Transylvanian mountains, environed in the former situation by compact limestone, and in the second by greywacke. Between these points the red sandstone, of the coal formation, occupies a great extent of country; some peaks, however, of limestone and of greywacke emerging through it. This rock occurs again in Transylvania, where it covers immense deposits of rock-salt. To the South of Transylvania a chain of limestone hills runs along the borders of the Bannat, contracts the channel of the Danube, and rises to a considerable height in Servia and Bosnia. The numerous small hills which jut into the great plains like so many promontories, are in general composed of calcareous rocks of secondary formation, containing the remains of marine animals, with strata still more recent resting on them, filled with deposits of fossil wood. The great plains are formed of alluvial soil, but that of Lower Hungary has some extensive sandy deserts, which seem to have been formed by the ruin of the mountains at the North; in the centre of it also is a considerable tract perfectly level, and composed wholly of shells, a circumstance much insisted on by those who recognise in the plains of Hungary the bed of an ancient lake. The immense

HUN-
GARY.

HUN-
GARY.

Salt.

quantities of salt with which the soil here is impregnated tend to confirm this hypothesis.

The salt springs of the Hungarian plains are some hundreds in number. The marshes, and some lakes, as the Palitschersee, and the White sea, furnish natron or carbonate of soda in large quantities: the annual export of this salt exceeds 15,000 cwt. Great deposits of alum and nitre are also found alternating in parallel beds. Near Thorda are found alternating layers of white and brown common salt. The chief mines of this important mineral in Hungary Proper are at the village of Rhonaszek, in the County of Marmaros, where six pits are sunk, employing about 1200 miners. The annual produce is about 700,000 tons, and the revenue derived from it by Government is said to be very great; conjectures make it about 10 millions of florins.

Gold and
silver mines
at Schem-
nitz.

But the most famous mines, not indeed of Hungary only, but of all Europe, are the gold and silver mines at Schemnitz. The first operations in these mines are supposed to have taken place in the XIIth century, when large colonies of Saxons were introduced from the Hartz and Erzgebirg to explore the mineral wealth of the Carpathians. In some other places, however, ancient galleries and excavations have been recently met with, which countenance the opinion, that the precious metals were found and sought in these mountains by the Romans. The first contractors for the mines were Jews; but their gains were so great, and their honesty so much suspected, that they were forbidden by a law, which still exists, to inhabit a mint or mining district. Notwithstanding the great sums annually drawn from these mines by the Government, no school or college was erected here to promote the science of metallurgy till that founded by the Empress Maria Theresa. But this is far from rivalling the school of Halle, in Saxony, although attended by from 200 to 300 students. The fiscal spirit which predominates here, and which is ready to sacrifice the advantages attending improved Science to immediate gain, allows the establishments connected with the school to fall into decay. In treating the ores the only method pursued is that of fusion. The process of amalgamation, which had been brought to perfection in Saxony, is now wholly abandoned at Schemnitz. The advantages of that method were clearly demonstrated by Born, to whom Joseph II. assigned a tenth of the savings to be effected at Schemnitz, by its introduction, for a space of ten years. But the envy borne to the new Professor, and the violent hostility provoked at the time by his revolutionary opinions, operated to the disadvantage of his Scientific exertions, and his system was abandoned as soon as he left the place.

The extent of the metallic country, narrowly explored, is about five or six square miles, and appears a small basin in the midst of barren mountains. Within this space are 12 Royal mines, covering about 1200 acres; besides those worked by private individuals, who are obliged to bring the ores to the Royal smelting furnaces. All these mines communicate at what is called the Emperor Francis's Level, 600 feet below the surface, the greatest depth from which the water can be carried off. The subterranean canal by which it is discharged from this level is 12 miles in length. The works of the mines resemble those in other European Countries, but are on a greater scale. The shafts and galleries are well cut, and are kept in good order. Their vast size,

VOL. XXIII.

and the great sums necessarily expended on them, announce the antiquity of the works, and the special protection of sovereigns. The expense of the timber is enormous, as the rock in which the mines are situated is so liable to decompose, that a casing of wood is necessary in all the shafts, and where the air is foul the wood rapidly decays.

The great breadth of the metallic deposits at Schemnitz has given rise to doubts, whether they are not rather layers than veins; a doubt which appears to be connected with the mistaken notion, that they had the same dip and inclination as the minerals in which they are embedded. It appears, however, that the metallic masses all incline towards the South-East, while the minerals which cover them are inclined in the opposite direction. The veins at Schemnitz are indeed of a magnitude unequalled in Europe; their thickness is rarely less than from 18 to 25 feet, and in some places it even exceeds 120 feet. They do not, however, appear to reach to a great distance; and, though the greatest metallic veins in Europe, fall far short of the celebrated vein of *Vetamadre*, in Guanaxuato, which, with a breadth of from 120 to 140 feet, has been actually worked for a distance of nearly three leagues. (Humbolt, *Essai Politique*, tom. iii.) The mass of the veins is formed of drusy quartz, ferriferous limestone, sulphate of barytes, sulphate of silver mixed with native silver, and containing also gold, which is sometimes, though rarely, in visible lamellæ; pyrites of copper and iron, with other metalliferous compounds, are mingled in the mass.

The sulphate of silver and the galena are the most abundant metallic substances; they are sometimes separated from each other in a pure state: the sulphate of silver when thus unmingled affords the richer ores to the miner. The *schlich*, or pounded ore, in that case yields 160 marks of silver (about 80 lbs.) to a hundred weight. The gold is generally found in proportionate abundance with the silver. The ordinary ratio of the two metals is as 1 to 30; but here again the richness of the ore is extremely variable, and the mines abounding most in good silver ores have furnished the least gold.

It is extremely difficult to arrive at an authentic calculation of the quantity of gold, silver, and lead furnished annually by the mines at Schemnitz. It is certain, however, that the produce is constantly declining, and that the necessities of the late wars gave rise to a wasteful method of conducting the operations by only pursuing the richest veins. At the mines it is impossible to procure information respecting the aggregate produce during a course of years. The Aulic Chamber of the Mines at Vienna is not communicative, and statistical writers are at variance with one another. According to Schwartner the produce of the mines of Lower Hungary, between 1780 and 1788, was from 1200 to 1300 marks of gold, and from 58,000 to 59,000 marks of silver. Adding to this the produce of the mines of Upper Hungary, the total would be from 1500 to 1700 marks of gold, and from 70,000 to 74,000 marks of silver annually; but this does not appear a good mean, for the produce has been at different times far more considerable.

It is known that from 1680 to 1693 the produce of the mines at Kremnitz was 4000 marks of silver per week. In 1772, the mines of Lower Hungary furnished to the mint at the same town 53,860 marks of

HUN-
GARY.

Ores.

Revenue.

HUN-
GARY.

silver and 2291 marks of gold. From 1740 to 1773, the sum obtained from the mines of the same district was 100 millions of florins, (about a million and a half sterling,) which gives room to suppose an annual produce much exceeding that adopted by Schwartzner. M. Héron de Villefosse (*De la Richesse Minérale*, Par. 1819) states the annual produce of the Hungarian mines to be 2600 marks of gold, 80,000 marks of silver, and 6000 quintals of lead; a statement considered in Hungary to be correct as to the first two metals, but the quantity of lead is estimated much too low. Thus the gold and silver alone supply an annual sum of 6,344,000 francs, or about £254,000 sterling. These numbers, however, though they may be taken to represent the mean annual produce from remote times, are unquestionably much above the net produce of the present day.

If we adopt these data, it follows that Hungary furnishes one-half of the gold yielded by European mines, and Transylvania supplies nearly the whole of the remainder, for the gold collected in the other Countries of our Continent amounts to but a few marks. All the gold furnished by European mines may be estimated at 5300 marks, while those of America yield an annual supply of 70,647 marks. The quantity of silver annually drawn from the mines of Hungary is more than a third of the sum total furnished by the mines of Europe, which may be estimated at about 216,000 marks.

Iron, cop-
per, &c.

The principal iron mines of Hungary Proper are situated in the Counties of Gömör, Szala, Hont, Veszprim, Zips, and in the Bannat of Temeswar. The whole annual produce is estimated at 10,000 or 12,000 tons. The copper mines of Neusold, Herrengrund, Rosenau, Schmolnitz, Einsiedel, Göllnitz, and Dobsau, yield annually above 30,000 quintals of pure metal. Besides these, the mines of lead, antimony, cobalt, quicksilver, sulphur, arsenic, and other minerals, all rank among the most important of their kind in Europe, and bring in large sums to the public revenue. Not less important in a Country where so many furnaces are constantly kept employed, is the deposit of coal on the West side of the Neusiedler see, from which were drawn, in 1806, about 300,000 quintals. But the short-sighted avarice which is so apt to guide the proceedings of despotic Governments, bestows on the coal-mines, which yield but little profit in the first instance, not half the attention they deserve.

Hungary, so rich in the precious metals, abounds also in a variety of valuable gems. It is the only Country in Europe in which the precious or iridescent opal is met with. The mine in which this beautiful mineral is found is in the Bannat at Czerwentitza, near Kaschau. Amethysts, topazes, and garnets are disseminated in the rock so rich in metallic products. Marbles of all kinds are found, and a red variety, occurring at Dotis and Groswarden, is highly prized.

Corn.

The productions of the vegetable kingdom in Hungary are no less varied and abundant than those of the mineral. Though agriculture is there still in its infancy, yet such is the bounty of Nature, that the land teems with plenty. Rich crops of corn are grown with little care on the part of the husbandman. The County of Bihar, the country round Eedenburg and Temeswar, and the Bannat, are the most luxuriously fertile districts. The culture of rice, introduced into the latter within the present century, is rapidly gaining

ground; its produce, in 1820, was estimated at 10,000 metzen, (a measure equivalent to $4\frac{1}{2}$ English quarters.) Maize of a peculiar kind, called *kukurutza*, having the ears or spikes often a foot long, is cultivated in the Southern Counties. The whole produce of grain in 1820 was estimated at above 80 millions of metzen, exclusive of the Slavonian and Croatian districts. Hence Hungary is able to supply, in years of scarcity, the adjoining Provinces of Italy and Germany; so defective, however, is the internal commerce of the country, that the inhabitants of the Carpathians, where corn is grown with difficulty, are often pressed by famine, while the plains are overflowing with plenty. In 1788, and two following years, a sixth of the population of some mountain districts perished from hunger and its attendant diseases.

The most famous, if not the most profitable, object of Wine. the Hungarian husbandman's care is the making of wine; it is that also which he conducts with most skilfulness and attention. In the district of Tokay, on Mount *Mézes Malé*, i. e. the *honey ridge*, near the village of Tarezal, grow the celebrated vineyards of Tokay. These vineyards are of great antiquity, and a variety of vine, called the *Formint*, is supposed to derive its name from the *Formianum* which supplied the cellars of Horace and his contemporaries. The soil producing these fine wines is a dry, friable, brown mould, resembling decomposed basalt. The precious Tokay wine is made by mixing the essence, or expressed juice, of the ripe grapes, reduced to the consistence of jelly, with the ordinary wine of the country. The true Tokay wine is of two sorts, the *Ausbruch* and the *Masklass*, the latter having only half the proportion of mingled essence. Many varieties of Tokay wine, each distinguished by its peculiar excellence, are produced by the different kinds of wine employed in making it. The careful cultivation of the vine in Hungary dates from the middle of the XIIIth century, when King Bela IV. collected the choicest varieties of Greece and Italy. These vineyards soon acquired a great celebrity; but the method now practised of making the richest wines was first adopted in 1650. The whole produce of the Tokay district is about 240,000 *eimers*, a measure equal to nearly 15 gallons. The best wine, or *Ausbruch*, is rare even at Tokay; Warsaw and Vienna are the chief markets for the remainder.

Besides these celebrated vineyards, Hungary possesses many others, inferior, perhaps, only in fame. The wines of Menesch resemble those of Tokay; those of Eedenburg, Wersitz in the Bannat, and of the hills round Buda, are compared by the Hungarians to the most generous wines of Burgundy. Like these last, however, many of the Hungarian wines are too delicate to bear carriage; a circumstance which, added to the disadvantages under which the commerce of the Country labours, prevents their being much known abroad. The vineyards of Hungary altogether are supposed to cover a surface of 851,690 acres, and to produce, one year with another, 18,230,000 *eimers* of wine.

Tobacco is another production of great importance Tobacco. in Hungary. The cultivation of it is left free, but heavy duties on exportation, and the monopoly of Government in its sale, lessen the advantages that might be derived from it as an article of commerce; consequently, whatever remains after supplying the domestic consumption, is bought up by the Austrian officers of the revenue. Among the best tobaccos grown in Hungary,

HUN-
GARY.

HUN-
GARY.

are those of Kospalag in the County of Pest, of Szege-
din, Arad, Rahovatz, the plains of Szethmar near
Debretzin, Tolna, &c. The leaf is not prepared for
market by any fermentation or other process, it is,
therefore, mild and free from acidity, with an agreeable
aromatic odour. The internal consumption of this
article is immense. Not only all the men, but even
youths of 15 or 16 years of age, make an immoderate
use of it, and Beudant, calculating on the supposition
that one-third of the population use it at the rate of
one pound a month, estimates the whole quantity con-
sumed at 207,000 quintals. The quantity exported at
the same time does not exceed 95,000 quintals.

Cotton.

Hemp and flax are cultivated extensively in the
mountains, where they furnish the materials of industry
to the German population. An attempt to grow cotton
in Hungary was made in the year 1782 by two brothers
of the name of Nako, extensive cotton dealers in Tur-
key, but the project failed; it was afterwards revived
during the late war under peculiarly favourable circum-
stances, but so little success attended the experiment,
that it was abandoned in 1812. Many similar schemes
were encouraged during the same period by the course
of political events; one of the most remarkable of
these was the attempt to make sugar from the sap of
the maple, as is practised in North America. The
woods of Hungary abounded in maples, and great
quantities of the best species, the *Acer platanoides*, were
planted; the same difficulty, however, of crystallizing
the syrup, which opposes the manufacture of sugar from
the beet, was to be encountered here, and the attempt,
though favoured by Government, was never attended
with success. In 1812 the whole quantity of maple
sugar manufactured was only 237 cwt., that of syrup
was 915 cwt.

Maple sugar

Silk.

Another more interesting effort to increase the re-
sources of domestic industry, was the attempt made
about the same time to naturalize the silkworm in the
Southern Provinces. The manufacture of silk had been
successfully introduced into the Bannat as early as 1734,
but was afterwards relinquished during the Turkish
wars; in 1785, nevertheless, the quantity of raw silk
produced was 13,100 pounds; Government then turned
its attention to the encouragement of this branch of
industry, and, in 1801, the produce was raised to 208
cwt., in 1808 to 1430 cwt. In the years 1810, 1811,
and 1812, attempts were made to naturalize the worms
in the open air; fine weather was chosen, and the eggs,
placed in boxes, were attached to the trees in April or
May; but rains, winds, the birds, and a variety of
accidents, in every case destroyed these interesting
young colonies, or so far reduced them as to demonstrate
the loss that must have accrued from persisting in the
attempt. The breeding of the silkworm is almost
confined to the Southern frontier Provinces, where there
are above 700,000 mulberry trees, planted on the road
sides and other situations as public property. We may
also mention madder, woad, saffron, and other dye
stuffs, among the productions of Hungary, which are
capable of being made important in commerce.

Forests.

The forests of Hungary are among the finest in
Europe, but although they cover above nine millions of
acres, yet in the great plains, from the deficiency in the
means of intercourse, the scarcity of fuel is often
severely felt. Oaks, beech, and other large timber cover
the hills and mountains, from the edge of the plains to
the elevation of 4000 feet above the sea; from that to

the height of 8000 feet, the summits are covered with
pines. On the hills of Bakony, and those which border
the Drave, innumerable oak trees may be seen of 7 and
8 feet diameter, and rising from 30 to 50 feet high
without throwing out a branch. Nothing is more
remarkable than the wasteful treatment and neglect of
these fine forests, in a country too which is not uniformly
well supplied with fuel. Fine timber trees are to be
seen rotting on the ground, cut down for the sake of a
few poles. The nut-galls, collected in great quantities
in the oak woods, are used for tanning.

The cattle of Hungary are not inferior to the best of
our English breeds; they have long hair and long horns,
and are remarkable for their uniform grey colour. Im-
mense herds graze on the plains between Debretzin,
Gyula, Temeswar, and Pesth. At the close of the last
century the black cattle of Hungary were estimated at
2,400,000 head. Buffalos, originally from a warmer
climate, are completely naturalized in this country, and
are said to amount to 70,000. Their milk is rich and
light, like that of asses; their beef is indifferent, but
their great strength gives them a superiority over common
oxen in the work of the field. They are also peculiarly
adapted to marshy lands, being never more happy than
when plunged to the neck in water, feeding on rushes
and aquatic plants. They still preserve something
of their original ferocity and become unruly at the sight
of water. A white variety of buffalo was introduced
from Egypt in 1764. About 150,000 head of fat cattle
are said to be annually sent to Austria and Italy. The
cattle of Hungary are subject to a disease called Löse-
dörre, which carries them off in great numbers. It
makes its appearance almost every year, and devastates
some district.

The native Hungarian horses are small, and com-
paratively worthless; no care is taken either to feed or
train them. The *Haras Royal*, or Royal Breeding
Stud, at Mezöhegyes, in the County of Csanad, was
established in 1785, to remedy this defect. Arabian
and English stallions are kept there, and the *Haras* is
bound to furnish 1000 strong horses every year in time
of peace to the cavalry and artillery. Similar esta-
blishments have been of late years set on foot by some
of the resident nobles. Almost all the good horses of
the Country are bred or imported by Armenians.

The indigenous sheep is extremely beautiful, distin-
guished by its great size and straight spiral horns.
This species (the *Ovis strepsiceros*, Linn.) is found only
in Hungary, Crete, and some of the Cyclades. The
wool is long and coarse, but, by crossing the native
Hungarian and Turkish races, a large breed of sheep
has been procured, common in the Southern Provinces,
whose skin, adorned with a glossy fleece, forms the
pelisse or upper garment of the peasantry.

In Western Hungary, large flocks of Merinos have
been introduced, and are rapidly increasing. Notwith-
standing the coarseness of the wool of the immense flocks
which cover the great plains, the exportation of this
article is said to produce annually about five millions of
florins. The forests of oak, beech, and chestnut fatten
immense herds of swine, which, however, are not more
than sufficient to supply the consumption of the Country.
Fowls and fish are equally plentiful. Pheasants, bus-
tards, and a great variety of other winged game, fre-
quent the woods or lakes. The land turtle is also
common, particularly near Lake Balaton and on the
banks of the Theiss. The best variety (*Testudo orbicu-*

Buffalos

Horses.

Sheep.

Turtle.

HUN-
GARY.

laris) is kept in tods, and fattened for the Vienna market: the same care is bestowed on the edible frog and a species of snail, *Helix pomatia*. Bears, wolves, and wild boars are numerous in the mountain forests; preserves for the latter in the woods of the nobility supply the tables of the great. Fish of many kinds are so abundant, that some of the rivers, to use the expression of the peasantry, smell of them. Sturgeon and salmon are plentiful in the great rivers, and a large carp may be sometimes purchased for a penny. Locusts have several times made their appearance in Hungary, but have not yet become regular visitants.

Thus Hungary, with all the disadvantages of a lazy and ignorant population, of feudal restraints and burthens, and of a jealous Government, is still a land of plenty. With improved means of internal communication, the stimulus of free export and unshackled industry, she might unite the productions of the North of France with those that decorate the fields of Lombardy.

Divisions.

Hungary was formerly divided into Upper and Lower Hungary, by a line following the course of the river Theiss, and prolonged North and South in the direction of that river. The country to the Eastward of this line was called Upper, and that to the Westward Lower Hungary. This vague division is now discarded from Geographical works, though still retained by popular usage. The territorial divisions are of two kinds, the Civil and military; the latter are situated on the frontiers of the Ottoman Empire, and are organized after a peculiar system, which makes the inhabitants soldiers as well as cultivators, so as to form a strong barrier against invasion. Many Geographical writers, indeed, do not consider the Regiments, or Military frontiers, as forming at present a part of Hungary, as they do not share in the Constitution of this Kingdom, but are immediately subordinate to the Austrian administration. The Civil divisions of Hungary are four Provinces, named from their situation with respect to the Danube and the Theiss, Slavonia and Croatia. The subdivisions, which are more frequently referred to, are Counties, *Comitatus*, Lat.; *Gespanschaft*, Germ.; and *Vármegye*, Hung. These are again divided into Seats (*Stuhle*) and Districts. The Counties are 52 in number, viz.

HUN-
GARY.

Some districts, though enclosed in the Counties, are nevertheless governed by their own laws, independent of the ordinary authorities. Some of them, as the 16 Free Towns of Zips in the County of that name, the Seat, or *Stuhl* of the ten Lancers, a small privileged district, the Nobility of which furnish the corps of Lancers attending on the King's person, and the *Haiduque* towns, (*Hajdu-Városok*), which supply the militia, employed as the armed police of the Counties, are immediately under the Royal protection. The privileged districts of Greater and Lesser *Cumania* and of *Jaszigy*, in the Counties of Pesth and Heves, are dependant on the Palatine.

Hungary is unparalleled in the variety of its inhabitants. It contains a heterogeneous assemblage of nations, brought together by different motives and from different quarters of the globe. Some descended from the first inhabitants of the Country, others the offspring of invading hordes; some introduced as colonists, who might turn to account the natural productiveness of the land, while others sought here an asylum from domestic persecution. In Hungary are Tribes known by the name of Slovacs, Russnacs, Croats, Servians, Illyrians, Carniolians, Magyars, Cumans, Jaszes, Szeklers, Szotacs, Walachians, Bulgarians, Rascians, Saxons, Swabians, Bavarians, Franconians, Austrians, Greeks, Armenians, Albanians, Italians, Jews, Gypsies, &c. But although long united in public interest and governed by the same laws, these people still remain distinct in language, manners, and physiognomy. Each little community nourishes the pride of its proper origin, and intermarriages between them are rare. The amalgamation besides of these various nations is rather prevented by their local distribution, each of them in general possessing some quarter or canton, in which it is to be found tolerably free from foreign admixture.

The most numerous of these races are the Slovacs, or Slavonians, who are the principal, and in some cases, the exclusive inhabitants of the Northern Counties. They are also numerous in the Western Counties round Presburg and in those about Pesth. In liveliness, activity, and industry, they are much superior to the Magyars, or Hungarians properly so called, and from their humble mode of living are able to supplant the German labourers. They were formerly forbidden to exercise trades in towns, but in 1608 they were placed on the same footing as Germans and Magyars in respect of municipal rights. Their increase has been very great since that time, and their colonies are still rapidly extending. The Germans and Magyars, among whom they settle, soon cease to prosper, and gradually assume the Slavonian manners and language. Hence it is that in the mining towns and elsewhere we find a Slavonian population, while the names of the places recall their German origin. The Slovachians are a handsome race, and the mountain Tribes, called

HUN-
GARY.

Kopaniczars, i. e. diggers with the spade, are remarkable for their gigantic size. Their long political degradation has left a visible stain in the meanness and dishonesty of their character, which education has not yet been able to efface. The dialect spoken by the Slovachians differs a little from the Slavonian of Moravia and Bohemia. Their sermons, however, particularly among the Protestants, are preached in the *Tchéghe*, or pure Bohemian.

Croats.

The Croats, in the South-West of Hungary and in the military frontiers, are a distinct branch of the great Slavonian family. Their ancient name, *Horvaths*, *Hrovaths*, or *Chrobats*, that is, mountaineers, points out their original settlements in the Carpathians, whence they were brought by the Emperor Heraclius to defend Dalmatia from the Avars. The Croatian dialect forms the link between that of Russia and that of the Western Slavonians. The people retain their military habits, and are passionately attached to their Country. They have little civilization or industry; their houses resemble large barns, in which the cattle and the pigs find a common shelter with the family. It seems to be the policy of Austria to maintain this state of martial rudeness along the Southern frontiers.

Rascians.

The Rascians, who are numerous in the Bannat and the South-East of Hungary, appear to be a Tribe of Slavonians with the Walachian dialect. They are also warlike, but possess at the same time more civilization and industry than their Servian or Croatian neighbours.

Russniacs.

In the North-Eastern Carpathians the *Russniacs*, or Red Russians, extend to the County of Marmaros, occupying the frontier towards Eastern Galicia. This Tribe, without activity or employment, is hardly raised above the savage state. They mix but little with their Slovachian neighbours, though speaking a kindred dialect. Their marriage customs, above all, prove the rudeness of their condition. In the village of Krasnibrod is held a market of marriageable young women three times a year. Thousands of Russniacs throng to it; the girls deck their heads with wreaths of flowers, widows being distinguished by garlands of green leaves. When a man sees a female who pleases him, he drags her by force to the adjoining Monastery of Saint Basilus, and if he succeed in crossing the threshold of the church with his prey, the contract is complete. Girls are sometimes affianced at five or six years of age, and are in that case educated by their mother-in-law. A Tribe called *Szotacs*, in the County of Zemplin, though said to be a mixture of Magyars, Russniacs, and Slavonians, are yet distinguished from them all by the singularity of their customs. Horses are the only object of their care, and boys among them at six years of age are already expert equestrians.

Walachians.

The Walachians occupy the Bannat of Temeswar, with the Counties of Marmaros, Szathmar, Bihar, and Arad. They are nearly as ignorant and as miserable as the Russniacs, and like them are attached to the Greek Church, though their ideas of Religion go little further than the rigid observance of numerous fasts. They are, however, frugal and industrious; and wherever they settle, the Russniac and Servian population is sure to become extinct; so that they multiply in Eastern as the Slovaks do in Western Hungary.

The Walachians of Hungary are supposed to be the descendants of the Italian legions placed along the Danube for the defence of Pannonia. They call them-

selves *Romani*, and their language has as close an affinity to Latin as the modern Italian; but their dialect, though from the character of its source not deficient in terms suited to civilized life, and admitting an easy fertilization from the parent stock, has never been cultivated. With the Zinzars, a Tribe of the same nation lately come from Macedonia, and speaking modern Greek, they are all attached to the Greek ritual. The most remarkable trait in the character of the Walachians is their proneness to superstition. They believe in vampires, and numerous singular observances among them are founded on that belief. The Walachians are the shepherds of Hungary, and patiently relapse on the great plains to a solitary and half savage life. The entire nation indeed is disposed to the shepherd state, and in their migrations Southward they have occupied the whole ridge of Pindus. In the Western Provinces they are sometimes to be seen in small encampments on the borders of the woods, affording a picture of misery below that of the Gypsies. Yet the *Duke*, or leader, has almost always a suit of finery underneath his sheepskin, closely bedecked with fringe and buttons. In these situations they subsist as woodcutters, and by the sale of beautiful twig baskets woven by the women.

HUN-
GARY.

The German part of the Hungarian population decreases, from the want of encouragement to industry, and from the poverty with which they are threatened by the competition of the hardfaring Slovachians. In the mining towns, as we have observed, they have disappeared, after teaching their Arts and industry to another people, or have lost their national distinctions. In the Counties of Edeburg, Wieselburg, and Eisenburg are large colonies of Germans from Austria and Styria, who have introduced their agriculture, Arts, and manners. The women of an ancient German Tribe in this neighbourhood, called the *Wassercroats*, are remarkable for the pride they feel in wearing a superfluity of petticoats. Their wealth and respectability is measured by their bulk; and the lady who is so swelled up by the number of her garments as to pass with difficulty through the church door, is the envy of her neighbours.

Germans

In the free towns of Zips situated among the high mountains, are the descendants of the German colonists introduced probably from Silesia in the XIIth century. They are far superior to the other inhabitants of Hungary in industry, honesty, cleanliness, and general instruction. They are, however, superstitiously attached to all their old usages, their nationality being fostered by surrounding circumstances. There is no Country in which the beneficial influence of the sense of character is more clearly evinced. As among the idle and half savage Tribes which people Hungary, the name of a *German* is equivalent to that of a respectable man, the Germans transplanted hither uniformly display exalted sentiments. A numerous Tribe in the Counties of Szalad, Sümegh, Edeburg, and Eisenburg, are known by the name of *Vandals*: they are, however, as is evident from their language, a Slavonian people, and might with more propriety be called *Vends*.

In Zips.

A handful of Albanians occupy a few villages in Syrmia; but besides the nations already enumerated, there are several others to be found in Hungary unconfined to any particular locality. The Greeks have most of the trade in their hands, and rarely engage in agriculture. The Jews are the chief dealers at the fairs. They had formerly all the money business in

Hungarians
or Magyars.

their hands, and were agents for most of the noble domains; but in the XIIIth century an outcry was raised against them, which gave rise to a severe code of laws, forbidding them many lucrative employments. A large body of Armenians settled in the Kingdom in the latter half of the XVIIth century. Their only parish is at Neusitz, but they are widely spread abroad, being at present land stewards to the great proprietors, cattle dealers, or agricultural overseers. The GYPSIES found their way into Hungary in the year 1420, and appear not to have been deficient at first in Arts and industry. How they declined into their present vagabond state it is impossible to determine. Attempts to reclaim them were made with but little success by Maria Theresa and Joseph II. The latter ordered the young Gypsies to be dispersed among the peasants to be instructed in agriculture, but they learned little from the lessons of their unwilling tutors, hardly less savage than themselves, and quickly returned to their original idleness. They settle, however, to exercise some trades, and Gypsy hovels are to be seen in the neighbourhood of most large towns. They are particularly remarkable here for their skill in music.

We now come to the ruling nation, which, though not the most numerous, possesses all the property, and gives its name to the Kingdom. The Hungarians, or, as they are called in their own language, the *Magyars*, occupy all the flat country from the hills of Transylvania to those round Presburg. The fertile hills on the edges of the great plains are also thickly inhabited by them, and, in general, the richest lands are everywhere in their possession. Their preference of the plains, however, points out their attachment to the pastoral life. The Magyars are a handsome, well-shaped people; not so tall as the Slovachians, but square built and muscular, with a deportment expressive of energy and bodily strength. Their complexions are dark, and their features indicate an Asiatic origin. The Hungarian women, in the opinion of Lady M. W. Montague, are much handsomer than those of Austria, who are generally deemed the beauties of Germany. The Hungarians of all classes are distinguished by their frankness, gaiety, and hospitality; the inns of the Country are of the most wretched description, but the want of such accommodations is never felt by respectable strangers who understand the language sufficiently to avail themselves of private hospitality.

The dress and manners of the Hungarian peasant have possibly suffered no change for the last nine centuries. His *kalpac*, or felt bonnet, resembles that worn by the Tartars; a pair of wide pantaloons and a shirt smeared with grease constitute his ordinary dress; over this some wear a sheepskin, or the *guba*, a woollen jacket resembling it. To many, the long shirt, drawn between the legs so as to resemble trowsers, is the only garment. The *valaska*, or long-handled axe, a weapon which they use with great dexterity, completes their costume. The Hungarian peasant, when engaged in the harvest labours, sleeps in the open air in his wagon or under some hay; the shepherd always passes his night with his flock. The internal arrangements of their cottages do not belie these traits of rude pastoral habits. They are utter strangers to cleanliness and comfort. Want, however, is seldom felt by them, and their gaiety never flags. A variety of dances, and particularly the *pyhrrical saltation*, as Dr. Brown calls it, forms their favourite amusement.

To the Magyar nation we are disposed to refer the *Cumans*, or inhabitants of Great and Little Cumania, and the *Jaszcs*. Great Cumania (*Nagy Kunsag*, Hung.) is a perfectly level plain, about 20 miles square, lying between Pesth and Debreczin on the river Berettyo, and abounding in corn, water melons, wine, and turtle. The inhabitants, about 33,000 in number, are chiefly Protestants. Little Cumania, (*Kis Kunsag*), to the South of the former, between Pesth and Theresienstadt, has about double the extent with 42,000 inhabitants. This district, which, like the former, enjoys great privileges, is an immense plain little removed by culture from the state of nature. The intense heat reflected from the sandy soil makes the *mirage* as frequent here as in Egypt, when the *Deli Baba*, or *Fairy of the South*, the supposed authoress of the illusion, amuses the shepherd by the scenery she displays. The Tartar derivation of the Cumans is admitted by those who ascribe to the Magyars a different origin. According to these authorities, the Cuman Tribes first entered Hungary in 1086, were converted to Christianity in 1410, and, adopting the Magyar language, soon lost the recollection of their own idiom.

Jaszygy, (*Jasz Ország*), the Country of the *Jaszcs*, or *Jaszyges*, is situated to the North of Little Cumania, and resembles it in Physical circumstances. This people, about 42,000 in number, have no connection with the *Jazyges Metanastæ* of Roman Geography, though occupying the same Country. Their name is derived from *Jasz*, a bow, and their privileges belonged to their place in the Cuman army as the archers composing the vanguard. Hence they were styled in official Latin, *Balistarii*, corrupted by some writers into *Philistæi*. Of the *Szecklers*, another Magyar Tribe, we shall have occasion to speak under the head TRANSYLVANIA. With respect to the origin of the Magyar nation, we shall offer a few observations below.

The population of Hungary in 1809, according to Population Schwartner, was as follows:—

In Hungary, Slavonia, Croatia, not including the nobility, clergy, regiments of the line, or military frontiers.	7,555,920
The nobility.	325,894
The clergy.	15,600
The regular troops.	64,000
Military districts.	777,406
Total	8,738,820

If we suppose the population of Hungary to have increased since that time as rapidly as in the preceding 20 years, which there is every reason to believe is the case, it cannot at present fall much short of ten millions, of whom perhaps five millions are Slavonians and three millions and a half Hungarians; the rest Germans, Greeks, Walachians, &c.

The Magyar language is an object of great curiosity to the Philologist, standing as it does alone and remote from every other. The constancy with which it has maintained itself, not yielding to the superior cultivation of the Germans, or to the greater activity and numbers of the Slavonian Tribes, is also a remarkable Historical fact. It has triumphed over every effort made to suppress it. Joseph II. endeavoured to supplant it by the use of German, in which all public business was ordered to be carried on; but this offence to national feeling produced effects the reverse of those contemplated by

HUN-
GARY.The Cu-
mans.

The Jaszes.

Magyar
language.

HUNGARY.

that well-intentioned Prince, and the ardent, patriotic cultivation of the Magyar language dates from that decree. In 1806 the use of Latin was abolished, and the Magyar was made the language of the Courts and of public documents. This language bears a slight affinity in structure to the Finnish, Laplandish, and Esthonian; and elaborate industry has discovered a few words apparently of common origin. Curious similarities of structure have also been noticed between it and the Armenian. When the astronomer Hell visited Norway in the middle of the last century to observe the transit of Venus, he was accompanied by a learned Jesuit, Sajnovics, who was the first to discover the supposed resemblance between the Finnish and the Magyar tongues. The distinguishing characters of the Magyar, nevertheless, are solitary, and its roots cannot be traced with certainty to any known source. It is rich in terms, suited to the pastoral and nomadic life; every kind of herd, of cows, oxen, calves, &c. has an independent name. Words associated with agricultural matters are borrowed from the Slavonians, whom they subdued; the Latin has lent many terms connected with the rites of the Church; the German those expressing the Arts of civilized life; and from the Turkish are borrowed, among others, the names of dress. But it may serve to illustrate the little reliance that can be placed on slight resemblances of sound, to observe that a connection has also been fancifully traced between the Magyar and the Scandinavian tongues.

The language of the Hungarians is flexible and harmonious, easily adapted to every kind of composition. Among its peculiarities may be reckoned the extensive use of postfixes; almost all the modifications of nouns, verbs, pronouns, and prepositions are produced by an addition to the termination without the use of auxiliaries. Thus a monosyllabic root often becomes gradually lengthened to a word of eight or ten syllables. Another curious characteristic of the Magyar is, that it divides its vowels into two classes, masculine and feminine, and will not allow both classes to be employed in the same word. The vowel *i* has a neutral character, and, like an oriental eunuch, may be admitted anywhere. With the pronouns, when associated with nouns, verbs, or prepositions, a singular process frequently takes place. They are cut in two, and the word to which they are attached is placed between the halves, as, for example, *mienk* (our) *atyé* (father) becomes *miatyenk*. Among the numerous languages spoken in Hungary the Latin must not be forgotten. Some knowledge of it is very generally diffused: and, as its employment rests on the necessity of a common medium of discourse in the Country, a long time must elapse before it falls into disuse. To this necessity, and the protection of the Clergy, we must ascribe the use of Latin in Hungary, and not to its relation with the vernacular language of the Walachians.

Use of Latin.

Literature.

It could not be expected from the situation of Hungary, exposed to Turkish invasion, kept constantly in arms while the Ottomans were formidable in the field, and frequently suffering from internal distractions, that it should have been distinguished by its progress in Literature. The variety of tongues spoken in the Country were always a hinderance to general cultivation. The literary activity promoted in Austria by Joseph II. reached Hungary; and about the time of his death that country was overflowing with political writings. The first newspaper in the Magyar language, *A' Magyar*

Hérmondó, made its appearance in 1780; three years later the *Presspürské Nowing*, the first Slavonian journal, was published: in 1794 commenced the *Ἐφημερίς*, in modern Greek. The drama of the Magyars had its rise about the same time as the newspapers. The nobility, and even the Diet, entered ardently into schemes for the erection and regulation of Theatres. At the present moment there are several Theatres in Hungary and Transylvania, but the companies of actors are ambulatory, and not even the Capital, Pesth, can as yet boast of a permanent Theatrical establishment.

The nobility of Hungary are as highly cultivated as any in Europe, but the people as yet are in a state of gross ignorance. A patriotic zeal, however, to promote instruction pervades the Country. The principal establishments of education in Hungary are, the University of Pesth, to which is attached an Observatory; the Academies of Poszony, (Presburg,) Kassa, (Kashan,) Győr, (Raab,) Nagy Varad, (Gross Wardein,) and Zagrabia; (Agram;) the Roman Catholic Lyceums of Eger (Erlau) and Szombathely; (Stein am Anger;) the Reformed Colleges of Debreczin, Sarospatak, and Passa; the Lutheran Lyceums of Poszony, Vasmark, Soprony, (Oldenburg,) and Lötse. (Leutschen.)

Education.

In Hungary no form of Religion is particularly favoured by law, although a great majority of the people are Roman Catholics. In Hungarian Croatia and Slavonia, indeed, the Calvinists are prevented by laws, enacted in 1741 and 1791, from possessing immovable property. In 1805 the Roman Catholics, with the united Greeks and Armenians, were 4,647,800; the members of the Greek Church, 1,161,200; the Calvinists, or Reformed, as they are styled, 1,002,500; and the Lutherans, 624,800; the Jews are supposed to be about 80,000 in number. The Roman Catholics have three Archbishops, 17 Diocesan and 19 Titular Bishops. Some of these possess immense revenues; the Archbishop of Gran is the Primate, but the richest See is that of Erlau, the revenue of which is said to amount to 300,000 florins. The United Greek Church, as it is called, acknowledges the supremacy of the Pope, without, however, wholly conforming to the Romish ritual; it has three Bishops, not nearly so well paid, but possessing the same rights as those of the Roman Catholic Church.

Religion.

The Constitution of Hungary has lost but little of its original rudeness, and presents almost all the vices of the feudal system. The Nobility amount to a twenty-second part of the whole population. This numerous aristocracy is divided into the magnats and lesser Nobility; the former appearing personally in the Diet, while the latter are represented by deputies. Some of these Nobles possess immense estates, and rank among the wealthiest subjects in Europe, while others are so poor as even to engage in menial service. Yet the rights of both are the same; these are, exemption from all taxes and contributions, and from arrests until after conviction; the Noble cannot be sued by persons of inferior rank; he alone is eligible to all offices; he has a seat and voice in the County meetings; and, if not qualified himself to sit in the Diet, elects the Deputies. He has also a right of preemption when lands adjoining his own are offered for sale; and can, at all times, by offering the price paid, compel the restitution of estates alienated by his ancestors. These latter privileges, so adverse to the free circulation of property, were sought to be abolished by Joseph II.,

Constitution.

HUNGARY.

HUN-
GARY.

The King.

who also desired to make all lands equally liable to taxation. But these wise measures could not meet the sanction of an aristocratic Constitution.

The King has the chief executive power, creates Nobility, nominates the Bishops and Prelates, and enjoys all the revenues of vacant Sees and benefices. He cannot levy taxes nor impose laws without the consent of the Diet. Though he swears at his coronation to maintain the Constitution, the Royal influence has in latter times encroached considerably on the prerogatives of the Nobility. The Crown of Hungary is hereditary in the House of Hapsburg, but on the extinction of that family the connection with Austria ceases, and the choice of a Monarch reverts to the People.

Diet.

The Hungarian Diet is composed of two Chambers, or Tables, *tabulæ*; the first composed of the Roman Catholic and Greek Prelates, the Magnats, Barons, State Officers, and other Nobles; the other is formed by the Deputies of the lesser Nobility, and of the Counties, Privileged Districts, and Royal Free Towns. The Counties and Privileged Districts send two Members each.

The Palatine.

The Diet must be convened every three years at Presburg or Ofen, and the Courts of justice are closed during the session. Neither in its Constitution nor in the mode of its proceeding, does the Hungarian Diet offer any of the advantages of a National Council. It is little better than a point of union for the privileged classes, who are more opposed to the emancipation of the People than to the enlargement of the Royal prerogative. The Palatine (*Nándor Ispán*, or Court Master) presides among the Magnats. This great officer governs as Lieutenant in the King's absence, he is also the Regent during minorities, and the Constitutional mediator between the King and People in case of disputes. To these important functions he adds the immediate sovereignty of Cumania and Jaszygy, and the governorship of the County of Pesth. The Palatine is elected by the States from four candidates named by the King.

The people.

Thus the Nobility, together with the Royal free towns and privileged districts, (which together form a *tiers état*), constitute, what is styled in official Latin, the *Populus Hungaricus*, though not exceeding a twelfth of the whole population. The great Body of the people, or *Misera plebs contribuens*, as they are styled, are shut out from the benefits of the Constitution, and pay nearly all the taxes. The peasantry were perhaps originally free, but by the abuse of power, or as the consequence of rebellion, they were almost all reduced to servitude. They became serfs attached to the soil, and paying for the land they occupied by a share of its produce and a part of their labour; but the uncertainty of the rules regulating the services due to the lord was the source of continual vexations. At length, in 1764, Maria Theresa promulgated a rural code, called the *Urbarium*, to fix the services and ameliorate the condition of the peasants. Personal servitude, wherever it existed, was abolished in 1795 by a decree of Joseph II., who also extended to every class the legal capability of holding property in land; but this, with many other of that beneficent Monarch's enactments, has been subsequently revoked by the Diet. The condition of the peasant, however, is much improved; he can at present dispose by testament of some part of his property; his acquisitions are secure, and he is even qualified to fill some municipal offices.

The administration of justice, however, is also in the hands of the Nobles; laws have been made to protect the peasantry from the arbitrary power of the lords, but the Courts of the first instance are almost all held by the stewards or other officers of the Nobles, who are used to look on the peasantry as an inferior caste. There are a great number of tribunals to which appeals may be made in succession from those beneath. The snpreme Court is styled the Chamber of the Seven, *Tabula Septemvirosum*, and from it there lies no appeal. Hungary has a written civil and criminal code; custom does not constitute law.

HUN-
GARY.

Tribunals.

The organization of the military frontiers deserves a brief notice. The idea of settling an armed population on the Southern borders of the Kingdom is as old as the XVIth century; but the plan was never carried completely into execution until the dismemberment of that part of the Kingdom by the Turks had done away with the pre-existing rights of individuals. These frontiers are distributed in small fiefs on condition of military service: the usual size of these allotments is 24 or 30 acres of land per man. The divisions of the Country are denominated regiments, companies, &c.; the regent or chief being the head of the regiment when it takes the field, and every Civil office being connected with military rank. Each *Gränzhaus* exists, in some measure, as an independent community. This *Gränz*, or frontier house, is composed in general of several families related together, and is governed by a veteran past the age of bearing arms. All the goods of the *Gränzhaus* belong in common to all the members of it; whatever any of them acquires must be shared with the rest; whoever quits his house without the permission of his veteran is looked upon as a deserter. Each of these families equips and supports a soldier in the field. The military frontiers, exclusive of Transylvania, are able to raise 14 regiments of infantry and one of Hussars; each regiment containing from 2800 to 3600 men. To the Borderers may be added four companies of *Tschaikists*, a corps of Illyrians, trained for the service of the *Tschaïks*, or boats and pontoons on the Theiss and Danube. This corps, about 1200 strong, has its settlement near the union of these two rivers. *Tatul*, where the *Tschaikists* have their arsenals, appears to have been selected by the Romans as the site of a similar establishment; numerous *rostra* and fragments of nautical apparatus having been dug up in its vicinity.

The ordinary military force of Hungary consisted, in 1809, of 14 regiments of infantry, amounting to about 46,000 men, and 10 regiments of Hussars, in all 17,000 strong, which form the strength of the army. These last-mentioned troops, whose name is now introduced into every European army,* had their origin in 1458, when Matthias I. commanded his prelates and nobility to appear in his camp attended by their cavalry; every 20 houses on that occasion were obliged to equip a trooper; and thus from the Hungarian words *husz*, twenty, and *ar*, pay, arose the word *huszar*. The King can always, in case of danger, command this sudden levy of the Nobility, or *insurrectionem populi*, which is, however, a very inadequate substitute for a militia. The *Insurrectio* in 1797 amounted to 18,000 cavalry and 35,000 infantry; in 1809 it furnished

Military
frontiers.Military
force.

Hussars.

* Hussars were first introduced into the French army under the title of *Cavalerie Hongroise*, in 1692, by Louis XIII. The name appears now to be used generally for any light cavalry.

HUN-
GARY.State of
agriculture.

the same number of horse and about 21,000 foot-soldiers.

After what has been said respecting the condition of the people in Hungary, few observations will be necessary on their want of industry. Though relieved in some measure from the galling oppressions of the feudal system, they are still too much degraded to feel that ardent ambition which animates the mass of the community in better constituted societies. Agriculture is little understood by them. Large tracts of fine country are still in a wild state, notwithstanding the great efforts made by some patriotic Nobles to drain the marshes, and awaken the people to a sense of their interests. The *puszta*, erroneously translated by Dr. Bright uninhabited houses, mean literally *wastes*, and signify large tracts not permanently located, and either not cultivated at all, or cultivated in the most slovenly manner: these *puszta* form a large share of every domain.

Commerce.

In addition to the internal causes which check the industry of Hungary, must be taken into account the circumstances of its connection with Austria. That Government has, by policy or good fortune, obtained possession of all the frontiers. The Military districts are under the immediate control of the Austrian administration. The Dalmatian Provinces fell to Austria by the Treaties of 1809 and 1814. Galicia and Transylvania were earlier acquisitions. Thus, being entirely surrounded by Austrian States, Hungary cannot export, except under the conditions prescribed by the Austrian Government, which uniformly treats her as a colony, loading her productions with the heaviest duties, and debarring her as much as possible any communication with foreign States. This jealous treatment of an associated Kingdom may be considered as a sort of political blockade, which will not be raised till the Hungarian Nobility are contented to surrender a large portion of their privileges; for the Constitution of Hungary alone prevents the perfect incorporation of that Kingdom with the Austrian Empire. Notwithstanding these disadvantages, the wines, grains, cattle, wool, &c. of Hungary find their way abroad, and the annual exports, for the most part of raw produce, amount to 24½ millions of florins, or about two millions and a half sterling. Manufactured goods are imported to the amount of three-fourths of that sum. With respect to the amount of the public revenue, it is difficult to calculate it with any certainty; the chief sources of it are the Royal domains, producing, perhaps, four millions of florins; the royalties, mints, and mines, seven millions; land and other taxes seven millions; with other matters, which may swell the sum total to 20 millions of florins, or £2,100,000 sterling.

Revenue.

Origin of
the Magyars.

The origin of the Magyars is one of the most difficult questions in the ethnography of Europe. It has, within the last half century, attracted the attention of the learned, and been discussed with much research and acuteness, particularly by Hungarian writers. Nevertheless, we are disposed to agree with Count Mailath, the Historian of the Magyars, that the point is by no means settled. We shall, therefore, confine ourselves here to a succinct statement of the several hypotheses, developing each according to its intrinsic merits, or the ingenuity with which it has been supported. The oldest opinion is, that the Hungarians are derived from the Huns of Attila. All the old Chroniclers, Pray, Katona, &c., agree on this head, and appear from the zeal with which they maintain it, to imagine that the title of the Magyars

to the land they inhabit, depends on this descent. Dankovsky, a learned writer of the present day, contends that the Magyars descend from the Zavar branch of the Huns, who followed the races which overspread Pannonia; that their name *Hungar* is derived from *Hun-zavar*, and *Magyar* from *Mej-erö*, (strong-breasted;) that they were first established between the Euxine and Caspian Seas, and are mentioned by the Byzantine Historians of the VIth century.

Count Potocki (*Fragmens Historique sur la Scythie* vol. i.) maintains that the original seat of the Magyars was the neighbourhood of the river Oby, in the country at present inhabited by the Ostiaks and Woguls. This is the Country called *Magna Hungaria* by the Missionaries Carpini and Rubruquis. To the South of this was the Tribe of Magyars properly so called, the *Mazares* of Constantine Porphyrogenitus, and the *Metcheriacks* of the present day. Here, according to Potocki, was the Scythian Kingdom of *Dentumoger*. The older writers suppose the name *Moger* to be derived from *Magog*, the founder of the Kingdom, and ancestor of Attila.

We have above noticed the supposed resemblances of language which gave rise to the opinion that the Hungarians were of Finnish origin. This idea had many able advocates, but an hypothesis resting wholly on slight resemblances of sound and etymological subtlety, without the support of any Historical facts, could not long keep its ground. The Finnish theory, as well as that regarding the Huns of Attila, is now generally abandoned.

Fessler, in his History of Hungary, expresses an opinion, that the Magyars are descended from the Turkish Tribes who overspread Western Asia in the 1st century of the Christian era. A later Historian, Engel, attaches himself to the opinion advanced by Niklas Révai, (*Elaboratio Grammatica Hung.*) whose hypothesis unites those of the Finnish and Oriental origin: "In studying our history and language," says this last author, "we are led to the conclusion that the Hungarians are an originally Turkish-Tatar race, who, successively conquering the Fins, Slaves, Woguls, Wojacks, and other nations, have gradually brought about a change in their language."

A view of this question, differing considerably from those of preceding writers, and illustrated by great learning, has been taken by Fejér, the Keeper of the University Library at Pesth. He derives the Magyars from the Parthians. The Treatise in which this opinion was maintained, appeared in the *Tudományos Gyűjtemény*, or *Scientific Magazine*, 1825. Their original seat he supposes to have been the Eastern shore of the Caspian Sea, and the North-West of Caucasus, in the places at present occupied by the Turcomans and the Tatars of Derbent and Nogai. They were Parthians, and consequently related to the Irak-Adshjemi of Western Persia and the Armenians of Erivan. In this, as in every other hypothesis, however, there is no certainty in the History of the Magyars until we find them settled on the Northern and Western shores of the Black Sea, where they arrived, perhaps, at the close of the VIIIth century.

The entrance of the Magyars into Hungary is generally supposed to have taken place in the year 889. A Tribe calling themselves *Csángó Magyars* inhabited about 30 villages in Moldavia a few years ago. Fejér proves that Magyars inhabited the banks of the Wolga so late as the XVth century. King Matthias sought

HUN-
GARY.

HUN-
GARY.
—
HUN-
GARY
WATER.

by embassies to bring them to Hungary, but without effect. Remnants of the same nation were found in the Caucasus during the XVIIth century. The Missionary Schall met with a Hungarian Priest, who having been sold as a slave to the Western Tatars, found himself quite at home among them, and declined being ransomed. At the end of the XVIIIth century they were again found at the East side of Caucasus on the right bank of the Terek, having deserted the town of *Madsar* and the river *Cuma*. They were divided into seven Tribes like the Hungarians originally. They were visited by Reinegg, (*Beschreibung des Kaukasus*.) who was well acquainted with the Hungarian language.

Pallas, also, (*Nordliche Beyträge*, bd. vii.) was acquainted with other Magyar Tribes in the same Country on the banks of the Ursk and Uzdun; they were acquainted, like those before mentioned, with their Hungarian descent. That some remnant of the Magyar nation continued for a long time in Parthia, or Irak Adshjem, is concluded by Fejér, because the Arabian writers, Abulfeda and Abulgazi Khan, give the name of Magyars to the people who are called Hungarians by other early writers. The true name must have been learned by

Beckmann, in his *History of Inventions*, (ii. 105.) has noticed the origin of HUNGARY WATER, as stated by Prevost, a Physician of Padua, in his *Selectiora Remedia*. We cite the original passage, which is not a little curious, below.

Ad podagram et chiragram. Cum mihi certò constet multorum casibus vis admiranda subscripti remedii narrabo quâ fortunâ in illud inciderim. Anno 1606 vidi inter Libros Francisci Podacathari ex nobilissimâ Cypriâ familiâ, cum quo summa erat mihi familiaritas, pervetustum Breviarium maximæ apud eum venerationis, quod a S. Elisabethâ Hungariæ olim Reginâ majoribus suis datum assereret in mutua benevolentia symbolum. In hujus libri vestibulo remedium ad Podagram illius Reginæ manu inscriptum mihi oblatum fuit perlegendum; quod his formalibus verbis, quæ inde exscripsi, erat expressum. "Ego Elisabetha Hungarorum Regina, anno ætatis 72, multum infirma et podagrosa, usa sum per unum annum istâ receptâ, quam mihi dedit quidam antiquus Eremita quem numquam viderim nec ante nec post, et fui cito sanata, et viribus restituta atque omnibus apparens ultra modum pulchra, ut Rex Poloniorum me petierit in matrimonium, cum ego et ille vidui essemus. Renui tamen id agere amore Dni mei Jesu Christi, a cujus Angelo credo me accepisse istam medicinam. Recepta hæc est,

R. Aqua vitæ quater passatæ part 3.

Summitatum et Florum Rosmarini part 2.

Ponantur simul in vase bene clauso, stentque in loco calido per 50 horas, tum alembico destillantur et mane in cibo vel potu sumatur drce 1 singulis septimanis semel, et omni mane lavetur cum eâ facies et membrum ægrum. Renovat vires, acuit ingenium, mundificat medullam et nervos, visum instaurat et conservat, vitamque auget."

Hæc ex Breviario. Neque vanum esse putes hujus remedii paratu facillimi encomium. Præservavi aliquot antiquæ podagræ et frequenti obnoxios hoc remedio. (6.)

Upon this account Beckmann remarks, that Prevost has confounded St. Elizabeth, daughter of Andrew II., who never was Queen of Hungary, but died wife of a Landgrave of Thuringia in 1235, with Elizabeth, daughter of Uladislau, King of Poland, and wife of Charles

an acquaintance with the people, and it is mentioned in Cannabich's *Geography*, that the dialect of that Country is a mixture of Arabic and Magyar. To the arguments of Fejér, Count Mailath adds the curious fact, that the Parthian origin of the Hungarians was not unknown to the writers of the Xth and XIIth centuries, which he proves by numerous citations from the old popular ballads recently collected, in which the Magyars are indifferently called *Hungarians* or *Parthians*.

Matthew Bel, *Notitia Hungariæ*, 3 vols. 1735-1737; Windisch, *Erdbesch. der Ungern*, 2 vols. 1788; Schwartner, *Statistik der Ungern*, 1809; Bredecsky, *Beyträge zur Topographie des Königreichs Ungern*, 5 vols. 1804-1815; Grossinger, *Univ. Hist. Physica Hung.*, 4 vols. 1794; Brown, *Travels*, 1673; Keysler, *Travels*, 1757; Townson, *Travels in Hungary*, 1797; Hoffmannsegg, *Reise durch Ungern*, 1800; Bright, *Travels in Hungary*, 1814; Beudant, *Voyage Minéralogique en Hongrie*, 4 vols. 1822. In the first volume of this last Work is a list of the principal writers on Hungary. Mailáth, *Geschichte der Magyaren*, first vol. 1828; appended to this volume is a translation of the Treatise of Fejér above referred to.

Robert, King of Hungary, who died about 1380. It is to the latter that the name of the distilled water has been traced. Hoyer has affirmed that the receipt, written in her own hand in letters of gold, is yet preserved in the Imperial Library at Vienna, but this has been proved to be a mistake. Nevertheless there is no doubt, from the testimony of very authentic Hungarian Writers, that in her Will she bequeathed two Breviaries, one to her daughter-in-law, the other to Clara von Pukur, with a reversion, after the death of that lady, to a Monastery at Baden. It is one of these which Beckmann supposes found its way into the family of Podacatharus.

But Beckmann has searched in vain for a widowed King of Poland, who could be contemporary with this septuagenarian Helen: and joining this deficiency with the superabundance of the marvel, he gives but little credit to the story. He thinks it probable that *l'eau de la Reine de l'Hongrie* is no more than a puff of Perfumers, with whom Royal and Imperial are excellent selling epithets. The chief supply of this once fashionable water is from France, especially from Beaucaire, Montpellier, and other parts of Languedoc, in which Rosemary grows plentifully. But instead of the spirit of wine being distilled repeatedly on the Rosemary, (a troublesome and expensive process,) for the most part the vendors are content to mix alcohol with a few drops of essential oil.

A carpenter thy father known, thy self
Bred up in poverty and streights at home;
Lost in a desert here and *hunger-bit*.

Milton. Paradise Regained, book ii. l. 416.

Or if she [the she-wolfe] had been altogether savage indeed and
hunger-bitten; these roiall houses, these stately temples, these mag-
nificent theatres, these faire galleries, these goodly halls, palaces, and
council-chambers, had they not been at this day the lodges, cot-
tages and stalls of shepherds and herdsmen, serving (as slaves) some
lords of Alba and Tuscan, or els some masters of the Latine nation.

Holland. Plutarch, fol. 520.

Some having their hands burned with a candle to try their patience
or force them to relent: some *hunger-pined* and some miserably
famished and starved.

Strype. Memorials. Queen Mary, Anno 1555.

It is my husband, O how iust is heauen,
Poorely disguise, and almost *hunger-starude*.
A Pleasant Conceited Comedie, 1608, sig. I. 3.

As he makes the word the quickner, because the word is spirit and
life, he calls the same his flesh, inasmuch as the word was made
flesh; which consequently is to be *hungered* after for the sake of
life, and to be deuoured by the ear, and to be chewed by the under-
standing, and digested by faith.

Waterland, (from Tertullian.) Works, vol. vii. p. 119. *Spiritual*
Eating and Drinking, &c.

Hunger is only a warning of the vessels being in such a state of
vacuity, as to require a fresh supply of aliment.

Arbuthnot. On Aliments, ch. vi. prop. vii. sec. 24.

Clients of old were feasted; now a poor
Divided dole is dealt at th' outward door;
Which by the *hungry* rout is soon dispatch'd.
Dryden. Juvenal. Satire 2.

As to some holy house th' afflicted came
The *hunger-starv'd*, the naked and the lame;
Want and diseases fled before her name.
Id. Eleonora.

The metaphors of *hungring* and thirsting after virtue and know-
ledge, and of eating and drinking them; and the representation of
benefits of any kind, under the expressions of food and drink, have
been common in all writers sacred and profane.

Jortin. Remarks on Ecclesiastical History.

With sparing temperance at the needful time
They drain the scented spring; or, *hunger-prest*,
Along th' Atlantic rock, undreading, climb,
And of its eggs despoil the solan's nest.

Scotland.

HUNKS. "*Hunks*, a mere *hunks*, *sordidus*, *depar-*
cus. No one (Lye adds) can doubt, that it has de-
scended from the Islandic *hunskur*, *sordidus*." *Hunts*,
in *Drant*, is probably intended for the same word, if
not itself the correct manner of writing it; and if so,
it is also unquestionably the same word as *hunt*, from
hent-an, *persequi*, to pursue, to follow; and will mean,

One who pursues or *hunts* after; avariciously, miserly,
sordidly; and, thus, a miserly, sordid fellow.

As if in case
to feelde thou sholdeste fayre
With scrippe on backe, full fraighte with foode,
and strayghte, as thou cums theire,
The hungrye *hunts* must haue it all.

Drant. Horace. Satire 1. book i.

When you leave the gentleman's house, tell your master what a
covetous *hunks* that gentleman was, that you got nothing but butter-
milk or water to drink.

Swift. Directions to Servants. The Groom.

Within these two months the close *hunks* has scraped up twenty
shillings, and we'll make him spend it all before he comes home.
Tatler, No. 30.

I soon began to get the character of a saving *hunks* that had money,
and insensibly grew into esteem.

BEL. It shall be so:

Boyces wee'l go dresse our *hunt*.

Shakspeare. Cymbeline, fol. 386.

The *hunt* is up, the morne is bright and gray,
The fields are fragrant, and the woods are greene.

Id. Titus Andronicus, fol. 36.

MAR. A lusty stag!

ROB. And *hunted* ye at force?

MAR. In full cry.

JOHN. And never *hunted* change.

ROB. You had stanch hounds then.

Ben Jonson. The Sad Shepherd, sc. ii.

When Phœbus lifts his head out of the winter's wave,
No sooner doth the earth her flowery bosom brave,
At such time as the year brings on the pleasant spring,
But *hunts-up* to the morn the feath'ed sylvans sing.

Drayton. Poly-olbion, song 13.

Eftsoone there stepped forth

A goodly ladie clad in *hunter's* weed,
That seem'd to be a woman of great worth,
And by her stately portance borne of heavenly birth.

Spenser. Faerie Queene, book ii. can. 3.

Hunting (and men, not beasts shall be his game)
With warr and hostile snare such as refuse
Subjection to his empire tyrannous:
A mightie *hunter* thence he shall be styl'd
Before the Lord, as in despite of Heav'n,
Or from Heav'n claiming second sovranie.

Milton. Paradise Lost, book xii. l. 30.

He pray'd, and heauen's king heard,
And instantly cast from his fist, ayres all commanding bird;
The blacke wing'd *hunteresse*, perfectest of all fowles, which Gods call
Percnos; the eagle.

Chapman. Homer. Iliad, book xxiv. fol. 332.

HIL. You meane to make a hoiden, or a hare
O' me, t' *hunt-counter* thus, and make these doubles:
And you meane no such thing, as you send about?

Ben Jonson. Tale of a Tub, act ii. sc. 6.

If thou tak'st leaue, thou wer't better be hang'd: you *hunt-counter*,
hence: auaunt.

Shakspeare. Henry IV. Second Part, fol. 77.

What neede wee know any thing, that are nobly borne, more then
a horse-race, or a *hunting-match*, our day to breake with citizens,
and such innate mysteries.

Ben Jonson. Discoveries, fol. 130.

I WOOD. That's a firker I' faith boy; there's a wench will ride
her haunches as hard after a kennel of hounds, as a *hunting-saddle*.

Beaumont and Fletcher. Philaster, act iv.

When a soft eunuch weds, and Mevia strikes
A Tuscan boar, nor with bare breasts dislikes
To shake a *hunting-spear*.

Holyday. Juvenal. Satire 1.

That made him rave, like to a lyon wood,
Which being wounded of the *hunterman's* hand
Cannot come neare him in the covert wood.

Spenser. Faerie Queene, book v. can. 8.

At court your fellows every day
Give th' art of rhyming, *huntmanship*, or play,
For them, which were their own before.

Donne. Love's Exchange.

The hounds at nearer distance hoarsely bay'd;
The *hunter* close pursu'd the visionary maid,
She rent the heaven with loud laments, imploring aid.

Dryden. Theodore and Honoria.

HUNT.

HUNT.
—
HUNTING

By her example warn'd, the rest beware;
More easy, less imperious, were the fair;
And that one *hunting*, which the Devil design'd
For one fair female, lost him half the kind.

Id. Ib.

As when o'er Erymanth Diana roves,
Or wide Taygetus' resounding groves:
A sylvan train the *huntress* queen surrounds,
Her rattling quiver from her shoulder sounds.

Pope. Homer. *Odyssey*, book vi.

In the month of August, being Charles's anniversary, it happened that Lord Berkshire had made a general *hunting-match*, to which were invited all the adjacent gentlemen.

Dryden. *Prose Works*, vol. i. p. 409. *Letter from Lady Elizabeth*.

If, whilst a boy, Jack ran from school,
Fond of his *hunting-horn* and pole;
Though gout and age his speed detain
Old John halloo his hounds again.

Prior. *Alma*, can. 2.

His [Sir Roger de Coverley's] *hunting-horses* were the finest and best managed in all these parts.

Spectator, No. 116.

Hunting and fishing, the most important employments of mankind in the rude state of society, become, in its advanced state, their most agreeable amusements, and they pursue for pleasure what they once followed from necessity.

Smith. *Wealth of Nations*, book i. ch. x.

In every forming feature might be seen
Some bright resemblance of the Cyprian queen:
Nor was it hard the *hunter-youth* to trace,
In all her early passion of the chase.

Philips. *The Fable of Thule*.

On the highest part of the mountain is an old fortress, and near it a house built by one of the Grand-Dukes for a *hunting-seat*, but now converted into an inn.

Gray. *Letter to his Mother*, (from Rome.)

Origin.

The first written authority for precepts in HUNTING, as well as for those which we have given a few pages back for HORSEMANSHIP, will be found in the Works of Xenophon, the bravest Captain, the wisest Counsellor, the most finished writer, and the most accomplished gentleman of his time. Hunting, in some sense, is probably coeval with the expulsion of our first Parents from Paradise; for even those who deny that the use of animal food was known to the Antediluvian race, cannot but admit that the great and general convulsion in Nature which accompanied the Fall, must immediately have exposed Man to the hostility of beasts of prey, then first thirsting for blood; and therefore must have rendered the destruction of them necessary for self-preservation.

Cyngeticus
of Xeno-
phon.

Xenophon, in his ΚΥΝΗΓΗΤΙΚΟΣ, commences with Apollo and Diana, through whose aid the Centaur Chiron, on account of his love of justice, was rewarded with instructions in the Science of the Chase. Chiron, in turn, taught numerous and very eminent pupils. It is but right that we should enumerate their names, which, for the most part, are too well known to need the ample commentary which Xenophon has bestowed upon them: Cephalus, Æsculapius, Melanion, Nestor, Amphiaraus, Peleus, Telamon, Meleager, Theseus, Hippolytus, Palamedes, Ulysses, Menestheus, Diomedes, Castor, Pollux, Machaon, Podalirius, Antilochus, Æneas, and Achilles. If any one should express surprise that Chiron should have been able to teach all these worthies, who, no doubt, extend over a broad space of the History of the World, and occupy rather distinct portions of its Chronology, he may be answered, that the life of Chiron was coetaneous with that of every one of them; for that Jupiter and Chiron were brothers, and the Centaur did not die till Achilles had completed his education.

Hunting is first urged upon the Grecian youth as a school for war. Such as are conscious of abilities for its pursuit should dedicate themselves to it from childhood, and all should bring to it their best endeavours, and do as much as they can. In many of the precepts which follow, it would be a waste of time to enter into details; for we are by no means sure that we ourselves should fully understand the original, or be able to find exact equivalents in our own language so as to make it intelligible to others. Thus we pass over the directions for making nets in the 2nd Chapter, and prefer a general reference to it to an attempt at particular explanation, under which probably we should fail. Hounds are of two classes, Castorian and Foxite, Breeds of Hounds.

καστόρια καὶ ἀλωπεκίδες; the first named from the Hero who encouraged the breed; the second, which is greatly inferior, from the animals by which it is crossed. The different modes of scent and tracking in each kind, their peculiar defects and excellences, are next described at some length; and in the 5th Chapter we are introduced to Hare Hunting. Hares, we are told, in winter, wander furthest from their haunts, and their scent lies ill on a frosty morning; so also during very wet weather. In Spring it lies better, but in Autumn best of all, and it is stronger on their forms (τὰ εὐναία) than on their footing. Their forms are almost infinite; they lie any where, even on the water if they find any thing swimming on it which can support them. The picture of the Hare's attitude while sitting is so exact to nature, that we cannot forbear citing the very words of the original, in proof of the keenness of eye and facility of description possessed by the Greek writer. Κατακλίνεται δὲ ὑποθεῖς τὰ ὑποκώλια ὑπὸ τὰς λαγόνας, τὰ δὲ πρόσθεν σκέλη τὰ πλείστα συνθεῖς καὶ ἐκτείνας, ἐπ' ἄκρας δὲ τῆς πόδας τὴν γένυν καταθεῖς, τὰ δὲ ὦτα ἐπιτετάσας ἐπὶ τὰς ὁμοπλάτας εἶτα δὲ ὑποστέγει τὰ ὕγρά. The Hare sleeps with her eyes open, and, while sleeping, frequently moves her nostrils; and she is so prolific, that in the progress of superfetation three processes are at work at once. The scent of the leveret is stronger than that of the adult Hare; but, as we rejoice to learn, true sportsmen always let go those exceedingly young, in honour of Diana, τὰ μὲν ἐν λίαν νεογνὰ οἱ φιλοκυνηγέται ἀφιᾶσι τῇ Θεῷ.

Strange to say, the fair capture of a Hare by the Hounds in chase seems to have been a most uncommon occurrence. Xenophon assures us, that if they were ever run down it was solely by chance; and the Hunters placed their chief dependence upon nets, or on the terror of the little animal. The tail being short is ill adapted for steerage of the body, consequently the Hare balances herself by her ears, and relying upon them, turns sharply from her pursuers upon whichever side she is attacked. Xenophon was a true sportsman at heart; he earnestly reprobates all unnecessary damage of the property over which the game is hunted, as contrary to all fair laws of sporting; and adds the following most glowing summary of the chase: οὕτω δὲ ἐπὶ χαρὶ ἐστὶ τὸ θηρίον, ὥστε εἰς ὅστις ἐκ αὐτῶν ἰδὼν ἰχνεύμενον, εὕρισκόμενον, μεταθεόμενον, ἀλίσκόμενον, ἐπιλάθοιτ' αὐτὸς ἐν ῥῆγῃ.

Hares can
seldom be
run down.

Hounds should never be taken out if they refuse their food, it is a sure sign of ill condition; nor again in a high wind, for the scent will not lie; above all, they should be prevented from drawing on Foxes; nothing so much spoils their noses. The dress of the Netter should be as light as possible, that of the Huntsman

Netting.

HUNTING not less so. We know not how to render the word ἡμελημένην, careless, (another quality of it,) so as to meet the exact sense which Xenophon intends; perhaps he means loose. The Huntsman should be booted, and should carry a pole: the Netter should follow him, and both should guard strict silence for fear of moving the Hare from her form. The Hounds being disposed apart in slips, the Netter should set his toils, and the Huntsman wait, in order to let loose his Hounds to drive the game into them. Having vowed the firstfruits of his sport to Apollo and Diana, he should then slip his best Hound, if it be winter, at the very moment of sunrise; if summer, before dawn; at other seasons intermediately. Other Hounds should be successively slipped, but not urged too forward; the busy motion of their bodies will betoken their approach to the game. But Xenophon here must again speak for himself; nothing can be more vivid than his language: ἐπειδὴν δὲ περὶ τὸν λαγὼ ὦσι, δῆλον ποιήσῃσι τῷ κυνηγέτῃ σὺν ταῖς θραῖς τὰ σώματα ὅλα συνεπικραδαίνειν, πολεμικῶς ἐπιφερόμεναι, φιλονεικῶς παραθέσθαι, συντρεχέσθαι φιλοπόνως, συνιστάμεναι ταχὺν, διῡστάμεναι, πάλιν ἐπιφερόμεναι· τελευτῶσαι δὲ ἀφίξονται πρὸς τὴν εὐνὴν τῆ λαγῷ, καὶ ἐπιδραμῶνται ἐπ' αὐτόν.

As soon as the Hare jumps up the Huntsman is to cheer his Hounds, ἰὼ κύνες, ἰὼ κακὰς, σαφῶς γε ὦ κύνες, καλῶς γε ὦ κύνες, and to take especial care not to head the game. None but a bungler ever does this. The Huntsman now (as we understand the passage) calls to the Netter, "At her, boy; at her;" αὐτῷ παῖς, αὐτῷ παῖς, παῖ δὴ, παῖ δὴ; and the Netter is to answer whether the Hare be caught or not. If she be not so, and the Hounds get a second time on the scent, the cry is to be εὐγε, εὐγε, ὦ κύνες, ἔπεσθε ὦ κύνες: and if they are too quick, so that the Huntsman loses sight of them, he is to put a very natural question to the first person whom he may chance to meet, ἦ κατεῖδες ὡὲ τὰς κύνας; When he overtakes them he is to call each Hound by name shrilly, gravely, softly, and loudly, to encourage them if they are still on the scent, εὐ κύνες, εὐ ὦ κύνες, or to recall them if they have overshoot it, ἔ πάλιν (τῷ μπαλιν;) ἔ πάλιν ὦ κύνες, "Back, Dogs, back!" In the close of the day, when the Hare is tired, every bush should be carefully beaten, and she may easily be captured.

Names of
Hounds.

The 7th Chapter treats of breeding, which should be so contrived that litters are whelped in Spring. The reader may not be displeased with a Catalogue of a Classical kennel; in which it is recommended that the names be short and easy of intonation. Ψυχῇ, Θυμὸς, Πόρπαξ, Στύραξ, Λόγχι, Λόχος, Φρουρά, Φύλαξ, Τάξις, Ξίφων, Φόνεξ, Φλέγων, Αλκή, Τεύχων, Υλὲς, Μήδης, Πόρθων, Σπέρχων, Οργή, Βρέμων, Ὑβρις, Θάλλων, Ρώμη, Ἀνθεὺς, Ηβη, Γηθεὺς, Χαρά, Λεύσων, Ἀνγὼ, Πολὺς, Βία, Στίχων, Σπουδῇ, Βρύας, Οἰνὰς, Στερρόδος, Κρανγῇ, Καίνων, Τύρβας, Σθένων, Αἰθήρ, Ακτὺς, Αἰχμή, Νόης, Γνώμη, Στίβων, Ὀρμή. Ovid, in his story of Actæon, (*Metam.* iii. 206.) has afforded a Latin parallel to the above Catalogue.

Training of
puppies.

A bitch puppy's exercise may commence at eight months old, a dog's not till ten. They are not to be brought to a form at first, but should follow older Hounds on a footing, still held back by a long leash in the Huntsman's hand. When the Hare is roused, the puppies should not be immediately slipped, nor indeed till the Hare is out of sight; lest, if they be of good courage, in their eagerness they should outrun their

strength, and perhaps burst themselves. (ῥήγνυνται.) HUNTING If the Hare be taken, the young Hounds should be carefully rewarded.

The 9th Chapter treats of Stag Hunting, for which Indian Dogs, as larger, swifter, stronger, and more high-couraged than others, are preferred. If the Hunter is in pursuit of a Fawn he must watch the spot to which the Doe leads her young early in the morning, and bringing his Hounds up, perhaps he may take the Fawn by hand. If not so, it may be run down by the Hounds, and the Doe most probably may be speared. Xenophon then describes a snare, (ποδοστράβη,) intended to attach itself to a Stag's foot. It would not be a very easy task to represent this invention to our English readers, nor indeed are we particularly anxious so to do. It belongs to a class of instruments, the use of which all modern Sportsmen unite in condemning as manifestly unfair, unless when employed against Poachers and other vermin.

We proceed, therefore, to the Wild Boar, in the next Chapter; (10;) against which, as might be expected, far more formidable preparations are addressed than are considered necessary either for the Hare or the Stag. The Hounds should be Indian, Cretan, or Locrian; and the Hunter should provide himself with a goodly stock of nets, javelins, spears, and springes. The nets should be more than usually strong; the heads of the javelins broad, and sharp as a razor; the shafts of tough wood. The spears should have an iron head five palms in length, and strongly guarded by cross-bars, like a halberd, and the chase should never be undertaken unless by a large company. Spartan Hounds are used for tracking; they give tongue on finding the Boar's couch (εὐνή;) but, as he rarely rises, the Hounds should be recalled as soon as they have found, and the toils should be properly set. The Hounds are then cheered on again to rouse him, but at sufficient intervals one from another, to allow him, if possible, a free passage between them. As they approach the couch, if he be not roused before, they will be sure to spring at him, and woe to those whom he catches on his tusks! If he be driven into the nets, Dogs and Huntsmen are to follow in full cry, pressing on his rear, and hurling stones and spears from behind till he is sufficiently entangled. Then, but not till then, some one of the most skill and best courage, ἐμπειρότατος καὶ ἐγκρατέστατος, may venture to attack this formidable animal in front with his Boar-spear. This is an operation requiring peculiar dexterity; the left hand is put forward to guide the spear, the right, as more powerful, presses and inflicts the stroke. The Huntsman should present his left side to the animal, and carefully watch his eye, and the motions of his head. If, at the moment of the plunge, the Boar, by shifting his head, should avoid the stroke, and knock the spear out of his hand, the danger is very great. The Huntsman should immediately fall flat on his face, and cling to the ground. The Boar, meanwhile, being unable to raise him with his tusks, will trample on him; and the only hope of safety left is, that some brother sportsman may divert the attention of the furious beast by a fresh attack of the spear; which, however, he must not venture to cast, lest he wound his fallen comrade. At the moment in which the Boar turns upon his new assailant, the first must jump up nimbly, not forgetting his spear. If he succeeds in his next plunge, the Boar, when wounded, will continue rushing on the spear till he is checked by the cross-bars; and lucky is it if these

HUNTING succeed in stopping him; for he is so combustible, that hairs roll up and shrivel when laid upon the tusks of a recently killed Boar; and whenever he is highly irritated, they are positively kindled into flame; (*διατρυποῖ*) otherwise we should not see the coats of those dogs burned which he has slightly brushed with a glancing stroke. It should not be forgotten, that it is only in the attack of a Boar that falling on the face is recommended. If this method were attempted with a wild Sow, it would not be a protection from her teeth, and she would probably bite and trample the Sportsman to death.

Other wild
beasts.

In this dangerous chase, as Xenophon informs us, many Dogs and even Hunters perish. Nevertheless, in the following Chapter (11.) he descants upon still more ferocious animals; Lions, Pards, Lynxes, Panthers, and Bears. Most of these are hunted by stratagem; sometimes they are stupified by aconite scattered over their feeding places, sometimes they are entrapped in pits, and, more rarely, if they come down from their mountain lairs by night into the plain country, they are openly attacked by armed horsemen.

Conclusion.

The two remaining Chapters are occupied with general eulogies of Hunting, which, we are assured, not only affords pleasure, but increases health, strengthens the sight and hearing, and protracts the approach of old age. Moreover, it is the best preparatory discipline for military service. Xenophon proceeds, in a high-toned moral strain, to prove that activity is the duty of a good citizen; and that the interests of his Country, not less than the will of the Gods, demand from each man all the exertion of which he is capable. "And not only men," he concludes with somewhat of *naïveté*, "addicting themselves to Hunting have attained infinite praise, but even women also, by the good grace of Diana, as Atalanta, Procris, and perhaps others."

Hunting is next treated of in verse. From a distich in the *Pontic Elegies* (iv. 16. 33.) we learn, that Ovid was acquainted with the *Cynegeticon* of Gratius Faliscus; and this is the only direct mention of that Poet or his Works which has descended to us. He is, however, very generally assigned to the Augustan Age. Wernsdorf, in the first volume of his *Poetæ Latini minores*, has exhausted conjecture relative to his birth, fortune, education, and chronology; but our business in this place is solely with his knowledge of Hunting. In the outset he gives very particular instructions for the fashion and dimension of nets; 40 paces is the length, and 10 meshes (*nodî*) the height, which he thinks sufficient. After enlarging on the best materials, he urges the necessity of a careful avoidance of damp whenever a net is to be used. Thus, after a shower, it should diligently be spread out to a drying breeze, or be sufficiently smoked. In the construction of the *formido* (*linea*) he recommends not too plentiful a use of vulture feathers or swan's down; the stench of the one and the brightness of the other startles the game, and they act best when placed alternately with each other. He then speaks of a wooden trap armed with spikes, (*dentata et iligno robore clausa pedica*), very similar to the *ποδοστράβη* of Xenophon; and he chuckles not a little in the notion, that, through this machine, game might often be bagged by some lucky sportsman who had not been at the trouble of setting it. The invention of these most poaching instruments, and of other hunting gear, is assigned to one Dercylos, an Arcadian, who, in consequence of his discoveries, is stated by the Poet

to be either really divine, or to approach very near to **HUNTING** divinity.

*Deus ille, an proxima Divos
Mens fuit.*

Different kinds of Hunting Spears are then noticed, and directions are given for seasoning the wood of which they are to be made, and for constructing them. Dogs are the next division of the subject, and their various species and qualities are described at considerable length. The Hyrcanian breed, we are assured, however distinguished for natural ferocity, is not content with simple *dogship*. It frequents the woods in order to engender with Tigers. A similar cross has been attributed to the neighbouring Indian Dogs by Aristotle (*De Animal.* viii. 33.) and by Pliny. (viii. 40.) After all, however, the prize of canine excellence is assigned to British Dogs; and from a statement that the only quality in which these animals are deficient is beauty, we imagine it is the Bull Dog of which the Poet is speaking.

Spears.

Dogs.

Excellence
of the British
breed.

*Quid freta si Morinûm dubio refluentia ponto
Veneris, atque ipsos libeat penetrare Britannos?
O quanta est merces, et quantum impendia supra!
Si non ad speciem mentiturosque decores
Protinus, (hæc una est catulis jactura Britannis,)
At magnum cum venit opus, promendaque virtus,
Et vocat extremo præceps discrimine Mavors,
Non tunc egregios tantum admirere Molossos.* (174.)

Strabo, in like manner, has mentioned excellent Dogs, *κύνες εὐφρεῖς πρὸς κυνηγεσίαν*, (iv.) among the productions of Britain. Of the Dog above noticed, an engraving may be found in the *Tract de Naturâ Canum*, of Andrew Cirino. It is there represented as a most ferocious animal, with a long, curled, and bushy tail, and a head somewhat like that of a Shark.

The Huntsman is specially warned to reward his Hounds after the chase, if he looks for future benefit from their noses. Ample instructions for breeding are then given, and a Hunting dress is described; enough of which still remains to attach curiosity to the passage, though unfortunately the words printed below in Roman letters are deficient in the MSS. and have been supplied by the modern editors.

Hunting
dress.

*tegat imas fascia suras;
Sit famulis vitulina tuis, aut tergore fulvo
Mantica, curta chlamys, canâque e mele galeri;
Ima Toletano præcingant ilia cultro:
Terribilemque manu vibrata falarica dextrâ
Det sonitum, et curvâ rumpant non pervia falce.* (338.)

The diseases of the kennel and their proper medical treatment form the succeeding heads; and the Poem (of which it is supposed but little is wanting) concludes with a brief notice of Horses. From their succinctness, not much practical information can be derived from the precepts of Gratius, but his Work is deficient neither in elegance nor in spirit, and though not without obscurities and harshnesses, which teach us the inestimable value of the didactic powers of Virgil, it may be accepted as a favourable specimen of the manner of treating a subject assuredly most unfavourable to the Muses.

In our brief notice of COURSING we have already made some mention of the *KYNHGHHTIKOS* of Arrian, a Tract on Hunting, next in chronological order, and so named by the writer, who called himself Xenophon the Younger, in imitation of his distinguished predecessor. In the outset Arrian professes to supply such deficiencies

Cynegeticus
of Arrian.

Invented by
Dercylos.

HUNTING as occur in Xenophon's Work, from his unacquaintance with Gallic Dogs and Scythian and Libyan Horses, just as Xenophon himself, in his *Treatise on Horsemanship*, made like additions to the similar Work of Simon, more out of respect to than of rivalry with his acknowledged master. To the Athenian's confined knowledge of Dogs, Arrian attributes the statement, at which we have above expressed our surprise, namely, that Hares are never fairly run down by them. Such, he says, may be the case with a Carian or a Cretan kennel, but he who is well supplied with a Gallic breed does not require the assistance of nets. In describing the signs of a good Hound, he particularly insists on length as a mark of blood and swiftness. The eyes, also, if bright and large, betoken excellence, τὰ δὲ ὄμματα ἔστω μεγάλα, μετέωρα, καθάρᾳ, λαμπρὰ, εκπλήττοντα τὸν θεώμενον. καὶ κρατίστα μὲν τὰ πυρῶπὰ καὶ ὑπεραστράπτοντα, οἷα παρδάλεων, ἢ λεόντων, ἢ λυγρῶν. This remark leads to an elaborate account of a Dog possessed by the writer himself, which evinces so kindly and affectionate a disposition, that we must be permitted to afford room for an abstract of it. "I myself," says Arrian, "have bred a Dog whose eyes are as blue as blueness itself. He was swift, indefatigable, high-couraged, and sound-footed; so that I have known him in his best days quite enough for four Hares singly. His temper is most gentle and attaching; (while I write he is yet alive;) nor was I ever master of any Dog who showed such fondness for myself and my brother sportsman Megillus, from one of whom, while not absolutely in the chase, he never will sunder himself. When I am at home he stays in doors with me, in my walks he is my companion, during my exercises in the Gymnasium he sits by me, and when I return thence he runs before me, looking back from time to time to watch whether I turn aside, and having ascertained that I am still with him he shows signs of pleasure and proceeds. If I happen to be employed on public business, he treats Megillus in like manner during my absence. If either of us is unwell, he never quits our side; and whenever he has missed us, for however short a time, he jumps upon us repeatedly in salutation, and plainly welcomes our return by the gentleness of his whine. At our meals, touching us first with one paw then with the other, he seems to remind us that he too must have his share. Then for his music, I never met with a Dog so musical. He almost asks for every thing he wants. While he was yet a puppy he once smarted under the whip for some fault, and now, if he does but hear the word whip mentioned, he creeps up to the speaker, and humbly begs and prays him, mumbling and almost kissing him, jumping and hanging on his neck till he succeeds in soothing his anger. I cannot be satisfied," concludes this kind-hearted sportsman, "without handing down to posterity, that Xenophon the Athenian had a Dog of the name of *Horme*, than whom none ever was swifter, wiser, or holier." (ἱεροτάτη.) Happy the master who possessed such an animal, happier still the animal whose services have been immortalized by such a master. Like *Maida* of our own days, his memory must last while Letters endure.

Management of a kennel.

Arrian is very precise in his directions concerning the management of Hounds; but upon this point we cannot pause. Foul feeding, he says, is a mark of curriism. Much rubbing is of good effect upon the sleekness of their coats, and these will look finer and smell sweeter if Dogs sleep with men rather than together. It is better

HUNTING that they should be chained up than allowed to range abroad, but every four days, at least, they should have exercise. In winter they should be fed once a day towards evening; in summer they should be allowed bread, and a lump of fat or suet* in brine (στέαρ ταριχευόμενον) is very good for them; but nothing during the great heats is better than to thrust an egg down their throats, so that they may swallow it at one gulp; this gives them nourishment, strengthens their wind, and quenches their thirst all in one.

Spring and Autumn are the best Hunting seasons; Hare Hunting. for Hounds can but ill endure the heats of Summer, and in frosts the ground is too hard for their feet. After describing the Gallic mode of COURSING, Arrian enlarges upon the good qualities of Hares. Those are the best runners which lie in the open country; and all true sportsmen are so delighted with their game, that if when hardly pushed they betake themselves to some bush or covert, they will call off the Hounds. "Often and again," says Arrian, "have I rode up and taken the living Hare in my arms, and after coupling the Hounds let her go again; or if I have been too late to save her, I have flogged the Hounds for not giving quarter to so deserving an enemy. In this single point do I differ from Xenophon, who considers the death the greatest of human pleasures. To me it is rather an unpleasant sight. But Xenophon may be forgiven, who knew nothing of the fleetness of Hounds."

Hounds like to be called by name, to be patted when they behave well, and to have their ears gently pulled and smoothed, and to be noticed with fondling expressions, εὖγε ὦ Κιρρᾶ, εὖγε ὦ βόοννα, καλῶς γε ὦ Ὀρμή. The instructions for beating the field, which follow, are very similar to the modern style of Coursing, and conclude with a strong adjuration, founded upon that which we have already given from Xenophon, not to destroy Leverets when too young.

Hare Hunting is chiefly practised on foot, Stag Hunting. Hunting on horseback. The latter animal when run down may be either speared or caught alive in a noose. Light and slender Horses are best for this chase. In Africa the Libyans have some Horses so fleet that they will run down wild Asses; but this appears to be done by stationing relays of Horsemen at different intervals; and such fair running is alone to be considered real sporting; as for nets, gins, traps, and springes, they are no better than poaching. There is as wide a difference between a good run and stealing upon an animal, as there is between the thievish acts of a pirate and the glorious victories of Artemisium, Salamis, and Psytalia. A good run.

The directions for entering a Hound are very similar to those which we have given from Xenophon. Respect for the dead is very diligently to be inculcated in puppies. Every sportsman, more or less, has suffered from the avidity of his Hounds; but Arrian says, that he has known many a Hound choke himself by gorging a Hare before he has recovered his breath. Ware dead.

Upon the instructions for breeding we need not dwell. A bitch is considered fleetier than a Dog, but a Dog possesses far the most bottom, and is worth more, because he can run at all seasons. Good Dogs are much rarer than good Bitches; a Dog will remain in Estimate of sexes.

* Unless στέαρ is to be rendered here, as it is in Dioscorides, (ii. 202. and v. 99.) a paste of flour and water, very excellent provender for Dogs, but not improved by pickling.

HUNTING his prime till ten years old, a Bitch for only half that period. So that a good Dog, of the two, is on many accounts far preferable. This is a blessing which no man can expect without the favour of Diana; a reflection which brings Arrian, like his Athenian prototype, to a conclusion, which, though inferior in eloquence, manifests scarcely less piety.

Conclusion.

Cynnetica
of Oppian.

In Didactic Poetry, for the most part, with the single splendid exception of the *Georgics*, the necessity of teaching chills Imagination, and the desire to be imaginative detracts from the soundness of Precept. Oppian, however, of whom we are now about to give some account, has gone very far to escape this imputation. He has constructed a Poem of great length, abounding with more than ordinary beauties, and yet deeply imbued with Science on the matters which he professes to teach. Among his contemporaries he appears to have been duly estimated, but, as far as our observation extends, in our own times we are ungrateful to him: and his Works are by no means generally known, and, therefore, are not estimated as they deserve. The little that can be told of his life must be sought in the copious apparatus, accompanied with which Ritterhusius has edited him. He was born in Cilicia, and flourished under the mild sway of the Antonines. Four Books of his *KYNHGETIKA* have descended to us. In the 1st he delivers some general Precepts respecting the habits and training of Huntsmen; as that they should by no means be too corpulent, (81.) lest they be unable to take the leaps which are often necessary; nor too thin, lest they should give way under fatigue. Their arms are to be two javelins and a crooked dirk; their tunic is to come down to the knees, and be fastened by thongs; a cloak is to hang from their neck upon their shoulders behind; such as track the game should go barefooted, lest the noise of their shoes rouse it prematurely, and for a like reason they should avoid any loose clothing which may flutter in the wind. Their Hunting weapons (*ὄπλα*) consist of nets, forked sticks, ropes, wicker-work, a three-pronged spear, a broad-headed javelin, a hare-pole, (*ἀρπάλαγον*), bludgeons, arrows, swords, a three-pronged hare-fork, (*λαγωφρόνον τρίαιναν*), hooks, leaded clubs, a hempen *formido*, (*μήρινθον*), a foot-trap, (*ποδάγρην*), nooses, stakes, and drag-nets. (149.)

Manner,
dress, and
tools of
Hunter.

The praise of Horses occupies 200 lines, that of Dogs, with which the 1st Book concludes, nearly as many. Oppian, like his predecessors, condemns white and black as colours which promise little power of endurance either of heat or cold. His commentator informs us, on the contrary, that white Dogs were esteemed the best in his time. Those who would make their whelps preeminently swift should bring them up on the milk of does, lionesses, she-goats, or wolves. Their names cannot be too short. In lines, which are scarcely worth citation, he highly eulogizes the Dogs of Britain; but we much doubt from the description whether they are of the same breed as those admired by Grattus. Oppian names them *Agassæi*,* and adds, that they are small as little pet house-dogs, crooked, lank, rough, dull-eyed, and sharp-clawed, with teeth thick set and venomous, and the best of all noses. The Hare has but little chance with them, and her distress in the chase, as she finds her pursuers gain upon her, is described in a simile of

* The *Agassæus* is described by Caius, *de Canibus Britannicis*, as the Gaze-hound, chiefly known in the Northern parts of our Island.

a singular cast, but not without much beauty and pathos, both of thought and language. The images are drawn from the throes of a woman in her first travail, *κέρη πρωτοτόκος*. (493.)

The II^d Book opens with a brief catalogue of distinguished Sportsmen; the Centaurs, Perseus, Castor and Pollux, Meleager, Hippolytus, Atalanta, and Orion; and their several inventions are assigned to each of them. Oppian then passes on to a description of the habits of wild animals, beginning with such as are horned. Bulls, Buffalos, whose tongues are so rough, that whenever they lick their hides they draw blood, (175.) various kinds of Deer, Goats, the Oryx, the Elephant, whose tusks, as they are commonly called, he assures us, in point of fact, are no other than horns, for that like all other horns they grow out of the head, and turn upwards, moreover that they take a polish, and may be worked by tools into numberless uses, whereas all teeth chip and split under such attempts; (493.) and, lastly, the Rhinoceros. After discussing these huger beasts, he considers the "small gear" of Panthers (strange to say) and Weasels as beneath his notice. So, too, he hastens over Squirrels, Hedgehogs, Moles, and Monkeys, for which last race he expresses marked aversion.

τίς γὰρ ἂν ἔστυγιόν τοῖον γένος, κίσχρον ἰδίσθαι,
ἀβλήχρον, στυγιόν, δυσδρόκιστον, ἀιολόβυλον; (606.)

Although it is not directly bearing upon the sport of Hunting, we cannot refrain from citing a most beautiful apostrophe to the power of Love, which finds place in this Book. Oppian has so few readers, that to most who open our pages the lines probably will have the attraction of novelty, and we are much mistaken if they will not bear the nicest comparison with any similar and better known passages of the same nature.

Apostrophe
to the power
of Love.

ἄβρομ' ἔρως πόσος ἴσσι, πόση σίβην ἄπλετον ἀλκή
πόσσα νοῦς, πόσα κοῖρανίς, πόσα, δαῖμον, ἀθύρις.
γαῖα πύλι σταβίῃ, βελίισσι δὲ σοῖσι δουῖται.
ἄστατος ἱπλιτο πόντος, ἀτὰρ σύγι καὶ τὸν ἱπῆζας.
ἥλυθες εἰς αἰθῆρ', οἶδεν δὲ σε μακρὸς Ὀλυμπος.
διμαίνει δὲ σε πάντα, καὶ ἑρᾶνός εὔρυς ὑπερθε,
γαῖης ὅσσα τ' ἱερθε, καὶ ἱθύνει λυγρὰ καμόντων,
οἱ Λήθης μὲν ἄφυσσαν ὑπὸ στόμα νηπαθὺς ὕδαρ,
καὶ φύγον ἄλγιστα πάντα, σὶ δ' εἰσὶτι πεφρίκασσι.
σὼ δὲ μῖνι καὶ τῆλε περᾶς, ὅσον ἔποπτε λύσσει
Ἥλιος φαίδων, σὼ δ' αὖ περὶ καὶ φάος ἱκνέ
διμαῖνον, καὶ Ζηνὸς ὅμως εἰκασσι περᾶνοι. (410.)

The III^d Book recounts the habits of Lions, Panthers, (which Oppian here admits,) Lynxes, Bears, Wild Asses, Wolves, Hyænas, Tigers, Boars, Porcupines, Ichneumons, Foxes, Camelopards, Struthiocameli, and Hares; but we hasten on to the IVth, in which the modes of Hunting these various beasts are related. The Lion is often caught in a pitfall, in the centre of which is hung up, on a lofty pillar, a Lamb fresh drawn from its Ewe; the pit is surrounded by a dwarf wall, which conceals its depth, and which the Lion, stimulated by hunger, overleaps; the Hunters then letting down a cage, into which he is attracted by a fresh bait, close its door when he has entered, and draw him up by ropes. (77.) Such is the African practice. In India the mode is widely different. Three men on foot expand a net, one in the middle, the others at the opposite extremities of a semicircle, within call of each other. A large band on foot and horseback, with shields on their left arms, and burning torches in their right hands, then press upon the Lions with

Lion Hunt-
ing in Africa.

In India.

HUNTING loud shouts, and drive them into the net. (110.) But a far more extraordinary method is adopted in Ethiopia. **In Ethiopia.** The Hunters there go out in parties, four in number. They are clad in suits of wicker-work, fitted close to the body, and stuffed in all its crevices with wool; a padding of wool moreover is strapped over them. Thus accoutred, with shields and helmets to boot, they set out for the Lion's den, making a loud cracking with whips. The beast is roused and springs upon his nearest assailant, but his claws and teeth are blunted by the wool; and he in vain rages on the wicker armour, changing from one foe to another, till he is wearied, overpowered, bound, and carried away prisoner. (146.)

Panther Hunting.

The chase, if it may be so called, of Panthers leads to an episode, of which Bacchus and his early Mythology is the fruitful subject. Ino, Pentheus, Athamas, Aristæus, and the Dryads are touched upon in very pleasing lines. It is in Africa that the power of this God is called into exercise against Panthers. To some watering place of the desert the Hunters roll about twenty hogsheads of rich old wine, not a little too good for its purpose, for it has been mellowed by eleven years' keeping. This they dash very slightly with the water which rises slowly from the spring. The Panthers, thirsty from heat, and attracted by the delicious odour, hasten to the spot, and quaff the mixture. The consequences may be easily imagined, and the stages of their ebriety, from its first boisterous merriment to its last stupefaction, are described with the pen of an adept. While heavy, dull, and unresisting they are easily captured. (248.)

Bear Hunting.

Bears are tracked with Dogs by the Armenians and the inhabitants of the banks of the Tigris. The Dogs are not slipped, but still retained in leashes. Their almost frantic joy when on the footing of their prey, is most vividly described, and gives occasion for a simile of extraordinary beauty, which, perhaps, might have been more fittingly placed. But this is a fault which is far more than compensated by the delicacy of thought and expression:

ὡς δ' ὅτε παρθενικὴ γλαυγόντος ἐν εἰάρος ὤρῃ
ἀβλαύτοις ποδισσιν ἀν' ἕρτα πάντ' ἀλλάσσεται,
ἄνθρα διζομένη, τὸ δὲ οἱ μάλα τηρόντ' ἰύση
νηδύμιον προπάροιθεν ἰὼν μῆνυσεν αὐτμή,
τῇ δὲ μάλ' ἰάνθη, μίδῃσι δὲ θυμὸς ἱλαφρὸς.
ἀλλ' αὖται δ' ἀκρόρητος, ἀναψαμένη δὲ κάρηνον
εἶσιν ἐς ἀγρεύλων δόμον αἰδύσσα τοκήων. (366.)

The Hunter, when he has found the Bear's couch, returns to inform his companions; a *formido*, nets, a stake, and a noose combine to secure the animal.

Hares.

A Hare should never be chased up hill, a precept in which all the ancient writers on Hunting coincide. Her fore legs being shorter than those behind, she has a great advantage over the Hounds when mounting a steep ascent. The Fox is too cunning to be entrapped by net or gin; moreover, his teeth are sharp enough to free him, if caught, from both. Hounds sometimes kill this animal, but not even the strongest of them, without a bloody contest. At this point the Poem unexpectedly breaks off. That more was written, or intended to be written, is plain from a promise, τὸν μετέπειτ' ἐρέω, (iii. 406.) not fulfilled in the Books remaining to us; and from the abruptness with which it is by no means probable that a Work otherwise highly finished would be allowed to conclude.

**Julius Pol-
lux.**

The first Part of the Vth Book of the *Onomasticon* of Julius Pollux, addressed to the Emperor Commodus,

affords many useful explanations of particulars connected with Classical Hunting.

The last ancient Work on Hunting which has come down to us, is very much inferior to those which we have already noticed. Of the personal History of Nemesian, who flourished in the reign of Numerian, we have spoken in another part of our Work.* It is probable that he wrote, or at least contemplated, a far larger Poem than we now possess in his *Cynegeticon*. His opening words, *Venandi cano mille vias*, are by no means redeemed in the 325 lines which are extant; more than 100 of which are occupied by an enormous and somewhat impertinent Proœmium, into which he has contrived to interweave all the fables which he does not intend to sing. On arriving at his subject he commences with Dogs, and recommends a singular mode of ascertaining such members of a litter as afford most promise of future excellence. The weight will be some guidance; the lightest being most likely to prove swift; but, as a surer criterion, the Puppies, while yet blind, should be placed within a blazing circle, and the mother will always exercise a sound critical judgment, by carrying the choicest whelps out of danger, in the precise order of their comparative merit. The mode of training and exercising Hounds; the cure of animal diseases; the different breeds of Horses; and the formation of nets and the *linea*, (which is treated more at length than it is by Gratius, and for the construction of which Nemesian recommends the use of as numerous colours and as many varied feathers as can be procured,) occupy the remainder of this Poem, which concludes with a brief admonition to the Sportsman to be early in the field.

Among the modern Latin Poets who have celebrated the delights of Hunting, may be mentioned Hercules Stroza of Florence, who addressed to Lucretia Borgia, a long *Epicedium* on her brother Cæsar, in Latin Hexameters. Hadrianus Cardinalis S. Chrysogoni, who wrote Hendecasyllables to Ascanius, a fellow Cardinal, S. Viti. Both of these will be found prefixed to some Plates of field sports, illustrated by Latin and German quatrains from the pen of John Adam Lonicer of Frankfort, in which the skill of the Engraver far exceeds that of the Poet. The Plates are very interesting on account of their representation of the Hunting costume of the times. In two of them the Sportsmen are exhibiting in repose, *Ut genio et venatui indulgent Heroas*, and *Mensæ et dapēs Venantium*. At the close are printed the *Cynegeticon* of Gratius, the *Haliutica* of Ovid, and the *Venusini Canes* of Darcus. The title-page announces Nemesian also, but he is not given. This volume was printed at Frankfort in 1582. The *Cynegeticon* of Petrus Angelus Bargæus consists of VI Books in Latin Hexameters, addressed to Cosmo de Medici, and embracing almost every thing connected with the sport. The diction is in Virgilian taste, and the Poem may be read with pleasure, even after that of Oppian, in whose course it frequently treads. Lastly, Natalis Comes has left four Books *de Venatione*, the perusal of which, notwithstanding his numerous predecessors in the same line, will not be unattended with satisfaction.

Numerous particulars of the early modes of Hunting in England have been collected by the diligence of Early British and Anglo-Saxon Hunting.

* BIOGRAPHY, *Decline of Latin Poetry*, vol. x. p. 573.

HUNTING Antiquaries. Some, but not of much importance, will be found in a Paper by Mr. Pegge in the *Archæologia*. (x. 156.) Strutt, in his *Sports and Pastimes*, (I. i.) has collected a large and interesting mass of information, and to him and to Mr. Turner, in his *History of the Anglo-Saxons*, (viii. 7.) we are indebted for most of the statements which we shall bring forward.

There can be little doubt that the necessity of providing food, and the abundance of wild animals with which their country was stocked, led our barbarous ancestors, both in their rudest state, and afterwards while under the Roman dominion, to pursue the chase. How soon that, which at first was an act of necessity, became an amusement, it is not possible to determine; but as early as the IXth century we read of Hunting as one of the accomplishments of the youthful Alfred, even before he was twelve years of age, and we may therefore suppose that it formed one part of education. Asser informs us that the young Prince was a most expert and active Hunter, and excelled in all the branches of that most noble Art, to which he applied with incessant labour and amazing success. *In omni venatoriâ arte industrius venator incessabiliter laborat non in vanum; (de reb. gest. Ælfredi, 16.)* a passage which Strutt understands literally, but in which, if we may be guided by the context, we are inclined to think the good Bishop is speaking metaphorically of the young Prince's diligent application to Letters. There can be no doubt, however, that, in another passage, he praises him for his great skill in Hunting. *Interea tamen Rex, inter bella et præsentis vitæ frequentia impedimenta, necnon Paganorum infestationes et quotidianas corporis infirmitates, et regni gubernacula regere, et omnem Venandi agere, aurificos et artifices suos omnes, et falconarios, et accipitrarios, canicularios quoque docere.* (43.) From a MS. of the IXth century, a Saxon Calendar, (*Cotton. MSS. Tiber. B. v.*) under the month September, Strutt has engraved a Plate (I.) representing a Saxon Chieftain armed with a spear and sword, and accompanied by a follower, who likewise bears a spear, blows a horn, and is followed by a brace of Dogs in couples, the particular breed of which it would be a puzzling task to resolve, in pursuit of wild swine; four of which are seen wallowing under forest trees, and greedily devouring that which we imagine to represent acorns. The Hunt of Edmund, the grandson of Alfred, at Ceoddri, has been given in the following spirited terms by Mr. Turner, from a *Life of St. Dunstan*. (*Cotton. MSS. Cleop. B. 13.*) "When they reached the woods, they took various directions among the woody avenues; and lo, from the varied noise of the horns and the barking of the Dogs, many Stags began to fly about. From these, the King, with his pack of Hounds, selected one for his own Hunting, and pursued it long through various ways with great agility on his Horse, and with the Dogs following. In the vicinity of Ceoddri were several abrupt and lofty precipices hanging over profound declivities. To one of these the Stag came in his flight, and dashed himself down the immense depth with headlong ruin, all the Dogs following and perishing with him. The King, pursuing the animal and the Hounds with equal energy, was rushing onwards to the precipice; he saw his danger, and struggled violently to stop his courser; the Horse disobeyed awhile his rein: he gave up the hope of life, he recommended himself to God and his saints, and was carried to the very brink of destruction before the speed of the animal

could be checked. The Horse's feet were trembling on the last turf of the precipice when he stopped."

From some *Dialogues* composed in Latin by Elfric, Duke of Mercia, for the instruction of the Anglo-Saxon youth, still preserved in the same Collection, (*Tiber. A. 3.*) the same writer has also presented a conversation on Hunting, which conveys a great deal of information as to its practice.

" 'I am a Hunter to one of the Kings.' 'How do you exercise your art?' 'I spread my nets, and set them in a fit place, and instruct my hounds to pursue the Wild Deer till they come to the nets unexpectedly, and so are entangled, and I slay them in the nets.' 'Cannot you Hunt without nets?' 'Yes, with swift Hounds I follow the Wild Deer.' 'What Wild Deer do you chiefly take?' 'Harts, Boars, and Rein Deer, (*rana*), and Goats, and sometimes Hares.' 'Did you Hunt to-day?' 'No, because it was Sunday; but yesterday I did: I took two Harts and one Boar.' 'How?' 'The Harts in nets, the Boar I slew.' 'How dared you slay him?' 'The Hounds drove him to me, and I, standing opposite, pierced him.' 'You was bold.' 'A Hunter should not be fearful, because various Wild Deer live in the woods.' 'What do you do with your Hunting?' 'I give the King what I take, because I am his Huntsman.' 'What does he give thee?' 'He clothes me well, and feeds me, and sometimes gives me a Horse or a bracelet, that I may follow my art more lustily.' "

Of the passion for Hunting which animated our Kings and Nobles after the Conquest, the huge tracts of land which were afforested by the monarchs of the Norman line bear fearful testimony; and the writers of their times are not backward in depicting the sufferings of the oppressed commonalty under the tyrannical privileges of Sport which were claimed by their masters. The Game Laws of Canute, which already were more than sufficiently severe, were increased in pressure; nor was it till the Great Charter had been extorted from John that the unhappy slayers of the King's Deer were secure in life or limb.

Perhaps the earliest modern writing connected with this subject, is the *Art de Venerie, le quel Maistre Guillaume Twici, venour le Roy d'Angleterre fist en son temps per aprendre autres*; a MS. which once belonged to Mr. Farmer, of Tusmore, in Oxfordshire; and a translation of which, "The Crafte of Huntynge," is among the *Cottonian MSS.*, (*Vespasian, B. xii.*) under the name of William Twety and John Giffard. Twici, or Twety, was Grand Huntsman to Edward II. In the Bodleian Library (*MS. Dig. 182.*) may be found some other instructions, written for Henry Prince of Wales, afterwards Henry V., under the title of *The Maistre of the Game*. According to Strutt, this Treatise, Manuscripts of which are not uncommon, is little more than an enlargement of the first named. In the Poetical Prologue by which it is introduced, Twici mentions the Hare, Hart, Wolf, and Wild Boar, as beasts for Hunting; the Buck, Doe, Fox, Marten, and Roe, as beasts for Chase; the Grey, (Badger,) Wild Cat, and Otter, as beasts affording "great dysporte." The Dogs named are raches, or hounds; running Dogs for Hares; alauntes, or Bull Dogs and Mastiffs for Wild Boars; and Spaniels, chiefly for Hawking. This list falls very short of that given by Dr. Caius, of which we have already spoken. (*De Can. Brit. 29.*)

The magnificence and expense of these Sports in the XIVth century, may, in some degree, be estimated by

HUNTING a brief notice which is left to us of a grand Hunting match in the year 1363, when the Kings of France, Scotland, and Cyprus were in England, and to which Edward III. invited all the French hostages and all his own nobility. Henry de Knyghton, the Canon of Leicester from whose Chronicles we draw the narrative, thus expresses himself; *fecit solennem fugationem ferarum in Forestis de Rogyngan, Clyne, Schyrewode, et pluribus aliis forestis et silvis et parcis, et hoc fecit pro anno L ætatis suæ. Et, ut dicebatur, effundebat expensas diurnales uno die CLI secundo die C marcas toto illo tempore fugationis.* (2627.)

Strutt has pointed to many instances of the fondness of ladies for these rough and unfeminine pastimes. They not only witnessed the chase from stands prepared for them, but they joined in it, and shot at the game with arrows. So late as the days of Elizabeth we find that Amazonian Queen entertained during her progresses with splendid Hunting matches. While at Cowdrey, in Sussex, the seat of Lord Mountacute, one day, in 1591, after dinner her Grace saw from a turret, "sixteen Bucks all having fayre law, pulled downe with Greyhounds in a laund, or lawn." (Nicholl's *Progresses*, ii.) Several years afterwards, when the Queen had now entered her 67th year, Rowland Whyte thus writes to Sir Robert Sidney on the 12th of September, 1600, of her mode of life during her residence at her Palace at Oatlands. "Her Majesty is well, and excellently disposed to Hunting; for every second day she is on Horseback, and continues to sport long." It was at Oatlands that the extraordinary feat, preserved by tradition, and corroborated by a monument in the church of Walton upon Thames, was performed by John Selwyn, under-keeper of the Royal Park. While attending one day upon the Queen in the duty of his office, in the heat of the chase, he suddenly leaped from his horse upon the back of the Stag, both running at that time with their utmost speed, and not only kept his seat gracefully in spite of every effort of the affrighted beast, but drawing his sword, with it guided him towards the Queen, and coming near her presence plunged it in his throat, so that the animal fell dead at her feet. This action was thought sufficiently wonderful to be chronicled on his monument, and he is accordingly there portrayed in the act of stabbing the beast. (Grose, in the *Antiq. Repertory*, i. 1. where an engraving of the monumental brasses is given.)

But we have outrun our Bibliographical chronology, and we must turn back a little in order to notice a very curious early Work. Gaston Phœbus, Comte de Foix and Vicomte de Bearn, grandson of the celebrated Prince whose name he bore, was a true descendant of his great ancestor both in valour and magnificence. He was distinguished, moreover, as a Sportsman, and died suddenly at Ortez in 1391, as he was washing his hands before supper on his return from Hunting. Mr. Johnes, in the *Memoirs of the Life of Froissart*, prefixed to his Translation of the *Chronicles*, informs us from St. Palaye, (*Mém. de l'Ac. des Inscript.* x. 676.) that Gaston Phœbus was one of the Patrons at whose Court the excellent knight gathered information for his great Work. In 1388 Froissart left France with commendatory letters from the Comte de Blois, and carried with him four Greyhounds, Tristan, Hector, Brun, and Rollant, as presents to the Comte de Foix, who is described as always keeping no less than 1600 dogs in his kennel. The volume which Gaston com-

posed bears the title of *Des Deduitz de la Chasse de Bestes Sauvages et des Oyseaux de Proye*. Annexed to it, as a second part, is the Poem on Birds, by Gasse de la Bigne, of which we have already spoken under FALCONRY.* This Work has been twice printed in folio and black letter at Paris: the first time by Anthoine Verard, *Libraire marchand, demourant a Paris devant la rue neufve nostre dame, a l'enseigne de Saint Jehan l'evangeliste. Ou au palais au premier pillier devant la chapelle ou lon châte la messe de messeignrs les presidens.* The second by Jehan Treperel. There is also a Parisian reprint, in quarto, by Philippe le Noir, under the title of *Le Miroyre de Phebus*. The first edition, which we have consulted, is illustrated with numerous rude cuts, and contains instructions for Hunting the customary animals, and for breeding Dogs. We shall extract a single passage, which appears to us to be highly descriptive of the manners of the times, and of the joyous magnificence of the ancient Chase. *Cy divide commēt lassemblee se doit faire et en yver et en este.* Chap. xxxviii. *Lassemblee se fait en telle maniere. La nuyt devant que le Seigneur de la chasse ou le maistre veneur voudra aller en boys, il doit faire venir devant luy les veneurs, les aydes, les varletz et les paiges, et leur doit a chascun assigner leur queste en certai lieu, et separer lung de lautre, et lung ne doibt point venir sur la queste de lautre, ne faire ennuy. Et chascun doibt quester en la maniere que jay dit du mieulx quil peult. Et leur doibt enseigner le lieu ou lassemblee sera faicte au plus aise de tous, et au plus pres de leurs questes. Et doit estre le lieu ou lassemblee sera en ung beau pre bien vert, ou il y ait beaulx arbres tout au tour, loing lūg de lautre, et une fontaine clere ou ruisse de lez. Et sappelle lassemblee pour ce que toutes les gens de la chasse et chiens i assemblent; car ceulx qui vont en queste doivent tous revenir au certain lieu que jay dit, aussi font ceulx qui partent de lhostel, et tous les officiers de lhostel doibvent la porter ce qui luy fault selon son office plantureusement, et doibvent estendre touailles et napes par tout sur lherbe verte, et mettre viandes diverses a grant foison sus, selon le pouvoir du Seigneur. Et lung doit mangier assis, et lautre sur piedz, lautre acoude, lautre doit boire, lautre doit rire, jangler, et bourder, et jouer, et brief tous les ebatemens et leesse. Et quant on sera assis es tables avant que on mangeue, dont doivent venir les veneurs, aydes et varletz, qui auront este en queste, et chascun doit faire son report de ce qe aura fait et trouve, et mectre sus les fumees devant le Seigneur celluy qui en aura. Et le Seigneur ou le maistre de la chasse par le cōseil deulx tous doit regarder auquel il yra laisser courre, ne lequel sera plus grant cerf, ne en meilleur meute. Et quant ils auront mangie, le Seigneur doit deviser ou ses relays et leuriers et deffences yront, et autres choses lesquels je diray plus aplain quāt je parleray du veneur. Et puis doivent le Seigneur et les autres monter a cheval et aller laisser courre.*

A MS. of this curious Work, which once belonged to the Royal Library of France, was bought at an auction in London by the Duke of Marlborough in 1815, for £165. It was written in Gothic characters on vellum, and contained 88 illuminations. At the beginning of the chapter on the second page was a statement that the Work was commenced on the first of May, 1347. (Dibdin, *Bibl. Dec.* iii. 478.) Of the

* P. 798.

HUNTING sporting enthusiasm of the Count de Foix, some judgment may be formed from one of his exhortations. Long life, health, pleasure and salvation hereafter, are, as he says, every man's desire; *les Veneurs ont tout cela. Donc soyez tous Veneurs et vous ferez que saizes, et pour ce je l'os et conseille à toutes manières de gens de quelque état qu'ils soient qu'ils aiment les chiens.*

Book of St. Albans.

Of *The Book of St. Albans* we have said enough, perhaps, under FALCONRY. Dame Julyan Berners, in that reprint of her volume from which we now borrow, entitled *The Booke of Hunting, where unto is added the Measures of Blowyng*, must be considered the type of printed English writers on Venery. She professes to teach "gentyll persons the manner of Huntyng for all maner of beastes, whether they be beastes of Venery or chase or rascall." But many of her precepts are couched in rhyme, and will give but little satisfaction to modern Sportsmen. We may content ourselves with a single extract, showing the seasons at which different beasts are to be hunted.

Marke well these seasons folowyng.

Tyme of grece beginneth at Mydsommer day,
And tyll Holy Roode day lasteth as I you say.
The season of the Foxe fro Nativitie
Till the Annunciation of our Lady free.
Season of the Ro bucke at Easter shal begyn,
And tyll Michelmas lasteth nye or sheblyn.
The season of the Ro beginneth at Michelmas,
And it shall endure till it be Candlemas.
At Michelmas beginneth the Hunting of the Hare,
And lasteth till Midsomer, there will no man it spare.
The season of the Wolfe is made in eche countrie
At the season of the Foxe and evermore shall be.
The season of the Bore is from the Nativitie
Tyll the Puryfycacion of our Lady so free:
For at the Nativitie of our Lady sweet
He may finde where he goeth under his feet;
Bothe in woodes and fieldes corne and other frute
When he after foode maketh any sute.
Crabbes and oke cornes and nuttes there they grow,
Hawes and hepes and other thinges inow;
That tyll the Puryfycacion lasteth, as ye may see,
And maketh the Bore in season to bee;
For while that frute may last his time is never past.

A Jewell for Gentry.

A Jewell for Gentry was compiled in 1614 from the *Book of St. Albans*; and to this Work we may refer for clearer explanations in prose. Beasts of Venery are four, the Hart, the Boar, the Wolf, and the Hare. Beasts of Chase are five, the Buck, the Roe, the Martynon, the Fox, and the Doe; all others are Rascall, or, in modern phraseology, Vermin. A Hart in the first year is a *Calf*; in the second a *Broket*; in the third a *Spayd*; in the fourth a *Stag*; in the fifth a *Great Stag*; in the sixth a *Hart*. His Head is called *Anteler, Real* and *Surriall*. When his top is forked, he is called a *Hart of 10*; when he bears three, a *Hart of 12*; four summed a *Hart of 16*; and so onwards summed as many as he carries. Harts, Hinds, Buckes, and Does congregate in a *Herd*, Roes in a *Bevy*, Boars in a *Sounder*, Wolves in a *Rout*: 20 form a little Herd, 40 a middle Herd, 80 a great Herd. A Buck the first year is a *Faun*, the second a *Pricket*, the third a *Sorell*, the fourth a *Sore*, "at what time he will serve for a warrant," and the fifth a *Buck of the first head*. A goodly Hart, Hind, or Buck, is called *great*, a Doe *fair*. 6 Roes form a small Bevy, 10 a middle Bevy, 12 a great Bevy; 12 is a small Sounder, 16 a middle Sounder, 20 a great Sounder. Of a Roe you must say he *crosses* or *traverses*, *doubles* is hardly permitted by the Laws of Sir Tristram. Its dressing, or breaking up, is called *herdling*, and the reward of the

Hounds consists of the feet, bowels, and blood. A HUNTING Boar in the first year is a *Pig*; the second a *Hog*; the third a *Hogstere*; the fourth a *Boar*; then when he departs from the Sounder he is called a *Singler* or *Sanglier*. In dressing he is to be flayed, and the flesh orderly divided "into two and thirtie bredthes, as it is termed amongst woodmen:" the bowels are the reward of the Hounds.

The Hare, according to the received belief of the time, is affirmed to be subject to repeated changes of sex, and to have powers of superfetation. Her seat is a *form*, "the place through which she goeth to *releefe* (feeding) her *muset*;" tracking her is called *pricking*, or in the snow, *trayning*; "her deceits and shifts" *doubles*; she is not said to be *fat*, but *white*.

We cannot forbear from extracting at length the description of a Hare Hunt; it is eminently characteristic of the manners of the time during which it was written.

"Now, if you goe about to Hunt this nimble and delicate chase, you shall, when you come to the kennell (in the morning) to couple up your Hounds, first gibet once or twice, to awake and stir up the dogs; then opening the kennell dore, the Huntsman shall use some gentill words of ratling, least in their hasty comming out they should hurt one another; to which the Frenchman useth this word, '*Arere, Arere*;' or, as we say in English, 'Soft, soft, ho, ho, ho, ho!' once or twice redoubling the same, coupling them as they come out of the kennell; and being come into the field, and having uncoupled, the Frenchman useth to say, '*Hors de coople, avaunt, avaunt*,' once or twice; with '*So-how*' three times together. We use to gibet once or twice to the doggs, criing 'A trayle, a trayle, there doggs, there;' and if it be in a bushie place, to beate the bushes with your hunting pole, and crie, 'Hup wat hup,' which makes the doggs in trailing to hold close together, crying often, 'So-how.' And if the Hounds have had rest, and being over-lustie doe begin to fling about, the Frenchmen use to cry, '*Sweft, amies, sweft*;' redoubling the same, or else, '*Arere, amies, ho, ho*;' and we in English use to the same purpose, 'Soft ho, ho, here againe, ho, ho;' doubling the same, sometimes calling them backe againe with a gibet or hallow, pointing with your hunting pole upon the ground, and crying, 'So-how.'

"Now if some one of the Hounds light upon a pure sent, so that by the manner of his eager spending you perceive it is very good, you shall cry, 'There, now, there;' or 'That's it, that's it;' and to put the rest of the cry into him, you shall cry, 'Avaunt, avaunt, ho, list a Talbot, list there, list;' to which the Frenchman useth "*Oies a Talbot, le Vailant oies, oies trove le coward*," in the same manner, with little difference; and if you finde by your Hounds where a Hare hath beene at reliefe, if it be in the time of greene corne, and if your Hounds spend upon the traile merily, and make a good cry, then shall the Huntsman wind three motes with his Horne, which he may sundry times use with discretion, when he seeth the Hounds have made away, a double, and make on towards the seate. Now if it be within some field or pasture where the Hare hath been at reliefe, let the Huntsman cast a ring with his Hounds to find where she hath gone out; which if the Hounds light upon, he shall cry, 'There, Boyes, there, that, tat, tat, hoe, heck, avaunt, list to him, list;' and if they chance, by their brainsickness to overshoot it, he shall call to his Hounds, 'Ho, againe, ho,' doubling

HUNTING the same twice; and if undertaking it againe, and making it good, he shall then cheare his Hounds, and say, 'There to him, there, that's it, that, tat, tat,' blowing a note. And note, that this word *so how* is generally used at the view of any beast of chase or venery, but indeed the word is properly *so ho*, and not *so how*; but for the better pronounciation and fulnesse of the same, we say *so how*, not *so ho*. Now the Hounds running in full chase, the Frenchmen use to say 'Ho, ho;' or 'Swef, alieu, doute, alieu;' and we, imitating them, say, 'There, boys, there, avant there, to her there;' which tearmes are indeed derived from their language."

G. Markham's
*Gentleman's
Academie.*

*Countray
Content-
ments.*

Much to the same purpose, on most leading points, speaks Gervase Markham in the *Gentleman's Academie*, 1595, which is little more (for Markham was a very diligent borrower) than the *Book of St. Albans* cast in a fresh mould. This writer was tinctured with Astrology. He strongly recommends the breeder of Dogs to pay great regard to the time when the moon is either in the sign Aquarius or Gemini; "for it is held amongst the best Huntsmen of this land, that the whelpes which are ingendered under those two signes will never run mad; and, for the most part, the litter will have at least double so many dogge whelpes as bitch whelpes." In the *Countray Contentments* of the same writer we find a definition of Hunting, which ought to satisfy the most fastidious. "Hunting is then a curious search, or conquest of one beast over another, pursued by a natural instinct of enmitie, and accomplished by the diversities and distinctions of smells onelie; whereas Nature, equallie deviding her cunning, giveth both to the offender and offended strange knowledge both of offence and safety." (3.)

Turbervile.

George
Gascoigne.

We have mentioned *A Jewell for Gentry*, and Gervase Markham's writings some little before their chronological order, because they are in great measure dependent upon the *Book of St. Albans*. The *Booke of Faulconrie* by George Turbervile, a Poet of no mean celebrity in his day, preceded them; it appeared in 1575; and appended to it will very often be found, *The Noble Art of Venerie, or Hunting, wherein is handled and set out the Vertues, Nature, and Properties of Fifeteene sundry Chaces, together with the order and maner how to hunt and kill every one of them: translated and collected for the pleasure of all Noblemen and Gentlemen, out of the best approved authors which have written any thing concerning the same, and reduced into such order and proper terms as are used in this Noble Realme*. There is a doubt whether this second Tract was compiled by Turbervile: by some it has been attributed to George Gascoigne, who has prefixed commendatory verses to the volume. In the Edition of 1611, before the Chapter entitled *An Advertisement by the Translatour of the English Manner in Breaking up of the Deare*, (p. 133,) is a print representing a Huntsman presenting a knife to James I., in order that he may make *assay*, (the first cut on the breast to discover how fat he is.) This print has been copied as a frontispiece to *The Secret History of the Court of James I.*, Edinburgh, 1811, where it is said to form an excellent commentary on a passage in Osborne's *Traditional Memoirs*; wherein he describes the Hunting dress of this "Sylvan Prince" to be "greene as the grasse he trodde on, with a fether in his cap, and a horne instead of a sword by his side." (195.) In the above account of the breaking up of the Deare, immediately after the assay (according to the

English mode) follows a very butcherlike proceeding. **HUNTING** "This being done, we use to cut off the Deares head, and that is commonly done also by the chiefe personage. For they take delight to cut off his head with their wood knyves, skeynes, or swords, to try their edge and the goodnesse or strength of their arme." (134.)

Many of the terms of the Art of Venery may be learned, with great pleasure to the reader, by a perusal of Ben Jonson's exquisite fragment, *The Sad Shepherd*. One passage of this beautiful Drama is curiously illustrated by the Tract which we are now considering. *Marian*, in describing her morning's sport to *Robin Hood*, tells him

Ben Jon-
son's *Sad
Shepherd*.

— You do know as soon

As the assay is taken

. . . . when the arbor's made.

. . . . he that undoes him

Doth cleave the brisket bone, upon the spoon

Of which a little gristle grows, you call it—

ROB. The Raven's bone. MAR. Now o'er head sat a Raven

On a sere bough, a grave great Bird and hoarse,

Who all the while the deer was breaking up,

So croak'd and cry'd for it, as all the Huntsmen,

Especially old Scathlock, thought it ominous. (i. 6.)

Gascoigne, or whoever else wrote *The Book of Hunting*, remarks in the Chapter from which we have already quoted, "We use not to take away the brisket bone, as far as ever I could see, but cleave the sides one from another, directly from the place of assay unto the throat. There is a little gristle which is upon the spoone of the brisket which we call the Raven's bone, because it is cast up to the Crowes or Ravens which attend Hunters. And I have seene in some places a Raven so woont and accustomed to it, that she would never fayle to croake and cry for it all the while you were in breaking up of the Deere, and would not depart untill she had it." (135.) It is not impossible that Jonson borrowed his first notion of the Witch Maudlin's pertinacious croaking (for it is she who is suspected to be the Raven) from the above passage. In the course of this Drama, Jonson has shown himself quite as well acquainted with the terms of Venery as in the *Alchemist* he is in those of the Laboratory: and Gascoigne's volume, no doubt, was the favourite text-book of his time. It is framed, in great measure, upon the French Works on Hunting. The liberality of Mr. Haslewood has afforded us an inspection of this rare volume, (for which on a former occasion we had searched in vain,) among his numerous other Bibliographical treasures.

Of the *Fauconnerie* of Jacques de Fouilloux we have spoken under the head to which it more immediately belongs. His *Venerie* precedes it in the same volume; and to this, as well as to Phœbus, must a large portion of the Work of Gascoigne or Turbervile be referred. The cuts to the Edition of 1585 are very curious; and if any proof were wanting of the gloomy ferocity of Charles IX., they might be derived from the expression which the engraver has thrown into his countenance in a Plate of the reception of his Book from the writer, prefixed to the Dedication. This monster himself "was a mighty Hunter," and dictated a Work on the Chase to one of his favourites. Fouilloux treats at great length upon Dogs, how they are to be educated, *dans une belle lyce*, and to be attended by a *valet de chiens*. In his account of the *Assemblée*, which is very much founded on that of Phœbus, he adds one particular which we are surprised should have escaped the gallantry of the Prince. *Et s'il y a quelque femme de réputation en pays qui face plaisir aux compagnons, elle*

Jacques de
Fouilloux.

HUNTING doit estre alleguée et ses passages et remuement de fesses, attendans le rapport à venir. (35.) In like manner, when going to a Fox chase, le Seigneur doit avoir sa petite charrette, là où il sera dedans, avec la fillette aagée de seize à dix sept ans, laquelle luy frottera la teste par les chemins. Accordingly, he is depicted lying at full length in a cart without springs, much resembling a brewer's dray, with a damsel of the necessary age diligently chafing his temples. The charrette, moreover, is ornamented as described below. *Toutes les cheuilles et paux de la charrette doivent estre garnis de flacons et bouteilles, et doit avoir au bout de la charrette un coffre de bois plein de coqs d'Inde froids, jambons, langues de bœuf, et autres bons harnois de gueule.* (c. 62.) After enumerating the various chases, a Treatise on Cyniatrics follows, which is succeeded by a Poem sur l'adolescence of the writer, and the services of his faithful Dog *Tire fort*; into which are interwoven the songs of some shepherdesses to their flocks. The music we do not give; the words are as follows: 1. *Comme les Bergères érodent leurs Brebis.*

*Et o lou valet, o lou valet, lou valet, de re lo.
Lou valet, lou valet, lou valet, la, la a a let.*

2. *Le chant et huchement des Bergères.* 3. *Response de la Bergère compagnon*; neither of which is more than *Ou, ou, ou, ou, ou, ou, ou, ou, oup, ou oup.* Among these pretty vocalists Fouilloux is content to spend some portion of his adolescence in the pursuit

*D'une tant douce et loyale amour,
Qui a duré mainte année et maint jour,
Vivant au bois comme un très-bon hermite,
Au monde n'a vie plus benedictée.*

A more pathetic Poem, *La Complainte du Cerf*, by Guillaume Bouchet, succeeds; and attached to some other short instructions for Hunting, from various pens, will be found a very useful Glossary of French *mots, dictions, et manières de parler en l'Art de Venerie.*

As a useful manual for French Hunting, perhaps there is no Work better than the *Nouveau Traité de Venerie*, d'Antoine Gaffet, 1750. The writer served 40 years in the Royal Hunting Establishment, of the ordinances of which he gives a preliminary account. His instructions are very plainly and clearly delivered; but we know not how a thorough English Fox Hunter will approve of his doctrines in the *Chasse au Renard*. He encourages it only inasmuch as it keeps down these animals who are so destructive to Hares and Partridges; and he proposes a less troublesome mode of despatching them than by pursuit with Hounds, namely, by placing near their earths a chicken or a pigeon, delicately stuffed with *nux vomica*. *Les Renards ne manqueront pas le prendre et de le manger: ils mourront sûrement, et par ce moyen on sera délivré de toute la portée.* (340.)

Even before the time of Gaffet, in the *De Canibus et Venatione Libellus* of Michael Angelo Blondus, dedicated to Francis I., 1544, sundry methods for the destruction of Foxes had been taught; as it is held to be quite impossible that any Hounds can be found fleet enough to be able to run them down. By most other writers the Fox is considered to be esculent neither by man nor beast: Blondus, however, assures us of the contrary, and moreover, that it possesses eminent medicinal properties. *Verum neque ejus caro abjicienda est, quoniam elixa in pingui oleo olivæ componit omnes frigidos affectus nodorum et quorumvis ligamentorum, remolliens nervos contractos et collectas tuberositates.*

At pingue Vulpis sternit aurium dentiumque langores et pulmo ejus confert phthisicis, dispneamque oppugnat. (fol. xxxi.) In concluding our notice of French Hunting, we must not omit to mention the very copious materials to be found in that volume of the *Encyclopédie Méthodique* which treats of *Les Chasses*.

From the volume of Raimondi of Brescia, *Le Caccie delle Fiere armate et disarmate et de gl' animali quadrupedi, volatile et acquatici*, 1621, we shall only borrow a few particulars of the qualities which the author considers necessary for a Sportsman; the precepts are much the same as we find given in other similar Works. First, a Huntsman should be devout; and before going out in the morning should always commend himself to God, the Virgin, and the Saints, and, more particularly than all, to his guardian Angel; these commendations he ought to repeat, *se si potesse*, before he goes to sleep, *che così facendo il tutto riesce bene*. 2dly, *Anzi al Cacciatore deve risplendere la Castità: e non senza grandissimo misterio gli antichi fingono Diana per Dea della Caccia, quale è detta ancora Dea della Castità; e questa le piace sommamente, oltre che gli animali stessi, come molti ve ne sono, amano la Castità.* 3dly, he ought to be able to bear heat and cold, and should be by no means fond of his bed; 4thly, he should be a good wrestler, runner, and leaper; 5thly, his courage must be undaunted; 6thly, he should be skilled in the use of arms, and an expert horseman; 7thly, his dress in all seasons should be light, and he should never be without a bow or quiver, and a cap with a plume of feathers; 8thly and lastly, *Non deve esser ignorante*, especially in Astrology, a Science which, according to the context, here implies no more than weather-wisdom, with a little additional knowledge of lucky and unlucky days, which may save him from the fate of Adonis.

These qualifications differ widely from the estimate of Hunters formed by an earlier writer. John of Salisbury, in his *Polycratica*, has a very curious Chapter (i. 4.) *de Venaticâ, auctoritatibus et speciebus ejus, et exercicio licito et illicito*: in this he says, *Venatores omnes adhuc institutionem redolent Centaurorum. Raro invenitur quisquam eorum modestus, aut gravis, raro continens, aut, ut credo, sobrius.*

But to return to English Works. A few years after the volume attributed to Turberville, appeared *A Short Treatise of Hunting, compiled for the delight of Noblemen and Gentlemen*, by Sir Thomas Cockaine, Knight, 1591. The good Knight informs us in his Preface "To the Gentlemen Readers," that "It hath bin long received for a truth that Sir Tristram, one of King Arthures Knights, was the first writer and, as it were, the founder of the exact knowledge of the honorable and delightfull sport of Hunting; whose tearmes in Hunting, Hawking, and Measures of Blowing, I hold to be the best and fittest to be used. And these first principles of Sir Tristram yet extant, joyned with my own long experience in Hunting for these fiftie-two yeares now last past, have mooved me to write more at large of Hunting the Bucke and other Chases than Sir Tristram did."

Sir Thomas Cockaine had long experience of sporting; "for this fiftie-two years," (as he once more repeats,) "I have hunted the Bucke in Summer and the Hare in Winter, two yeares only excepted. In the one having King Henry the VIII. his Letters to serve in his warres in Scotland, before his Majestie's going to Bulleine. And in the other, King Edward the VI. his Letters to

Gaffet

Blondus.

HUNTING serve under Francis the Earle of Shrewsburie, his Graces Lieutenant to rescue the siege of Haddington, which Towne was then kept by that valiant Gentleman Sir James Wilford, Knight. God send England many such Captaines when it shall have neede of them." That in the course of his life he had been present at some good runs is clear from the following passage. He is speaking of Fox Hunting. "And this tast I will give you of the flying of this Chase, that the author hereof hath killed a Foxe distant from the Covert where hee was found foureteene miles aloft the ground with Hounds;" and that he bore about him, even in the decline of life, all a Sportsman's ardour, is equally plain from a good-natured piece of advice which he offers to the infirm. "A speciall note for an olde man or a lame that loveth Hunting, and may not wel follow the Hounds. He must marke how the winde standeth, and ever keepe down the same, or the least the side wind of the Houndes. If he once loose the winde of the Houndes he is very likely to loose the sporte for that daye, if it be in the plaine or fieldey countrie." This little Tract is illustrated by cuts of different animals, in which the Hare, but for her ears, might be mistaken for a Bull Dog; but this want of similitude is afterwards atoned for by the abundant grimness of an Otter, with a fish in his mouth and fore paws. At the close are given Sir Tristram's Measures of Blowing, which may be found also at the end of *A Jewell for Gentry*. We need scarcely say that Sir Tristram is altogether a legendary personage.

The Gentleman's Recreation.

Hunting vocabulary.

But not from any of the Works which we have hitherto mentioned can fuller information be derived, than from that portion of *The Gentleman's Recreation*, 1677, which is assigned to Hunting, and from this Treatise we shall extract all such further matters as appear to illustrate the obsolete terms and methods of the Chase. After distinguishing the Beasts of Venery, Chase, and Warren, the names at their different ages are given with some slight variations from those we have above stated from *A Jewell for Gentry*. Thus a Hart in the second year, instead of a *Brocket*, is called a *Knobber*; in the third, a *Brocket* instead of a *Spayd*; in the fourth, a *Staggard* instead of a *Stag*. Some authors, it is remarked, and among them Turberville, have thought that a Stag never attains the name of *Hart* till he has been hunted by a King or Queen, but this is a mistake: such a Stag if he escape with life shall be called a *Hart Royal*; a Hind of the first year is called a *Calf*; of the second a *Hearse*, or a *Brocket's Sister*; of the third a *Hind*. A Hare of the first year a *Leveret*; of the second a *Hare*; of the third a *great Hare*. A Boar is named as we have already set down. A Doe in the first year is a *Fawn*; in the second a *Tegg*; in the third a *Doe*. A Fox in the first year is a *Cub*; in the second a *Fox*; afterwards an *old Fox*. A Roe in the first year is a *Kid*; in the second a *Gyrle*; in the third a *Hemuse*; in the fourth a *Roebuck of the first head*; in the fifth a *Roebuck*. For their lodging, a Hart *harboureth*, a Buck *lodgeth*, a Roe *beddeth*, a Hare *seateth* or *formeth*, a Coney *sitteth*, a Fox *kenneleth*, a Martin *treeth*, an Otter *watcheth*, a Badger *eartheth*, a Boar *coucheth*. So in dislodging we *unharbour* the Hart, *rouse* the Buck, *start* the Hare, *bolt* the Coney, *unkennel* the Fox, *tree* the Martin, *vent* the Otter, *dig* the Badger, *rear* the Boar. For their noises a Hart *belleth*, a Buck *groaneth* or *troateth*, a Roe *belloweth*, a Hare *beateth* or *tappeth*, an Otter *whineth*, a Boar *freameth*, a Fox

barketh, a Badger *shrieketh*, a Wolf *howleth*, a Goat *rattleth*. The footing of a Hart is called the *slot*, of all Fallow Deer the *view*, if on the grass and scarcely visible, the *foiling*, of a Fox the *print*, "and of other such vermin" the *footing*, of an Otter the *marks*, of a Boar the *track*. A Hare in the open field *soreth*. The tail of any Deer is called the *single*, of a Boar the *wreath*, of a Fox the *brush* or *drag*, and the tip at its ends the *chape*, of a Wolf the *stern*, of a Hare or Coney the *scut*. The droppings of Deer are *fewmets* or *fewishing*, of a Hare *crotils* or *crotising*, of a Boar *lesses*, of a Fox *billiting*, of "all other such vermin" the *fuants*, of an Otter the *spraints*. The fat of Deer is *suet*, yet you may say a Deer of *grease*, the fat of a Boar is *grease*, of a Roe *beavy grease*. A Deer is *broken up*, a Fox and a Hare *cased*. The places whereat Deer have lately passed into thickets, whereby their size may be determined, are called *entries*; a Deer which runs into the water and swims *takes to soyl*, when Hounds chase a whole herd of Deer they *run riot*; when a Hare takes the ground, which she does sometimes, she *goes to vault*, when the wet ground sticks to her feet she *carrieth*. When Hounds are set in readiness, and are cast off when the chase has passed by, before the rest come up, it is called a *vauntlay*, when after the rest have passed by, a *relay*.

"The names and diversities of Heads, according to Hunting terms.

"The thing that beareth the antlers, royals, and Head of a tops, is called the *Beam*; and the little streaks therein Deer. are called *Gutters*.

"That which is about the crust of the beam, is termed *Pearls*; and that which is about the bur itself, formed like little Pearls, is called *Pearls bigger than the rest*.

"The bur is next the Head; and that which is about the bur, is called *Pearls*. The first is called *Antlier*; the second, *Surantlier*; all the rest which grow afterwards, until you come to the crown, palm, or broche, are called *Royals* and *Sur-royals*. The little buds or broches about the top are called *Croches*.

"Their Heads go by several names: the first Head is called a *Crowned Top*, because the *Croches* are ranged in form of a crown.

"The second is called a *Palmed Top*, because the *Croches* are formed like a man's hand.

"Thirdly, all Heads which bear not above three or four, the *Croches* being placed aloft, all of one height, in form of a cluster of nuts, are to be called *Heads* of so many *Croches*.

"Fourthly, all Heads which bear two in the top, or having their *Croches* doubling, are to be called *Forked Heads*.

"Fifthly, all Heads which have double burs, or the Antliers, Royals, and *Croches* turned downwards, contrary to other Heads, are only called *Heads*."

If you are asked what a Stag bears you are only to reckon *croches*, and never to express an odd number, "as if he hath four *croches* on his near horn, and five on his far, you must say he beareth ten, a false *Right* on his near horn, for all that the Beam bears are called *Rights*."

The following was the conclusion of a Stag Hunt, which will more fully explain what we have before mentioned concerning the assay.

HUNTING

Death of the Stag.

"Directions at the death of Buck or Hart.

"The first ceremony when the Huntsmen come in to the death of a *Deer*, is to cry *Ware haunch*, that the Hounds may not break into the *Deer*; which having secured, the next is cutting his throat, and there blood-ing the youngest Hounds, that they may the better love a *Deer*, and learn to leap at his throat; then, having blown the mort, and all the company come in, the best person, that hath not taken say before, is to take up the knife that the Keeper or Huntsman is to lay cross the belly of the *Deer*, standing close to the left shoulder of the *Deer*, some holding by the fore-legs, and the person that takes say is to draw the edge of the knife leisurely along the very middle of the belly, beginning near the brisket; and drawing a little upon it, enough in length and depth to discover how fat the *Deer* is, then he that is to break up the *Deer* first slits the skin from the cutting of the throat downward, making the arber, that so the ordure may not break forth; and then he is to pounce him, rewarding the Hounds therewith. Next, he is to present the same person that took the say with a drawn hanger to cut off the head; which done, and the Hounds rewarded therewith, the concluding ceremony is, if a *Buck* a double, if a *Stag* a treble mort blown by one, and then a whole reheat in consort by all that have horns; and that finished, immediately a general *whoo whoop*.

"It was formerly termed *winde a horn*, because (as I suppose) all horns were then compassed; but since straight horns are come into fashion, we say *blow a horn*, and sometimes *sound a horn*.

"In many cases heretofore, *leasing* was observed; that is, one must be held, either cross a saddle, or on a man's back, and with a pair of Dog-couples receive ten pound and a purse; that is, ten stripes, (according to the nature of the crime, more or less severe,) and an eleventh, that used to be as bad as the other ten, called a *Purse*.

"There are many faults, as coming too late into the field, mistaking any term of Art; these are of the lesser size: of the greater magnitude, hallowing a wrong *Deer*, or leaving the field before the death of the *Deer*, &c."

Hare Hunting is described much according to its present usage. One species of Fox Hunting, in which "to say the truth there is not much pastime," is with Terriers under ground, and in order to enter the Dogs for this sport a preparation is described, the brutality of which exceeds even the tender mercies of Isaak Walton to his Frog.

"You may also enter them in this manner: take an old *Fox*, or *Badger*, and cut away the nether jaw, but meddle not with the other, leaving the upper to shew the fury of the beast, although it can do no harm therewith. Then dig an earth in some convenient place in your own grounds, and be careful to make it wide enough, to the intent that Terriers may turn therein the better, and that there may be room enough for two to enter together: then cover the hole with boards and turf, putting the *Fox* or *Badger* first therein, and afterwards put in your Terriers both young and old, encouraging them with words that are the usual terms of Art. When they have bay'd sufficiently, then begin to dig with spades and mattocks, to encourage them against such time as you are to dig over them: then take out the *Fox* or *Badger* with the clamps or pinchers, killing it before them, or let a Greyhound kill it in their

VOL. XXIII.

sight, and make them reward thereof. Here note, that instead of cutting away the jaw, it will be every whit as well to break out all his teeth, to prevent him from biting the Terriers."

The other species of Hunting here described have little in them which can interest. The account of a Boar Hunt is almost literally translated from Xenophon.

The modern practices of English Hunting, which is confined to the Stag, the Fox, and the Hare, may be learned far better from any of the express Treatises on the subject,—from Beckford's *Thoughts on Hunting* or Daniel's *Rural Sports*, or, perhaps, even from Somerville's Poem, *The Chace*,—than from the rapid and imperfect abridgement of such Works for which we could find room in our pages. The Fox chase may be considered our standard national diversion among the richer classes. The season commences as soon as the leaves are off, and ought to close with February. According to a great authority on the subject, a good Fox chase should not be less than one, nor exceed two hours in length, and as the whole art in this Sport is to keep the Hounds in blood, every advantage is to be taken of the Fox, the sole endeavour being to kill him. Scent scarcely ever lies with a North or East wind. Storms in the air seldom fail to destroy it. A warm day without Sun is the best weather, and a Southerly wind without rain, or a Westerly that is not rough, are the best winds. Sometimes scent is very good in a hard rain if the air be mild. A wet night often produces a good chase. Forty couple of Hounds will admit Hunting three times a week; for twenty-five couple in the field at a time, provided they be steady and well matched in speed, are quite enough for any Fox. In entering a cover the Huntsman should draw up the wind and quietly. The favourite covers are such as lie high and dry, and thick at bottom, out of the wind, and on sunny sides of hills. In order to kill it is not necessary that the Hounds should ever have sight of the Fox till just before the death. In Hare Hunting twenty couple at a time are enough in the field.

Jurisconsults have largely perplexed themselves and others by Tracts on the Laws of Hunting. There is a goodly quarto, published at Spires in 1605, containing three Tracts *clarissimorum virorum*, Frederici Pruckmanni, Sebastiani Medices Florentini, and Georgii Mor, on this subject, in which, among other questions, the following are discussed: *Quid sit venatio et quotuplex?* *Utrum venatio liceat Clericis?* Under the second of these questions it is argued, that Clerks are not allowed to breed Dogs; that they may certainly fish, because Fishing is a quieter amusement than Hunting; that Hunting is too expensive a pastime; that venison is luxurious diet; that Hunting is more cruel, dangerous, and indecorous than Fishing; that we find no instance of a Saint being a Huntsman, although the Apostles were Fishermen; and the sum is, that any Hunting which is *oppressiva*, injurious to men,—*adulatoria*, a class which we do not comprehend,—or *arenaria*, amphitheatrical, is forbidden to Clerks. Hunting accompanied with noise may be used by them, but not often, so as it be entered upon not for pleasure, but for recreation or the sake of health, particularly *excitandi appetitum*. Clerks are not forbidden to use nets and gins, provided they indulge in them temperately. (S. Medices, 9. viii.) Another question arises whether tithes of game ought to be paid, which is decided affirmatively where it is the custom, negatively where not so. These three Tracts are reprinted, with many

Entering Terriers for Fox Hunting.

HUNTING

Modern Fox Hunting.

Laws respecting Hunting.

Clerical Hunting.

HUNTING
—
HUN-
TINGDON-
SHIRE.

others of like value, in the *Corpus Juris Venatorio-
Forestalis Romano-Germanici* of Fritschius, 2 vols.
fol. Lipsiæ, 1702. The question relative to Clerical
Hunting was much agitated in England in times long
before the Treatises above noticed were written. The
immoderate pursuit of this diversion had become a sub-
ject of great scandal even in the days of Chaucer. His
Canterbury Tales are pregnant with satirical allusions
to this abuse. His Monk is described to be,

An outrider, that loved Venery;
A manly man, to ben an abbot able,
Many a dainty horse had he in stable.

He gave not of the text a pullid hen
That saith that Hunters be not holy men.

Therefore he was a Prikasoure (a hard rider) aright;
Greiounds he had as swift as foule of flight;
Of pricking, and of Hunting for the Hare
Was all his lust, for no cost would he spare.

Prologue, v. 165, &c.

And again in the *Plowman's Tale* we read of the Monk,

He is as proude as Prince in pall,
In mete and drinke and in all thing,
Some werin a miter and ring,

With double worsted well idight,
With roiall mete and richè drinke,
And ride on courser as a Knight.

With Haukis and with Houndis eke,
With broche or ouchis on his hode,
Some saie no masse in all a weke,
Of deinties is ther mostè fode.

(2941.)

The Statute 13 Richard II. c. 13, which forbade any, unless privileged persons, from keeping sporting Dogs, under the penalty of a year's imprisonment, did not affect the dignified Clergy; for such Clerks as possessed £10 revenue per annum or upwards were excluded from its penal operation. Henry II., however, when offended with his Clergy, rigidly enforced the Canon Law, which forbade them from Hunting, and in 1157 obtained permission from the Pope to cite Clerks so offending before his Secular Judges. On this point the reader may consult Sir Henry Spelman's *Large Answer to the Short Apology for Archbishop Abbot touching the death of Peter Hawkins*. The general heads of the Laws affecting Hunting have already been noticed under GAME LAWS.

HUNTING
—
HUN-
TINGDON-
SHIRE.

Extent.

HUNTINGDONSHIRE, an inland County of Eng-
land, bounded from South to North-East by Cambridge-
shire, on the North-West by Northamptonshire, and
on the South-West by Bedfordshire. It is nearly
lozenge-shaped, the length of the longest diagonal from
North to South being 33 miles, and the breadth from
West to East 23. The circumference, following its
winding, is about 100 miles, and the area of the County,
calculated from Arrowsmith's Map, about 240,000
acres.

Forest.

The ancient name of the County, *Huntedune*, had
its origin in the quantity of Deer and other game that
frequented the fens. Camden relates a tradition, that
it was once covered with woods, and says, that it re-
mained a forest "till Henry the Second in the beginning
of his reign disforested the whole, as set forth by an old
perambulation, except Waybridge, Sapple, and Herthei,
which were the Lord's woods and remain forest." Sir
Robert Cotton says this County was not completely
disafforested till Edward the First's time, when, in his
twenty-ninth year, that Sovereign confirmed the charter
of Henry III., and left no more forest than his own
demesne. From a grant of the tithes of all game
taken in the County, made by Richard III., to the
Abbey of Peterborough, it may be concluded that the
quantity of game frequenting the County was consider-
able in his time. At present a large proportion of the
high lands is unenclosed; the timber, however, is thin,
owing to the great demand for it in the Fens. The
character of an ancient forest nevertheless still remains,
and the look of the country is agreeable.

Rivers.

The only rivers of any consequence in Huntingdon-
shire are the Ouse and the Nen. The former of these,
called generally the Lesser Ouse, to distinguish it from
another river of the same name in Yorkshire, enters the
County from Bedfordshire between St. Neots and Little
Paxton, collecting many little streams from Northamp-
tonshire, while it runs North to Huntingdon. From
that town it pursues an Easterly course, and after form-
ing for some distance the boundary between Cambridge-
shire and this County, runs into the great level of the

Fens not far from Erith. The Ouse has frequently over-
flowed its bank, and laid the adjacent country under
water. It is navigable in its whole course through this
County. The Nen flows from Northamptonshire, pur-
sues a devious course by Elton, Wandsford, and Peter-
borough, and, entering the Fens, winds slowly to the sea.

The Fens of Huntingdonshire form a fifth of the whole County, and about a seventh part of what is called the Great Bedford Level. They are situated on the North-East side, adjoining the Isle of Ely. There are also about 5000 acres of what is called *skirty* land. Of the Fen lands, at least a quarter is productive, yielding good wheat, oats, and barley; but the great expense requisite to drain them very much diminishes their value. When the draining of the Fens was first undertaken, the outfall to the sea was not sufficiently attended to, and, in consequence, to obviate the inconveniences arising from the slowness of the rivers, it was found necessary to raise their banks, and to employ machinery to force the water from the low lands into their channels. Thus the original neglect of a sufficient outlet for the waters, has risen to a system of internal reservoirs and the use of expensive machinery.

On the banks of the Ouse are some of the finest meadows in England, though the produce is sometimes damaged or carried away by sudden floods. The *skirty* lands bordering on the Fens are chiefly rich pasture. In the Northern parts of the County, where the best of these are situated, great quantities of cattle are fattened for the London market; no particular breed is chosen, but the supply is chiefly derived from Derbyshire and Leicestershire. The chief cattle market is at St. Ives, and is said by the people of that country to be inferior only to the market at Smithfield. Stilton, near Whittlesea Mere, is well known for its excellent cheese, resembling that of Lodi, the famed Parmesan. The honour of priority in making this cheese is contended by Leicestershire. As the Fens offer great advantages for rearing colts, the fen farmers employ only mares in the labours of agriculture, breeding from them as often as they can, and selling the colts at two years old.

Pastures
and mear-
dows.

The Fens.

HUN-
TINGDON-
SHIRE.

Highlands.

The soil of the high land in this County is loam, mixed, more or less, with limestone, gravel, or else a strong deep clay, inclining to loam. Agriculture in this County has nothing in it peculiar. As a large portion of the land is still unenclosed, the particular occupiers are obliged to adopt whatever system of cropping is adopted by the parish in general. The farms on these unenclosed lands are also too small to exhibit an exemplary cultivation, and are held in most cases by yearly tenants. The rich lands about Godmanchester, nevertheless, which are still occupied by wealthy farmers, once stood preeminent in cultivation. "There is no place in England," says Camden, "that has so many stout hinds, or that employs more ploughs, for they make their boast of having formerly received the Kings of England in their progress this way with ninescore ploughs, brought forth in a rustical kind of pomp in a gallant show. Indeed there be none of our nation that apply themselves more seriously to a rustic profession, whether we have respect to their skill therein, to their ability, or to their willing mind withall to take the pains." The ploughmen of the Fens are still among the most expert in the Kingdom, never employing a driver, but working rapidly and evenly, while they guide at the same time three mares abreast. Mustard is a favourite object of culture on the richest soils; the crop is kept clean from weeds by sheep, which will not touch the mustard, and produces from 30 to 45 bushels an acre.

Meres.

In the Fens on the North-East side of the County are several large lakes, or *Meres*, as Whittlesea Mere, Ramsey Mere, Ugg Mere, Benwick Mere, &c. The first of these is by far the largest, and was formerly six miles long, with three in breadth; it is at the present day, however, much reduced, not covering more perhaps than 2000 acres. It is much resorted to in summer for the amusements of fishing and sailing. Ramsey Mere has the reputation of nourishing larger fish, and in greater quantities, than any other of these lakes. Pike and eels are caught here in abundance. These Meres formerly communicated with one another by navigable channels; they have been, however, all diminished by the draining of the Level, and the scheme of draining th completely is thought not to be impracticable.

Climate.

There is no manufacture of any importance in this County. The spinning of woollen yarn employs the women during the winter season, but in summer they return to their occupations in the fields. The climate towards the Southern part is warm and healthy; in the neighbourhood of the Fens fevers are more common, yet the air is not so unwholesome as the marshy aspect of the country might give reason to expect.

Title.

The Earldom of Huntingdon was for a long time held by the Kings of Scotland, with most of the lands in the County, David I. having married, in 1108, the Countess Maud. The Scottish Kings did homage to the Kings of England for these estates, till, in 1337, Edward III. seized the Earldom, and conferred it on William Clinton. It was afterwards bestowed by Henry VIII. on George Hastings, son to the Lord Hastings beheaded by the Duke of Gloucester, and in his family it continued till 1789, when it became extinct. Few old families remain in this County, which suffered more during the Republican Civil Wars than any other part of the Kingdom.

Divisions.

Huntingdonshire is divided into four Hundreds, viz. Norman Cross, Leightonstone, Toseland, and Hursting-

stone. It is in the diocese of Lincoln, and contains 104 parishes. In Civil administration it is united to Cambridgeshire, there being but one High Sheriff for both, who is elected in turn from Cambridgeshire, the Isle of Ely, and Huntingdonshire. This County returns only four Members to Parliament, viz. two for the Shire, and two for the Town of Huntingdon.

The population of the County, in 1821, amounted to 48,771, being an increase of 6563 since 1811. Of the 10,397 families composing the whole population, 6435 were employed in agriculture, and 2937 in trade or handicraft.

Huntingdon, in Domesday Book *Huntedone*, on its own common seal *Huntersdune*, the hill or down of Hunters, (Baker's MSS. vol. xxxviii.) the County Town, stands on a gentle rising ground on the Northern bank of the Ouse, which is crossed by a handsome stone bridge of six arches to the adjoining village of *Godmanchester*, supposed to be the *Duroloponde* of Antoninus. The Castle of Huntingdon was of unknown antiquity. According to Camden, it was built *anew* by Edward the Elder in the early part of the Xth century; nothing is now left but a few traces of the walls which enclosed an area of many acres. The remains of four Religious Houses, a Priory of Austin Canons, two Hospitals, and a Friary, are nearly as much obliterated. The town is said once to have contained fifteen Churches, of these only two now remain, St. Mary's, built in the reign of James I., and All Saints, probably erected in that of Henry VII.; but a division into four Parishes is still preserved; that of St. John being united with All Saints, and St. Benet's with St. Mary's. The Market Place is spacious, and contains a Town Hall, laid out below in Civil and Criminal Courts, in which the Assizes are held, and above is a handsome Assembly Room. The town consists of one main street, nearly a mile in length, with numerous lanes issuing from it at right angles: it is clean and neatly built. The Ouse is navigable for barges, and the town is supplied by water-carriage from Lynn. Huntingdon is a borough, and returns two Members to Parliament. Population, in 1821, 2806. Distant from London 58½ miles North, from Cambridge 16 North-West. It has little claim to Historical distinction, unless as the birth-place of Oliver Cromwell. *Godmanchester*, as we have stated above, stands on the South bank of the Ouse, opposite to Huntingdon. The Church is a handsome pointed edifice, and numerous Roman antiquities have been found in the neighbourhood. James I. incorporated the town, but it never returned Members to Parliament. Population, in 1821, 1953. *Hinchingbrook*, a seat of the Earls of Sandwich, is situated about half a mile to the West of Huntingdon, on the site of a Benedictine Nunnery, built by William the Conqueror. It was granted by Henry VIII. to the family of Cromwell, by one of which race, Sir Oliver, the uncle of the Protector, James I. was magnificently entertained here in 1603. Sir Oliver was a staunch Cavalier during the troubles of the Great Rebellion, and even before the Civil War broke out, he had been compelled by the expenses of his profuse loyalty to alienate his estate of *Hinchingbrook* to the ancestor of the present noble owner. The mansion is a large irregular building, partly of brick, and with little pretensions to architectural arrangement or decoration. Charles I. lodged in it for three days after he had been carried off from Holmby.

Buckden is a small village, 5 miles South from Hunting-

chester.Hinching
brook.

Buckden.

HUN-
TINGDON-
SHIRE.

don, 60 $\frac{3}{4}$ North from London, principally distinguished by a Palace of the Bishops of Lincoln, many of whom are buried in the Parish Church. The Manor has been in the possession of the See of Lincoln since the reign of Henry I. The Palace for the most part is built of brick, and consists of two quadrangles. Population of the village, in 1821, 392.

St. Ives.

St. Ives is a small but pleasant Market Town on the banks of the Ouse, known in Domesday Book by the name of *Slepe*. Its later appellation is traced to *St. Ivo*, a Persian Bishop, reputed to have preached in England during the VIIth century, and the discovery of whose body is related in the *Chronicle of Ramsey*, (clxviii.) to which we shall presently refer more fully. Some remains of a Priory, built upon the spot in which the body of that early missionary was found, are still to be seen. The Church is a handsome pointed building, with a tower and spire. The town is clean and well-built, and the river Ouse is passed by a stone bridge of six arches, four of pointed architecture, two semicircular, rebuilt in 1716; near the centre arch is a small building, probably intended for a Chapel, but in the upper part (much damaged by a calamitous fire which in the year 1689 destroyed the greater part of the town) traditionally said to have been used as a Lighthouse for the navigation of the Ouse. Population, in 1821, 2777. Distant 59 $\frac{1}{4}$ miles from London.

Kimbolton.

Kimbolton is a Market Town, 64 miles North from London, 6 $\frac{1}{2}$ East from Higham Ferrars. Population, in 1821, 1502. It is remarkable only for the adjoining seat of the Dukes of Manchester, which was the retreat of Katharine of Arragon when unqueened.

St. Neots.

St. Neots is a considerable Market Town on the bank of the Ouse, connected with the adjoining village of *Eynesbury* by a handsome stone bridge. The Patron Saint from whom it derives its name is a personage of very uncertain history; but he is probably the same as him of like name in Cornwall. The Church of *St. Neots* is a very beautiful specimen of the style of Henry VII.'s time. The market place is spacious, and the town well built and agreeable. Population, in 1821, 2272. Distant 20 miles South by West from Huntingdon, 56 North North-West from London. Population of *Eynesbury* 903.

Ramsey

Ramsey, a Market Town surrounded by fens, was once distinguished for its rich Benedictine Abbey. A curious MS. History of this foundation has been published by Gale, and will be met with in his *Hist. Brit. &c. Script.* i. 385. *Historia Ramesiensis sive Liber de fundatione et Benefactoribus Cœnobii Ramesiensis ex Cod. MS. qui servatur in Regio Scaccario Westmonasterii a parte Remeratoris, Anno 1589.* The anonymous writer is supposed to have lived in the reign of Henry I. The town is situated on a tract of firm land, surrounded by the Ouse, extending about two miles in length, and somewhat less in breadth. Its name is traced variously, by some to *Rams eie*, i. e. island, from a Ram which was traditionally reported to have found his way to this spot, either during a hard frost or a summer drought, and, being unable to return, there to have fixed his abode contentedly like a hermit. By others it is deduced a *ramis*, from the trees with which it abounded; and by a third party of Etymologists, more mystically inclined, to *Ramesse*, the first city in which the Israelites halted during their Exodus. *Ramesse*, moreover, signifies thunder, and the pious men who dwelt in Ramsey Abbey were deterred from sin by the thunder of psalm-

ody. Be this as it may, the Abbey is supposed to have been founded about the year 970, and its site, which now is better adapted to eels and wild fowl than to human kind, is described by the holy Oswald, who inspected it with Aylwin the founder, to determine upon its fitness, in the following glowing terms, *Hic est alter Elysium viris summo Paradiso destinatis ab æterno provisus.* (c. xix.) Of this once magnificent structure, in which Letters were diligently cultivated, and which was renowned for the treasures of its Library, especially those in the Hebrew tongue, little at present can be traced but a ruined gateway, and this from its florid style comparatively of recent date. The Abbey stood at the upper end of the town towards the South at a short distance from the present Church, the tower of which was raised, in 1671, from fragments of the elder building. It is the burial place of Sir Oliver Cromwell, who retired to Bodsay House near this town, after he had been compelled to dispose of Hinchinbrook. Ramsey principally consists of one long street, with a second branching Northward along the bank of the river from the bridge. Distant from London 68 $\frac{1}{2}$ miles, from Huntingdon 11 North North-East. Population, in 1821, 2814.

SHIRE.
—
HURDLE.

Stilton, a village which, as we have already stated, has attained great celebrity for its cheese, is 71 miles North from London, and 6 from Peterborough. It stands on the Roman Ermine Street. At *Norman Cross* within this Parish, during the war of the Revolution, was the chief inland depot for the reception of French prisoners of war. Population, in 1821, 710.

Stone, *General View of Huntingdonshire*, 1794; Maxwell, *General View of the Agriculture of Huntingdonshire*, 1793.

HUR, v. See the Example.

R is the dog's letter, and *hur-reth* in the sound; the tongue striking the inner palate, with a trembling about the teeth.

Ben Jonson. *The English Grammar.*

HURA, in *Botany*, a genus of the class *Monoecia*, order *Monadelphia*, natural order *Euphorbiæ*. Generic character: male flower, an imbricated catkin; calyx truncated; filaments cylindrical, the apex peltate; anthers numerous, in pairs: female flower, style funnel-shaped; stigma large, twelve to eighteen rays; capsule woody, twelve to eighteen celled.

One species, *H. crepitans*, the sand box tree, native of central America: the singularly formed seed-vessel has the property of bursting with a loud noise, and scattering the seeds with considerable force, even after having been kept for several years.

HURDLE, n. } D. *horde*; Ger. *hurd*. Wachter
HURDLED. } derives from *hirt-en*, *servare*, *custodire*, to keep or guard. And Tooke considers it to be the past participle of the A. S. *hyrd-an*, to guard or keep.

A kind of fence wrought or wreathed of osiers or small sticks.

Used also for the conveyance of criminals. See the Quotations from Fabian, Evelyn, and Blackstone.

And þer myd her owe honde hii rerde hem verst anchyrche
Of *herdles*, and of *gerden*, as hii couþe wurchen.

R. Gloucester, p. 232.

Wherefore immedyatly he was spoyled of his armour, & layde vpon an *hardyll*, so drawn to Tyborne and there hanged.

Fabian. *Chronicle*, Anno 1408.

As when a prowling wolfe,
Whom hunger drives to seek new haunt for prey,
Watching where shepherds pen their flocks at eve

HURDLE.

In *hurdled* cotes amid the field secure,
Leaps o're the fence with ease into the fold.

Milton. *Paradise Lost*, book iv. l. 186.

HURDY-GURDY.

And when the *hurdle-fences* of oysiers went confidently forward, and were at hand to touch the walls, then there fell from above great pipes and barrels, milstones, and pieces of broken pillars, with the exceeding weight whereof the fighting men below were overwhelmed.

Holland. *Ammianus*, fol. 160. *Constantius and Julianus*.

I saw not their [certain of the regicides] execution, but met their quarters mangl'd and cutt and reeking as they were brought in baskets on the *hurdle*.

Evelyn. *Memoirs*, vol. i. October, 1660.

Alas, how chang'd the scene! when there I pitch'd
Those *hurdled* cotes, the night was calm and mild,
And all was peaceful.

Warton. *Eclogue* 5.

Usually (by connivance, at length ripened by humanity into law,) a sledge *hurdle* is allowed to preserve the offender from the extreme torment of being dragged on the ground or pavement.

Blackstone. *Commentaries*, book iv. ch. vi.

HURDS, "A. S. *heord-as*, *stupæ*, *tow-hards*, the refuse of flax or hemp; that which is beaten out from either in the dressing." Somner. Dutch, *heerde*, *herde*. *Fibra lini*. Kilian.

He set the citie of Rome on fire so apparently, that many citizens of consuls degree, taking his chamberlaines in the maner with matches, touchwood and *hurds* (*stupa tædaque*) in their messuages (within the citie) would not once lay hand on them but let them alone.

Holland. *Suetonius*, fol. 192. *Nero Claudius Cæsar*.

HURDY-GURDY, a name given to a musical instrument; for the derivation of which it would be very idle to inquire, and concerning which we may be content with a favourite and very useful resource of Etymologists when hard pressed; probably a *sono confictum*. Burney, *Hist. of Music*, (ii. 373.) says, that it is the *Rote* of Chaucer, the *Lyra Mendicorum* of which Kircher gives the following high praise. *Quamvis instrumentum sit tritum et vulgare, et mendicis passim in usu, est tamen structurâ, et chordarum, quas binas aut quaternas habet, sectione, mirum quantum ingeniosum; omnem harmoniæ varietatem exhibit; constat præterea plectris et palmulis suis, ex quorum pressione chordæ tactæ quam volueris modulationem facile exhibueris, rotæ circumductione terentis chordas et in sonum incitantis. Verbo nihil aliud est quam monochordum vel dychorium, variâ sectione plectorum in harmoniam excitatum.* (*Musurgia Universalis*, VI. vol. i. p. 487.) Burney continues that it is the *Vielle* of the French; and, again, that it took the name *Rote* from *rota*, the wheel, by which its tones are produced. (270.) Spelman explains *Rote* to be a musical instrument used in Wales; whereon Urrey, in his Glossary to Chaucer, very justly remarks, that he probably mistook it for a *Crota* or *Crowd*. Archdeacon Nares gives a reference to Spenser, *Faerie Queene*, iv. 9. 6. for *Rote*; and says, that our early Poets appear to have used it for any musical instrument, though it is "properly that which is now called a *cymbal*, or more vulgarly a *Hurdy-gurdy*." With the *Cymbal*, according to Greek, Latin, and English usage of the word, the *Hurdy-gurdy* cannot in any way be connected. Burney (xi. 344.) says, that the modern Italians call a Harpsichord *Cembalo*. Whence they obtained this corruption it is not easy to determine; for, as the same writer has noticed, Boccaccio uses *Ciembalo* for some other musical instrument, (probably a tambourine,) long before the invention of the Harpsichord. At the close of the fifth *Giornata*, Dioneo, a somewhat rakish gentleman, if we may judge from the titles of the songs which he proposes, to the great amusement of the ladies, *che tutte cominciarono a ridere, e massimamente la Reina*, excuses

himself from singing them, because he has not a *HURDY GURDY*. *Ciembalo*.

Ducange says *Rocta* was used as well as *Rota*; but he appears to confound *Vielle* with *Violon*, both of which he gives as synonymous to *Vitula* or *Vidula*. Cotgrave classes it in its fit degree—" *Vielle*, a rude or harsh-sounding instrument of musicke usually played on by base fiddlers and blind men." Roquefort (*Gloss. de la Langue Rom. ad v.*) says the *Viele* was a Violin, and that the modern *Vielle* was always called *Rote* by the Romancers, although the two words are now perpetually confounded.

HURL, v. } Or *whirl*, q. v. D. *weruelen*; Ger.
HURL, n. } *werben*; A. S. *wærl-an*, *ymb-wærl-an*,
HURLER, } *circumire, convertere se*; to go around,
HURLBAT. } to turn itself round, to move, to throw with a revolving or rotatory motion. See HURTLER.

To throw or cast, to dash; to throw or cast with force or violence; to roll or rush along.

Hurl, the noun, Revolution; consequentially, stir, tumult, or commotion.

King Richard this noble knizt Acres nom so,
& *harlede* so the Sarazins, in eche side aboute,
That the ssrewen ne dorste in non ende at route.

R. Gloucester, p. 487.

Hii *harl-de* him out of church, that lute pite adde,
& is god nome vaste inou, & to Erdesleye him ladde.

Id. p. 537.

And whanne gret flood was maad the flood was *hurlid* (*illisum est flumen*) to that hous; and it myghte not move it, for it was foundid on a sad stoon.

Wiclif. *Luke*, ch. vi.

And in this season also, called the *hurlyng* time, the commons of Norfolk & Suffolke came vnto y^e abbey of Bury, and there slew one of y^e kyngys iustycis, called John Caundysse, & the pryor of y^e place w^t other, & after spoyld and bare away moche thyng out of y^t sayde place.

Fabyan, Anno 1381.

At last, the golden oriental gate

Of greatest heauen gan to open faire,
And Phœbus fresh, as bridegroom to his mate,
Came dauncing forth, shaking his deawie haire:
And *hurles* his glistring beames through gloomy aire.

Spenser. *Faerie Queene*, book i. can. 5.

After this *hurle* the king was faine to flee

Northward in post, for succour and releefe.

Mirror for Magazines, fol. 358. Edmund Duke of Somerset.

And yet this cunning Shimei, a *hurler* of stones, as well as a railer, wants not the face instantly to make as though he despair'd of victory unless a modest defence would get it him.

Milton. *Apology for Smectymnus*.

The *hurlers*. These are stones competently distanced, whom tradition reporteth to be formerly men metamorphosed into stones, for *hurling* (a sport peculiar to Cornwall) on, and so profaning, the Lord's Day.

Fuller. *Worthies*. Cornwall.

The sign of its (the dæmon of Tedworth's) approach was an *hurling* in the air over the house.

Glanvil. *On Witchcraft*.

This god of ours hath evermore loved those games of prize, yea, and was desirous to win the victory, having strove personally himselfe in playing upon the harpe, in singing, and flinging the coit of brasse; yea, and as some say, at *hurl-bats* and fist-fight.

Holland. *Plutarch*, fol. 633.

As from a hanging rock's tremendous height,
The sable crows with intercepted flight
Drop headlong; scarr'd and black with sulphurous hue.
So from the deck are *hurl'd* the ghastly crew.

Pope. *Homer*. *Odyssey*, book xiv.

On every side wide gaping engines wait
Teeming with fire, and big with certain fate;
Ready to *hurl* destruction from above.—
(Behold) mountain on mountain thrown
With threatening *hurl*, that shook the aerial firmament.

Congreve. *On the taking of Namur*.

HURL

HURLING

Distressed Nature pants,
The very streams look languid from afar;
Or through th' unshelter'd glade, impatient seem
To hurl into the covert of the grove.

Thomas. Sumner.

And what unbroken seem'd the storm to heave,
The miller hew'd and hurl'd into the wave.

Hosie. Orlando Furioso, book xix. v. 317.

The *HURLERS*, mentioned in the citation from Fuller above, are three contiguous circles of upright stones in the neighbourhood of the village of St. Cleer, in Cornwall. The stones are from three to five feet in height, the circles are not of equal diameters, that in the middle being larger than the two others: their centres are in the same straight line. They are probably connected with Druidical worship, though tradition assigns them to the origin recorded by Fuller.

The game of *HURLING* mentioned in the same extract is a very severe exercise. A full account of it, which we shall transcribe below, is given by Carew in his *Survey of Cornwall* (74.) The object of the players, who are from 40 to 60 on each side, is to endeavour to obtain a ball which has been dealt or thrown by the adverse party, and carry it to its own goal, generally about 100 yards distant from those of the opponents, and each being guarded by two of the choicest players.

This Game, *Hurling to Goals*, is played in the East parts of Cornwall, another, *Hurling to the Country*, in the West. In the first, "Hee that is once possessed of the ball hath his contrary mate waiting at inches, and assaying to lay hold upon him. The other thrusteth him in the brest with his closed fist to keep him off, which they call *butting*, and place in weldoing the same no small poynt of manhood. If hee escape the first another taketh him in hand, and so a third; neyther is hee left until having met (as the Frenchman sayes) *chausseura son pied*,* hee eyther touch the ground with some part of his bodie in wrastling, or cry, *Hold*, which is the word of yeelding." He then throws the ball to one of his mates, who having the same contest to encounter, it is "a very disadvantageable match, or extraordinary accident, that leeseth many goales; howbeit, that side carryeth away best reputation which giveth most falls in the *Hurling*, keepeth the ball longest, and presseth his contrary neerest to their own goale."

The rules of the Game are given as below. "The *Hurlers* are bound to the observation of many lawes, as that they must *Hurle* man to man, and not two set upon one man at once; that the *Hurler* against the ball must not *but*, nor hand-fast under girdle; that hee who hath the ball must *but* only in the other's brest; that he must deal no *Fore-ball*, viz. he may not throw it to any of his mates standing neerer the goale then himselfe. Lastly, in dealing the ball, if any of the other part can catch it flying between, or e're the other have it fast, he thereby winneth the same to his side, which straightway of defendant becometh assailant, as the other of assailant falls to be defendant. The least breach of their lawes the *Hurlers* take a just cause of going together by eares, but with their fists onely; neither doth any among them seek revêge for such wrongs or hurts, but at the like play againe. These *Hurling* matches are mostly used at weddings, when commonly the ghests undertake to encounter all commers."

* The French have a proverbial expression, *trouver chaussure à son point, or pied*, to meet with one's match, which Carew may have transcribed into the above.

The second mode of playing this game, which Carew *HURLING* describes, is a far more boisterous amusement. "The *Hurling to the Country* is more diffuse and confuse, as bound to few of these orders. Some two or more gentlemen doe commonly make this match, appointing that on such a holyday they will bring to such an indifferent place two, three, or more *Parishes* of the East or South quarter to *Hurle* against so many other of the West or North. Their goales are either those gentlemen's houses, or some townes or villages three or foure miles asunder, of which either side maketh choice, after the neernesse to their dwellings. When they meet there is neither compayring of numbers, nor matching of men; but a silver ball is cast up, and that company which can catch and carry it by force or sleight to their place assigned, gaineth the ball and the victory. Who-soever getteth seizure of this ball, findeth himselfe generally pursued by the adverse party; neither will they leave till (without all respects) he be layd flat on God's deare earth; which fall once received disableth him from any longer detayning the ball; hee therefore throweth the same (with like hazard of intercepting as in the other *Hurling*) to some one of his fellowes fardest before him, who maketh away withall in like maner. Such as see where the ball is played give notice therof to their mates, crying, 'Ware East,' 'Ware West,' &c. as the same is carried.

"The *Hurlers* take their next way over hilles, dales, hedges, ditches, yea, and thorow bushes, briars, mire, plashes, and rivers whatsoever; so as you shall sometimes see 20 or 30 lie tugging together in the water, scräbling and scratching for the ball. A play (verily) both rude and rough, and yet such as is not destitute of policies, in some sort resembling the feats of warre; for you shall have companies layd out before, on the one side to encounter them that come with the ball, and of the other party to succor them in maner of a forward. Againe, other troops lye hovering on the sides, like wings, to helpe or stop their escape; and where the ball it selfe goeth, it resembleth the joyning of the two mayne battles: the slowest footed who come lagge, supply the shoue of a rere-ward: yea, there are horsemen placed also on either party, (as it were in ambush,) and ready to ride away with the ball, if they can catch it at advantage. But they may not so steale the palme, for gallop any one of them never so fast, yet he shall be surely met at some hedge, corner, crosse-lane, bridge, or deepe water, which (by casting the countrie) they know he must needs touch at: and if his good fortune gard him not the better, hee is like to pay the price of his theft, with his owne and his horse's overthrowe to the ground. Sometimes the whole company runneth with the ball, seven or eight miles out of the direct way which they should keepe. Scmetimes a foote-man getting it by stealth, the better to scape unespied, will carry the same quite backwards, and so at last get to the goale by a windlace; which once knowne to be wonne, all that side flocke thither with great jolity: and if the same be a gentleman's house, they give him the ball for a trophee, and the drinking out of his beere to boot."

"The ball in this play may bee compared to an infernall spirit; for whosoever catcheth it, fareth straightwayes like a madde man, struggling and fighting with those that goe about to holde him; and no sooner is the ball gone from him, but he resigneth this fury to the next receyver, and himselfe becommeth peaceable

HURLING as before. I cannot well resolve whether I shall more commend this game for the manhood and exercise, or condemn it for the boisterousnes and harmes which it begetteth: for, as on the one side it makes their bodies strong, hard, and nimble, and puts a courage into their hearts to meete an enemy in the face; so on the other part it is accompanied with many dangers, some of which do ever fall to the players' share. For prooffe whereof, when the Hurling is ended, you shall see them retyring home, as from a pitched battaile, with bloody pates, bones broken, and out of joynt, and such bruises as serve to shortē their daies: yet al is good play, and never Attourney nor Crouner troubled for the matter."

HURRI-
CANE.

HU'RLY, } Much has been written upon
HU'RLY-BURLY, } these words. See the Commen-
HU'RLY-BURLIED. } tators on the passages quoted
from Shakspeare, and Chalmers's *Glossary to Lindsay*,
p. 372.

Hurly, Skinner thinks, may be from to *whirl*: it is probably no other than *hurl*, in its consequential usage of stir, commotion, tumult, and *burly*, (*q. v.*) big and boisterous. The Editor of *Menage* considers the French *hurlubrelu*, to be formed from the sound. He interprets it, *brusquement, inconsiderément*; rashly, inconsiderately.

A great stir or commotion; a boisterous tumult or confusion.

So shal these terrible commocions & *hurly burly* foreshew the ende of the worlde, which *hurley burley* man's self dooeth procure vnto himself, by reason y^t he is infected with inordinate lustes & affections.
Udall. Luke, ch. xxi.

And to thintent the easlyer to bleare his enemyes eyes with suspiciō of fearefulness, he bade that they should remoue with more noise and *hurly burly*, than the custome of the Romanes was to do.

Arthur Goldyng. Cæsar. Commentaries, book vi. fol. 50.

In allegyng Daud, I approue a doetryne and no dyffynicyon, the gronde of a vow after the sacred scriptures, and not the name of it, as it hath bene *hurly burlyed* in Antichristes kyngdom.

Bale. Apology, fol. 48.

That with the *hurley*, Death itselfe awakes.

Shakspeare. Henry IV. Second Part, fol. 85.

Thereof great *hurly burly* moued was

Throughout the hall for that same warlike horse.

Spenser. Faerie Queene, book v. can. 3.

But euerie where else the commons kept such like *stur*, so that it was rightly called the *hurling* time, there were such *hurlye burlies* kept in euerie place, to the great danger of ouerthrowing the whole state of all good gouernment in this land.

Holinshed. Richard II. Anno 1381.

The king and council used also other means to break and disperse these *hurly-burlies*.

Strype. Memorials. Edward III. Anno 1549.

Then what a *hurly-burly*; what a crowding; wnat a glare of a thousand flambeaus in a square.

Burke. Works, vol. ix. p. 116. *On a Regicide Peace*, let. 4.

HU'RRICANE, } Sp. *hurricane*; Fr. *ouragan*.

HURRICANO. } A word which the French Ety-
mologists suppose to have been picked up by the voyagers to the West Indies, and signifying, in the language of the Islanders, the four winds blowing at the same time, the one against the other. And see the Quotation from Dampier.

And there are other winds, especially from the west, which will blow sometimes two or three days upon one point, so as to drive a ship before them 150 leagues, or 450 English miles in that time: and *hurricanes* themselves move, at least sometimes in a direct line.

Grew. Cosmo Sacra, book i. ch. ii. sec. 24.

———— I am possess'd

With whirlwinds, and each guilty thought to me is
A dreadful *hurricane*.

Massinger. The Unnatural Combat, act v. sc. 2.

And down the show'r impetuously doth fall,
Like that which men the *hurricane* call;
As the grand deluge had been come again,
And all the world should perish by the rain.

Drayton. The Moon-Calf.

I shall speak next of *hurricanes*. These are violent storms, raging chiefly among the Carribbee islands; though by relation, Jamaica has of late been much annoyed by them. They are expected in July, August, or September.

Dampier. Voyages, vol. ii. part ii. ch. vi.

Yet not vext Ætna's pillar'd flames that strike
The stars; nor molten mountains hurl'd on high;
Nor pond'rous rapid deluges, that burn
Its deeply-channel'd sides, cause such dismay,
Such desolation, *hurricane*, as those.

Grainger. The Sugar Cane, book ii. l. 284.

HU'RRY, *v.*

HU'RRY, *n.*

HU'RRIER,

HU'RRY-SKURRY.

Sw. *hurra*; Ger. *horen, agere*,
agitare, circumagere, from the
A. S. *herg-ian*. See **HARRY** and
HARASS.

To move along, drive along; hastily, quickly, without stop or stay: and *hurry*, the noun, haste, or hasty motion, commotion, tumult.

Hurry-skurry; to *hurry* about separately, different ways. *Skurry*, from A. S. *scyr-an*, to cut, to separate.

From beds of raging fire to starve in ice
Their soft ethereal warmth, and there to pine
Immovable, infixt, and frozen round,
Periods of time, thence *hurried* back to fire.

Milton. Paradise Lost, book ii. l. 603.

Our Saviour meek and with untroubld mind
After his aery jaunt, though *hurried* sore,
Hungry and cold betook him to his rest.

Id. Paradise Regained, book iv. l. 399.

Embassadors now had audience, which were deferred for a long time; justice was administred, the ships were lauched, and things were in a *hurry* for the preparation.

Usher. Annals. Anno Mundi 3965.

But the tumult still increased, and the multitude was all up on a *hurry*. (*concita turba*.)

Holland. Livius, p. 1003.

A cruell tumult they stir'd up, and such, as should Mars see't,
(That horrid *hurrier* of men,) or she that betters him,
Minerva never so incenst; they could not disesteeme.

Chapman. Homer. Iliad, book xvii. fol. 244.

Thy crowded ports,
Where rising masts an endless prospect yield,
With labour burn, and echo to the shouts
Of *hurried* sailor, as he hearty waves
His last adieu.

Thomson. Summer.

If we consider him (the physician) in the *hurry* of his business, with his head full of *Materia Medica*, hard names of distempers, and unspeakable terms of anatomy, in these whimsical circumstances, I say, of what fatal consequence might the least oversight prove?

Tatler, No. 300.

Sisters, hence, with spurs of speed,
Each her thundering falchion wield;
Each bestride her sable steed;
Hurry, hurry to the field.

Gray. The Fatal Sisters.

Each hole and cupboard they explore,
Each crack and cranny of his chamber,
Run *hurry scurry* round the floor,
And o'er the bed and tester clamber.

Id. A Long Story.

HURST, Tooke says, "is applied only to places ornamented by trees," vol. ii. 324; and he considers it to be the past participle of the A. S. verb *hyrst-an*, to adorn; (whence also *hearse*.) Skinner also says, perhaps from the A. S. *hyrsta*, *phaleræ*. Spelman and Du Cange give the Low Lat. *hursta*; Sax. *hurst*, *silva*; and Kilian calls the D. *horscht*, *horst*, *sylva humiles tantum frutices proferens*.

HURRI-
CANE.

HURST.

HURT.

Where, to her neighb'ring chase, the courteous forest show'd
So just-conceived joy, that from each rising *hurst*,
Where many a goodly oak had carefully been nurst,
The Sylvans in their songs their mirthful meeting tell.

Drayton. *Poly-olbion*, song 2.

HU'RTFULLY,

HU'RTING,

HU'RTLESS,

HU'RTLESSLY.

pain or wound.

& it was commaundid to hem, that thei schulden not *hirte* the gras
of the erthe, neither any green thing, neither any tree, but oonly men
that han not the signe of God in her forhedis.

Wiclif. *Apocalips*, ch. ix.

And it was commaunded them, that they should not *hurt* the grasse
of the earth, nether any grene thyng, neither anye tree, but only
those men whyche haue not the seale in theyr forheades.

Bible, Anno 1551.

So sore hath Venus *hurt* him with hire brond,

As that she bare it dancing in hire hond.

Chaucer. *The Marchantes Tale*, v. 9651.

And herbes shal I right ynough yfind,

To helen with your *hurtes* hastily.

Id. *The Squieres Tale*, v. 10785.

Cupide, which maie *hurte* and hele

In loue's cause, as for my hele,

Upon the poynte which hym was preyd

Cam with Venus, where I was leyde.

Gower. *Conf. Am.* book viii.

Then was the king excedengly ioifull and commanded Daniel to be
plukt out of the denne) in whom now plukt out there was no *hurte*
founde done to him of the Lyons because he beleued in his God.

Joye. *Exposicion of Daniel*, ch. i.

A towne by treason lost,

a fort by falsehood woon,

By manly fight is got againe

And helpe of *hurtfull* goon.

Turbervile. *All Hurtes and Losses*, &c.

Sir, that is true, quod the seneschall of Carcassone; suche assautes
can nat be without some dethe and sore *hurtyng*.

Lord Berners. *Froissart. Cronycle*, vol. ii. ch. xxxviii.

No man this miser I account,

that chid this *hurtlesse* elfe:

No mouse the mouse, but wiser than

the patch that owde the pelfe.

Turbervile. *Of a Couetous Niggard*.

Nowe yf thou be lothe to be endaugered to magistrates or lawes,
thinke not with stubbernes to come therunto, but with innocent &
hurtles lyfe and good condicions.

Udall. *Romaines*, ch. xiii.

Among them he a spirit of phrenzie sent,

Who *hurt* their minds,

And urg'd them on with mad desire

To call in haste for their destroyer.

Milton. *Samson Agonistes*, l. 1676.

For, by no art nor any leaches might,

It ever can recured be againe

Ne all the skill, which that immortal spright

Of Podalyrius did in it retaine,

Can remedy such *hurts*; such *hurts* are hellish paine.

Spenser. *Faerie Queene*, book vi. can. 6.

I shall not be a *hurter* if no helper.

Beaumont and Fletcher. *A King and no King*, act v.

ISM. My heart, my heart, and yet I bless the *hurter*.

Id. *The Maid in the Mill*, act i.

Among all kinds of contention, none is more *hurtfull* then is con-
tention in matters of religion.

Homilies. *Sermon against Adultery*, part iii.

You little souls, your sweetest times enjoy,

And softly spend among your mother's kisses;

And with your pretty sports and *hurtless* joy,

Supply your weeping mother's grievous misses.

P. Fletcher. *Eliza*.

Both with brave breaking should *hurtlessly* have performed that
match.

Sidney. *Arcadia*, book iii.

[Impatience] rather enflameth our distemper, and aggravateth our
pain: more really indeed molesting and *hurting* us, than the injury
or discourtesie which causeth it.

Barrow. *Sermons*, vol. iii. *Of Patience*.

The least *hurt* or blow, especially upon the head, may make it [an
infant] senseless, stupid, or otherwise miserable for ever?

Spectator, No. 246.

He [Charles II.] had great vices, but scarce any virtues to correct
them: he had in him some vices that were less *hurtful*, which cor-
rected his more *hurtful* ones.

Burnet. *Own Times. Charles II. Anno 1685*.

And though, together with its best fruits, it [the church of Englar]d
pushed out some *hurtful* suckers, receding every way from the mother
plant; yet still there was something in their height and verdure,
which bespoke the generosity of the stock they rose from.

Warburton. *Introduction to Julian*, vol. viii. p. xxxi.

Every one must see the convenience of putting this fiery sentiment
of indignation under some restraint, and of interdicting the exertion
of it in cases, to which so violent a remedy is ill and *hurtfully* applied.

Hurd. *Works*, vol. vi. p. 317. *Sermon 49*.

HU'RTLE, } Skinner believes from *hurt*. Tyr-
HU'RTLING, n. } whitt says, to push. Steevens;
"Hurtle is, I suppose, to clash, or move with violence,
to move with impetuosity and tumult." See his notes
on the passages quoted from Shakspeare; and Mr.
Todd's Spenser, vol. ii. p. 119; where it is observed,
that, from the folio edition of 1609 till the quarto of
1751, all the Editions of Spenser read *hurten*; there
is little doubt that the words are the same.

To throw or cast, to dash; to throw or cast with
force or violence; to whirl, or roll, or rush along. or
about.

And where ever he takith him he *hurtlith* him down [*allidit*] and
he foometh, and betith togidere with teeth and wexith drie.

Wiclif. *Mark*, ch. ix.

And whanne we felden into a place of grauel gon al aboute with
the see thei *hurtliden* (*impegerunt*) the schip.

Id. *Dedis*, ch. xxvii.

He foineth in his foo with a tronchoun,

And be him *hurtleth* with his hors adoun.

Chaucer. *The Knights Tale*, v. 2618.

O firste moving cruel firmament,

With thy diurnal swegh that croudest ay,

And *hurtlest* al from Est til Occident.

Id. *The Man of Lawes Tale*, v. 4717.

With grisly sounne out goeth the great gunne

And bertely they *hurtlen* in all at ones

And fro the top, doun cometh the great stones.

Id. *The Legend of Cleopatras*, fol. 200.

In her fury, like tigres or lions

As they *hurtell*, that all the palaice shooke.

Lidgate. *The Story of Thebes*, part ii.

Suddaine vpriseth from her stately place

The royall dame, and for her coche doth call:

All *hurten* forth, and she with princely pase,

As faire Aurora in her purple pall,

Out of the East the dawning day doth call.

Spenser. *Faerie Queene*, book i. can. 4.

Ne thence-forth his approued skill, to ward,

Or strike, or *hurten* round in warlike gyre,

Remembred he, ne car'd for his saufe-gard,

But rudely rag'd, and like a cruell tigre far'd.

Id. *Ib.* book ii. can. 5.

Now cuffing close, now chasing to and fro,

Now *hurtling* round, aduantage for to take.

Id. *Ib.* book iv. can. 4.

The noise of battel *hurtled* in the ayre.

Shakspeare. *Julius Caesar*, fol. 117.

Nature stronger than his just occasion,

Made him giue battel to the lyonnesse;

Who quickly fell before him, in which *hurtling*

From miserable slumber I awaked.

Id. *As You Like It*, fol. 203.

HURT.

HURTLE.

HURTLE.

HUSBAND

Iron sleet of arrowy shower
Hurles in the darken'd air.

Gray. *The Fatal Sisters.*

HU'SBAND, *v.* } Skinner says, from A. S. *hus*, a
HU'SBAND, *n.* } house, and *band*, *q. d. domus vin-*
HU'SBANDING, } *culum*. Spelman in *v. Husband-*
HU'SBANDLESS, } *dus*, to the same effect. Junius
HU'SBANDLY, } acknowledges this Etymology to
HU'SBANDMAN, } be sufficiently specious, but never-
HU'SBANDRY. } theless thinks the word to be of

Danish origin. Dr. Jamieson is of opinion that the terminating syllable *band* is not from the A. S. *bind-an*, to *bind*; but from *buand*, *buende*, the past participle of *bu-an*, *by-an*, *habitare*, *colere*, to dwell or inhabitate, to cultivate or till. The A. S. *land-buend* was an inhabitant or dweller in the land, also a tiller of the land; and *buende* is itself interpreted, by Somner, a *husbandman*, an inhabitant, a dweller; *husband*, then, as distinguished from *land-buend*, he (Dr. J.) supposes to have denoted, a person who inhabited a house, or was a constant resident in the country, keeping a family there; hence (he adds) it would come to signify the master of a family; and by an easy transition, a *husband*. *Bonde*, in Swed. which *Ihre* derives from the A. S. *buend*, is in its simple form applied to the father of a family, a *husband*, (*maritus*;) a tiller of the land, &c. See *Ihre*.

Husband is applied to,

The master of the house or family; of the farm or estate, the tiller or cultivator of it; to the man or male espoused or married to the woman; to the males of animals.

Husbandry; the tillage or cultivation; management or economy; careful, provident, or thrifty management, thrift, parsimony.

To *husband*; to act as *husband*, (*maritus*;) to provide with a *husband*.

To act as *husband* or *husbandman*; to till, to cultivate; to manage or economize; to use careful, provident, or thrifty management.

Robert of Caumpedene, that *hosebonde* was on,
Vor he was a lute clerik, he ssrof hom ech on.

R. Gloucester, p. 544.

Ther nys squier ne kyght. in contreye a boutte
That he nel bowe to pat bonde. to bede hure an *hosebonde*
And wedden hure for hure welthe.

Piers Ploughman. Vision, p. 180.

Wommen be ghe suget to ghoure *husbondis* as it bihoueth in the Lord.

Wyues submit youre owne selues vnto your *husbandes*, as it is comely in the Lorde.

Bible, Anno 1551.

The kyngdom of hevenes is lyk to an *housbondeman* that wente out first bi the morowe to hyre werkmen into his vyneyerd.

Wiclif. Matthew, ch. xx.

Ne take no wif, quod he, of *husbondrie*,
As for to spare in houshold thy dispence:
A trewe servant doth more diligence
Thy good to kepe, than doth thin owen wif,
For she wol claimen half part al hire lif.

Chaucer. The Marchantes Tale, v. 9173.

Sike lay the *husbond man*, whos that the place is,
Bedred upon a couche low he lay.

Id. The Sompnoures Tale, v. 7350.

But netheles it is so shape,
That Morpheus by night allone
Apperith vntill Alceone,
In lykenesse of hir *husbonde*,
All naked dead vpon the stronde.

Gower. Conf. Am. book iv. fol. 80.

But they *husbanded* it to theyr owne profyte and commoditie, and nothyng for the Lordes behoofe, who ought of ryght to haue receyued the fruite thereof.

Udall. Marke, ch. xii.

VOL. XXIII.

The women of that countrey doe labour much more than the men, as well in fishing, as in tilling and *husbanding* their grounds and other things.

Hakluyt. Voyages, &c. vol. iii. fol. 224. Jaques Cartier.

He will throwe in theyn tethe by thys boke and such other the stinking examples of their hipocrityshe lyues, with their calkynge and cloynynge too patche vp that daubery of the deuyll, their vowed wyuelesse and *husbandles* chastyte.

Bale. English Votaries, part i. fol. 12.

The greatest want is industrious, painefull, and *husbandly* inhabitants to tille and trimme the ground.

Hakluyt. Voyages, &c. vol. ii. part ii. fol. 165. The Hon. Erle of Cumberland.

The womē haue all the doying in houskeping and *husbandrie*, & the men geue themselves to warre & robberyng.

Arthur Goldyng. Justine, book xlv. fol. 181.

BER. If you shall proue
This ring was euer hers, you shall as easie
Proue that I *husbanded* her bed in Florence
Where yet she neuer was.

Shakspeare. All's Well that Ends Well, fol. 252.

I graunt I am a woman; but withall
A woman well reputed: Cato's daughter.
Thinke you, I am no stronger than my sex,
Being so father'd, and so *husbanded*?

Id. Julius Cæsar, fol. 116.

Good Saturne selfe, that homely emperour,
In proudest pompe was not so clad of yore,
As is the under-groome of the ostlerie,
Husbanding it in work-day yeomanrie.

Hall. Satire 1. book iii.

Like as a withered tree through *husbands* toyle

Is often seene full freshly to haue florisht,
And fruitfull apples to haue borne awhile,
As fresh as when it was first planted in the soyle.

Spenser. Faerie Queene, book iv. can. 3.

If ye our fathers, thinke much (say they) of the affinitie betweene our *husbands* and you; or if yee our *husbands* are displeased with our mariage, bend all your anger and malice against us: we are the cause of this warre, we are the cause of wounding and killing both *husband* and father, yet will wee rather die, than liue either orphans without the one, or widowes without the other.

Holland. Livy, fol. 10.

His children fatherlesse
And *husbandlesse* his wife,
May wand'ring begg.

Sir P. Sidney. Psalm 109.

The name of a *husband*, what is it to say?
Of wife and the household the band and the stay;
Some *husbandly* thriveth that never had wife,
Yet scarce a good *husband* in goodness of life.

Id. The Description of Husbandry.

Though never so much a good huswife doth care,
That such as do labour have *husbandly* fare;
Yet feed them and cram them, till purse do lack chink,
No spoon-meat, no belly-ful, labourers think.

Tusser. March's Husbandry.

It chaunced after upon a day,
The *husbandman* selfe to come that way,
Of custome for to surwee his grounde.

Spenser. Shepherd's Calendar. February.

He chides Andromache and strooke his armorer,
And like as there were *husbandry* in warre
Before the sunne rose, hee was barnest lyte,
And to the field goes he.

Shakspeare. Troilus and Cressida, fol. 79.

I so well like your design of *husbanding* time, that in compliance with it, I shall rather follow your example than the dictates of customary civility.

Boyle. Works, vol. vi. p. 673. Appendix to the First Part of the Christian Virtuoso.

The royal *husbandman* appear'd
And plough'd, and sow'd, and till'd,
The thorns he rooted out, the rubbish clear'd,
And bless'd th' obedient field.

Dryden. Threnodia Augustalis.

3 i

HUSBAND
—
HUSHER.

He is the neatest *husband* for curious ordering his domestick and field accommodations, and what pertains to *husbandry*, that I have ever seen.
Evelyn. Memoirs, August 30, 1681.

In all my wand'rings round this world of care,
In all my griefs—and God has giv'n my share—
I still had hopes my latest hours to crown,
Amidst these humble bowers to lay me down;
To *husband* out life's taper at the close.

Goldsmith. The Deserted Village.

By marriage, the *husband* and wife are one person in law: that is the very being or legal existence of the woman is suspended during the marriage, or at least is incorporated and consolidated into that of the *husband*.
Blackstone. Commentaries, book i. ch. xv.

The bulk of every State may be divided into *husbandmen* and manufacturers, the former are employed in the culture of the land.

Hume. Essay 1. Of Commerce.

HUSH, v. } *Hush, husht, huisht, whist. Hush,*
HUSH, adj. } says Junius, *tace, sile, ne verbum qui-*
HU'SHTLY, } dem, St. See HIST, and WHIST.
HUSH-MONEY. } To be still or quiet, in word or deed; to be silent; to still or quiet, to tranquillize or appease.

Hush-money; money paid for being *hush* or silent.

When they were set, and *husht* was all the place.

Chaucer. The Knightes Tale, v. 2983.

Tho weren the cruell clarions full *hust*, and full still.

Id. Boecius, book ii. fol. 218.

After much clattering, there is mokell rowning, thus after iangling wordes commeth *huishte*, peace, and be still.

Id. The Testament of Loue, book i. fol. 290.

A golden slomber dyd his lymmes inuade,
And held him *husht* tyll day againe gan dawne.

Gascoigne. Dan Bartholmew of Bathe.

Verely I shal then speake vnto you *huishtlie* and without woordes, at I shal speake assured and manifest thinges if so bee ye aske them.

Udall. John, ch. xvi.

The winds were *hush'd*, no leaf so small

At all was seen to stir:

Whilst tuning to the waters' fall

The small birds sang to her.

Drayton. The Quest of Cynthia.

FUL. And not content with this

Abus'd your honest name with slaundrous wordes

And fil'd your *husht* house with unquietnes.

A Pleasant Conceited Comedy, 1608, I. 2.

JUP. No more you petty spirits of region low

Offend our hearing: *hush*. How dare you ghostes

Accuse the Thunderer.

Shakspeare. Cymbeline, fol. 394.

— We often see against some storme,

A silence in the beaueus, the racke stand still,

The bold windes speechlesse, and the orbe below

As *hush* as death.

Id. Hamlet, fol. 264.

Th' oblation slain, and Phœbe reconcil'd,

The storm was *hush'd* and dimpled Ocean smil'd,

A favourable gale arose from shore

Which to the port desir'd the Grecian galleys bore.

Dryden. Ovid. Metamorphoses, book xii.

A poor chambermaid has sent in ten shillings out of her *hush-money*, to expiate her guilt of being in her mistress's secret.

Guardian, No. 26.

The judges had taken their seats, the Decemviri were arrived, the eyes of the audience were fixed upon the counsel, and all was *hushed* in silence and expectation, when an order arrived from the Prætor, that the Court should be adjourned.

Melmoth. Pliny to Rufus, book v. let. 21.

HUSHER. See USHER.

But generally he dared boldly to say, and prove, that all women, priests and ministers of the princesses chambers as sowers, *hushers*, and such other about, that did her [Queen Catherine] any manner of service, did so call her, [*viz. queen.*]

Strype. Memorials. Henry VIII. 1535.

HUSK, v. } D. *hulse, hulsche, huldse, siliqua,*
HUSK, n. } *calix*; Kilian. Skinner derives from the
HU'SKY. } verb: *hutzen, caput tegere*, to cover the
head; and this from the A. S. *hel-an*, to cover. See
HULL.

Husk is, the cover of the seed or fruit; to *husk*, to take out of the *husk* or cover.

Husky, as applied to the voice, should, perhaps, be written *husty*, from the A. S. *hwost-an, tussire*, to cough.

The young man desired to fil his bealie, he cared not wherwithal, no not if it had been with the verai *hushes* and coddess, wherwith the hogges were fedde.

Udall. Luke, ch. xv.

Certainly among the harde bones soft fleshe is bredde, vnder the sharpe *hushes* the chestnutte is nourished.

Golden Boke, let. 19. sig. O. o. iii.

Being thoroughly *hushed* and cleansed, grind it into meal as is aforesaid.

Holland. Plinie, book xviii. ch. vii.

The fruit or seed of all graine that is sowne or set, is contained either within ears, as wee see in (bearded) wheat and barley, and the same is defended (as it were) with a pallaisade of eales, disposed square in foure rankes; or, is enclosed within long cods and *hushes*, as the pulse kind.

Id. Ib.

When the nut is dry, they take off the *husk*, and giving two good blows on the middle of the nut, it breaks in two equal parts, letting the water fall on the ground.

Dampier. Voyages, Anno 1686.

If now their sinking state and low affairs

Can move your pity and provoke your cares,

Fresh burning thyme before their cells convey,

And cut their dry and *husky* wax away.

Addison. Virgil. Georgic 4.

This [chrysalis] also in its turn dies; its dead and brittle *husk* falls to pieces, and makes way for the appearance of the fly or moth.

Paley. Natural Theology, ch. xix.

Proser was dead, and Sergeant Quirkit

Grew *husky*, and had left the circuit.

Anstey. Pleader's Guide.

HUSTINGS. Various Etymologies have been proposed. The one contained in the Quotation from Fuller, is supported by Cowell. Somner, in his *Gloss. ad Histor. Anglic. Scriptores*, derives from A. S. *hyhst*, highest, and *thing, judicium*, judgment. Spelman, who calls it the most ancient and high Court of the celebrated City of London, from A. S. *hus*, a house, and *thing, causa, res, lis, judicium*; *quasi domus causarum, vel ubi causæ aguntur*. The D. *dingh*, and Ger. *ding*, are used in the same signification. The most popular usage of the word seems to support the opinion of Cowel, *viz.*

It is now chiefly used for a place *raised* or *erected* for Candidates at an election of Representatives in Parliament.

You are all for the *hoistings* or *hustings*. It is spoken of those who by pride or passion are mounted or elated to a pitch above the proportion of their birth, quality or estate; such as are all in *altitudinibus*, so that common persons know not how to behave themselves unto them. It cometh from the *hustings*, the principal and highest court in London, (as also in Winchester, Lincolne, York, &c.) so called from the French word *haulser*, to raise or lift up.

Fuller. Worthies. London.

The chief of those [Courts] in London are the sheriff's Courts, holden before their steward or judge; from which a writ of error lies to the Court of *hustings*, before the mayor, recorder, and sheriffs.

Blackstone. Commentaries, book iii. ch. vi. sec. 9. note 1.

It is only in times like the present, when attempts are flagitiously made to murder innocent men, that the progress of a candidate can possibly be from the *hustings* to Newgate, and from Newgate back to the *hustings*.

Tooke. To the Electors of Westminster, 1796.

Those who are used to the factious exhibitions in Guildhall and Covent Garden, and are also well read in Grecian History, will readily admit the analogy which

HUSK.
—
HUS-
TINGS.

HUS-
TINGS.
—
HUT.

Spelman has found for HUSTINGS, *a loco (ut Prytaneum Athenis) nuncupata*. He proceeds to cite a Chapter (35.) from the Laws of Edward the Confessor, enjoining that a Weekly Court *domini Regis* should be held in London every Monday on the Hustings, and the origin is traced up even as high as Troy town. *Fun-data enim erat olim et ædificata ad instar et ad modum et in memoriam veteris magnæ Trojæ, et usque in ho-diernum diem, leges, et jura, et dignitates, et libertates regiasque consuetudines antiquæ magnæ Trojæ in se continet*. Little do the Citizens of London imagine that they are congregating *τεττιέσσειν ἐοικότες*. Spelman continues, that the well-known Troy weight has a like derivation, that in Saxon times the standard was kept in the Hustings, and was commonly called *pondus Hustingiæ Londoniensis*. The day of holding the Court was changed in his time to Tuesday, but the instruments promulgated by it all ran with the original date, *tentus die Lunæ*. The powers of the COURT of Hustings have already been described under that head.

HU'SWIFE, v. } D. *huys-wiif*; *mater familias*,
HU'SWIFE, n. } q. d. *uxor domus*. Skinner. And
HU'SWIFELY, } see HUSBAND.
HU'SWIFERY, } To *huswife*; to manage, as a
HU'SSY. } good *hus-wife* or *house-wife* should;
to manage with carefulness, economy, frugality, thrift.

Hussy, a corruption of *huswife*. Used as an ill or familiar appellation.

When weaver's weight, is found in *huswives* web.
Gascoigne. *The Steele Glas*.

The name of a *huswife*, what is to say?
The *wife* of the *house*, to the husband astay.—
The *huswife* is she that to labour doth fall,
The labour of her I do *huswifery* call.
Tusser. *The Description of Huswife and Huswifery*.

Amongst the rest the tamariske there stood,
For *huswives* besomes only knowne most good.
Browne. *Britannia's Pastorals*, book i. song 2.

This care hath a *huswife*, all day in her head,
That all thing in season be *huswifely* fed.
Tusser. *Instructions to Huswifery*.

But when by Ceres *huswifrie* and paine,
Men learn'd to burie the reviving graine,
And father Janus taught the new-found vine,
Rise on the elme, with many a friendly twine.
Hall. *Satire* 1. book iii.

Some may think of Jael, that by inviting Sisera into her tent, she was no better than a trepanning *hussy*. But nothing so.
Grew. *Cosmo Sacra*, book iv. ch. iv. sec. 24.

This dowager ———
A simple sober life, in patience led,
And had but just enough to buy her bread:
But *huswifing* the little heaven had lent,
She duly paid a groat for quarter rent.
Dryden. *The Cock and the Fox*.

In short the young *husseys* would persuade me, that to believe one's eyes, is a sure way to be deceived, and have often advised me, by no means to trust any thing so fallible as my senses.
Spectator, No. 242.

Consider before
You come to three score
How the *hussies* will flee
Where'er you appear.
Swift. *My Lady's Lamentation*.

It was the hour when *huswife* morn
With pearl and linen hangs each thorn.
Churchill. *The Ghost*.

And you have but too well succeeded, you little *hussy* you.
Goldsmith. *The Good-natured Man*.

HUT, Fr. *hute*; D. and Ger. *hutte*; Sw. *hyda*, *tugurium*, from Ger. *huten*; Sw. *hyda*, *celare*, *protegere*; to hide, (A. S. *hyd-an*,) to cover or protect. See

Kilian, Wachter, and Ihre. Tooke, in opposition to these authorities, conceives *hut* to be formed from the past participle *hoved*, of the A. S. verb *heaf-an*, to heave; thus, *hoved* or *hov'd*, *howve* or *hood*, *hut*. According to the first, *hut* is

A place covered; to the second, a place raised: it is applied to, a small building for covering or protection

For scatred er þi Scottis, & hodred in þer hottes.
R. Brunne, p. 273.

They continued their mirth till the moon went down, and then they left off. Some of them going into their *huts* to sleep, and others to their attendance in their Dutch houses.

Dampier. *Voyages*, &c. Anno 1691.

Notwithstanding the distance of this island from the main, we saw to our great surprise, that it was sometimes visited by the natives; for we found seven or eight frames of their *huts* and vast heaps of shells, the fish of which we supposed had been their food.

Cook. *Voyages*, vol. ii. book iii. ch. v. p. 173.

HUTCH, v. } Fr. *huche*. A *hutch* or bin, a
HUTCH, n. } trough or tub; also a *mill-hopper*.
Cotgrave. The Sp. *hucha*, Delpino calls, a box with a slit to put money in. In A. S. it is *hwacca*.

And Somner and Lye say that Chaucer writes *wiche*, q. v. but this the latter thinks is so called from the wood of which it was made, the *wich* or *wich-elm*.

To *hutch*; to hoard, or lay up in store; as in a *hutch* or coffer.

Warton (on Milton's *Comus*) says, "*Hutch* is an old word for *coffer*. Archbishop Chichele gave a borrowing chest to the University of Oxford, which was called *Chichele's Hutch*. Some perhaps may read *hatch'd* for it was in her own loyns."

— And some were white
Such as men to the cages twite
Or maken of these paniers
Or else *hutches* or dossers.

Chaucer. *The thirde Booke of Fame*.

— And that no corner might
Be vacant of her plenty, in her owne loins
She *hutcht* th' all worshipt ore, and precious gems,
To store her children with. Milton. *Comus*, l. 719.

For as a miller in his boulding *hutch*
Drives out the pure meale neerely, (as he can)
And in his sifter leaves the coarser bran;
So doth the canker of a poet's name
Let slip such lines as might inherit fame.

Browne. *Britannia's Pastorals*, book ii. song 2.

HUTCHINSIA, in *Botany*, a genus of the class *Tetradynamia*, order *Siliculosa*, natural order *Cruciferae*. Generic character: pod elliptic, entire, valves keeled, not winged, cells two-seeded; filaments without teeth.

Three species, natives of Europe. *H. petræa*, the *Lepidium petræum* of English *Botany*, is a native of England.

HUZZ, } *Huzz*, Skinner and Junius consider
HU'ZZA, v. } to be a word formed from the sound.
HU'ZZA, n. } To *huzz* as bees, to make a noise like that of bees in their hives; as in the first Quotation from Pliny; in the latter, *huzzing* seems equivalent to *whizzing* or *hissing*. The derivation of *huzza* from *Hungarian* soldiers so called, or from *Hosannah*, appear neither of them very probable.

Huzza is the word shouted; To *huzza* is to shout the word *huzza*. *Hurrah* (pronounced *hoo-ra*) is in similar usage.

She onely crieth not, nor keepeth a grumbling and *huzzing* as others doe.
Holland. *Plinie*, book x. ch. iii.

If the fire then burne in the chimney pale, and keepe therewith a *huzzing* noise, wee find by experience that it forsheweth tempest and stormie weather.
d. *Ib.* book xviii. ch. xxxv.

HUT
—
HUZZ.

HUZZA.

They made a great *huzza*, or shout, at our approach, three times.
Evelyn. Memoirs, June 30, 1665.

HYADES.

A caldron of fat beef and stoop of ale
 On the *huzzaing* mob shall more prevail,
 Than if you give them, with the nicest art,
 Ragouts of peacocks' brains, or filbert tart.

King. Art of Cookery.

I have observed that the loudest *huzzas* given to a great man in triumph, proceed not from his friends but the rabble.

Pope. Odyssey. Postscript.

Hail to the day which joins your trades together.

Huzza, my jolly cobblers! and *huzza*,
 My stable sweepers! hail the joyous day.

Fawkes. Epithalamium.

HY'ACINTH, } Lat. *hyacinthus*; Gr. *ῥάκινθος*.
 HY'ACINTHIAN, } See the Quotation from Pliny.
 HY'ACINTHINE. } *Hyacinthine*, of or pertaining to
 the *hyacinth*; formed of, having the colour of *hyacinth*.

But before I leave the *hyacinth*, I cannot chuse but report the fable or tale that goeth thereof, and which is told two manner of waies, by reason that the flower hath certain veines to be seene running in and out, resembling these two letters in Greeke, A I, plaine and easie to be read; which, as some say, betoken the lamentable mone [*ai*] that Apollo made for his beloved wanton minion, *Hyacinthus*, whom he loved; or, as others make report, sprung up of the blood of Ajax who slew himselfe, and represented the two first letters of his name, AI.

Holland. Plinie, vol. ii. book xxi. ch. xi. fol. 92.

And last of all the *hyacinths* we throw,
 In which are writ the letters of our woe.

Beaumont. On the Death of Ed. Stafford.

————— *Hyacinthin* locks

Round from his parted forlock manly hung
 Clustering, but not beneath his shoulders broad.

Milton. Paradise Lost, book iv. l. 301.

The letter'd *hyacinths* of darksome hue,
 And the sweet violet, a sable blue.

Fawkes. Theocritus, idyl. x.

But when indulging amorous play,
 I frolic with the fair and gay,
 With *hyacinthine* chaplet crown'd,
 Then, then, the sweetest joys abound.

Id. Anacreon. Ode xlii.

Who shall awake the Spartan fife,
 And call in solemn sounds to life
 The youths, whose locks divinely spreading,
 Like vernal *hyacinths* in sullen hue.

Collins. Ode to Liberty.

Her lips more fragrant than the summer air;
 And sweet as Scythian musk her *hyacinthine* hair.

Jones. Tales. The Palace of Fortune.

HYACINTHUS, in *Botany*, a genus of the class *Hexandria*, order *Monogynia*, natural order *Asphodeli*. Generic character: corolla erect, bell-shaped or rounded, six-cleft or six-parted; segments equal, three melleiferous pores at the base; cells of the capsule mostly two-seeded.

There are about sixteen species of *Hyacinth* known, natives of Europe and Africa: of the *H. orientalis*, native of the Levant, the Dutch gardeners are successful cultivators of almost innumerable varieties; these are annually imported into England in large quantities, and are flowered in water. Several other species are hardy, and are frequently cultivated; the English *Hyacinth*, *H. non scriptus* of Willdenow, is the *Scilla nutans* of English Botany.

HYADES, a constellation of the Southern hemisphere. Their names, as given in a fragment of Hesiod produced by Tzetzes, (*Annot. in Hes. 119.*) were Phæole, (Phæsole,) Coronis, Clelea, Phæo, and Eudore. Apollodorus (*Bibl. iii. 3.*) calls them the Nymphs of Nyssa, whom Jupiter rewarded with the title of

Hyades for their care of the infant Bacchus. These Nysseides, according to Hyginus, (*Fab. 182.*) through the intercession of their nursling, obtained rejuvenescence from Medea, and were afterwards translated, under their new name, to the Stars. Ovid (*Fast. v. 167.*) alludes to the guardianship of Bacchus, and adds, that other authorities consider them to be granddaughters of Tethys and Oceanus. Hyginus, in another place, (*Fab. 192.*) relates, that Atlas had twelve daughters and one son, Hyas, by Pleione or Oceanitis, whom others call Æthra, a daughter of Oceanus. Hyas was killed by a boar or a lion, (Timæus says a snake,) and his sisters in consequence wept themselves to death. Five of them, Phæsyia, Ambrosia, Coronis, Eudora, and Polyxo, formed a constellation between the horns of Taurus, called Hyades by the Greeks, either because they were disposed in the form of the letter Y, or from *ῥεῖν*, to rain; their rising being supposed to be attended with much wet. The Latins ignorantly called them *Suculæ*, ἀπὸ τῶν *ῥεῖν*, a *suibus*, a blunder, upon which Cicero has commented. *Hyadas nostri imperitè suculas (vocant) quasi a suibus essent non ab imbris nominatæ.* (*De Nat. Deor. ii. 43.*) The same charge was brought against his countrymen by Cicero's Freedman Tullius Tiro, and is rebutted by Aulus Gellus in the following strange passage, which Oisel has well characterised as containing *nugas nugacissimas*. Sed enim veteres nostri non usque eo rupices et agrestes fuerunt, ut stellas Hyadas idcirco Suculas nominarent quod vēs Latinè sues dicantur: sed ut quod Græci ῥεῖν, nos super dicimus, quod illi ῥεῖν, nos supinus, quod (illi) ῥεῖν, nos subulcus, quod item illi ῥεῖν, nos primo synpus inde per y Græcæ Latinæque literæ cognationem somnus, sic quod ab illis ῥεῖν a nobis primo Syades deinde Suculæ appellatæ. (xiii. 9.) Alexander is referred to by Hyginus, (*Poet. Ast. 21.*) for another derivation of their names as daughters of Hyas and Bæotia.

The chief of the Hyades in the left eye of Taurus is a bright star, named Aldebaran by the Arabs. The Romans used to call it *Palaticium*, because its rising agreed with the Festival *Palilia*.

HYÆ'NA, } Fr. *hyenne*; It. and Sp. *hyena*; Lat.
 HY'EN. } *hyæna*; Gr. *ῥαῖνα*, *porca*, from *ῥεῖν*, *sus*.

I will laugh like a *hyen*, and that when thou art inclin'd to sleepe.
Shakspeare. As You Like it, fol. 201.

SAM. Out, out *hyæna*; these are thy wonted arts,
 And arts of every woman false like thee;
 To break all faith, all vows, deceive, betray,
 Then as repentant to submit.

Milton. Samson Agonistes, l. 748.

And scorning all the taming arts of man
 The keen *hyæna*, fellest of the fel.

Thomson. Summer.

————— The tiger when escap'd,
 Or fell *hyæna* from an eager chase
 Of dogs and hunters, feels not more dismay.

Glover. The Athenaid, book xiv.

HYÆNA, Storrr, Illig. *Hyæna*, Pen. In *Zoology*, a genus of animals belonging to the tribe *Digitigrada*, family *Carnivora*, order *Sarcophaga*, class *Mammalia*.

Generic character. Incisive teeth six in each jaw, the second outer of the lower jaw thicker at its base than the others; cuspid very long, conical, and sharp; molar teeth large, five on each side in the upper jaw, the anterior three single-edged, the fourth, which is the largest, tricuspid, and armed with a little tubercle on its fore and inner edge, the fifth small, tubercular, and placed transversely in the jaw; in the lower jaw four,

HYADES.

HYÆNA.

HYÆNA. the anterior three thick and conical, the fourth the largest and bicuspid; feet four-toed, their soles hairy.

The Hyænas have a general resemblance to the Dog, but are easily distinguished by the greater length of their fore legs, and the hog-like mane which extends more or less along the back; they are morose and vicious in their appearance, and very voracious, but very cowardly, never daring to attack an animal which makes a show of resistance, except when escape is impossible, and they then fight furiously. They pass the greater part of the day in holes, which they dig for themselves, or in clefts or caverns of rocks, from which they sally out in search of prey; and if they cannot find any living animal, will satiate themselves on a dead carcass, however putrid, devouring it bones and all; and should this carrion fail, will tear up graves in order to satiate their ravenous appetite. At night they do not hesitate to enter towns in search of offal; and, according to Mr. Bruce's account, they come so numerous into Gondar, a town of Abyssinia, that "many a time, when the King has kept me late in the palace, on going across the square from the King's house, I have been apprehensive lest they should bite me in the leg." Their voracity, however, answers a very good purpose, as it assists the vultures in clearing away the putrid carcasses which, in a hot climate, would produce dangerous consequences to mankind. Their gait is awkward, and when they are first disturbed they limp much in running, but after a short distance they gallop off very swiftly. In turning their head they also usually carry round the greater part of the body, and hence has arisen the old notion related in Pliny, that "their necke and the mane therewith, together with the backe, are one entire bone without any joint at all, so as they cannot bend their necke without turning the whole body about." (ch. xxx. book viii.) They are also stated by the same author to change their sex every two years; but at the same time he says Aristotle denies it. He mentions, moreover, that Hyænas have the power of imitating the cry of other animals; and this has been proved to a certain extent by the observation of Sparrman.

H. Vulgaris, Desmarest; *Canis Hyæna*, Lin.; *l'Hyène*, Buff.; *Striped Hyæna*, Pen. About the size of a large dog, and very strongly made; head flat and broad, the jaws longer than those of the Cats but shorter than of the Dogs; ears short and pointed; eyes wild, sullen, and ferocious; shoulders high; hair long and coarse, completely covering the short woolly hair surrounding its roots, and of an ash colour, striped from the back to the belly with black streaks, and barred with black across the legs: from the back of the head to the tail extends a long, stiff, ashy mane varied with black; tail very hairy, plain ash, or barred black: the oval pouch probably gave origin to the notion of the animal being an hermaphrodite. It has a peculiar cry, said to resemble in its commencement the moaning of the human voice, and ending like a person endeavouring to vomit. This animal is native of the Caucasian and Altaic chain of mountains, Asiatic Turkey, Syria, Persia, Barbary, Senegal, and the Cape of Good Hope, but here they are not very numerous. The Arabs, when they kill the Hyæna, bury the head to prevent it from being used for magical purposes. It is said that this animal cannot be tamed. Pennant, however, mentions some young ones he had seen tame at the Tower of London; and Mr. Hunter possessed one, which he kept at Earl's Court, so docile as to allow itself to be handled;

but after his death it was sold to a showman, and, from the confinement it was subjected to, became very fierce, and was at last destroyed by a tiger, into whose cell it had intruded by tearing down the partition.

H. Capensis, Desm.; *Canis Crocuta*, Lin.; *l'Hyène tachetée*; *Tiger Wolf* of the Cape; *Spotted Hyæna*, Pen. This is the most common species at the Cape of Good Hope; and although its presence requires caution on the part of the shepherds in regard to their cattle, yet it is a very valuable animal scavenger, as it is well known to come nightly to Cape Town and clear away the offal, bones, &c. which are thrown out in large quantities; and Sparrman says, that the Dogs are so well accustomed to it, that they feed side by side without molestation, and the Hyæna is rarely known to do mischief when thus satiated. Its general colour is reddish brown with dark round spots on the body, and the hind legs sometimes spotted, at other times barred; the head large and flat, of a dark colour, and whiskered both on the lips and above the eyes; the ears short; a short mane, the hairs of which point forward, runs along the ridge of the back. This animal is found in Æthiopia, Guinea, and the Cape of Good Hope; it seeks its prey only in the evening, often in flocks, but its peculiar howl gives ample notice of its approach. Sparrman considers the howl to be indicative of hunger, and the hollowness of the sound induces him to think that it proceeds from emptiness of stomach. It is this species which he has observed capable of imitating the call of other animals to a certain extent, thus alluring their young within its grasp. They are very powerful; and an instance is recorded of one kept at the Tower of London, which tore up a plank about seven feet long, nailed down to the floor of its den. Formerly they were known to carry off children from the negroes' cottages, but they are now more timid, and their depredations are confined to cattle. Sparrman relates in his Travels an amusing anecdote which he had heard related at the Cape. "At a feast near the Cape one night, a trumpeter, who had got his fill, was carried out of doors, in order that he might cool himself, and get sober again. The scent of him soon drew thither a Tiger Wolf, which threw him on his back, and dragged him along with him as a corpse, and consequently a fair prize, up towards Table Mountain. During this, however, our drunken musician awaked, enough in his senses to know the danger of his situation, and to sound the alarm with his trumpet, which he carried fastened to his side. The wild beast, as may easily be supposed, was not less frightened in his turn."

H. Villosa, Smith; *Strand Wolf*, or *Strand Jut* of the Cape; *Hairy Hyæna*. Is less than the last species; its general colour is dusky grey, marked with large black spots or oblique bands; the neck is yellowish, the head broad and grisly, its apparent breadth increased by the projection of the hair between the ears and throat, which assume the form of a ruff of a reddish white colour, marked more or less distinctly with a vertical dark stripe under the outer angle of each eye; the outside of the legs dirty white, striped transversely with narrow black bands, deficient on the inside. The hair on the neck and body is very long and shaggy, measuring, especially on the back and sides, as much as six inches. This animal is described by Dr. Smith in the XVth volume of the *Linnæan Transactions*, from an individual he had for some time in his own possession. It is less powerful than the other species, and confines

HYÆNA. its depredations to the destruction of smaller cattle, as sheep, goats, &c. But it does not appear less carnivorous. Dr. Smith's animal during confinement was always much excited by the approach of animals, which it would probably attack had it been at liberty; it preferred meat in which the blood remained to other, and not uncommonly bones to flesh; these it would for hours employ its teeth in breaking, and then suck out the marrow. It was extremely suspicious, and would not cross even a deal board which was placed across its den for a long while, until it had thoroughly convinced itself that no danger lurked beneath, by licking at and biting such parts as its teeth could get at. It was at first impatient of confinement, and endeavoured to escape by digging close to the wall of its prison-house; and the hole, which it had formed in a single night large enough to hide itself in, being filled up with stones, it removed them next night, and succeeded in reaching the foundation, the strength of which, however, stopped it. Dr. Smith relates a curious circumstance with regard to a secretion, similar to "impure candle grease," which the animal obtains by rubbing the nates "for about half a minute" against any hard substance; he first observed it upon an upright post in the apartment in which the animal was confined, and also saw it in the performance of the operation, after which it licked off the substance thus procured. Removing the post did not prevent its finding a new rubbing place, for it then selected a large stone, upon which the same substance was deposited: it hardly ever stirred without forthwith visiting this larder of its own, and always resorted to it after feeding. This is probably the animal alluded to by Cuvier in his *Ossements Fossiles*, tom iv. p. 384, and named by Desmarest *Hyæna Rufa*.

Another new species was assigned to this genus by Temminck, under the name *H. Picta*, the *H. Venatica* of Burchell, but he is now satisfied that it belongs to the Dogs.

See Linnæi *Systema Naturæ* a Gmelin; Illiger, *Prodromus Mammalium*; Buffon, *Histoire Naturelle*; Pennant's *History of Quadrupeds*; Sparrman's *Voyage to the Cape of Good Hope*, &c.

HYÆNANCHE, in *Botany*, a genus of the class *Dioecia*, order *Dodecandria*. Generic character: male flower, calyx five to seven-leaved; corolla none; stamens ten to twenty: female flower, one style, stigmas three, capsule three-celled; cells three-seeded.

One species, *H. Capensis*, a shrub, native of the South of Africa, called there the Hyæna poison-tree.

HYALEA, in *Zoology*, a genus of *Pteropodous Mollusca*, established by Forskaell.

Linnæus first placed it with the *Anomia*; it has since been placed with the *Patellæ*; and Cuvier has pointed out its affinity to the genus *Clio*. In the *Annals of the Museum* Cuvier has given a dissection or description of the animal; and lately, Blainville, in the *Journal de Physique*, has given a fresh anatomy, in which he has controverted most of the accounts given by Cuvier, and evidently with justice in many instances. This being the case, we have given the latter author's generic character, not vouching for its accuracy in every particular.

Generic character. Body globular, formed of two distinct parts; the hinder, or abdominal, broad, depressed, and edged on each side by the double lips of the mantle sometimes prolonged; contained in a shell, the anterior or *cephalo-thoracic* parts dilated on each

side into wings or rounded fins; head not distinct, provided with two *tentacula* placed in a cylindrical sheath; mouth, with two labial appendages running under the foot; vent on the hinder part of the right side of the double lips of the mantle; gill pectinate on the right side; oviduct ending in neck part between the two parts of the body, that of the male organ at the base of the right *tentaculum*; shell very thin, transparent, symmetrical; above convex, beneath nearly flat; slit on the sides for the passage of the lobes of the mantle; aperture a narrowed slit, and often pierced behind.

The type of the genus is *H. tridentata* of Lamarck, the *Anomia tridentata* of Linnæus.

Blainville has published a monograph, containing a description of thirteen species of the genus.

HYALINE, Gr. *υαλίνος*, *vitreus*, from *υαλος*, *vitrum*, and this from *ϋ-ειν*, *pluere*; because *vitrum*, or glass, has the colour of water.

Witness this new-made world, another Heav'n
From Heaven gate not farr, founded in view
On the clear *hyaline*, the glassie sea.

Milton. *Paradise Lost*, book vii. v. 619.

HYAS, in *Zoology*, a genus of *Short-tailed Triangular Crabs*, allied to *Maia*, established by Dr. Leach.

Generic character. *Antennæ*, with their first joint larger than the second, compressed and dilated externally; the third joint of the outer feet-like jaws short, slightly dilated externally, nicked at its extremity and on the inner side; pinchers much larger and shorter than the other legs, which are double the length of the body; legs cylindrical, clawed; body long, subtriangular, rounded behind; forehead ending in two points.

The type of the genus *H. araneus*, Leach; the *Cancer araneus* of Gmelin, the *Cancer bufo* of Bosc, which are found in the British Ocean.

HYBOS, in *Zoology*, a genus of *Dipterous* insects, established by Meigen.

Generic character. *Antennæ* inserted on the front of the head, much shorter than the head, and formed of two curved or conical joints, with a long bristle at their extremity; *palpi* curved beneath the produced trunk; the thighs of the hinder legs enlarged. This genus is nearly allied to *Tachydoma*.

The type of the genus is *H. asiliformis*, the *Stomoxys asiliformis* of Fabricius.

HY'BLA-HONEY, } From *Hybla*, a mountain of
HY'BLÆAN, } Sicily famous for its bees and honey.

That lovely spot which thou dost see
In Celia's bosom was a bee,
Who built her amorous spicy nest
I th' *hyblas* of her either breast.

Carew. *On a Mole in Celia's Bosom*.

Charming Bombyce, though some call you thin,
And blame the tawny colour of your skin;
Yet I the lustre of your beauty own,
And deem you like *Hyblæan* honey brown.

Fawkes. *Theocritus*, idyl. 10.

Go, fly into thy hive again,
With more than *Hybla-honey* blest;
For Pope's sweet lips prepare the dew,
Or else for love a nectar-feast.

Thomson. *The Bee*.

HY'BRID, } Lat. *hybrida*, or *ibrida*; Gr. *υβρις*,
HY'BRIDOUS. } *injuria*, *quod injuriam contumeliosam*
notat; (*sc. adulterium*.) Scaliger (in *Varronem*) and
Vossius prefer an ancient Tuscan word, *umbri*, signify-
ing *spurius*.

HYBRID. See Vossius and Martinius; also the Quotation from Pliny.

HYDER-ABAD. There is no creature engendred so soone with wild of the kind, as doth the swine; and in good sooth such hogges in old time they called *hybrides*, as a man would say, halfe wild: insomuch as this tearme by a translation, hath been attributed to mankind.

Holland. *Plinie*, book viii. ch. liii.

She's a wild Irish born, sir, and a *hybride*.

Ben Jonson. *The New Inn*, act ii. sc. 2.

Let us therefore, by way of close, briefly recapitulate, and lay together the fore alledged reasons and arguments, why we should by all means deal with our separatists and dissenters as Saint Paul (a most authentick example) did with those judaizing *hybrid* Christians, viz. not give place to them at all.

South. *Sermons*, vol. v. p. 494.

But now why such different species should not only mingle together, but also generate an animal, and yet that that *hybridous* production should not again generate, and so a new race be carried on; but nature should stop here and proceed no further, is to me a mystery and unaccountable.

Ray. *Of the Creation*, part ii.

HYCLEUS, in *Zoology*, a genus of *Heteromorous*, *Coleopterous* insects, established by Latreille, belonging to the family *Cantharidæ*.

Generic character. *Antennæ* club-shaped, enlarging, with the end formed of nine joints, the last very large, and forming an ovoid button.

The type of this genus is *Mylabrus argenteus* of Fabricius.

Divisions.

HHAIDERABAD, which, as a Province (*Sûbah*) of the Moghul Empire, contained 42 Districts, (*Serkárs*), and upwards of 400 Townships, (*Perganahs*), comprehending nearly the whole territory between the Gódáverí and the Krishna, and all the low lands on the Eastern coast of the Peninsula from the Mahá-nadi to the Pannár, has been greatly diminished by the revolutions which have reduced the Musulmán power in India, but still comprehends the territories of the most powerful remaining Mohammedan Prince, the Nizám of the Dekan, whose dominions extend from the Taptí and Werdá Northwards, to the Tumlhádra and Krishna Southwards, including the Provinces of Bíder and Nándír, besides many Districts formerly attached to Aúreng-ábád, Bījápúr, and Berár; and together forming an area of nearly 95,000 square miles. The territory of Hhaider-ábád is now divided into the following Districts:

- | | |
|-----------------|------------------|
| 1. Pángal. | 9. Golkondà. |
| 2. E'dgír. | 10. Káilkondà. |
| 3. Ganpúr. | 11. Malkéír. |
| 4. Déwar-kondá. | 12. Meídak. |
| 5. Nalgondà. | 13. Kólás. |
| 6. K'hamamét. | 14. E'lg'handel. |
| 7. Warangol. | 15. Malangúr. |
| 8. B'hóngír. | 16. Rámgír. |

Soil, level, and climate

The greater part of this territory is hilly, though not mountainous, and being a part of the table-land of the Western Peninsula, is at a considerable elevation above the sea; its climate, therefore, is more temperate than that of the low lands, (*páyén g'hát*), and the thermometer sometimes sinks to 45° of Fahrenheit's scale. Its rivers are merely torrents, either entirely dry, or reduced to chains of pools in the hot season. Its soil is fertile, and would, if properly cultivated, be very productive; but from bad government the cultivation is discouraged in every way, and large tracts, once closely peopled, are now covered with brushwood and wholly desolate. Commerce is equally checked by the rapacious spirit of the administration, or the unrestrained extortion of its agents; so that, in 1809, the whole amount of European

goods annually imported did not exceed £25,000 in value. Nearly the whole Country is parcelled out into *já-gírs* or feudal lordships, many of which were granted by the Musulmán Sovereigns of the Dekan, and are considered as inalienable. Their possessors are bound by their tenures to maintain an armed force, which renders the more powerful of them nearly independent of the Sovereign. A small quantity of muslins, salt, and salt-fish and opium, the trade in which is contraband, and very injurious to the regular dealer, are almost the only articles of commerce. In 1801, the duties levied on goods imported amounted to about 15 per cent. *ad valorem*; and as this is considered as one of the most productive sources of the Nizám's revenues, the British Government found it extremely difficult to obtain any reduction of it from his Ministers.

HYDER-ABAD.
Tenures.

	Rupees.	£.	Revenues.
In 1788 his receipts were	1,23,13,880.	1,539,235	
Expenditure.	96,72,405.	1,209,050	

Leaving a surplus of . . . 26,41,475. . . 330,185

In 1803 there was a deficit of 51,48,768 rupees, (£643,596;) but in 1810 the deficit amounted only to 15,30,178 rupees, (£191,272,) the receipts having been increased to 1,85,97,340 rupees, (£2,324,667;) but this augmentation of revenue was due to an aggravated system of extortion as well as an increase of territory on the destruction of the Mahratta power, not to any real improvement of the Country. This account does not include sums received from *já-gír-dárs*, or feudal landholders, which are continually fluctuating. The following estimate is probably a near approximation to the whole annual revenue raised on the Nizám's territory:—

	Rupees.
Average receipts	1,85,87,214
Prime Minister's fees.	17,18,342
Financial Minister's (<i>Péshkár</i>) fees . .	2,86,390
Quit-rents of <i>já-gírs</i>	85,00,000
Presents	1,00,000

(£3,648,968) 2,91,91,946*

A large portion of this sum is absorbed by the expenses of the Court, and much is embezzled in various ways by the agents of Government, but the greatest part is hoarded up in the Nizám's private treasury; and in 1811 the deficit continued to increase, while the Country was so completely exhausted as to offer no prospect of any new resources.

The Country between the Krishna and Gódáverí anciently formed the Hindú kingdom of Telingáná; a territory not originally possessed by Hindús, as the languages still vernacular in it prove, and, therefore, not properly a part of Hindúst'hán, to the South of which it lies, forming a part of the Dakshin, (*Dek'hin*, or Dekan,) or Southern region. It was conquered by the Mohammedans at an early period, and formed a large part of the territories possessed by the Bahmen's Sultans. On the extinction of that dynasty, the Telingáná again became a separate Principality, under the

History.

* As 100,000 = 1 lak, and 100 laks (= 10,000,000) = 1 krór, two units, unknown in our system of numeration, occur in Indian accounts, and they are conveniently expressed by this change in the punctuation: the above sum will therefore be read off two krórs, 91 laks, 91 thousand, and 946 rupees.

HYDER-
ABAD.

name of the Kingdom of Golkondá, and its first Sultán, Culi Cutb-Sháh, ascended the throne in 1512. The last Prince of his line, Abú Hoseín, died in 1704, a prisoner in the Castle of Daúlet-ábád. His Kingdom became a Province (*Súbah*) of the Moghul Empire, and after the death of Aúreng-zéb, his Viceroy in the South (*Dekan*) made himself master of the territories placed under his direction. This Chief, whose reign began 1717, died in 1748 at the reputed age of 104 years, still contenting himself with the humble title of Minister, (*Nezzámi-l mulk*,* *i. e.* Regulator of the Empire,) though really possessed of uncontrolled power. His successors, as is well known, took an active part in the wars which so long threatened the British interests in the Peninsula, but the growing power of the Mahrattahs naturally alarmed a Musulman Prince, and 'Alí, the successor of Salábet Jang, whom he caused to be assassinated in 1763, formed a close alliance with the British Government. Having, in 1795, for a short time abandoned those allies, he engaged in a war with the Mahrattahs, which terminated in the loss of Daúlet-ábád, a very valuable part of his territory, a charge of three crores of rupees (£3,375,000) by way of indemnification, and the retention of his Prime Minister, 'Azimu-l-omará, as a hostage. In 1798 the Nezzám was prevailed upon to form a subsidiary Treaty with Great Britain, in compliance with which a detachment of 6000 men was stationed in his territories. By a subsequent Treaty, in 1800, this force was increased to 1000 cavalry and 8000 infantry, for the maintenance of which, the territories acquired by him on the destruction of Típu's power were ceded to the British Government in lieu of all future claims upon his treasury. This Treaty was offensive and defensive; and it was determined that, from that period, all external intercourse between the Nezzám and foreign Powers should be exclusively managed by the British Government, which engaged to secure that Prince from internal insurrection and external invasion, and thus released him from the harassing demands of the Mahrattahs, amounting to 45 laks (£540,000) annually. 'Alí was succeeded, in 1803, by his son, Sikandar Jáh, who, in gratitude for the freedom from all opposition with which he ascended the throne, offered to relinquish the tribute of 7 laks (£34,000) paid by the East India Company for the *Serkár* (District) of Gantúr. This offer was, however, then declined, and the *peshkesh*, or tribute, was redeemed, in 1822, for the sum of £1,000,200. In 1803 and 1804 the Nezzám's territories were augmented by all the country South of the Injárdí hills, and West of the Werdá, except the districts of Nernálá and Gáwelgar'h, retained by the Rájá of Nágpúr, and the whole tract between the Ajantí hills and the Gódáverí, including Gandá-púr and the fertile tract round Jálná-púr, was ceded to Hhaider-ábád by Sind'híá. Notwithstanding the many and great obligations of the present Nezzám to the British Government, and the gratitude which he has at times expressed, he has frequently betrayed a strong inclination to violate his engagements and abandon his alliance; but as he is a weak Prince,

* The plural of Názim, used, according to the extravagant style of adulation prevalent in India, instead of the singular, just as Nawwáh has nearly banished Náib from the Indian vocabularies. The close resemblance of Nezzám to Nizám, (order, rank, arrangement, file, &c.) from which it differs only in its vowels and the doubling of the second consonant, has completely established the latter, though erroneous, in our language.

subject to occasional fits of derangement, it is not surprising that he should be the dupe of interested knaves, whose selfish and mischievous projects are thwarted by the vigilance of the British Residents and the presence of the subsidiary force.

Hhaider-ábád, (*i. e.* Lion's Abode, or Abode of Haider,) the Capital of this Sovereignty, is in 17° 15' North and 78° 35' East, on the South side of the river Músí, which is little better than a wintry torrent. It is about four miles long and three broad, and is surrounded by a stone wall; its streets are narrow, crooked, ill-paved, formed by rows of houses, or rather wooden sheds of one story. A bridge over the Músí, broad enough for two carriages abreast, the Palace, and some of the Mosques are the only remarkable buildings; but the Tank, about a mile to the West of the town, is a public work very deserving of notice. A valley, enclosed on three sides by hills, has been converted, by a rampart or embankment (*band*) at its open end, into a vast reservoir, (*tanque*,) nearly 17 miles in circumference, and covering about 10,000 acres. It is filled by a canal from the river. The embankment, formed entirely of granite, is 3350 feet in length, and nearly 50 feet high, in the middle of the valley. It was begun by the late prime-minister Mír 'Alan, and finished by his successor, Muníru'l mulk, in 1812. The Royal residence was removed from Golkondah by Mohammed Culi Cutb-Sháh, about A. H. 995, (A. D. 1587,) to a new site 4 cós (6 miles) to the East, where he founded the City, named after B'hágmátí, his favourite mistress, B'hágnagar,* (*i. e.* B'hág-town;) but being afterwards, says Ferishtah, ashamed of it, he changed its name to Hhaider-ábád. In 1687, it was taken and plundered by the troops of Aúreng-zéb, and, on the fall of its native Princes, ceased to be a Capital, till the Nezzám 'Alí removed thither from Aúreng-ábád, about 1762, since which time it has continued to increase in wealth and population, and has now probably not less than 200,000 inhabitants.

1. Pángal, in 16° 11' North and 78° 6' East, gives its name to a small district on the banks of the Krishna. Paungul.

2. Eídgír, a small district, of which the river B'híma is the Western boundary, contains the towns of Fírúzar'h, Daúlet-ábád, and Ehídgír, in 16° 35' North and 77° 16' East. Eidgheer.

3. Ganpúr, to the South of Hhaider-ábád, is an extensive, but almost uncultivated and uninhabited district. Its Capital is in 16° 33' North and 78° 8' East, on a fortified hill, now abandoned as a place of strength. Its Mosque is one of the finest in the Nezzám's dominions. Ghunpoor.

4. Déwarkondá, on the North side of the Krishna, contains the towns of Peílwa and Nardinpet, besides that from which the district is named, situated in 16° 40' North and 78° 57' East. Dawurconda.

5. Nálkondá, on the North side of the Krishna, and crossed by the Músí, though fertile, is almost desolate. Its Capital is in 17° 5' North and 79° 16' East. Nalgonda.

6. K'hamam-eít, in 17° 16' North and 80° 11' East, is the chief town of a district bearing the same name, and bordering on the *Serkár* of Rájmanderí. It is thinly peopled, and its extensive forests afford shelter Cumnumait

* Hence the Bagnagar of the old travellers. Ferishtah, who lived in the first half of the XVIIth century, says, that "it is called by the people B'hág-nagar, not Hhaider-ábád." It must not be confounded with Biznagar, a corruption of Vijayanagara.

HYDER-
ABAD.

HYDER-ABAD. to gangs of robbers, who continually harass the industrious inhabitants of the adjoining territory.

Warangol. 7. Warangol, (Waragul, or Arankul,) in $17^{\circ} 54'$ North and $79^{\circ} 34'$ East, is an ancient city, founded in A. D. 1067, and supposed to have been then the Capital of Andhra, or Telinga, a powerful State in the Peninsula. It was finally wrested from the Hindús by the troops of Ahmed Sháh Bahmení in 1421. The district named from it is little cultivated, especially on its North-Eastern side; a natural consequence of the arbitrary, oppressive, and improvident system of government prevailing in the Nezzám's territories.

Bongheer. 8. B'hóngír, (for B'hówangiri,) to the North-East of Hhaider-ábád, on the Northern bank of the Músí, though small, is one of the most populous districts in the whole territory. Its Capital is in $17^{\circ} 28'$ North and $78^{\circ} 54'$ East.

Golkonda. 9. Golkondá, to the East of Hhaider-ábád, is an extensive district, crossed by the Músí; the mountains of which consist principally of syenite, and contain no diamonds; but opal and chalcedony are found about 40 miles to the West. The diamond mines, now nearly abandoned, are in the alluvial beds on the banks of the Kríshna and Pennár rivers, but the matrix is a sandstone breccia. As the inhabitants of this district are much engaged in cutting and polishing these stones, it is from that cause, probably, that its celebrity for them has arisen. Its fort is on a hill in $17^{\circ} 15'$ North and $78^{\circ} 32'$ East, four or five miles West North-West of Hhaider-ábád. After having been the residence of Hindú Princes possessed of a considerable territory, it became merely a Provincial town under the Bahmení dynasty, but was again a Royal residence under their successors, the Cutb-sháhi Sultáns; the last of whom was taken prisoner by the army of Aúrengzéb on the capture of the place, after a seven months' siege, in 1690. The fort is now a state-prison, and a place of refuge in case of any sudden alarm.

Coilconda. 10. Kóilkondá, in $16^{\circ} 51'$ North and $77^{\circ} 50'$ East, is the Capital of a large district little known, to the West of Golkondá.

Malkair. 11. Málkeir, in $17^{\circ} 10'$ North and $77^{\circ} 15'$ East, gives its name to a small district on the banks of the B'híma.

Maiduck. 12. Meidak, in $18^{\circ} 5'$ North and $78^{\circ} 24'$ East, is the chief town of a district traversed by the Mánjirá, and lying to the North-East of Hhaider-ábád.

Kowlas. 13. Kólás, in $18^{\circ} 14'$ North and $77^{\circ} 47'$ East, to the North-West of the Capital, is the principal place in a district little known, but enclosed on three sides by the river Mánjirá.

Elgundel. 14. El-g'handel, near the Northern extremity of the Principality, is on the North side of the little river Pannér, in $18^{\circ} 17'$ North and $79^{\circ} 4'$ East. The large district, named from it, is one of the least known in the whole of the Nezzám's territories, few parts of which have yet been visited by Europeans.

Mulangur. 15. Malangúr is a small district North-East of Hhaider-ábád. Its chief town, bearing the same name, is in $18^{\circ} 12'$ North and $79^{\circ} 18'$ East.

Ramgheer. 16. Rám-gír, or Ráma-giri, at the North-Eastern extremity of the Principality, extends across the Gódá-verí, but all to the North of that river is a part of half-civilized Hindú territory of Góndwánah. The town of Rám-giri (Rámá's Mount) is in $18^{\circ} 27'$ North and $79^{\circ} 28'$ East.

Paloonshah. 17. Pálúnshá is the Capital of a large zemíndárí in

VOL. XXIII.

the North-Western part of the Nezzám's territories, and appears not to be comprehended in any of the preceding districts. It stands in a luxuriant valley, about four miles wide, and enclosed by lofty ranges of mountains. In 1794 the town was populous and flourishing, in 1813 it was found in a wretched state. Its Chief resides at Pálkondá, an ordinary gar'hí, or mud fort, and his whole zemíndárí, though well protected by its position, is very unhealthy.

Milton. *Paradise Lost*, book x. fol. 525.

Nor neuer *hydra-headed* wilfulness

So soone did loose his seat; and all at once,
As in this king.

Shakspeare. *Henry V.* fol. 69.

Euen *hydra-like* we flesh our faults:

Our mindes doe wauer still.

Our selfe-conceits be winged: and

We flie from good to ill.

Warner. *Albion's England*, book ix.

Once more our awful Poet arms, t'engage

The threatening *hydra-faction* of the age;

Once more prepares his dreadful pen to wield,

And every Muse attends him to the field.

Tate. *Upon the Author of the Medal*.

Yet should Rebellion, bursting from the caves

Of Erebus, uprear her *hydra-form*,

To poison, Liberty, thy light divine;

Britannia! rescue Earth from such a bane.

Thompson. *Sickness*, book v.

HYDRACHNA, in *Zoology*, a genus of Water Spiders, forming the type of a family, established by Muller, but lately contracted by Latreille.

Generic character. The mouth composed of plates, forming a produced sucker; *palp*: with a mobile appendage at their extremity.

Muller has given an excellent monograph of this genus, in which he has stated exceedingly interesting accounts of its manners and habits. The type of the

HY-
DRACHNA
—
HYDRO-
CEPHA-
LUS.

genus is *H. geographica* of Muller, pl. viii. fig. 3—5. One of the largest species of the genus is three lines long; on the slightest touch it feigns death like many other water insects.

HYDRÆNA, in *Zoology*, a genus of *Pentamerous* water insects, belonging to the family *Hydrophilidæ*, established by Kugelan.

Generic character. Mandibles toothless; maxillary palpi very long, ending in a pointed slender joint; club of the antennæ commencing at the third joint; body oblong, depressed; thorax longer than broad.

The genus is nearly allied to *Elophorus*. The type is *H. riparia* of Kugelan, the *Elophorus minimus* of Fabricius.

HYDRANGEA, in *Botany*, a genus of the class *Decandria*, order *Digynia*. *Generic character:* calyx superior, five-toothed; corolla, petals five; capsule two-celled, two-beaked, bursting between the persisting styles by a terminal foramen; seeds many, striated longitudinally.

Three species natives of North America, and the well-known *H. hortensis*, native of the East Indies; this, when first introduced into England, was treated as a stove plant, but has since been found to bear the open air in the Southern parts of this island, in which situation it will grow so luxuriantly as to cover a space of several square yards.

HYDRASTIS, in *Botany*, a genus of the class *Polyandria*, order *Polygynia*. *Generic character:* calyx none; corolla, petals three; nectary none; berry compound, granulations one-seeded.

One species, *H. Canadense*, native of North America.

HYDRAU'LICK, *n.* } Gr. ὑδραυλῖς, from ὕδωρ,

HYDRAU'LICK, *adj.* } water, and αὐλός, a pipe:

HYDRAU'LICAL. } *q. d.* a pipe played by the motion of water.

See *ENCYCLOPÆDIA, MIXED SCIENCES*, vol. iii. p. 200.

I look not on a human body, as on a watch or a hand-mill, *i. e.* as a machine made up only of solid, or at least consistent parts; but as an *hydraulical*, or rather *hydraulopneumatical* engine, that consists not only of solid and stable parts, but of fluids, and those in organical motion.

Boyle. Works, vol. v. p. 232. *A Free Enquiry into the received Notion of Nature.*

And as chymistry, that is conversant about fire, so even hydrostatics and *hydraulicks*, that teach us to make engines and contrivances for lifting up, and for the conveying of water, may in divers places be of no small use to the husbandman.

Id. Ib. vol. iii. p. 407. *The Usefulness of Experimental Philosophy.*

If we had never in our lives seen any but one single kind of *hydraulick* machine, yet, if of that one kind we understood the mechanism and use, we should be as perfectly assured that it proceeded from the hand, and thought, and skill of a workman, as if we visited a museum of the arts, and saw collected there twenty different kinds of machines for drawing water, or a thousand different kinds for other purposes.

Paley. Natural Theology, ch. vi.

HYDROCELE, Gr. ὑδροκήλη, from ὕδωρ, water, and κήλη, a watery swelling or tumour. See the Quotation.

Of waterish tumours, *hydrocele* is one very remarkable species, which subdivides itself into many others. It may be generally defined, a waterish swelling of the *scrotum*.

Wiseman. Surgery, book i. ch. xxiii.

HYDROCEPHALUS, Gr. ὕδωρ, water, and κεφαλή, the head. See the Quotation.

Hydrocephalus is a watery swelling of the head, having the same original with other hydropical tumours: it is most usually the disease of children.

Wiseman. Surgery, book i. ch. xxiii.

HYDRO-
CEPHA-
LUS.

HYDRO-
GRAPHY.

HYDROCHARIS, in *Botany*, a genus of the class *Dioecia*, order *Enneandria*, natural order *Hydrocharidæ*. *Generic character:* male flower, spathe two-leaved; calyx three-cleft; corolla, petals three; female flower as the male; stigmas six, two-cleft; abortive filaments three; capsule six-celled, many-seeded, inferior.

Two species natives of North America, and *H. morsus ranæ*, the Frog Bit, native of watery places in England.

HYDROCHÆRUS, from the Greek ὕδωρ, water, and χοῖρος, a pig, Briss.; *Capibara*, Pen. In *Zoology*, a genus of animals belonging to the family *Hemiaculata*, order *Rodentia*, class *Mammalia*.

Generic character. Nose sharp, obliquely truncated at the tip, and flattened from above; upper lip entire; molar teeth four on each side in each jaw, of which the posterior are the largest, and composed of simple parallel plates, whilst the anterior three have the plates forked on the inner side in the lower, and on the outer edge in the upper jaw; body covered with rough wiry hair, tailless; feet half webbed, four toes before and three behind, furnished with claws, which are rather longer than they are wide.

H. Paraguayensis; *Sus Hydrochæris*, Lin.; *le Cabiai*, Buff.; *River Hog*, Dampier; *Capibara*, Pen. About the size of a two years old Hog, is covered with coarse, short, yellowish brown hair; the legs are short, but the toes long and connected by a short web. The *Capibara* is a native of South America, living in fenny districts near the great rivers in large herds, and uttering a loud discordant cry, like the braying of an ass; it runs slowly, but swims and dives very well, and stays long under water; it feeds both on vegetable and animal food, sitting upon its rump, and holding its food in its fore paws like a Squirrel; it is a good fisher, and brings its prey ashore in order to devour it; is easily tamed, and made familiar. It is the largest of all the *Rodentia*, except the Beaver, grows very fat, and its flesh is considered good eating.

See Cuvier, *Règne Animal*; Pennant, *History of Quadrupeds*.

HYDROCOTYLE, in *Botany*, a genus of the class *Pentandria*, order *Digynia*, natural order *Umbelliferae*. *Generic character:* umbel simple; involucre four-leaved; petals entire, spreading; fruit round or kidney-shaped.

A genus of more than thirty species, natives of both hemispheres. *H. vulgaris*, the marsh Pennywort, is a native of England.

HYDRO'GRAPHY, } Fr. *hydrographie*; It. and
HYDRO'GRAPHER, } *Sp. hidrografia*; Gr. ὕδωρ,
HYDROGRA'PHICAL. } water, and γράφ-ειν, to write,
to delineate or describe.

A delineation or description of the watery parts or portions of the globe.

Setting downe alwayes with great care and diligence, true obseruations & notes of al those countreys, islands, coasts of the sea, and other things requisite to the artes of nauigation and *hydrographie*.

Hakluyt. Voyages, &c. vol. i. fol. 417. *M. Wil. Burrough.*

Virtuoso.

HYDRO-
MANCY.

HYDROLEA, in Botany, a genus of the class *Pentandria*, order *Digynia*. Generic character: calyx five-leaved; corolla rotate or bell-shaped; base of the filaments cordate; style long, diverging; stigma peltate; capsule two-celled, two-valved.

Six species, natives of the East Indies and Peru.

HYDROMANCY, Divination by Water, is said by Natalis Comes (II. 6.) to have been the invention of Nereus, and according to Delrio, a most respectable authority in these matters, it is a method of Divination, than which *nulla fecundior imposturis*. Jamblichus, he says, mentions one kind of Hydromancy to which the Emperor Andronicus Comnenus had recourse; not in person, for regard to his character (a character richly demanding such caution!) forbade this humiliation; *ipse quidem iis nocturnis sacris interesse noluit, metu famæ ut arbitrator, sed illud Hagiochristophoritæ Stephano mandat*. This worthy applied to Sethos, a Diviner, who from his youth upward had been addicted to Magic, and on that account had been deprived of sight by the Emperor Manuel. The question proposed by Hydromancy was, who was to be the successor of Andronicus, a doubt which grievously perplexed the superstitious Tyrant, and left him in hesitation as to the fittest victim whom his suspicious vengeance might first sacrifice. The Evil Spirit when summoned, showed upon the water the letters S I, and upon being asked at what time the person so designated should succeed, he replied, before the Feast of the Exaltation of the Cross. His prediction was verified, for, within the time named, Isaac Angelus had thrown Andronicus to be torn in pieces by the infuriated populace of Constantinople. It should be remembered here that the Devil spells, as he repeats the Lord's Prayer, not in a natural order, but backwards. S I when inverted, would fairly enough represent Isaac according to all laws of Magic.

The same story is related with great spirit by Nicetas. (*Andron. Comn. II. 9.*) The arts with which the Tempter cheats the ear of his votary are vividly displayed, and there is one very picturesque touch, when the Fiend is asked respecting time, which we are surprised should have escaped Delrio, who evidently borrows from this source, though he refers to Jamblichus; *γενομένης οὖν καὶ περὶ τοῦ καιροῦ ἐρωτήσεως, ἐμπεσὼν καὶ ψοφῆσαν τῷ ὕδατι τὸ ἀερικὸν καὶ γεωχαρὲς πνεῦμα πεφοίβασται δι' ἐπασμάτων ὅποια μὴ ἐκφαίνειν χρεών*. The Annalist has already remarked, that he neither knows, nor indeed wishes to know, the method of practising Hydromancy, *ὅσα ἐμοὶ μὲν γινῶναι τε καὶ μαθεῖν οὐχ ἡδὺν, μαθεῖν δ' ἐξετέρωθεν ἔξεστι τοῖς βεβλόμενοις* but Delrio, on the contrary, *ad fugam superstitionis*, describes several kinds. In one, a ring was suspended by a thread in a vessel of water, and this being shaken, a judgment was formed according to the strokes of the ring against the sides of the vessel. In a second, three pebbles were thrown into standing water, and observations were drawn from the circles which they formed. A third depended upon the agitations of the sea; whence the learned Jesuit deduces a custom prevalent among the Oriental Christians of annually baptizing that element; at the same time taking especial care to show that the betrothment of the Adriatic by the Doge of Venice has a widely different origin. A fourth Divination was

taken from the colour of water, and certain figures appearing in it, which Varro (according to Apuleius in his *Apologia*) says afforded numerous prognostics of the event of the Mithridatic War. But this branch was of sufficient importance to deserve a separate name, and we read accordingly of *παγομαντεία*, divination by fountains, these being the waters most frequently consulted. Among the most celebrated fountains for this purpose were those of Palicorus in Sicily, which invariably destroyed the criminal who ventured to adjure them falsely in testimony of his innocence. A full account of their usage and virtue is given by Macrobius. (*Saturn. v. 19.*) Pausanias (iii. 23.) has described a fountain near Epidaurus, dedicated to Ino, into which, on her festival, certain loaves were wont to be thrown. It was a favourable omen to the applicant if these offerings were retained; on the other hand, most unlucky if they were washed up again. So, also, Tiberius cast golden dice into the fountain of Apomus, near Padua, where they long remained as a proof of the Imperial monster's good fortune in making the highest throw. (*Suet. 14.*) Several other instances of divining Springs may be found collected by the diligence of Boissard; (*de Divinatione*, 5.) and to a belief in them Delrio thinks a custom of the ancient Germans is referable, who threw their new-born children into the Rhine, with a conviction that if they were spurious they would sink, if legitimate they would swim. In a fifth method, certain mysterious words were pronounced over a cup full of water, and observations were made upon its spontaneous ebullition. In a sixth, a drop of oil was let fall on water in a glass vessel, and this furnished as it were a mirror upon which many wonderful objects became visible. This, says Delrio, is the *Modus Fessanus*. Clemens Alexandrinus is cited (*Strom. i.*) for a seventh kind, in which the women of Germany watched the sources, whirls, and courses of rivers, with a view to prophetic interpretation; the same fact is mentioned by Vives in his Commentary upon St. Augustine *de Civ. Dei*, vii. 35. In modern Italy, continues the learned Jesuit, Diviners are still to be found who write the names of any three persons suspected of theft upon a like number of little balls, (*pilulæ*), which they throw into water, and some, *his multi sceleratiores*, go to so profane an extent as to abuse even Holy Water for this most unsanctified purpose. (*Disquis. Magicæ*, lib. iv. ch. 2. *quæst. 6. sec. 3.*)

Boissard, as cited above, has explained more fully than Delrio two of these methods of Hydromancy. *Efficitur in aquâ cyatho impositâ cui annulus filo suspensus ex digito libratur ad perpendicularum in aquam: tum verbis conceptis rogatur Dæmon. Si res quæ poscitur vera est, annulus suâ sponte cyathum ferit, sin minus pendet immotus. Velis qui interrogatur mappâ caput obvolvit, super quam cyathus aquâ plenus statuitur. Tum Genio evocato obmurmurat quæ cupit scire. Quod si verbis exprimit suspectum criminis de quo quæritur, aqua effervescens confirmat cogitatum*. A very similar account is given by Wierus, (*de Præstigiis Dæmonum*, ii. 12.)

In a fragment of Varro's Book, *de Cultu Deorum*, the practice of Hydromancy is attributed to Numa: *quod ergo aquam egresserit, id est exportaverit, Numa Pompilius, unde Hydromantiam faceret, Nympham Egeriam conjugem dicitur habuisse*. (*Fragmenta*, Ed. 1623, 8vo. p. 50.) Upon this statement St. Augustine has commented as follows in the passage to which we

HYDRO-
MANCY.

HYDRO-
MANCY.HYDRO-
MEL.

have already referred: *Nam et ipse Numa ad quem nullus Dei propheta, nullus sanctus angelus mittebatur, Hydromantiam facere compulsus est, ut in aquâ videret imagines Deorum, vel potius ludificationes Dæmonum, a quibus audiret quid in sacris constituere atque observare deberet. Quod genus Divinationis idem Varro a Persis dicit allatum, et postea Pythagoram Philosophum usum fuisse commemorat.* Strabo, in like manner, has ascribed the practice to the Persians; *παρὰ δὲ τοῖς Πέρσαις οἱ μᾶργοι οἱ νεκρομάντεις καὶ ἔτι οἱ λεγόμενοι λεκανομάντεις καὶ ὑδρομάντεις.* (xvi. p. 574. Ed. Cas.)

HYDROMEL, Fr. *hydromel*; Lat. *hydromel*; Gr. *ὑδρομέλι*, from *ὑδωρ*, water, and *μέλι*, honey.

As touching the mead called *Hydromell*, it consisted in times past of rain water well purified, and hony.

Holland. *Plinie*, book xxxi. ch. vi.

In divers parts of Moscovy, and some other Northern regions, the common drink is *hydromel*, made of water fermented with honey.

Boyle. *Works*, vol. ii. p. 105. *The Usefulness of Natural Philosophy*, part ii. essay 5.

Aristotle, in the Treatise to which we are about to refer be really from his pen, is the first writer who mentions HYDROMEL, not precisely under that name, but as a wine made from Honey by the Taulantians, (near Epidamnium, Durazzo,) in Illyria. It was prepared by boiling the combs in water till half only of the original quantity was left. This decoction would keep to a great age, was rich and full bodied, and some, made in Greece, could scarcely be distinguished from old wine. (*περὶ θαυμασίων ἀκουσμάτων*, 21.) The Abate Fortis, who published his *Viaggio in Dalmazia* in 1774, met with the same liquor in the same Country. *A Mostar e nel resto della Bossina si prepara ancora dai Turchi coll' infusione de' favi nell' acqua, e per mezzo della fermentazione una sorte d' Idromele, da essi chiamata Scerbèt, che corrisponde a quella che usavano gli antichi Taulanzi abitatori del paese medesimo.* He then refers to Aristotle, and adds, in testimony of the good qualities of the modern beverage, *I nostri vicini che avrebbono un rimorso grandissimo se bevessero un bicchiere di vino, non anno poi gran difficoltà d' ubbriacarsi collo Scerbèt.* (ii. 154.)

Dioscorides (v. 7.) speaks of Hydromel as known under the name of *meletites*, both by the Greeks and Romans. Among other persons to whom he considers it medicinally useful, he recommends it *γυναῖξιν ὑδροποτούσαις*, a class of ladies which his interpreter and commentator, Marcellus Virgilius, has great difficulty in recognising; and he contends that it means women who, during their gestation, take a fancy against wine, rather than any who upon principle are professed water drinkers.

Pliny, in addition to the mention made of Hydromel in the Quotation above, has given it a good character in another place. "There is a wine, called Hydromel, made of water and honey oneley; but to have it the better some doe prescribe raine water, and the same kept five yeares for that purpose. Others, who are more wise and skilfull herein, doe take raine water, newly falne, and presently seeth it until a third part be boiled away, then they put thereto a third part also of old honey in proportion to it; and so lett them stand together in the sunne for fortie daies together, from the rising of the Dog-starre. Others, after they have remained thus mingled and incorporate together ten daies, put it up and reserve it close stopped for use; and this is called Hydromel, (*Hydromeli*.) which, when it is come to some age, hath the very tast of wine; and no places

affourdeth better than Phrygie." (Holland's *Translation*, xiv. 17. Ed. Hard. 20.) And again more fully afterwards. "Since we are entred into the vertues and operations of Honey, I must of necessitie handle and declare the qualities of Hydromel, or Honyed water, (*aqua mulsa*.) so neare a dependant thereunto. Of which there be two kinds. The one is fresh and new made in hast upon occasion, and presently used: the other is kept and preserved. As touching the former Hydromel, if it be made as it should be, of despumed and clarified honey, it is of singular use in that exquisit and sparie diet fit for sick persons, and namely in meats of light digestion; such as is a thin gruell made of naked frumentie washed in many waters; also to be joyned with restoratives, for to recover the patient's strength much enfeebled. Moreover good it is for the mouthe and stomacke, to mitigat the fretting humors settled and bedded therein; and to coole the extremitie of heat: for I find in good authors, that to ease and mollifie the belly it is better to be given cold than otherwise: as also that it is a proper and convenient drinke for those who chill and quake for cold; likewise for such as be heartlesse, and have small or no courage at all, whom those writers call *Micropsychos*."*

He then proceeds to enumerate its medical virtues, which are very numerous. It is good for a cough; when mixed with oil it is a counterpoison against white lead; it is a preservative to such as have eaten "henbane and dwale," especially if taken with asses milk. "Being applied accordingly, it taketh down all sodaine swellings, cureth dislocations, and, in one word, doth mitigate all pains. Thus much of Hydromel new made; for our moderne physicians have utterly condemned the use of that which is kept until it be stale. And this they generally hold, that it is not so harmlesse as water, nor so solid and powerful in operation as wine. Howbeit, let it be long kept, it turneth into the nature of wine; and (as all writers doe accord) then is it more hurtful to the stomacke and contrary to the sinews." (xxii. 24. Ed. Hard. 51. 2.) The French translator, in rendering this passage, observes in a note, that the best Hydromel with which he is acquainted is that made by the Ursuline Nuns at Metz; and also that he knew a person at Nancy who had been given over by his physicians in a complaint of the lungs, and who was reestablished by a copious usage of Hydromel, which he drank at his meals instead of wine.

The receipt given by Columella is much to the same effect as that by Pliny, with one addition, that the Hydromelists, after closely stopping their vessels and exposing them to the sun for forty days together, *tum demum in tabulatum quod fumum accipit reponunt.* (*de re rust.* xii. 12.)

Holinshed by no means entertained so favourable an opinion of this composition as some of the writers whom we have named above. He is speaking of Metheglin, one of the delicate sorts of drink "wherof the Welshmen make no lesse accompt (and not without cause if it be well handled) than the Greeks did of their Ambrosia or Nectar, which for the pleasantness thereof, was supposed to be such as the Gods themselves did delight in. There is a kind of swish swash made also in Essex and diverse other places, with honicombs and water, which the homelie countrie wives, putting some

HYDRO-
MEL.

* "Some read *μικροψύχτης* out of Dioscorides, having a faint and weake pulse."

HYDRO-
MEL.

pepper and a little other spice among, call Meed, verie good in my opinion for such as love to be loose bodied at large, or a little eased of the cough, otherwise it differeth so much fro the true Metheglin as chalke from cheese. Truely it (the margin calls it Hydromel) is nothing else but the washing of the combes, when the honie is wroong out, and one of the best things that I know belonging thereto is, that they spend but little labour and less cost in making of the same, and therefore no great loss if it were never occupied." (*England*, i. 286. Ed. 1807.)

The drink of which Holinshed here speaks with so much contempt, probably had not undergone the fermentation which is necessary to bring it to the excellence of genuine *μελίπαρον*, or Metheglin. In the Middle Ages *Medus*, *Medo*, or *Meda* superseded the Greek name; and the Spaniards prepared, and perhaps still use, a drink from honey and water flavoured with lemon peel, which they call *Aloxa*. (Febronius, *de Arte Vin. conficiendi Obs.* 24. 5.)

Most writers who have mentioned Hydromel, whether under its ancient or modern name, refer to Diodorus Siculus (v. 34.) as an authority for its use among the *Celtiberi*; but Diodorus in that place speaks not of *ὕδρομέλι*, but of *οἶνομέλι*, the *mulsum*, not the *aqua mulsa* of the Latins; and the two, though perpetually confounded, should be as carefully distinguished as they are by Pliny in a continuation of the last passage which we have cited from him above. It is not impossible that Diodorus may himself have confused the names, for Mead was certainly a favourite drink with the *Celtæ* and cognate nations. In the Court of the ancient British Kings the Meadmaker, *Meddydd*, claimed the eleventh grade in precedence. His land was freehold, the King provided him with a horse and a woollen garment, and the Queen with linen on the three chief Feasts. (Wotton, *Leg. Wallicæ*, i. 22. p. 43.) And, among the Triads, Mead is named as one of the three things of which the *primitiæ* were to be offered to the King. They were 1. every cask of Mead; 2. every new sentence of a judge; 3. every new song. (*Ib.* p. 311.) Taliessin drew as fervid inspiration from the fragrance of Mead as the Teian Bard from that of wine; and an Ode of the Welsh Poet, *De Mulso seu Hydromeli*, (the words are again confounded,) is recorded by Lhuyd and Tanner. (*Bibl.* 706.) Mr. Sharon Turner, in his *Vindication of the Genuineness of the Ancient British Poems, &c.* has printed this Poem, the *Mead Song*, which Taliessin is said to have written in order to procure the liberation of Elphin, whom his uncle Maelgwn had imprisoned. The following is part of Mr. Turner's spirited translation. The Bard implores the Deity

That Maelgwn of Mona be inspired with Mead and cheer us with it,

From the Mead-horns; the foaming, pure, and shining liquor
Which the bees provide, but do not enjoy.

Mead distilled I praise; its eulogy is every where;

Precious to the creature whom the earth maintains;

God made it to Man for his happiness;

The fierce and the mute both enjoy it.

(p. 59.)

In later days it does not appear to have lost its reputation. Even in Chaucer's time it is represented as one of the *offrandes d'amour* with which Absalom, the Adonis of Parish Clerks, endeavoured to conciliate the favour of his mistress. Spiced ale and wafers piping hot from the oven were but ordinary love-tokens. The young wife of the Carpenter had seen fashionable life, and required choicer delicacies,

And for she was of toun he profered mede.

The Miller's Tale, 272.HYDRO-

MUS.

So also Sir Thopas, when he is arming to fight the three-headed Giant, and requires his minstrels and jesters and merry men to make him game and glee, is presented, among other excellent beverages, with

Mede eke in a Mazeline (a mazer or maple cup.)

Rime of Sir Thopas, 3357.

HYDROMETRA, in *Zoology*, a genus of *Heteropterous* insects belonging to the family *Geocorisidæ*.

Generic character. *Antennæ* bristle-like, with the third joints much longer than the others; the front legs not folded; head cylindrical; trunk produced, in an inferior groove.

The type of the genus is *H. stagnorum*, of Latreille; the *Cimex stagnorum* of Linnæus. Common in stagnant pools.

HYDROMUS, from the Greek *ὕδωρ* water, and *μῦς*, a mouse, Geoff.; *Coypu*, Pen. In *Zoology*, a genus of animals belonging to the family *Claviculata*, order *Rodentia*, class *Mammalia*.

Generic character. Molar teeth two on a side in each jaw; their crown obliquely quadrangular, and hollowed like a spoon; feet five-toed, the front toes distinctly divided, the hind either entirely or half webbed; claws sharp, flattened; tail as long as the body.

The circumstance which led to the separation of this genus from the Linnæan Rats may be traced to a drawing of an animal by Commerson, named by him *Myopotamus Bonariensis*, which bears a striking resemblance to the Coypu discovered by Molina in the rivers of Chili, and described by him under that name, and subsequently by Don Felix d'Azarra in his *History of the Quadrupeds of Paraguay*, under the provincial name *Quouyia*.

In making inquiries with reference to this animal, M. Geoffroy found in the warehouse of a furrier at Paris many skins answering to d'Azarra's description, besides two other species closely allied to it. Unfortunately neither Molina nor d'Azarra have mentioned the characters of the teeth, but these Geoffroy has supplied from the species he discovered; and he considers it probable, from the near resemblance of the Coypu in other particulars, that it is closely allied in this also, and he has accordingly instituted the genus *Hydromus*, containing the Coypu and the other two above-named species.

The most remarkable external character of the *Hydromures* is the webbing of the hind toes, all of which are enveloped in membrane to the claws, except the outer, which is free, as are also all the toes of the fore feet, in which respect they resemble the Beavers, (with the exception that the latter have all the hind toes webbed,) as also in the shortness of the legs and the general proportions of the body; but the tail is very different, being as long as the body, of a rounded form, and covered with hair. They also differ from the Rats, in having but two instead of three molar teeth on a side in each jaw, and their crowns are excavated into two hollows by the contraction of the band of enamel, which assumes the form of the figure 8. They seem to connect the Beavers with the Rats, and are only found in the Southern parts of the New World.

The skin of these animals is covered with two kinds of hair; a very fine close kind of fur being situated about the roots of the longer hair and covered by it; this has been made use of in the manufacture of hats, as a substitute for or mixture with beaver, for the last

HYDRO-
MUS.HYDRO-
PHIS.

thirty years in Paris. The skins are known by the name of *Racoonda*, and are imported by way of Spain from America.

H. Coypu, Geoff.; *Mus Coypus*, Gmel.; *Molina's Coypu*. Is the largest of the genus, being about twenty-one inches in length, and the tail twice as long. It is mentioned by Molina as in size and colour resembling the Otter. The general colour of the animal is reddish brown on the back, but inclining to a bright brown on the sides, whilst the belly is of the same colour, but dull; this colour varies, however, as the animal erects or smoothens its coat, which depends on the hairs, being bright brown at the tip and ashy at their roots; the mouth, nose, and the whiskers, which are long and rough, are white, excepting a few black hairs; the tail is scantily covered with short, rough, dullish brown hairs, and where these are wanting it is scaly. Sometimes varieties in colour are observed, the great dorsal stripe becoming red, whilst the sides are very pale reddish brown. It is a good-tempered animal, easily domesticated, and will feed on any kind of food; naturally it lives much in the water, but utters no cry, except when injured. It is found commonly in Buenos Ayres, Chili, and Tucuman, but rarely in Paraguay.

H. Chrysogaster, Geoff.; *l'Hydromis à ventre jaune*; *Yellow-bellied Coypu*. About half the size of the last species; the back reddish brown, the belly orange; the tail entirely covered with very short rough hairs, which are very thick at its root; it has the same colour as the back in three-fourths of its length, but the remainder is white; the coat is made up of finer and shorter hair than in the last species, and cannot be so easily distinguished from the fur which lays immediately close to the skin; the membrane between the toes does not reach so far. Native of Canal d'Entrecasteaux.

H. Leucogaster, Geoff.; *l'Hydromis à ventre blanc*; *White-bellied Coypu*. About the same size as the last, with the belly and about a third of the tail white; its specific difference consists in the hind toes being only half webbed, in the greater length of the head, and the coarser texture of the fur. It is a native of the Isle of Maria.

See Geoffroy, *Annales du Musée*, tom. vi.; Illiger, *Prodromus Mammalium*.

HYDROPELTIS, in *Botany*, a genus of the class *Polyandria*, order *Polygynia*. Generic character: calyx five-leaved, slightly conniving; corolla none; capsules many, fleshy, oblong, two-celled, one and two seeded.

One species, *H. purpurea*, native of North America.

HYDROPHILUS, in *Zoology*, a genus of *Pentamerous*, *Coleopterous* insects, forming the type of the family *Hydrophilidæ*, established by Geoffroy.

Generic character. *Antennæ* of nine joints, the fore legs ending in two long spurs; the hood entire; the *palpi* filiform; the jaws horny, furnished internally with a long two-cut tooth.

Linnaeus considered these insects as forming part of the genus *Dyticus*, to which they have some relation in habits. The type of the genus is *H. piceus* of Fabricius, the largest English water insect, and, though perfectly innocent, much feared by bathers. Meigen, in the *Memoirs of the French Museum*, (vol. xiv.) has given an interesting account of the transformations of this insect; and Leon Dufour, in the *Annals of Natural Sciences of Paris*, has described its digestive organs; Lyonnet and Degeer have both studied its habits.

HYDROPHIS, from the Greek *ὕδωρ*, *water*, and

ὄφις, *a serpent*, Daud. In *Zoology*, a genus of animals belonging to the family *Serpentes*, order *Apludia*, class *Reptilia*.

HYDRO-
PHIS.

Generic character. Body long, slender, and slightly cylindrical, terminating in a tail, flattened laterally; both covered with small scales, but the top of the head with larger, generally about nine; the vent single, and without hooks; teeth very small, pointed; poison-fangs in the upper jaw.

This group of animals was well known to Ælian, who, in his *History of Animals*, book xvi. ch. viii., speaks of it as produced in the Indian sea; but doubts the poisonous nature of its bite. They are remarkable for their flat tail, which serves the purpose of an oar in sculling them through the water, and, notwithstanding Ælian's hesitation, for their poisonous fangs, which are very distinct. They are natives of warm climates.

H. Obscurus, Daud.; *Kalla-shoutur-sun* of the Indians; *Dusky Hydrophis*. About three feet in length; head small, flattened above and on the sides, covered with nine scales, exclusive of the triangular one on the nose; mouth large; eyes small and round, placed near the top of the head; scales carinated, oval, or roundish, and overlapping each other; general colour bluish black, becoming lighter on the sides and tail; the sides and belly encircled with broad, yellowish rings, becoming lighter towards the tail. Found in the estuaries about Calcutta; it swims with great velocity; if placed in fresh water or put ashore, it soon dies.

H. Chloris, Daud.; *Shoutur-sun* of the Indians; *Green Hydrophis*. Same length, its general colour leaden blue, striped transversely on the tail and belly with about sixty bands, others of the same colour completely encircle the neck. In this species Dr. Russell found two young ones alive of different sizes, besides an unhatched egg; they may, therefore, be presumed to be oviviparous.

H. Nigrocinctus, Daud.; *Kerril-pattee* of the Indians; *Black-banded Hydrophis*. Between three and four feet long; is of an olive green colour above and yellowish beneath, the body surrounded with fifty-eight black rings, and the neck with nine, all of which are broad above and narrow below. Is very venomous, a bird bitten by it dying in about seven minutes.

H. Cyanocinctus, Daud.; *Chittul* of the Indians; *Blue-banded Hydrophis*. About five feet long, is marked with sixty rings of beautiful light blue, separated by as many of yellowish white. A bird bitten in the thigh by this animal died in eight minutes.

H. Schistosus, Daud.; *Houghli-pattee* of the natives; *Slate-coloured Hydrophis*. Rather more than three feet long, has the head black, the belly and sides buff, and the back bluish. Bird killed by it in five minutes.

H. Dorsalis, Clocquet; *Enhydriis Dorsalis*, Daud.; *Mutta Pam*, *Ally Pam* of the Indians; *Dorsal Hydrophis*. About a foot long, and as thick as a man's little finger; the neck narrow, belly carinated; general colour dirty white, with a broad black stripe along the ridge of the back, waving a little in its course to either side, and more so as it approaches the tail.

H. Curtus, Daud.; *Hydrus Curtus*, Shaw; *Short Hydrophis*. About a foot long, of a pale yellow colour, marked with decurrent dusky bands, somewhat confluent above.

H. Spiralis, Daud.; *Hydrus Spiralis*, Shaw; *Spiral Hydrophis*. Two feet in length; general colour yellow, marked with longitudinal chestnut bands, which become

HYDRO-PHIS. broader beneath; a series of large, round, blackish spots, commencing from about the middle of the back to the tail. It is very remarkable for having the body alternately flatter on one side than the other, and the pattern completely expressed on the flattened side only, thus constituting several alternate spiral curves.

Cuvier includes the *Aipysurus*, *Leioselasmus*, and *Disteirus* of Lacepede (*Annales du Muséum*, tom. iv.) in this genus, but they cannot possibly belong to it, as they have no poison fangs, and must, therefore, be placed amongst those Snakes which are not poisonous.

See Daudin, *Histoire Naturelle des Reptiles*; Russell, *Serpents of the Coromandel Coast*; Shaw, *General Zoology*.

HYDROPHOBIA, } Fr. *hydrophobie*; It. and
HYDROPHOBY. } Sp. *hydrophobia*; Lat. *hydrophobia*; Gr. *ὕδροφοβία*, from *ὕδωρ*, water, and *φόβος*, fear.

Fear or dread of water.

See the Quotation from Holland.

Athenodorus, in the first book of his epidemiall or popular diseases, writeth, that not only the said leprosie, but also the *hydrophobie*, that is to say, the fear of water, occasioned by the biting of a mad dog, were first discovered in the days of Asclepiades.

Holland. *Plutarch*, fol. 638.

One would think the ancients imagin'd this disease [fanaticism] had some relation to that which they call'd *hydrophoby*.

Shaftesbury. *Enthusiasm*, sec. 6.

Here it is natural to ask, had the demons (whom you consider as bodiless and spiritual beings) any fear of being drowned? Or had they only (that symptom of one species of insanity in human beings) a *hydrophobia*, or dread of water.

Farmer. *On the Demoniacs of the New Testament*, let. 5.

HYDROPHYLAX, in *Botany*, a genus of the class *Tetrandria*, order *Monogynia*. Generic character: corolla of one petal, funnel-shaped; calyx four-parted; berry dry, angular, two-celled, dissepiment transverse, seeds solitary.

One species, *H. maritima*, native of the East Indies.

HYDROPHYLLUM, in *Botany*, a genus of the class *Pentandria*, order *Monogynia*. Generic character: corolla bell-shaped, with five melliferous grooves on the inside; stigma two-cleft; capsule globular, two-valved, one-seeded.

Four species, natives of North and South America.

HYDROPITYON, in *Botany*, a genus of the class *Decandria*, order *Monogynia*, natural order *Caryophyllæ*. Generic character: calyx five-leaved; corolla, petals five, ovate; filaments thick, pilose; stigma orbiculate; capsule one-seeded.

Two species, natives of the East Indies. Gaertner.

HYDROPIXIS, in *Botany*, a genus of the class *Didynamia*, order *Angiospermia*, natural order *Partulaceæ*. Generic character: calyx persisting, five-parted, two bractea on the exterior, the two interior lobes small; corolla unequally five-lobed; style simple; stigma capitate, three-lobed; capsule one-celled, many-seeded.

One species, *H. palustris*, native of Louisiana. Decandolle.

HYDROPORUS, in *Zoology*, a genus of *Pentamerous*, *Carnivorous* insects, belonging to the family *Dyticidæ*, established by Clairville.

Generic character. The four anterior *tarsi* in both sexes nearly alike, and spongy beneath, each having only four distinct joints, the fourth being nearly hid in a deep groove in the third; *scutellum* not visible; body oval or flat.

The type of the genus is *H. erythrocephalus*, Fabricius, common in England.

HYDRO'PSY, } Fr. *hydropisie*; Lat. *hydrops*;
HYDRO'PICAL, } Gr. *ὕδρωψ*, from *ὕδωρ*, water, and
HYDRO'PICALY, } *ὥψ*, *aspectus*, *facies*.
HYDRO'PICK. } See the Quotation from Wiseman.

He that hath the *hydropsy*, the more he drynketh the more thyrsty he is. Udall. *Floures for Latine Speaking*, fol. 83.

Some bones make best skeletons, some bodies quick and speediest ashes: who would expect a quick flame from *hydropical* Heraclitus? Sir Thomas Brown. *Ūrne-Burial*, ch. iii.

Yea, bloody Bonner had murdered many more, had not that *hydropical* humour, which quenched the life of Queen Mary, extinguished also the fires in Smithfield.

Fuller. *Worthies*. London.

It may I confess by siccidity and astriction afford a confirmation unto parts relaxed, and such as be *hydropically* disposed.

Sir Thomas Brown. *Vulgar Errours*, book ii. ch. iii.

It is just as if a physician should refuse to give drink to an *hydropick* patient; he may have it if he be willing to die, but if the other refuses his ministry in reaching it, he is charitable and kind, not imperious and usurping.

Taylor. *Rule of Conscience*, book iii. ch. iv.

Of limbs enormous, but, withal unsound,
Soft-swoln and pale, here lay the *hydropsy*;
Unwieldy man; with belly monstrous round,
For ever fed with watery supply.

Thomson. *Castle of Indolence*, can. 1.

Waterish or *hydropical* tumours are the effects of an extravasated serum, which according to the place on which it lights doth denominate the disease.

Wiseman. *Surgery*, book i. ch. xxiii.

They, nor of halt,
Hydropic tumours, nor of rot complain.

Dyer. *The Fleece*, book i.

HYDROSTATICK, } Fr. *hydrostatique*; Gr.
HYDROSTA'TICAL, } *ὕδωρ*, water, and *στατική*,
HYDROSTA'TICALLY, } *scientia ponderum seu ponderandi*. The Science of
HYDROSTATI'CIAN. } weights or weighing bodies.

See *ENCYCLOPÆDIA, MIXED SCIENCES*, vol. iii. p. 167.

And as chymistry, that is conversant about fire, so even *hydrostaticks* and *hydraulicks* that teach us to make engines and contrivances for the lifting up, and for the conveying of water, may in divers places be of no small use to the husbandman.

Boyle. *Works*, vol. iii. p. 407. *The Usefulness of Experimental Philosophy*.

But this scarce evitable imperfection of *hydrostatical* and the like experiments does not hinder, but that by their help we may make good estimates of the weights and bulks of very many bodies.

Id. *Ib.* vol. v. p. 455. *Preface to Medicina Hydrostatica*.

One of the first pieces of black marble that I examined *hydrostatically*, was found to be to water of the same bulk scarce any more than $2\frac{1}{8}$ to 1.

Id. *Ib.* vol. iii. p. 557. *On Origin and Virtues of Gums*.

It is known to *hydrostaticians* that, according to a theorem of Archimedes, the weight of a body, belonging to that kind, may be gathered from the weight of the water, that is equal in magnitude to that part of the body that is immersed in that liquor, when the solid floats freely upon it.

Id. *Ib.* vol. vi. p. 482. *Medicina Hydrostatica*, sec. 2.

Cheselden seems to have thought, that the advantage which the left [arteries] gain by going off at an angle much more acute than the right is made up to the right by their going off together in one branch. It is very possible that this may be the compensating contrivance; and if it be so, how curious, how *hydrostatical*.

Paley. *Natural Theology*, ch. xi.

HYEMAL, } Fr., Sp., and It. *hyemale*; Lat.
HYEMA'TION. } *hyemalis*, from *hyems*, winter, *arō*

HYDRO-PORUS.

HYEMAL.

HYEMAL. τοῦ ἔειν, *pluere*, to rain. *Hyemation* is not uncommon in Evelyn.

—
HYLEBA-
TES.

Of or pertaining to winter; wintry.

Beside vernal, estival, autumnal [garlands] made of flowers, the ancients had also *hyemal* garlands.

Sir Thomas Brown. *Miscellanies*, p. 92.

The American yucca is a harder plant than we take it to be; for it will suffer our sharpest winter, as I have seen by experience, without that trouble and care of setting it in cases in our conservatories for *hyemation*.

Evelyn. *Sylva*, ch. xx.

HYGIEINAL, *Hygeia*, the Goddess of Health. Gr. ὑγιεία; Fr. *hygienique*; health-preserving physic. Cotgrave.

Presenting some things relating to the *hygieinal* part of physic.

Boyle. *Works*, vol. ii. p. 103. *The Usefulness of Natural Philosophy*, Essay 4.

HYGROBIA, in *Zoology*, a genus of *Pentamerous*, *Coleopterous* insects, belonging to the family *Dyticidæ*.

Generic character. Tarsi of five distinct joints, the four in front in the male nearly equally dilated at their base into a small square palette, which is folded on the legs; *antennæ* shorter than the body; the outer *palpi* enlarged at the tip; body very convex; eyes prominent.

The type of the genus is *H. Hermannii*, the *Hydrachna Hermannii* of Fabricius, common in pools near London.

HYGROMETER, Gr. ὑγρὸν, *humidus*, wet or moist, and μέτρον, a measure.

A measure of water or the properties of water.

See MIXED SCIENCES, METEOROLOGY.

I have news from Paris, from an ingenious acquaintance there, that a friend of his has found out a very sensible *hygrometer*, which, besides marking the moistness of the air, will also be improved to wind up a pendulum; which if it succeeds, will be a kind of perpetual motion.

Boyle. *Works*, vol. vi. p. 540. J. Locke, 6th Aug. 1678.

HYGROPHILA, in *Botany*, a genus of the class *Didynamia*, order *Angiospermia*, natural order *Acanthaceæ*. *Generic character*: calyx tubular, slightly five-cleft; corolla ringent, cells of the anthers parallel; capsule many-seeded.

Of this genus, allied to *Ruellia*, one species has been discovered, native of New South Wales.

HYGROSCOPE, Gr. ὑγρὸς, *humidus*, moist, and σκοπεῖν *observare*, to observe or remark.

See MIXED SCIENCES, METEOROLOGY.

It seemed to me, if a statical *hygroscope* could be had, it would be very convenient in regard of its fitness, both to determine the degrees of the moisture, or dryness of the air, and to transmit the observations made of them to others.

Boyle. *Works*, vol. i. p. 788. *A Statical Hygroscope*, &c.

HYLEBATES, from the Greek ὕλη, a wood, and βαίνω, I walk, Illig., *Gibbon*. In *Zoology*, a genus of animals belonging to the family *Simiida*, order *Quadrumania*, class *Mammalia*.

Generic character. Teeth regularly arranged, without any gap; incisive four in each jaw, upright; cuspid rather longer than the incisive, conical; molar five on a side in either jaw, anterior two bicuspid, posterior three quadri-cuspid; facial angle 60°; rump bare, furnished with callosities, but no tail; feet and hands five-fingered, the latter touching the ground when the animal is erect.

This genus is distinguished from other Apes by the enormous length of the arms, in consequence of which the fingers touch the ground when the animal stands upright.

H. Lar, Illig.; *Simia Lar*, Lin.; *le Grand Gibbon*, Buff.; *Great Gibbon*. About four feet high; the body long and slender; the head round; head, neck, back, sides of the body and legs black; a narrow circle of grey hairs surrounding the face; ocular region, nose, and extremities of both jaws brown and naked; upper part of the feet grey, soles black. Native of India.

The species known as the *Petit Gibbon* of Daubenton is probably a variety of the *Great Gibbon*.

H. Leuciscus, Illig.; *Simia Leucisca*, Schneid.; *Moloch*, Audeb.; *Wouwou*, Camper; *Ash-coloured Gibbon*. About four feet high, but having the arms even longer, and the callosities stronger than in the *Great Gibbon*; its coat soft, woolly, and ash-coloured; the face black, surrounded by a grey circle; feet, hands, ears, and top of the head inclining to black. Native of the Moluccas and the Isles of Sunda.

H. Syndactylus, Illig.; *Simia Syndactyla*, Raffles; *Siamany* of the Malays. In height about three feet, and entirely jet black; the hair long and soft, and forming a shaggy fleece; it is remarkable for having the fore and middle toes of the hind feet connected by membranes, as far as the middle of the second phalanx, and two loose naked folds of skin on the throat, which Sir S. Raffles says he has seen occasionally inflated with air. They are numerous in the woods about Bencoolen, which they make reecho with their peculiar loud cry.

See Linnæi *Systema Naturæ* a Gmelin; Cuvier, *Règne Animal*; Raffles, in *Lin. Trans.* vol. xiii.; Pennant, *History of Quadrupeds*.

HYLLED, i. e. hilled or covered; concealed, hidden. See to HILL.

Mordre is so wlatson and abhominable
To God, that is so just and resonable,
That he ne wol not suffre it *hyled* be;
Though it abide a yere, or two or three,
Mordre will out.

Chaucer. *The Nonnes Prestes Tale*, v. 15061.

HY'LOZOISM, } Gr. ὕλη, matter, and ζωή, life.
HY'LOZOIST, } See the first Quotation from
HY'LOZOICK, } Cudworth.
HY'LOZOICAL.

Hylozoism makes all body, as such, and therefore every smallest atom of it, to have life essentially belonging to it.

Cudworth. *Intellectual System*, book i. ch. iii.

There hath been already mentioned, another form of Atheism, called by us *hylozoical*. Id. Ib.

The numen which the *hylozoick* corporealist pays all his devotions to, is a certain blind shee-god or goddess, called Nature, or the life of matter; which is a very great mystery, a thing that is perfectly wise, and infallibly omniscient, without any knowledge or consciousness at all. Id. Ib.

And from thence afterward to descend also further, to *hylozoism*, that all matter, as such, hath a kind of natural, though not animal life in it; in consideration whereof, we ought not to censure every *hylozoist*, professing to hold a deity and a rational soul immortal, for a mere disguised atheist, or counterfeit histrionical theist. Id. Ib.

The *hylozoists*, by Cudworth's account of them, ascribed a little more to their atoms, imagining them endued with a quality which, though not perception, might be stiled the seed or principle whereout by the junction of many of them together perception might be completed.

Search. *The Light of Nature pursued*, vol. ii. part i. ch. ix.

HY'MEN, } Lat. *hymen*, *hymenæus*; Gr.
HYMENE'AL, adj. } ὑμῆν, ὑμέναιος, *hymnus nuptialis*,
HYMENE'AL, n. } a nuptial hymn or song. See
HYMENE'AN, n. } HYMN.

What was his design?
Was it to break the *hymeneal* twine,
That was half twisted?
Brome. Epistle to a Gentleman who fell sick, &c.

Here in close recess
With flowers, garlands, and sweet-smelling herbs
Espoused Eve deckt first her nuptial bed,
And heavenly quires the *hymenæan* sung.
Milton. Paradise Lost, book iv. l. 711.

And though the times far differing thoughts demand,
Though war dissents from *Hymen's* holy band;
In plain unsolemn wise his faith he plights,
And calls the Gods to view the lonely rights.
Rowe. Lucan, book i

Here sacred pomp and genial feast delight,
And solemn dance, and *hymeneal* rite;
Along the street the new-made brides are led,
With torches flaming, to the nuptial bed.
Pope. Homer. Iliad, book xviii.

Thoughtless we,
That then thy Naiads *hymeneals* chant
And rocks reecho to the Tritons' shell.
Whitehead. To the Nymph of Bristol Spring.

HYMENÆA, in *Botany*, a genus of the class *Decandria*, order *Monogynia*, natural order *Leguminosæ*. Generic character: calyx coriaceous, top-shaped, five-parted; corolla, petals five, rather unequal; style twisted; pod large, dilated, filled with a farinaceous pulp.

Three species, natives of the West Indies and Madagascar. *H. courbaril* is the Locust tree; the wood is very hard and durable.

HYMENELLA, in *Botany*, a genus of the class *Tetrandria*, order *Trigynia*, natural order *Caryophyllæ*. Generic character: calyx four-parted, spreading; corolla, petals four, oblong, entire, the length of the calyx; capsule three-celled.

One species, native of Mexico.

HYMENOPAPPUS, in *Botany*, a genus of the class *Syngenesia*, order *Æqualis*. Generic character: calyx many-leaved, spreading, scales ovate, coloured; down many-leaved, chaffy.

Two species, natives of North America.

HYMENOPHYLLUM, in *Botany*, a genus of the class *Cryptogamia*, natural order *Filices*. Generic character: fructifications inserted into the margin of the frond, distinct; involucre two-valved, flattish, straight, opening outwards, longer than the column.

A genus of Ferns, containing about twenty-five species, natives of both hemispheres. *H. Tunbridgensis* and *H. alatum* are natives of England; the former is a rare plant, and is scarcely to be found but on the rocks near Tunbridge Wells.

HYMN, v. } Fr. *hymne*; It. and Sp. *hymno*;
HYMN, n. } Lat. *hymnus*; Gr. ὕμνος, ἀπὸ τοῦ
HY'MNICK, } ὕδεν, which Hesychius interprets
HY'MNING, n. } ἄδεν, λέγειν, to sing or say. Gene-
HYMNO'LOGY, } rally applied to
HYMN-BOOK. } A sacred or divine song; a song
of praise, adoration, or thanksgiving.

To *hymn*, to sing such sacred or divine songs of praise, &c.

The word of Crist dwelle in ghou plenteuousli in al wisdom, and teche and moueste ghousilf in salmes and *ymnes* and spyrytual songis in grace syngynge in ghoure hertis to the Lord.

Wiclif. Colocencis, ch. iii.

Let the word of Christ dwel in you plenteously in al wysedome. Teach & exhort your owne selues in psalmes, and *hymnes*, and spiri-
tual songes, which haue fauour with them, singynge in your hertis to the Lord.

VOL. XXIII.

HYMN.
—
HYP.

Who wont to meet
So oft in festivals of joy and love
Unanimous, as sons of one great sire
Hymning th' Eternal Father.
Milton. Paradise Lost, book vi. l. 96.

When he them on his messages doth send,
Or on his owne dread presence to attend,
Where they behold the glorie of his light,
And caroll *hymnes* of love both day and night.
Spenser. Hymn on Heavenly Love.

Where she (faire ladie) tuning her chast layes
Of England's emprise to her *hymnicke* string,
For your affect, to hear that virgin's praise,
Makes choice of your chast selfe to heare her sing.
Mirroure for Magistrates, fol. 773. England's Eliza.
Thus they in heav'n above the starry sphear
Their happy hours in joy and *hymning* spent.
Milton. Paradise Lost, book iii. l. 417.

That *hymnologie* which the primitive Church used at the offering of bread and wine for the Eucharist.

Mede. Dialogues, p. 56.

To grace those nuptials from the bright abode
Yourselves were present; where this minstrel God
(Well pleas'd to share the feast) amid the quire
Stood proud to *hymn*, and tune his youthful lyre.

Pope. Homer. Iliad, book xxiv.

We find it recorded by two of the evangelists, that our Saviour and his disciples, immediately after the institution of the Lord's supper, sung an *hymn* of praise unto God; probably the same or part of that *hymn* which the Jews used to sing after the Paschal supper.

Clarke. Sermon 6. vol. iv.

Around in festive songs the *hymning* choir
Mix the melodious voice and sounding lyre.

West. Nemean Odes.

As purity respects practice, those followers of the Count [Zinzendorf] the Moravians, give us little trouble. For (we) pass by their open *hymn-book*, a heap of blasphemous and beastly nonsense.

Warburton. The Doctrine of Grace, book ii. ch. vii.

HYOBANCHE, in *Botany*, a genus of the class *Didynamia*, order *Angiospermia*. Generic character: calyx five-leaved; corolla ringent, with no inferior lip; capsule two-celled, many-seeded.

One species, *H. sanguinea*, parasitic on the roots of trees in the South of Africa. *Persoon.*

HYOSCYAMUS, in *Botany*, a genus of the class *Pentandria*, order *Monogynia*, natural order *Solaneæ*. Generic character: corolla funnel-shaped, obtuse, irregular; stamens inclined; capsule with a lid, two-celled; seeds many, kidney-shaped.

Eight species, mostly natives of the Eastern parts of Europe and Persia. *H. niger*, the Henbane, is a native of England; it is very poisonous, but the whole plant emits such a repulsive odour, that accidents are not likely to occur from its being eaten.

HYOSERIS, in *Botany*, a genus of the class *Syngenesia*, order *Æqualis*. Generic character: calyx cap-formed, nearly round; receptacle naked; down unequal; simply pilose and membranaceous; seeds usually enveloped in the scales of the calyx.

Seventeen species, natives of Europe and North America. *H. minima* is a native of England.

HYP, }
HY'PPISH. } See HIP, ante.

Heaven send thou hast not got the *hyps*!
How! not a word come from thy lips?
Then gave him some familiar thumps;
A college joke, to cure the dumps.

Swift. Cassinus and Peter.

By cares depress'd, in pensive *hyppish* mood,
With slowest pace the tedious minutes roll,
Thy charming sight, but much more charming gust,
New life iucites and warms our chilly blood.

Gay. Wine, a Poem.

3 L

HYPÆ-
LYPTUM.
—
HYPER-
BOLE.

HYPÆLYPTUM, in *Botany*, a genus of the class *Triandria*, order *Monogynia*, natural order *Cyperaceæ*. Generic character: scales imbricated, one-flowered; calyx two-valved, membranaceous, valves somewhat unequal, scales opposite; style two-cleft, deciduous; nut enclosed in the calyx.

One species, *H. microcephalum*, a native of New South Wales.

HYPECOUM, in *Botany*, a genus of the class *Tetrandria*, order *Digynia*, natural order *Papaveraceæ*. Generic character: calyx two-leaved; corolla, petals four, the two exterior petals broad; seed-vessel a pod.

Three species, natives of Europe.

HYPELATE, in *Botany*, a genus of the class *Oc-tandria*, order *Monogynia*, natural order *Sapindaceæ*. Generic character: calyx five-leaved; corolla, petals five, shining on the inside; style simple; stigma three-angled, deflexed; drupe one-seeded.

One species, *H. trifoliata*, native of Jamaica.

HYPER. Prior seems to mean a critic or criticism upon a critic or criticism. See **HYPERCRITICISM**.

Critics I read on other men,
And *hypers* upon them again;
From whose remarks I give opinion
On twenty books, yet ne'er look in one.

Prior. *Epistle to Fleetwood Shepherd, Esq.*

HYPERANTHERA, in *Botany*, a genus of the class *Decandria*, order *Monogynia*, natural order *Legu-minosæ*. Generic character: calyx five-parted; corolla, petals unequal, inserted into the calyx; pod three-valved, knobbed; seeds winged.

Four species, natives of the East Indies Willdenow.

HYPERASPIST, Gr. ὑπερασπιστής, from ὑπέρ, over or above, and ἀσπίς, a shield; one who throws a shield over, a protector or defender.

Thus much then being acknowledged, I appeal to any indifferent reader, whether C. M. be not by his *hyperaspist* forsaken in the plain field.

Chillingworth. *The Religion of Protestants, &c.* part i. ch. i. fol. 26.

HYPERBATON, Lat. *hyperbaton*; from the Gr. ὑπερβαίν-ειν, *transgredi*, to transgress; in Latin this figure of speech is also called *transgressio*: (*quæ verborum perturbat ordinem. Ad Heren. lib. iv. c. 32.*)

See the Quotation from Smith's Longinus.

But if your meaning be with a violent *hyperbaton* to transpose the text, as if the words lay thus in order, neglect not the gift of presbytery; this were a construction like a harquebuzer shot over a file of words twelve deep, without authority to bid them stop.

Milton. *Animad. Remon. Defence*, sec. 5.

An *hyperbaton* is a transposing of words or thoughts out of their natural and grammatical order, and it is a figure stamped with the truest image of a most forcible passion.

Smith. Longinus. *On the Sublime*, sec. 21.

HYPERBOLE,
HYPERBO' LICK,
HYPERBO' LICAL,
HYPERBO' LICALY,
HYPERBO' LISM,
HYPERBO' LIST,
HYPERBO' LIZE. } Lat. *hyperbola*; Gr. ὑπερβολή, from ὑπερβάλλ-ειν, *super-jicere*, to cast or throw over. Cicero uses the equivalent name, *veritatis superlatio atque tra-jectio. de Or. lib. iii. c. 53.* See the Quotation from Blair's *Lectures*.

What was the portion of heaven's favorite, when Omniscience it self sat in council to furnish him with all those accomplishments, which his specifick capacity could contain? which questionless were as much above the *hyperboles* that fond Poetry bestows upon its admired objects, as their flatter'd beauties are really below them.

Glanvil. *The Futility of Dogmatizing*, ch. i.

What is true of the bills of some unconscionable tradesmen, "if ever paid, over paid;" may be said of this *hyperbolic* epitaph, "if ever believed, over believed."

Fuller. *Worthies. Bedfordshire.*

So as in all the Scriptures of the Old Testament throughout, is the word heaven very oft used for air, and taken also *hyperbolically* for any great height, as, Let us build us a tower, whose top may reach to heaven, &c.

Raleigh. *History of the World*, book i. ch. i. sec. 8.

For you have read peradventure (it is not likely that you have heard by relation) how strangely some of the ancientest fathers do speak, and how they *hyperbolize* sometimes in some points in their popular sermons.

Mountagu. *Appeale to Cæsar*, ch. xxii.

In gratitude to this book I have heard him *hyperbolically* say, that not only he owed more to Quintus Curtius, than Alexander did; but derived more advantage from the history of that great monarch's conquests, than ever he did from the conquests themselves.

Boyle. *Works*, vol. i. p. xvi. *Life*.

[I cannot but] cease to think the Psalmist an *hyperbolist*, for comparing the transcendent sweetness of God's word to that inferior one of honey.

Id. *Ib.* vol. ii. p. 322. *On the Style of the Holy Scriptures.*

The next figure is called *hyperbole*, or exaggeration. It consists in magnifying an object beyond its natural bounds. In all languages, even in common conversation, *hyperbolic* expressions very frequently occur; as swift as the wind; as white as the snow; and the like; and our common forms of compliment are almost all of them extravagant *hyperboles*.

Blair. *Lecture 15.* vol. i.

Some particular expressions are found in it, which, with all the allowance that can be made for the *hyperbolisms* of the oriental style, (of which, of late years, we have been accustomed to hear more than is true as applied to the sacred writers,) are not easily applicable to the parties, even in a royal marriage.

Horsley. *Sermon 5.* vol. i.

HYPERBOREAN, Lat. *hyperboreus*; Gr. ὑπερβόρεος, as if, *super Boream*, beyond Boreas, or the North.

Northerly; in the remotest North.

Thus they lash on
The snail-pac'd *hyperborean* nights, till heaven
Hangs with a juster poize.

Armstrong. *Imitation of Shakspeare.*

The **HYPERBOREANS**, says Herodotus, (iv. 13) lie beyond the Issedones, and possess the whole Country quite to the sea. This is given on the authority of Aristæas, who was reported to have penetrated as far as the Issedones; and it is conclusive that both he and Herodotus believed in a bounding Northern Ocean. But beyond the mere existence of a people so named, every thing belonging to the Hyperboreans was unknown to the Historian. Of them, he says again, (*Ibid.* 32.) neither the Scythians, nor any of the neighbouring people, the Issedones alone excepted, have any knowledge, and, indeed, what they say merits but little attention. The Delians, he continues, (33.) know more: for it appears that the Hyperboreans transmitted some offerings to Delos through the hands of intermediate nations, by a progressive route which he minutely traces. Further on, (36.) he implies a great doubt whether any such people really existed; for if there were any Hyperboreans, he argues that there should also be some Hypnotians.

Major Rennell concludes that the Country of the Hyperboreans of Herodotus began about the meridian of the Tanais, and extended indefinitely Eastward, comprising those districts which in modern times are inhabited by the Russians and Siberians, especially such of the latter as are situated on the upper parts of the rivers Oby and Irtysh. That they were, as the Histo-

HYPER-
BOLE.

HYPER-
BOREANS

HYPER-
BOREANS.

rian relates, the only nation not engaged in war with their neighbours, Major Rennell attributes to the misery of their country, which was not likely to tempt invasion from the South, and had no borderers on the North. Nevertheless, this reasoning will not account for their own peaceable abode in realms of eternal frost and desolation; for the love of migration among North countrymen has become proverbial. But the same acute writer continues, that Hyperborean among the Greeks, as Thule among the Romans, was probably used with different applications at different times, according to the progress of Geographical discovery; both meaning the remotest Northern tract of which the writer possessed any knowledge. (*Geography of Herodotus*, 148.)

Strabo refutes the argument of Herodotus founded upon the nonexistence of Hypernotians, and contends, on the authority of Eratosthenes, that it is very possible there may be such a people in the extreme South. (lib. i. p. 42. Ed. 1587.) In another place (lib. vii. p. 204) he speaks of those who describe the Hyperboreans as fablers, οἱ τοὺς Ὑπερβορέους μυθοποιούντες and so also lib. xv. p. 482. The clearest explanation which he gives of them is by declaring their name to be a relative term, Ὑπερβορέους τοὺς βορειοτάτους φασὶ λέγεσθαι. (*ut sup.* p. 42.) Diodorus Siculus (ii. 47.) has left a very full account from Hecatæus and other ancient writers of an Island to the extreme North, inhabited by the Hyperboreans. This Island is not less in size than Sicily, and it lies in the Ocean opposite to Gaul, as Rhodomannus interprets the words ἀντιπέραν τῆς Κελτικῆς. In this case our own Island, or Ireland, must be understood; but Wesseling prefers rendering Κελτικὴ Northern Germany, and refers the Island to *Sueonia*, or *Uplandia*. Diodorus proceeds, that the soil is distinguished by remarkable fertility, and produces two harvests; that this Island was the birth-place of Latona, and hence that the worship of Apollo is especially cultivated in it, and the natives are considered Priests of that Deity. Within its compass stands a magnificent consecrated district, (τέμενος,) and a Temple of a circular form, richly adorned with offerings, and dedicated to the God of Day. He has also there a Sacred City, most of the inhabitants of which are harpers, who perpetually sing his praises in the Temple. The Hyperboreans speak an idiomatic language, and from the earliest times have been singularly well affected to the Greeks, especially to the Delians and Athenians. Some Greeks have occasionally penetrated to this Country, and left behind them votive inscriptions in Hellenic characters; among these was that Abaris, of whose marvels Herodotus has spoken, without attaching much credit to them. (*ut sup.*) The Moon appears to be but a short distance from this Island, and the mountains on her face are clearly visible from it. (τινας ἐξοχὰς γεώδεις ἔχουσιν φανέρας.) Apollo visits it at the end of every 19 years, when the Great Circle of the heavenly revolutions is completed; during his stay he plays on the harp, and dances continually, even during the night, from the vernal equinox till the rising of the Pleiades, and himself is his own theme of song. The hereditary descendants of Boreas, whose line has been regularly preserved, are Governors of the City and Guardians of the Temple. Beneath this mythos it is possible that much Druidical lore may be adumbrated: but it were idle to conjecture its explanation.

Cicero has noticed the connection of a God, whom he calls the *third* Apollo, with the Hyperboreans. (*de*

Nat. Deor. iii. 23.) Pliny, like Diodorus, has founded his account of them upon Hecatæus. They have their year, he says, divided into one long six months' day and a night of equal length. "The country is open upon the sunne, of a blissefull and pleasant temperature, void of all noisome wind and hurtfull aire. Their habitations be in woods and groves, where they worship the Gods, both by themselves and in companies and congregations; no discord know they; no sicknesse are they acquainted with. They never die, but when they have lived long enough; for when the aged men have made good cheere, and annointed their bodies with sweet ointments, they leape from off a certaine rock into the sea. This kind of sepulture of all others is most happie. Some writers have seated them in the first part of the sea-coasts in Asia, and not in Europe, for that indeed some there be resembling the like manners and customes, and even so situate, named Atocori. Some have set them just in the mids betweene both Sunnes, to wit the setting of it with the Antipodes, and the rising of it with us; which cannot possibly be, considering so vast and huge a sea comming betweene. As for those that have placed them no where but in the sixe moneths day-light, (they) have written thus much of them, That they sowe in the morning, reape at noone, at sun-setting gather the fruits from the trees, and in the nights lye close shut up within caves." (*Holland's Translation*, iv. 12. Ed. Hard. iv. 26.)

The reader may find most of the above particulars, and some others also, touched upon by Spanheim, in a learned note upon the *Hymnus in Delum* of Callimachus, 281.

Among the Poets, the Geography of the Hyperboreans is first treated in the *Argonautica*, attributed to Orpheus, (1077.) but, as may be supposed, it is not laid down with sufficient precision by the Poet to enable us to rectify our Arctic Charts. The sea into which the intrepid navigators were hurried, was probably one thick beset with icebergs, whence it is described,

κρήνιον δὲ ἰ κεκλήσκουσι
πόντον Ὑπερβορέων μύροντες, νεκρὴν τε θάλασσαν.

Herodotus (iv. 32.) states that they are mentioned by Hesiod, and by Homer, at least if Homer wrote the *Epigoni*. Their happy lot is spoken of almost proverbially by Æschylus:

ταῦτα μὲν ὦ παῖ, κρίσσονα χρυσῷ,
μεγάλῃς δὲ τύχῃς καὶ Ὑπερβορέου
μύζονα φωνίς.

Choeph. 366.

Pindar makes them sacrifice Hecatombs of Asses to Apollo, and introduces the God as much amused at certain distinctive properties of those animals. (*Pyth.* x. 57.) But in this place, with Pindar, the Hyperboreans were inhabitants of the Fortunate Islands, as in some degree they seem to have been with Pliny, from the passage which we have just noticed. We read in the Greek Ode of their Virgins dancing to the lyre and the flute, and wreathing their locks with golden laurel at solemn Festivals. Disease was unknown among this holy race, which was free from the inroads of all-devouring Age. Neither War nor Toil approach them, and they escaped the avenging wrath of Nemesis. These, it is plain, are widely different from the savages of the North. In another place, (*Ol.* iii. 28.) Hercules is said to have brought the olive wreath with which the Olympic victors are crowned from the Hyperboreans, Ἰστροῦ ἀπὸ σκιαρᾶν παγᾶν. It is needless to remark

HYPER-BOREANS. upon the inconsistency which would make the olive of Northern growth.

HYPHEN. **HYPERCRI'TICK,** } Gr. ὑπέρ, above, and κριτι-
HYPERCRI'TICAL. } κός, critical; from κρίν-ειν, to discern.

Critical above or beyond; sc. the bounds of reason.

My offices and titles are, the supreme theomastix, *hypercritic*, of manners, prothonotary of abuses, &c.

Carew. Cælum Britannicum.

The *hypercriticall* controuller of Poets, Julius Scaliger, doth so severely censure nations, that hee seemed to sit in the chaire of the scornefull.

Camden. Remaines, p. 16. Inhabitants.

But I recollect the censure that has justly fallen on Zoilus, and on all the race of *hypercriticks*: I recollect also the trite idea of finding spots in the sun.

Knox. Winter Evenings, even. xxxvii.

I inclose my remarks which you may throw into the fire, if you do not like them: they are as you seemed to wish, somewhat *hypercritical*, and perhaps too severe.

Sir William Jones. Works, vol. i. p. 132. Letter to Count Reiczki.

HYPERDU'LIA, } Gr. ὑπέρ, above, and δουλεία,
HYPERDU'LICAL, } service.
HY'PERDULY. } Service above or beyond; sc. what is usually paid.

Cotgrave calls the Fr. "*Hyperdulie*. The highest worship, worship that belongs only to God."

Take care that you observe what sort of image it is, and then proportion your right kind to it, that you do not give *latría* to that where *hyperdulia* is only due; and be careful that if *dulia* only be due that your worship be not *hyperdulical*.

Taylor. Dissuasive from Popery, part ii. book ii. sec. 6.

Now call you this devotion, as you please, whether duly or *hyperduly*, or indirect, or reductive, or reflected, or anagogical worship, which is bestowed on such images.

Brevint. Saul and Samuel, ch. xvi.

HYPERICUM, in *Botany*, a genus of the class *Polyandria*, order *Polygynia*, natural order *Hypericæ*. Generic character: calyx five-parted, segments ovate, equal; corolla, petals five; styles one, three, or five; filaments numerous, divided into five bundles; capsule, cells the same in number as the styles.

A genus containing more than one hundred species, natives of both hemispheres; nine species are natives of England, elegant shrubs. The *H. Androsæmum*, with large yellow flowers and fine foliage, is a great ornament to parks.

HYPERTHETICAL, Gr. ὑπερθετικός, superlative, from ὑπέρθεσις, *supra-positio*.

But herein this case is ruled against such men, that they affirme these *hyperthetical* or superlative sort of expressions and illustrations are too bold, and bumbasted.

Chapman. Homer. Iliad, book xv. Comment. fol. 199.

HYPHÆNE, in *Botany*, a genus of the class *Dioecia*, order *Hexandria*, natural order *Palmae*. Generic character: male flower, calyx five-parted, filaments united at the base: female flower, calyx six-parted, segments rather unequal; drupe one-celled.

One species, *H. cuciphera*, native of Egypt.

HYPHEN, Gr. ὑφέν, i. e. ὑφ' ἑν; *sub unum*. See the Quotation from Tooke.

What a sight it is, to see writers committed together by the ears, for ceremonies, syllables, points, colons, commas, *hyphens*, and the like?

Ben Jonson. Discoveries, fol. 90.

All the *hyphens* in the world, (supposing *hyphens* had been then known) would not have truly joyned together the *dulce ridentem*, or *dulce loquentem*, of Horace.

Harte. Religious Melancholy.

If then I say, a *gold-ring*, a *brass-tube*, a *silk-string*: here are the substantives, *adjective posita*, yet names of things, and denoting substances. If again I say, a *golden ring*, a *brazen tube*, a *silken string*: do *gold* and *brass* and *silk* cease to be the names of things, and cease to denote substances; because, instead of coupling them with *ring*, *tube*, *string*, by a hyphen, thus -, I couple them to the same words by adding the termination *en* to each of them?

Tooke. Diversions of Purley, vol. ii. p. 429.

HYPHYDRA, in *Botany*, a genus of the class *Monoeceia*, order *Gynandria*. Generic character: male flower, calyx five-parted; corolla none; stamens six: female flower, calyx none; corolla none; style one; stigmas three; capsule three-valved, one-seeded.

One species, *H. amplexicaulis*, native of Cayenne.

HYPNUM, in *Botany*, a genus of the class *Cryptogamia*, natural order *Musci*. Generic character: capsule with a lid, veil smooth, outer fringe of sixteen teeth, dilated at the base, inner a variously toothed membrane.

A very numerous genus of Mosses, chiefly natives of the Northern hemisphere; seventy-six species are natives of England. They are all figured in Sowerby's *English Botany*.

HYPOCALYPTUS, in *Botany*, a genus of the class *Decandria*, order *Monogynia*, natural order *Leguminosæ*. Generic character: calyx five-lobed; corolla pea-flowered; pod compressed, lanceolate.

One species, *H. obcordatus*, a shrub with purple flowers, native of the South of Africa.

HYPOCHÆRIS, in *Botany*, a genus of the class *Syngenesia*, order *Æqualis*. Generic character: calyx slightly imbricate; receptacle chaffy; down on a foot-stalk, feathered.

Six species, native of Europe and Barbary; *H. maculata* and *H. radicata* are natives of England.

HYPOCHO'NDRE, } Gr. ὑποχόνδριος, qui sub
HYPOCHO'NDRY, } cartilagine est; from ὑπό,
HYPOCHO'NDRIACK, n. } under, and χόνδρος, the
HYPOCHONDRI'ACK, adj. } cartilage.
HYPOCHONDRI'ACAL.

If from the liver, there is usually a pain in the right *hypocondrie*. If from the spleene, hardness and grief in the left *hypocondrie*, a rumbling, much appetite, and small digestion.

Burton. Anatomy of Melancholy, fol. 200.

Such as are troubled with the *hypocondriaque* wind, doe often dream of navigations, and agitations upon the waters.

Bacon. On Learning, by G. Watts, book iv. ch. i. sec. 3.

In the beginning of the Spring, much troubled hee was with the inflation of the midriffe and *hypocondriall* parts.

Holland. Suetonius, fol. 75. Octavius Caesar Augustus.

Some grow sullen and peevish that they be not advanc'd; others are naturally *hypocondriacs* and saturnine, tempers of the basest alloy.

Evelyn. Publick Employment, &c. preferred to Solitude.

Those who are constantly and habitually thus troubled in mind are known, by a great many symptoms, not only to be persons of a melancholy complexion, but also to be highly under the power of *hypocondriacal* melancholy.

Sharpe. Works, vol. iii. Sermon 2.

The mistake of him who looks on himself in this light, is almost as absurd as that of the *hypocondriac* visionary, who, in the temporary madness of his reverie, imagines himself transformed into an inanimate substance.

Knox. Essays, No. 22.

Terrour has frequently excited languid *hypocondriacs*, to exertions they had deemed impossible; and all their former maladies have been obliterated by their apprehensions of impending danger.

Cogan. On the Passions, vol. i. p. 304. (Fear.)

HYPHEN.
HYPO-CHON-DRE.

HYFO-
CRISY.

HYPO'CRISY,

HYPOCRITE,

HYPOCRI'TICK,

HYPOCRI'TICAL,

HYPOCRI'TICALLY,

HYPOCRI'TISH.

Fr. *hypocrisie*; It. and Sp. *hypocrisia*; Lat. *hypocrisis*; Gr. *ὑπόκρισις*, from *ὑποκριν-έσθαι*, in its consequential usage, *simulare*, *dissimulare*, to feign or pretend what is false; to conceal or suppress what is true.

Simulation; dissimulation; the feigning or fiction of virtues not possessed; the concealment, cloaking, or suppression of real vices.

Woo to you scribes and farisees *ypocritis*, that ben lyk to sepulchris whitid, which withouten forth semen faire to men: but withynne thei ben full of bones of dede men and of alle filthe. So ye without forth semen just to men, but withynne ye ben ful of *ypocrisie* and wickidnesse.

Wiclif. *Matthew*, ch. xxiii.

Wo be to you scribes and pharises *ypocrites*, for ye are lyke vnto paynted tombes whiche appere beautyfull outwarde; but are within ful of dead bones and of all fylthynes. So are ye, for outwarde ye appere righteous vnto men, when within, ye are full of *ypocrisie* and iniquitie.

Bible, Anno 1551.

For certes many a predication
Cometh of time of evil entention,
Som for plesanse of folke, and flaterie,
To ben avanced by *hypocrisie*.

Chaucer. *The Pardoner's Tale*, v. 12345.

There ben louers of suche a sorte
That feigned them an humble porte,
And all is but *hypocrisie*,
Which with deceite and flatterie
Hath many a worthy wife begiled.

Gower. *Conf. Am.* book i. fol. 11.

My sonne, an *hypocrite* is this:
A man, which feigneth conscience,
As though it were all innocence
Without, and is not so within;
And doth so for he wolde winne
Of his desyre the vaine astate.

Id. *Ib.*

As touching that same *hypocriticall* supper, I know that they be of this minde, that thei suppose it to be the greatest iniury to the selues that may be when it is rebuked & imroued.

Calvin. *Four Godly Sermons*, sig. C. 2.

The scrupul or spyced conscience that he hath in the matter, is concerning y^e breake of her promyse made to God, and that putteth he in here, vngroundedly, doubtfully, *hypocritically*, and vterly agaynst hymselfe, as to note her in one godly office both a lawful wyfe and an whore.

Bale. *Apology*, fol. 84.

For vnder the Turke) they yet conceyue som hope ether by tribute geuinge) or by their olde *hypocritish* holy flatering fraudes to stande styll in their dignites glorie) ryches) possessions and auctorite.

Joye. *Exposicion of Daniel*, ch. vii.

For neither man nor angel can discern
Hypocrisie, the onely evil that walks
Invisible, except to God alone,
By his permissive will, through heav'n and earth.

Milton. *Paradise Lost*, book iii. l. 683.

The next thing required is sincerity of heart in doing them: we must doe them out of the fear of God, and conscience of his commandments, not out of respect of profit, or fear, or praise of men; for such as doe so are *hypocrites*.

Mede. *On Texts of Scripture*, book i. disc. xl.

Indeed it is an easie matter for any to make a slight formal profession, to run in a round of *hypocriticall* duties, and live a moral civil life; this is easie, there is nothing miraculous in this: but is it easie to pluck out the right eye, and to cut off the right hand?

Hopkins. *Sermons*, fol. 733.

But men may on this sort visite God *hypocritically*, for they may come for the fashion, they may hear with deaf ears; yea, they may understand, and yet never determine with themselves to obey that, which God requireth.

A Sermon preached by John Knox, Esay xxvi. 13.

Hypocrisy is a more modest way of sinning, it shows some reverence to religion, and does so far own the worth and excellency of it as to acknowledge that it deserves to be counterfeited.

Tillotson. *Works*. Sermon 3.

For *hypocritic* zeal
Allows no sins but those it can conceal.

Dryden. *The Medal*.

Hypocrisy, detest her as we may,
(And no man's hatred ever wrong'd her yet)
May claim this merit still—that she admits
The worth of what she mimics with such care,
And thus gives Virtue indirect applause.

Cowper. *The Task*, book iii.

He who, from a principle of gratitude to heaven, renounces those favourite sins which most easily beset him, and devotes himself to the service of his Maker, can never be suspected of pretended sanctity or *hypocritical* devotion.

Porteus. *Sermon* 15. vol. ii.

HYPOLÆNA, in *Botany*, a genus of the class *Dioecia*, order *Triandria*, natural order *Restiaceæ*. (Brown.) Generic character: calyx six-glumed: male flower, anthers simple, peltate: female flower, style two and three parted, deciduous; nut one-seeded.

Two species, natives of New South Wales.

HYPOLEPIS, in *Botany*, a genus of the class *Dioecia*, order *Monandria*. Generic character: male flower, calyx none; corolla one petal, six-parted; receptacle bearded: female flower as the male; capsule inferior, seven-celled, seven-valved, many seeded.

One species, *H. sanguinea*, parasitic on shrubs, native of the South of Africa.

HYPO'STASIS, } Fr. *hypostase*; It. *hypostasi*;

HYPO'STASY, } Lat. *hypostasis*; Gr. *ὑποστασις*,

HYPOSTA'TICAL, } (from *ὑπὸ*, *sub*, and *ιστάσθαι*,

HYPOSTA'TICALLY. } *stare*; *stare*, *sistere*, *sub*,) *subsistentia*; subsistence.

See the Quotations from Gardiner (Bishop of Winchester) and Tillotson.

Wher as in that vnion the rest is an ineffable mysterie, the two natures in Christ to haue one subsistence called & termed an *hypostase*.

Stephen Bishop of Winchester. *Of Transubstantiation*, fol. 117.

Here is a manifest indication of a higher mystery, viz. a trinity in the Persian theology; which Gerardus J. Vossius would willingly understand, according to the Christian hypothesis, of a Divine Trinity, or three *hypostases* in one and the same Deity, whose distinctive characters are goodness, wisdom, and power.

Cudworth. *Intellectual System*, book i. ch. iv.

But the word *hypostatical* is understood only by those, and but few of those, that are learned in the Greek tongue, and is properly used, as I have said before, of the union of the two natures of Christ in one person.

Hobbes. *Answer to Bishop Bramhall*, fol. 434.

Now it is evident that the object of their adoration (that which is represented to them in their minds, their thoughts and purposes, and by which God principally, if not solely, takes estimate of humane actions) in the blessed sacrament is the only true and eternal God, *hypostatically* joyned with his holy humanity, which humanity they believe actually present under the veil of the sacramental signs.

Taylor. *Liberty of Prophecy*, sec. 20.

For he [Sabellius] blasphemeth by affirming that the father is the son, and on the other side that the son is the father; but these men in a manner teach three gods, whilst they divide the holy unity into *hypostases*, alien and wholly divided from each other.

Bishop Bull. *Works*, vol. ii. p. 133. *The Catholic Doctrine concerning the Trinity*.

And this may suffice to have been spoken in general concerning that great mystery of the *hypostatical*, as they that love hard words love to call it, or personal union of the divine and human natures in the person of our blessed Saviour.

Tillotson. *Sermon* 45.

If the consecrated bread be really Christ's body, and his soul and deity be *hypostatically* united therewith (as they all teach), then I cannot see but that we are bound to perform divine worship to the elements in the sacrament, or to that which in common speech we protestants call bread and wine.

Sharpe. *Works*, vol. vii. Sermon 13.

HYPO'TENUSE, } Gr. *ὑποτενούσα*, that which

HYPO'TENUSAL. } subtends, or stretches below;

from *ὑποτίειν-εἶν*, *subtendere*, to stretch below; usually

HYPO-
CRISYHYPO-
TENUSE.

HYPO-TENUSE. applied to the side of a right-angled triangle *subtending* or opposite to the right angle.

HYPSI-PRYMNUM. Let a man of good parts know all the maxims generally made use of in mathematicks ever so perfectly, and contemplate their extent and consequences as much as he pleases, he will by their assistance, I suppose, scarce ever come to know that the square of the *hypotenuse*, in a right-angled triangle, is equal to the squares of the two other sides.

Locke. Of Humane Understanding, book iv. ch. xii. sec. 15.

If the *hypotenusal*, or screw be five, the perpendicular or elevation must be three, and the basis four.

Wilkins. Dædalus, ch. xv.

HYPO'THECATE, } Lat. *hypotheca*; Gr. ὑπο-
HYPO'THECA'TION. }θήκη, *suppositio*, ὑποτίθεσθαι,
supponere, (ὑπο, under, and τίθεσθαι, to place.)

To place or put under (obligation or bond); to pledge, to pawn.

The property thus settled was distinguished like all other *hypothecated* estates, by small columns, and inscriptions, called *ἄροι*, erected on the land, or affixed to the houses, and containing a specification of the sum for which they were pledged.

Sir William Jones. Works, vol. ix. p. 307. *A Commentary on Isæus.*

As the Athenian ὑποθήματα, or *hypothecations*, were open and notorious like our old feoffments, they seem to have provided for the issue of the marriage no less effectually than the estates in strict settlement so strongly tied by our conveyancers.

Id. Ib.

HYPO'THESIS, } Lat. *hypothesis*; Gr. ὑπό-
HYPO'THESISSE, }θεσις, *suppositio*, from ὑποτίθεσ-
HYPO'THETIC, }θαι, *supponere*, to put or place
HYPO'THETICAL, } under.
HYPO'THETICALLY. } That which is *put* or *placed*
under, subjected to; *sc.* question, inquiry; a supposition; that which is supposed.

Then began I to speake, and said; there be yet other kind of sports and plaies called mimi, of the which, some they call *hypotheses*, as it were, moralities and representations of histories.

Holland. Plutarch, fol. 623.

And verily of this nature be all those *hypothetical* propositions, copulative, disjunctive, &c.

Id. Ib. fol. 1102.

Hypothetical necessity is that which the supposition or *hypothesis* of God's foresight and pre-ordination lays upon future contingents.

Clarke. Leibnitz's Fifth Paper.

I answer, that this precept commands some things absolutely, which oblige all; some things only *hypothetically*, that is, in case God shall discover it to be his will to be obey'd in such particular instances: and consequently oblige there only, where God shall make such discoveries.

South. Sermons, vol. viii. p. 447.

One certain proof is, that the Greeks soon lost or entirely neglected it, when they began to *hypothesise*.

Warburton. The Divine Legation, book iii. sec. 4.

Essential errors in first principles, naturally and necessarily lead to erroneous inferences; and it is in vain that *hypothetic* notions will be assumed, in order to give the desired consistency to any particular theory.

Cogan. On the Passions, vol. v. p. 262. *The Mediatorial Office of Christ.*

HYPOXIS, in *Botany*, a genus of the class *Hexandria*, order *Monogynia*, natural order *Narcissi*. Generic character: spathe two-valved; corolla six-parted, persisting, superior; capsule elongated, narrow at the base; seeds roundish, naked.

About twenty species, elegant bulbous plants, mostly natives of the South of Africa.

HYPSIPRYMNUM, from the Greek ὑψος, *high*, and πρύμνα, *a ship's stern*, Illig.; *Potoroo*, White. In *Zoology*, a genus of animals belonging to the family *Salientia*, order *Marsupialia*, class *Mammalia*.

Generic character. Incisive teeth eight above, the

last on each side distant from the others; the middle two slightly conical, straight, and four times the length of the others; incisive in the lower jaw, two inclined forwards; molar five on a side in either jaw, grinders, and tuberculated; snout sharp, upper lip cleft; ears long and rounded; whiskers half the length of the head; tail moderate sized, scaly, and slightly covered with hair; fore feet five-toed, the outer two toes the shorter; hind feet thumbless, four-toed, the inner two connected, the middle twice as long as the others, and stronger; toes clawed, those of the fore feet adapted for digging.

This genus is considered by Cuvier as connecting the predacious with the herbivorous marsupial animals, and he speaks of the separate tooth on each side in the upper jaw, which is esteemed by Illiger merely as an incisive separate from the other, as a cuspid tooth: but they are especially distinguished from the predacious by the deficiency of the thumb on the hind foot. The length of their hind legs has given rise to their name, and in this circumstance they very much resemble the Kangaroos, to which, except in size and the disposition of the teeth, they approach very near; and like them their progression is by leaping. Only one species is known.

H. Marinus, Illig.; *Macropus Minor*, Shaw; *Lesser Kangaroo*, Pen.; *Kangaroo Rat*, Philips; *Potoroo*, White. About the size of a Rabbit six months old, of a pale brown mouse colour on the back, becoming lighter on the belly. Native of New Holland; its habits little known.

See Illiger, *Prodromus. Mammalia*; White, *Voyage to New South Wales*.

HYPTIS, in *Botany*, a genus of the class *Didynamia*, order *Gymnospermia*, natural order *Labiata*. Generic character: calyx five-toothed; corolla ringent, superior lip two-cleft, inferior lip three-parted, intermediate segments forming little bags; stamens inserted into the tube, declining.

Thirteen species, natives of the Northern hemisphere.

HYPUDÆUS, from the Greek ὑπό, *under*, and οὐδας, *the ground*, Illig.; *Campagnol*. In *Zoology*, a genus of animals belonging to the family *Claviculata*, order *Rodentia*, class *Mammalia*.

Generic character. Incisive teeth covered by the lips, two in each jaw, smooth in front, the lower having a wedge-shaped, rounded, cutting edge; molar three on a side in each jaw, the hinder the smallest, all placed close to each other, with broad crowns, having the ivory and enamel intermixed; snout short and obtuse; ears small and rounded; tail round, hairy, and short; toes distinct, five in front, or four with a thumb nail and five behind.

This genus has been separated from the Linnæan genus *Mus* by Pallas; the animals are wild, and live in holes which they burrow in the ground. Some of them are natives of England, but the most destructive are found only in Northern regions.

H. Amphibius, Illig.; *Mus Amph.*, Gmel.; *le Rat d'Eau*, Buff.; *Water Rat*, Pen. About seven inches long; body covered with long black hairs, intermixed with reddish; belly iron grey; tail five inches long, covered with short hair. It lives on the banks of rivers in holes, which it digs in search of roots, on which it feeds. Though its feet are not webbed, it swims and dives well, a fact which Cuvier denies. They are

HYPSI-PRYMNUM

HYPUDÆUS

HYPUDÆUS. found all over the world, but never in houses or dry districts.

The *M. Terrestris*, Lin., and *Schermauss* of Hermann, are both of this species.

H. Arvalis, Illig.; *Mus Arv.* Gmel.; *le Campagnol ou Petit Rat des Champs*, Buff.; *Meadow Mouse*, Pen. About six inches long, the head and upper part of the body ferruginous, mixed with black, belly deep ash colour; legs short, feet dusky; tail an inch and a half in length, thinly covered with hairs, and terminating in a tuft; this short tail easily distinguishes it from the other species in England. They live in companies on high and dry lands, in burrows about six inches from the surface, and divided into several apartments, from which the pregnant female sinks a hole of two or three feet in depth, terminating in a chamber about the size of a man's fist, which she lines with dry grass, and in it drops six or eight young at a birth. During summer they live in the fields, but in winter retire to the woods, where they are more readily provided with food. It is common in England, and in France is a very severe scourge, not only devouring the seed as soon as sown, but destroying it during every period of its growth. A writer in the *Dictionnaire des Sciences Naturelles* states, that according to a *procès-verbal* laid before the French Government a few years ago, the damage done in La Vendée alone in the course of two years amounted to 2,720,373 francs.

Various methods have been proposed for the destruction of these voracious Mice; grain poisoned with arsenic was suggested, but given up for fear of accident; decoctions of the *Euphorbia*, or of the *Daphne Thymelaea*, have been used, in which the grain is steeped for some days; and in some instances circular holes, about twenty inches deep, have been proposed as traps, but these can only be employed in very stiff land, for if the sides of the hole have any irregularities, the animal gets out and escapes. Notwithstanding all these plans, however, these Mice could not be kept under were it not for heavy rains which destroy them in their holes.

H. Œconomus, Illig.; *Mus Œcon.*, Pall.; *le Campagnol de Prés*, Cuv.; *Economic Rat*, Pen. Rather more than four inches long, of black colour mixed with yellow, dusky on the back, throat, chest, and belly hoary, ends of the feet dusky; tail rather more than an inch. Native of Siberia and Kamtschatka, and said to be found occasionally in Switzerland and France. The Economic Rats always avoid a sandy district, and form their burrows with much ingenuity, immediately below a turfy soil; the chambers they construct are about a foot in diameter, the roofs are of a flattened arched form, and the entrance by several, sometimes as many as twenty, narrow apertures. Close by these, other chambers are formed, which serve as magazines for the store of food gathered for their winter support, consisting of various kinds of plants, which they collect in the summer, and, after having dried in the sun, lay by till required; and occasionally they may be observed bringing out and spreading them abroad, in order to get them perfectly dry. This duty devolves principally on the female, who is much larger than the male, and is busily engaged during the summer, whilst the male wanders about alone, and feeds upon leaves, but never trenches on the winter stock, which is so great that twenty or thirty pounds of fresh roots are frequently found in one hoard. Only a single pair are found in each of these large nests, and in summer only

the female, as the male does not return before autumn.

These Campagnoles present an instance of migration, but at uncertain periods. Pallas seems to think it dependent on some instinctive foreboding of an unusual and bad season, in which their food would fail. And the Kamtschatkans are so well aware of this fact, that they are much alarmed by their departure, whilst their return in October is hailed with joy and festivity, as indicative of a good season for the chase and fishery. When about to migrate, they collect in large numbers during the Spring, and proceeding Westward, cross the Gulf of Penschinska, and then take a Southward direction. Nothing appears to stop them; they proceed onward, either over land or across rivers, or even arms of the sea, without swerving from their course, and about July reach the rivers Ochotska and Judoma, a distance of about a thousand miles. The immensity of their numbers may be in some degree estimated, when it is stated, that travellers have been detained for two hours whilst the little four-footed army passed by. Of course during this pilgrimage their numbers are considerably diminished by accident, and the violence of rapacious animals, but still the troop is not destroyed, as is proved by their return. They are never molested by the Kamtschatkans, indeed it is said, that if they find them exhausted on the banks, after having crossed a stream, they sedulously endeavour to restore them. The advantage derived from these little animals to the Kamtschatkans is very great, and the supplies they obtain by despoiling their nests are most ample; in return for which they leave some other article of food, or trifling present, with a view to propitiate them.

H. Socialis, Illig.; *Mus Soc.*, Pall.; *Social Campagnol*. About three inches long; the whiskers white; ears oval and naked; the upper parts of the body light grey, palest on the sides, and becoming white on the shoulders and belly; the nose dusky; tail slender, and about an inch in length. They live in large societies in the sandy districts of Hyrcania and the Caspian Desert, where the ground is often studded with little hillocks of earth thrown out from their burrows. They swarm in the Spring, but are not seen, or very rarely, in the autumn, and it is a query whether they migrate or shelter themselves in the bushes and hayricks; they feed principally on tulip roots.

H. Gregalis, Illig.; *Mus Greg.*, Pall.; *Baikal Rat*, Pen.; *Baikal Campagnol*. About the same size as the last, but has the legs stronger and the tail thicker; the general colour is also the same, but the specific difference is seen in the black whiskers. Are found about the Baikal Lake, and in Siberia and Hyrcania, and feed on the *Lillium Pomponium*, *Allium Tenuissimum*, and *Trifolium Lupinistrum*, the roots of which they store up against winter. They do not migrate.

H. Alliarius, Illig.; *Mus All.*, Pall.; *Garlic Rat*, Pen.; *Garlic Campagnol*. Is about four inches long, and in colour nearly resembles the last, but is distinguished by the greater length of the tail, which is streaked with a dusky line above, and the rest white. Found about the rivers Lena and Jenesei.

H. Rutilus, Illig.; *Mus Rut.*, Pall.; *Red Rat*, Pen.; *Red Campagnol*. Same size; upper parts tawny red, sides greyish yellow, under parts and feet white; nose and face very bristly; ears naked, except at tip, which is covered with a rusty down; the tail full of

HYPUDÆUS.

HYPU-
DÆUS.

HYRAX.

hair, dusky above and light beneath. Native of Siberia; does not burrow, but lives under logs, and is not torpid during winter: is not particular in its food.

H. Saxatilis, Illig.; *Mus Sax.*, Pall.; *Rock Rat*, Pen.; *Rock Campagnol*. Same size; whiskers short, snout dusky, surrounded with a slender white ring; ears rising above the fur, covered at their tips with a brown down; upper parts brown, mingled with grey, sides grey, belly light grey; legs strong; tail sparingly covered with hair. Found in the Mongolian Desert and about the Baikal, living amidst the rudest rocks, in the crannies of which it bores its hole. At first the burrow has a large and oblique winding passage, in which are one or more holes sunk downwards, and leading to the nest, which is formed of soft herbs.

H. Lemmus, Illig.; *Mus Lemmus*, Lin.; *le Lemming*, Buff.; *Lemmus*, Pen. This animal is about the size of our common Rat, and is covered with a very thin skin, the fur of which on the head and back is black and tawny, disposed in irregular patches, and the belly white tinged with yellow; its tail not above half an inch in length. The Lemmus, Lemman, or Lemming, as it is commonly called, inhabits Norway and Lapland, the country about the river Oby, and the Northern part of the Uralian chain. It makes its appearance in these countries at irregular periods, sometimes after an interval of three years. Whence it comes is very doubtful: Linnæus considers it indigenous to the Norwegian and Lapland Alps; Pontoppidan, however, asserts the Kolens Rock, which divides Nordland from Sweden, to be its original resting place. From whatever district, however, it may be derived, it is one of the most severe scourges to which the Northern part of Europe is subjected. They migrate Southward in myriads, and so suddenly, that it was formerly thought they were generated in and fell from the clouds, as mentioned by Olaus Magnus. *Per tempestates et repentinos imbres e caelo decidant, incomptum unde, an ex remotioribus insulis, et huc vento delatæ, an ex nubibus feculentis natæ deferantur.* (*Gent. Sept. Hist.* xviii. 16.) It is probable that they migrate in consequence of want of food, and as they proceed they destroy every thing, leaving a perfect waste behind them. Nothing stops their progress, neither rocks nor water, the former they compass, the latter they swim across, and although destroyed by thousands by the predacious animals, more especially the Arctic Fox, they journey onwards in an unbroken and devouring mass. They move principally by night, and rest during the day. Occasionally they breed during their journey, and carry their young either on their backs or in their mouths. By the time they have reached far Southward their numbers are so diminished that they become scarce, and few, if any, return to their original habitations. And what assists in their diminution is the frequent fights which occur among them. Mr. Arthur Brooke mentions a very curious circumstance respecting them, viz. their destruction by the Rein Deer, of which Mr. Richards informed him he had been witness.

See Pallas, *Novæ Species Quadrupedum e Glirium Ordine*; Buffon, *Histoire Naturelle*; Pennant, *History of Quadrupeds*.

HYRAX, from the Greek *ῥῆς*, or *ῥῆς*, a pig; the derivation uncertain, Hermann; *Daman*, Buff. In Zoology, a genus of animals belonging to the family *Lamnungia*, order *Pachydermata*, class *Mammalia*.

Generic character. Incisive teeth covered by the

lips, in the upper jaw two, strong, curved, separate from each other, in the lower four, inclining forwards, close, cylindrical, and their edge cut off obliquely forwards; cuspid teeth small and deciduous, sometimes wanting, always placed in a gap between the incisive and molar; molar complex, seven on each side in either jaw; snout sharpish, with the nose slightly prominent; ears short and round; body covered with thick hair; tail a mere tubercle; feet four-toed in front, the second the longest, outer shortest, three-toed behind, inner the longest; all furnished with little rounded flat hoofs, excepting the hind inner toe which is furnished with a strong claw.

This genus was included by Pallas and Erxleben among the *Caviæ*, but separated from them by Hermann, and it seems to connect the clawed with the hoofed animals, the structure of its molar teeth resembling that of the Rhinoceros in miniature, and its plantigrade motion and general form with the *Caviæ*. There appears to be but one species.

H. Setosus, Herm.; *H. Syriacus* and *Capensis*, Gmel.; *Daman Israel*, Buff.; *Bristly Cavy*, Pen.; *Klip daas*, or *Rock Badger of the Cape*; *Bristly Daman*. About seventeen inches in length, upper parts grey and ferruginous, under white; on the upper lip a strong bristly mustachio, another above the eye, and other bristles shooting irregularly from the close thick hair. They are found in Abyssinia, Egypt, and at the Cape of Good Hope; is gregarious, living among the rocks, into the clefts of which they retire when disturbed; they are used as food by the Arabs of Mount Libanus and Arabia Petræa.

Mr. Bruce considers, and is probably correct, that this is the animal mentioned in *Psalms* 104. v. 18, as the *Coney*, "The high hills are a refuge for the wild Goats; and the rocks for the *Conies*;" and also *Proverbs*, ch. xxx. v. 26, "The *Conies* are but a feeble folk, yet make they their houses in the rocks;" which agrees with what has been already said of their habitations.

Buffon has described two species, *H. Syriacus* and *H. Capensis*, but they are the same.

See Linnæi *Systema Naturæ* a Gmelin; Hermann, *Tab. Affinitatum Animalium*; Cuvier, *Règne Animal*.

HYSSOPUS, in Botany, a genus of the class *Didynamia*, order *Gymnospermia*, natural order *Labiata*. Generic character: corolla, inferior lip three-parted, intermediate segments slightly crenated; stamens straight, distant.

Three species, natives of Europe and North America. *H. officinalis*, the common Hyssop, is a native of the South of Europe.

HYSTERICK, } Fr. *hystérique*; "Affection hys-
HYSTERICKS, } terique. The suffocation of the
HYSTERICAL. } matrix." Cotgrave. It. *isterico*; Gr. *ὑστερικὸς*, *ad uterum pertinens*: τὰ ὑστερικὰ πάθη, *passiones* (sc. *suffocationes*) *uteri seu vulvæ*.

Hystericks, or *hysterical fits*, are properly fits arising from disorders in the womb; but is applied with more latitude to other fits of women.

Many of their *hysterical* patients had made complaints of such great coldness in the upper part of the head, and some also along the vertebrae of the neck and back.

Boyle. *Works*, vol. ii. p. 690. *An Examination of Mr. Hobbes's Doctrine touching Cold.*

Assa foetida sets out a perfume from Surat, and arrives a stink at London: in one place it is eat for sauce, and in the other cures *hysterick fits*.

Tatler, No. 310.

HYRAX.

HYSTE-
RICK.

HYSTERICK.

Their strong and ungrateful odour, though as disagreeable as assafoetida itself, may be conducive to prevent many distempers, and to cure nervous and hysterical horses.

HYSTERON PROTERON, Gr. ὑστερον, *posterior*, the latter; πρότερον, *prior*, the former: the last first; or according to the proverbial phrase, To set the cart before the horse.

A figure in *Rhetoric*, used for the purpose of inversion.

How wild

A *hysteron proteron's* this, which Nature crosses,
And far above the top the bottom tosses.

Beaumont. *Pysche*, can. 1. st. 85.

HYSTRIX, from the Greek ὀπίξ, *a hair or bristle*, Lin.; *Porcupine*, Pen. In *Zoology*, a genus of animals belonging to the family *Hemiaculata*, order *Rodentia*, class *Mammalia*.

Generic character. Incisive teeth two in each jaw, wedge-shaped, molar five on a side in each jaw, cylindrical, complex, and grinding, marked on their crown with four or five deep grooves; body covered with strong and sharp quills, projecting beyond others shorter, or from among hair or wool; tail variable in length; feet four-toed in front, five-toed behind, armed with strong claws.

The covering of these animals among the *Rodentia* resembles that of the Hedgehog among the *Sarcophaga*, and like it they are capable of raising the quills, (which are much larger and stronger than in the Hedgehog,) when irritated, in doing which the rattling of them makes a loud noise, and adds to the formidable appearance which the Porcupine then makes. All of them, except the crested species, have the tail long, and in some it is prehensile also. They live in burrows, and have much the same habits as the Hare and Rabbit. The grunt which they emit has caused their supposed resemblance to the Pig.

H. Cristata, Lin.; *le Porc-épic*, Buff.; *Crested Porcupine*, Pen. Rather more than two feet in length; has a long crest of stiff bristles on the top of the head reclining backwards; head, belly, and legs covered with strong bristles, terminating in soft, dusky hair, from which project the quills, which are very sharp at their extremities, varied with black and white, and nine inches long on the hinder part of the body; tail also covered with quills. Native of India, Southern Tartary, Persia, Palestine, and Africa; it is also found wild in Italy, but is not indigenous, and seems to have degenerated, as its quills are shorter and crestless. When enraged, it runs its nose into a corner, sets up its bristles, and utters a snorting noise. The assertion of its shooting its quills is fabulous.

H. Prehensilis, Lin.; *le Porc-épic à queue prenante*, Buff.; *Cuandu* of the Brazilians; *Brazilian Porcupine*, Pen. Upper parts, sides, and base of the tail covered with spines, the longest of which, measuring three inches, are on the lower part of the back and base of the tail, very sharp, white, and barred with black at their tips; they adhere closely to the skin, which is naked between them; as they approach the belly they become shorter and weaker, and on the under parts and legs are converted into dark brown bristles: the tail, which is

VOL. XXIII.

eighteen inches in length, is slender, and tapers towards the tip, the last ten inches of it nearly naked, being covered only by a few hairs; it is strongly prehensile; the claws are long, but the only appearance of thumb is a short protuberance. Native of Brazil and Mexico; lives in the woods, and feeds not only on fruits, but also poultry; it climbs but slowly, and in descending uses its prehensile tail.

H. Fasciculata, Lin.; *le Porc-épic à queue en pinceau*, Buff.; *Brush-tailed Porcupine*, Shaw; *Malacca Porcupine*, Pen. Has the body covered with quills and long bristly hair intermixed, the quills flattened like a sword blade; belly and legs covered with short, reddish, prickly hairs; tail long, and terminated by a bundle of spines, flattened like leaves of parchment. Native of India.

H. Dorsata, Lin.; *l'Urson*, Buff.; *Canada Porcupine*, Pen. About the size of a Hare, but in form resembles the Beaver; head, upper parts of the body, tail, and legs covered with soft, long, dark brown hair hiding among them the quills, of which the longest are three inches; intermixed with these are a few stiff and very long hairs, tipped with dirty white; under surface of the tail white. Native of North America. Their spines easily fall out, and are used by the Indians among their nose ornaments.

H. Macroura, Lin.; *Long-tailed Porcupine*, Pen. The body covered with long, stiff, sharp-pointed hairs, which are iridescent; the tail as long as the body, tapering much towards the tip, which is covered with a thick tuft of bristles, which appear as if jointed, swelling out in the middle like grains of rice; they are transparent and silvery. Native of the Indian Archipelago.

See Linnæi *Systema Naturæ* a Gmelin; Cuvier, *Règne Animal*; Pennant, *History of Quadrupeds*.

HYTHE, *Hithe*, or *Hide*, in Saxon *Hýþe*, the Haven, called by Leland *Portus Hithinus*, and in some old Records *Hethe*, a Borough and Market Town in the County of Kent, and one of the Cinque Ports. Leland and Lambard differ not a little respecting its ancient condition. The former represents it as having been a very great town in length, containing three Parishes, which in the reign of Edward II. was grievously afflicted by the burning of 18 score houses and more, and afterwards by a Pestilence. (*Itinerary*, vii. 140.) Lambard, who very honestly states his predecessor's opposite opinion, remarks, that both from the name and privileges of the town, he had been inclined "to think that it had been of more estimation in time past, than by any other thing now apparent may well be conjectured." Nevertheless, that having found "little (or in manner nothing) concerning this town committed to memory," either in the Saxon Antiquities or in Domesday Book, he "became of this minde, either that the place was at the first of little price, and for the increase thereof endowed with privileges, or (if it had been at any time estimable) that it continued not long in that plight." (*Perambulation of Kent*, 184.)

In the reign of Henry IV. Hythe again suffered dreadfully from fire, more than 200 houses having been burned, so that on a survey made by Elizabeth only 122 were remaining. That Queen, in the 17th year of her reign, incorporated the town, although Barons had been returned by it to Parliament as early as the 42d Edward III. The present town consists of one long principal street, parallel to the sea, and a few lesser streets crossing it at right angles. The Church of St Leonard is

3 M

HYSTR X.

HYTHE.

HYTHE.

I.

on a steep rising ground above the town. It is a large and handsome building, which in spite of modern repairs still affords many interesting remains of Norman Architecture. The chancel probably is not later than the reign of Henry III. In a Crypt beneath it is preserved a large pile of skulls, traditionally reputed to be the remains of an invading army defeated in the neighbourhood before the Conquest. They are unnoticed both by Leland and Lambard. A clear spring rises in the Churchyard, and across each end of the town flows a small stream. Two Hospitals, St. John's and St. Bartholomew's, afford Alms-houses to about sixteen poor people. The first was founded for Lepers in the XIVth century; the second was the benefaction of Haymo (Noble) de Heath, a native of this town, Confessor of Edward II., and consecrated Bishop of Rochester in 1319, who, as Godwin informs us, *in oppido Hithensi Ptochotrophium S. Bartholemæi pauperibus decem alendis instituit et prædiis dotavit viginti marcarum annui censûs*. He voluntarily retired from his Bishopric in 1352. (*De Præsul*. 532.)

Numerous Martello towers and several small forts protect the neighbouring beach, and on the heights and in the town itself are extensive Barracks. The sea has so far retreated that the body of the town is nearly a mile from the shore. Population, in 1821, 2181. Distant 65 miles South-East from London. Though said by Leland once to have possessed four Churches, it is now a Chapelry to the Parish of Saltwood. *Saltwood Castle* stands about a mile Northward from Hythe. It is beautifully situated on an eminence, bosomed in trees, and the ruins are extremely picturesque. Of its foundation nothing certain is known: it has been attributed both to the Romans and the Saxons, but the present remains are entirely of Norman character. It appears to have belonged to the See of Canterbury in the time of Henry II., and it is said to have been the

rendezvous in which the four Knights who assassinated Thomas à Becket assembled before the perpetration of that bloody act. Courtenay, who was promoted to the Archbishopric in the 5th of Richard II., greatly improved this Castle, where he resided much, and annexed to it a Park. His arms still remain over the principal entrance. The Manor was exchanged with the Crown by Archbishop Cranmer; at present it belongs to the family of Deedes of Sandling. The Keep, a superb massive square tower, with circular turrets at the angles, is still in a very perfect condition, and is inhabited as a farm-house. Many other parts of the ancient building, though unroofed, may be satisfactorily traced by their walls. The Church of *Saltwood*, dedicated to St. Peter and St. Paul, dates from the reign of Edward III. Population, in 1820, 570.

From Hythe to Boulogne, Lambard says, "is the shortest cut over the sea between England and France, as some hold opinion;" an opinion which we need not say is positively wrong: "others think that to be the shortest passage which is from Dover to Calais; and some that which is from the one Nesse to the other. But if there be any man that preferreth not haste before his good speed, let him (by mine advice) prove a fourth way, I mean from Dover to Withsand: for if Edmund Hadhenham, the penner of the Chronicles of Rochester, lye not shamefully (which thing you know how farre it is from a Monk), then at such time as King Henrie the Second, and Lewes the French King, were after long warre reconciled to amity, Lewes came over to visit King Henrie, and in his return homeward saluted Saint Thomas of Canterburie, made a princely offer at his Tombe, and (because he was very fearfull of the water) asked of Saint Thomas, and obtained, that neither he in that passage, nor any other from thenceforth that crossed the seas between Dover and Withsand, should suffer any manner of loss or shipwreck." (188.)

HYTHE

I.

I.

I is of a narrower power than E, and uttered with a less opening of the mouth, the tongue brought back to the palate, and striking the teeth next the cheek teeth. That *e* and *i* oftentimes change places has already been noticed. See *E*. Wilkins classes *i* as a lingual vowel, (less apart and free than *a* and *e*,) the breath being emitted betwixt the middle of the tongue, in a more convex posture, and the palate. It is called by Ben Jonson a letter of a double power. As a vowel, in the former or single syllables, it hath sometimes the sharp accent; as in *binding*, *thriving*; or all words of one syllable qualified by *e*, as *thine*, *strike*. But the flat in more, as in these, *bill*, *little*, and the like. In the other power it is another letter, and would ask to enjoy another *character*; for where it leads the sounding vowel, and beginneth the syllable, it is ever a *consonant*;

as in *jump*, *conjure*. And before diphthongs; as *jay*, *juice*. See Ben Jonson and Wilkins. *I*, and also *y*, are prefixed to words in old English, as *i-do* or *y-do*, *i-go*, or *y-go*. They are the remains of the A. S. *ge*, *q. v*.

Aye is constantly written *I*, in elder authors.

I, (the pronoun,) Goth. *ik*; A. S. *ic*; Ger. *ich*; D. *ik*; Sw. *jag*; Fr. *je*; It. *io*; Sp. *yo*; Lat. *ego*; Gr. *ἐγώ*. And in old English, *ich* or *ig*, now pronounced *I*: *miro inter se concentu* (says Wachter) *et fortè arcanâ quâdam vi et ratione naturæ*. This *arcana vis et ratio* might probably be discovered if the common origin and meaning of a word, so variously written, and so uniformly applied, could be ascertained. The success of Mr. Tooke with the pronouns *it* and *that*, and the article *the*, give reason to expect that he might have

I. JABBER. made this discovery. Lennep says that the Gr. $\epsilon\gamma\omega$, is $\acute{\alpha}\gamma\omega$; meaning *qui agit, unde eximie transit ad primam personam agentem denotandam*. Of $\acute{\alpha}\gamma\omega$, (differently pronounced and probably written $\epsilon\gamma\omega$, $\iota\gamma\omega$, $\acute{o}\gamma\omega$, $\acute{u}\gamma\omega$) the verbal part is $\alpha\gamma$, $\epsilon\gamma$, &c.; the termination ω is the personal pronoun $\epsilon\gamma\omega$, or as Dr. Gregory Sharpe says, the first person of the present indicative is formed by adding ω from $\epsilon\gamma\omega$ or $\acute{\epsilon}\omega$, I am, to the root; but still the ω is to be accounted for before $\epsilon\gamma\omega$ could receive from usage its character of a personal pronoun. As the old English *ich* or *ig* has left the modern *I*, a similar corruption (merely dropping the guttural γ) may from $\alpha\gamma$, $\epsilon\gamma$, or $\iota\gamma$, have given ω . Repetition is, and always has been, a constant resource to give emphasis; and $\alpha\gamma\alpha\gamma$, $\epsilon\gamma\epsilon\gamma$, $\iota\gamma\iota\gamma$, *i. e.* the verb $\alpha\gamma$ repeated, may have been intended, by the force or emphasis of repetition, to fix the act expressed by this verb $\alpha\gamma$ upon the speaker, and by the corruption of a rapid pronunciation, the repeated syllable or second $\alpha\gamma$, $\epsilon\gamma$, $\iota\gamma$, may have sunk into the mere vocal sound ω : $\epsilon\gamma\omega$ thus formed from $\epsilon\gamma\epsilon\gamma$, or $\epsilon\gamma\iota\gamma$, would be appended to the verb $\alpha\gamma$, and constitute the first person $\alpha\gamma\epsilon\gamma\omega$; which would become successively $\alpha\gamma\epsilon\omega$, $\acute{\alpha}\gamma\omega$. The Lat. *aug-eo* is considered by Lennep to have sprung from the Gr. $\acute{\alpha}\gamma\omega$; that they had the same source is very probable, and that such source was the Goth. *auk-an* is not improbable. See Wachter, *Proleg.* sec. 6.

I is used by the person speaking for or instead of the name (*nomen* or noun) by which he is called to fix the action of the verb, expressed or understood upon the person so speaking; and is, in Grammar, denominated the first personal Pronoun.

So the *ich*: so may *I* the: so may *I* prosper.

Habb geleafan ic hyt com. Mat. xiv. 27. $\Theta\alpha\pi\sigma\tau\iota\tau\iota\ \iota\gamma\omega\ \acute{\iota}\mu\iota$. *Confidete, ego sum.* Have ye trist (*i. e.* trust). *I am.*

IABOROSA, in Botany, a genus of the class Pentandria, order Monogynia, natural order Solanaceæ. Generic character: calyx five-cleft, short; corolla tubular; stamens inserted into the tube; stigma capitate.

Two species, natives of Bonaria. Willdenow.

IACARANDA, in Botany, a genus of the class Didynamia, order Angiospermia, natural order Bignoniaceæ. Generic character: calyx five-toothed; corolla tubular at the base; throat dilated, border five-lobed, unequal; filaments five, one long and sterile, villose at the apex, stigma two-cleft; capsule large, orbicular, woody, two-valved; receptacle fleshy; seeds membranaceous at the margin.

Two species, *I. Caroliniana*, and *I. Brazilian*; the latter produces the rosewood so much used for furniture.

JACENT, Fr. *jaçant*; Lat. *jacens*, from *jacere*, to lie down. Lying.

Because so laid, they [brick or squared stones] are more apt in swagging down, to pierce with their points, than in the *jaçant* posture, and so to crevice the wall.

Reliquiæ Wottonianæ, p. 20.

JACINTH, *i. e.* the *hyacinth*, a jem; Fr. *jacinthe*.

And thei that saaten on hem hadden firi haburiouns, and of *iacinct*, and of brymstoon.

Wiclif. Apocalips, ch. ix.

And I sawe them that sate on them, hauyng fyry habergions of a *iacincte* colour.

Bible, Anno, 1551.

Jacincts albeit they differ much from Amethysts in some respect, yet in lustre they approach very nere: and this is only the difference between them, that the brave violet colour, which in the Amethyst is full and rich, in the Jacint is delaied and weaker.

Holland. Plinie, book xxvii. c. 9.

The yellow *jacinth*, strength'ning sense,

Of which who hath the keeping,

No thunder hurts nor pestilence,

And much provoketh sleeping.

Drayton. The Muses' Elysium. Nymphal 10.

Her radiant car, like that which bears the sun,

Bright with the *jacinth* and pyropus shone.

Hoole. Jerusalem Delivered, book xviii.

Holland, in continuation of the passage cited above, as usual, makes Pliny speak at considerable length concerning the JACINTH, but we do not find that he has set down the marvellous property mentioned

JACINTH. in the citation from Drayton. "The Jacint also at the first sight is pleasant and acceptable, but the lovely beauty thereof vanisheth away, before it hath given a man ynough. And so farre is it off from contenting the eye fully and satisfying the pleasure therof, that it fadeth sooner than the dainty floure of that name, Hyacinthus: so quickly doth the lustre passe away, in manner before it come to the eye. Æthiopia furnisheth us with Jacinths and Chrysolithes both, which are transparent and carie the colour of gold: howbeit those of India be preferred before them; they of Bactriana likewise, if they be not spotted and flecked with divers colours. The worst of all others be the Arabian: for they bee not onely skewed in colour, but also fould and troubled: and looke what radiant lustre they have, interrupted it is with a cloud of spots; and if any chance to be clean otherwise, yet a man that looketh on them would say, they were full of their owne dust. The best are those which being laid into gold, cause it to looke whitish in manner of silver, in comparison to them. Such as bee cleare and transparent, Goldsmiths use to set within a houe of gold, so as they may be seene both beneath and above. The rest had need of a good Latten foile to give them a lustre: howbeit now adaies some that are not skilful lapidaries have taken up a custome to call some Jacints Chrysolithes, which encline to the colour of a base gold called Electrum, the which in a morning are more beautiful and glorious to the eye than all the day after. Those Jacints that come from Pontus are knowne by their lightnesse; some of them be hard, and of an orange red; others be soft and foule. Bocchus mine author reporteth that they be found in Spaine also, in that place where hee saith they sinke pits for to leuell water, and out of which the peasants doe take forth Crystall. He affirmeth also that he hath seen a Chrysolith (or Citrine Jacinth) of twelve pounds weight. Moreover there be certain Jacinths which have a white veine comming between, and these are called *Leucochrysi*. And of this kind some be named *Capniæ*, because they be smaller. You shall find of them like unto glasse beads, and yet of a shining yellow in manner of Saffron. And verely false Jacinths there be counterfeited by glasse so artificially that a man shall hardly discern them by the eye; howbeit handle and feele them, ye shall soon find the deceit, for the fine Jacinths indeed are colder naturally than those that be counterfeited. Among these Jacinths I may raunge well ynough those stones which are called *Melichrysi*, which shew as if clear honey shone through gold. These we have from India, but of all other they be most subject to injure, and will soonest breake." (xxxvii. 9. *Ed. Hard.* 41. et ss.)

Jonston, in his *Thaumatographia*, corroborates part of Drayton's statement. *Hyacinthus sereno cælo superbire dicitur impensius, nubilo obscurior. Pertinaci frigiditate densat corpora atque reficit, et gestantem a sævieste peste adserit.* (iv. 22.) But the properties of this gem are much more fully opened by Marbodeus, who, after speaking of three species of Jacinths, adds:

*Confortativæ cuncti virtutis habentur,
Tristitiamque fugant, et vanas suspitiones.
Sed quodcunque genus collo suspendere possis,
Vel digito portes, terras securus obibis.
Nec tibi pestiferæ regionis causa nocebit,
Sed magis hospitibus, censebere dignus honore,
Justaque siqua petes, nullam patiêre repulsam.*
de lap. pret. cap. 38.

Albertus Magnus (*de virt. lap.* 11.) recommends it in like manner as beneficial to travellers, and in conformity with Drayton, as a soporific, on account of its coldness. Psellus prescribes it in case of coughs, ruptures, and melancholy, to be drunk in vinegar. (*de lap. virt.* p. 35.)

The Jacinth is classed by recent Mineralogists as a sub-species of pyramidal Zircon; colours red, brown, more rarely yellow, green, and grey; semi-transparent, or transparent and refracts double; easily frangible. It is found imbedded in gneiss and syenite, in basalt and lava, and dispersed through alluvial soil; abundantly in Ceylon; in Auvergne, near Pisa, in the trap rocks round Lisbon, and in the Shire of Galloway.

JACK, Mr. Tyrwhitt in his note upon v. 14816 of Chaucer says: "I know not how it has happened, that in the principal modern languages, *John*, or its equivalent, is a name of contempt, or at least of slight. So the Italians use *Gianni*, from whence *Zani*; the Spaniards *Juan*, as *Bobo Juan*, or foolish *John*; the French *Jean*, with various additions; and in English, when we call a man a *John*, we do not mean it as a title of honour. Chaucer, in v. 3708, uses *Jacke fool*, as the Spaniards do *Bobo Juan*; and I suppose *Jack ass* has the same Etymology."

Pennant, also, in his *Zoology*, (iii. 342.) remarks: "It is very singular that most nations give the name of their favourite dish to the facetious attendant on every mountebank. Thus the Dutch call him *Pickle Herring*, the Italians *Macaroni*, the French *Jean Potage*, the Germans *Hans Wurst*, i. e. *Jack Sausage*, and we dignify him with the title of *Jack Pudding*." Thomson in his Etymons suggests an odd connection between *Jack* with a pudding or a sausage, and the Phallic emblems exhibited during the *Saturnalia*.

A *Jack-o'-lent* appears to have been some puppet which was thrown at in *Lent*, like Shrove-tide cocks. Steevens.

Jack-an-apes, and *Jack-monkey*. The Quotations from Tindall and Strype seem to speak for themselves, although Ritson has endeavoured to derive the term from *Jack Napes*, a person, says Archdeacon Nares, never heard of.

Jack-sauce, a saucy *Jack* or fellow.

Jack-guardant, a term equivalent to one still in use, a *Jack-in-office*; i. e. one who is proud of his petty office. Steevens.

Jack of the Clock, Fr. *Jacquet*. A *Jack* of the clock-house, or the little man that strikes the quarters in a clock. Cotgrave. Still preserved at St. Dunstan's, Fleet Street.

They [the Spaniards] take all proper precautions to improve the breed, and I have seen a *jack-ass* from that country, above fifteen hands high.

Goldsmith. Animated Nature, vol. ii. ch. ii. p. 29. The Ass.

The name of *JACK Ketch* seems now to have become permanently generic for the common Hangman; but it has had more than one similar predecessor. *Derrick* and his *cables* are noticed in the *Bellman of London*, 1608. *Gregory* (Brandon) is frequently mentioned in publications during the time of the Great Rebellion; and it is from this Worthy, probably, that the London Executioners derive their reputed title of Esquire; for it is recorded that Brooke, a York Herald, procured by an artifice from Sir William Segar, at that time Garter King at Arms, an attestation and confirmation of armorial bearings to the above-named Gregory. (Anstey's *Register of the Garter*, i. 399.) This History, which occurred as early as 1616, is related at length by Dr. Smith, in his *Vita Camdeni*, (xxxiv.) prefixed to the Edition of his *Epistolæ*, 1691. Brooke, or Brooksmouth, who was a consummate rogue, out of spite to Sir William Segar, whose name Smith kindly conceals, employed a man to carry to him a Coat of Arms ready drawn, pretending that they belonged to one Gregory Brandon, a Gentleman of London, then living in Spain; and to beg that he would immediately confirm them, as the vessel by which they were to be conveyed was just about to sail. Sir William Segar received his fee, and incautiously signed and sealed the document. Brooke immediately represented to Lord Arundel, one of the Commissioners for the Office of Earl Marshal, that these Arms, the bearing of the Kingdom of Arragon with a Canton of Brabant, had been granted to the common Hangman of London. The Earl acquainted the King with the matter; and James, indignant at the supposed insult offered to Spain, resolved to dismiss the unhappy King at Arms, and fine him severely in the Star Chamber. Upon some further explanation Segar pleaded oversight, and Brooke impudently avowed the fraud, which he said he had practised in order to expose the sordidness of the King at Arms. Both were committed to prison. Segar was released, upon the presentation of ample testimonies to his inte-

grity; and Brooke also contrived to obtain pardon, after a severe reprimand. It is almost needless to add, that Brooke is the same person who was the bitter enemy and the malicious calumniator of the learned Camden himself.

Gregory was succeeded by *Dun*, who is immortalized in *Hudibras*. (Part iii. Cant. 4. 1534.) Dun is mentioned also by Tom D'Urfey, in the early part of *Butler's Ghost*, (p. 29,) published in 1682; but before that Poem was wholly printed, *Jack Ketch* (p. 54) had assumed the office, of which ever since he has continued in nominal possession.

JACK, s. a kitchen *jack*, and *jack, lignum bifurcatum*, are accounted for by Skinner, as in the Quotation from Watts.

The velocity of motion prevents the sence oft. Thus a bullet passeth by us, and out-runs the nimblest opticks; and the fly of a *jack* in its swiftest rounds, gives the eye no notice of its circulations.

Glanvil. The Vanity of Dogmatizing, ch. ix. fol. 79.

If we suppose a man tied in the place of the weight, it were easy by a single hair fastened unto the fly or balance of the *jack*, to draw him up from the ground.

The celebrated watchmaker [Mr. Tompion] who was originally a *jacksmith*.

Dryden. Letter 17. To Mr. Tonson, 1696.

So footboys, who had frequently the common name of *Jack* given them, were kept to turn the spit, or to pull off their master's boots; but when instruments were invented for both these services, they were both called *jacks*, though one was of iron, the other of wood, and very different in their form.

Watts. Logic, part i. ch. iv.

Beckmann (iii.453.) has not traced the invention of a *roasting JACK* beyond the middle of the XVIth century, when Scappi, *Cuoco Secreto di Papa Pio V.* gave an engraving of one, *molinella a fumo*, in his *Opera*. But in the Will of Roger Ive Clericus, *Magister Collegii Beatae Mariæ Magdalænæ de Battailfield juxta Salopiam* in the reign of Henry VI., dated October 30, 1444, the testator bequeaths to the Chaplains of his College *tres ollas æneas in Coquind, duas spites et duas Rakkes de ferro, unam Cobbard, unum veru cum rotis ferreis et suis ponderibus ad assandum et vertendum cibaria*. This document is printed at length by Dugdale, in his *Ecclesiæ Collegiatae*, p. 186. Ed. 1673. In the days of Montague, who travelled through Germany and Switzerland to Italy, in 1580—1, a *Jack* was sufficiently uncommon to be thought worthy of a particular description. He saw one at Brixen, in the Tyrol. *Il y avoit là une façon de tourner la broche qui estoit d'un engin à plusieurs roues, où montoit à force une corde autour d'un gros vesseau de fer. Elle venant à se debander, on arrestoit son reculement en manière que ce mouvement duroit près d'une heure, et lors il le failloit remonter: quant au vent de la fumée nous en avions veu plusieurs.* (*Journal*, i. 165. Rome, 1774.)

The common *roasting Jack* consists of a double set of wheels, a barrel round which the rope fastened to the pullies is wound, a perpetual screw, and a fly; occasionally there is added a multiplying wheel, upon which the rope is first wound before it passes upon the barrel; as this wheel is considerably larger than the barrel, the *Jack* is proportionably longer in running down. The *smoke Jack* is moved by a fan placed horizontally in the chimney, and being carried about perpetually by the smoke of the fire, requires no machinery for winding it up. Spiral flyers coiling about a vertical axle are sometimes used, and occasionally a vertical wheel with sails like the floatboards of a mill.

JACK.

JACK.

JACK, } Junius says, "*Jack, jacket, or*
 JA'CKET, } *kassock, Gallicum pallium. Fr. ja-*
 JACK-BOOTS. } *que, casaque; It. giacco, casacco, ca-*
sachino; Sp. jaca, casaca; B. jacke, kajacke, kasacke."
 He adopts from Vossius the Gr. *κάσας*; Lat. *casa*, ap-
 plied generally to that which, any thing which, covers;
 and that *jacke* is corrupted from *kajacke*. See Vossius,
de Vit. lib. iii. c. 3. Skinner suggests the Lat. *sagum*,
 which (see Du Cange in v.) was "a military vest
 thrown over the armour," peculiar to the Gauls, as
 Varro, Diodorus Siculus, and others testify. Wachter
 (*hoc non obstante*) prefers the Gr. *ἰωγή*, *tegmen*, a cover-
 ing. See CASSOCK.

The coat of mail is itself called a *jack*, as well as the
 vesture thrown over it.

A *jacket*, (*tunica brevior*, Skinner,) a short coat.

Jack-boots, large boots to cover or protect the legs.

— Aeneas, whom with sword through brasen shield,
 And through his plated *jacke* he thrust into the syde.

Phaer. Virgil. *Æneidos*, book x. sig. E. e. 2.

Habbergyons had they vpon thē lyke *jacks* of yron mayle.

Bale. *Image*, part i. Q. 6.

But at those dayes the yomen had theyr lymmes at lybertie, for
 theyre hosyn were than fastened w^t one poynt, and theyr *iackes*
 [were] longe and easy to shote in, so that they myght drawe bowes
 of great strenght, & shote arowes of a yerde longe, besyde the hede.
 Fabyan, Anno 1415.

The whiche came shortly to London, a lytell before his coronacion,
 and musteryd in the Moore Fields wele vpon iiiij. men in theyr beste
iakkis.
 Id. Anno 1483.

Aloft their shirts they weare a garment *iacket* wise.

Hakluyt. *Voyage*, &c. vol. i. fol. 387. M. G. Turberuill.

And at the first appearing of day-light, when as now the enemies
 were within view (as who before time had not beene in sight) all
 glittering with their bright helmets, and terribly clad in stiff and
 stubborne *jacks*, our soldiers eage of fight, and sharply set to give
 bataille, charged upon them right valiantly.

Holland. *Ammianus Julianus*, fol. 242.

And first for the *Æquians* and *Volocians*, those eternall and perpe-
 tuall enemies of this cittie, they shall not so soone at any time stirre
 and put out their heads, but we will be streight upon their *jacks*.

Id. *Livius*, fol. 269.

Some of them have *jackets* made of plantain-leaves, which were
 as rough as any bear's-skin.

Dampier. *Voyages*, &c. Anno 1687.

A nail uncut and head uncomb'd, she loves;

And would draw on *jack-boots*, as soon as gloves.

Young. *The Love of Fame. Satire 6.*

They [the minones, or thief-takers] wear a short striped waistcoat,
 and over it a red *jacket*, with large silver buttons like bells dangling
 from it.

Swinburne. *Spain. Letter 9.*

Du Cange, omitting the sources which we have given
 above for JACK, *Jacke, Jacque*, proceeds to another,
 which he introduces with convenient Etymological he-
 sitation, *nescio an a Jacobis factiosus*. That is from
 the insurgent peasants in the reign of John II. of
 France, in the year 1358. The Noblesse, whenever
 they exercised any of their oppressive privileges upon a
 peasant, spoke of him contemptuously, as *Jacques bon*
homme. In the furious and most atrocious reprisals
 to which the great mass of the commonalty was driven
 by desperation, at the time of which we are now speak-
 ing, they were headed by a chief named Caillet, who
 assumed the title which had been given in tyrannical
 mockery, and from whom his band of followers was
 termed *la Jacquerie*. Du Cange, although he throws
 out this suggestion, does not produce any connecting
 link between the two words. Of the enormities of the
Jacquerie many particulars may be found in Froissart.
 (Johnes's *Translation*, ch. 179—182. vol. ii. p. 387.)

Du Cange, however, gives a very full and valuable
 account of the Jack itself, such as it was worn by the
 Royal Archers of France, from a Charter of the time
 of Louis XI. *Premièrement leur faut desdits Jacques*
de 30. toilles, ou de 25. à un cuir de serf à tout le moins:
et si sont de 31. cuir de serf, ils sont de bons. Les toilles
usées et deliées moyennement sont les meilleures, et doi-
vent estre les Jacques à quatre quartiers, et faut que les
manches soient fortes, comme le corps, réservé le cuir.
Et doit être l'assiette des manches grande, et que l'assiette
prengne pres du collet, nonpas sur l'os de l'espaule, qui
soit large dessous l'aisselle, et plantureux dessous le bras,
asses faulce et large sur les costez bas, le collet fort comme
le demourant du Jacques: et que le collet ne soit pas
trop hault derrière pour lamour de salade. Et faut
que ledit Jacques soit lassé devant, et que il ait dessous
une porte piece de la force dudit Jacques. Ainsi seur
le dit Jacques et aissé, moiennant qu'il ait un pourpoint
sans manches, ne collet, de deux toilles seulement, qui
n'aura que quatre doys de large sur l'espaule: auquel
pourpoint il attachera ses chausses; ainsi flotera dedans
son Jacques, et sera à son aise; car il ne vit onques tuer
de coups de main, ne de flesche dedans les dits Jacques
ses hommes, et se y souloient les gens bien combattre.
 Père Daniel, in citing this Charter, adds, that it is far
 from a new invention, for that such armour is mentioned
 by Xenophon. (tom. i. 242.)

JACK, "A Jacke of Leather to drinke in, because
 it somewhat resembles a *iacke*, or coat of maile, or
 leather." Minshew.

In the middle of this deluge appear the tops of flagons and black
jacks, like churches drown'd i'th' marshes.

Beaumont and Fletcher. *The Scornful Lady*, act. ii. sc. 1.

Body of me, I'm dry still; give me the *jack*, boy;

This wooden skilt holds nothing.

Id. *The Bloody Brother*, act. ii. sc. 2.

Nothing was moveable save joynt-stools, the black *jacks*, silver
 tankards, and bowls.

Evelyn. *Miscellaneous Writings*, p. 700. *Mundus Muliebris*.
 Preface.

Heywood in his *Philocothonista, or the Drunkard*
opened, dissected, and anatomized, 1635, p. 45, tells
 an amusing anecdote of some Frenchmen, who, when
 they saw "the great Black Jacks and Bombards at
 Court, reported at their returne into their Countrey,
 that the Englishmen used to drinke out of their
 Bootes."

Mr. Fosbrooke, *Enc. of Ant.* 278. says, "Jack sig-
 nified a man servant, or leather pot, Jill, a maid ser-
 vant, or metal pot." Instances illustrative of these
 meanings are adduced by Steevens in *The Taming of*
the Shrew. (iv. 1.)

JACK, the name of a fish; perhaps (says Skinner)
 from *jaculum*, (as *Pike* and *Pickerell* from a *pike*, or
 spear,) because like a javelin, either in shape or
 motion.

The *Esox lucius* quits the name of *Jack* and assumes
 that of *Pike* as soon as it attains the length of twenty-
 four inches.

Jack is also a name given to the small Bowl at which
 the others are cast in the Game of BOWLING, q. v. In
 nautical language to a small Union flag, generally
 hoisted on the Bowsprit.

Sometimes poor *jack* and onions are his dish
 And then he saints those friars who stink of fish.

King. *Art of Cookery*.

JACK.

JACK. In the midst of his discourse the bell rung to dinner, where the gentleman I have been speaking of had the pleasure of seeing the huge *jack*, he had caught, served up for the first dish in a most sumptuous manner.

Spectator, No. 108.

Or, if they venture further to attack,
Like bowlers, strive to beat away the *jack*.

Butler. *Human Learning*, part ii.

He introduced us by repeating the ceremonies which he had performed at Huaheine, after which I hoisted an English *jack*, and took possession of this and the three neighbouring islands, Huaheine, Otaheite, and Bolahola, which were all in sight, in the name of his Britannic Majesty.

Cook. *Voyages*, &c. vol. iv. book ii. ch. xx.

JACKDAW, a kind of *chough*: and *jack* may here be a mere corruption of *chough*, *choug*, *chuck*, *juck*, or *jack*. And see DAW.

The trivial name of the *Corvus monedula*.

In the neighbour quarters of the Insubrians neere adjoining, ye shal have infinite and innumerable flockes and flights of choughes and *jackdaws*: the veriest theeves, nay the onely theeves of all other birds, especially for silver and gold, that it is a wonder to see what means they will make to steale and filch it.

Holland. *Plinie*, vol. i. fol. 285.

He spreads himself, and cuts the air,
And steady flight soon brought him there.
Lord, how deceiv'd and vex'd he was!
To find they were but meer *jackdaws*.

King. *The Eagle and the Robin*.

The *jackdaw* is black, but ash-coloured on the breast and belly. He is not above the size of a pigeon. He is docile and loquacious. His head being large for the size of his body, which, as has been remarked, argues him ingenious and crafty. He builds in steeples, old castles, and high rocks, laying five or six eggs in a season.

Goldsmith. *Animated Nature*, vol. iii. ch. ii. p. 153.

JACKSONIA, in *Botany*, a genus of the class *Decandria*, order *Monogynia*, natural order *Leguminosæ*. Generic character: calyx five-parted, rather unequal; the pea-flowered corolla and stamens deciduous; germs two-seeded; style subulate; stigma simple; pod ventricose, ovate or oblong, interior of the valves pubescent.

Two species, *J. scoparia*, and *J. spinosa*, natives of New South Wales.

JA'COBIN, } In their present application words
JA'COBINISM, } entirely modern; and taking their
JA'COBINIZED. } origin from the circumstance of a
faction of French revolutionists holding their meetings in a monastery of the *Jacobin*, or Dominican Friars.

The Dominicans were so called because their first establishment in Paris was in a Hospital of St. James, (Matt. Paris, *ad ann.* 1198.)

I have a good opinion of the general abilities of the *jacobins*: not that I suppose them better born than others: but strong passions awaken the faculties.

Burke. *On a Regicide Peace*.

They must know, that France is formidable, not only as she is France, but as she is *Jacobin* France.

Id. *Ib.*

They arose from her [Austria] own ill policy, which dismantled all her towns, and discontented all her subjects by *jacobinical* innovations.

Id. *On the Policy of the Allies*.

For my part, without doubt or hesitation, I look upon *jacobinism* as the most dreadful and most shameful evil, which ever afflicted mankind, a thing which goes beyond the power of all calculation in its mischief; and that if it is suffered to exist in France, we must in England, and speedily too, fall into that calamity.

Id. *On the Conduct of the Minority*.

I think no Country can be aggrandized whilst France is *jacobinized*.

Id. *On the Policy of the Allies*.

JA'COBITE, } One of the faction who adhered to
JA'COBITISM. } James II. and his family.

What *jacobite* can be sanguine enough to hope that his cause should revive, when he beholds the heroic king and queen, who fill our

throne, auspicious parents of a numerous progeny of young heroes and heroines, rising up to emulate their virtues, and to gladden, like them, the British nation.

Bolingbroke. *Works*, vol. ii. p. 140. *Remarks on the History of England*

What gives obstinacy without strength, and sullenness without spirit, to the *Jacobite-Tories* at this time.

Id. *Ib.* vol. iv. p. 298. *The Idea of a Patriot King*.

The spirit of *jacobitism* is not only gone, but it will appear to be gone in such a manner as to leave no room to apprehend its return; if we reflect that it hath died away, while all that could be done to keep it alive was doing by those who professed it, and by those who valued and recommended themselves on their opposition to all effects of it; if we consider the numbers of people who have abandoned this interest, notwithstanding the utmost provocations to the contrary

Id. *Ib.* vol. ii. p. 142. *Remarks on the History of England*.

JACOBITES, in Ecclesiastical History, were a branch of the Sect of Monophysites, deriving their name from Jacobus Baradæus, or Zanzalus, a Syrian Monk of the VIth century, who greatly contributed to their aggrandizement.

The votaries who have performed a pilgrimage to the shrine of St. James of Compostella are also termed *Jacobites*.

The Dominicans appear also to have borne this name as well as that of *Jacobin*, q. v.

JACOBUS, a coin so called from the King (James) in whose reign it was struck.

You have quickly learnt to count your hundred *jacobusses* in English.

Milton. *Works*. *Defence of the People of England*, ch. vii.

A JACOB'S *Staff*, similarly named in Teut. *Jacob's stab*, or *steck*, is explained by Minshew to mean the staff which the Pilgrims to St. James of Compostella, for the most part, carried. Skinner adds, that it is also *dolo*, (as Minshew too gives it,) which he explains to mean a tuck-stick, *baculum intra quem latitat pugio aut gladiolus*. But in its common usage it is an ASTROLABE, which Skinner expounds to be *Baculus quo, tanquam scalâ Jacobi Patriarchæ, in cælum sydera contemplaturi ascendimus*. Archdeacon Nares says more plainly, that it was also called a *cross staff*, and that both names were derived from its resemblance to that of the Pilgrims.

In the *Merchant of Venice* (ii. 5.) Shylock swears "by Jacob's Staff;" but this is plainly the Staff of the Patriarch, namely, that with which, in his own words, he "passed over this Jordan." (Gen. xxxii. 10.)

JACQUINIA, in *Botany*, a genus of the class *Pentandria*, order *Monogynia*, natural order *Sapotæ*. Generic character: corolla ten-cleft, stamens inserted into the receptacle; berry one-seeded.

Six species, small trees and shrubs, natives of the West Indies.

JACTATION, } Lat. *jactatio*, *jaculatio*, from
JACULATION. } *jactare*, *jaculare*, and these from
jacere, to throw, to cast.

A throwing, tossing, or casting.

So hills amid the air encountred hills,
Hurl'd to and fro with *jaculation* dire,
That under ground, they fought in dismal shade.

Milton. *Paradise Lost*, book vi. l. 665.

Jactations were used for some amusement and allay in great and constant pains, and to relieve that intranquillity which attends most diseases, and makes men often impatient of lying still in their beds.
Sir William Temple. *Works*, vol. iii. p. 296. *Of Health and Long Life*.

JACOBITE
—
JACTA-
TION.

JACTI-
TATION.
—
JADE.

JACTITATION, *Causa jactitationis matrimonii*, one of the principal Causes in Law relating to Marriage. When one party spreads a report (*jactitat*) *falsely* and *maliciously*, (for both these particulars must be proved,) that he or she is married to the other, whereby a common reputation of their matrimony may ensue, the injured party may libel the other in the Spiritual Court: which Court, unless the defendant makes out a proof of actual marriage, will enjoin perpetual silence on that head; the only remedy which it is competent to administer.

JA'DE, *v.* Skinner thinks he should trifle if he
JA'DE, *n.* derived *jade* from the A. S. *eode*, *ivit*,
JA'DERY, *q. d. Equus, qui jam ire desiit.* The in-
JA'DISH. terpretation may be wrong; the Ety-
mology perhaps is right. In the North *jade* is pro-
nounced, or called *yed*, *yawd*; and the A. S. *eode*, the
past tense and past part. of *gan*, to go, gives in old
English *yede*, or *yode*, *i. e. goed*, gone. See *Yad* in
Jamieson. A *jade* then may be one, that has *yade*,
yode, *goed*, or *gone*; and is, consequently, wearied,
tired with going. Hence

To *jade*; to do, or cause to do, to treat as a *jade*.
To tire, to weary, to fatigue, to wear out with fatigue
or labour; to suffer, to subject to, hard, harsh, or ha-
rassing employments or occupations, to harass, to
dispirit, to depress. And, further,

A *jade*; a wearied (horse or other animal) worn
out, dispirited: and, thus, resisting labour; and hence
applied to horses, or other animals, that refuse or are
unwilling to work; are restive, of mischievous tem-
pers, play mischievous tricks. Applied sportively, or
ironically, to young women.

In the passage quoted from Shakspeare, Warburton
cuts the knot, he transposes the words *jades* and
beasts.

Be blithe, although thou ride upon a *jade*.

Chaucer. *The Nonnes Preestes Prologue*, v. 14818.

Then riper mellowed yeares, thought good to turne their trade,
And bad Repentance hold the reines to rule the brainsicke *iade*.

Gascoigne. *Weedes. The Complaint of the Greene Knight*.

Dr. Mark but the King how pale he looks with fear.

Oh! this same whorson conscience, how it *jades* us!

Beaumont and Fletcher. *Philaster*, act i. sc. 1.

Am I Petruchio, fear'd, and spoken of,

And on my wedding night am I thus *jaded*?

Id. *The Woman's Prize*, act i. sc. 1.

Sut. The honourable blood of Lancaster

Must be shed by such a *iaded* groome.

Shakspeare. *Henry VI. Second Part*, fol. 137.

So both together traueled, till they met

With a faire maiden clad in mourning weed,

Vpon a mangy *jade* vnmeetly set,

And a lewd foole her leading thorough dry and wet.

Spenser. *Faerie Queene*, book vi. can. 6.

DOLF. It is a *beast* for Perseus: he is pure ayre and fire—he is
indeede a horse and all other *iades* you may call *beastes*.

Shakspeare. *Henry V.* fol. 81.

— And presently

Backward the *iade* comes o'er, and his full poyze

Becomes the rider's load.

Beaumont and Fletcher. *The Two Noble Kinsmen*, act v. sc. 4.

It is not comely to be hald to the earth

Like high-fed *jades* upon a tilting-day

In antique trappings.

Ford. *The Lover's Melancholy*, act ii. sc. 2.

— Seeks all foul means
Of boystrous and rough *jad'rie* to disseat
His Lord, that kept it bravely.

Beaumont and Fletcher. *The Two Noble Kinsmen*, act v. sc. 4.

He that is timorous and flexible, apt to decline opposition when
he can, and when he cannot to yield to it, will be *jaded* and be rid
like an ass. South. *Sermons*, vol. vii. p. 72.

When I say all this I cannot deny but there are perverse *jades*
that fall to men's lots, with whom it requires more than common
proficiency in philosophy to be able to live.

Spectator, No. 479.

So, in this mongrel state of ours,
The rabble are the supreme powers,
That hors'd us on their backs to show us
A *jadish* trick at last, and throw us.

Butler. *Hudibras*, part iii. can. 2.

— What thousands seek
With dishes tortur'd from their native taste,
And mad variety, to spur beyond
Its wiser will the *jaded* appetite!

Armstrong. *The Art of Preserving Health*, book ii.

Skelton. *Elinour Rummung*.

The eies of a serpent, the heares of rootes *jagged*.

Golden Boke, sig. L. 1.

Thy bodies bolstred out, with bumbast and with bagges

Thy rowles, thy ruffes, thy caules, thy coifes, thy jerkins, and thy
jaggies.

Gascoigne. *A Challenge to Beauty*.

And on his backe an vnouth vestiment
Made of strange stuffe, but all to worne and ragged;
And vnderneath, his breech was all to torne and *iagged*.

Spenser. *Faerie Queene*, book v. can. 9.

To the end, that these inner garments, thus beset with long *iaggies*
and purses, might shine againe with varietie of threads seene quite
through, and those portrayed and shaped after many and sundry
formes of living creatures.

Holland. *Ammianus*, fol. 11. *Gallus and Constantius*.

Or else the ground by piercing Caurus sear'd,
Was *jagg'd* with frost or heap'd with glazed snow.

Thomson. *Castle of Indolence*.

First draw rudely your leaves, making them plain, before you give
them their veins or *jaggedness*.

Peacham. *On Drawing*.

Her jaws grin dreadful with three rows of teeth;
Jaggy they stand, the gaping den of death.

Pope. *Homer. Odyssey*, book xii.

Three long rollers, twice-nine inches round,
With iron cas'd, and *jagg'd* with many a cogg.

Grainger. *The Sugar-Cane*, book iii.

JAIL, } See GAOL. Low Lat. *gaiola*; Fr.
JA'ILER. } *geole*, *gaiole*, *gayole*.

A prison; a place of imprisonment or confinement.

Though it seem not impossible haply that there might be a place,
where soules might be kept for a space, to be taught and instruct: yet
that there should be such a *jayle* as they jangle, and such fashions as
they fayne, is playne impossible and repugnant to the Scripture.

Tyndall. *Workes*, fol. 435. *The Testament of Mr. W. Tracie*.

And when they had beaten them sore, they cast them into prison,
cōmaūdyng the *jayler* to kepe them surely. Whiche *jayler* when
he had receaued such commaundement, thrust them into the ynnor
prison, and made their fete fast in the stockes.

Bible, Anno 1551.

TRA. Call forth an officer; carrie this mad knaue to the *jaile*.

Shakspeare. *The Taming of the Shrew*, fol. 227.

JAMAICA.

Then doth th' aspiring soul the body leave,
Which we call death; but were it known to all
What life our souls do by this death receive,
Men would it birth or *jail-deliv'ry* call.

Davies. *The Immortality of the Soul*, sec. 33.

For those who have no better a reason for being honest than fear of a gibbet or a *jail*; I should not, I confess, much covet their company or acquaintance.

Shaftesbury. *Essay on the Freedom of Wit and Humour*, part iii. sec. 4.

At present, the King being entirely in the hands of his *jailors*, and his *mīnd* broken to his situation, can send none but the enthusiasts of the system.

Burke. *Thoughts on French Affairs*.

The operation of the old law is so savage and so inconvenient to society, that for a long time past, once in every parliament, and lately twice, the legislature has been obliged to make a general arbitrary *jail-delivery*, and at once to set open, by its sovereign authority, all the prisons in England.

Id. *Speech at Bristol*.

JAKES, A. S. "*Cac-hus. Latrina*. A privy or *jakes*, a house of office." Somner.

Bale, another great antiquarian, said, "that a great number of those that purchased those monasteries reserved the books of those libraries; some to serve their *jakes*, some to scour their candlesticks, some to rub their boots; some," &c.

Strype. *Observations upon Archbishop Parker*, book iv. sec. 2.

Here all his suffering brotherhood retire
And 'scape the martyrdom of *jakes* and fire.

Pope. *The Dunciad*, book i.

Their tenets, [the Priscillianists] says Tillemont, were an horrible confusion of all sorts of impieties, which flowed into this sect as into a *jakes*.

Jortin. *Remarks on Ecclesiastical History*, Anno 379.

JALAP, in *Medicine*, the root of the *Convolvulus*

Americanus; so called from the city Xalapa in Mexico, near which it is found. It is also met with near Vera Cruz and on the South of Florida. It was first brought to Europe in the beginning of the XVIIIth century; it is imported in transverse slices, which are solid, hard, and weighty; externally blackish or dark brown; internally of a dark grey. It has scarcely any smell, and very little taste. In doses of a scruple, or half a dram, it is an effectual and safe cathartic, acting with great mildness. It is diuretic as well as purgative, and therefore is a favourite medicine in dropsies. It is exhibited in Tincture, Extract, and Resin.

JAM, v. to *jam* (says Grose) is to render firm by treading, as cattle do land they are foddered on.

Perhaps from the A. S. *ge-emn-ian*, to make even, to level. *Emn-land* is in A. S. *planities*.

To level; to press down close; to press or squeeze close or fast.

Jam is used as a substantive in Works on Cookery, for a conserve of fruits, reduced to a paste by *jamming* or pressure.

In a stage-coach with lumber cramm'd,
Between two bulky bodies *jamm'd*,
Did you ne'er writhe yourself about,
To find the seat and cushion out?

Lloyd. *Epistle to J. B. Esq.*

The pass called *el Purgatorio* had very near proved a hell to us; for we thought at one time that the carriages must have remained *jammed* in between the rocks.

Swinburn. *Spain*. Letter 3.

JALAP.
—
JAMAICA.

J A M A I C A.

Name.

JAMAICA, the third of the West Indian Islands in size, but raised by British enterprise and industry to be the first in importance, lies between the parallels 17° 44', and 18° 12' North latitude, in longitude 75° 55', and 78° 48' West from Greenwich. The extreme length of the Island is 172 miles, with a breadth of 58 miles in the widest part, or a medium breadth of nearly 40 miles. The name, originally written *Jaimaca* or *Jamica*, is said to have signified in the language of the natives, *a country abounding in springs*. The Spanish Historians wrote the word *Xaymaca*. But as Columbus at first named the Island St. Jago, some of our writers have erroneously supposed that *Jamaica* was the augmentative of *James*. Long, in his *History of Jamaica*, derives the name of the Island from a species of fruit which was common on its Southern shores.

Aspect.

The appearance of Jamaica from the sea is one of the most imposing imaginable, and the prospects which the Island offers on a near approach, are not unworthy of its rank as a colony or the exuberance of the region in which it is situate. A chain of mountains extends through the entire length of the Island from East to West, the peaks of which are visible at the distance of 20 leagues. On the Northern side the hills commence at a little distance from the shore, rounded into a great variety of beautiful forms, and separated from each other by romantic valleys. These hills, wholly divested of a rude or abrupt character, rise by gradual terraces to the central mountains. Surveyed from an eminence of the

interior they present to view a labyrinth of swelling woods and winding valleys. The whole country is a natural forest, with patches of verdure as fresh and bright as that of England. The pimento or all-spice tree in particular, which is remarkable for the beauty of its foliage, is spread in great abundance over this undulating surface. The mangrove grows along the shore, and behind it the cocoa-nut, plantain, and palmetto attract and gratify the eye of the stranger by the airiness and singularity of their appearance. On the South side of the Island the scenery has a different character. The rugged soaring ridge of the Blue Mountains, with its deep gaps and bare precipices, is not concealed from sight by the woody hills which lie beneath it, but appears reared with impending desolation over the level savannas bordering on the sea. These are vast plains clothed chiefly with extensive cane-fields, and displaying all the activity of European cultivation, with the exuberance of the torrid zone. Few Countries are more susceptible of ornament than this, and yet few of the colonists take much pains in embellishing their estates with sylvan beauties. A great portion of the interior remains but imperfectly known. The dreary and threatening aspect of the mountains which seem flung together by some great convulsion of nature; the comparative barrenness of the high lands, unfitted for what is called colonial produce; and the heat of the climate, which makes indolence overpower curiosity, and prevents every exertion when interest is not the motive, may

JAMAICA. explain why a part of the Island, highly interesting to the Naturalist, should still remain not at all or very imperfectly explored.

Mineralogy. The Geology and Mineralogy of Jamaica have been but imperfectly studied. Though the Natural History of the Island has been repeatedly written, yet the mineral kingdom has received but little attention. The highest point of the Blue Mountains is said to be 7431 feet above the sea. The Liguanea hills, which run between the mountains and the savannas on the South side of the Island, are composed generally of a fertile marl containing marine exuviae. The early writers assert that the Spanish inhabitants had mines both of silver and of copper. The ores of this latter metal are very abundant; some lead mines were opened in the last century, but want of fuel and the high price of labour rendered it impossible to work them with profit. Sulphureous and chalybeate springs are found in many parts of the Island.

Rivers. No part of the West Indies is so well watered as Jamaica; every valley has its rivulet, and every hill its cascade. Besides the countless smaller streams, there are some larger rivers; none of these, however, are navigable, except Black River, in the parish of Elizabeth, in which flat-bottomed boats bring down the rum, sugar, and other produce from the interior; on some of the others, as the Rio Cobre, canoes and small boats can sail a considerable way up.

Climate. There is little variation of seasons here except what is occasioned by the alternation of rainy and dry weather. In the months of December, January, and February, the air on the mountains is, indeed, sensibly colder, but this difference is seldom perceptible on the sea-side. The periodical rains do not take place with perfect regularity. Sometimes the Spring rains do not set in till the beginning of June, and occasionally later. In other years they begin in March or even February, and continue for two months or more. The autumnal, or Fall rains, as they are here called, usually take place in October and November, sometimes earlier sometimes later. They are essentially necessary to the planter to bring forward his young canes, which are generally planted at this season. The Spring rains are by far the most violent. During their prevalence the air is insufferably sultry. The thermometer at the sea-side ranges from 75° to 85°, and occasionally mounts to 100°. The showers come on with astonishing rapidity. The clouds gather in an instant, and the torrent pours down before the negroes employed in the fields can retire from its fury. The Spring rains are frequently partial, so that one district or even one estate is parched with drought, while the adjoining one is refreshed with daily showers. There is not any season in Jamaica which can be properly called unhealthy. The vicissitudes of hot and cold, wet and dry, which are dangerous to health in all Countries and in a hot climate particularly so, are more to be guarded against in the wet season. But with proper precautions health may be preserved in all seasons. Intemperance and irregularity destroy many more constitutions than any pernicious quality in the air, and the terror with which the diseases of the climate are regarded, unquestionably renders them doubly fatal. The yellow fever seldom or never visits the mountainous parts of the interior, nor are the negroes and brown people at all subject to it. Besides the yellow or bilious fever, intermittent fevers, pleurisies, &c. are common in Jamaica, but consumptions are

little known. Young men, on their first arrival, are peculiarly liable to febrile disorders, which would in all probability be avoided by the precaution of residing for a few months in a healthy part of the interior by way of seasoning. A few years ago the West Indies, and Jamaica in particular, were regarded as the graves of the British troops; few regiments sent thither ever returned. The mode of avoiding the ravages of the yellow fever was found out accidentally in the Maroon war. The year before that event (1794) a regiment, 500 strong, arrived in Montego Bay on the North Coast of Jamaica, and in the first year it was quartered there, lost nearly 300 men by sickness. When the war was terminated, however, and the military were stationed on the site of the old Maroon town, about 20 miles up the country, it was found that the troops posted there were as healthy as if quartered in the heart of England. This spot has been since converted into the head-quarters of the military.

The limit of the miasmata and pestilential atmosphere in this zone is supposed to be at an elevation of about 1300 feet above the sea. At that height the air is perfectly salubrious. The high district called Pedro Plains, on the South-West coast of Jamaica, is said by Bryan Edwards to vie with any spot on the surface of the globe in the mildness of its temperature and the purity of its air. At the estate of Cold Spring, 4200 feet above the level of the sea, the same Historian thought the climate the most delightful he had ever experienced; the thermometer seldom falls below 55°, or exceeds 70°, and many English fruits, as the apple, peach, strawberry, &c. flourish there in perfection.

Jamaica is situated near the limits of the great volcanic region of South America, and it is in consequence liable to earthquakes. On the 7th of June, 1692, at mid-day, an earthquake destroyed the town of Port Royal. The convulsion lasted about three minutes, when the town sank several fathoms under water. The walls of the buildings may still be seen in calm weather. The heavy buildings throughout the Island were thrown down; shattered mountains ruined many settlements; general sickness ensued; order and industry were totally at an end, and a mischievous confusion prevailed until the terror subsided. 3000 lives were lost by this visitation. Smart shocks are felt almost every year; in 1802, and again in 1816, they were more violent than usual, but without doing any damage.

Hurricanes. Hurricanes are more frequent, and in many instances more terrible and destructive than the most awful earthquake. A succession of hurricanes desolated this and some of the neighbouring islands for seven years, beginning in 1780, with the exceptions only of 1782 and 1783. Of this series of visitations, the first, occurring in 1780, was by far the most destructive; but the sphere of its activity in Jamaica was confined to the Western part of the Island. The desolation, however, which it occasioned is scarcely equalled in the records of human calamity. The amount of property destroyed exceeded two millions sterling. The fate of the little seaport of Savannah la Mer, on that occasion, was as sudden and terrific as that of Port Royal. The sea bursting its ancient bounds overwhelmed that unhappy town, and swept it to instant destruction, not leaving behind a vestige of man, beast, or habitation. It is said that upwards of 20 hours before the commencement of that great hurricane, a very uncommon noise, resembling the roar of distant thunder, was heard to

JAMAICA. issue from the bottom of all the wells in the neighbourhood of Kingston. When a hurricane subsides, every object around wears a dismal appearance. The trees are stript of their verdure or lie scattered on the ground, the fields of canes are torn up by their roots, and blown about like straws, the plantain trees, from which the inhabitants of this quarter of the globe draw a great part of their subsistence, are every where destroyed. What adds to the horror of such a situation is the knowledge that hurricanes are frequently the forerunners of long droughts, which arrest the young crops in their growth, and annihilate the hopes of the succeeding year. This accumulation of evils was never so severely felt as after the great hurricane of 1780, when the negroes throughout the Island perished in great numbers, partly by diseases brought on by unwholesome food, and partly by absolute starvation.

Productions. The vegetable productions of Jamaica form a numerous and interesting catalogue. While the high mountain lands permit the cultivation of many European plants, the low savannas are covered with a tropical vegetation. The native forests abound with a great variety of valuable timber, woods for dyeing, and ornamental cabinet work. The mahogany tree grows to a great size, but is nearly extirpated; there are at present few trees of the species remaining in Jamaica, except in the remote and mountainous parts of the Island, whence it is difficult to remove them. The mahogany exported even during the middle of the last century, when the woods were much thinned, was estimated at £25,000 sterling *per annum*. The cedar grows to an immense size, sometimes measuring 30 feet in circumference, with 70 or 80 feet of naked stem before it throws out any branches. The black and green ebony, the *lignum vitæ*, fustic, logwood, and satin wood are important articles of commerce. The bitter wood of Jamaica was at one time imported into England as a substitute for hops, of which it possesses all the valuable properties, but heavy duties laid on it served as an effectual protection to the hop growers. The palmetto or cabbage tree, which rises conspicuously in all the woods of Jamaica, is perhaps the most graceful of all the vegetable creation. Ligon, in his account of the first conquest of Barbadoes, mentions some of this species above 200 feet in height; the finest trees were soon cut down, but in Jamaica Bryan Edwards was disposed to think he had seen palmettos 150 feet high. The trunk of this tree is a straight, smooth, slightly annulated column, large at the base, and tapering uniformly towards its summit, where it takes the form of a well-turned, finely-polished baluster, of a lively green colour, gently swelling from its pedestal, and diminishing again to its top, where it expands into branches, waving like plumes of ostrich feathers. The green portion of the trunk is edible, and being thought to resemble the cabbage in flavour has procured the tree its name.

The *Bombax ceiba*, or wild cotton tree, is another giant of the woods. Its trunk is hollowed into canoes large enough to hold eight or nine hogsheads of sugar; some have been seen, it is said, able to contain from 60 to 100 men. The low country round the Island is nearly denuded of forest, in consequence of the great quantity of wood annually consumed as fuel in the plantations, so that some estates have to import coals from Great Britain at a great price to manufacture their produce. The culture of the bamboo would be perhaps the easiest mode of remedying this deficiency.

Among the fruits which grow here luxuriantly may **JAMAICA.** be enumerated the pine apple, the orange, the shaddock, the sappadillo, (a luscious fruit growing spontaneously in the woods,) the pomegranate, the grenadillo, the musk melon, the neesberry, resembling in flavour a mellow pear, and the avagato pear or vegetable marrow, which bears, however, no resemblance to the European pear. The Botanic Garden established in Jamaica in 1773, has been the means of naturalizing many East Indian fruits. The mango, the durian, the bread fruit, and the jack fruit are the principal of these; the shaddock was an earlier importation. Some of these exotics were a present from Lord Rodney to the Island, having been the cargo of a French vessel bound from the Mauritius to St. Domingo, and captured by one of his cruisers; but the greater part were brought by Captain Bligh who was sent by the British Government for the purpose, from the Islands of the Pacific and Indian Oceans. Some of these imported plants are merely objects of curiosity to the scientific, as they will never, in all probability, prove here an object of profitable culture; such are the sago palm, the nutmeg tree, cinnamon, mace, tea plant, &c.; but this is not the case with most of the fruits. The mango is now so abundant in Jamaica that hogs are fed with it; the more delicate varieties are pickled for exportation. The bread fruit has also multiplied with extraordinary rapidity, but has not proved so important an acquisition as was expected, the negroes always preferring to it the plantain and the yam. Of this last nutritive and palatable root, there are several species cultivated; some of the largest have been known to weigh 70 pounds. An excellent law exists here relative to roots, or as they are called, ground provisions, by which all estates are required to have 10 acres of such provisions for every 100 negroes, over and above the negroes' grounds and plantain walks; this is intended as a resource against scarcity or famine in case of a hurricane. Among the exotics we may mention the Baobab or *Adansonia*, the trunk of which sometimes measures 80 feet in circumference.

The productions of the European kitchen-garden thrive here more easily than the fruits of Europe, and the chief towns of the Island are supplied with cabbages, lettuce, carrots, turnips, parsnips, artichokes, kidney beans, peas, asparagus, &c. in the utmost abundance. Some, however, think the native growths, as the choco, ochra, Lima bean, and Indian kale, more agreeable than the esculent vegetables of Europe.

The principal grain cultivated in Jamaica is maize, or Indian corn, which commonly produces two crops in the year, and sometimes three, yielding from 15 to 40 bushels an acre, according to the soil; Guinea corn yielding but one crop of from 30 to 60 bushels the acre; and rice in no great quantity, the situation proper for its growth being deemed unhealthy, and the negroes being employed in the cultivation of articles that yield more profit. The pastures of the Island are of much greater importance than the tillage. The Guinea grass is considered as next to the sugar-cane in importance, as most of the grazing and breeding farms throughout the Island were originally created, and are still supported, chiefly by means of this invaluable herbage. The settlement of the Northern parishes is ascribed by Bryan Edwards to the introduction of this excellent grass, which happened accidentally in the middle of the last century; the seeds having been brought from the coast of Guinea as food for some birds, which were

JAMAICA presented to a gentleman residing in the Island. Fortunately the birds did not live long enough to consume the whole stock, and the remainder being carelessly thrown into a fence grew and flourished. It was not long before the eagerness displayed by the cattle to reach the grass attracted notice, and led to the careful propagation of the seeds; which now thrive in some of the most rocky parts of the Island, bestowing verdure and fertility on lands which otherwise would not be worth cultivation.

Cattle, &c.

The grazing farms have latterly increased very much in Jamaica, and horned cattle are abundant. The oxen, chiefly from the Spanish breed, are small but hardy. The butter is excellent, and nearly sufficient in quantity for the consumption of the Island. The sheep of Jamaica, according to Sir H. Sloane, are from a breed originally African. They have short hair instead of wool, and in general are party coloured, chiefly black and white. They are small, but the mutton is excellent. The swine are also considerably smaller than those of Europe, and have short, pointed ears. The pork of Jamaica is said to be much whiter and sweeter than that of Great Britain. The wild hog is still found in great numbers in the remote woods. The chase of the wild boar is a favourite diversion of the Creole Whites, by whom the flesh *barbacued*, that is smoked with a certain odoriferous wood, which communicates to it a peculiar flavour, is considered a great delicacy. The Creole horses are small but active animals. The English and North American horses are not so well able to endure the climate. In all the parishes there are biennial horse-races. The Creole horses bred and trained for the Course, are so fleet and well bottomed, that English racers brought there have been often beaten by them. But it is on the mules that the planters place their chief reliance, all the drudgery of the plantations being performed by these hardy animals, which are capable of undergoing double the fatigue a horse could support; indeed the latter are seldom used as beasts of burden, and as to the carts and wains, they are drawn by oxen.

Horses.

Wild animals.

The monkeys of four or five species which formerly peopled the woods of Jamaica have been long since destroyed. Racoons were still numerous in the time of Sloane, and the coati or agouti is yet, perhaps, to be met with in the mountains. Rats are most numerous and destructive, particularly to the sugar-cane; in some years whole fields of this plant are as completely destroyed by that voracious animal, as if a blight had alighted on them. One year with another it is supposed that the estates sustain by this unavoidable plunder, a loss of at least eight or ten hogsheads of sugar for every hundred they make. All means are employed to destroy these formidable marauders, but although 50,000 have been caught or killed on some properties in a single year, yet no sensible diminution of their numbers takes place. These rats are of a very large species, introduced not many years ago in order that they might extirpate the smaller kind, which were still more destructive. They are eaten by the negroes, dressed in molasses. The racoons, monkeys, &c. seen at present on the Island, are introduced from time to time from the Spanish Main, the indigenous quadrupeds being long since exterminated. Some species of the feathered tribes, too, as the flamingo with its elegant scarlet plumage, have been banished from these shores. In some of the rivers of Jamaica are alligators of con-

siderable size, but they are timid and inoffensive. The **JAMAICA** guana, a species of lizard about three feet in length, which was eaten and thought a delicacy by the Spanish colonists and by the French in the Windward Isles, is still common. The mountain crab, which formerly existed in great multitudes in Jamaica as well as the smaller Antilles, is, we believe, at present nearly extinct all those Islands. These extraordinary animals live in the mountains in a kind of regulated society, and march to the sea-side once a year to deposit their spawn. In the months of April or May they commence their expedition, sallying out from the clefts of rocks, stumps of hollow trees, and from the holes they have burrowed in the ground. They direct their march to the sea-side with right-lined precision, never deviating from their course unless to wind along the banks of rivers. The procession used to consist of several millions, and two or three months intervened before they all reached the sea. As soon as the crab arrives at the shore, it eagerly goes to the edge of the water and lets the wave dash over its body two or three times to wash off the spawn. The eggs are hatched under the sand, and soon after the new-born crabs are seen quitting the shore and slowly travelling up the mountains. The old crabs regain their habitations by the latter end of June; in August they begin to fatten and prepare for moulting, filling up their burrows with dry grass, leaves, and other materials. When the proper period comes, each retires to his hole, shuts up the passage, and remains quite inactive until he gets rid of his old shell, and is fully provided with a new one. At this time the flesh is in its richest state, and covered only with a tender membraneous skin. Du Tertre, from whom, and Dr. Brown, (*Nat. Hist. of Jamaica*), we have collected the above account of this animal, bestows on it the highest encomiums, calling it "a living and perpetual supply of manna in the wilderness." Later writers have acknowledged the justice of this praise.

Mountain crabs.

Another delicacy which is had here in greater abundance is the *Ortolan* or October bird. This is not the same as the Ortolan of Europe; it is the Rice bird of South Carolina, the *Emberiza oryzovora* of Linnæus. Great flights of them arrive in Carolina in September to devour the rice, and after remaining there about three weeks migrate to the South, arriving in the Islands in prodigious numbers about the middle of October. Dr. Brown, who published his *Natural History of Jamaica* in 1754, tells us that the camels imported there were numerous at that time, but that from the ignorance of their keepers of the temper and habits of these animals they were of little use. As no subsequent writers have mentioned them, we presume that they have become extinct.

Ortolans.

Camels.

The works of an estate, or buildings for the manufacturing of the produce, are placed in the most central situation of the cane land, regard being had at the same time to other conveniences, as a stream of water, easiness of access, a proper extent of eligible ground to build on, &c. The buildings are a mill, or sometimes two; a boiling house, a curing and a distilling house; several trash houses to dry the cane trash for fuel; one or two mule sheds, a cooper's and carpenter's shop. These, if on a large scale, suited to an estate making five or six hundred hogsheads of sugar annually, will cost £12,000 or £15,000 currency. The other buildings on the estate are the proprietor's house, the overseer's house, an hospital for sick negroes, and sometimes a house for

Rural economy

JAMAICA. a surgeon. The land is portioned out in the following manner. If the estate is large, consisting of about 1500 acres, about a fifth part is planted in canes; two-fifths are laid out in Guinea grass and common pasture; one-fifth is occupied by the plantain walks, &c. and negro grounds; and the remainder consists of woods, wastes, or fallow. The fields of canes and pastures are fenced with logwood, marengo, or lime trees. The first of these resembles hawthorn, and forms a handsome fence. The cane-fields contain from 10 to 20 acres, with roads between them 12 or 15 feet wide. The negroes' houses are grouped together, at a distance from the other buildings on the estate, forming a sort of village, generally enclosed by a stone wall, and displaying an intermixture of gardens and fruit trees, which give it a pleasing appearance. These negro villages have the character of the climate peculiarly impressed upon them; the plantain, banana, bread-fruit, and other vegetable productions of the torrid zone being planted in them, so as to form a little grove around the dwellings.

Sugar-cane. In Jamaica, as in the other West Indian Islands, the Otaheite, South Sea, or, as it is more generally called, the Bourbon cane, has entirely supplanted the smaller kind, which was first introduced from the Canary Isles. This new species, which yields nearly four times the produce of the other, was brought from the Isle of Bourbon to the French Antilles in 1796, and soon spread through the other Islands. The Spaniards, though a century and a half in possession of Jamaica, had made only three small plantations during the whole period. The English commenced planting the sugar-cane in 1660, five years after the conquest of the Island, and manufactured the first sugar in 1664.

Commerce. During the late war a great increase took place in the cultivation of coffee, but the value of this exportation has again declined. The same depreciation has also taken place with respect to cotton and indigo. Sugar and rum are the staple commodities of Jamaica, and those from which it derives its high rank among the British West Indian Islands, as it yields nearly one-half of the whole quantity produced.

The value of the exportations from Jamaica in the year 1734 was £539,499, in 1787 it amounted to £1,496,232, and in 1810 to £4,303,337. The importations in 1787 were valued at £2,136,442, and in 1810 at £2,303,179.

Divisions. Jamaica is divided into three Counties, Middlesex, Surry, and Cornwall; and these are subdivided into 20 **Bishopric.** Parishes. The Island was formerly under the spiritual direction of the Bishop of London, but an Act of Parliament, passed in 1825 for the better regulation of the Clergy in the West Indies, created the Bishopric of Jamaica. The British settlements in the Bay of Honduras and the Bahama Isles are included in the diocese. The Bishop has a salary of £4000 a year. The same Act provided for the appointment of an Archdeacon, with a salary of £2000 a year, and seven Rectors, to be named by the King, with £500 a year each. The Livings are generally worth above £1000 a year, the customary fees paid to the Clergy being very large.

Population. It is difficult to estimate correctly the free population of Jamaica; the number of the slaves was always more accurately known. In the year 1658, shortly after the Island came into the hands of the English, the whites were estimated at 4500, and the slaves at 1400; in 1768 the white people amounted to 17,947, and the slaves to 176,914. From that time the slave popula-

tion continued to increase with great rapidity, and in 1812 they amounted to 319,912; such was the statement of the *Colonial Journal*, which gives the following account to show the decrease in the number of slaves from that year. Number of slaves in Jamaica,

In 1812	319,912.	1814	315,385.
1813	317,424.	1815	313,814.

But the correctness of these numbers may reasonably be doubted, on comparing them with the subsequent returns to Parliament. From these it appears that the slaves amounted

In 1817	346,150.	In 1825	336,253.
1820	342,382.	1826	331,119.

As the decrease exhibited in the above table is brought about chiefly by the manumission of the slaves, we are not to consider the whole population as diminishing in the same ratio. The free people were supposed, in 1812, to amount to 40,000, but it is probable that the whites alone exceed that number at present; that the free people of colour are at least as many more, and that the whole population of the Island is above 400,000.

The principal taxes in the Island are a poll-tax on negroes, and the deficiency tax, which is a fine imposed on those who have not on their estates one white person for every 30 blacks. This tax, it is obvious from a comparison of the numbers of the black and white population, must be a very important branch of the revenue. The nature of these taxes likewise explains why the colonial return of slaves is so much below the truth, concealment being practised as much as possible to evade the tax. There are also taxes on land, horses, mules, wheel-carriages, stamps, &c. The gross produce of the revenue in 1788 was £136,000.

The Capital of the Island is *St. Jago de la Vega*, or *Spanish Town*, situated on the Rio Cobre, about six miles from the sea. Here are the Public Offices and a superb Palace for the Governor. Here is also a monument and statue erected to the memory of Lord Rodney, who was idolized by the people of Jamaica. The town, though neat, is not large, the population hardly exceeding 7000. *Kingston*, founded in 1693, after the destruction of Port Royal, is the most important place in the Island, and has a very extensive trade. It is, however, a hot and unhealthy situation. In 1803 it was incorporated as a City, and is governed by a Mayor, 12 Aldermen, and 12 Common Councilmen. There are some very laudable Institutions for charitable purposes here, particularly a Free School and an Asylum for Deserted Negroes. The population amounts, perhaps, to 35,000, of whom 10,000 are whites, 17,000 slaves, the rest Creoles and free people of colour. *Port Royal*, at one time the most flourishing place in the West Indies, is now reduced to two or three hundred houses; most of the inhabitants are people of colour. The place is remarkable for its excellent fortifications and the naval yard, the harbour of *Port Royal* being the rendezvous of ships of war in those seas. On the North side of the Island are the thriving commercial towns of *Falmouth* and *Montego Bay*. *Savannah la Mer* on the West is the chief place of the County of Cornwall; it is a hot, dirty town, chiefly inhabited by people of colour.

Jamaica was discovered by Columbus on the 3d of May, 1494, in his second voyage to the New World. Nine years later it afforded that great navigator shelter

JAMAICA. from shipwreck; for in his fourth and last voyage, when returning from Veragua to Hispaniola, he met with such tempestuous weather, as obliged him to bear away in the utmost distress for this Island. With great difficulty he reached a little harbour on the North side, to this day called *Don Christopher's Cove*, where he was obliged to run his two vessels aground. His ships were by this disaster damaged beyond the possibility of repair, and he was forced to remain on the Island for twelve months and four days before he was delivered from his wretched situation. After the death of this illustrious discoverer, the transactions of the Spaniards during a century and a half in the settlement of Jamaica have scarcely obtained the notice of History. As this Island produced neither gold nor silver it was comparatively neglected, and some time elapsed after the settlement of Hispaniola before a Colony was despatched to take possession of Jamaica. The leader of the new Colony was humane as well as brave, "and the affairs of Jamaica," says Herrera, "went on prosperously, because Juan de Esquivel having brought the natives to submission without any effusion of blood, they laboured in planting cotton and raising other commodities, which yielded great profit." His successors, however, followed a different course, in consequence of which the indigenous population, amounting at the most moderate calculation to 60,000 souls, were totally cut off and exterminated within the space of half a century. In the year 1596, Sir Anthony Shirley invaded the Island, and plundered the Capital St. Jago de la Vega, or, as it is now called, Spanish Town. Forty years afterwards it was again pillaged by Jackson with a force from the Windward Islands. These are the only incidents of importance in the annals of the Island previous to its capture by the English in the year 1655.

Taken by
the English.

The repeated insults offered by the Spaniards to the British flag, and their arrogant assumption of paramount rights in the West Indian seas, provoked the Protector Cromwell to make in that year an attack on Hispaniola; a powerful armament was equipped, which failing in the proper object of its destination, succeeded in its descent on Jamaica. The importance of this Island as a Colony dates from its falling into the hands of the British. The whole number of white inhabitants at the time of its capture did not exceed 1500, including women and children. The number of negroes in the Island nearly equalled that of the whites. Though the Spaniards had possessed it nearly a century and a half, not one-hundredth of the plantable land was in cultivation when the English arrived there. The sloth and penury of the Spanish settlers were extreme. Of the many valuable commodities which Jamaica has since produced in such abundance, some were altogether unknown, and of the rest the inhabitants cultivated no more than sufficed for their own consumption.

Jamaica, after its capture, continued till the Restoration to be governed by military authority. But in the year 1661, General D'Oyley was appointed Governor, with a Council elected by the people, and a Constitution was introduced resembling that of the Mother Country. The political events of that period caused many to seek for security in the plantations, which were also enriched by the successes of the Buccaneers. Jamaica was the chief resort of these adventurers, who not unfrequently united the characters of merchant, planter, and pirate, or privateer.

In 1678 an attempt was made to do away with the

rights of the Colony, and to introduce there an arbitrary system of Government. This, however, failed, and the deliberative powers were restored to the Colonial Assembly. But the subject of revenue created such differences between the Colony and the Crown, that the Acts of Assembly seldom received the Royal confirmation. Such was the situation of Jamaica until the year 1728, when a compromise was effected; the Assembly consenting to settle on the Crown a standing revenue of £8000 per annum, on certain conditions, one of which was, that "All such Laws and Statutes of England as had been at any time esteemed, introduced, used, accepted, or received as Laws in the Island, should be and continue Laws of Jamaica for ever." Thus were all disputes terminated, and the Constitution of Jamaica confirmed.

The Legislature of Jamaica is composed of the Governor, a Council of twelve, nominated by the Crown, and a House of Assembly, containing 43 Members, who are elected by the freeholders, viz. two from each parish, and three from the towns of St. Jago de la Vega, Kingston, and Port Royal. The office of Governor is a very important and lucrative one, uniting both civil and military duties, for the Governor is at the same time Commander-in-Chief and Chancellor. The income attached to the office is about £10,000 a year. The Council, appointed by the Governor, acts as a Privy Council to him, and has besides a voice as an independent branch of the Legislature, so that it has a double function to perform. It sits also as a Court of Appeal on Errors, with the Governor as President. The Assembly of Representatives, like the Imperial House of Commons, furnishes the supplies, and has the right of originating all Bills relating to the finances and economy of the Country. The persons of the Members are sacred from arrest, as in the British Parliament.

The Courts established in the Colony for the administration of Civil and Criminal justice are the High Court of Chancery, Courts of Appeal and Errors, the Supreme Court of Judicature, Admiralty Courts, Courts of Assize, and Quarter Sessions, &c. Besides these, which are modelled after the tribunals of the Mother Country, are Courts for the trial of Maroon's and Slave Courts in each parish. The British Common and Statute Law prevails as far as local circumstances permit, and when not at variance with the Colonial Acts. But Acts of Parliament passed since the 1st George II. are not in force, unless extended to the Colonies by express words, or unless they relate to trade, navigation, mercantile law, or are amendments of the Common Law. Besides the Civil and Criminal Laws of Great Britain, there is of course a peculiar code of Laws, which may be called Colonial, arising out of the circumstances of the Country. These relate chiefly to negroes and negro property. The Supreme Court exercises its present jurisdiction by virtue of an Act passed in 33d Charles II. Three Judges form the Court. The Chief Justice is appointed by the Government, and holds office only during his Majesty's pleasure; he may, however, be suspended by the Governor with the consent of the Council. The qualification of having studied the Law is not essential to the appointment of the Chief, who in that case has a salary of £4000 a year; an additional £1600 a year is allowed to those who have had a professional education. Since the year 1803, however, the Chief Justice has been always a Barrister. The other Justices are gentlemen of the Island, not professional, and the

JAMAICA two seniors of them alone derive any emolument from their Offices. Their salaries are about £700 a year. But while the highest judicial authority may be exercised in Jamaica by one who has never made the Law his study, superior qualifications are required in those who practise at the Bar; none being admitted to plead as advocates who have not been called to the English Bar. A Historical account of Jamaica, drawn up in 1764 for the information of his Majesty's Ministers, and generally ascribed to Lord Littleton, who was for some time Governor of that Island, is printed as an *Appendix* to Bryan Edwards's *History of the West Indies*. This subject has been continued up to the present time in the able Report on the *Administration of Justice in the Colonies*, presented to the House of Commons in 1826. (*Reports*, vol. xxiv.) The Commissioners of Inquiry terminate that Report by pointing out the chief defects to be remedied in the Colonial judicature. They recommend some measure calculated to secure the competency as well as the independence of the Judges, who at present are not sought among the members of the legal profession, and who depend wholly on the Colonial Legislature for their salaries. They also advise the passing of an Act to ascertain and fix how far the Common and Statute Law prevails in the Colony, as much doubt and uncertainty exists in every legal decision from the vagueness of the limits assigned to the application of the English Law.

The Colonial codes, relating to the slave population, resembling each other originally from the similarity of the circumstances to which they were adapted, become still more alike as they are gradually conformed to the recommendations of the British Government. Some important changes in the Slave law of Jamaica were made by the Colonial Legislature, as soon as the Government at home had expressed its determination to ameliorate the condition of the slave population. By an Act of December, 1824, the protection of slaves from being levied on for their owner's debts on Sunday is extended to Saturday. The facility of manumission is likewise increased, for an owner, having a limited interest in a slave, may manumit him, paying to the Receiver General a competent sum for the *remainder man*, or the person to whom the estate is limited after a particular interest. By an Act passed in 1825, legacies and pecuniary bequests to slaves are made so far legal, that the slaves can give a valid acquittance to executors, but they cannot bring an action.

IA'MBICK, *n.* } Fr. *iambique*; It. *giambo*; Gr.

IA'MBICK, *adj.* } *ἰαμβικός*, from *ἰαμβος*, a metrical foot, consisting of a short preceding a long syllable;

Iambick verses, or *Iambics*, are verses consisting of either pure Iambic feet, or equivalent resolutions of them. Satire is said to have been originally composed in this metre; and hence *Iambicks* is used as equivalent to *Satire*.

Two rests, a short and long, th' *iambick* frame;

A foot, whose swiftness gave the verse the name,

Of trimeter, when yet it was sixe-pac'd,

But mere *iambicks* all, from first to last.

Jonson. *Horace. Of the Arte of Poetrie*.

For what ado have we here, what strange precepts of art about the framing of *iambic* verse in our language, which, when all is done, reaches not by a foot, but fallieth out to be the plain ancient verse,

consisting of ten syllables, or five feet, which hath ever been used among us time out of mind.

Daniel. *Defence of Rhyme*.

Fly stranger, nor your weary limbs relax
Near the tempestuous tomb of Hipponax,
Whose very dust, deposited below,
Stings with *iambicks* Bupalus his foe.

Pawkes. *Epitaph on Hipponax. From the Anthologia*.

For the *iambick* is of all metres the most colloquial; as appears evidently from this fact, that our common conversation frequently falls into *iambick* verse, seldom into hexameter, and only when we depart from the usual melody of speech.

Twining. *Aristotle. On Poetry*, part i. sec. 7.

Iambick was the measure in which they used to *iambize* (i. e. to satirize) each other.

Id. *Ib.* part i. sec. 6.

IAMBOLIFERA, in *Botany*, a genus of the class *Octandria*, order *Monogynia*. Generic character: calyx four-toothed; corolla, petals four; funnel-shaped filaments, flattened; stigma simple.

One species, a tree, native of the East Indies.

JANE, "A coin of (Janua) Genoa. It is put for any small coin." Tyrwhitt.

Of Brugges were his hosen broun;
His robe was of ciclatoun,
That coste many a *jane*.

servations.

Immediately came officers & appointed *janisers* to beare frō vs our presents.

Hakluyt. Voyages, &c. vol. ii. fol. 170. *The first Voyage to Constantinople.*

For their men of warre; it is a dangerous state, where they live and remaine in a body, and are used to Donatives; wherof we see examples in the *janazaries* and pretorian bands of Rome.

Bacon. Essay 19. Of Empire.

A sixth [principle] was, the institution of that famous order of the *janizaries*; than which a greater strain of true and deep politic will hardly be observed in any constitution. This consisted in the arbitrary choice of such Christian children throughout their dominions, as were esteemed most fit for the emperor's peculiar service; and the choice was made by the shows or promises of the greatest growth or strength of body, vigour of constitution, and boldness of courage.

Sir William Temple. Of Heroic Virtue, sec. 5.

"Let them be called *janizaries* (*yengi cheri*, or new soldiers); may their countenance be ever bright! their hand victorious! their sword keen! may their spear always hang over the heads of their

enemies! and wheresoever they go, may they return with a white face!"

Gibbon. Decline and Fall of the Roman Empire, ch. lxiv.

I never shall so far injure the *janisarian* republick of Algiers, as to put it in comparison for every sort of crime, turpitude, and oppression, with the jacobin republick of Paris.

Burke. On a Regicide Peace.

JANISSARY, from the German way of spelling the Turkish word *Yām-chari*, is the name of that body of the Turkish army, which till very lately, like the Prætorian Guards at Rome, gave the law to the Sovereigns of the Turkish Empire. Sultán Orkhán, when, in 1330, he had determined to form a permanent corps of infantry, which should be solely devoted to his interest, finding that his Turkománs could not be brought under any regular discipline, enlisted all such of his Christian prisoners and subjects as were fit for his purpose, and that they might be bound by no ties except their allegiance to their sovereign and benefactor, he forbade their marrying, and established them in separate barracks. Hájí Bektásh, a Dervísh in great odour of sanctity, consecrated this new corps by laying the sleeve of his white robe on the head of their principal officers, while he implored the benediction of heaven on their

JANGLE,

ZARY.

JANI-
ZARY.

arms, and named them *Yeni Cheri*, "the new troop." This holy man was thenceforward considered as their patron Saint, and they delighted in calling themselves *Bektáshies*; while the Dervishes of his order were always enrolled in their 99th *örtá*, or regiment. For a long time none but Christian youths were ever admitted into this corps.

The whole body was divided into four squadrons, or divisions, called *Jemá'at Bólúc Segbán* (pronounced *Seimen*) and *'Ajemi-bghláns*, each consisting of so many *bdás*, or *örtás*, as they are commonly called. The *Jemá'at* (troop) had 100 *örtás*, till the 65th was cashiered in 1623. Eleven of them were always in garrison at Constantinople, and four, (No. 60 to 63,) who mounted guard in the Imperial palace, wore a peculiar uniform, and were called *Ssó-lác*. The rest were stationed on the frontiers. The *Bólúc* (troop) consisted of 61 *örtás*, 31 of which were stationed in the Capital; but one only of the *Seimens*, (dog-keepers,) No. 33, had that privilege. The 34 *örtás* of the *'Ajemi-bghláns* were always there, being drill-masters of the recruits for the other divisions.

The officers of this corps were, 1. the *Aghá*, their Commander-in-Chief, at first chosen from the *Seimens*, but afterwards, in consequence of the dangerous preponderance thence acquired by his own corps, always taken from some other branch of the service, Civil or military. This, as might be supposed, was resisted by those under his command, and Murád (Amurath) III. was obliged, in 1582, to return to the original system, and give that command to the *Seimen-báshí*. The *Aghá* of the Janissaries was, next to the Vezír, the greatest man in the Empire. His deputy was (2.) the *Seimen-báshí*, i. e. Commander of the *Seimens*. 3. The *Cúl-kíahyá*, (*Cúl-kelkhudá*, Steward for the Slaves,) or Quarter-master-general of the corps, was chief of the *Bólúcs*, in which the Sultán's name was always entered. 4. The *Zagharjí báshí*, (chief greyhound keeper,) Commander of the 64th *örtá* of the *Jemá'ats*. 5. The *Ssámsónjí báshí*, (head keeper of the mastiffs,) commanding the 71st *örtá* of the same squadron. 6. The *Ttúrnahjí báshí*, (head crane keeper,) commanding the 73d *örtá* of that corps. These six, called the *ójác ághá-lerí*, Commanders of the Hearths, formed the Council of the corps. When removed from their commands, they were either banished, or had an appointment on the frontiers under the title of (7.) *Ser-hadd-Aghá*. Of these, 32 in number, the *Aghá* of Viddín had the precedence. He was always Commander of the 68th *Jemá'at*, which was invariably stationed there. 8. The *Istánból-Aghá*, Commander of the *'Ajemi-bghláns*, who held his post for life, was Colonel of their 34th *örtá*; the next in command to him were the *Rúm-'ili Aghá* and the *Anáttóli Aghá*, each at the head of 17 *örtás*. 9. The four *Ssolác báshís*, Colonels of the Imperial guard, walked on each side of the Sultán's horse in public procession, and wore a green velvet uniform faced with lynx-skin. 10. The *Ojác-imám*, or Priest of the corps, commanded the 94th *örtá* of the *Jemá'ats*; he was distinguished by the *'urf*, or sacerdotal turban. 11. The *Beitu-l máljí*, or Executor-general, head of the 101st *örtá* of the *Jemá'ats*, administered to the effects of Janissaries who left no heirs. 12. The *Básh Chávush*, (Head *Chávush*, commonly spelt *Chiaous*,) head of the 5th *örtá* of *Bólúcs*, was Lord Provost of the corps, with 300 *Chávushes* under his orders. 13. The *Muhzur Aghá*, commanding the 28th *örtá* of the same squadron,

VOL. XXIII.

mounted guard at the palace of the Grand Vezír, and had apartments in it. He was the agent for the corps in all transactions with the Government. 14. The *Kíahyá-yerí*, head of the 32d *örtá* of the *Bólúcs*, who formed the body-guard of the *Aghá* of the Janissaries. 15. The *Tálím-khánehjí*, commanding the 54th *örtá* of the *Bólúcs*, was Drill-master-general. 16. The *Chardác Chórbáji*, head of the 56th *örtá* of the same squadron, was stationed in the *Chardác*, or chief guard-house in the Capital, and accompanied the *Istánból-cádi* (Judge of Constantinople) in his rounds to inspect weights and measures. 17. The *'Assas báshí*, a commander of any *örtá* of the same squadron, was high sheriff of the city. 18. The *Ashjí báshí*, head of the 33d *örtá* of the *Seimens*, was quartered in summer at *Istránjah*, on the Black Sea; in winter in the Capital. The other commanders were simply styled *Chórbá-jí*, (soup-makers,) and took precedence according to seniority.

Each *örtá* had the following officers. 1. An *Odá-báshí*, or Lieutenant-colonel; 2. a *Vekíl-kharj*, or *Kuler-kharjí*, i. e. Quarter-master; 3. a *Baírác-dár*, or Ensign; 4. a *Básh-eskí*, Commander of the Veterans; 5. an *Ustá*, or *Ashjí*, or cook; 6. a *Básh cará cülluc jí*, or head scullion; 7. a *Saccá*, or water-carrier; 8. a *Cará cülluc jí*, or scullion; and its full complement in time of war was 500 men. The 105th alone had one additional officer, the *Zenbil-jí*, (basket-maker,) who ranked next to the *Saccá*. This want of officers was one of the capital defects in the system of the Turkish armies. Every soldier could rise to the rank of *Odá-báshí* by merit or seniority. All the higher posts depended solely on the Sultán's pleasure. The different regiments (*örtás*) were in time of peace permanently stationed each in its own garrison, but their Colonels (*Chórbá-jí*) were often changed.

There were also ten corps united with the squadrons already named, each of which had its peculiar destination; viz. 1. The *Yazíjis*, (writers,) in number 100, who kept the roll-call. Their commander was styled *Yeni-cherí kátibí*, Clerk of the Janissaries, and till the time of Mohammed II. was always one of the *Chórbá-jís*, but afterwards chosen from among the *Khójah káns*, or Privy Secretaries. Their appointment was annual, but usually renewed. 2. The 60 *Odá-yazíjis*, or regimental registrars, who had the care of official documents, deeds, and papers of all kinds belonging to the corps. The *Básh-yazíjí* ranked as a Colonel. 3. The *Kár-khánehs*, 34 companies of artificers, 25 or 30 each, who worked only for Janissaries; their chiefs were styled *Ustá*, (master.) 4. The *Tulumbahjis*, or firemen, 300 men chosen from the different *örtás*. When working they wore helmets of brass, and the *Tulumbahjí báshí* had one of massive silver. This corps was established by Ahmed III. in 1720. 5. The 300 *Chávushes*, chosen from among the veterans, and employed as King's messengers, Sheriff's officers, &c. 6. The 24 *Mümjís*, under the *Mehter-báshí*, were the public executioners. 7. The 60 *Capú Kíahyás* were the executioners attached to the Grand Vezír: five appointed to inflict the bastinado were called *Falácahjis*. 8. The 60 *Hharbahjis*, or Halberdeers, were another corps of executioners, attached to the Vezír and *Aghá* of the Janissaries when in the field. 9. The *Shadís*, 60 Janissaries employed in fetching wood for the Sultánah's kitchen. 10. The *Hú Kesháns*, or *Bektáshí* Dervishes, who since 1591 were enrolled in the 99th *örtá* of the *Jemá'ats*.

3 o

JANI-
ZARY.

JANI-
ZARY.

Their business was to pray night and morning for success to the Empire. In processions, eight of them marched before the *Aghá* of the Janissaries, clad in green, their leader shouting out incessantly *Kerîmu'llah*, (God is bountiful,) to which the others responded *Hû*, (He [alone exists !]) whence their name of *Hû Keshân*. The *Bóstánjís*, or gardeners, some of whom were stationed at Constantinople, and others at Adrianople, also belonged to the corps of Janissaries.

Murádjah says, (vii. 327.) that, at first, the Christian children admitted into the corps of Janissaries were not compelled to become Musulmáns, but he produces no authority for that assertion. For a short time, perhaps, before there were enough among the '*Ajemi-óghláns*' to supply recruits when wanted, such a system of toleration might be followed; but we may be assured that the Turks were not more tolerant in the XIVth century than they are at the present day. The recruits were draughted off from the '*Ajemi-óghláns*' once every seven years. In process of time, children and relations of Janissaries were deemed admissible, and such were called *Cúl-óghlú*, (slave son,) no title being thought more honourable than that of an Imperial slave. Under Murád III. persons of all descriptions were admitted, and that license continued more or less till the final dissolution of the corps by the Sultán now reigning, Mahmúd II., in 1826.

The form of admission was this. The whole *órtá* was assembled in their barracks after evening-prayer, and the inferior officers placed a Janissary's cap on the head of the recruit, throwing at the same time a cloak of coarse cloth over his shoulders, and he then kissed the hand of the *Odá-bashi*, who saluted him by the title of *Yól-dásh*, (companion.) If any punishments were due, they were then inflicted as a warning to the novice. In the field, the recruits merely marched in a line before the *Aghá*, and, as each passed, his name was registered in the list of the *Básh-Cháúsh*, who, seizing him by the ear, gave him a smart blow on the nape of the neck, and ordered him to join such an *ódá* and do his duty. Their numbers were gradually augmented till the beginning of the reign of Mohammed IV., when they mustered more than 200,000 men. He reduced them to 55,000; but, in 1655, the Government was obliged by their clamours to raise them again to 80,000. Since the time of Mustafá III. attempts were made to substitute the Provincial militia and irregular troops in their place. Selím III. endeavoured to form a corps disciplined in the European manner, but the attempt cost him his life; and nothing short of the cruel but vigorous measures adopted by the present Sultán, could have disbanded a corps comprehending almost all the males in the Empire.

Each *órtá* in Constantinople was supposed to have 100 men; elsewhere 200 or 300, but their numbers were always varying. In time of war the complement was larger. The regimental rolls, produced on the pay-days, made the number about 120,000, but those lists were never correct; and they comprehended all the three classes of Janissaries, viz. 1. the *Eshkínjís*, or those in actual service; 2. the supernumeraries, who lived by their trades and callings, and succeeded in case of vacancies; 3. the *Táslácjís*, or honorary members of the corps.

Three years' service gave a right to pay in time of Peace. The pay of the six general officers was considerable, and the patronage of the corps was in the

hands of the *Aghá*. A tenth of the property of every Janissary deceased was divided between the *Aghá*, *Beitu-l-máljî*, and *Chórbájî*; and the whole, if under 10,000 piastres, went to the *Aghá*, in case the deceased had no heirs; but a tenth of it was given up by him to his two colleagues. If more than 10,000 piastres, it all went into the public Treasury; and that fund brought in about 20,000 piastres per annum. In the Provinces the *Chórbájís* enjoyed these emoluments, except the property of the deceased exceeded 3 purses = 1500 piastres. The *Bóstánjî bási* was heir to the soldiers of his corps, only in case the property was under 1000 piastres. The largest emoluments arose from errors in the lists; the soldiers' pay being issued to the officers according to those lists, they were therefore made out as if each regiment had its full complement. This branch of peculation was participated in by all the great officers of state, as Murádjah has clearly shown. (vii. 338.) Meritorious officers sometimes received fiefs called *Beyliks*, (Lordships,) and the title of *Yâyá Beys*, (Colonels of Militia;) but these were pensions on retirement. There were four barracks of Janissaries (*Kishlá*, Winter-quarters) at Constantinople; 1. the *Eski Odálar*, (Old Chambers;) 2. *Yeni Odálar*, (New Chambers,) in which those of the three first squadrons were lodged; 3. the '*Ajemi-óghlán-kishlá-sî*'; and 4. the *Aghá-capú-sî*, (the *Aghá's* Porte,) or Headquarters.

A small allowance of provisions, and clothing for 12,000 men, was all that the Government furnished, hence the necessity of suffering the privates to work at their trades. All the men of one regiment were bakers; all those of two others butchers; others, again, all boatmen, masons, &c. and they were named accordingly; thus the four first *órtás* of the *Jemá'ats* were called *Devehjís*, i. e. camel-drivers, because they formerly were the carriers of the Sultán's baggage.

The *kuláh*, or cap of dirty white felt, with a long strip hanging down behind, in imitation of Bektásh's sleeve, was the distinctive part of the Janissary's dress, but their dress had also a peculiar pattern, and so far was uniform, though they were not restricted to the same colour. The Colonels of the different regiments were distinguished by the colour of their boots. Their Generals wore a large plume (*uskuf*, or *cúcah*) on gala-days. None but veterans among the privates were allowed to wear their beards; but the General and four senior Officers of each *órtá* were obliged to wear them. The Turkish troops were required to find their own arms; but in time of war fire-arms were furnished to such soldiers as had none, from the arsenal at Constantinople; and, as Murádjah observes, (vii. 346.) every thing which issued from those magazines might be considered as lost to the State. No arms but maces and a cutlass were, according to him, allowed to be carried by the soldiers in time of Peace: he adds, when not in garrison. The correctness of this statement, except with regard to the Capital, may be justly doubted. A firelock, pistols, mace, and axe, were the arms carried by the infantry; and the Janissaries prided themselves in having not only well-tempered, but also richly ornamented arms. They strained every nerve to have splendid swords and pistols. The *káirá*, or great standard of this corps, called *Imám'Azem*, (the Great Imám,) from Abú Hhanífah, founder of the most rigid and orthodox sect, was made of white silk, and had a text of the Corán relating to military duties embroidered on it;

ZARY.
—
JANUARY.

e. g. "We give thee victory; a decisive victory: it is God who aideth thee, and his aid is sufficient; thou mayst declare this, Mohammed, to the true believers." This standard with four others, (*gunder*), enclosed in scarlet cases, and his three horse-tails, were placed before the tent of the *Aghá*. Each *órtá* had its own particular *Baírác* half red and half yellow, planted before the tent of its Colonel. Each division, also, had its peculiar ensign, (*nishán*, mark,) representing a weapon, animal, plant, or some other object.

But a more important distinction in their estimation were the caldrons attached to each *órtá*, two or three in number, placed under the special care of the subaltern officers. The loss of these utensils was considered as the greatest misfortune which could befall the regiment; and if they were taken in war, all the Officers were immediately cashiered, and in many cases the regiment was publicly disgraced. But the most laughable circumstance, according to European notions, is, that by seizing upon the caldrons of a corps who held back in case of any resolution to oppose the Government, the seditious troops frequently brought over those who were disinclined to join them. In these caldrons the broth was carried daily from the barracks to the different guard-houses. Each was hung upon a long pole, carried on the shoulders of two privates, followed by a third, bearing an enormous ladle, proceeding in slow-march time, and beheld by the multitude with the utmost veneration.

The police of the Capital and large towns was intrusted principally to the Janissaries, and they had guard-houses (*corps-de-garde*, *cálluc*) in every district. They went their rounds as patrols, in parties of eight or ten, several times a day, but were never placed as sentinels. The guard-houses were often visited by the superior officers, and by the Vezír and Sultán himself *incognito*; and these great personages always left something for the men on duty. The cleaning of the streets was also required from the soldiers on guard; but this they converted into a source of emolument, as under pretence of claiming the *ráyás'* assistance, they levied a sort of tax on all who came near them, for being exonerated from this disagreeable duty. When they seized a culprit, they dealt their blows at him without scruple, and hurled their ponderous staves at his legs if he attempted to run away.

The military punishments were imprisonment, scourging, perpetual imprisonment, and death. Imprisonment for a few days could be ordered by the subaltern officers. The slighter scourging, consisting in "40 strokes" of the rod "save one," laid on the back or posteriors of the offender, was inflicted by the *Odábáshí*. The severer scourging could only be ordered by the head of the *órtá*, and it amounted to 79 blows,

laid on with all due formalities by the *Cháúshes* of the corps. For the two severest punishments, none but the *Aghá* and Grand Vezír could give sentence. The Janissaries were usually imprisoned in the castles on the Dardanelles and the Bosphorus, and, when punished with death, were strangled privately in the night. Deserters, in time of war, were sometimes punished by the loss of their nose and ears, or were even strangled; but this was a severity beyond the law.

The peculiar privileges of this corps were considerable: 1. they took precedence of all others; 2. could only be punished by their own officers; 3. paid no taxes; 4. their *Aghá* ranked even above the Cabinet Ministers; 5. he was sure, if displaced, of a good *Páshálic*; 6. was guardian of the Princes of the blood; and 7. appointed to verify the death of the Sultán, and announce it to the people. Suleimán I., commonly called Soliman the Magnificent, ordained that whenever he passed by the old barracks, then the head-quarters of the Janissaries, one of their officers should present him with a cup full of sherbet; and Mahmúd I., in 1750, issued a *khatti sherif* (an order in his own handwriting) conferring the same privilege on the new barracks, and adding that the cup should be presented by the *Aghá* himself. It is remarkable that this corps, which was said by Mahmúd I. "to have deserved the praise and favour of the Emperors, its masters and protectors," should have been cut off with unsparing ferocity and rigour by Mahmúd II.

Lampoons and seditious papers affixed to the gates of the Mosques, and conflagrations in various parts of the city, were the methods by which this formidable body made its discontent known to the Sultán; but that discontent was seldom excited by any thing except the power of some unpopular Minister, or the revival of a more rigid discipline. This ungovernable soldiery well knew that, in the midst of confusion, all power was really in its own hands; and the various instances in which the Sultáns were deposed, insulted, and murdered by the insurgent Janissaries, are a sufficient proof how little they merited the honours and encomiums lavished on them by Mahmúd I. Mutinies were quieted by distributing largesses, and when the soldiers were tranquilized, an oath of obedience and fidelity was administered; the only time at which an oath was ever required by the Turks. The soldier, when sworn, laid his hand on a silver dish on which were placed a Corán, a sabre, bread and salt; implying that if guilty of perjury, he deserved to fall by the sword, and to have his bread and salt turned into poison.

ZARY.
—
JANUARY.

JANUARY, Lat. *Januarius*; inde vocatus quod Jano esset sacer.

In England also, till of late, we had two beginnings of the year, one in *January*, and the other on March 25; but by act of parliament in one thousand seven hundred and fifty two, the first day in *January* was appointed to be the beginning of the year for all purposes.

Priestly. *Lectures on History*, part iii. lec. 14.

It might be thought that the derivation of JANUARY

from *Janus*, was sufficiently obvious and simple to preclude the necessity of inventing any other, but Longinus, as cited by Suidas, has painfully betaken himself to a more remote source, *Αἰωνάριος, ὁ ἰανουάριος μὲν οὕτω Λογγίνος αὐτὸν ἐρμηνεύσαι βιάζεται, ὥσαντι αἰῶνος πατέρα*. In like manner Porphyry, in his *Tract de antro Nympharum*, suggests another forced Etymology, *διὸ ἰανουάριον εἰπόντες τὴν θύραν, καὶ ἰανουάριον μῆνα τὸν*

JANUARY. *Θυραῖον προσεῖπον.* Macrobius tell us that this month was added, together with February, to the Romulean year, and dedicated to Janus, because, from its situation, it might be considered to be retrospective to the past, and prospective to the opening year. (*Sat.* i. 13.) Numa assigned 29 days to it; on the reformation of the Calendar by Julius Cæsar it obtained 31. (*Id. ib.* i. 10.) Plutarch, in his *Life of Numa*, states it to be a matter of doubt whether that king *added* these months or *transposed* them from the eleventh and twelfth to the first and second places. In his *Quæstiones Romanæ*, he again speaks of the change made by Numa, and thinks that peaceful monarch gave the post of honour to January out of regard to Janus himself, a cultivator of peace. (*Opera*, vol. ii. p. 268. *Ed. Xylandri.*) Censorinus simply says *Januarium ab Jano, cui adtributus est nomen traxisse.* (*de Die Nat.* 22.)

The History of JANUS is concisely related by Aurelius Victor. (*Origo Gentis Rom.*) Creusa, a daughter of Erechtheus, having borne a son to Apollo, sent him for education to Delphi. Her father, ignorant of this previous arrangement, gave her in marriage to his friend Xipheus or Xuthus, who, not having issue from her, consulted the Pythian Oracle upon this delicate subject. The opportunity of providing for his boy, by restoring him to maternal care, was too good to be neglected by Apollo, and accordingly he instructed his votary to adopt whomever he should chance to meet first on the next day. Janus of course was thrown in his way, and that youth, as he advanced to manhood, being ambitious of larger possessions than fell to his lot in Perrhæbia, set sail for Italy, and founded the city *Janiculum*, on the hill which afterwards bore the same name. During his lifetime Saturn, having been obliged to abdicate, took refuge in *Latium*, and being hospitably received, made his residence at *Saturnia*, near the town of Janus, where he materially contributed to the civilization of the rude natives. The chronology of these transactions is placed about 160 years before the arrival of Æneas, or A. M. 2722.

Plutarch, in his *Life of Numa*, corroborates this account of the benefits conferred by Janus on Society; he states that he was *πολιτικὸν καὶ κοινωρικὸν*, but he cannot make up his mind to which class to assign him, εἴτε δαίμων εἴτε βασιλεὺς. He believes him to have been gifted with the attributes of two heads, (*ἀμφιπρόσωπον*), because he changed the mode of men's lives from one shape to another. He speaks also of his Temple with two portals, (*δίθυρος*), which is called the Gate of Mars, (*Πολέμου πύλη*), open during War, and shut in time of Peace. It was built by Numa at the bottom of the *Argiletum*, and during the reign of that Prince it was closed for three and forty successive years; afterwards for a short time, during the Consulate of M. Attilius and Titus Manlius, at the termination of the first Punic War, v. c. 519; and then not till Augustus had gained the victory of Actium, v. c. 725.* In the *Quæstiones Romanæ*, Plutarch repeats the reason given above for the representation of Janus with two heads, and adds another, that it might be from his own change of habits and language when he emigrated from Greece to Italy. (*ut sup.* p. 269.) A little onward (274.) he accounts for the impress of an ancient

Roman coin with *Janus bifrons* on the one side and a ship on the other, by considering the two heads as emblems of the conversion which he produced, and the vessel on the waves as significant of the abundance which flowed in during his good government.

Macrobius (*Sat.* i. 7.) attributes the two heads to the qualities of reflection and foresight which distinguished this prudent Sovereign. He interprets the ship upon the coin as commemorative of the arrival of Saturn, the heads as the common mark of princely authority by which money is issued. Even in the days of this writer, about the middle of the Vth century, when this coinage must long since have disappeared from circulation, (for Ovid testifies to its antiquity during the Augustan Age by stating that the impress was almost obliterated,) (*Fasti*, i. 238.) the Roman boys, when tossing up a *denarius*, traditionally remembered the ancient mintage, and called out *capita aut navia?* as ours would cry "Heads or tails?" Macrobius afterwards dedicates a whole Chapter (i. 9.) to Janus. On the authority of Xenon he attributes to him the first foundation of a Temple and the introduction of Religious rites into Italy, and hence he deduces the custom of the primary offering which Janus received in all sacrifices to other Gods. Some, he continues, suppose that he represents Apollo and Diana in one, and there is a similarity in certain of their attributes, as Apollo was *Θυραῖος* and *Ἀγνιεύς*, Diana *Trivia*, so Janus, named *a januis*, is represented with a key and a rod as guardian of all gates and roads. Nigidius, indeed, affirms that Apollo is *Janus*, Diana *Jana*; and of the latter assertion no genuine Etymologist can doubt who recollects how often *a* is prefixed to *i*, *causâ decoris*. Janus, too, must be the Sun who opens the Eastern and closes the Western gate of Heaven; and as keeper of these portals he is invoked in prayer before any other God, that he may give free transit to subsequent petitions. Hence his image is represented grasping the number 300 in his right hand, and 65 in his left, to mark the days of the year which are regulated by his course.* Others call him the world, (*mundum*, i. e. *cælum*), so named *ab eundo, quod mundus semper eat dum in orbem volvitur*; and consequently he should rather be called *Eanus* than Janus. In the ancient Salian Hymns he is termed *Deus Deorum*. He is invoked as *Geminus* and *Pater*,† titles which explain themselves; *Junonius, quasi non solum mensis Januarii sed omnium mensium ingressus tenens* (which he afterwards explains from Juno's presidency over the Calends) *consivius, a conserendo*, because the human race is continued under his auspices; *Quirinus* from the Sabine *Curis* a spear; *Patulcius* and *Clusivius*, because his gates are open, *patent*, and shut, *clauduntur*, in War and Peace respectively. Macrobius concludes with the Legend upon which this last custom was founded. During an engagement in the Sabine war, the Romans applied themselves with great earnestness to shut a gate at the foot of the Viminal, afterwards, from the occurrence, named the Janual Hill, upon which the enemy were making an assault. This gate as often as it was closed opened again spontaneously, and the Romans, finding their efforts vain, placed a strong guard before it. These sentinels, alarmed by a report that their main body was routed, fled panic-struck;

* It was shut afterwards twice again under Augustus, v. c. 730 and 744, under Nero, A. D. 58, and Vespasian, A. D. 71, and for the eighth and last time under the younger Gordian, A. D. 241.

* See on this point Pliny, xxxiv. 7.

† See also i. 17.

JANUS.

and the Sabines, who endeavoured to pursue them through the gate, were checked only by a sudden and miraculous torrent of water which burst forth from the Temple of Janus and rolled its waves through this entrance, sweeping away the invaders. *Eâ re placitum ut belli tempore velut ad urbis auxilium profecto Deo fores reserentur.* Ovid, in relating much the same story, refers the incident to the treachery of Tarpeia.

It is in the Ist Book of his *Fasti* that this Poet holds a Dialogue with Janus, which occupies more than 200 lines, and in which the God fully explains most of his peculiarities. A few may be mentioned which do not occur in our other references. The Ancients named him Chaos, and hence, as one cause of his double figure, when he assumed a corporal shape he retained some marks of his former confusion. Like St. Peter, he is the Porter of Heaven, at the gates of which he is assisted by the ministry of the gentle Hours, and Jove himself cannot pass or repass unless he turns the key. It was from a laudable thrift of time that he was gifted with two heads; for, having been appointed chief surveyor of the high roads, many minutes would have been thrown away if he had been perpetually obliged to turn round.

*ne flexu cervicis tempora perdam
Cernere non moto corpore bina licet.*

Horace speaks of Janus *summus, imus*, (Ep. i. 1. 54.) and *medius*; (Sat. ii. 3. 18.) and the Scholiast has explained them to mean three Statues of the God placed in the *Forum*; one at its entrance, another in the centre, (where also stood his Temple, which was the resort of money-brokers, near the *Rostra* and the *Basilica* of Paulus,) a third at the far end. It may be doubted, however, whether these, instead of Statues, were not rather such *Jani* as that which still remains near the *Velabrum*; a square building with four arches, one on each face. Many of these, as we learn from Ovid, *cum tot sint Jani*, and from Suetonius, who tells us that Domitian built them in such extravagant numbers, that at length one was inscribed *APKEI*, (Domit. 13.) were scattered throughout Rome; and Ovid, in the close of the line partly cited above, expressly states that there was a Statue in one only. Such, probably, was the *νῆος διθύραχος* of Plutarch, which we have already noticed; and that also which Servius (in *Æn.* vii. 607.) describes as erected by Numa in the *Forum transitorium*. The monument still existing under this name is built of Greek marble, the summit having received a brickwork addition, when, during the Middle Ages, it was converted into a fortress by some of the Frangipani. It is ornamented with twelve niches of unequal depths on each side, and its dimensions are 77 feet square.

Spence (*Polymetis*, 196.) has thrown out a conjecture, that the Romans in their most secret mythology intended *Space* by Janus. He remarks that, in all the ancient figures which he had seen of him, both the faces are alike, and both are old, (as indeed they are described by Ovid, *Fasti*, i. 114. 259.) but that the Moderns have fallen into an error by making one young and the other old. In an extravagant passage in the *Sylvæ* of Statius. (iv. 1. 16.) that Poet, in a strain of adulation offensive alike to good feeling and good taste, represents Janus as lifting up all his hands and uttering congratulations with both his mouths at once. Hence

it is probable that the Poet conceived him to be double bodied as well as double headed. In some medals he has one body and four heads. (Oiselii *Thes.* pl. 41. fig. 1.)

St. Augustine (*de Civit. Dei*, vii. 7, 8.) has written two Chapters on Janus and his attributes, which, as we do not understand them, we shall forbear from characterising. The reader will find a specimen of their manner below, before which it is only necessary to premise that the excellent Father has just given the interpretation of Macrobius, that Janus signifies *mundus*, and is proceeding to explain the reason for his two heads. *Duas enim facies ante et retro habere dicitur, quod hiatus noster cum os aperimus Mundi similis videtur, unde et palatum Græci ἐπὶ ἀνὸν appellant. Et nonnulli, inquit, Poetæ Latini cælum vocaverunt palatum; a quo hiatu oris, et foris esse aditum addentes versus, et introrsus ad fauces. Ecce quo perductus est mundus propter palati nostri vocabulum, vel Græcum vel Poeticum. Quid autem hoc ad animam, quid ad vitam æternam? Propter solas salivas colatur hic Deus, quibus partim glutiendis, partim expuendis sub cælo, palati utraque panditur janua. Quid est porro absurdius quam in ipso Mundo invenire duas januas ex adverso sitas, per quas vel admittat ad se aliquid intro, vel emittat a se foras; et de nostro ore, et gutture, quorum similitudinem Mundus non habet, velle Mundi simulachrum componere in Jano, propter solum palatum, cujus similitudinem Janus non habet?*

In the hands of Bryant, the ship on the Roman coin, as might be expected, at once becomes the Ark. All the chief circumstances in the life of Noah, says that learned but whimsical writer, correspond with what is told of Janus. Thus in the following fragment of an ancient hymn preserved by Terentianus Maurus he distinctly perceives an epitome of the Patriarch's history.

*Jane pater, Jane tuens, Dive biceps, biformis,
O cate rerum, sator, o principium Deorum!
Stridula cui limina, cui cardinis tumultus,
Cui reserata mugiant aurea claustra Mundi.*

It can be no matter of surprise that the eyes which discovered an identity between Janus and Noah from the above passage, should see it largely confirmed by each of the titles which we have already cited from Macrobius. (*Analysis of Ancient Mythology*, ii. 253. &c.) Bryant, however, is not without strong support in his general hypothesis, that Janus and Noah are the same. Sir Thomas Browne tells us that "Annius of Viterbo and the Chorographers of Italy" have held the like opinion, (*Vulgar Errors*, vi. 6.) which is by no means indeed to be slightly rejected.

JAPA'N, v.	} So called from <i>Japan</i> , in the East- ern part of Asia. To <i>japan</i> ; to varnish, to polish, as <i>Japan</i> -goods are varnished and polished.
JAPA'N, n.	
JAPA'NESE,	
JAPA'NNER,	
JAPA'N-WARES.	

We found two small vessels at an anchor on the East side: they were laden with rice and laquer, which is used in *japanning* of cabinets.

Dampier. Voyages, &c. Anno 1687.

The god of fire
From whose dominions smoky clouds aspire,
Among these generous presents joins his part,
And aids with soot the new *japanning* art.

Gay. Trivia, book ii.

They change their weekly barber, weekly news,
Prefer a new *japanner* to their shoes.

Pope. Horace. Epist. i. book i.

Nor do I send this to be better known for choice and cheapness of china and *japan-ware*s, tea, fans, &c.

JAPAN.

JAPAN.

For furs, dried fish, and oil, the latter (the Kuriles) get silk, cotton, and Japanese articles of furniture.

Cook. *Voyages*, book vi. chap. viii.

This accounts for what Krascheninickoff says, that he got from Paramousin a *japanned* table and vase, &c. which he sent to the cabinet of her imperial Majesty.

JAPAN.

Cook. *Voyages*, Note on the above.

J A P A N.

Name and Position.

JAPAN, the name given to a considerable Kingdom or Empire on the North-Eastern confines of Asia, is properly the largest of a cluster of Islands which appear to be a long spine or ridge extending from the Southern extremity of Kamchatka in a South-Westerly direction towards the Peninsula of Corea. The Islands which form the Japanese territory extend from 30° to 41° North, and from 128° to 145° East, lying between the same parallels as Northern Africa and the South of Europe: but they enjoy a cooler climate, being exposed on all sides to the sea-breezes and intersected by chains of lofty mountains, the summits of which are often covered with snow. Three of these Islands are of a considerable size; viz. Ni-fón, Kyu-syu, and Sikokf; of which the first is by far the largest, not yielding in magnitude to many in the Indian Ocean. From it, the name given to the whole territory is derived; for *Ni-pón* or *Ni-fón*, as the Japanese pronounce the Chinese word *Ji-pón* or *Ji-pèn*, (*i. e.* the source of day,) was a name naturally given by that people to the furthest country Eastward with which they were acquainted. *Ji-pèn-go*, corrupted by the Venetian dialect and erroneous orthography of the transcribers of Marco Polo into *Zipangu*, was first made known to Europeans by that extraordinary traveller. This name has been translated by the Japanese into *Fino motto*: but *Awa-dzi simà*, *i. e.* earth dript island, seems to be the original term by which they denominate their island, believing it to have been formed from the drippings of a staff, with which, at the Creation, the Supreme celestial Spirit stirred up the turbid mass of chaotic matter. *Ten-ko*, (*Thyén-kwě*), or "the Celestial Region," is another name given to their Country by the Japanese, in imitation of their neighbours the Chinese.

Islands.

Ni-fón is divided by a very narrow channel from *Sai-kokf*, (*Sî-kwě*, according to the Chinese pronunciation,) *i. e.* Western Country, or Kyu-syu, (*Kyèu-cheù*), Country of *nine* Provinces, the second of the islands in magnitude; separated by a wide strait, but connected by intervening islands with Corea; and the third and smallest of the principal Islands, called *Sî-kokf*, (*Sé-kwě*), *i. e.* the four Countries, is to the East of Kyu-syu, lying between it and the Southern coast of Ni-fón. For the innumerable islands of a smaller size, with which the deeply indented shores of these already named are studded, the reader must be referred to maps and the authorities quoted below: they are, however, little known, as the cautious vigilance of the natives has for nearly two centuries prevented any strangers from setting foot on them. It will be sufficient to add, that *Fatsisyoga-issimà*, (*i. e.* 80 fathom island,) lying about 2° due South of Cape Awa, is the most remote Southward possession of Japan, and the place of banishment for such of the great men as have fallen into disgrace. Its name, derived from the precipitous character of its shores, is a sufficient pledge that, like another St. Helena, it is well calculated for the purpose to which it is devoted. The island of Ni-fón is divided into 7

Provinces, and subdivided into 68 Lordships and 604 Divisions. Districts. These Provinces are as follows:

I. *Tó-kaï-dò*, the South-Eastern tract, containing 15 Lordships, divided into 134 Districts. Of the former, *I-sye*, or *Se-syu*, three days' journey in length, *Tó-tómi*, or *Yen-syu*, nearly as long, *Mussasi*, or *Bu-syu*, five days' journey in length, *Kadzusa*, or *Kó-syu*, *Simósa*, or *Syó-syu*, and *Fitatsi*, or *Syo*, are the most considerable, being all of them fertile and populous. The revenue of this Province amounted, in Kämpfer's time, at the close of the XVIIth century, to 494 man-kokf = 1,482,000 bales or bags of rice. The Southern Districts are extremely hot, and produce some tropical plants. *Owari*, or *Bi-syu*, is one of the most populous parts of the Empire. *Kaï* abounds in rice, and breeds cattle, *Kadzusa* produces a great deal of hemp, and *Fitatsi* rears innumerable silk-worms.

II. *Tó-san-dò*, *i. e.* the Eastern mountainous tract, containing 8 Lordships and 135 Districts, paid upwards of 563 man-kokf. *Omi*, or *Aomi*, also called *Gó-sú*, (*Go-cheú*), is a large and extremely fertile district. *Sinano*, or *Sin-sú*, is extremely cold, being situate among the mountains in the West of the country, but fertile and very productive of hemp and silk. *Mu-tsa*, or *Wò-sù*, the largest Lordship in the Island, is also very fertile, and once, together with the adjoining one of *Dewa*, formed an independent Principality. In the latter the Spring is said to begin a fortnight earlier than in the rest of the Island.

III. *Foku-roku-dò*, the Northernmost Province, contains 7 Lordships and 37 Districts. Its revenue amounted to 243 man-kokf. *Wakasa*, or *Yaku-sú*, (*Sya-ku-cheu*, Kämpfer, i. 5. p. 74.) has some mines of iron, one of the rarest minerals in Japan. *Yetsi-tyu*, or *Yé-sú*, is the largest and most productive Lordship in this Province, abounding in fine pastures, and furnishing much hemp and silk. The best vinegar and *soya* (soy) are made in *Ka-go*, or *Ka-sù*. *Noto* is barren, but has some iron mines. The fertile Island of *Sa-dò*, or *Sa-sú*, a journey of three days and a half in circumference, forms one of the Divisions of this Province, and has valuable gold mines.

IV. *San-in-dò*, the cold mountainous tract opposite to Corea, has 8 Divisions and 52 Districts, giving a revenue of 133 man-kokf. Coarse silks are manufactured in *In-aba*, or *In-sú*, and finer ones in the adjoining *Fó-ki*, or *Faku-sú*.

V. *San-yo-dò*, the warm mountainous tract on the South-West side of the Island, has 8 Divisions and 75 Districts, yielding a revenue of 270 man-kokf. *Farima*, or *Ban-sù*, is famous for its manufactures of silk, cotton, and paper. The precocity of the harvests and calmness of the weather in this Province are remarkable, but moisture prevails in *Aki*, or *Gei-sù*, as its abundant crops of mushrooms prove. The preceding Divisions all form a part of the Island of *Ni-pón*. The following ones are situated in the largest of the two remaining islands, *Sai-kokf*, or *Kyu-syù*.

VI. *Sai-kaï-dò*, the way of the Western Sea, con-

JAPAN. tains 9 Divisions and 93 Districts, which yield a revenue of 344 man-kokf. Tsiku-zen, or Tsiku-sù, has several remarkable china manufactures. Bu-zen, or Fó-sù, abounds in medicinal plants, and has a great many silk looms. Wosumi, or Gu-su, is celebrated for its paper; and Satsuma, or Sa-sù, for its cloth and hemp.

Nan-kai-do VII. *Nan-kai-do*, the way of the Southern Sea, comprehends the Island of Si-kokf, and the great Peninsula of Kyi-no-kuni, or Ki-sù, contains 6 Divisions and 50 Districts, yielding a revenue of 140 man-kokf. Most of these Divisions are barren and unproductive; but Sanúki, or San-sù, is celebrated for the eminent men to whom it gave birth; and Iyo and Tosa are the most fertile parts of this Province.

Iki and Tsu-sima. VIII. The Islands of *Iki* and *Tsu-sima*, (I-sù and Tai-sù,) conquered from the Coreans in the XVIIth century, form the Province of Nitó, containing four Districts, and returning a revenue of 3 man and 5000 kokf.

Gokinay Goka kokf. Besides the Provinces above enumerated, there is nearly in the centre of Ni-fón the Royal Domain, called *Gokinay Goka kokf*, i. e. the five territories of the five revenues, producing an income of 148 man and 1200 kokf, peculiarly appropriated to the maintenance of the Court. This Domain contains 5 Divisions and 54 Districts, some of them very productive and populous.

The Provinces are governed by hereditary Chiefs, styled Daï-myō, or Syo-myō, (great or small name,) according to their rank and the extent of their governments.

Climate. The temperature of Japan is much lower than might be expected from its latitude. Thunberg observed the mercury in the thermometer as low as 35° on the 20th January, 1776, accompanied by snow and ice of considerable thickness, and there was ice on the 25th; snow also fell on the 13th of February. This, it should be observed, was on the Island of De-zimà, on the South side of Ni-fón, where the climate is much milder than on the higher land in the interior, at a distance from the sea. The greatest heat he ever experienced was in the month of August, when the mercury rose to 98° for three days successively. The maximum of heat varied from 42° to 68° in January, from 48° to 66° in February, from 54° to 70° in March, from 56° to 76° in April, from 64° to 82° in May, from 66° to 84° in June, from 78° to 92° in July, from 82° to 95° in August; from that period it declined, ranging from 96° to 78° in September, from 86° to 64° in October, from 78° to 59° in November, and from 70° to 47° in December. Not a single month passed without rain, and a great quantity fell in the hottest season, in July, August, and September; which is the reverse of what occurs under the same parallels of latitude further Westward. The cold is also moderated by rain, as it is usually brought by Southerly and Easterly winds, which have passed over a great extent of sea; those from the North and East, on the contrary, are chilled by crossing the central mountains, and are, consequently, in winter accompanied by severe cold. During the summer there is the usual interchange of land and sea breezes in the harbour of Nangasaki. A mist and clouds in the evening indicate approaching rain; in the morning, fine weather. Snow often lies on the ground for several days; and severe storms of thunder and lightning are common in August and September.

The minerals found in Japan by Thunberg (ii. 153.)

JAPAN. were gold ore, (*kin-nab*;) an impure kind of asbestos, (*izi-watta*;) a white, soft, finely fibrous asbestos, (*seki-ma*;) of which cloth is made; copper quartz, (*asyo yamma*;) white porcelain earth, (*fak-sekisi*;) red arsenic, (*owò*, or *ki-kwan seki*;) yellow shell-sand, (*awa sna*;) flesh-coloured steatite, (*saku-seki*, or *isu-watta*;) pumice-stone, (*karu-isi*;) sparry stalactite, (*tsurara-isi*;) pulverized cinnabar, (*syu*;) quartz-pebbles, (*tsugaro-isi*;) white marble, (*nikko-isi*;) galena, with cupreous pyrites, (*seino megin*;) petroleum, from Sinamo, (*kesoso-no abra*;) saltpetre, (*siro yinso*;) salt from the warm spring at Bósu; *Phytolithus lithophyllum* from Mount Fakoní, (*konofa-isi*;) petrified madrepores, (*lú-kuy sangodu*;) petrified sponges, (*uni-watta*;) branching coral, (*Gorgonia, umemats*;) red coral, (*sango-din*, or *sango-syu*;) red millepore, (*dyu-kuts*;) Shells, as the *Anomia plicatella*, (*seki yen*;) Paper nautilus, or *Argonauta argo*, (*tako fune*;) snake's head, or *Cypræa Mauritanica*, (*kino kuñ*;) The *Cicindela sinensis*, (*ham-mao*;) common millepede, (*Iulus terrestris, yasude*;) wood-louse, or *Oniscus asellus*, (*saori kosi*;) and *Ligia oceanica*, (*funi musu*;) the *Syngnathus hippocampus*, (*kayí ba*;) cuttle-fish, or *Sepia octopodia*, (*ika*;) much used as an article of food. In make the Japanese are middle-sized, muscular, but not fat, with well-formed, pliant, active limbs; but they are not equal in strength to the natives of Northern Europe. Their complexion is sallow, of a lighter or deeper brown, according as they are more or less exposed to the sun; but in them, as in the Chinese, the distinguishing feature is the eye, dark brown or black, deeply seated, long, and narrow, never round, the lid forming a deep furrow with the larger angle of the eye, together with an expression of archness and quick-sightedness. The eye of a Japanese distinguishes him at first sight from all other nations, except the Chinese, and what is commonly denominated the Tartar race. He has also higher eye-brows than an European. A large head, short neck, black hair, and short, stunted nose, are the other features most common among this people. In character they are intelligent, prudent, open, attentive, courteous, inquisitive, industrious, dexterous, frugal, sober, cleanly, good-humoured, friendly, upright, honest, faithful, honourable, resolute, and unconquerable; but suspicious, superstitious, proud, haughty, and implacable. This is the character drawn by Thunberg, (ii. 154.) who seems much struck by the superiority of the Japanese over most of the nations of Western Asia, and especially over the Barbarians in their immediate neighbourhood. Their institutions, indeed, as well as their Arts and Sciences, place them far above the latter; but in order to determine their proper place in the scale of morals and civilization, it will be necessary to consider more fully their Civil and Religious institutions.

Their Government is a pure, unrestricted despotism. From 660 B. C. when Sin-mu ten-wo (Shin vu t hyénh wang) is said to have introduced a fixed system of Chronology, and formed the basis of true History in Japan, till 1142, the whole sovereign power was vested in the Daïri, called also Te-wó, Tsokin, Mikádo, tensi (t'hyên-tsé) kun, innogoso, and sentó. From the latter period, till 1585, the secular authority was trans-

Government.

JAPAN. referred to the Kubo, or Djogún, *i. e.* Commander-in-chief of his troops; and in that year Taiko Sama, a man who had raised himself from the lowest rank to the supreme command of the army, taking advantage of a war with the Coreans, gradually reduced the power of all his rivals, brought all the Provincial Chiefs into subjection to the Daïri, or Supreme Pontiff, and vested the secular sovereignty, without any check, in himself and his descendants. The spiritual sovereignty of the Daïri was preserved inviolate; his supremacy has always been acknowledged by the Kubo, but the latter keeps all the real power in his own hands.

Dayro, or
Supreme
Pontiff.

This spiritual Prince, whose prototype is evidently the supreme Lamá of the Tibetians, has an unlimited power, and receives something approaching to divine honours. His person is too sacred ever to be seen by any but his own immediate attendants. Whenever he is borne on their shoulders (for he never walks out) into the open air, notice is publicly given that every one may get out of the way, lest they should be guilty of looking at him. From his castle, which is extensive, he never issues; and the plates from which he eats are immediately broken, lest they should be used by the profane. His clothes, however, are given to his attendants; but no one is so daring as to utter his name till long after his death. He is not condemned to celibacy, for he has twelve wives, one of whom takes precedence of the others, and his whole Court consists of members of his own family, for whom all the most lucrative offices about his person, civil as well as spiritual, are reserved. He formerly varied his place of residence at pleasure; but has now, for many years, been restricted to Miyáko, where his castle, or palace, forms a considerable town in itself. The lofty towers of the central building mark the Daïri's own apartments; the buildings nearer to the outward walls are occupied by his Court and attendant Priests, who form a sort of University, and are engaged in the study of Theology, and such other branches of knowledge as are esteemed by the Japanese. His Vicar General, the chief officer of his Court, who, in fact, transacts all the business in which the Daïri's name is used, may be considered as virtually the second person in the Empire; but he is appointed by the Djogún, or Kubo, not by the Daïri, so that the former is virtually the source of all Civil and spiritual, as well as military power. All distinctions of rank whatever are supposed to emanate from the Daïri, and all the patents or diplomas conferring such titles must have the signature of his Vicar General; and the fees paid for such documents, together with the revenue derived from the territory round Miyáko, and a considerable allowance annually issued from the Kubo's Treasury, form the whole fund now possessed by that spiritual chief for the maintenance of his Court, which is still kept up with considerable splendour, though less than formerly. (Thunberg, ii. 2. 8.) That indeed seems to be the case with respect to the Imperial Court also; for Thunberg repeatedly notices the simplicity of its decorations, asserting, at the very threshold of his work, (*Pref.* p. iv.) that "neither about the monarch, nor any of his subjects, is there any outward splendour, such as thrones, crowns, and sceptres, to blind the eyes of the multitude;" while Schaap and Byleveld, to whom the Court was shown after their liberation in 1644, describe the Imperial throne (*Ambassades*, &c. i. 221.) as "supported by columns and raised upon steps of massive gold, and covered with carpets of

inestimable price;" placed also "under a canopy of massive gold, at the four corners of which were dragons of the same metal." This, it may be remarked, is exactly in the taste of the Chinese, from whom all the Arts and Literature of Japan were borrowed. "The ceiling," those travellers add, "was also of gold, adorned with figures wonderfully made, and sprinkled over with a number of fine diamonds. The canopy was supported by four large columns, all covered with precious stones; the two in front representing a terrestrial and celestial globe, those behind being covered with figures, in relief, of sea-monsters and fishes on the one, of dragons and other animals on the other." The dress of the Emperor is also described as equally splendid.

The Government was, probably, at first patriarchal, or, perhaps, a theocracy, under a visible representation of Budd'ha, or Gautama, in the person of one of his descendants; for though our authorities nowhere clearly identify the faith of the Daïri with that of Shaka, (*i. e.* the Sakya muni of the Hindús,) there are too many points of resemblance between the functions and character of the Supreme Pontiffs of Thibet and Japan, to leave much doubt as to their having had a common origin. When the population had increased, and the power of the more ambitious families had been augmented, the temporal authority of this spiritual chief would naturally decline; the military leaders appointed by him would virtually govern the Country, and if one possessed more ability and penetration than the rest, he would find it no very difficult task to render himself independent of his unwarlike patron, and establish a military despotism, hereditary in his own family. Such seems to be the outline of the revolutions which terminated, about two centuries and a half ago, in the establishment of the Government at present existing in Japan. All power virtually, though not apparently, emanates from the Kubo, or Djogún, who nominally receives his dignity and pays external homage to the Daïri, or hereditary spiritual chief. The Provinces are governed by hereditary Viceroys, invested with an almost uncontrolled power over their inferiors, who were, in most cases, the subjects of their ancestors then independent chiefs; but these Viceroys are removable at the Emperor's pleasure, and continually displaced on very frivolous pretexts. They belong to the Order of *Ku-gé*, or Nobles, but are entirely under the command of the *buké*, or military Order, from which the reigning family sprang. A military commander, styled *Sugo*, or *Yakata*, is stationed in every Province, whose business it is not only to command the troops, but also to superintend the execution of the laws, and inflict punishment on malefactors. He likewise appoints the *gitos*, or revenue officers, called *Kuni-su* and *Kuni-dai-myó*, who are stationed in every township to levy the portion of the produce claimed by the Crown. These officers possess, as might be conjectured, all the rights and privileges of feudal Lords; and in a State scarcely removed from barbarism, where personal service and payments in kind are almost the only kind of payments known, vassalage could hardly fail to spring from such an exclusive possession of authority by the military. It accordingly does exist to the greatest extent in Japan; and though personal slavery may be held in abhorrence, it is difficult to comprehend how "freedom" can be said, in the words of Thunberg, ii. (l. 156.) to be "the life of a Japanese," as he can be called upon at all

JAPAN.

JAPAN. times and seasons, to perform personal services for his superiors, and to relinquish his own pursuits and interests for the gratification of their caprices; and as he is bound, moreover, to pay an instant and most servile submission to their commands.

It is indeed remarkable that the best informed, and, it might almost be said, the latest travellers in Japan, Kämpfer and Thunberg, have both represented that Country as enjoying an unmingled prosperity, under a Government as wise in its enactments as it is rigid in the execution of its laws; and yet, when in addition to what has been already said respecting the nature of that Government, it is added, that almost all crimes are punished with death, because any violation, great or small, of the sacred laws of the realm is considered as deserving of the severest penalty; that "the relations, friends, and even neighbours of a murderer often expiate his guilt by their blood;" it is difficult to understand how the universal happiness and contentment of which they speak can really prevail. The truth is, that they saw the Country only for a short time, and under excessive restraint; they were not even prisoners at large; could hold no intercourse, except with a very small number of persons, and had no opportunity whatever of observing the natives in private, and, consequently, of ascertaining their real condition. The only persons with whom they could converse, had abundant motives for softening down, if not for concealing, whatever told unfavourably for their Country and its institutions; and though the excellent police maintained in Japan may be very conducive, as it is in China, to the tranquillity and security of the subject, it must contribute, in no small degree, to prevent real grievances from being known, and it affords no security against the encroachments of those in power. As a proof of the ease with which essential parts of the national character may be overlooked, the total silence of Thunberg with respect to the craft and duplicity of the Japanese may be mentioned. Circumstanced as he was, with nothing in his conduct or inquiries likely to excite suspicion, his acquaintances among the natives had no temptation to exercise their talent in deceiving; but the profound and well-disguised art by which Schaap and his party were entrapped in 1643, is so exactly the counterpart of the game which was played with Golovnin, in 1811, (*Asiatic Journal*, iv. 432.) that, were there no other evidence of the skill of the Japanese in dissimulation, that part of their character would be sufficiently proved. Where, in truth, has a minute and harassing system of espionage ever been established without producing habits of caution, distrust, and dissimulation in those upon whom this domestic tyranny is exercised? That there are many good points in the national character of the Japanese seems to be beyond dispute, but that the bad ones have been overlooked, or seen with too favourable an eye, by the writers in question, seems to be equally indisputable.

Every city is governed by four Magistrates, each of whom presides for one year in turn, and is styled the *Ninban*; every street has its own *Otona*, or Commissioner, who, by means of his subaltern officers, takes an account of every thing which occurs in his district, and makes his report to the *Ninban*. All marriages, births, deaths, arrivals, and departures, are recorded in his registers, he settles disputes, and imprisons delinquents. This officer is chosen by the householders of his street, and paid by a rate levied on them, as are also his three

assessors, clerk, and cashier. His inferior officers are spies, whose duty it is to bring him intelligence of every thing that passes. Every street has a gate at each end, so that all communication can be cut off on the least symptom of riot. These gates are usually from 200 to 400 feet a part, and are always closed at night; but as a protection against fire, a danger much to be apprehended in the crowded and slightly-built towns of Japan, there are ladders at the end of each street for the watchmen to mount from time to time, and give alarm if necessary. Every house has a square place on its roof, enclosed by a rail, in which a vessel full of water is placed, to be ready in case of fire; and fire-proof warehouses of stone are erected, at intervals, for the reception of goods and furniture. The watchmen give notice of the hour by striking two pieces of wood together; and the fire-men rouse all the neighbourhood by dragging an iron bar, or a stick shod with iron, after them along the street, which makes, as Thunberg gravely remarks, "a peculiar and very unpleasant noise." Many iron-hooks are fixed in the walls of the houses for the purpose of hanging up wet mats in case of fire. These precautions appeared to Thunberg admirable, and are certainly very praiseworthy; but must not the practice of locking up every street contribute materially to counteract their utility? And he himself observes in another place, (ii. l. 115.) that whole rows of houses are often reduced to ashes, and that, in 1772, the Dutch Ambassador witnessed a fire at Yedo, which lasted for eight hours, and spread its ravages over an area of six miles* long and three broad; and this occurred in the middle of the day; so that the precautions used are neither so efficient nor so easily applied as he seems to suppose. Inns of various descriptions, and post-houses, where relays of horses and porters are to be had, occur every 8 or 12 miles, and seem to indicate not only a constant traffic, but a disposition on the part of the Government to promote it; but as the only road ever travelled by the Dutch is that between Nangasaki and the two Capitals, necessarily the most frequented in the whole Empire, it ought not, perhaps, to be taken as a sample of the rest, and of these they know nothing.

The severity of the laws, and the rigour with which they are administered, seem to have struck Thunberg and Kämpfer as proofs of their excellence; and yet the former adds, that, in many cases, the penalty is not expressed, that the law seldom defines the offence, and that no allowance is made for any circumstances in mitigation. The long and harassing imprisonment inflicted on seamen, decoyed by the Japanese into their ports at various periods, are not, in truth, indicative of the love of justice, the uprightness or the courage for which that writer gives them unlimited credit. He even goes so far as almost to approve of such sweeping sentences as the condemnation of a whole street for the offence of one of its inhabitants; the punishment of a master for a crime committed by his servant; of parents for the delinquencies of their children, forgetting that *summum jus, summa injuria*, is a principle of which no lawgiver should ever lose sight. The prisons, he says, (ii. l. 15.) are kept clean and wholesome, have kitchens, eating-rooms, and baths, as well as halls for hearing penal causes, executions, &c. Crucifixion, impaling, and the other cruel modes of execution for-

* If German miles are those here meant, the space thus desolated, was 24 English miles one way by 12 the other.

JAPAN.

merly in use, are rarely practised now. The laws are inscribed in large letters on tablets, erected in some frequented spot in every town and village, and protected by a grating; but the penalties incurred by a breach of them are not named. How much must, in such cases, depend upon the equity of the judge, is sufficiently manifest.

Revenue.

The public revenue of the Djogún, or Kubo, arises, as before observed, from the produce of the Royal domains, and the presents made by the Dutch and the Viceroys in their annual visits to the Court. Every householder pays a house-tax, in proportion to the front of his house towards the street, besides the customary presents to the public officers, and contributions for the service of the Temples. A receiver is appointed to collect the duties on landed property, which are, in fact, a rent proportionate to the produce, and paid in kind. The fields are frequently measured, often twice in the same year; and the charge on arable land, if very productive, amounts to more than two-thirds of the whole produce. To determine the amount, a portion of the field is measured, the grain cut, carried, thrashed, and then told out, in order to form an estimate of the whole. The land is always the property of the feudal Lord, or of the Crown; and, for the first two or three years after clearing new land, the cultivator pays no rent. The Viceroys, or feudal Lords, are expected to bring yearly contributions, in the form of presents, in proportion to the extent and produce of their lands, and their wives and families are obliged to reside at Yedo, as a security for their fidelity. It is almost needless to observe, that several of these regulations afford conclusive evidences of the real state of the Country. When the population is so rigidly prohibited from emigrating, there would not be any need of a law to encourage the cultivation of waste lands, if no secret check operated to prevent the natural increase of numbers, especially in a Country which has been so long free from foreign or domestic war. Every thing seems to show that Japan, like China, would appear in a very different condition, could the districts remote from the sea and the neighbourhood of large trading towns be visited. Our notions of the population and resources of the Turkish Empire would be very erroneous, if we had admission only into one or two of its harbours, and could never visit any of its towns except Aleppo, Smyrna, and Constantinople. At the same time it must be allowed, that there appears to be a kind-heartedness and national spirit in the Japanese, an industry and intelligence, which softens the rigour of their Government, makes them desirous of serving each other, and active in the improvement of their means, so as to counteract a portion of the evil naturally arising from the system by which they are ruled. Their urbanity is something more than mere outward form; they are kind and tender to their children, though exacting a rigid obedience, having wisely observed, that a rule followed invariably from the first, renders corporal punishment unnecessary. "Their institutions often appear singular to a stranger," says Thunberg, (ii. 1. 17.) "and are not unfrequently arbitrary in the extreme; but they are certainly in part excellent, and in many cases necessary. In general, it may be said, that in Japan, the supreme Government, as well as the other functionaries and public servants, are more attentive to the good of the Country, the maintenance of order, and the security of the subject and his property, than in most

National character.

other Countries." "I never was in a country," says Mr. Gordon, (*Asiatic Journal*, viii. 338.) whose observations were made more than 40 years after those of Thunberg, "the inhabitants of which conducted themselves with so much propriety as they do in Japan. They were not only polite and affable towards us, but invariably so towards each other; notwithstanding the respect paid to superiors may strike Europeans as servile and degrading, I cannot consider it as such; and the most superficial observer would be struck with the kindness of masters towards their menials."

Idolatry is nowhere more exclusively established than in Japan; for the pride and insolence of the Popish priesthood excited such alarm and inflicted so deep a wound on the no less ungovernable pride of the Japanese, that, with their characteristic perseverance, a persecution of the Christians was carried on with unabated violence for more than half a century, till almost every vestige of the proscribed Faith was utterly rooted out. Genuine Christianity, it may be truly said, would not have led to such a result, nor have given birth to the misconduct which provoked this horrible and protracted retaliation. The forms of religion tolerated in Japan are three; each of which has its peculiar Deities, rites, and Temples, and the votaries of each are said to live together in the greatest harmony.

The first, and, as it is believed, original Faith of the Japanese, is that of the *Sin-to*, also called *Sin-syu* and *Kamimitsi*, i. e. the worship of *Sin* and *Kami*. The professors of this Faith believe in one supreme Deity, ruler of heaven and earth, dwelling in the highest heaven; but too much exalted and too far removed from men to take any part in their affairs. Under him the inferior Gods dwelling among the constellations are placed, and by this second class of Deities the Japanese swear; but those of a third rank, supposed to preside over the elements and all places and things on earth, are the proper objects of their devotion. Happiness here is the great end which they hope to attain: of a future state of retribution, they have only very obscure notions. To this class of Divinities the first seven Emperors, probably, belonged. They are believed to have been purely spiritual, and are called *Ten-sin-sitsi-dai*, i. e. the seven great heavenly Spirits; each of them being also entitled *Mikotto*, i. e. the possessor of heavenly bliss. The first three were unmarried; the others espoused female Mikottos, and, by a spiritual generation, gave birth to their successors. From *Isa-nagi* and *Isa-nami*, the two last of these divine beings, sprang the second or semi-celestial race, called *Dzi-sin-go-dai*, i. e. the five great earthly Spirits; inferior in dignity and excellence to the former, but greatly superior to men: the first of this second race was *Ten-syo-dai-sin*, i. e. the great Spirit, (pouring forth) heavenly rays. From him are the *Dairis* descended in an unbroken succession of first-born sons, not only through the many millions of years during which this second race ruled the Country, but ever since they were succeeded by the third or present dynasty. The first-born son of *Awa-se-dzu-no Mikotto*, the last of the second race, was the first *Dairi*, who is also styled *Mikaddo*, or Emperor; *O-dai*, the great generation; *Ten-ô*, (*Thyên-vang*.) heavenly Prince; *Ten-sin*, (*Thyên-tsě*.) son of heaven; and *Tê*, (*tí*.) Prince. He is considered as a living image, or rather as an incarnation of the *Kami*, or Deity, in whose presence no

JAPAN.

Religion.

Shin t'houg

JAPAN. *gégé* (i. e. low and impure person, and such all but the *kughés* are believed to be) should presume to appear. In *Kami-natsuki*, (i. e. the godless month,) all the other Deities are supposed to be on a visit to him, and are, therefore, not worshipped, as being absent from their Temples. The Saints, whose souls appear to the *Daïri* after their decease, or work a sufficient number of miracles, are canonized by him, and Temples are built for them by the Emperor, or by the contributions of the faithful: and, if they use their votaries well, work many miracles, and give much wealth and prosperity, their worship is soon spread over the whole Country. The Japanese demigods, it should be observed, are not at all behindhand with their fellow demons in Greece and Rome, on the score of marvellous feats and astonishing adventures: their shrines are visited by crowds of pilgrims, and their reliques venerated with the deepest devotion. The Temples of this Sect are served by ignorant laymen; but the *kanusies*, or divines, publicly discourse on the History of their Gods, and the doctrines of their Faith: that is, on the exoteric or fabulous part of their creed; for the esoteric or recondite sense of their fables is never revealed, except under an oath of secrecy. This is more particularly the case with regard to a text which, like the *Gáyatri* of the Hindús, is considered as especially sacred: it is found in the *Odaïki*, and signifies, according to the interpretation given to Kämpfer, (iii. l. vol. i. p. 208.) "In the beginning of the manifestation of all things, a chaos floated, as fishes swim for their pleasure in the water. Out of this chaos a thing like a thorn, movable and transformable, arose. This thing became a Spirit, and the Spirit is called *Kuni-toko dats no mi-kotto*."

The *Sinto-syus*, or believers in the *Sin-to* doctrines, are divided into two Sects; the *Yuïts*, or rigid followers of that doctrine, and the *Rio-bus*, or Eclectics, who endeavour to reconcile the religion of *Sin-to* with that of *Budd'ha*; affirming that *Ten-syo-dai-sin* was an incarnation of *Amida*, or the essential light, i. e. *Fo*, or *Budd'ha*. This Sect is by far the most numerous of the two, and is favoured, if not followed, by the *Daïri's* Court. Useful animals, the *Sinto-syu* deem it unlawful either to kill or eat; and the souls of the Good, they say, are received immediately after death into the *Taka mano farra*, or high and sub-celestial fields, just beneath the three-and-thirty heavens inhabited by the Gods; while the souls of the bad wander for a season in the outer regions till their sins are expiated. Some, indeed, believe that such souls animate the bodies of foxes, animals which they fear and abhor. 1. Inward purity of heart; 2. abstinence from every impure thing; 3. a diligent observance of holidays; and 4. pilgrimages to the sanctuaries at *Isyé*, are the duties required by the *Sinto* creed; to which the more devout add, 5. corporal penances. Their reason and the Law of the land are the standards by which they are guided with regard to the first of these duties; the second requires abstinence from blood, from eating flesh, and touching dead bodies. Seven days for purification are appointed to all who are thus polluted. Menstruous women are in like manner impure. The having eaten the flesh of any quadruped, except a deer, renders a man *fu-syo*, or impure, for 30 days; the meat of fowls occasions an impurity of only one Japanese hour = 120 minutes: but the death of a man's nearest relations, is that which most contaminates him, and renders the longest period of purification necessary. Three monkeys sitting before

JAPAN. *Jé-zó*, and placing their feet, one on his eyes, another on his ears, and a third on his mouth, are emblematic of the highest degree of purity, by which a man closes his eyes lest they should behold, his ears lest they should hear, and his mouth lest it should utter any thing impure. This symbolical figure, which is also common among the *Budd'hists*, is manifestly borrowed from them. *Mia* is the ordinary term used to express a Temple of the *Sin-syu*, or maintainers of the *Sin-to* creed; but *ya-syiro*, *sia*, and *sin-sya*, are other words having the same sense. These sacred edifices are placed in the most agreeable sites in or near great cities, in Japan as well as in China. A wide avenue of cypresses (*Cupressus Japonica*) leads to the sacred enclosure, often, like the *temenos* of the Greeks, surrounded by a grove, and frequently placed on a declivity and accessible only by a long flight of steps. At the entrance of the avenue there is usually a wooden portal (*toré*) of a very simple construction, between the cross-beams of which a stone tablet is placed, on which the name of the God worshipped there is inscribed in letters of gold. (See Kämpfer, *Tab. xvii. A.*) There are, occasionally, more than one *Mia* within the same enclosure, and there is always a basin, generally of stone, filled with water for the ablutions of the worshippers, and a large wooden chest to receive their alms. The *Mia* itself is a wooden building, rarely more than 16 or 18 feet high by 18 or 20 wide, raised about three feet from the ground and surrounded by a platform, over which the roof projects and forms a covered gallery round the Temple. A few latticed windows in front enable the votaries of the God to look in and address their prayers to the shrine which contains his idol: for the Temples are seldom opened: but some are provided with a vestibule and adjoining apartments, where the officers who have the care of the building sit clad in splendid robes. The roof is tiled and ornamented with those singularly carved and decorated angles so often represented on china dishes. A bell over the entrance, which is struck by the worshippers before they begin their orisons, is another appendage borrowed from the *Budd'hists*. Frequently the only furniture of the Temple is strips of white paper, emblematic of purity, hung round its walls, and a large mirror of polished metal in the centre of it, to remind the worshipper that the spots on his heart are as visible to the Deity, as the spots on his face to himself when he sees them reflected in the mirror. The idol is kept together with the reliques in a shrine (*fong-gu*, i. e. true Temple) placed opposite to the entrance; and this shrine is never opened but upon the festival of the *Kami*, (or Deity,) which is kept only once in a century. In the larger Temples there are *miko-sies* or portable shrines for the exhibition of reliques. (Kämpf. *Tab. xvii.*) The vestibule and anterooms are decorated with swords and other weapons, models of ships, images, and various curiosities. These ornaments are called *yemma*, and are for the most part votive offerings. The attendants on the *Mias* are laymen, not bound by vows of celibacy, and are supported by charitable endowments, salaries granted by the *Mikaddo*, or the contributions of the devout. They are styled *Negi*, *Kanusi*, and *Siannin*, and wear a large loose robe, usually white or yellow, over their other clothes, as an official distinction; a stiff, oblong, varnished cap, tied with silk strings under the chin, is their proper head-dress. The length of the tassels at the end of its strings determines the rank

JAPAN.

and dignity of the wearer; as he is only required to make the tip of them touch the ground when he bows to his superiors, and therefore the shorter his cap-strings are, the lower must his obeisance be. These secular priests have also the privilege of letting their hair grow, though they shave their beards, and their rank is also indicated by the mode in which their hair is dressed. Their Spiritual ruler is the *Mikaddo*, i. e. Sublime Porte, a term commonly used to express the Daïri himself as well as his Court. In temporal matters they are under the jurisdiction of the two *Dzi sin Bugios*, or Imperial spiritual judges, appointed by the *Kubo* or *Djogun*. Being considered as nobles, they are allowed to wear two swords. They are represented by Kämpfer as extremely haughty and intolerant, avoiding intercourse with the members of all other Sects, whom they consider as impure and despicable. This he attributes to a consciousness of the meagreness and absurdity of their own doctrine, which is a mass of incredible fables, and affords no information respecting the nature of the Gods, their government of the world, or the future state of the soul; subjects concerning which most other Mythological systems treat largely, especially that of the Budd'hists, and this, he says, accounts for the eagerness with which the latter was embraced by the Japanese. He seems to have forgotten that the Sin-to creed has its esoteric as well as its exoteric doctrine; that the former is scrupulously concealed from the uninitiated, and that, consequently, he being a foreigner, as well as an unbeliever in the sanctity of the Mikaddo, had little chance of penetrating into its mysteries.

It has been already hinted that the Japanese owe their civilization and Literature entirely to their South-Western neighbours. In arithmetic they have no terms for any figures beyond the digits except what they have borrowed from China; and retentive of their pristine habits, they still reckon only from one to ten, (Thunberg, ii. 1. 14. *Eng. Trans.* iii. 20.) beginning again with one. Now the Japanese era, and the only credible part of their History, begins at 660 B. C., only about one century before the Age of Budd'hasatwa, their Bo-sats: it may also be observed that from that period to A. D. 1142, an interval of 1800 years, they reckon only 76 Daïries, allowing more than 23 years for the length of each reign, which is a very improbable average. During the last two hundred years, a period of internal and external tranquillity, when the Daïries were even liberated from the cares of the secular Government, the average length of each reign does not amount to *five* years, scarcely one-fifth of the time assigned in the period mentioned above: and can it be believed that, in the infancy of civilization, the Sovereigns of Japan sat longer on the Throne, or that the chronology of their reigns was more carefully recorded, than at the latest epoch? These considerations render it probable that as little reliance is to be placed on the early History of Japan as on that of China, and it seems not unreasonable to conjecture that the Japanese received the first tincture of Arts and knowledge from the latter Country about the beginning of our era. The religion of Budd'ha was then professed, it may be conjectured, in a less artificial form than it afterwards assumed; and from it the Sin-to creed seems to have been derived. The term Sin-to itself is Chinese, pronounced according to the Japanese, which is probably the most ancient system of pronun-

ciation; and for every object, except those which are the most ordinary and obvious, Chinese terms are in like manner used, sometimes exclusively by the Japanese: a sufficient evidence of the source from which all their knowledge was derived.

The holidays (*Rebi* or *sekf*) which the Sin-tos are bound to observe, are, like their calendar, drawn from an observation of the course of the Moon, and perhaps originally connected with Astrological notions. Their year is lunar, beginning with the new moon nearest to the 5th of February, or rather the first after the Sun enters Aquarius; it consists of 12 months, named First, Second, Third, &c. according to their order. A month is intercalated seven times in a cycle of 19 years, as is done by the Chinese, by which means the irregularity of the lunar year is corrected: but the Japanese also intercalate a day in some years, so that their months are not always 30 and 29 days alternately. (Kämpfer, ii. 2.; vol. i. p. 157. Thunberg, ii. 1. p. 193.) New-Year's day, the 1st, 15th, and 28th of every month, i. e. the days of the new and full moon, are regular festivals: the first being the most universally observed. Dressing in their best suits, paying visits, eating, drinking, and amusing themselves, after saying a few short prayers at the Temples, are all the observances required or practised by the members of the ancient Faith. Some indeed, according to Kämpfer, are so philosophical as to say no prayers at all: but what is most pleasant, is that on the 3d of the 3d month, the 5th of the 5th, 7th of the 7th, and 9th of the 9th, (i. e. uneven days of the uneven months,) which are believed to be unlucky, visiting and amusements are the only occupations followed, because no serious business performed on those days could be attended with success: yet those very days are selected for marriages, banquets, and entertainments, because the Gods are believed to take pleasure in the enjoyments of men. All their Festivals are more or less connected with their Religion, particularly the two principal, called *Bong* and *Matsuri*. The first, called the Feast of lanterns, is celebrated for three days in the latter end of August, and is apparently borrowed from the Chinese *Fáng shwí teng*. It lasts for three days, during which they suppose that the souls of the departed revisit the Earth. To welcome their return, bamboo poles are set up in the burial places, and at night covered with lanterns which burn till nine or ten o'clock, and illuminate the declivities on which the cemeteries are placed with one blaze of light. On the following evening boats made of straw, and carrying lighted lanterns, are borne at midnight in solemn procession to the sea, with music, singing, and shouting, and there committed to the winds and waves. *Matsuri* is a Festival celebrated on the day appointed for the commemoration of some Hero or Demigod. At Nangasaki, the 9th day of the 9th month, sacred to Suwa, the Patron of the City, is fixed for the celebration of Matsuri. On the 7th the Feast begins: Temples are visited, prayers offered up, and plays acted; but the principal splendour and expense is reserved for the 9th day of the month. The company is seated under a very spacious shed, the Priests, dressed in black and white, bring out an image of Suwa, accompanied by a band of execrable music, "a din," says Thunberg, (ii. 2. 30.) which might be pleasing to divine, but is far from being so to human ears." A large parasol decorated with the symbols and names of the streets, at the expense of

JAPAN.

Festivals.

JAPAN. the inhabitants of which the exhibition is made, with another band in masks, and the device of each, then follow, and, lastly, come the inhabitants themselves. Each street vies with its neighbours in producing samples of the peculiar productions of the district whence it receives its name, and by natives of which it is inhabited; and each of these processions lasts for nearly an hour.

Gods

The Gods worshipped by the Sin-tos are principally, if not exclusively, departed Spirits deified. On the 16th of the 9th month, matusries, or solemn processions, like that just described, are made throughout the Country in honour of Ten-syo-daï-sin, the first of their second Dynasty, or Demigods, and the most exalted Divinity whom they adore. The 9th of every month is sacred to Suwa, (the God of the chase, a sport which Thunberg says (ii. 2. 7. 3.) is unknown in Japan.*) All the votaries of the God are obliged to creep through a hoop of bamboo wound round with linen when they go to perform their devotions at his Temple, in memory of some accident which befell him while on Earth. The Festival of *Inari daï myo-sin*, i. e. the great God of the foxes, is kept on the 8th of the 11th month. Idzumo no o Yashiro, or O Yashiro of Idzumo, is a divine hero, who, among other exploits, killed a tremendous dragon; he is therefore much venerated, but Kämpfer has forgotten to tell us when his Feast is kept. The Goddess Bensaiten, called Bun-sho while mortal, who was brought to bed of 500 eggs, which were hatched without her knowledge, "in an oven in hot sand, and between cushions, as the way is in the Ind.es," (Kämpfer, iii. 3. vol. i. p. 220.) is commemorated with some very amusing ceremonies, on the 7th day of the 8th month. Yebisu, Ten-syo's brother, who could live three days under water, is the Neptune of the Japanese; he is represented sitting on a rock, with a tai (goldling, or *Sparus salpa*) in one hand, and a fishing-rod in the other. (Kämpfer, *Tabl.* viii.) Daï kokf, their Plutus, sits upon a sack of rice heaving his mallet, which brings out whatever he wishes for. Tos-sitokf, distinguished by his monstrous ears, long beard, large fan, and pendent sleeves, is adored more especially at the opening of the year, in order to obtain success, which is at his disposal. Health, riches, offspring, and most other temporal blessings, are obtained from Fottaï, the big-bellied God, whose enormity of abdomen is often conspicuous in figures on china. These four serviceable Divinities are worshipped with great fervour by the mercantile classes. Almost every town and village, however, has its tutelary Deity; but for an account of them, the reader must be referred, as Kämpfer says, to the original authorities, viz. the *Nipôn Odaïki* and the *Sin daï ki*, in which the lives, adventures, and canonization of all the Japanese heroes are recorded.

Pilgrimages.

Pilgrimages form another article in the Sin-to creed; and in that, as in other points, it is in perfect accordance with the doctrine of the other Sects tolerated in Japan. *Sanga*, or the Ascent, is the term corresponding with pilgrimage; and Isyé, or Ishé, is the Province which contains the most celebrated Temple of Ten-syo-daï-sin. (*Thyen-tshé-ta-shin*, i. e. the Great Spirit, Son of Heaven,) called Daï-sin-go, (*Ta shin kwé*, the

Country of the Great Spirit.) It is preserved in its original simplicity, to remind the people of the poverty and humility of their forefathers. Around it are innumerable chapels of inferior Deities, of very small dimensions, lest they should seem to aim at rivalling their superiors; and adjoining to these are the houses of the *Negé*, or Officers of the Temple, and *Taiyu*, or servants of the Gods, who take the pilgrims in, to board and lodge. The neighbouring town is inhabited by tradesmen, such as inn-keepers, carpenters, paper-makers, printers, bookbinders, &c. who are all, more or less, employed for the service of the Temple and its votaries. Once, at least, in his lifetime, every man is bound to make this pilgrimage, by which remission of sins and present and future happiness are obtained. All but the most exalted persons go to Ishé, generally in the latter months of Spring, and the Emperor sends a solemn embassy thither in the first month, at the same time that his envoy carries his annual presents to the Daïri at Miyáko. Most of the pilgrims go on foot, and are distinguished by a large straw hat, white jacket, and a pail on which their name is written. They live by the alms they collect, and from Yedo can go without passports; their numbers, therefore, from that city are incredibly great. Their greatest dread, when employed in this holy work, is lest they should mar it by contracting any impurity; and their rigour in this respect is no way inferior to that of our Western ascetics, to whom they probably owe some of their rules and maxims. On reaching Ishé, the pilgrim repairs to the Kanusi, to whom he has been recommended, bows down to the ground before him, and asks for his direction in his devotions; he is then led round to the different chapels, instructed in the History of the Gods to whom they are dedicated, and finally conducted to the shrine of Ten-syo-daï-sin, before which he prostrates himself flat on the ground, and in that humble posture prays for happiness, riches, health, long life; every thing, in short, which a Japanese deems desirable. He is afterwards entertained by the Kanusi, for which he makes a handsome compensation, and receives, in return, the great object of his pilgrimage, an *ofarraï*, or plenary indulgence. This *ofarraï* is a small oblong wooden box, about a span and a half long, two inches broad, and an inch and a half in depth; it is filled with small thin sticks, some of which are wrapt up in strips of white paper, to remind the pilgrim of purity and humility, the two qualities most pleasing to the Gods. Though retaining its dispensing virtue only for one year, the *ofarraï* is venerated in the highest degree, and carefully preserved from generation to generation. These indulgences are happily not restricted to those whose leisure, health, and activity enable them to visit Ishé. They can be dispensed in any part of the Country; on the Sangwats, or New-year's day, vast numbers of them are sold, together with the new almanacks, for one mas, (sixpence,) though the wealthy pay more liberally of their own accord, and are sure to have a receipt and fresh supply on the following year. A delineation of this celebrated Temple, copied from a Japanese drawing, is given by Kämpfer. (*Tab.* xviii.)

JAPAN.

Ofarraï, or indulgence.

* *Die jagt kennen die Japaner gar nicht*, are the words which terminate the fourth section of vol. ii. part ii. This passage would be found in vol. iv. p. 96, of the English Translation, had not one or other of the translators altered the arrangement of the Work, so that a similar discordance often occurs.

Voluntary penance, as before observed, is another of Penances, the articles in the Sin-to creed; a point of doctrine improved and confirmed, no doubt, by intercourse with the followers of Budd'ha and the Monks and Priests of the Roman Catholic Church. This principle

JAPAN. has given rise to Religious vows and Monastic Orders
 "One of our best interpreters," says Thunberg, (ii. 2. 27. *Engl. Transl.* iv. 29.) "a man in years, had, long before, made a vow never to wear shoes; and in that condition he this year performed the whole journey with the Dutch embassy to Yedo, though in winter, with naked feet, and bore his sufferings from the cold with great patience, and without appearing to experience any injurious consequences." These penitential vows are therefore still made, and the Religious Orders were noticed by Thunberg as well as Kämpfer; the most remarkable ones are the *Yammabos*, or Mountain-militia, and the *Féki-sado* and *Bussets-sado*, or Blind Monks. The former are said to have been founded in the VIIth century, by Gyenno Gyosa, who devoted himself to a wandering life of severe austerity and mortification, shunning the haunts of men, and seeking the most desolate and inaccessible places in his native mountains. Self-denial, in its utmost rigour, seems to have been the fundamental principle of his rule. His followers were a spiritual militia, ready to fight for their Religion when required, and inuring themselves to privations by every kind of hardship. To clamber up the highest mountains, perform their ablutions in the coldest streams, and live upon the scanty pittance they could collect in their wanderings, were only a part of the mortifications by which they engaged to separate themselves from temporal, for the purpose of securing eternal enjoyments. To ascend the lofty and precipitous Mount Fuzi (Fuzi-no Yama, or Fú-sě-shán, a celebrated volcano,* in the Province of Suruga, or Surunga, not very far from Yedo) once every year in the 6th month, is one of the labours which they are strictly required to perform. "The summit of Mount Fuzi," says Thunberg, (ii. 2. 89.) "is seen many days off. It is the highest mountain in the whole Country, and covered with snow almost the whole year round. Its height is estimated by the Japanese at six miles, (= 12 English miles.) It is shaped like a rhinoceros-horn, or a sugar-loaf, and believed by the natives to be the abode of the God of the Winds. Two days† are required to ascend it, but the descent is sometimes performed in a few hours, by means of a sort of small sledge made for that purpose of straw, and attached to the body." As fanaticism is ever endeavouring to outdo itself, the disciples of this wild ascetic soon split into two Sects; the one called *To-san-fa*, and the other *Fon-san-fa*. The former bind themselves to scale the precipices of Fi-kó-sán, on the confines of Bu-zen and Tsiku-zen, in the island of Kyu-syu, (Kyeú-cheú,) once every year; in attempting which they are sure, if fu-syo, or unclean in the slightest degree, to be possessed with the fox's spirit, *i. e.* the devil; or, in plain English, to run stark mad. The latter engage to make an annual pilgrimage to the tomb of their founder on the top of Ominé, an extremely high mountain, in the Province of Yotsyino, (Yotsingo, or Yetsgo?) no less hazardous on account of its precipices and the extreme cold on its summit. Here an impurity, however trifling, would cause the offender to be hurled down some frightful

Yamabo.

Tosanfa.

Fonsanfa.

JAPAN. declivity, or consumed by a lingering sickness. Like the Mohammedan *Hájies*, the title of pilgrim, which on their return they receive from the General of their Order residing at Miyáko, makes them not a little proud of their perseverance, and gives them no small addition of sanctity in the eyes of their countrymen. A sword of a peculiar shape, a staff armed with copper rings to be rattled while they are at prayers, a large conch which holds about a pint of water, a twisted scarf round the neck, the fringe of which is lengthened according to its wearer's rank and sanctity, a peculiarly shaped cap, and a scrip for money, books, &c. with straw, sandals made of sacred flower-stems, and a rosary of rough beads, are their outward distinctions. The novices of this Religious Order shave their heads in imitation of the *Ra-háns*, or Budd'hist cœnobites. A severe noviciate is required. Nothing but rice and herbs for six days successively; a cold bath seven times, and an obeisance 780 times a day, while sitting in the Japanese fashion "with his buttocks on his heels," were the penances imposed on a young friend of Kämpfer, (iii. 5. vol. i. p. 237.) who had wisely exchanged the ranks of the "mountain militia" for the post of student in medicine and surgery. It is, however, to some purpose that this severe noviciate is sustained; for beside the admiration of their countrymen, the *Yammabos* may look to more substantial rewards. They no longer observe the rigid fasts, and lead the life of continual mortification prescribed by their founder; but practise Magic Arts, and possess potent spells, by which they can command all the Gods worshipped in the Country, whether foreign or indigenous. They are expert exorcists, drive out Evil Spirits, recover stolen goods, interpret dreams, tell fortunes, cure diseases, and find out thieves and malefactors. For their mode of operating in those wonderful arts, the curious reader must be referred to Kämpfer, (p. 235—237.) whose information was, as before remarked, derived from an adept. The exercise of these invaluable gifts, procures, as is fitting, a pecuniary reward from the faithful; and there can be no doubt that few trades in Japan are more profitable than that of a *Yamabo* who thoroughly understands his calling.

The history of the blind communities is more singular. Senmimar, third son of Yengino, (a Mikaddo whose name does not appear in Kämpfer's list,) a most lovely Prince, was married to a Princess as lovely as himself; but his wife died, and through grief he lost his sight. He therefore resolved, in order to perpetuate the memory of his misfortunes, to establish a society into which none but the blind should be admissible. His project was universally admired and approved; the *Busets*, as his followers were called, soon formed a numerous society, and obtained the highest honours. They flourished for some centuries with undiminished lustre. But prosperity always excites envy; the *Fékies* set up a rival Company, and in a short time eclipsed the older establishment so completely, that none but divines would enlist under the banners of the *Busets*. The *Fékies* derive their origin from a tale as romantic, though widely different from the former. Kakekigo, Commander of the *Féki* party, whose dissensions with the *Gendzies* so long desolated the whole of Ni-fón, had fallen into the hands of his rival Yori-tomo, whose liberal treatment gave him frequent opportunities of escaping, and whose kindness laid him under the deepest obligations; but, when pressed to enter into the

† "Three days," in the English Translation, (iii. 158.) but as it gives the mountain the shape "of a one-horned rhinoceros," its accuracy is, probably, not entirely to be depended upon.

JAPAN. service of his generous victor, he persevered in refusing to violate his engagements to his former master; however, "as a proof of my gratitude for your noble conduct towards me, I will offer to you," said he to Yoritomo, "all that my unhappy condition will allow me to give;" and plucking out his eyes, he presented them on a dish to his astonished captor, saying, "Take these designing instruments of mischief; which, such is my misfortune, I can never use without forming schemes of vengeance to redeem my former master's honour." Yoritomo, admiring his resolution, immediately restored him to his liberty, and retiring to Fiyuga, on the Eastern side of Kyu-syu, he learnt to play on the *biwa*, (*p'hi-p'ha*), or guitar, and founded the society of the Fekisado, or blind Fekies, being their first leader. This is rather a secular than a spiritual Order, dressed like other persons, with some distinctions, however, indicative of rank, maintained by their own labour, and practising chiefly as musicians. Their General, who resides at Miyako, and has an annual stipend of 4300 tãhils (more than £1000) from the Daïri, governs his Order by the aid of ten *Syu-ro*, or Elders, who appoint Provincials, established, together with their assessors, in the different parts of the Empire. These officers have many others of different subordinate ranks beneath them, who, if they do not at the expiration of five years purchase a new *kwan*, or title, are degraded to a lower rank; so completely have trick and interest pervaded every establishment in this benighted Country. The *Osyokf*, or General of the Order, has power of life and death over the members of his community: his sentence, however, must be first approved by the Grand Judge, or Lord Chief Justice, who resides at the Daïri's Court.

Budso, or
Fo-t'hung.

Budz-do, or the Way of Budd'h, is the name given in Japan to any foreign Religion, but peculiarly and properly to that of *Bud-d'ha*, who, as Kämpfer rightly conjectured, (i. 241.) was the person represented by the Brahmans as the ninth incarnation of Vistnu. (Vishnu.) That he should be called both *Budz* and *Shaka* in Japan, *She-kyu-meu-ni-fô* in China, *Pra Pudi dzau* by the Siamese, *Sammani Kodum* in Pali, their sacred language, and more correctly *Sammana Kutama* by the people of Pégú, is no longer surprising or doubtful, as the origin and meaning of all these titles has been disclosed by the Sanskrit, of which, Europeans, in the days of Kämpfer, had scarcely any notion. Of *Sakya muni*, or *Sarmana Guatama*, which are titles given to BUDD'HA, the reader will find an account in a former Volume. (vol. xix. p. 54.) In this place, therefore, it will suffice to add a short notice of the doctrines held by his followers in Japan. Budd'ha is believed to have been a native of Ten-sikf, (T'hyenchô,) i. e. Hindúst'hán, according to the Chinese, but all the South-Western Countries, comprehending Siam, Ceylon, and the Coast of Coromandel, according to the Japanese; his birth is dated by them on the 8th day of the 4th month of the 24th year of Sô-wo, (Chao-vang,) B. C. 1029; but the Siamese carry the era of his birth no further back than B. C. 542. At 19 years of age he became the disciple of Arara sen-nin, a celebrated hermit, who dwelt on the top of Mount Dan-dokf. He then assumed that sitting posture, most suitable for his uninterrupted contemplation, in which he is always represented. He freely communicated his divine knowledge to his numerous disciples, and departed this life at the age of 79 years, on the 15th day of the 2d month of

the 52d year of Mu-vang,* B. C. 950. He taught the immortality of the soul, retribution in a future state, an Elysium, called *Gokurakf*, where Amida, the protector of human souls, presides. The *go-kaï*, or five precepts of Budd'ha, are these: to abstain from 1. murder; 2. theft; 3. incontinence; 4. falsehood; and 5. the use of intoxicating liquors. These are the fundamental principles of his moral law. His *syu-kaï*, or ten precepts, are merely a fuller developement of them; and the *go-fyak kaï*, or 500 precepts, are a still more extensive collection of similar prohibitions. Their number, as may be supposed, prevents them from being generally studied. *Dzi-gokf*, the place of future punishment, is governed by Yemma, (Yama,) the judge of the infernal regions. All the vices of men are reflected in their natural deformity in his *sofari-no kagami*, or mirror of knowledge; and none can escape his righteous sentence: but the souls of the condemned may be released from their misery by the prayers and penances of their friends on Earth, especially by those of the Priests, whose devotions to Amida (i. e. Budd'ha) will secure his all-powerful intercession. The condemned, however, are not entirely absolved by these means; their penalty is commuted for transmigration into the bodies of the vilest animals, and it is only after a long series of such migrations that they again animate a human frame, and have an opportunity of expiating their former transgressions by leading a virtuous life. Amida, before his death, intrusted his mysterious secrets to his disciple Mahá-kaya the illustrious, (*tsun-chě*, in Japanese *son-zya*), a title given to all his successors. The time of his death is not mentioned, but he was living in 905 B. C. and succeeded by Anan, or Ananta, (Ananda,) of the Sha-ti-li (Kshatriya) Tribe, who flourished in 875. His successor was Shang-na-ho-syeu of the Vaïsyia Tribe, who died in 805 B. C. U-va-kik-ta, (Yeû-p'ho-kyû-to,) a Sûdra of the Kingdom of Cha-li, succeeded him, and died in 760 B. C.† Ti-to-kyu, (Daïtaka,) who voluntarily ascended the funeral pile, flourished in 680 B. C. This series is continued to the 28th Pontiff, Poti-t'ha-mo, (Bód'hi-d'har-ma,) who went by sea from India to China, settled on Mount Sûng, near Ho-nan, and died on the 5th of the 10th month of the 19th year Taï-ho, A. D. 495.

A-nan and Ka-sya (whose name does not appear in the list given by the *Japanese Encyclopædia*) collected the oracular sentences of their master, written by him on leaves, and they named the book thus formed *Fo-ké-kyo*, i. e. the Book of fine flowers, or *Kyo*, the Book, as being superior to all others. But the doctrines of Rô-si (Lao-tsě, *Encyclopædia Metropolitana*, vol. xix. p. 566) and Kô-si (Kóng-fu-tsě, *Ibid.* p. 567) had made their way into Japan some centuries before the disciples of Budd'ha; for their first teachers came over, according to the Japanese Historians, A. D. 63, and built the Temple of Fa-kuba-si, in memory of the white horse, which bore upon its back the sacred Kings, i. e. the four Books of Confucius. That Philosopher, according to the same authorities, was born in the district of Ru, (Ru-kokf = Lú-kwě,) on the 4th of the 11th month, B. C. 651, 399 years after the death of Shaka, and 53 after the birth of Rô-si. The miracles at

Christianity.

his birth, the majesty of his person, the superiority of his genius, and the excellence of his writings are described and admired by the Japanese in terms borrowed from their Chinese masters. Temples are erected in honour of him; and the Emperor, whose Court Kämpfer visited in 1692, celebrated the consecration of two in Yedo, by pronouncing an eulogium on the excellence of his doctrines. He died in the 73d year of his age, (B. C. 479, according to the Chinese,) and his disciples collected his ethical maxims in a book called *Syu-do*, or the Path of Virtue. The *Syu-do-sya*, or Followers of the Path of Virtue, hold the opinions taught by Kô-si, a system nearly approaching to that of Epicurus. They conform to the established rites only in venerating or adoring the manes of their ancestors; bury instead of burning their dead, and hold suicide to be highly deserving of admiration. Moderation, equity, politeness, obedience, and a clear conscience, are the five points which they consider as embracing the whole of morality. Their contempt for idolatry, and perhaps their moral doctrines, made the Government suspect them of a secret leaning towards Christianity; they were consequently observed with a jealous eye, when a resolution to eradicate that Faith had been formed; some outward compliance with the prevailing idolatry was required; their doctrines were discouraged, and the Sect had been long losing ground, when Kämpfer was in Japan.

Christianity. Christianity, also, had at one period made a considerable progress in that Country. A native named Anger, brought to Goa, in 1547, solely, as the Jesuit Maffei assures us, (lib. xiv.) by the fame of St. Francis Xavier, was baptized there by the name of Paulo de Santa Fé, and in 1549 accompanied the "Apostle of the Indies" to Kangoshima, a town on the South-West side of the Island of Shikoku, (Saïkokf, or Kyu-syu,) the place of his birth. Notwithstanding the miraculous powers of St. Francis, which, as is well known,* far exceeded those of St. Paul and the other Apostles, he unluckily had not the gift of tongues, and therefore was much retarded in the progress of conversion, by the difficulty of the Japanese. At first he was much favoured by the King and the Bonzes; the latter, indeed, observed, that there was a surprising resemblance between their rites and those taught by the Portuguese; but when the former found that the Portuguese ships went to Firando, instead of coming to his territory, and the latter were told that all their forefathers had been condemned to eternal punishment, their own ungodly lives being cast in their teeth, their good-will was changed into a bitter animosity; the Japanese were prohibited from turning Christians, and all hopes of bringing Cango-shima within the pale of the Church were at an end. Xavier therefore retired to Firando, where he baptized a hundred persons; thence he went to Miyáko, the Capital, where he had no success; but returning to the Kingdom of Nangáto, (or Nagatto,) he conciliated the King or Governor of that territory by the present of a handsome clock, and some other rarities, refused the gold offered to him, and said all that he desired was permission to preach the Christian Faith. His request was immediately granted, and the King himself became more than half a convert. The Jesuit Cardin places Xavier at the head of the Japanese Martyrs affirming that he was scourged and stoned to death,

but miraculously restored again to life; however, Valentytyn observes, (v. 151.) that he had not met with anything of the kind in the Portuguese writers. After remaining a year and a quarter in Japan, St. Francis quitted it in 1550, leaving his companions Torreo and Fernandez behind him. Their success for a considerable time was exceedingly great; three of the Governors, or tributary Princes, sent an embassy to Rome; and it is said, that there was not a single heathen remaining in the district of Omura. All the places hitherto noticed, it may be observed, were in the Island of Kyu-syu. Nobunanga and the celebrated Taïko-sama, or Fidé-yósi, were too much preoccupied with intestine wars to pay much attention to the new Faith; but Daï-fu-sama, or Ngo-sgo (Ongoschio) Sama, who reigned either in his own or his nephew's name for upwards of 28 years, having discovered by a letter from one of the Jesuits, translated to him by a native of Brussels, says Valentytyn, (v. 153.) "and very unjustly laid to our charge,"* that the Portuguese Priests had an eye to the territories and treasures of Japan, as well as its conversion to the Christian Faith, resolved to extirpate them root and branch. The accounts of the multitudes who suffered martyrdom, of the horrible, excruciating, and protracted tortures to which they were subjected, of the exultation and unshaken firmness with which they suffered, are such as it is difficult to believe; and, however the reader may be disposed, for the honour of Christianity, to give credence to the narratives of these cruel executions, yet there are some circumstances which will make him hesitate in receiving them without considerable abatements. The improbability that so imperfect a knowledge of the Christian Faith as that confessedly given by the Popish Missionaries, should produce such an immutable belief; the incredible amount of the numbers said to have been executed, and the extravagance of the tortures by which their sufferings were varied and prolonged; but, above all, the disregard for truth so notoriously cherished by the Jesuits when any pious end was to be attained, all conspire to diminish the confidence which, as Historical statements, these narratives demand, and encourage a belief that a spirit of pious fraud has greatly exaggerated the sufferings as well as the numbers and perseverance of the martyrs. But that great numbers suffered martyrdom, it would be most unjust to doubt; that many of the Missionaries were very sincere in their Faith, and ready to maintain it in the utmost extremities, is equally indisputable. This persecution raged with almost unabated fury more than half a century, from 1586 to 1638, when scarcely a single Christian was left. In 1639 a proclamation was issued forbidding all intercourse with the Portuguese; and when they sent an embassy from Macáo in the following year, Ongosyo, or To-shogún-sama, the reigning Kubo, ordered the ambassadors and all their suite, 61 in number, to be beheaded, reserving 12 of the lowest among their attendants, who were sent back to bear the tidings of their reception to their countrymen at Macáo; an insulting act of cruelty and injustice, of which the Portuguese Court appears to have taken no cognizance. The Dutch cannot be entirely liberated from all blame, as their anxiety to supplant their rivals and possess themselves of the lucrative trade with Japan, led them

JAPAN.

* See Father Dryden's *Life of St. Francis Xavier*, *passim*.

* Kämpfer, however, (iv. 5. vol. i. p. 317.) who seems to be well informed, and considers the Dutch justified by the hostility of the Portuguese, ascribes the disclosure to them upon apparently good grounds.

JAPAN. secretly to stimulate the hostility of the Court to the Portuguese, and openly to assist in the siege of Simabara, the last refuge of the proscribed Christians, of whose sufferings they then became very unexceptionable witnesses. Their having consented to give up their Bibles and Psalm-books, and to abstain from all external observance of their Religion while resident in Japan, are also little to their credit; but there is no reason for believing that they ever even nominally apostatized from Christianity, or were required to join in the annual ceremony of trampling under foot the figures of Christ and the Virgin Mary. That usage is always observed at Nagasaki a few days after the beginning of the new year. A copper-plate about 2 feet long and 1 $\frac{3}{4}$ broad, on which the Virgin with the infant Jesus in her arms is represented, is carried for three days through the town, that every one, even infants in arms, may trample on it. The first time this plate was seen by the Dutch was in 1704, when some sailors, who had deserted from Batavia and the Manilla Islands, unfortunately got set ashore in Japan, and were examined by the Japanese Magistrates in presence of the Chief and Factors resident in Dezimà. (Valentyn, v. 157.) One of the Company's officers, also, who was stationed there in 1775, accidentally witnessed the ceremony, when sent with some message from the Chief to the Governor of Nagasaki. As the Christian Religion is so much abhorred and dreaded, and as even Dutch Bibles are strictly prohibited, there is every reason to fear that the copies of the Scriptures in Chinese which were given to the interpreters sent on board Captain Gordon's vessel,* would be burned as soon as they could be thrown into the fire; and when the known jealousy of the Government on that point is considered, the prudence of thus endeavouring to circulate the book in a language generally understood, at the very outset of his intercourse with that Country, may well be doubted. Christianity, notwithstanding the unabated persecution it had sustained, was not entirely extinct at the close of the XVIIth century. "Among the persons condemned to perpetual imprisonment," says Kämpfer, (iv. l. vol. i. p. 262.) "are the Bungoso, as they call them, that is the rabble of Bun-go, by which name they denote the few remaining Christians, of whom there were upwards of 50 confined here, when I was in Japan, their women and children computed. In the year 1688, three were taken up. These poor people are very ignorant of the Christian Religion, knowing little more than the name of our Saviour and his blessed mother; and yet they are so zealously attached to it, that they choose rather to die miserably in gaol, than by renouncing their Faith, which they are often compelled to do, to procure their liberty." "The Christians," he adds, "are not executed at present, as they were formerly, without mercy, but they are condemned to end their miserable life in this temporal hell, out of which they are never suffered to stir but when they are carried to the Governor's Palace, which is done once every two months, to be examined there, and to be compelled to discover other Christians." Their only recreations were a removal from prison twice a year to be cauterized with moxa; a washing in the prison reservoir; and a walk under a shed six times a year. They were allowed to purchase some trifles with their small earnings, and some small relaxations in the vigilance with which they were watched had been

connived at. In 1708, an Italian Priest named Giovambattista Sidoti was discovered by the Japanese Government on the Island of Yakono-simà, belonging to the Province of Satsumà. In his examination, at which the Dutch resident in Dezimà were present, he declared himself to be a native of Palermo, and a Priest; notwithstanding which, he was only kept a close prisoner at Yedo. His zeal, however, led him to make proselytes; and his proceedings having been discovered, the persons whom he had baptized were all put to death, and he was immured in a pit four or five feet deep, with only a very small opening just large enough for the passage of his food, which was supplied for the short time that he continued to live.

The form of marriage used by the Japanese is worthy of a more refined and cultivated People. Some elevated and level spot is chosen in the neighbourhood of the town wherein the parties live, and an altar is erected on which a lighted lamp is placed. The bride, bridegroom, relations, and officiating priest meet before it; the latter pronounces a prayer aloud, the bride kindles a torch at the lamp, and the bridegroom, standing on her left hand, kindles his torch from hers; the spectators then wish them joy, and they become man and wife. Thunberg, who gives this account, does not say whether this form is universally adopted, or only by one of the three predominant Sects. He observes, however, that polygamy is very rare; a circumstance the more remarkable, as incontinence is not considered as a failing, and brothels are established by public authority, duly licensed, and constantly inspected, as every thing is in Japan. At present the corpses of the Great only are burned; and that, occasionally, in a family burning-house, built of stone, provided with a chimney, and just large enough for the purpose. The ashes are deposited in a costly urn, which is preserved for a time in the house of the defunct, but afterwards buried. The whole family attends the funeral; eulogiums on the deceased, or hymns, are sung by the priests; one of whom having waved a burning torch three times over the corpse, casts it from him; and it is picked up by one of the children or relations in attendance, who kindles the pile from it. When buried, the corpse is placed in the coffin in a sitting posture; fragrant spices are scattered over the grave; beautiful flowers planted upon it; and the surviving members of the family visit it daily, weekly, and yearly for a long period, often throughout their lives.

The National history of the Japanese is said to have been preserved in an unbroken series of records from the middle of the VIIth century before our era. That they have Chronicles relating the events which took place in the reigns of their different Daïries during that period cannot be doubted; but too little is yet known of the style and contents of those Works to justify any opinion as to their antiquity or authenticity. The length of the first reigns affords, at first sight, a presumption against them; the known vanity and nationality of the People strengthens that presumption; and the example of their masters, the Chinese, whose early History is plainly a fabrication, adds additional weight to the supposition that little reliance can be placed on the earlier part of their Annals.

In Chronology they know nothing but what they have learned from their South-Western neighbours. They use the same cycles, have the same division of the year, and the same rules of calculation. Their usual eras in History are two. 1. That of the *Nin-ô*, (Great Lord,)

* *Asiatic Journal*, viii. 336.

JAPAN. beginning from the reign of Sin-mu, B. C. 660. 2. The *Nen-go*, (*nyên-hao*, i. e. year-name,) assumed by the Emperor at the beginning of his reign, or in commemoration of some memorable event, to which it figuratively alludes. This epoch was first used in the reign of the 36th Daïri, A. D. 642—645, and is adopted in all public documents, journals, letters, &c. In History, that of the Nin-ô (Jin-vang) is also added. The new *Nen-go* is never brought into use till the beginning of the year after it is declared; and, what is singular, is not always immediately adopted by the People. The Japanese reckon by the years of the Chinese sexagesimal cycle, but do not number the periods, because by doing so they would betray the comparative newness of their History. Like the Chinese, they divide their years into periods of 15 days each, answering to our weeks, the first and last of which are holidays. (Morrison's *View of China*, p. 103.) Like them, also, they reckon the day and night from sunset to sunset, dividing the whole into 12 parts, six of which are assigned to the night and six to the day; so that the latter always begins at six o'clock: the length of their hours varies at different seasons, but the shortest of them is equal to two of ours. Time is measured by the burning of matches, divided by knots at equal intervals; as soon, therefore, as one of these portions is consumed, a bell in the neighbouring Temple is struck in the day-time, and two pieces of wood are knocked against each other in the night. Another and more extraordinary kind of time-keeper is formed by a bed of sand, in which there are small furrows filled with powdered bark of the Skimmi-tree. (*Illicium anisatum*.) This powder burns so gradually and uniformly, that it may be said to clear equal spaces in equal times; and as the fire gives light in the dark, this sort of chronometer is much used by the watchmen and patrols. "Though fond of Astronomy," says Thunberg, (ii. 2. 36.) and he might have added of Astrology also, "the Japanese cannot make an almanac without the aid of the Chinese and the Dutch." Of Anatomy they know nothing, and the little they have learnt of Medicine is confused and often entirely erroneous. Burning with moxa, (*mō-sha*), the down scraped from the old leaves of the *Artemisia vulgaris*,* (Thunberg, ii. 133.) a sort of actual cautery; the acupuncture, as a remedy for the colic; and decoctions of simples, as diuretics and sudorifics, form nearly the whole of their prescriptions. Lawyers, by profession, they have none; and this Thunberg seems to think a great advantage, forgetting that there can be no substantial justice where the punishment is not proportionate to the offence, where the conviction depends upon the will of the Judge, and where the sentence is without appeal. The Moral Philosophy of the Chinese, probably the best part of their Literature, is studied by the learned in Japan, but is evidently far beyond the reach of any but a very small part of the whole community. As no foreigners, except the Dutch, are allowed to land in Japan, and the Japanese are strictly prohibited from frequenting other Countries, they have few opportunities of learning any foreign languages, except the Chinese. Nor does it appear that any persons besides the established interpreters and some students in Medicine ever attempt it. Without Grammars or Dictionaries, their knowledge of the Dutch and other European tongues can only be acquired orally, and,

Medicine.

Law.

Philosophy.

though it may suffice for the transaction of their ordinary business, must be very inadequate for the understanding of Works on Scientific or Philosophical subjects. With a great thirst of knowledge, invincible industry, and an aptitude in learning, the Japanese have been hitherto kept back, not only by the jealousy of their own Government, but by their vicinity to the Chinese, whose defective system of writing they admire and generally adopt, though their own good sense long ago taught them the use of an alphabetic character. Treading, therefore, in the steps of their masters,* they selected the least complex of the Chinese characters commonly used to express sounds, simplified them still further, restricted them to the sound of a single consonant and vowel, and thus formed a collection of 47 syllables, comprehending all the sounds which are found in their language. (Abel-Rémusat, *Notices et Extraits*, xi. 140.) This syllabarium, or alphabet, is called *irofa*, from its three first elements, and is thus arranged:

i	ru	na	ke	mi
ro	o	ra	fu	si
fa	wa	mu	ko	ye
ni	ka	u	ye	fi
fo	yo	i	te	mo
fe	ta	no	a	se
to	re	wo	sa	su
tsi	so	ku	ki	
ri	tsu	ya	yu	
nu	ne	ma	me	

or, according to the order of our alphabet,

a	ye	i	o	u
fa	fe	fi	fo	fu
ka	ke	ki	ko	ku
ma	me	mi	mo	mu
na	ne	ni	no	nu
ra	re	ri	ro	ru
sa	se	si	so	su
ta	te	tsi	to	tsu
wa	—	—	wo	—
ya	ye	yi	yo	yu

These figures (Rémusat, l. c. Landresse, *Gram. Japonaise*, pl. i. ii.; Ouseley's *Orient. Collect.* iii. 88.) are very simple, easily formed, and easily remembered, and yet such is the fascination of the "flowery" character used in China, that with this invaluable treasure in their possession, the Japanese seem unaware of its excellence, and make almost as much use of their neighbours' perplexing hieroglyphics as of their own easy and intelligible signs; and what is most extraordinary, they mix their different kinds of writing together; just as we should, if writing one word in Roman, a second in Italic, a third in Hebrew, and a fourth in Greek letters. Besides the proper Chinese character, they have two of their own, the *kata kanna*, or abbreviated phonetic form mentioned above, and the *firo kana*, or corresponding figures taken from the running hand of the Chinese. In this latter such freedom and rapidity are allowed, that it is as confused and difficult to decipher as the former is easy to read; yet this is the character most in use, though, as before observed, they are often all used simultaneously. "To give some idea," says M. Abel-Rémusat, (*Not. et Ext.* xi. 147.) "of the strange and complicated system of writing adopted by the Japanese, I

* Or *A. Sinensis*.

* *Encyclopædia Metropolitana*, vol. xix. p. 582.

JAPAN.

take at a hazard the Chinese word *kyao*, (bridge,) which may be expressed either, 1. by its proper Chinese form, and pronounced in the Japanese way *kīō*; 2. by three Chinese characters, expressing phonetically the syllables *ki-o-o*; 3. by the firo-kanna, or running hand, of which there are eight or nine varieties; 4. by the kata-kanna, or square character; 5. by substituting, in reading or speaking, the Japanese word *basi* (bridge) for the Chinese *kīō*; 6. by expressing that word in Chinese characters used phonetically, of which there is an almost endless variety, 7. by writing the same in firo-kanna; or 8. in kata-kanna." Sometimes one syllable of a word is expressed in one way, and those which remain in another. It can hardly be supposed that this perplexing mode of writing is generally practised by the natives. Their letters and public documents, however, are written in firo-kanna, "which," M. Rémusat thinks, "can hardly be learned thoroughly except in Japan itself." The Chinese, however, and kata kanna characters, in which they usually print their books, are easily legible, as that writer and M. Klaproth have shown by their translations of such Works. The Chinese has been, from the commencement of their civilization, their learned language; all well-educated persons, therefore, speak as well as read and write it; but their pronunciation, which approaches, probably, to the ancient and genuine one which has been softened down and otherwise altered in China, renders them quite unintelligible to the Chinese, though speaking or reading the same language. The Japanese in feature and character approach, perhaps, more nearly to the Tatars than to the Chinese, though there may be said to be a family-likeness between all of them; their languages, however, as far as they have been yet examined, do not appear to indicate a common origin: but the pronunciation of the monosyllabic tongues, especially the Chinese, is so indistinct and fluctuating, that it is peculiarly difficult to trace their affinities and origin. The language of Japan is not at present monosyllabic, and it is said to bear no resemblance to any of its neighbours, except that of the Lyeu-kyeu islands. It is written, like the Chinese, in vertical columns, but has a greater variety of sounds.* *B* and *p*, *d*, *g*, and *z*; *ch* and *sh*, though not given in its alphabet, are expressed by a circle or two dashes placed over the cognate letters; but it has no *l*, as the Chinese has no *r*. A final *n* is the only character which is not syllabic. Its pronunciation appears to be indistinct, and varies much in different Provinces. It has few, if any, diphthongs, and none of the peculiar vowels or jingling terminations so common in the Chinese and other monosyllabic tongues; aspirates are also wanting in the written language; but *h* is substituted for *k* and *f* in the spoken dialects; thus, *hobasi*, a mast, in Thunberg's vocabulary, is spelt *fobasi*; *ho*, a sail, *fo*; *hebi*, a serpent, *febi*; a permutation difficult to account for, but of frequent occurrence in the Spanish, where *hijo* has been formed from *filio*, *hoja* from *folia*, *horno* from *furno*, *horca* from *forca*, *hilo* from *filo*; *al hondiga* from *al fonduc*, *al hocigo* and *al fonsigo* from *al fustuc*, *albufera* and *al buhera* from *al buheirah*. While

* The reader will have already observed this fact, from the Chinese pronunciation of names and words added in hooks, to the Japanese pronunciation of them, in preceding parts of this Paper; e. g. *dai sin* (*taï zhin*), *nen-go*, (*nyên-hao*), &c.

† We venture still to call the Chinese monosyllabic, notwithstanding the objections of M. Rémusat, (*Mélanges Asiat.* ii. 47.) which appear to us any thing but conclusive.

the Chinese cannot utter two consonants consecutively without an intervening vowel, the Japanese delight in such combinations, and, in speaking, continually drop the final vowels appended to each of their syllables; saying *mutsi* for *mutsi*, *skimmi* for *sikimmi*, *kenpknas* for *kenpokonas*, *shróri* for *syiróri*, *kashwa* for *kásyuwa*, &c. Their language is very copious, having a great variety of terms, according to Thunberg, (ii. 1. 217. *) to express the same thing, as well as giving a great diversity of senses to the same word; but he, perhaps, confounded the Japanese with the Chinese, to which the latter observation is peculiarly applicable. With regard to the syntax, or order of the words in a sentence, the Japanese almost invariably observes that principle of inversion which appears to prevail in all the Tatar dialects from Constantinople to the Sea of Okhotsk, and which has been repeatedly noticed as one of the most striking characteristics of the Chinese. The following examples, taken from Father Rodriguez, (*Gram. Japon.* p. 92.) will give some idea of this peculiarity: *Yenwo susureba, tenni rimaro*; *akuwo tsukureba, gigokuni wotsoni*, i. e. (if a man) practise virtue, he-ascends into-heaven; (if he) do evil, he-falls into-hell. *Woya-ni towozarari, ta-ni mata tsikadzuku koto nakare*; leave-not (your) parents and unite (yourself) entirely with strangers, (i. e. in order to associate with strangers.)

The Art of Printing could not fail to be known by such attentive imitators of the Chinese as are the natives of Japan; it has been long practised in their Country, and many copies of their books are to be found in the great Libraries of Europe, notwithstanding the prohibitions of their Government either to teach their language or allow any of their books to be taken out of the Country. Various works on History, Theology, Morals, Geography, Natural History, and Medicine, together with Dictionaries, Road-books, and Maps, are mentioned by Kämpfer and Thunberg, and a considerable collection of them, brought home by the former, is still preserved in the British Museum, as those procured by the latter are in Sweden. Of the great Japanese *Encyclopædia*, a complete Index has been given in the XIth volume of *Mémoires et Extraits des Manuscrits de la Bibliothèque du Roi*, (p. 123—310.)† by M. Abel-Rémusat; a work of Herculean labour and very great utility, as it furnishes an explanation of the numerous Plates with which this and other Japanese Works on Natural History are filled. There is, perhaps, not a single individual in Europe besides himself who could have achieved such a task, and there is, perhaps, no city in the world where it could have been executed so perfectly as at Paris. It must not, however, be supposed that a Japanese *Encyclopædia* is a complete repertory of Arts and Sciences: it is, in fact, a voluminous picture-book, containing wood-cuts of all the objects mentioned, with short explanations annexed: and is principally valuable for its figures of objects belonging to Natural History.

* This passage appears to have been omitted by the English translator of Thunberg's travels.

† This Paper, of which a second and still more interesting part is yet to come, contains the first specimens of Japanese types ever produced in Europe. It is to be lamented that M. Rémusat, from an ill-judged anxiety to place his letters vertically, has reversed them, and thus very unnecessarily increased his reader's trouble. They are just as susceptible of a horizontal position as the Chinese, and when mixed with the Roman letter, should surely be placed horizontally.

JAPAN.

JAPAN. Fine Arts.	In the Fine Arts, Music, Poetry, and Painting, the Japanese do not seem to have equalled, though they are not far behind their neighbours. Connected with the Arts of Design is that of Engraving, in which they have also made a considerable progress; and can engrave on copper-plate as well as on wood. Their maps and topographical surveys are nearly as good as those made by Europeans two hundred and fifty years ago, as may be seen by the Plates annexed to Kämpfer's <i>History</i>; in Thunberg's time they had received no improvement; (ii. 2. 46.) but that is probably no longer the case, as Dr. Ainslie (<i>Asiat. Jour.</i> i. 441.) saw at Nangasaki a large detachment of the members of a Commission who had been four years engaged in making an actual survey of the whole Empire, not one-fourth part of which was then finished. Theatrical representations are favourite amusements; but the skill of their actors is not greater than the merit of their Pieces; in other words, says Thunberg, they are neither of them good for any thing. In figure-dances they succeed better, and the same traveller seems to have been delighted by the forms, dress, and grace of their female dancers. Though there is little or nothing of Asiatic restraint laid on the fair sex in Japan, yet none but professional performers would ever think of dancing in public, if at all; they have, therefore, no Balls or meetings whereat the visitors dance for their own amusement. Reading and writing form the principal part of a Japanese education. By keeping up an unbending discipline, they accustom their children to implicit obedience from their earliest years, and thus avoid the necessity of using corporal punishments or other harsh expedients, which render the task of education as irksome to the teacher as to the child who is taught. This deeply-rooted habit of obedience may be considered as the origin of that spirit of subordination and promptness of execution which has so often given the Japanese a superiority in war over enemies apparently much more powerful. Their natural courage and firmness of resolution appear to be very great, and if their numbers are as considerable as some writers affirm, they would, in that respect, have a great advantage over an invading army; their Government also takes great care to exercise its troops; but a people who have nothing but matchlocks, bows and arrows, pikes, and swords, scarcely know the use of fire-arms, and have no cannon, (for the few old guns at Nangasaki are good for nothing,) besides having been never engaged in actual warfare for nearly two centuries, could make no resistance to any considerable and well-disciplined European force; and had the Emperor of Russia been guided by the same extravagant ideas of his own dignity as are maintained by the Sovereigns to the East of the Ganges, the Emperor of Japan would have long since sustained a severer reverse than his brother on the throne of Ava. In the manufacture of sword-blades, the Japanese, according to Thunberg, have never been excelled, and their sabres are the part of their accoutrements which they most value.	and frequently very annoying; for filth of all kinds is collected in pits by the way-side, and infects the air with smells which none but a Japanese can tolerate. The Art of mixing composts is well understood; and embankment and irrigation are nowhere more universally employed. The land is never left fallow, and if the farmer fail to employ it for one year, it is immediately let to another person. Our common grains are little cultivated, rice being preferred. Besides our common vegetables, the following are grown in large quantities: sweet potatoes, the <i>batatas</i>* of the Spaniards, (<i>Convolvulus edulis</i>), Oriental cabbage, (<i>Brassica Orientalis</i>), for its seed, from which lamp-oil is expressed; the <i>daïdzu</i>, (<i>Dolichos soya</i>), a kind of kidney-bean, much used for <i>miso</i>, a sort of pottage, and from its expressed juice soy (<i>soya</i>) is prepared. <i>Awa</i>, (<i>Panicum verticillatum</i>), <i>kokibi</i>, (<i>Panicum corvi</i>), <i>nan-ban-kiwi</i>, (<i>Cynosurus coracanus</i>), and many other kinds of grasses for fodder. Besides all the gourd and melon tribe, the Japanese have a variety of plants useful for culinary purposes; as the <i>Amomum mioga</i>, a kind of ginger; <i>Fagara piperita</i>, the warm aromatic leaves of which give a high flavour to soups and sauces. Mustard is seldom used in cookery, but a kind of lamp-oil is expressed from its seed, particularly from the drooping sort. (<i>Sinapi cernua</i>.) As there are no cattle loose, fences are not wanted, and all the land and labour lost in other Countries in planting hedges and repairing fences (ii. 2. 57.) are saved in Japan; there are no enclosures, therefore, except those round the gardens adjoining to each house, which are of small extent, and planted more for ornament than profit. They are filled with such trees, shrubs, and smaller plants as produce peculiarly fine flowers; such as the <i>Nandina domestica</i>, <i>Gardenia florida</i>, double-flowering <i>Corchorus Japonicus</i>, <i>Aucuba</i>, <i>Spiræas</i>, <i>Magnolias</i>, <i>Tagetes</i>, <i>Celosias</i>, <i>Asters</i>, <i>Pæonies</i>, <i>Chrysanthemums</i>, &c. Many plants useful in dyeing are cultivated by the Japanese; as that commonest of weeds, the <i>Polygonum aviculare</i>, with other species of the same genus, all producing a fine deep blue. The plantations of cotton and mulberry trees for silk-worms are exceedingly extensive. The milky juice of the varnish trees (<i>Rhus vernix</i> and <i>Succedaneum</i>) is the material which supplies them with their beautiful lacker or japan. The camphor laurel furnishes camphor, though inferior to that of the Sumatran camphor tree. (<i>Dryobalanops camphora</i>, <i>Asiat. Res.</i> iv. 1. xii. 537.) The Japanese cedar, or rather cypress, (<i>Cupressus Japonica</i>), furnishes excellent timber for ship-building and all domestic purposes. All of these, with the tea-tree and bamboo, are indigenous, and carefully cultivated on account of their great utility; the former especially, as it flourishes on steep declivities, and in poor soils unfit for any other produce. It attains a man's height in seven years, and gives a small crop of leaves in three. The smaller and tenderer the leaves, the finer is the flavour of the tea; the first crop, therefore, which is gathered late in February or early in March, and makes what is termed Imperial tea, is reserved for the Court; the second crop, gathered a month later, while the leaves are yet thin, is well flavoured; but the third and last, gathered at the end of another month, when the leaves are full grown, produces the worst tea. The leaves, while

JAPAN. drying on thin iron plates placed over a slow fire, are continually stirred about with the hand, and are afterwards cooled by being rolled backwards and forwards on mats; if not then dried sufficiently, the process is repeated. The climate of Japan is evidently too cold for the sugar-cane, but the sap of a tree which grows in some of the neighbouring islands yields brown sugar of a coarse and inferior kind. The bark of the Paper mulberry (*Broussonetia papyrifera*) furnishes paper, which is used for clothing as well as for window-lights, screens, and the common purposes to which we apply it. The Indian mulberry (*Morus Indica*) yields an inferior sort of paper. Of their mode of manufacturing both sorts, an accurate and detailed account may be found in Thunberg (ii. 2. 52.) and Kämpfer. (*Amæn. Exot.* 466.) Their lacker or varnish excels that of all other nations, the Chinese and Siamese not excepted; so much so that, among us, the Art of "Japanning" has received its name from them. The wood used for lackered work is always fir or cypress, (*Cupressus Japonica*), of the best quality. The lacker, or varnish, is, as before observed, the juice which flows from the stem of the varnish sumach (*Rhus vernix*) when wounded, the best coming from trees three years old. It is at first rather clear, and as thick as cream; when left in the open air, it becomes thicker and blackish. When pure and free from all admixture, it is so transparent as to show every vein and knot in the wood on which it is laid; but a dark coat, made by the sediment collected in the trough under a grindstone, or by powdered charcoal, is generally laid on beneath it, and it then reflects like a mirror. Colouring matters, red or black, or gold-leaf finely macerated, are mixed with the varnish. The gold and silver flowers and figures are laid on over it, and for that reason are apt in time to rub off. Old lackered work with raised figures is much valued, very rare, and sells for a high price. This gum, or resin, is difficult to dissolve, but extremely brittle; it will, therefore, bear boiling water, but flies with the least blow. It is used by the Japanese for every thing made of wood; window and door frames, tea-cups, and soup-plates, sedan-chairs, and sword-sheaths, as well as the fans, tea-trays, &c. which find their way into Europe.

Lackering
or Japan-
ning.

Porcelain.

Compass.

The Japanese porcelain is generally coarse, and very inferior to that of China; some, however, is made in Japan which may rival the Chinese. The Art of manufacturing glass was learnt from the Europeans, but the Japanese cannot make clear and thin plates fit for windows. Watch-making is another Art imported from Europe, but with what success it is practised, is not said. The Japanese are, however, excellent workers in metals, smelt copper well, and make the most elastic sword-blades known. They colour sowas, a mixture of gold and copper, black or blue with Indian ink, by a method still unknown to Europeans. In ship-building and navigation they have made little progress; and as they are forbidden to leave their own and visit other Countries on pain of death, they have neither motive nor opportunity for improving in those Arts. With the navigation of their own coasts they are well acquainted, and it will appear, from circumstances to be noticed presently, that their Government, since Thunberg's time, has not been quite so free from all ambition of enlarging its dominions as he supposed. The Compass has long been known to them. It has 12 points; every quadrant being divided into three of 15° each. To these points they give the names

of the years in the duodenary cycle, also given by them and the Chinese to the 12 signs of the Zodiac. They are in Chinese and Japanese as follows;

Tsě,	Né,	Rat. N.	Mao,	U,	Hare. E.
Ch'heu,	Usi,	Ox.	Chin,	Tatsü,	Dragon.
Yin,	Tora,	Tiger.	Sè,	Mi,	Serpent.
U,	Muma,	Horse. S.	Yeu,	Ton,	Fowl. W.
Weï,	Fitsusi,	Sheep, or Goat.	Syü,	Inu,	Dog.
Shin,	Saru,	Monkey.	Haï,	I,	Swine.

The Japanese words are the names of the animals signified; the Chinese, on the contrary, have a mystical sense, and only indicate that the year, sign, or point to which they are assigned, is under the influence of the constellation implied. This cycle was borrowed by the Chinese from the Tatars, in comparatively modern times, as M. Rémusat thinks. (*Rech. sur les Langues Tartares*, i. 192. Visdelou, in *Bibl. Orient.* iv. 43.) The terms expressing the four cardinal points are,

Joku, (Pě,)	Kitta. N.	Nan, (Nān,)	Minnami. S.
Toō, (Tûng,)	Figasi. E.	Saï, (Sî,)	Nis. W.

The commerce of Japan, that is the trade from one part of the island to another, seems to be in a very flourishing condition. "It is fettered," says Thunberg, (ii. 2. 74.) "by no restriction, checked by no tolls or duties, by no want of conveyance from one Province to another." But Thunberg saw none but the most frequented roads and harbours, and could obtain no information but through interpreters, on whose veracity he seems to have placed too implicit a reliance. "Besides the *kubo*," he adds, "the merchants are the only people in the Country who are rich; but they are prohibited from rising to a higher rank or holding any post of honour. Tradesmen are, therefore, looked upon with contempt, as those who make their fortune at the expense of their neighbours." This does not speak favourably for the real state of commerce in Japan, and had the travellers there enjoyed the means of conversing freely with any of the natives engaged in trade, their report would most probably have been very different. The Japanese tea is inferior to that grown in China, but its *soya* (soy) is much superior, and is, therefore, exported from Batavia to all parts of the East Indies. To prevent fermentation, the Dutch boil it at their Factory in iron caldrons, and then keep it in bottles well corked and coated with resin. The Japanese silks are too narrow for the European market; and their porcelain, from its inferiority to the Chinese, is not exported in any considerable quantity. Their shops have such a large assortment of goods for sale, that it is difficult to conceive where they can find purchasers, and almost every conceivable article is to be had ready made. The Chinese, who are the only nation besides the Dutch allowed to trade with Japan, import silks, agate, sugar, drugs, zinc, and books; but for the latter, a license from the Japanese Board of Censors must be first obtained. The trade with China was placed on its present footing in 1684, in consequence of the discovery of some Roman Catholic books smuggled in by captains of Chinese ships. The number of their ships was, therefore, restricted to 70 every year, each carrying no more than 30 men, and the whole amount of their imports must not exceed 600,000 *tâhil*, (£150,000 nearly;) their merchants suffering great extortions from the public officers at Nangasaki, notwithstanding the hogs which they

Commerce.

Shops.

JAPAN. obligingly bring over for the accommodation of those who love pork. The Portuguese, in the XVIth and beginning of the XVIIth century, and subsequently the Dutch, carried on a very lucrative trade with Japan; but the Portuguese commerce was prohibited in 1619, and in 1636 the Dutch were obliged to abandon their factory on the pretty island of Firando, and settle at Nangasaki; they were subsequently, in 1641, restricted to the islet of Dezimà; and for a long period before Thunberg visited Japan, new restrictions had been continually laid on, so that their trade then hardly made any return. The severest blow which it ever received was in 1672, in consequence of an offence unintentionally given to Inaba Mino, the Emperor's favourite; a proof of the power of favourites in Japan, and a practical refutation of Thunberg's opinion as to the excellence of its Government, and extraordinary happiness of its People. Two ships, and goods to the amount of 300,000 *táhils*, (£75,000,) are all that the Dutch are allowed to send in any one year; and to that extent probably their trade from Batavia was carried on, till their disasters in the late war almost ruined their colonies. An unsuccessful attempt to renew the intercourse between Japan and Java was made during the administration of Sir Stamford Raffles; it has, however, been reestablished (with what advantage does not appear) since the restoration of that island to the Dutch. (*Asiatic Journal*, xxi. 213.) Copper and camphor, silk night-gowns, lined and quilted, china, soy, and preserved fruits, were exported from Japan by the Dutch East India Company. Large earthen jars, *sakki*, (a spirit obtained from rice,) fans, *sowas*-work, and superfine rice in small packets, were purchased by individuals in their service. The Company, in return, imported soft sugar, ivory, sappan-wood, lead, tin, bar-iron, chintzes, broad-cloths, shalloons, silks, cloves, tortoise-shell, China root, and *Costus Arabicus*; and their officers carried small consignments of camphor, ratans,* tortoise-shell, sword-fish, (*Monodon monoceros*), horns, glass-work, watches, chintzes, saffron, Venice treacle, licorice, nin-si (gen-sing) roots, Nuremberg toys, such as looking-glasses, &c. and Dutch books, which sold to great advantage among the interpreters. A small quantity of specie was also carried on the Company's account, but private persons were not allowed to introduce any coin, though it might have been attended with advantage.

Weights and measures. As every thing is sold by weight, a small ivory steel-yard, put up with its weights and scale in a convenient case, (Thunberg, pl. ii. fig. 6,†) is usually carried in the pocket; and for minute quantities, a smaller and very ingenious one, acting by a delicate spring. (*Ib.* fig. 7.) Merchants also carry about a small box, containing their writing and calculating materials, viz. a pencil, Indian ink, water, and mixing stone, with the steel-yard, and swan-pan, or reckoning-board. The weights and measures used by the Japanese are nearly the same as those of the Chinese and Malays. (*Encyclopædia Metropolitana*, vol. xix. p. 590.) Their itinerary measures vary in different Provinces. (Kæmpfer, ii. 404.)

In Kyu-syu and Isyè 1 ri (li) = 50 tso = 3000 kin.

Elsewhere 1 ri (li) = 36 tso = 2160 kin.

Kæmpfer (ii. 404.) found the first to be equal to "a

* *Feines rohr*, in the German version.

† Plate iii. fig. 13, in the English translation; the Plates of which are incomparably superior to those in the German version.

good hour's riding;" the second to "three-quarters of an hour."

1 long ri = 3 standard miles nearly

1 short ri = 2 ditto ditto.

1 tso or cho = 1 length of a street.

1 kin = 1 fathom.

The measure for rice is the *kokf*, (hō?) which is thus estimated:

1 *kokf* = 3000 sacks.

1 *ikwankokf* = 1000 *kokfs* = 3,000,000 sacks.

1 *man-kokf* = 10,000 *kokfs* = 30,000,000 sacks.

The measures are:

1 *pikul*, or *pikel* = 100 *katí* = 125 lbs. Dutch weight = 133½ lb. English.

1 *katí* = 16 *táil*, or *táhil*, = 21½ oz. avoirdupois. = 1 *rix-dollar* = 4s. 5d.

1 *táil* = 10 *mas*.

1 *mas* = 10 *kondúrí*, or *konderí*.

The current coins are:

1. gold, 1 new *kobang* = 60 *mas* = 6 *táil* = £1. 6s. 6d.

1 *itsibú*, or *boontje*, = 5 *mas* = ½ *táil* = 2s. 3d.

2. silver, 1 *nan-dyo-gin* = 7 *mas* = 5 *konderís* = 3s. 10d.

Itagame and kodama of uncertain value, estimated only by their weight.

3. copper, brass, and iron.

Seni is the general term for all coin of the baser metals.

Copper.

1 *seni* = ⅓ *mas*.

Brass.

1 *simoni seni* = 4 common *seni*.

Iron.

1 *dôsa seni* = 4 common *seni*.

The gold coins are of an oblong form, rounded at each end, flat, very thin, about two inches long, rather more than one broad, and of a bright yellow. Each coin is marked with the device or arms of the Djogûn, and a short inscription, giving the date of the year in which it was coined; the largest gold coins, called *o-bang*, (= 10 old, or 16⅔ new *ko-bangs*), are not used in currency, but merely as honorary tokens and keepsakes; they bear the same inscriptions as the *ko-bangs*, and were first coined in the 16th year of the period Ten-syo, (A. D. 1588,) being inscribed with the words *Ten-sio syu rok nen ban*, i. e. Of Ten-syo, 16th year-money. (Klaproth, in *Nouveau Journal Asiatique*, ii. 13.) The *itsibú*, or *itsib*, called *boontje* (i. e. little bean) by the Dutch, on account of its diminutive size, is of pale gold, oblong and flat, about the thickness of a halfpenny. It has the Imperial device on one side, and the date on the other; these coins were first struck in A. D. 1599. The *nan-dyo-gin* is also of an oblong shape, an inch long and half an inch broad, and about as thick as a half-crown. Its inscriptions are similar in import to those of the gold coins. The other silver coins vary much in weight and size, are oblong or cylindrical, and have the figure of Daí *kokf*, the God of Riches, stamped upon them, as may be seen in Kæmpfer's Plate. (*Tab.* xix. fig. F.) The smaller coins of baser metal have all, like the Chinese *tsyens*, a

Coins.

Gold coin.

Copper, brass, and iron.

* What quantity the sack contains is nowhere mentioned; but if the *kokf* be the *hō* of the Chinese, it is equal to 12,000,000 grains. *Man* and *ikwan* are numerals, signifying 10,000 and 1000. *Man-gokf* and *ikwangokf* are misspelt *managoga* and *ickmagog* in Dr. Kelly's *Metrology*. (i. 197.) The term *ganta* does not appear in the best books on Japan.

JAPAN. square hole in the middle, by which they can be strung. Such strings, containing 96 or 101 each, are always kept for sale in the shops, and are very convenient for small change. The larger strings, called *kwurok-kufyakf*, is worth 1 mas and 5 konderi. The Chinese tsyens are also current at Nangasaki. For an account of the rarer coins which are no longer current, and the History of the Japanese mint, the reader must be referred to Kämpfer, Thunberg, and M. Klaproth, in the *Journal Asiatique*.

Houses.

The Japanese houses are all of lath and plaster, and slightly built, but, being well stuccoed and white-washed, have a neat appearance. They never place any beams obliquely, and their laths are made of bamboo. There are no partition walls, the roof being supported solely by the upright posts which sustain the rafters, but grooves are cut in the cross-beams above and below, for screens, which can be slid backwards and forwards at pleasure, so that the house, which consists at first of only one room, can be subdivided with the greatest ease into almost any number. These screens are lackered wooden frames, covered with thick, coloured paper, and fitting very closely into the above-mentioned grooves. This method of making additional rooms at pleasure is common in many English inns; and can be applied very expeditiously with such light partitions as the Japanese screens; but, as Thunberg gravely remarks, (ii. l. 167.) "though one cannot see what is passing in the next room, one can mostly hear very well all that is said." The ceiling of the rooms is neatly boarded. The large projecting roofs are covered with heavy pan-tiles, or shingles secured by stones laid upon them. These roofs are sometimes double. Their houses are usually two stories high, but the upper rooms are low, and merely used for lumber. Twenty feet is the greatest height from the ground to which they ever build. In the villages the backs and sides of the houses are often covered with shingles, secured by laths of bark nailed on. Both the walls and ceilings of the rooms are covered with richly ornamented paper, the patterns of which represent shrubs and flowers, sometimes on a gold or silver ground. The fronts of houses towards the street are occupied by a shop, kitchen, scullery, or some other offices; but the rooms at the back, opening into a court, are those which the family inhabit; and the garden on which they look is usually ornamented with an artificial mount, planted with flowering trees and shrubs. Almost every house has a room fitted up with a tub and other utensils for bathing, and in those of the better sort, there is a bath adjoining the visitors' apartments. Cleanliness, both in their persons and their houses, is universal among the Japanese. The only fire-place in the kitchen is a large square hole in the floor, generally in the centre, or a square place enclosed with a few stones, and the only chimney a hole in the roof. As the floor is covered with mats, the danger from fire is very great. There are two or more windows in every room, reaching nearly from the ceiling to within two feet from the floor. The sashes consist of light frames, sliding in grooves made in the upright and cross beams, and are removable at pleasure; they are subdivided by laths into small square compartments, sometimes as many as forty, and are covered externally with paper, which, being seldom or never oiled, gives a most dismal light, and excludes the prospect. The floor is covered with thick mats, made of fine flags and rice-straw, two yards long and one broad, enclosed by a narrow black

or blue border. The Temples and public buildings are all constructed in the same manner, being distinguished only by their size, and by tapering towers and turrets in the Chinese style. The larger towns are all surrounded by walls and ditches, protected by a citadel, and remarkable for their regularity. The villages, seldom less than a mile long, consist of one street on each side of the road. Sometimes they are three or four times that length, and are merely separated from each other by a bridge. It is necessary to warm the rooms by fires from October to the end of March, and since there are no fire-places, a large copper brasier, filled with burning charcoal, is placed either in the middle or in one corner, surrounded by screens, so as to diminish the area. The burning of charcoal instead of wood embers, which are always used in Turkey, where the rooms are warmed by a similar method, occasions sore eyes and much inconvenience from smoky walls. Their rooms look very naked, being quite bare of furniture. When sitting they bend their legs under them, and rest their hams upon their heels. At night, a soft mattress, stuffed with wool, laid on the floor-mat, is their bed; a piece of lackered wood their pillow. At dinner, a small table, about a foot square and four inches high, is placed before each person; a small wooden skewer serves for knife and fork, and a portion of each dish is brought in a covered lackered basin, and placed before each of the guests. Cupboards, trunks, boxes, &c. are all kept in some of the store-rooms. Dressing-cases of lackered wood, a foot long and half a foot high, are used by the *petit-maitres* in Japan at their toilet. For one of these diminutive cabinets, richly ornamented with raised flowers in the old style, the ambassador, while at Yedo, was asked 70 kobang; (£94;) too great a price, as Thunberg thought, for a dressing-box, and a plain proof, which he did not observe, of the decline of the Arts in Japan. On the dressing-table there is always a well-polished mirror, made of an alloy of zinc and copper, and attached to a sloping wooden stand. Folding-screens, often richly painted and gilt, such as were seen in most houses in the days of our great-grandfathers, are used everywhere, and in winter-time are much needed for all the purposes for which they were formerly employed among ourselves, when our houses, though more solid, were not much more wind and air tight than the pasteboard edifices of Japan.

The Japanese dress, Thunberg (ii. l. 175.) is persuaded, not only differs from that of all other nations, but has continued one and the same for upwards of 2500 years. It is also, he adds, exactly alike in all ranks, ages, and sexes. A large loose gown, like our night-gown, of silk or cotton, according to the wearer's rank or resources, is always the outer garment. Ladies wear rich flowered silks; men silks, generally all of one colour; soldiers and labourers gird up their skirts. In winter, quilted gowns are worn. Men are contented with only a few; the ladies sometimes put on fifty, one over another, taking care that each should be sufficiently thin and light. That next the skin serves as a chemise, and is, therefore, extremely fine and transparent, and either pearl-coloured or white. These gowns are fastened round the waist by a sash or girdle, the knot of which is tied behind by unmarried, but before by married women: this girdle is the place where the men carry their sabre, fan, tobacco-bag, pipe, and pill-box. Their neck is always bare, and their enormous sleeves

JAPAN

Dress.

JAPAN. serve both as muffs and pockets. In warm weather the labourers often go nearly naked, with nothing but a sash round their waist and between their legs. Men of the higher classes, when out of doors, wear a gauze jacket, black or green, over their wide-sleeved gown. Their trousers, which are made of a very fine and thin, but closely woven, hempen canvass, are more like a petticoat than trousers, reaching from the waist to the ankles, open on each side two-thirds of their whole length, and sewed together only near the feet. They are tied round the waist with a string, and are either striped brown or green, or entirely black. Drawers are seldom worn, except by the military. A large loose jacket, also, is thrown over the shoulders in visits of ceremony. The under garments are often made of a kind of linen, the thread of which is obtained from some species of nettles, or of silk, which, in thinness and fineness of texture, exceeds every thing manufactured in Europe or in any part of India; but the narrowness of these silks, seldom a foot wide, renders them unsaleable in European markets. The common people content themselves with cotton clothing, and fine ladies sometimes wear dresses made of cloth, the thread of which is spun from the bark of the Paper mulberry. (*Broussonetia*.) It has the appearance of calico, and is as white as snow, but is rotten, and will hardly bear washing. Old men wear gowns of brown flowered paper, as a gala-dress in cold weather; but these dresses are forbidden to the young. Stockings are never worn, but a sort of half boots made of cotton is used in cold weather by the lower Orders. Of all the articles of dress, however, used by the Japanese, their shoes are the least enviable; a mere sole made of straw, and fastened by a band across the foot, or tied round the leg and ankle, when it is necessary to walk to any distance, is the only kind of shoe ever worn; and for such there had need be shops at almost every turn. The common people very wisely wear wooden shoes in rainy weather. Their head-dress is most singular. The whole head is shaved bare, except just about the temples and on the nape of the neck, and the little hair that remains is well oiled and then drawn up tight to the crown of the head, and tied together with a strip of white paper well twisted, so as to make a firm binder. All but a finger's length of the hair above the knot is cut off, and the rest twisted into a short cue, standing at right angles to the head. Priests, physicians, and children are the only exceptions from this fashion of hair-dressing. The two former shave their head quite bare, but in the latter it is never shaven at all. The women make their hair very bright with oil, and then, drawing it tight up to the crown of the head, wreath it into a firm knot; a few tresses being left like wings on the sides of the head to distinguish the married from the unmarried. No covering is used for the head except in travelling, and then a small conical cap, made of flags or some kind of grass, and tied under the chin, is worn. The ladies' travelling caps are like a deep soup-plate, and richly embroidered. Parasols and umbrellas are in constant use. In rainy weather, both on foot and on horseback, an outer cloak is worn, made of thick paper well oiled. These surtouts are perfectly water-proof, and inconceivably light; a straw mat, with its rough side outwards, is the substitute for them used by the indigent. Every man has his coat of arms, or family device on his clothes, and carries in his sleeve a piece of soft paper

to serve as a pocket-handkerchief. His fan, which serves as a memorandum-book, is never forgotten. The ladies have always a supply of rouge, not for their cheeks, but for their lips, and if they lay on enough to give them a violet hue, they set every red-lipped damsel at defiance. Black teeth are the great object of a married lady's ambition, and she feels no hesitation in applying a most nauseous and offensive composition for the purpose of attaining so desirable an end; one thing more, however, is necessary to complete her beauty, every particle of hair must be plucked from her eyebrows: a wide mouth, full of bright black teeth, and a total abstraction of eyebrows, will appear, it may be fairly suspected, to every eye but that of a Japanese, as hideous as they did to Thunberg. (ii. 1. 187.)

Among the singular customs of the people, the following also are deserving of notice. 1. Their family or surnames are always prefixed, but never used, except on extraordinary occasions. Their proper names are changed frequently in the course of their lives, according to Thunberg, (i. 1. 198.) but he has probably confounded titles and names together. The rule in Japan is evidently the same as in China, where we have the *mîng*, or infantine, *tsě*, or virile, and *hwei*, or posthumous name, besides the title attached to each of the nine ranks. (Abel-Rémusat, *Gram. Chinoise*, p. 47; Morrison's *View of China*, p. 97.) Girls are often called by the name of some pretty flower. 2. Three meals a day, at 8 A. M., 2, and 8 P. M., are the common allowance; but in some houses there are no regular meals, every one eating when he is hungry. The first course at dinner consists of fish and fish-soup, the meat being skilfully picked up with a brace of lackered skewers; dish follows dish in rapid succession, and a blue china basin, duly covered, is the last. The servants present the dishes on their knees, or they would be in danger of tumbling over the four-inch tables. Some hard-egg is eaten, and warm *sakki* drunk between the courses, and a profound bow is the signal for beginning to eat. *Sakki* and tea are the only artificial beverages fabricated in Japan; a paucity of fluid luxuries which calls forth a note of admiration from the abstemious Swede. For their resolution in resisting the temptation offered by the brandy of their Dutch allies, all reasonable men will agree with him in giving them credit, but fond as he was of Botany, one should have thought that he would have regretted the sherbet, lemonade, imperial, and other vegetable refrigerators, which many of the Asiatic nations know so well how to prepare. *Sakki*, indeed, belongs to the same kingdom, for it is obtained from rice, but it unluckily has a very peculiar taste, which, he tells us, (ii. 2. 89.) "assuredly cannot be considered as agreeable." In colour it resembles wine, or rather beer, and is tolerably clear. Tea-kettles full of it are brought to table, (for it is always drunk warm,) and it is handed round in cups and saucers. It has the great merit of making men drunk most rapidly, and "leaving usually a very disagreeable headache behind it." It is swallowed as a whet before dinner by the Dutch at Batavia. Of its brewing, and in what it differs from arrack, Thunberg says nothing. A kettle full of tea is always on the fire in the Japanese tea-houses, just as a pot full of coffee is always boiling in the Turkish cafenés; and a dish of tea is presented to every stranger in one Country, just as pipes and coffee are in the other. The tea is made by pouring boiling water over it when finely powdered, and it is then stirred about with a wooden

JAPAN.

Tea.

JAPAN. stick, like a chocolate mill, and drunk off before the grounds have time to settle. His tea-apparatus accompanies a Japanese wherever he goes. Ladies, as well as gentlemen, are fond of their pipe, and proud of a showy tobacco-bag and a neat pipe-box. For a dessert, besides abundance of ripe fruit in Summer and Autumn, dried fruits and confectionery are always at hand in Winter. Those preserved in yest, obtained from rakki, are peculiar to Japan and China. Pickled konmons, or cucumbers, *axa*, i. e. vermicelli, *niomen*, or laxa with fish fried in onions, *somen*, the same seasoned with pepper and soy, sweet orach, or sugary sea-weed, (*Fucus saccharinus*), too tough for Thunberg's teeth, but much relished by the Japanese over their cups, are other articles of diet. 3. The flour of a kind of bean, ground very fine, is the substitute for soap: and candles made of concrete oil, with paper wicks, and tapering downwards, are used by the wealthy; but lamps are much more universal. The oil from which candles are made, is expressed from the *Rhus vernix* and *Succedaneum*, *Laurus camphora* and *glauc*, and *Melia azedarach*. *Dryandra cordata* and *Brassica Orientalis* are the plants which supply lamp-oil. For striking a light, a piece of greenish quartz is used as the flint, and the down of the common wormwood, or mugwort, (*Artemisia vulgaris*), serves for tinder. 4. The Japanese never seal their letters, but depend entirely on the art with which they fold them up, and interlace one fold within another; but what is more extraordinary, they secure their warehouses by nothing better than these Gordian knots of paper. 5. Very fine snuff, like the Spanish, is imported from China as a remedy for a cold in the head, a complaint very common in the variable climate of Japan. 6. Cards, though strictly prohibited, are sometimes seen. Thunberg thinks the Japanese are not fond of them, but if that were the case, how come they to have them at all? The Dutch, it must be remembered, never see the natives in private, and one officer is a spy on the actions of another, so that unrestrained intercourse can hardly be ever enjoyed. The cards are two inches long and one broad, black behind, and variously marked in front. There are 50 in a pack, and when laid in a heap, each player draws a card, and then all turn up to see who wins. Another game, either called, or much resembling, "the royal game of goose,"* is also played by the Japanese. 7. The public women are called concubines, and have harsher names, according to circumstances. Parents who have many daughters, sell them, when about five years old, to keepers of brothels, who bring them up first as attendants, and afterwards as the successors of their fair inmates; for when they are between 12 and 16, their freedom is generally purchased by their mistress, and they are formally admitted as members of the senior part of the establishment. Their practising in this way for a few years does no injury to their character, and is no obstacle to their subsequent marriage; for so convenient is the general tone of morality in Japan, that Thunberg met with only a few who agreed with him in disapproving of such proceedings. Some of the mischiefs arising from these lax principles he has sufficiently developed; other points seem to have entirely escaped his notice.

* On this weighty point the translations (Groskurd's *Uebersetzung*, ii. 1. 204. *Engl. Tr.* iii. 121.) are at variance, but the English is probably right. "Siobuts," it says, (iii. 121.) "was a kind of game which by the interpreters was called, in Dutch, the game of the goose. (*Ganse-spiel*)."

8. The roads, he says, are everywhere kept in good repair; but he saw only the most frequented, and his mention of their being especially mended before the passage of some great man, looks as if they were not often smoothed and sanded when no great man was going that way. "The rule of the road," which he justly says Europeans would do well in following, is strictly observed. Ditches, as drains on each side of the way, trees and hedges, mile-stones, and direction-posts, are conveniences which show how much the Japanese are advanced in civilization beyond most of their neighbours. Their horses are shod with straw! "not with iron," says Thunberg, (ii. 1. 210. *Eng. Trans.* 3. 152.) "but with pantouffles, or small shoes of straw, fast bound round the legs with a straw-band." The cheapness and plenty of these light horse-shoes he has duly extolled, but he has forgot to tell his readers, what most men would first think of asking—how long they last. A horse-litter, *kango*, or *norimon*, are the only vehicles to be had, for wheeled-carriages there are none, except clumsy carts, and those only in and about Miyáko. The parties on horseback often make a ludicrous figure. Sometimes a whole family is met carried by one horse; the father mounted aloft on the packsaddle, with his legs dangling beside his steed's neck, his wife in one pannier and his brats in another. The litters are small and inconvenient, as the traveller must squat down on his hams, Japanese fashion, and is only sheltered overhead. The *kango*, or *kago*,* is closed on all sides, square, and much like our sedans; but the most convenient carriage is the *norimon*, being neither more nor less than the palanquin, which, to judge from its Indian name, (*pálki*, from *palanquin*.) was introduced among the Hindús by the Portuguese, to whom the Japanese, therefore, probably owe their *norimons*, unless both those vehicles were borrowed from the Chinese. The bearers generally travel at the rate of one Japanese mile, about two miles and a half English measure, in an hour, and 10 or 12 in a day, (= 25 or 30;) but they sometimes, for a short distance, run at full speed, "and such a *norimon*," says Thunberg, (iii. 1. 212.) "flees past like an arrow."

The principal towns through which the Dutch embassy passed, supplied him also with some additional observations, which will serve to complete this summary. 1. *Nanga-saki*, (according to the Chinese pronunciation Chang-k'hi, long cliff,) situated in 32° 45' 50" North and 129° 52' 7" East, on the only harbour into which foreign vessels are admitted, is one of the five Imperial cities and most considerable mercantile towns in the Empire. It belongs exclusively to the Kubo, who appoints the two Governors, one of whom is always at his post, the other resident near the Court, where the families of both are detained as hostages. Their appointments are estimated at 10,000 rix-dollars, (about £2200,) besides many accidental perquisites, but their expenses are very considerable. The town is everywhere enclosed by hills on the land-side, but has no fortifications. It is traversed by a canal, which carries the water from the neighbouring hills into the sea. Its streets are crooked, seldom more than 30 or 40 fathoms long, and contain the same number of houses. Its local government is in the hands of four magistrates,

* Nasals are often omitted in this, as in other Asiatic languages; thus *Suruga* and *Surunga*, *Nangasaki* and *Nagasaki*, *Fiongo* and *Fiogo*.

JAPAN. who have a sufficient number of inferior officers (*otto-nas*) under their directions. It was a mere village in the time of the Portuguese, and its increase is entirely owing to the restriction of all foreign trade to its harbour. What it was 150 years ago, may be seen from Kämpfer's Plan. (*Tab. xix.*) The sides of the surrounding hills are ornamented by Temples and burying-grounds, which the Japanese, like their South-Western neighbours, love to decorate with shrubs and flowers.

Cocura.

2. *Kokura*, on the Southern side of the narrow strait which separates Kyu-syu from Nifón, is another of the Imperial cities, rich and flourishing, notwithstanding the shallowness of its harbour, which has only depth of water enough for small boats. The town is an oblong of a Japanese mile ($2\frac{1}{2}$ English miles) in length, traversed by a stream running into the sea. It is protected by a strong fortress, and has a military guard at each gate.

Simonoseki.

3. *Simonoseki*, on the other side of the strait, about 3 Japanese miles (8 British miles) across, though not a town of the first rank, is very populous and flourishing, in consequence of its excellent harbour, in which 300 vessels are often lying at anchor. It is, therefore, one of the few places where a general trade in the productions of every Province is carried on. It is also peculiarly famed for its rice and charcoal.

Osacca.

4. *Osaka*, a third of the Imperial cities, the exclusive property of the Kubo, is also one of the greatest places of trade in Japan. Its position on the coast, at the mouth of the river Yedogawa, which gives it a communication by water with Miyáko, renders it a place of very great resort. It is about a mile ($2\frac{1}{2}$ English miles) square, well watered by the river, which fills the canals cut through many of its streets and the ditch round its walls. Some of its numerous bridges are said to be 360 feet long. It is considered as the most agreeable place of residence in the whole Country. The two commandants, or military governors, who have no share in the Civil administration of the town, relieve each other every three years, and great precautions are taken to prevent their meeting or having any intercourse, as the one goes out and the other comes in. The embassy, on its return, spent two days at Osaka, and was allowed to see a great deal of the town and make many purchases. In "the bird-street" there are birds for exhibition or sale from all parts of the Empire. The Public Garden contains a large collection of plants from every Province, also offered for sale. It was here that Thunberg procured the *Cycas*, or *Cyclas revoluta*, a kind of sago-tree, which is found also in China and the East Indies, and forms the link between the palms and the ferns. It was at this place, also, that he saw copper smelted, and bars of it cast in beds filled with cold water, which gives the metal a peculiar brilliance; and here he laid in a stock of *moxa*, (*mo-sha*), the well-known Chinese caustic, which is nothing more than the down scraped off the leaves of the common mugwort. (*Artemisia vulgaris*.) At this place, likewise, they were indulged with the performance of Japanese Plays, which "are merry," says the grave Swede, (*ii. l. 129.*) "but so strange, that I might almost call them absurd."

Miacó, or Meaco.

Of *Miyáko*, in $35^{\circ} 4'$ North and $135^{\circ} 52'$ East, the spiritual metropolis, the Embassy saw scarcely any thing during its first visit, not having been allowed to stir out of the house once in all the four days that it remained there. Placed almost in the centre of the Empire, this, its former and very ancient Capital, is peculiarly calculated to form a great commercial city; and, therefore,

JAPAN. attracts the best workmen and the most considerable merchants. It stretches over a large plain, about four miles in length and two in breadth. Velvets, silks, tissue, plate, copper utensils, sowa, arms, clothes, and lackered work, are purchased here in their greatest perfection; and it is here that the excellent Japanese copper is purified and refined, all the money is coined, and almost all the books are printed. The Daïri's Palace alone forms a considerable town,* and, according to the Japanese notions, is strongly fortified. On their return, the ambassador and his suite, being less restricted, saw more in one day than they had previously done in four; and visited the Temples, which are all without the walls on hills and declivities, commanding the most delightful prospects. The largest is that of Daï-Bud, (*i. e.* Taï Fo, the Great Budd'ha,) consisting of two stories, the one projecting beyond and forming the basis of the other; as is common in Chinese Temples, with the more splendid of which, however, to judge from Kämpfer's Plate, (*Tab. xxxv.*) the Japanese sanctuary can bear no comparison. It rests on 96 columns, and has many lofty but narrow entrances; the upper story is supported by several painted pillars more than six feet in circumference; the floor is paved with squares of marble, a thing seen nowhere else in Japan. Nearly in the centre is a gilt statue of the God, in his usual dress and posture, about six feet from the ground, with long ears and curly hair;† but of such stupendous dimensions, that six persons, say the Japanese, can squat down without inconvenience on the palm of his hand, and his shoulders reach from pillar to pillar, a space measuring, apparently, 15 or 16 ells, (from 30 to 32 feet,) yet the whole seems well proportioned. The Temple of Kwan-won, though neither extraordinarily high nor wide, is of a surprising length. (Kämpfer, *Tab. xxxvi.*) In the midst sits Kwan-won (the Kwan-yin, or merciful Goddess of the Chinese) with her three and thirty hands, each bearing its proper emblem. (*Tab. xxxvii.*) She is surrounded by crowds of subordinate Deities, all richly gilt, and the sides of the Temple are entirely occupied by shelves or benches covered with other figures of the same description; the Temple, therefore, seems literally to deserve its name of San-man, san-sen, san-byakf, san-

Temples.
Daï-budo.

Kwan-won.

syu, san-taï, the $\left\{ \begin{array}{l} 30,000 \\ 3,000 \\ 300 \\ 30 \\ 3 \end{array} \right\}$ Great Ones, *i. e.* Gods.

(Kämpfer, 554.)

The Temple of Kiomids (*Ki-omido si*, *i. e.* Amida, *Kiomids* one of the personifications of Budd'ha) is further from the city, and was, probably, not visited by Thunberg. On the approach to it, there is a chapel crowned by a series of decreasing stories like the far-famed Tower of Nan-king. A little higher up is a large Temple built against the side of the hill, but supported in front by pillars, some of which are eight *ikins* and a half in height. A large mirror, a charity-box, and some gum-gums, (*gong-gongs*), struck by the supplicants by means of a

* But it bears no proportion to the whole area of the city, if the Japanese Plan copied in Kämpfer's *History* (*Tab. xxvii.*) can be depended upon, which is, probably, not the case. See what that writer says respecting the Plan of Yedo.

† Kämpfer (*p. 553.*) also notices the large spot (*i. e.* the class-mark) not gilt on his forehead, and the *taraté*, or sacred flower, (*i. e.* *Nelumbium speciosum*, or *Padma* of the Hindús,) on which he sits.

JAPAN.

rope, in order to advise the God that they are about to pay their devotions to him, are all its ornaments. Not far from the Temple a flight of 85 steps leads down to the sacred spring called Otewantakki, the waters of which give wisdom to all who drink of them. A series of terraces formed in the side of the mountain leads to another Temple, (*Tab. xxxiv.*) similar in structure to that last mentioned, and from its great elevation commanding a splendid view of the town of Miyáko and the surrounding country. The posture of the principal idols, sitting with hands conjoined, is noticed by Kämpfer, who seems to have little doubt as to their being figures of Amida, or some of his canonized disciples.

Yedo.

Yedo, the residence of the Djogón or Kubo, and the actual Capital of Japan, is in 35° 52' North and 139° 36' East, and, in Thunberg's opinion, (*ii. 1. 97, 98.*) the largest city on the face of the earth. If the Japanese are to be trusted, it is 21 Japanese (53 English) miles in circumference; but this, probably, includes the villages in the suburbs, which are scarcely separated from the city. Sinagawa, the first of them through which the embassy passed, lies along the sea-beach, and begins about six miles from the entrance of Yedo. The harbour, though spacious, is very shallow, and even the smaller vessels cannot come within six miles of the town; so that it is not much exposed to an attack by sea. The travellers entered the city by the bridge called Nĩ-pón-bas, (or Nĩ-fón-bas, *i. e.* bridge of Nifón,) which is more than 240 feet long, and the place from which every road in the Empire is measured. Their abode was at some distance further on, in a long and wide street; but Thunberg seems rather disturbed at the meanness of the house in which they were lodged, "not being worthy," he says, "of a foreign embassy which had come from such a distance." He forgets how paltry the presents given to the ambassador were, and how shabbily he was treated throughout his journey. In fact, till the oblique-eyed race have come more closely into contact with Europeans, and have had more experience of their superiority in arms, and of their uprightness and generosity, they will never cease to display the insolence, meanness, and distrust which now marks every step of their intercourse with "those Western Barbarians," the "red-haired people." It is not from regard for the Dutch, or gratitude for the benefits derived from their commerce, that the embassy is invited to the Capital, but that the vanity of the Emperor may be flattered by the submission, and his avarice gratified by the tribute brought by these contemptible strangers; and it may well be asked, whether the conduct of the Dutch agents in Japan has never fostered such unfavourable notions of their national character? But to return to Yedo; the Kubo's palace alone is nearly 15 miles in circumference, and is regularly fortified. The citadel, or inner fort, is inhabited exclusively by the Emperor and Princes of the blood; the outer fortress, which contains a number of fine streets, is the residence of the higher classes of Nobility, and a sort of State prison for their families. At the inner gate a thousand men mount guard daily. Beyond it is the proper residence of the Kubo, on high ground, and only of one story, but much more lofty than any other houses, and occupying a large space. At the audience, none but the ambassador was admitted into the Royal presence; his suite remained in the ante-chamber. The audience-chamber (*Kämpfer, Tab. xxxii.*) is the third of a suite, one within the other, each

rising one step, and about 50 feet long. On the right side is the hundred-mat room, named from the number of mats covering its floor; (*Tab. xxxi.*;) it is 600 feet long and 300 feet wide, and is the place in which the great Officers of State assemble on public occasions. On the left side of the audience-chamber, the presents brought by the ambassador were exposed, some of them displayed, others heaped up together. The whole ceremony consisted in the ambassador's knocking the ground with his head *à la Japonaise*, and then retiring as he came. The Kubo received him standing, with the hereditary Prince on his right hand. The ceremonial, as Thunberg observes, was quite different in Kämpfer's time; a proof that the Japanese Court is not so invariable in its routine of forms, as has been supposed. The other apartments shown to the strangers were entirely bare of furniture; but the floors were covered with very white matting, the doors and cornices finely lackered, and the locks and hinges richly gilt. "Extensive as Yedo is," says Thunberg, "it is as populous as it is extensive." Each family has a separate house, and the houses are only two stories high, the upper story being rarely inhabited, but they are much crowded. The principal streets are very long and broad, being often as much as 80 or 100 feet wide. The suburbs also seemed as thickly inhabited as the city itself; its population, therefore, can hardly be much less than 500,000 souls, perhaps considerably more. Kämpfer was told that Yedo was 21 miles long, 15 broad, and 60 in circumference; this is favourable to the correctness of Thunberg's account, as nothing had occurred in the interval of 81 years which elapsed between their visits, to prevent the natural increase of population, and an uninterrupted state of peace was extremely favourable to it. "The streets," says Kämpfer, (*p. 522.*) "are not laid out so regularly as those of Miyáko, though in parts of the town newly built, they are straight, and cut each other at right angles. He speaks also of places which were filled with trees and bushes. The number of Priests, Monks, Temples, and Oratories, in Yedo, is not smaller, he adds, than in most other Japanese cities. This is scarcely noticed by the Swedish traveller, but he had not quite so good an opportunity of seeing the town as his predecessor. The citadel is nearly in the centre. (See the Plan in *Tab. xxx.*) A square white tower, many stories high, with richly ornamented roofs, which was then within the Palace, and a very conspicuous object, is not noticed by Thunberg; and had, therefore, probably, been destroyed by fire before he saw Yedo. It was, no doubt, a Temple. The Royal Garden and the hill crowned by a beautiful plane-grove, are also unnoticed by the latter traveller. Very destructive fires, supposed to be occasioned by incendiaries, and a smart shock of an earthquake, occurred soon after Kämpfer's arrival; and the volcanoes in Ni-fón itself, as well as in the neighbouring islands, show that internal fire, the great cause of earthquakes, is at hand. The audience-chamber, he says, is exactly as represented in his Plate, (which, as before observed, accords well with Thunberg's description,) and a few carpets, placed on each other, formed the Emperor's seat; the splendid throne represented by Arnold Montanus being merely a creature of that writer's imagination. But was not Montanus indebted to the Dutch envoys for his descriptions? and had there been no change in the Court of Japan in the course of the XVIIth century?

JAPAN.

JAPAN.
—
JAPE.

These are questions to which Kämpfer affords no answer. The Emperor before whom he appeared was a wag, who made his heavy Dutch visitors pull off their cloaks and cut capers; the ambassador himself, however, was excepted; but his suite were exhibited, like tame bears or monkeys, for the amusement of the Kubo and his ladies, who peeped at them from behind their painted blinds of delicately split bamboo. Thunberg's companions were better treated.

See Engelbert Kämpfer's *History of Japan*, translated from the High Dutch by Dr. Scheuchzer, (brother of the celebrated Botanist,) London, 1728, 2 vols. folio. Kämpfer's papers were, at his death, purchased by Sir Hans Sloane, and are, therefore, now in the British Museum. Under the patronage of that eminent Physician, the *History of Japan* was first published in the English translation, which appears to be very faithful, and has a long and valuable Preface by the Translator, containing a *catalogue raisonné* of all the preceding Works on Japan. The original was published at Lemgo, the place where Kämpfer was born, lived, and died, just about the time that Thunberg was leaving Japan. Engelbert Kämpfer's *Geschichte und Beschreibung von Japan, aus dem Original handschrift des Verfassers von Ch. W. Dohm*, Lemgo, 1777—1778, ii. Bände, gr. 4to. An older and more splendid, but far inferior, Work is Arnold Montanus's *Ambassades Mémorables de la Compagnie des Indes Orientales des Provinces Unies vers les Empereurs du Japon*, Amsterdam, 1680, folio. The Dutch edition was printed at the same place in 1669; Ogilby's English Translation at London in 1670, both in folio. An Abridgement with the same title, *Ambassades de la Compagnie, &c.* à Leyde, 1686, 2 tomes 12mo., which contains almost all that is essential in the great Work, is the book quoted here. A judicious abstract of former accounts and valuable materials respecting the Dutch trade are given by Valentyn, in his *Beschryvinge van den Handel en Vaart der Nederlanden op Japan* (*Keurlyke Beschryvinge van Oost-Indien*, 5de Deel. Dordrecht, en Amsterdam, 1726, 5 vols. folio.) The most modern and, next to Kämpfer, the best authority, is Carl Peter Thunberg's *Resa uti Europa, Africa, Asia, förrätted ifrån år, 1770 til 1779*, Upsala, 1789—1793, 4 vols. 8vo.; translated into German by M. Ch. H. Groskurd, Head Master of the Public School at Stralsund, (K. P. Thunberg's *Reise*, Berlin, 1792—1794, 2 vols. 8vo.;) into English, (from the Swedish,) London, 1795—1796, 4 vols. 12mo.; and into French, from the English, (*Voyage au Japon traduit par M. Langlès, et revu, quant à l'Histoire Naturelle, par M. Lamarck*, Paris, 1796, 4 vols. in 8vo.) For

the Botany of the Japanese Islands, the same able Naturalist's *Flora Japonica*, Lipsiæ, 1784, 8vo. and *Icones Plantarum Japonicarum*, Upsaliæ, 1801—1806, folio, are excellent guides; but much valuable information may be found in Kämpfer's celebrated Work, the *Amœnitates Exoticæ*, Lemgov. 1712, 4to.; for which the references in the margin of M. Abel-Rémusat's Index to the Japanese *Encyclopædia* (*Notices et Extraits des Manuscrits de la Bibliothèque du Roi*, tom. xi. Paris, 1827, 4to.) will supply the Linnæan names. Thunberg's *Novæ Insectorum Species*, Upsaliæ, 1781—1791, illustrate another part of the Natural History of Japan; and his many Dissertations relative to that Country, printed in the *Swedish Transactions*, are enumerated by himself in the Preface to his last volume. For the state of Science among the Japanese, M. Rémusat's analysis of their *Encyclopædia* (which is little more than a translation from the Chinese) may be consulted in the *Notices, &c.* xi. 123. It also supplies the genuine orthography of many words printed for the first time in the Japanese alphabetic character. Vocabularies are given by Radermacher (*Verhandeligen van het Bataaviasch Genootschap*, iii. 247.) and Thunberg, (ii. 1. 216. and reversed in the German Translation, iii. 1.;) but the best key to the language is furnished by the *Elémens de la Grammaire Japonaise par le Père Rodriguez, traduits du Portugais par M. C. Landresse*, Paris, 1825, 8vo.; the *Supplément à la Grammaire Japonaise du P. Rodriguez, ou Remarques additionnelles, &c. tirées de la Grammaire du P. Oyanguren*, Paris, 1826. Didaci Colladi *Ars Grammatica Japonicæ Linguae*, Romæ, 1632, 4to. and the same author's *Dictionarium Japonicum*, Romæ, 1632, 4to. and 1638 with the Supplement. Charlevoix's *Histoire et Description Générale du Japon*, Paris, 1736, 9 tomes in 12mo., is an able compilation from the materials furnished by the Missionaries; and the most modern Work on the subject is Golovnin's *Captivité chez les Japonais pendant les années 1811, 1812, and 1813*, Paris, 1818, 2 tomes in 8vo. See also Adelung's *Mithridates*, i. 567; *Nachträge*, 255.; *Zuzätze*, 512.; and *Mémoires sur les Djogouns tirés des papiers de M. Titsingh*, Paris, 1820. The other books cited above are the *Asiatic Researches*, 8vo. ed.; Rémusat's *Grammaire Chinoise; Mélanges Asiatiques*, Paris, 1826; *Nouveau Journal Asiatique*; Dr. Morrison's *View of China*, Macao, 1817; *Asiatic Journal*, Lond. v. y. 8vo.; Sir W. Ouseley's *Oriental Collections*; Abel-Rémusat's *Recherches sur les Langues Tartartes*, vol. i. Paris, 1820, 4to.; Klaproth's *Asia Polyglotta*, Paris, 1823, 4to.

JAPAN
—
JAPE.

JAPE, v. } *Jape* (says Junius) is an insulting
JAPE, n. } or outrageous vaunting and triumph-
JA'PER, } ing over them that are under our
JA'PERY, } subjection. *Islandis* (he adds) *geip*,
JAPE-WORTHY. } *est jactatio*; and this, Hickes thinks,
is the same with the A. S. *gilp*, *jactantia*; the verb is
gilp-an, or *gylp-an*, "to brag, to boast, to glory, to

crake, to vaunt; also, to cry out, to *yelpe*." Somner. Junius collects a number of passages to show the usages of the word; some of which express strongly the acknowledged resemblance between *japeries* and the tricks of an *ape*. Skinner derives from the Fr *gaber*. See GAB, GIBBER, GIBE, JABBER; all of which seem to bear an affinity to *jape*.

JAPE *Jape, n.* a trick, a jest; *Jape, v.* to jest; to cheat, to laugh at. *Japer, a* common jester or buffoon.
JAR. *Tyrwhitt.*

See **JANGLE**, for an example from *Piers Plouhman*.

And thei sein soþliche, and so doþ þe Sarrasyns
 That Jesus was bote a jogelour, a *japer* amonge þe comune.
Piers Plouhman. Vision, p. 302.

Thus hath he *japed* thee ful many a yere,
 And thou hast maked him thy chief esquire
 And this is he, that loveth Emelie.
Chaucer. The Knightes Tale, v. 1733.

After this cometh the sinne of *japers*, that ben the *devil's apes*, for they make folk to laugh at hir *japerie*, as folk don at the gaudes of an ape.
Id. The Persones Tale, vol. ii. p. 339.

Jelous he was, and wold have kept hire fain
 For him were loth *japed* for to be;
 And so is every wight in swiche degree;
 But all for nought, for it availeth nought.
Id. The Manciples Tale, v. 17094.

The folk gan laughen at his fantasie
 Into the roof they keyken, and they gape,
 And turned all his harm into a *jape*.
Id. The Milleres Tale, v. 3840.

The prescience of thilke *jape-worthy* deuinyng of Tiresie Deunior, saied. All that I saie (quod he) either it shall be or els it shall not bee.
Id. Boecius De Consol. book v. pr. 3.

She made him debonaire and meke,
 And by the chin, and by the cheke
 She luggeth him right as hir list
 That now she *iapeth*, and now she kist.
Gower. Conf. Am. book vii. fol. 152.

And right so in the same stede
 Ferde Helenus, whiche was hir [Cassandra's] brother,
 Of prophecy and suche another:
 And all was holde but a *iape*.
Id. Ib. book v. fol. 126.

It was no tyme with hym to *jape* nor toye.
Skelton. The Bouge of Courte.

JAR, v. } Skinner prefers the Fr. *guerroyer*,
JAR, n. } which, among other things, signifies
JARRING, n. } *rixari*, to quarrel. Junius thinks, that *jarre, litigiosè concertare*, seems to come from the A. S. *eorre, yrre, ira*; the verb is *eorrian*, which Somner interprets to be angry, or *yeery*, and the participle *corra*, angry, *yeery*. The word was, probably, applied originally to some discordant, dissonant noise.

To cause or utter a harsh discordant sound, as from the shake or vibration of a somewhat solid substance struck, or moved; to vibrate harshly; to reverberate harshly. *Met.*

To disagree; to be or cause to be at variance, to contest, to conflict, to dispute, to quarrel.

Ye muse somewhat to far
 All out of joynt ye *jar*.
Skelton. Duke of Albany and the Scottes.

Paule the first was brother to the said Steuen: hee after wrangling and *jarring* betwene him and Theophilact, succeeded.
Bale. Pageant of Popes, fol. 49.

I may not boast of any cruell *jarre*,
 Nor vaunt to see full valiant facts from farre:
 I haue not bene in Turkie, Denmarke, Greece,
 Ne yet in Colch, to winne a golden fleece.
Gascoigne. The Fruites of Warre.

Christians being at *iarre* amonge themselues do deuoure one another.
Bale. Pageant of Popes, fol. 155.

O steal the accents from her lips that flie,
 Which like the tunes of the celestials are,
 And them to your sick amorous thoughts apply,
 Compar'd with which Arion's did but *jar*.
Drayton. The Barons' Wars, book iii.

The feeble Britons, broken with long warre,
 They shall vpreare, and mightily defend,
 Against their forrein foe that comes from farre,
 Till vniuersall peace compound all ciuill *iarre*.
Spenser. Faerie Queene, book iii. can. 3.

He reconciled also unto Pompeivs, M. Crassvs, an olde enemy ever since that consulship which they bare together with exceeding much *jarring* and disagreement.

Holland. Suetonius. Caius Julius Cæsar, fol. 8.

On easy numbers fix your happy choice;
 Of *jarring* sounds avoid the odious noise.
Dryden. The Art of Poetry.

Since endless *jarrings*, and immortal hate,
 Tend but to discompose our happy State;
 The war henceforward be resign'd to fate.
Id. Virgil. Æneid, book x.

Grave brethren of the gown
 Preach all Faith up, and preach all Reason down,
 Making those *jar* whom Reason meant to join,
 And vesting in themselves a right divine.
Churchill. Gotham, book iii.

So should an idiot, while at large he strays,
 Find the sweet lyre, on which an artist plays,
 With rash and awkward force the chord he shakes,
 And grins with wonder at the *jar* he makes.
Cowper. Conversation.

JAR, v. } Fr. *jare*; It. *giarro*; Sp. *jarro, jarra*;
JAR, n. } *ampulla vel urceus*. Menage derives from the Gr. *υαλος, vitrum*; thus *hyalum, gyalum, giala, giarra*. A *jar* is an earthen vessel; perhaps, from *ge-er-ed*, earthed, or earthen, the past participle of the A. S. *ge-erian*, to ear.

A *jar*; an earthen vessel; *jarred* fruit, fruit packed in such earthen vessel.

Passing from hence Westward along the South coast of Hispaniola, wee discredyed a frigate, which wee chased and tooke; wherein were 22. *iarres* of copper-money.

Hakluyt. Voyage, &c. vol. iii. fol. 568. M. C. Newport.

A great *jarre* to be shap'd
 Was meant at first; why forcing still about
 Thy labouring wheele, comes scarce a pitcher out.
Jonson. Horace. Of the Art of Poetrie.

Or, climbing to a hilly steep,
 He views his herds in vales afar,
 Or shears his overburthen'd sheep,
 Or mead for cooling drink prepares,
 Of virgin honey in the *jars*.
Dryden. Horace. Epode 2.

'Tis hurtful in the footed *jar* to eat,
 Till purify'd; nor in it bathe your feet.
Cooke. Hesiod. Works and Days, book ii.

JARAVA, in *Botany*, a genus of the class *Monandria*, order *Digynia*, natural order *Gramineæ*. Generic character: calyx, glume, two-valved, one-flowered; corolla, glume, one-valved; down bristled.

One species, *J. usitata*, a valuable grass. Native of the mountains of Peru.

JARGON, v. } Fr. *jargonner, jargon*; It. *gergo*,
JARGON, n. } *gergone*; Sp. *jerigonza, gerigonza*;
JARGONING. } all of which, (says Lye,) together with the verb to *jar*, seem to approach very nearly to the A. S. *girran, garrere*, to babble, prate, or chatter. Menage derives from *Barbaricus*, and his Editor from *Græcum*. Skinner from the It. *chierico, lingua chiericoni*, i. e. *Lingua clericorum*, i. e. the Latin, to the vulgar an unknown tongue, though obliged to hear prayers in it.

To *jargon*, in Gower, seems to be, to utter inarticulate sounds.

JAR.
JARGON.

JARGON.
—
JASMI-
NUM.

Jargon, a language which either himself (the speaker) or his hearers understand not, (Cotgrave;) unintelligible babble or talk; confused, incoherent chatter.

Full faire service, and eke full swete
These birdes maden as they sete
Layes of loue, full well souning
Their songen in their *iargoning*.

Chaucer. *The Romant of the Rose*, fol. 119.

He was al coltish, ful of ragerie
And ful of *jargon*, as a flecked pie.

Id. *The Marchantes Tale*, v. 9722.

But she withall no worde maie sowne
But chitre, and as a byrde *iargowne*.

Gower. *Conf. Am.* book v.

And right so as hir *iargon* strengeth,
In sondry wise her forme chaungeth.

Id. *Ib.* fol. 106.

These love-tricks I've been vers'd in so,
That all their sly intrigues I know,
And can unriddle, by their tones,
Their mystic cabals, and *jargones*.

Butler. *The Lady's Answer to the Knight*.

To them the sounding *jargon* of the Schools
Seems what it is—a cap and bells for fools:
The light they walk by, kindled from above,
Shows them the shortest way to life and love.

Cowper. *Truth*.

JASIONE, in *Botany*, a genus of the class *Pentandria*, order *Monogynia*, natural order *Campanulaceæ*. Generic character: involucre ten-cleft; calyx five-parted; corolla, petals five, regular; anthers cohering at the base; capsule inferior, two-celled, many-seeded.

Two species, natives of Europe. *J. montana*, the Sheep's-bit, is a native of England; by some Botanists this genus is placed in the class *Monadelphina*.

JA'SMINE, or } Fr. *jasmin*, or *jessemin*; It. *gel-*
JE'SSAMINE. } *somino*; Sp. *jazmin*. The Gr. *ιάσμη*, *ιάσμινον μύρον*, a kind of unguent made from the flowers of the white violet. (ΐον.) Martinius says, that an apiary or place for breeding bees was also called *jasme*, and Minshew adds, that the plant was so called, because the bees delight in the flowers of it.

Where thou mayst gather posies
Of gilliflowers, pinks, *jessamines*, and roses,
Sweets for thy bosom, garlands for thy head.

Sherburn. *A Shephard inviting a Nymph to his Cottage*.

There was at the further end of the garden a kind of wilderness,
in the middle of which ran a soft rivulet by an arbor of *jessamin*.

Tatler, No. 33.

The Latine vales eternal verdure wear,
And flowers spontaneous crown the smiling year;
But who manures a wild Norwegian hill,
To raise the *jasmine*, or the coy jonquil?

Fenton. *Epistle to Mr. Lambard*.

Those Ausonia claims,
Levantine regions these; th' Azores send
Their *jessamine*; her *jessamine* remote
Caffraia: foreigners from many lands
They form one social shade, as if conven'd
By magic summons of th' Orphean lyre.

Cowper. *The Task*, book iii.

Luxuriant above all
The *jasmine*, throwing wide her elegant sweets;
The deep dark green of whose unvarnish'd leaf
Makes more conspicuous, and illumines more
The bright protusion of her scatter'd stars.

Id. *Ib.* book vi.

JASMINUM, in *Botany*, a genus of the class *Dian-dria*, order *Monogynia*, natural order *Jasmineæ*. Generic character: corolla salver-shaped, from five to eight cleft; berry two-celled, seeds solitary, arillate.

About thirty species of this fragrant genus are known.

The native Country of the common white Jasmine is uncertain, although it has been cultivated in England nearly three hundred years. The yellow Jasmine, an elegant, hardy shrub, is a native of the South of Europe.

JASP, } Fr. *jaspe*; It. *jaspide*; Lat. *jaspis*; Gr.
JASPER. } *ιάσπης*; Heb. *jaschpel*.

And the bilding of the wall thereof was of the stoon *iaspis*.

Wiclif. *Apocalips*, ch. xxi.

And ther sayd a clerk ones in two vers; what is better than gold?
Jaspre. What is better than *jaspre*? Wisdom.

Chaucer. *The Tale of Melibeus*, vol. ii. p. 84.

His stone is *jaspe* and of plantaine
He hath his herbe soueraine.

Gower. *Conf. Am.* book vii. fol. 149.

The arrowes which they vse are made with great cunning, and instead of yron they head them with flint, with *iasper* stone & hard marble & other sharp stones.

Hakluyt. *Voyage, &c.* vol. iii. fol. 299. John de Vurrazzano.

Golde was the parget, and the seeling bright
Did shine all scaly with great plates of gold;
The floore of *jasp* and emeraud was dight.

Spenser. *The Vision of Bellay*, l. 25.

Of divers sorts of *jaspers*, all the East part (by report) are most affected to that which is like the emeraud, and they carrie it ordinarily about them as a countercharme.

Holland. *Plinie*, book xxxvii. ch. ix.

The workmen here obey the master's call,
To gild the turret, and to paint the wall,
To mark the pavement there with various stone,
And on the *jasper* steps to rear the throne.

Prior. *Solomon*, book ii. *Pleasure*.

Their small tools of *jasper*, which are used in finishing their nicest work, they use till they are blunt, and then, as they have no means of sharpening them, throw them away.

Cook. *Voyages*, vol. v. book ii. ch. x.

Pliny adds to the passage which we have cited above concerning JASPER, "And here by the way I can hold no longer, but my mind serves me very well to challenge the Magicians, who have given it out that this stone is very good for those to have about them, who are to make some publicke speech or solemne oration to the people." Marbodæus treats of 17 species, and states concerning the virtues of this stone,

*Castè gestatus febrem fugat, arcet hydropem,
Appositusque juvat mulierem parturientem.
Et tutamentum portanti creditur esse.
Nam consecratus gratum facit atque potentem,
Et sicut perhibent fantasmata noxia pellit.
Cujus in argento vis fortior esse putatur.*

De Lap. Pret. c. 39.

From a note on this passage it would appear that Jasper was sometimes generated equivocally. *In capite Aspidis invenitur lapillus Jaspidi similis qui mirè creditur esse efficacie et virtutis, et ideo quidem Jaspidem quasi aspidem vocari volunt.* Psellus recommends it as a preservative against defluxions, the night-mare, and epilepsy. (*De Lap. Virt.* p. 16. Ed. 1745.) Jonstone (*Thaumatographia*, iv. 23.) assures us that it is an excellent styptic, according to the part round which it is fastened; and that when placed on the pit of the stomach of an epileptic patient, if it produces perspiration, it frees him from the fit. Isidore, in his *Origines*, (xvi. 7.) with a sagacity beyond the days in which he wrote, ridicules such absurd fancies as some of those just mentioned, *quod credere non Fidei sed superstitionis est.*

Jasper, יָשָׁפָּר, is the third stone in the fourth row of the High Priest's breastplate. (*Exodus*, xxviii. 20.) In

JASMI-
NUM.
—
JASPER

JASPER. the *Revelations*, (iv. 3.) He who sate upon the throne is said to be "to look upon like a jasper," ὁμοίως ὁράσει λίθῳ ἱάσπιδι; and again, the light of the new Jerusalem is described "like unto a stone most precious, even like a Jasper stone;" "the building of the wall," also, and "the foundation," were of Jasper. On all these passages the commentators have indulged very plentifully in mysticism, and on those from the *Apocalypse* have furnished St. John with numerous reasons for his selection, which it is little probable were ever in his contemplation.

By recent Mineralogists Jasper is classed as a subspecies of rhomboidal quartz; five kinds are enumerated, of which the Egyptian is most rare.

JASSUS, in *Zoology*, a genus of *Hemipterous* insects, belonging to the family *Cicadidæ*, established by Fabricius, from the *Cicadæ* of Linnæus.

Generic character. Beak longer than the head, of two joints, the first short, and hid at the base by the rounded coriaceous hood; lip scarcely any; *antennæ* crest-like, with the first joint rather thicker than the rest.

Fallen, in his work on the *Hemiptera*, has kept this genus, but has changed its name to *Jasse*; he adds, that the crown is linear, short, as broad as the *thorax*; legs covered with small spines. These insects live in gardens, especially amongst flower-pots; they are very agile, and leap like the other *Cicadæ*. The type of the genus is *J. lunis*, Fabricius, figured by Panzer, *Faun. Germ.*, part vi. tab. 23. and part xxxii. tab. 10.

JATROPHA, in *Botany*, a genus of the class *Monocia*, order *Monadelphia*. Generic character: male flower, corolla, of one petal, funnel-shaped; stamens ten, the alternate five short: female flower, corolla, petals five, spreading; styles three, two-cleft; capsule three-celled.

Seventeen species, natives of tropical climates.

J. manihot, native of the West India Islands, is the celebrated cassava root, the juice of which is a deadly poison, but the farinaceous portion, after due preparation, is one of the most nutritious substances known.

JAVEL, to *jarble*, to wet, to bedew; as by walking in long grass after dew or rain. Brocket. *Jarbled*, daggled. North. Grose.

The etymon, like the signification of the term, (says Jamieson, in *v. Javel*.) must be left uncertain.

For then ye wyl be wroken
Of euery light quarel
And cal a lord a *iauel*.

Shelton. The Boke of Colin Clout.

How much more abhominable is that pieuish pride in a lewde vnthriftye *iauell*, that hath a purse as peniles as any pore pedler, and hath yet an hert as high as mani a mighti prince.

Sir Thomas More. Workes, fol. 1272. *A Treatise vpon the Passions.*

Now, when—as Time flying with wings swift,
Expir'd had the terme, that these two *iavels*
Should render vp a reckning of their trauels
Vnto their master.

Spenser. Mother Hubbard's Tale.

But the right Gentle Mind [Sir P. Sidney] would bite his lip,
To hear the *jauell* so good men to nip.

JA'VELIN, } Fr. *javeline*, *javelot*; It. *giavellotto*;
JA'VELINIER, } Sp. *javalena*, (which latter Delpino
JA'VELOTTIER. } calls a boar-spear, and Skinner thinks
may be from the Sp. *javal*, a wild boar.) Spelman
has *gaveloc*, *baculi vel teli genus*: Kilian, *gavelota*.
Fland. i. jaeliine, *tragula*: and Benson, *gaselucas*,

hastilia. *Gafflak* was a kind of dart (*jaculi genus*) JAVELIN: among the ancient Suio-Goths; *gafflas*, also, in A. S. is *furcæ*, forks. These resemblances may be merely JAUNCE casual, and *javeline* be (as Minshew says) *q. jaculine*, from *jaculari*, to throw. Cotgrave calls it

A weapon of size between the pike and the partisan.

And many of them from vnder the chariots and from among the wheles, did thrust at our menne with pikes and *jauelins* (*tragulas*) and wounded them.

Arthur Goldyng. Cæsar. Commentaries, book i. fol. 20.

When his citizens had permitted and granted unto him [Pittacus] to haue and enjoy those lands which he had conquered from the enemy, as much as he would himselfe; hee stood contented with so much, and no more as lay within one fling, or shot of the *javelin* which he lanced himself.

Holland. Plutarch, fol. 309.

When the armie was thus ordred in battaile array into those bands and squadrons, the *javeliniers* foremost of all began the fight.

Id. Livius, fol. 286.

The spearmen or *javelottiers* of the vaward, and the principes of the middle ward, who stood readie armed in guard for the defence of the pioners, made head and received them with fight.

Id. Ib. fol. 264.

But lest new wounds on wounds o'erpower us quite,
Beyond the missile *javelin's* sounding flight,
Safe let us stand; and from the tumult far,
Inspire the ranks, and rule the distant war

Pope. Homer. Iliad, book xiv.

Their arms were short *javelins*, small shields of a slight texture, and great cutting swords with a blunt point, after the Gaulish fashion

Burke. An Abridgment of English History, ch. xi.

JAUMEA, in *Botany*, a genus of the class *Syngenesia*, order *Æqualis*. Generic character: calyx roundish, imbricated, with nearly round scales, disposed in a triple series; receptacle naked; down short, plumose.

One species, *J. linearis*, native of the neighbourhood of the mouth of the River of Plate.

JAUNCE, } Skinner says, *strenuè ambulare*,
JAUNT, } from the Fr. *jancer*, which, after Cot-
JA'UNTY, } grave, he interprets, to stir an horse
JA'UNTINESS, } in the stable till he swart (sweat)
JAUNTE'E. } with all; or, Cotgrave adds, as our to
jaunt; (an old word.) To *jaunt* is (as in common usage)

To make short, flighty excursions; to flit to and fro; to move airily, lightly, giddily about. And *janty*, or *jaunty*,

Flighty or fluttering; airy, light; moving lightly, airily.

Then afterward he was set vpon an vnbroken coult with his face to the horse tayle, and so caused to ride a gallop & *iaunted* til he were breathlesse.

Bale. Pageant of Popes, fol. 127.

————— I was not made a horse

And yet I beare a burthen like an asse,
Spur-gall'd, and tyr'd by *iauncing* Bullingbrooke.

Shakspeare. Richard II. fol. 45.

GUARD. 'Las I'm weary with the walk,
My *jaunting* days are done.

Beaumont and Fletcher. Wit at several Weapons, act iv. sc. 1.

Our Saviour meek and with untroubled mind
After his aery *jaunt*, though hurried sore,
Hungry and cold betook him to his rest.

Milton. Paradise Regained, book iv. l. 402.

NRA. I am weary, giue me leaue awhile,
Fie, how my bones ake, what a *jaunt* haue I had.

Shakspeare. Romeo and Juliet, fol. 63.

Then a fresh maggot takes them in the head,
To haue one merry *jaunt* on shore
They'd not be fetter'd-up, they swore.

Yalden. Fable 9. The Sea and the Banks.

JAUNCE.

JAUN-
DICE.

The most fruitful in genius's is the French nation; we owe most of our *janty* fashions now in vogue to some adept beau among them.
The Guardian, No. 149.

I felt a certain stiffness in my limbs, which entirely destroyed that *jauntyness* of air I was once master of.

Spectator, No. 530.

Spring, which is now in full vigour, and every hedge and bush covered with flowers, rendered our *jaunt* delightful.

Swinburn. Spain, let. 30.

Palmer! Oh! Palmer tops the *janty* part.

Churchill. The Rosciad.

A bag-wig of a *jaunt* air,
Trick'd up with all a barber's care,
Loaded with powder and perfume,
Hung in a spendthrift's dressing-room.

Smart. Fable 16.

JA'UNDICE, } Fr. *jaunisse*, from *jaune*, yellow.

JA'UNDICED. } The *yellowes* (says Minshew) which is an overflowing of the gall over the whole bodie.

But wheras he [the Pope] was long before sicke of the *yelow* *iaundise*, then the disease began to worke so sore vpon him that he died the twentye daye after the election.

Bale. Pageant of Popes, fol. 196.

Varro saith, that the yellow *jaundise* was called a king's disease, (*regius morbus*), or a sicknesse for a king, because it was cured ordinarily with this honyed wine called mulse.

Holland. Plinie, vol. ii. fol. 136.

We find in common experience, that we apprehend things according to our own prepossession; *jaundised* eyes seem to see all objects yellow, blood-shotten, red.

Hall. Works, vol. iii. part iii. sec. 2. *Episcopacy by Divine Right*.

And Jealousy, the *jaundice* of the soul.

Dryden. The Hind and the Panther, part iii.

The optics of some are so dimmed and overclouded by the mists of error and prejudice, that, like a *jaundiced* eye, they cannot see the kalon in its true colours.

Search. Light of Nature, vol. i. part ii. ch. xxiv.

The JAUNDICE is variously termed by Medical Writers. *Icterus*, from the bird of that name, the golden thrush, concerning which Pliny has recorded a curious belief. "A Bird there is called in Greeke *Icterus*, of the yellow colour which the fethers carrie, which if one that hath the Jaundice doe but looke upon, he or she shall presently be cured thereof, but the poore Bird is sure to die for it." (*Holland*, xxx. xi. *Ed. Hard.* 28.) *Regius Morbus*, for the reason assigned by the same writer from Varro, which we have cited above; and in which Celsus agrees with him by prescribing rich and royal fare for its cure. *Arcuatus*, or *Arquatus Morbus*, because the skin is coloured like a rainbow, *a colore arcûs cælestis æmulo*. *Aurigo*, from the golden (*aureo*) hue which it produces. And, lastly, by Paracelsus, who was fond of a peculiar nomenclature, *Leseoli Morbus*, from a salt, *leseolus*, which he successfully employed in treating it.

Jaundice arises from an obstruction of the discharge of the bile into the bowels, and its return into the blood by the absorbents. This may be occasioned by the passage, through the ducts, of concretions formed in the gall bladder, and called gall-stones; a process often attended with considerable pain in the pit of the stomach, anxiety, restlessness, nausea, and spasms; it is of uncertain duration, sometimes being over in a few hours, at others lasting even for weeks. The discoloration of the skin, which commences at an early period of the attack, continues long after its more violent symptoms have disappeared. Indolent and inactive habits are among the chief causes of this affection. The ducts may also be obstructed by thickened bile;

or they may be compressed, an effect often produced by sedentary employments. This compression is most to be dreaded if it arises from any tumour of the liver. They are also exposed to spasmodic constriction and to a thickening of their coats, either of which causes may produce this disease.

Relapses are of common occurrence in Jaundice, and medicine appears to possess little efficacy. Frequent and gentle exercise, particularly on horseback, warm bathing, attenuating and aperient diet, all are useful; and much attention should be paid to the exhilaration of the patient's spirits, which are proverbially depressed. Opium has been sometimes largely given. Emetics and bitter purgatives, or where inflammation has been produced or apprehended, blisters and blood-letting are among the received remedies. The Acids, especially dilute nitric Acid, have had strong advocates; and numerous attempts have been made to act upon the gall-stones themselves by solvents. Among these, a decoction of grass is recommended by no less a name than that of Van Sweeten.

Few diseases have had the fate of meeting with more fantastical remedies than those which the Ancients set down for the Jaundice. The reader may be amused with a few which we shall borrow from Pliny. It is cured by snuffing up the fumes of *Elaterium*, the juice of the wild cucumber; by the seeds of the wild gourd, if followed up by plentiful draughts of honeyed water; by leeks; by garlick in wine; by an enema of beet-root; by a decoction of cicory in honeyed wine; by colewort, parsley seed, basil, mint, cummin; by an electuary made from orange seeds and honey; by dock-water, horehound juice, French nard, hyacinth seed, chamomile, maiden-hair, asphodel, chick-peas; by hazel-nuts, taken in vinegar with wormwood seed; the root and seed of wild myrtle, groundsel, liverwort, centaury, betony, vervain, cinquefoil, coltsfoot, hyssop, and aloes. These are simple prescriptions, but what shall we say to some that follow? "The ashes of a Dog's head calcined, taken in honey'd wine;" "earthworms in honey'd vinegre with myrrhe;" "the brains of a Partridge, Eagle, or other birds of prey, taken in three cyaths of wine;" "the ashes of dates, those also of the entrails of Stockdoves given in honey'd wine to the quantitie of three spoonfuls, are soveraigne in this maladie; likewise the ashes of Sparrows, burnt in a fire made of vine wood;" "moreover, it is said, that a Hen with yellow feet is very good therefore; in case the said feet be cleansed and washed first in faire water, afterwards bathed and rinsed in the wine that the patient is to drinke." "Harts horne burnt and reduced into ashes is a very proper remedy, so is the bloude of an Asse fole drunk in wine." Pliny must recount in his own words the last prescription which we shall cite, which for nauseousness and extravagance, we imagine, may fairly challenge the whole Pharmacopœia; *item fimum asinini pulli quod primum edidit a partu, datum fabæ magnitudine e vino, medetur intra diem tertium. Eadem et ex equino pullo similiterque vis est.* (xxviii. 64. *Ed. Hard.*)

land.

IBIS.

IBIS, a bird so called in Greek and Latin; "Of
stiffe legs and a long bill, which profiteth much the
country of Libia in killing serpents, and therefore
worshipped among the Egyptians." Minshew.The like devise to this, namely of clystres, we learned first of a
foule in the same Ægypt which is called *ibis*, (or the blacke storke.)
This bird having a crooked and hooked bill, useth it instead of a
syringe or pipe, to squirt water into that part, whereby it is most kind
and holsome to void the dounge and excrementes of meat, and so
purgeth and cleanseth her bodie.Holland. *Plinie*, vol. i. fol. 210.IBIS, Lacepede; *Ibis*. In *Zoology*, a genus of ani-
mals belonging to the family *Longirostres*, order *Grallæ*,
class *Aves*.*Generic character.* Beak arched, long, slender,
thick at the base, and quadrangular, rounded at the tip,
which is obtuse; nostrils linear, extending from the
root to the tip of the beak, and dividing it into three
portions, of which the upper is the broadest and flat-
tened; head and throat bare, the latter and the crop
expansile; legs longish and four-toed, the front webbed

VOL. XXIII.

at their base as far as the first joint, the hind toe very
long, all provided with claws, that of the middle toe in
some smooth, in others serrated, on its inner edge;
wings of moderate size, the first quill shorter than the
second and third, which are the longest of all.The genus *Ibis* has been frequently confounded
with the *Tantali*, *Scolopaces*, and *Numenii*: it is distin-
guished from the last by the bareness of the head
and throat, which in them is feathered; from the *Sco-*
lopaces by the quadrangular form of the base of the
beak, which in them is round: and from the *Tantali* by
the same circumstance and its slenderness, as in them
it is triangular and very strong. Ibises are found in all
parts of the world, except Australia, but more especially
in warm climates, from whence they sometimes migrate,
and are occasionally met with in Germany, Holland,
and England. They feed upon insects, worms, testa-
ceous animals, and sometimes even on small fishes.
Cuvier imagined that the Ibises occasionally fed on
snakes, in consequence of having found what he consi-

3 s

JAY.
—
IBIS.

IBIS.

pered to be the scales of those animals in an Ibis mummy. This, however, is denied by Savigny, for the following reasons: viz. that according to the account of Herodotus, the intestines were removed prior to embalming; that snakes were among the number of sacred animals, and might, therefore, have been subjected to the same funeral honours as the Ibis; that he (M. Savigny) had found in an Ibis mummy not the remains of the viscera, but those of golden flies, beetles, and a scaurus, whence he believes that Cuvier might possibly have been mistaken, and more especially that the remains which Cuvier had met with presented no appearance of digestion, which is a strong presumption against his opinion; and that the organization of the Ibes is not such as to adapt them for destroying serpents.

The Ibes perform a powerful and elevated flight, extending their neck and legs horizontally with their body, and occasionally uttering hoarse, bass croakings. When they settle, they are observed huddling close together, and for hours employed raking up the mud with their beak, advancing very slowly, and not with the rapidity of the Curlew; and while thus engaged they usually rest upon one leg only. They build mostly on high trees, and feed their young in the nest till they can fly.

I. Falcinellus, Tem.; *Scolopax Falc.*, Lin.; *le Courlis Vert*, Buff.; *l'Ibis Noir*, Savigny; *El Hareiz* of the Arabs; *Ayron Negro* of Italy; *Bay and Glossy Ibis*, Lath. This species is nearly two feet in length, and varies much in its plumage at different ages; in the three-years old bird the head is of a blackish red, the neck, chest, upper part of the back, bastard wing and under parts bright rusty red; back, rump, wing-coverts, quills of the wings and tail greenish black, glossed with bronze and purple; the beak greenish black, and brown at the tip; the naked ocular circlet green encompassed with grey; legs brownish green. It is then known as the *Tantalus Igneus* and *Falcinellus* of Gmelin. In such birds as have not reached three years, the feathers of the head, neck, and throat are brownish black in the middle, and edged with white; the under part of the neck, the chest, belly, and thighs, ashy black; the upper part of the back and the scapulars ashy brown; the glossings of the wings and tail less brilliant. Whilst in the first year the general plumage is more ashy, and the white edges of the feathers much broader than subsequently. They build their nests in Asia, and are found on the borders of streams and lakes in flocks of thirty or forty; they migrate periodically to Egypt, and, arriving there later than the White Ibis, stay there also later. In their passage they are numerous in Poland, Hungary, Turkey, and the Greek Archipelago; they occasionally visit the banks of the Danube, Switzerland, and Italy, and, but more rarely, England and Holland.

I. Religiosa, Cuv.; *Tantalus Æthiopicus*, Lath.; *Abou Hannes*, Bruce; *White Ibis*. About the size of a fowl; the head and neck bare, the skin of which is black; the body white; the primaries of the wings tipped with shining ashy black, among which the white forms oblique notches; the secondaries bright black, glossed with green and violet, the barbs of the innermost three or four long and silky, cover the rump, and falling from above the tips of the wings hide part of the tail, of which the quill feathers are white, and thus is produced the crescent-like mark on the rump noticed by Plutarch. (*De Iside et Osiride*.) When young, this species has the neck and throat sparingly covered with

small white feathers, and the top of the head and occiput have other longer and lustrous black feathers, of which some are edged with white, and are sufficiently long to form a crest on the occiput had the bird power to raise it; these, as the bird advances in age, fall out, and, as has been before mentioned, the head and neck become bare. From this circumstance M. Savigny imagines that the bronze bird figured by Middleton in his *Antiq. Monum.*, Tab. x. p. 129, is not so very distant from the Ibis as Cuvier seems to think. The White Ibis arrives in Egypt about the time that the inundation of the Nile commences, its numbers increasing or diminishing with the increase or diminution of the waters, and it migrates about the end of June, at which time, Bruce observes, it is first noticed in Ethiopia. The time for shooting them is when the Nile subsides, but nets also are set for them, and in Autumn many are found in the marshes of Lower Egypt and about Damietta with their heads cut off. This species does not collect in large flights; Savigny has observed not more than eight or ten together, and sometimes only one.

This as well as the last species are the birds which were adored by the ancient Egyptians, and of which numerous mummies are found. It is very remarkable that, with the excellent description of the *White Ibis* given by Herodotus before their eyes, Naturalists so long described, as that bird, individuals which are totally different. The bird described by Perrault as the *Ibis Blanc*, by Brisson as *Ibis Candida*, and by Linnæus as *Tantalus Ibis*, for the present species, differs from it in having the ridge of the beak rounded, its tip slightly grooved on each side, and the nostrils at the root. Consequently it is not an Ibis, in which the beak is not grooved, and the nostrils extend nearly from the base to the tip of the beak. In point of size, too, they differ very greatly; the *Tantalus Ibis* of Linnæus is as large as a Stork, but the true Ibis does not exceed the size of the common Fowl. In reference to this point, Hasselquist, in his *Iter Palestinum*, is more correct; he says, p. 249, *magnitudo gallinæ seu cornicis*; and at p. 250, *vasa quæ in sepulchris inveniuntur, cum avibus conditis, hujus sunt magnitudinis*; yet he has mistaken a little Black and White Heron for the true Ibis. Belon, in his *Histoire Naturelle des Oiseaux*, lib. iv. c. 9, insists upon the White Ibis being merely a Stork; an opinion, Cuvier says, concerning which *aussi personne n'a-l'été de son avis en ce point, excepté les apothicaires qui ont pris la cigogne pour emblème, parce qu'ils l'ont confondue avec l'Ibis auquel on attribue l'invention des clystères*.

I. Melanocephala, Vieill.; *Tant. Melan.*, Gmel.; *Saunghill* of India; *Black-headed Ibis*. Entirely white, except the beak, head, and legs, which are black, as are also a few spots on the back of the head and the upper part of the neck. Latham states that the feathers of the rump are often used, as those of the Ostrich, for head-dresses. It is found on the banks of the Ganges, and may, perhaps, be only the last species during its migratory progress.

I. Cristata, Vieill.; *Tant. Crist.*, Gmel.; *Crested Ibis*. Is distinguished by a tuft of long white and green feathers implanted in the back of the neck; the forehead and upper part of the head green; the rest of the neck, back, and front of the body, rusty red; the wings white; beak and legs yellow. The female has a shorter crest, the wings tinged with grey. Native of Madagascar.

I. Calva, Vieill.; *Tant. Calv.*, Gmel.; *Bald-headed*

IBIS.

IBIS.

Ibis. Rather larger than the European Curlew; its head, the upper part of the neck, and front of the throat naked, forming at its upper part a kind of fold, about five lines broad, of a deep red; the general colour of the plumage is black, glossed with green and purple. Found at the Cape of Good Hope and in the marshy districts of Africa.

I. Fuscata, Vieill.; *Tant. Manillensis*, Gmel.; *Manilla Ibis*. Has the plumage reddish brown, the eyes encircled with a greenish skin, which is also the colour of the beak, and the legs red.

I. Hagedash, Vieill.; *Tant. Hag.*, Gmel.; *Hadelde* of the Cape of Good Hope. A little larger than the common Fowl; has the beak five inches long, red above and black beneath; the upper part of the neck yellow; wings brown; tail cuneiform, and twice as long as the beak; feet and legs black.

I. Calchoptera, Vieill.; *Copper-winged Ibis*. Head, neck, chest, and belly grey; a narrow white stripe extending from the ear down the neck; back, wing-coverts, and rump greyish brown, with bronze glossings; alar and caudal quills blue, changing to deep violet; legs brown; tarsi and toes red.

I. Rubra, Vieill.; *Scol. Rub.*, Lin.; *Tant. Rub.*, Gmel.; *Scarlet Ibis*. The whole plumage scarlet, except the tips of the alar quills, which are black; beak naked, part of the cheeks, legs, and feet pale red. In the female, the feathers on the head and front of the neck are tipped with grey, with greyish red on the top of the neck and fore part of the back; the rest of the back and rump and wing-coverts bright red; under parts paler; tips of the first two alar quills azure blue. Before the Scarlet Ibis attains its full age, its plumage varies very remarkably; when first hatched, it is covered with a blackish down, which then becomes ash, and afterwards white; subsequent to the second and third moult, the scarlet begins to appear on the back, and extends thence to the neck, wings, and under parts. The *Tant. Fusc.* of Gmelin is considered by Temminck as the young of this species, and Vieillot is inclined to believe that the *Tant. Albus* of Latham is the same. The Scarlet Ibis is found in the hottest parts of America in large flocks, and frequently the old are separated from the young birds; they fly rapidly, but rarely, except at morning and evening, in search of food; they are not very shy, and can easily be tamed.

I. Mexicana, Vieill.; *Tant. Mex.*, Gmel.; *Mexican Ibis*. Face covered with a reddish skin; the feathers of the head and neck brown, white, and green; those of the back green and black; under parts reddish brown; wings glossed with green and gold; legs blackish, and feet blue. Found on the lakes of Mexico.

Some other species are mentioned by Vieillot, for which the reader is referred to his Work.

See Linnæi *Systema Naturæ* a Gmelin; Buffon, *Histoire Naturelle*; Illiger, *Prodromus Mammalium et Avium*; Cuvier, *Règne Animal*; Vieillot, *Histoire Naturelle des Oiseaux de l'Amérique Septentrionale*.

We shall here dwell a little longer upon the ancient accounts of the Ibis. The LXX have rendered the Hebrew יִשְׁכִּי (Lev. ch. xi. v. 17.) by *ἰβίς*. The English version, following Junius and Bochart, interprets it "the great owl." A similar rendering of the same word occurs *Isaiah*, ch. xxxiv. v. 11. In Egypt, says Herodotus, (ii. 64.) whoever kills an Ibis, even involuntarily, is put to death without hope of pardon; and this asser-

IBIS.

tion is corroborated by Diodorus Siculus. (i. 83.) The reason for the great value assigned to these Birds is explained by the elder Historian afterwards as follows. Every Spring, it seems, they were in the habit of encountering certain winged Serpents, who attempted to make their way through a defile opposite the city Butus, by which Arabia is separated from Egypt. Here they killed the invaders; and Herodotus, who visited the spot, saw huge piles of the Snakes' bones and spines (*ἀκάνθοι*) scattered about in all directions, as clear testimonies of the valour of the Ibis. The Bird, as he describes it, is wholly black, with feet like a Stork, a beak extremely hooked, and in its size equal to a *Crex*, perhaps our English Crake or Curlew. There is another kind far more common than these Snake-killers, which has the head and neck unfeathered, and the wings white. (75. 6.) Polyænus, in his *Stratagemata*, (vii. 9.) has given a curious example of the respect paid by the Egyptians to the Ibis. When Cambyzes was besieging Pelusium, the garrison made so strenuous a resistance, that the invader was nearly beaten off by the volleys from their catapults. The Persian, however, renewed his attack under unexpected leaders. He drew up in his first rank a large band of Cats, Dogs, Sheep, and Ibexes, all of them personages whom the Egyptians regarded with the most superstitious veneration. They dared no longer hurl their stones and fire at these Divinities, and under the protection and by the auspices of his enemies' Gods, Cambyzes thus succeeded in storming their city.

Cicero twice corroborates the inviolability of the Ibis; (*de Nat. Deor.* i. 29. *Tusc. Quæst.* v. 27.) but in repeating the story of the winged Serpents, he makes them swarm from the Desert of Libya. (*de Nat. Deor.* i. 36.) Ælian (*Hist. An.* ii. 38.) gives both accounts. Ammianus Marcellinus (xxii. 15.) and Philo (*de Anim. prop.* xvi. 11.) are the only two other authors who mention the winged Serpents; and the former adds a huge marvel relative to the Ibis, *quas aves per rostra edere fetus accepimus*. Diodorus Siculus (i. 87.) makes the Ibis a destroyer of Snakes, Locusts, and Caterpillars; and he is followed by numerous other writers. Josephus mentions them as part of the baggage which Moses carried with him as a preservative against Serpents, when he commanded the Egyptian army during an inland expedition against the Ethiopians. (*Ant.* ii. 10.)

Ælian (*Hist. An.* ii. 35.) and Pliny (as we have cited him above) have ascribed to the Ibis a most useful medical invention; and the former, on the authority of the Egyptian embalmers, has advanced a statement, to which he does not very readily assent, that the intestines of this Bird extend to the incredible length of 96 cubits. (x. 29.) That which was procured from the Grand Signor, as an Ibis, by Louis XIV., and is described by Perrault in the IIIrd volume of the *Mém. de l'Académie des Sciences*, part iii. p. 61. measured in this department only 4 feet 8 inches, (French.) This Bird (*Ibis Blanc*) lived many months at Versailles, and, as if out of spite to Ælian, (as we shall presently have occasion to remark,) ate very heartily. It was dissected after death, and its anatomical description is given in very full detail. Plutarch (*de Solertiâ Animal.* vol. ii. p. 974, *Ed. Xyl.* and *de Isid. et Osir.* 381.) asserts, that in its ablutions the Ibis employs salt water, and that the Priests of Egypt, in performing their lustrations, always select such water as an Ibis has drunk from, on account of that Bird's extreme fastidiousness in regard to the

IBIS.

purity of its beverage. A few other particulars may be collected from the same author, namely, that an Ibis just excluded from the shell weighs two *drachmæ*, that is exactly as much as the heart of a new-born infant; that when its legs are extended, the lines joining their extremities with the beak make an equilateral triangle; (*Sympos.* iv. p. 670.) and that it stands in the form of the first Egyptian letter. (*Ibid.* ix. p. 738.) One other fact, in order to escape misinterpretation, we shall present in his own language: τὴν Ἰβιν λέγουσιν, ὅταν παλαιὰ γενομένη, τὸ βρομῶδες ἀποπνεύσῃ καὶ θαλερὸν, εὐωδέστερον τὸ ἀρωματικὸν ἔσχειν. (*An seni sit gerenda Resp.* p. 791.) In conformity with the above assertion, the flesh and entrails of that specimen which was dissected by the *Académie des Sciences*, are described as fresh and agreeable to the smell more than 15 days after death. In corroboration, also, of this posthumous sweetness, the close of a passage in Cicero, to which we have already referred, has often been cited; but, as will be plain upon a glance at the context, with no little misapplication. Cicero remarks, *avertunt pestem ab Ægypto, cum volucres angues, ex vastitate Libyæ vento Africo invectas, interficiunt, atque consumunt. Ex quo fit ut illæ nec morsu vivæ noceant, nec odore mortuæ.* Illæ here plainly points out the *snakes*, the stench of which, if they were not devoured by the Ibises, might perhaps breed pestilence.

But to return to Ælian. The Ibis, he says, is sacred to the Moon, (Σελήνη,) for it sits upon its eggs (τὰ ὡὰ ἐκγλύφει) as many days as that Goddess waxes and wanes. This Bird never quits Egypt, and if any attempt is made to force it from its native soil, it prevents the violence by voluntarily starving itself to death; an assertion which is incorrect, provided Perrault's bird was a true Ibis. It walks gravely and delicately; (ἡσυχῇ καὶ κορικῶς) (*Hist. Anim.* ii. 38.) or, as Aldrovandus renders the passage, *magnâ tarditate graditur nec eam quispiam ocyus ingredi videat quam molli gradu et tardo, more lautarum mulierum.* (*Ornithol.* xx. 3.) When its head and neck are buried in its breast-feathers, it seems heart-shaped, and its legs, while it walks, are a cubit asunder. It is beloved by Mercury the Parent of language, ἐπεὶ εἶκε τὸ εἶδος τῇ φύσει τοῦ λόγου, because, as Ælian continues still more mystically and, if possible, more unintelligibly, τὰ μὲν γὰρ μέλανα ὠκύπτερα τῷ τε σιγῶμένῳ καὶ ἔνδον ἐπιστρεφόμενῳ λόγῳ παραβάλλοι τοῦ ἄν' τὰ δὲ λευκὰ τῷ προφερομένῳ τε καὶ ἀκουομένῳ ἤδη, καὶ ὑπὲρ τῆς ἔνδον καὶ ἀγγέλλω ὥς ἂν εἴποις. It is very long-lived, and the Priests of Hermopolis pretend to show one which is immortal. But in this assertion neither Apion, to whom it was exhibited, nor Ælian, who relates the exhibition, place any confidence. Its power of digesting Snakes and Scorpions arises from its extreme heat. It enjoys excellent health, although nothing is so filthy as to escape the inquiry of its beak. In order to frustrate the attack of Cats it builds in Palm-trees, the bark of which presents great difficulties even to the agility of those crafty animals. (x. 29.)

Strabo, following Herodotus, distinguishes two genera, both known in Egypt and separated by colour; one like the Stork, the other wholly black. The streets of Alexandria, he adds, are thronged with these most tame and gentle Birds, which are both of use and of annoyance to mankind. They are useful because they devour Snakes, carrion, and offal, and thus act the part of scavengers; but it is very difficult for any article of food to escape their gluttony or their defilement. The

Ibis is a most ravenous and most unclean animal, or, as the powerful and untranslatable Greek expresses it, παμφάγον καὶ ἀκάθαρτον. (xvii. p. 566. *Ed.* 1587.)

Aldrovandus (*loc. cit.*) collects many of the particulars which we have given above, and countless others of the same kind; among these, that if a Crocodile be stroked with the feather of an Ibis it sinks into a state of torpor and lethargy; a similar effect, as it were by fascination, is produced on Serpents; on the other hand, the gall of a Hyæna is fatal to this Bird itself. He adds also sundry reasons, which it is not worth while to repeat, why Ibis became a term of reproach, and was used as such by Callimachus against Apollonius Rhodius, (*Suidas ad v. Καλλίμαχος*), and by Ovid against Corvinus or Hyginus, if either Corvinus or Hyginus indeed were the subject of the Poem of the Roman Exile. The reader who cares about this last question, will find it amply discussed in the *Prolegomena* of Boessius, printed in the IVth Volume of Burmann's *Ovid*.

Shaw, in his *Travels* through many parts of Barbary and the Levant, states, that, in his time, the Ibis was very rare; he describes it as the *Emseesy*, or *Ox Bird*, about the size of a Curlew, with a white body and red beak and legs, consequently neither a Tantalus nor an Ibis, although Gmelin has placed it among the former. Pocock considers it to be a species of Crane, and mentions having seen very many of them, which were of a grey colour, feeding together on the islands of the Nile. Maillet, in his *Description d'Égypte*, part ii. p. 23. states that the Ibis and the *Fowl of Pharaoh* were the same; and others have believed it to be the *Gypætus Barbatus*, a rapacious bird, and very different from the Ibis.

Mr. Bruce (*Appendix*, 173. vol. v.) states that we have lost the ancient Ibis; but that he is convinced of its identity with a Bird which he describes as the *Abou Hannes*, or *Father John*; so called, because it appears on St. John's day, the precise time when the fresh water of the Tropical rains is known in Egypt to have first mixed with the Nile, and to have made it light, sweet, and exhaleable. He disputes the existence of Serpents in any abundance, at present, in Egypt, and he founds a belief, upon the concurrent testimony of so many writers as to this fact in earlier times, that at the period in which Egypt was more largely inhabited there was much more copious irrigation. Hence there were more Snakes; but as, from depopulation and neglect, the Desert enlarged its boundaries, so the Snakes, the waters, and the Ibises all disappeared simultaneously. The last-named retired into Ethiopia, in the lower part of which, in a hot country full of stagnant pools, Mr. Bruce found them as the *Abou Hannes*. He contends that Buffon's White Ibis of Egypt has none of the characteristics of the Bird it is intended to represent; that none such are known in Egypt, and that all which are found in the Catacombs are black and white, just as they are described by Historians. Savigny concurs with Bruce in believing the *Abou Hannes* to be the White Ibis of the Ancients. To his learned Work, *Hist. Naturelle et Mythologique de l'Ibis*, we must direct our readers for a profound examination of almost every particular connected with the subject. His chief hypothesis is, that the Ancient Ibis did not, as we have before mentioned, in point of fact, destroy Snakes, but that the reverence attached to it by the Egyptians, arose from its return into their Country with the Etesian winds, at the commencement of the season of abundance. To this Essay may be added a Paper by Cuvier, in the *Annales*

IBIS.

IBIS. *de Musée*, 1804, which contains much valuable information.

ICACINA. Larcher, in commenting upon one of the passages of Herodotus, to which we have referred above, (ii. 66.) is, as usual, most virulent in his reflections upon Bruce. The account given of the Ibis by that enterprising and misused Traveller is represented to be *une de ces méprises qui lui sont ordinaires*. It is false, continues the learned Frenchman, that the Ibis no longer exists in Egypt, though it may be readily allowed that Bruce never saw one; for how could he be expected so to do, whose knowledge of the Country was confined to the timbers of the vessel in which he sailed? Larcher feels assured that Bruce never consulted, as he ought to have done, the *Mémoires de l'Académie des Sciences*; and with an amusing disregard of logic he concludes, that because that Society was an *illustre Compagnie*, and Louis XIV. was *un grand Prince qui a mérité à si juste titre le surnom de Protecteur des Sciences et des Lettres*, therefore, that the Bird sent by the Grand Signor was a veritable Ibis, and that such Birds abound, both black and white, in Egypt. Bruce, in Larcher's eyes, is equally ignorant in Classical Literature and Natural History. But the testimonies of many succeeding travellers, even when reluctantly given, as in the case of Mr. Salt, have corroborated Bruce's veracity in countless instances, in which it had become a fashion to doubt him; and it would have been well if the many writers who have endeavoured to make his name a by-word, had profited by the advice of a scholar whose memory is ever to be regarded with veneration; whom few have exceeded in patience of research, in extent and variety of learning, in sagacious application of knowledge; none in candid regard for the pretensions of others. The late Deau Vincent, while expressing his conviction of Bruce's general fidelity, marks it as a duty, "not to treat with ingratitude those who explore the Desert for our information."

Dr. Clarke, who was strongly impressed by these words, which he has cited, adds his own conviction in favour of Bruce. He has also given us a very interesting narrative of his visit to one of the Catacombs tenanted by the Ibis Mummies at Saccara. "The well by which it was entered," says the MS. Journal of Mr. Squires, cited in a note by Dr. Clarke, "is about six feet square; the sand and stones and broken pottery which are constantly falling render the descent (about 20 feet) extremely inconvenient. At the bottom of it is a small hole which, by those who are at all corpulent, is passed with very great difficulty; indeed, each time it is necessary to clear the sand from the hole which constantly fills up the entrance. Here, having taken off our coats, with candles in our hands, our faces to the ground, our feet foremost, and an Arab pulling our legs from within, we worked our way through a passage about 20 yards in length, until we arrived at the place in which the sacred birds are deposited. The whole is

excavated out of the solid rock, and of inconceivable extent. We did not wander far from the entrance, fearful of being lost in the labyrinth. To the right and left of the entrance are passages which, as you advance, branch off in various directions." "There," continues Dr. Clarke, "we were almost choked by sand, by a number of broken jars, and by a quantity of swathing and of embalming substances, looking like so much tinder and charcoal dust, which had been taken out of those jars. As we followed the intricate windings of these channels, we came at last to a passage ten feet in height and six in width, where the whole space was filled, from the floor to the roof, by the jars, in an entire state, as they were originally deposited. They were all lying horizontally, tier upon tier, after the manner in which quart bottles are often placed in our cellars. We took down several of them, but as fast as we removed one row, another appeared behind it, and, as we were told by the Arabs, such is their prodigious number, that if hundreds were removed, the space behind them would appear similarly filled up. The same appearance is presented at the extremities of all these galleries, the passage having been cleared only by the removal of the jars. We opened several of them in the pit. For the most part, the contents of all these vessels were the same, but there were some exceptions. Generally, after unfolding the linen swathing, we found a Bird resembling the English Curlew, having a long beak, long legs, and white feathers tipped with black. It is certainly the same bird which Bruce has described, called by the Arabs *Abou Hannes*. The jars all appeared to be of equal size, about 14 inches in length, of a conical form, and made after the same manner of coarse earthenware. A luting fastened on the cover; this luting has been described as mortar, but it seems rather to consist of the mud of the Nile." Mr. Squires says, "The pottery itself, although three thousand years old, appears as new as if it were of yesterday. We broke several of the pots and found some very perfect birds. We met with the wing of an Ibis having the feathers still on the pinions; as soon, however, as this was exposed to the air, the plumage fell to pieces and was lost." An engraving of the Jar, and of the Bird itself in its different stages of unrolment, is given by Pocock in his *Description of the East*, p. lxx. Another may be found in the VIth Volume of the *Recueil d'Antiq.* of Count Caylus, and specimens may be seen in the British Museum.

Dr. Clarke accounts for the existence of these Bird-Mummies in such vast numbers, on the authority of Ibn Washi, whose Work on *Antient Alphabets* has been translated by Mr. Hammer, and who is mentioned by Kircher under the name of Aben Vaschia. That Arabian Writer states that it was usual to embalm and bury an Ibis at the initiation of the Priests. (Clarke's *Travels*, 4to. 111. 166. 172.)

ICACINA, in Botany, a genus of the class *Pentandria*; order, *Monogynia*; natural order, *Olacineæ*. (Decandolle.) Generic character: calyx short, five-cleft; corolla, petals five, the interior of the base villose; anthers cordate, two-celled, cells bursting longitudinally;

style simple, incurved, the apex truncated; capsute one-celled, bursting at the apex.

One species, *I. Senegalensis*, a tree, native of Senegal.

exhibited in confectionary: and the splendred *iceing* of an immense
historic plumb-cake, was embossed with a delicious basso-relievo of
the destruction of Troy.*Warton. History of English Poetry*, vol. iii. p. 492. sec. 43.

I C E L A N D.

ICELAND, an Island in the Atlantic Ocean, on the
confines of the Polar Circle, situated between 63° 23' and
66° 33' North latitude, and between the meridians of
13° 15' and 24° 40' West of Greenwich. The area is about
40,000 square miles. This Island is by many supposed to
be the *Ultima Thule* of the Romans. Saxo Grammaticus
and Casaubon are the chief upholders of this opinion.
The hypothesis of Bochart, Mallet, and others, that the
name *Thule* was vaguely applied by that people to many
places on the Northern boundary of their Empire, does
not, it is evident, militate against the supposition thatthey were actually acquainted with the position of
this Island.The discovery of Iceland as first authenticated by
History, is due to the adventurous spirit of some Norwe-
gian and Swedish pirates. About the year 860, one
Naddodr was driven on the coast while sailing from
Norway to the Faroe Isles. Seeing the mountains
covered with snow, he called the country Snialand. A
Swede named Gardar circumnavigated the Island in
864, and from his own name called it Gardarholm.
Floke, a Norwegian, was the third adventurer to thisFirst dis-
covery

ICELAND. dreary land; he remained in it two winters, and from the quantities of ice which drifted into the bays from the West, he gave the Island the name which it still retains.

It appears, however, from the Icelandic Historians, that the Island had been previously visited, probably by fishermen from the British Isles. Some of the old Annals speak of the settlements of those strangers on the Island at the time of the Norwegian immigration. Others only mention the crosses, bells, and writings in the Irish language which were found there. The first Norwegian colony arrived on the Island in 874 under the guidance of Ingolf.

Christianity was introduced in 981, and formally adopted in an Assembly of the people in the year 1000. In 1261, the Icelanders, weary of internal dissensions, yielded up their political independence, and acknowledged the Sovereignty of the King of Norway. When Norway was annexed to Denmark in 1380, the Island was transferred without a murmur. This was the last political change in the History of Iceland.

Nature of the soil, &c. Iceland is a Country equally interesting to the Moral observer and to the inquirer into the phenomena of nature. Here we see the pleasing spectacle of a peaceable, Religious, and even a literary society, existing for centuries under all the disadvantages of soil and climate. But the physical characteristics of the Country are still more striking, though not more singular. Here there is no ground for debate between the Mineralogists of the Huttonian and Wernerian schools; the agency of fire is everywhere evident. No stratified rocks have been seen, nor any of which the igneous origin is generally contested. Lavas of different degrees of density, obsidian, pumice, greenstone, basalt, &c. are of most frequent occurrence. The only rocks that have no external mark of heat, are those called *trap* rocks. These are amygdaloidal, containing in their cavities zeolite, calcedony, calcareous spar, &c. But the lava, or *hraun*, covers a very large portion of this great Island; tracts of it are found in every direction. The most extensive fields are in the volcanic regions of Myvatn, on the North-East side of the Island. From that region to the interior extends the *Odâda Hraun*, or *horrid lava*, an interminable plain of gloom and desolation, impassable to travellers from the ruggedness of its surface, and from the many deep cracks and fissures which intersect it. The interior of Iceland, not less, perhaps, than 26,000 square miles, is a dreary, inhospitable waste, only partially known to the natives, who are sometimes obliged to explore it in search of strayed sheep, and for the most part presenting a dark, naked lava, without the slightest covering of vegetation. In the South lie the extensive tracts of melted rock about Thingvall, through which rents of 100 feet in width stretch to the length of several miles. Above these dark wilds rise lofty mountains, on whose summits the volcanic rocks are seen protruding from the eternal snows. The glaciers, or *yökuls*, cover a great portion of the Island. The most extensive is that called Klofa Yökul, lying behind the mountains of the East coast, and forming, with little interruption, a chain of ice and snow mountains, which are supposed to fill a space of 3000 square miles. The progressive movement of the glaciers is observed here as well as in Switzerland; and the *Moraine*, or rampart of *débris*, heaped together by its descent, has been seen in some places 60 feet high, and composed of large rocks. The glacier in the West

called the Snæfell, passes for the highest mountain in ICELAND. Tradition relates, that two English seamen ascended it in the XVIth century, one of whom perished in the enterprise; more recently Sir G. Mackenzie made the attempt, and when near the highest point, was prevented from proceeding further by a deep and impracticable chasm. He states the height to be 4558 feet. But the Danish officers recently employed in making a survey of the Island found the Snæfell to be 6862 feet high.

In the midst of these perpetual snows and glaciers Volcanoes. the proofs of active subterraneous fires continually occur. Most of the high mountains are volcanoes, slumbering, but not extinct. Hot springs and boiling fountains are found everywhere. The volcano of Krabla, Krabla. near Myvatn, is celebrated by its terrible eruptions between the years 1724 and 1730. The streams of lava which it vomited forth during that period covered several square leagues of country, and nearly dried up the lake. Katlegiaa, on the Eastern shore, is equally Katlegiaa. known by the fury with which it broke forth in 1755, when the shocks of earthquakes alarmed or desolated regions widely distant from each other. The rapid melting of the neighbouring glacier of the Myrdal indicated the increasing heat of the mountain. Some time after the fire burst out, and the melted ice poured down in torrents. Showers of pumice stone and columns of water were thrown out alternately; at the same time the shocks of earthquake were so violent throughout the whole Island that the inhabitants thought the hour of its destruction was arrived. The detonations of the volcano were heard at the distance of 30 leagues, and on the same day showers of ashes fell on the Isles of Feroe so as to render them totally black. These Islands are distant 100 leagues East South-East from Katlegiaa. Fifty farms were destroyed by this eruption, and the sea-shore exhibited incredible proofs of its violence, for promontories of rocks of pumice stone and lava, carried off with the broken ice, projected into the sea three leagues from the shore. These rocks still project above the sea, in places where fishermen formerly sounded 40 fathoms of water. The first recorded eruption of Katlegiaa took place in the year 900. Advancing further to the South we meet the great glaciers called the Skeiderâ and Skaptar Yökuls. Skeiderâ. The eruption which took place from the former of these in the year 1783, is one of the most tremendous recorded in the Annals of Iceland. Immense floods of lava spread over some of the best districts in the Island. The clouds of ashes, scattered far and wide through the atmosphere, impregnated the air with noxious particles. The waters were corrupted, the fish driven from the coasts, and famine and pestilence ensued. In fine, the miseries succeeding this volcanic eruption, destroyed in the space of two years above 9000 human beings, or a fifth of the population, 28,000 horses, 190,500 sheep, and more than 11,000 head of cattle. About a month before it took place a submarine volcano burst forth about 70 miles South-West from Cape Reykianess. and ejected such a quantity of pumice, that the surface of the Ocean was covered with it to the distance of 150 miles. This Island, called *Nyöe*, or New Island, was claimed by the King of Denmark, but ere a year elapsed it sunk beneath the water. Some concealed rocks still mark its position. Meteoric phenomena connected with these convulsions were widely visible. Mount Hekla, on the Southern coast, about 30 miles from the

ICELAND. shore, has obtained a degree of distinction among volcanoes, which is due rather to the frequency than the magnitude of its eruptions, of which there are 23 on record from the beginning of the XIth century, the last being that which took place in 1823. It was ascended in August, 1810, by Sir G. Mackenzie, Dr. Holland, and Dr. Bright, who found the summit to be a ridge of slags, some of which were warm; those below the surface were too hot to be handled, and the thermometer when placed among them rose to 144°. The height of Hekla is 5210 feet. The whole region between it and Krabla, 150 miles to the North-East, is an unknown desert. The view is bounded on the East and South-East by the glaciers mentioned above, and by the Eyafialla Yökul, 5500 feet high; towards the North-West are seen the towering glaciers of the Snæfell Yökul, which is also a volcano. Most of these mountains rise above the limits of perpetual snow, which is here about 2000 feet above the sea.

Rivers,
lakes, &c.

Between the irregular branches of these mountains and streams of lava, in the vicinity of the sea-coast, are the valleys in which the inhabitants have erected their dwellings. The population is confined to the fiords, or friths, round the Island. Some of the low mountains are covered with a coarse grass, affording summer pasturage for the cattle, but the only permanently occupied spots are along the shore. The rivers are numerous, and of considerable size, especially on the Northern side of the Island. There are also many lakes in the interior, the size and position of which are but imperfectly known; that called *Myvatn*, or the Gnat Lake, from the quantities of those troublesome insects which infest it, is thought to be the largest, having about 40 miles in circumference, though much reduced by the torrents of lava poured into it from Krabla. It is in general about four fathoms deep, with a bottom of rugged lava, cracked in many places, and spouting up jets of boiling water. In the vicinity of these hot fountains the trout are of a superior quality, and form the chief subsistence of the people who inhabit this coast.

The Geysers.

Springs, or jets of boiling water, are of frequent occurrence in Iceland, but those named the *Geysers*, or *raging* waters, have obtained the greatest celebrity, perhaps from their accessibility. The Geysers are situated about 30 miles North North-West of Hekla, in a plain covered with hot springs and steaming apertures. The Great Geyser rises from a tunnel-shaped basin, lined and edged with the siliceous depositions of the water. The pipe at the bottom from which the jet issues is about 10 feet in diameter, and the basin at its outer edge is about 56. The activity of the fountain is sometimes suspended a whole day, but in general the eruptions take place every six hours; a rumbling noise or loud report like that of artillery, with an agitation of the ground, prelude its exertions. The height to which the column of water is raised appears to vary very much at different periods. The Danish travellers Olafsen and Povelsen saw it reach an elevation of 360 feet. Von Troil and Sir J. Stanley estimated the height to be from 92 to 96 feet. A Danish officer, M. Ohlsen, measured the jet with a quadrant in 1804, and found it 212 feet. It is again reduced to 100 feet by Mr. Hooker, and to 90 by Sir G. Mackenzie; finally, Mr. Henderson, in 1815, saw it rise to the height of 150 feet. This last traveller having found that stones thrown into the pipe, so as to impede the eruptions of

steam, hastened the eruptions, made the experiment with the spring called the *Strockr*, or *Churn*, and saw with amazement the jet rise quickly to the height of 260 feet.

The hot springs near the inhabited parts are used by the inhabitants for economical purposes; food is quickly dressed over them, without acquiring any disagreeable odour. In some places huts are built over small fountains, in order to form steam baths, which are much resorted to as a luxury. In other parts of the Island are seen caldrons of boiling mud emitting sulphureous exhalations. In the valleys wherein these springs abound, the temperature of the ground is too high to allow snow to lie long on it, and the pasturage is consequently more abundant than elsewhere; when deep snow covers the higher tracts of these volcanic regions, so as to suppress the sulphureous exhalations, it is dangerous to enter the caves, which are then filled with mephitic vapours. Pestilential airs have been also known to issue from particular spots in the plains during the volcanic eruptions, instantly extinguishing life in all who had the misfortune to approach them. Mineral springs of many kinds, and of every degree of temperature, are found here; some highly impregnated with Carbonic Acid Gas are called by the people *ale-springs*, having, it is said, the property of inebriating.

Iron and copper are found in Iceland, but the want of fuel renders it impossible to turn the ores to account. The ancient forges are celebrated in some of the old Sagas; and traces of them still remain in the Western district, where iron ore is most abundant. The only mineral from which the people derive a revenue is sulphur, of which there appears to be an inexhaustible supply. Extensive mountains are incrustated to the depth of some inches with this substance, which, when removed, is again deposited in beautiful crystals, by the hot steam from below. The chief supply is obtained from the neighbourhood of *Myvatn*, and exported from *Husavik*, on the Northern coast, to the amount of 220 cwts. of refined sulphur annually. *Kriswick*, on the Southern coast, also exports it, but to a less amount.

Fossil woods, impregnated more or less with bitumen, are found here in abundance; and, if the people possessed more activity and enterprise, might be made to add considerably to their comfort. A bed of this *Surturbrand*, as it is called, extends through the whole of the North-Western peninsula, and is found in almost every part of the Island. It is, in fact a subterranean forest, impregnated with bituminous sap, and compressed by the enormous weight of the superincumbent rocks. Branches and leaves are so pressed together as to form a compact mass. The fibres and ramifications of each, however, may be distinctly traced. The leaves of birch and willow, of small size, are observable; but those of the poplar are most common. The *Surturbrand* is used by the Icelanders chiefly in their smithies, and in small quantities; the general want of fuel not having as yet actuated them to a bold invasion of these natural magazines.

Among the natural curiosities of the Island we must not forget to mention the Cave of *Surtur*, or the *Black*, the Northern Pluto. This cavern is situated to the South of *Arnavatn*, in the *Borgarfjord*. The Danish travellers Olafsen and Povelsen found it to be 839 fathoms in length; and, according to their account, it indisputably proves the operation of subterranean

ICELAND.

Metals.

Sulphur

Lignite.

Caves.

Basalts. ICELAND. fires, as it exhibits everywhere the channels through which the melted matter flowed. Basaltic columns are seen in many places, and the agency of Giants is always called in to explain their fantastic regularity. Along the shore, at the foot of the Snæfell, are the beautiful façades, caves, and towers of Stappen, in which the neatest cylinders are arranged in every variety of form. The name of *Stappen* will immediately recall that of *Staffa*; and Sir G. Mackenzie supposes them both to have signified *steep*, a term which certainly may be sometimes justly applied to basaltic rocks; but a Geologer ought to have recollected the meaning of the German word *trapp*, which signifies a *step*, and how correctly it is applied to rocks of this formation will be acknowledged by all who have ascended the narrow paths of Plaskin, at the Giant's Causeway.

Climate. The name of *Ice-land* is, perhaps, as unjustly applied to this Country as that of *Green-land* is to the ice-bound regions of the West. The winter here, though more unsettled, is, perhaps, less severe than in Sweden and Denmark. The mercury in the thermometer very rarely sinks to zero, and the medium temperature of the winter months is, perhaps, not much below the freezing point; the atmosphere is in general clear and serene, and the long nights are cheered by the coruscations of the Aurora Borealis. Excessive cold occurs at distant periods. In the winters of 1717, 1742, 1784, and 1792, the sea was frozen to such an extent that communications were maintained by the ice along the coast, and even with the Islands in the Breidefiord. The year 1348 is celebrated in the Annals of the Island for its severity; when the surrounding Ocean was so firmly congealed, that the inhabitants rode on horseback across the ice from one promontory to another.

Icebergs. No circumstance so materially affects the climate of Iceland as the arrival of floating ice from the coasts of Greenland. The intervening sea has been in some years, as in 1766, entirely closed up with it. Immense icebergs sometimes run aground in 80 fathoms' water. Smaller masses fill up the friths and bays, and, freezing the shallow water, soon become cemented together. While the icebergs fluctuate in the neighbourhood, the weather is unsettled, with moist and cold winds; but when they become fixed, the cold increases, and unhealthy fogs are carried over the Island. When this takes place, a short and ungenial summer is the certain consequence. Together with the icebergs arrive also Polar bears, which commit terrible devastations among the flocks and herds. As soon as a bear is known to have arrived, the people of the district arm and go in pursuit of it. It is remarkable that these animals never remain on the Island; but as soon as the ice begins to break up in the Spring, they embark on it for their voyage across the Ocean.

Bears. During the depth of winter, or from November till February, the inhabitants scarcely stir from their houses, which are in some places nearly buried in snow. The swamps, precipices, and chasms in the lava are then concealed from view, so as to render it dangerous to attempt to travel. It appears from the Sagas that sledges were once used in this Country, but they have long since fallen into oblivion. In some valleys, however, as in that of Reykholtz in the Borgarfiord, the multitude of thermal springs impart such a temperature to the ground that it never freezes. The vapours continually rising in the air occasion light showers, which maintain a perpetual verdure.

VOL. XXIII.

ICELAND. In the months of July and August the thermometer often stands at 80 and 90 degrees, but sharp frosts at night frequently succeed to the most sultry days. At Summer. this season the Icelandic peasant exhibits the languor of Indian climes; he shuns the rays of the mid-day sun, and is seen labouring in the fields only in the morning and the evening. From the summer solstice, when the evening sun barely sinks below the horizon, till the time of the harvest-moon, the farmer's hours of labour are chiefly by night. The atmosphere is then cool, and the light equal to that of his winter days.

Vegetation. The vegetable productions of Iceland are comparatively few, and the care of Man has added but little to the indigenous stock of plants. Mr. Hooker says, in his *Flora Islandica*, "that it would be difficult to find any spot of land, of equal extent, and in the same latitude, which can lay claim to so small a number of species." Many varieties, nevertheless, of moss and lichen grow amidst the cinders, and appear most luxuriant, in the most rugged tracts of lava. Sometimes a species of sorrel, or the yellow poppy, assists to cheer the dreariness of these places; and the bearberry, the crowberry, and a little heath, afford a thicker covering to the stones. In the forests, the most stately birch-trees hardly reach the height of 10 feet. With these are mingled several varieties of the willow, and a few solitary individuals of the *Pyrus domestica* and mountain ash. These forests are now rare. Plantations of pine and larch were made by the Government in 1819, we know not with what success. The Icelandic Historians assert that the Island was at one time nearly covered with wood, and that large timber was cut for ship-building and sent to Norway. The way in which it was destroyed is not easily explained. The vegetation of the bogs is more luxuriant; a variety of carices and coarse grass deck them with a dark green covering. Thus while many a mile may be passed over without meeting a single trace of vegetation, there are some spots the verdure of which nearly equals that of the pasture districts of England. It is said that barley and other grains were formerly raised in Iceland. The old Laws and Histories often speak of corn-fields. An attempt to introduce barley and some kinds of pulse has been lately made; but it is likely that the inhabitants, in bestowing all their care on their flocks and herds, have pursued the course which their interest best dictated. The wild corn (*Arundo arenaria*) growing in the sand Wild corn. and ashes supplies a grain of which the Icelanders are peculiarly fond. The meal is used in porridges or thin cakes, or, made into small lumps of dough, is carried to the mountains by the shepherds, who eat it raw. Sir G. Mackenzie sowed the seeds of a few hardy culinary vegetables, turnips, lettuce, mustard, cabbage, which for the most part seemed to thrive perfectly well. According to the accounts of Danish travellers, the district of Dale in the Westfiord is by far the finest and most fertile in Iceland; next to this ranks the warm valleys of the Borgarfiord. The Northern districts are said to be much superior to the Southern, owing, it is supposed, to their exposure to moist winds; the South-West wind being in this climate the most dry and distressing.

Inhabitants. The Icelanders may be looked upon as a fair specimen of the ancient Scandinavians; having, in all probability, undergone less change in manners for nearly a thousand years than any other European nation. They are generally tall, with no Physical distinction

ICELAND. from other races, except, perhaps, the unusual length of the spine. Their countenances are open, their complexion fair, the hair light coloured and rarely curled. Corpulency is very rarely observed among them.

Costume.

The dress of the females retains an antique singularity. The *skirta*, or shift, is made of *Wadmal*, or coarse black cloth, fastened round the neck by a silver or brass button: over this are two or three petticoats of the same material, with a *svinta*, or apron of blue cloth, edged with black velvet, and ornamented at the top with a silver clasp. The jacket fits close to the body, and the tight sleeves are ornamented at the wrists with silver buttons, bearing the initials of the husband and wife; these buttons are generally the first gift of the accepted suitor to his affianced bride. The seams of the jacket are covered with strips of black velvet, and the whole is adorned with a profusion of silver embroidery. The stockings are of dark blue or red worsted, and the shoes of seal or sheep skin, fitting quite close to the foot. The most curious part of the female costume is the *faldur*, or head-dress of white linen. This is about 20 inches high, made in the shape of a flat horn bending forward, stiffened with an immense number of pins, and bound firmly to the head by a dark coloured handkerchief which conceals the hair. This fantastic turban is, on particular occasions, made to display the wealth of its wearer. The ordinary dress of the women working in the fields, or of those of the first rank engaged in domestic occupations, consists of the blue cloth shirt, petticoat, and cap like a Hussar's foraging cap.

The costume of the men is more simple, and differs little from that of the Norwegian peasants. On fishing excursions they wear uncouthly-shaped dresses of sheepskin over their ordinary clothes; the inhabitants of the Northern coast make more use of seal-skins, and, in their winter garb, bear some resemblance to the Greenlanders. In the Onundafjord, at the extreme West of the Island, where the inhabitants from their remoteness have little intercourse with strangers, the primitive costume and character are more firmly retained. Here the men still wear long beards and white clothes in the ancient fashion, and speak a dialect more free from foreign intermixture.

Houses.

The houses of the Icelanders are all constructed on nearly the same plan, differing from each other only in size. An outer wall of turf, about four feet and a half high, often six feet thick, encloses all the apartments. On one side, generally that facing the South, are three or more doors, for the most part painted red. These are the entrances to the dwelling-house, the smithy, dairy, cow-house, &c. The door of the house opens into a long, dark, and narrow passage, from which the different apartments on each side branch. Each chamber has a separate roof, and is lighted by a small pane of glass, or, more commonly, amnium, four or five inches in diameter. The thick turf walls occupy more space than the apartments they enclose; the damp smell which proceeds from them, with the darkness, the filth, and stench of fish, render these dwellings insupportable to strangers. A large farm-house looks more like a village than a single habitation; several families are sometimes found to live in the same mass of turf. The hovels of the lowest order are the most wretched huts imaginable. All the members of the family sleep in the same apartment, which is also the general eating room. The kitchen is the only room in which a fire is kept.

The roof furnishes good grass, which is cut with the scythe at the usual season. ICELAND.

Notwithstanding the reproach of laziness and inactivity under which the natives of Iceland labour, their domestic economy exhibits a system of regular industry. The women, indeed, are unceasingly employed. The servants are generally orphans, or the children of poor farmers; they often intermarry with the children of the master, so little is poverty thought a proof of inferiority. The ordinary diet of the people is extremely simple. Food. They eat an astonishing quantity of butter, generally in a rancid state; when there is a scarcity of this article, tallow is used instead of it. The wages of haymakers are usually paid in butter. In the morning they breakfast on *skyr*, or sour milk, to which they add water, and sometimes flavour the mixture with juniper berries. The flesh of the shark, or sun-fish, is sometimes eaten, after it has become tender from putrescence. Fresh meat, rye bread, and sago soup are holiday fare. The richer inhabitants, however, are not unacquainted with wine, London porter, and other foreign luxuries.

To a stranger, the most palatable as well as most healthful article of Icelandic diet is the *Lichen Islandicus*, which is now so much in vogue among us as a specific in cases of consumption. This lichen, chopped small, is boiled in three or four successive portions of water, to take off its natural bitterness, and then for an hour or two in milk. This preparation, when cold, has the form of a jelly, which is eaten with curdled milk. It is also dried and reduced to a fine powder, when it makes an agreeable pudding. During the summer-time the women migrate for a few days to the deserts of the interior to gather this lichen. They live on these occasions in tents; and when their stock is gathered, reluctantly quit the pleasures of a nomade life. Lichen.

Turf is the general fuel; drift-wood and *surturbrand*, or fossil wood, are more rarely used. In some quarters the people burn sea-weed, dried with the bones of fish, which has an abominable smell. Fuel.

One of the chief cares of an Icelander is the laying in a stock of provision for the winter season; and next to his flocks and herds, the sea is his chief resource. About the beginning of February the people of the interior and of the Northern districts begin to move, and a great part of the male population migrates to the Western and South-Western coasts. They take with them a stock of butter, smoked mutton, and sheepskin dresses. Many travel 200 miles over icy deserts to the place they choose as a fishing station; having arrived, they hire a boat on terms established by ancient custom. With the fishing commences a long period of hardship and privation. They generally remain at sea 8 or 12 hours at a time, in darkness and intense cold, without any other provision than a little sour whey. The women assist in curing the fish when brought to land. About the beginning of May the fishermen return home, leaving the fish, not yet perfectly dried, to the care of some one residing on the spot. On the Northern and North-Western shores the shark-fishery is a regular occupation; shoes are made of the skin, a quantity of oil is collected, and some parts of the flesh are smoked and eaten. Salmon of the best quality is extremely abundant in all the rivers, and might be made a profitable article of export. Fishing season.

About the middle of June, when the occupations of the farmer are at a stand, the Icelander sets out on his second annual journey, carrying with him all his mar-

ICELAND. ketable commodities, which he disposes of, and returns with his fish and whatever he has purchased. They travel in companies, so that it is not uncommon to meet caravans of 60 or 70 horses in the deserts of the interior, which lie in the route from the Northern districts. Factories are established for their accommodation by the Danish merchants, at different places round the coast; but they generally prefer resorting to Reikiavik, where they meet with most purchasers. They pitch their tents outside the town, and evince much diplomatic coyness in commencing their dealings.

Sheep.

The cow, the horse, and the sheep are the principal sources of wealth, comfort, and subsistence to the Icelanders. The sheep are of a peculiar kind, with pointed ears and short tails; most of them have horns, some only two, others three, four, and upwards, and these horns are as irregular in their forms as their number. The sheep are milked as well as the cows twice in every twenty-four hours, and thus add largely to the ordinary beverage. The Icelanders do not shear their sheep, but let the wool fall off spontaneously, which occurs in Spring when the weather begins to grow warm. It is the employment of the women to pick, clean, and spin the wool, which fetches a good price at Copenhagen from its glossiness. Some fine-woolled sheep of the Spanish breed have been lately introduced from Norway, and appear to thrive well. In order to economize the stock of hay, the farmers are required by law to drive their flocks of sheep to the mountains as soon as the wool has been collected. The gathering of them back at the commencement of winter is an important affair. When the hay-harvest is over, and the farmers are ready, the officer of the district gives notice that the gathering shall commence on such a day, and appoints a rendezvous. The shepherds go in a body, under the direction of an experienced chief, and, after collecting the sheep for some days, drive them to a pen for the purpose of separating them. This business is a rural festival; but the search is generally recommenced in October, and a considerable number of sheep is annually lost.

The cattle of Iceland resemble the largest of the Highland breeds, but are hornless. They give a great deal of milk, 10, 12, or even 20 quarts per day. In the Borgarfjord, the poorest peasant has three or four cows. Beef is a luxury eaten only by the rich.

Horses.

The horses of Iceland are hardly of less importance than the cows; they are small, rarely above 13 or 14 hands high, but well formed and active. The peasants are well provided with them, the poorest having four or five. When a young horse is thought to promise well, his nostrils are slit up; the Icelanders believing that when exercised or ridden hard this operation will allow him to breathe more freely. These little horses are accustomed to scramble slowly over rocks and through bogs, and to dart rapidly forward when they come to dry smooth ground. In crossing morasses they are guided by a wonderful instinct; on fair ground they can trot above 10 miles an hour. In travelling, a man has two or three horses with him, and he changes from one to the other as each becomes tired. In this way some Icelanders can perform 100 miles in the 24 hours. A well-trained saddle-horse costs about five pounds. Every Icclander, of whatever rank, can shoe his horse; even the Bishop and Chief Justice may be occasionally seen thus employed. For a short journey, shoes are put only on the fore feet; and when iron is

very scarce, the horns of sheep are used as a substitute. ICELAND. Very little care is taken of these useful animals; they are left to shift for themselves, and great numbers are, consequently, carried off every year by the severity of the winter.

Out of 13 reindeer which were exported from Norway in 1770, only three reached Iceland. These were sent into the mountains of the Guldbringe Syssel, and have since multiplied so rapidly that herds of from 50 to 100 are now frequently met with. They are very little molested by the Icelanders, who are satisfied with complaining that the deer eat the lichen. The Danes sometimes go in pursuit of them, but seldom succeed in killing any. In the depth of winter they sometimes show themselves in the low lands.

Reindeer

The other quadrupeds on the Island are comparatively unimportant. Hogs and goats appear to have been at one time numerous, but at present they are rarely to be met with. The dogs resemble those of Greenland, and though they do not appear to possess many good qualities, yet no family is without them. Of foxes there are two species in Iceland, the white, or arctic fox, (*Canis lagopus*), and that which is called the blue fox, (*C. fuliginosus*), a more beautifully formed animal than the other, with longer legs and a more pointed nose. A traveller through the country often hears at night the discordant cries of these animals. They attack the strongest wethers, and when they have worried them to death, seize them by the throat and drink their blood. It is generally believed that the fox here eats roots, particularly the *Angelica* and *Arundo*, which grow in the clefts of rocks. Many wonderful, and, indeed, incredible, stories are here related of the cunning of the white foxes. But the skill with which they embark on pieces of floating ice, in order to reach the islands where they feast on the sea-fowls' eggs, is a sufficient and well-authenticated proof of their sagacity. A reward is paid by the Government to those who kill a certain number of foxes; the skins also are valuable, but the quantity exported is not great, notwithstanding all the inducements held out to sportsmen. Horrebow mentions a dark red-coloured fox also; and the black fox, he says, is a casual visitor, brought over on the ice.

Foxes.

The lower Order of people have a superstitious reverence for the seal, while they at the same time view it with aversion. On the West coast the seal is taken for the sake of the fat, of which a large one sometimes yields 50 or 60 pounds. The inhabitants are intimately acquainted with the habits and Natural History of this animal. Aware of its observant and inquisitive disposition they kindle fires to attract it to the shore, where nets are spread to take it. Sometimes these animals are met with at a considerable distance up the country, being attracted by the lights of the houses. They are easily tamed, and the people put them, if young, into ponds, and feed them daily. They become in a short time as tractable as a dog. Whales formerly frequented the Western shores of Iceland, but by the activity of the whale-fishers they have been driven to more remote seas.

Seals.

In June the Eider ducks visit the coast to nestle, and during this season they are quite tame. At Vidöe, in particular, on the Southern shores, they are so familiar as to build their nests all round the roofs and even inside the houses. They are protected by the laws, a severe penalty being inflicted on any person who kills

Eider ducks.

ICELAND. one. The nests are strewed in such multitudes on the shore that it is difficult to walk without treading on them. The ducks which have not been long on their nests will suffer themselves to be handled rather than quit their eggs. The nests are built of sea-weed and lined with down, which the duck takes from her own breast, and there is a sufficient quantity of it laid round the nest to cover up the eggs when the duck goes to feed. This down, which is a valuable article of commerce, is removed from the nest twice, or even three times. Sometimes the poor duck is obliged to supply a fourth lining, the drake contributing his share to supply the deficiency; but when the plunder is renewed too often, the birds are apt to desert the place. Some of the eggs also are taken away, as they are thought a great delicacy. The Eider down, when taken from the nest, is mixed with straw, feathers, and other impurities. It is a winter employment of the women to prepare it for the market. When the young birds have left the eggs, the duck takes them on her back, swims to a considerable distance from the shore, then dives and leaves them to grow inured to the new element. In a few weeks the young broods join company. All the birds are then quite wild, and shortly after they disappear. It is not known to what Country they retire. They are sometimes seen in the Shetland and Orkney isles, but seldom further to the South.

Swans.

The inhabitants derive some revenue from the swans also, which are exceedingly numerous in the lakes and marshes of the Northern and Western districts. In the Borgarfjord they assemble and remain in a tract of country from 8 to 10 miles long, and three or four broad, consisting of swamps and ponds of fresh water. Here in August they shed their plumage, and the inhabitants take pains to collect the feathers. As the swans at this season are unable to fly, they are hunted on horseback with dogs. In the Spring, also, when they begin to lay, their eggs are collected; these, when boiled hard, are excellent food. The swan's-down and feathers bring in a good revenue to the people, who eat the flesh, though tough and hard, and dress the skin of the feet in such a way that it resembles shagreen, and is made into purses and similar articles.

The tern, ptarmigan, and golden plover are common, as is the snipe, which seems to lose in Iceland its ordinary wildness, associating with Eider ducks, and sitting on its eggs within a short distance of the houses. The Iceland falcon, at one time so much sought after, is now suffered to remain unmolested. The rocks and islets are frequented by myriads of sea-fowl.

Fish

The species of fish taken on the coast of Iceland are the cod, haddock, ling, skate, and halibut. Herrings also are caught in great quantities on the North coast, whither they come in extensive shoals in June and July. The cod is a principal object of the trade with Denmark; previous to the discovery of Newfoundland, the Iceland cod-fishery was of the first importance; no less than 150 British vessels being engaged in it at the commencement of the XVIIth century; at present it is carried on almost wholly by the Icelanders on the account of Danish merchants. The haddock is consumed on the Island, and forms so large a share of the food of the inhabitants, that it may be styled the most important gift which Nature has bestowed on them.

Arts.

The mechanical industry of the Icelanders is much hindered by the want of good timber and of abundant fuel. The jaws and ribs of whales are in some parts of

the Island used in the frames of houses and of boats. ICELAND. The quantities of drift-wood which arrive from the West are quite amazing; the inhabitants of the Fiords, in which it is chiefly collected, are the carpenters, coopers, and boat-builders of the Island. The hot springs in the Borgarfjord enable them to give the planks and staves the requisite degree of pliancy. But drift-wood has many disadvantages which disqualify it for economical purposes. The smithy is an indispensable apartment in every Icelandic house. Every man, as we before observed, can shoe his own horse. The expression *white smith*, that is, wise or artist smith, if not of Icelandic, is at least of Scandinavian derivation. The knives, scissors, and other articles of common cutlery made in the ill-furnished forges of Iceland are little inferior to those manufactured in Copenhagen. Very good woollen cloth is manufactured by the farmers. The bear berry and the *Lichen Islandicus* are the dyeing materials. A fine black is also procured from a dark earth found in the bogs. Indigo is used for dyeing blue.

Commerce.

The staple exports are fish, oil, feathers, sulphur, and salt mutton; the imports are wood, salt, tobacco, coffee, iron, and fishing tackle. The subsistence of the people depends in a great measure on their supply of fishing lines and hooks. The exports are valued at 200,000 rix-dollars, the imports at 150,000, leaving the balance in favour of the Island. Yet there is such a scarcity of specie that dealings are chiefly carried on in fish and wadmal, 48 of the former weighing two pounds each and 24 ells of the latter being equal to a rix-dollar. From the commencement of the XVIIth century till 1776, the trade with the Island was in the hands of a Danish Company, which exercised a most oppressive monopoly. It was then for a few years carried on on account of the Crown. In 1787, to the great joy of the Icelanders, it was made free to all Danish subjects, and in 1816 strangers were admitted into it on purchasing a license. During the late war between Great Britain and Denmark, the Icelanders were reduced to the greatest misery, their usual supplies of hooks, cordage, grain, &c. being cut off. An English privateer, Captain Gilpin, landed on the Island in 1808, and plundered the Public Treasury of at least 30,000 rix-dollars. The year after, a Dane named Jorgensen, the supercargo of a British vessel, seized the Governor and usurped the chief authority. On a British ship of war touching shortly after at the Island, he was taken prisoner, and atoned for his temerity in the hulks at Chatham. The generosity of the British Government relieved the poor islanders from their painful situation as soon as it was fully known. By an Act of Council, in 1810, the Islands of Iceland, Faroe, and the Danish settlements on the coast of Greenland were taken under the protection of England, and enjoyed from that time till 1815 the advantages of a brisker trade than usual. The Island is divided into four commercial districts; viz. Reikiavik, Eskefiord, Eyafiord, and Isafiord. A merchant vessel arriving from Denmark may visit all the ports of any one district, but is not allowed to touch at the others. An annual fair is held at Hraundalur, near Reikiavik.

Character.

The Icelanders are a remarkably grave and serious people; apparently phlegmatic, but extremely animated on subjects which interest them. Vice and crime are hardly known among them, although the Danes and other strangers who visit them set a bad example. To

ICELAND. their Religious and domestic duties they are strictly attentive, and in their dealings with others display a scrupulous integrity. Their mental cultivation astonishes a stranger, when he contrasts it with the poverty and hardship of their lives. There are very few on the Island who cannot read and write; and there are many among the better class who would be distinguished by their taste and learning in the most cultivated societies in Europe. Perhaps there is no country in Europe in which the lower Orders are so well informed. "A stranger," says Dr. Holland, (*Mackenzie's Travels, &c.*) "sees men whose habitations bespeak a condition little removed from the savage state, and who suffer an almost entire privation of every comfort or refinement of life. Among these very men he finds an intimate knowledge of the classical writings of antiquity, and a taste formed on the purest models of Greece and Rome. While traversing the Country, he is often attended by guides who can converse with him in Latin, and arriving at his place of nightly rest, he not unfrequently draws forth from the labours of his little smithy, a man who addresses him in this language with the utmost fluency and elegance."

Literature.

The brilliant period of Icelandic Literature was from the XIth to the XIVth century. But, though Civil dissensions arrested its progress for a time, yet Learning has declined in Iceland only relatively to the vigour of its early growth and to the civilization of Europe.

A Printing Press was introduced in 1530, by a Swede named Mathieson. The first types were made of wood and rudely formed, but before the end of the century several valuable publications made their appearance, displaying a typographical elegance very remarkable for that Age. In the year 1779, an Icelandic Society was instituted at Copenhagen, comprising the most learned and intelligent men of the Island to the number of 130. In consequence of dissensions which arose in this Society, from the proposal to transfer it to Iceland, it was dissolved in 1790. A second Icelandic Society was established in the Island in 1794, with no fewer than 1200 members. This Society established a Printing-office at Leira, in the Borgarfjord, from which have issued 60 or 80 different Works, chiefly calculated for popular instruction. In the acts of the Icelandic Society were published two Books of Thorlakson's translation of the *Paradise Lost*; the remainder has never been printed. A complete MS. copy of this translation, which is said to be the best in any language of our great Poet, revised by the venerable Thorlakson himself, was procured by Mr. Henderson. The Icelanders have also translations of Pope, Young, and other English writers.

Education.

Several Schools appear to have existed in Iceland in the XIth century. At the time of the Reformation two were founded; one at Skalholt, the other at Hoolum, with funds sufficient for the support of 20 or 30 scholars each. These establishments were afterwards united, and the only School on the Island at present is at Bessestad. It has three masters and about 24 scholars, the funds not allowing the reception of more: a Library containing about 1400 volumes is attached to the Institution. But by the long-established habits of the people, a regular system of domestic education is maintained. The instruction of his children is one of the regular occupations of every Icelander, who, in discharging this duty, is sure to find in the Pastor of the Parish a zealous prompter and assistant. The importance of these domestic habits is well understood by

the Icelanders themselves. In the Ecclesiastical Code of the Country, there is an Article singular in its nature but admirable in its design, which gives the Bishop, or even the inferior Clergy, the power of preventing any marriage where the female is unable to read. This law is still occasionally acted on.

The amusements of the people are chiefly of the literary kind. The Icelanders are, indeed, fond of chess, and games at cards have been introduced by the Danes; but in all their social meetings the repetition of Poetry and the reading of the Sagas or Histories constitute the chief entertainment. Hence it is that their National History is familiar to the people of all ranks, and an attachment to their Country becomes inspired, which its inhospitable nature can hardly justify.

The Reformation was introduced into Iceland in the year 1551, and at present there is no Religious dissension among the natives. The inhabited part of the Island is divided into 184 Parishes. Some of these are so extensive as to have five churches; but these places of worship, built for the accommodation of remote farms, are on the most moderate scale; some of the churches are not more than 18 feet long, 8 wide, and about 7 feet high. Iceland was formerly divided into two Bishoprics, Skalholt and Hoolum; but the Sees becoming vacant at the same time, were united by order of the Danish Government, in 1797. Every clergyman in Iceland keeps a register, exhibiting a view of the moral and religious state of the Parish. Three thousand copies of the Icelandic Bible were printed by the British and Foreign Bible Society in 1813, for gratuitous distribution in the Island.

The Government of Iceland was originally Aristocratic, similar to that which prevailed among the other Scandinavian nations. A General Assembly of the people, or *Althing*, was annually held in the Glen of Thingvalla, or the Valley of the Court. When the Island became subject to a foreign Power, the differences of rank gradually disappeared, and no distinctions are at present known among individuals but those of industry and intelligence. The government of Iceland is committed to an officer, generally a Dane, appointed by the Crown of Denmark. This supreme magistrate has the title of *Stiftamtmand*. The people retained a shadow of Constitutional right till 1800, when the *Althing* was abolished. The Royal authority has not at present any Constitutional check, but is exercised nevertheless in a mild and paternal way. The Supreme Court of Judicature is held annually at Reikiavik: an appeal is permitted in all cases to the Courts at Copenhagen. The laws are chiefly grounded on the ancient Code called *Jonsbok*, compiled in 1280. The civilization of the Icelanders is in nothing so remarkable as in the completeness of their legislation. Trial by combat was abolished so early as 1001, and punishment for witchcraft in 1690, nearly 30 years before a similar improvement was made in the laws of Great Britain. All the wants of Society were provided for at a very early date; and even economic provisions were made which evince no little wisdom and sagacity. In case of capital conviction, which is very rare, the criminal is sent to Norway to meet his sentence, as it is not easy to find an executioner among the islanders.

The taxes paid by the Icelanders are very trifling, not, perhaps, exceeding 50,000 rix-dollars, but sufficient for their public expenses, as they have no troops or fortresses to maintain. The laws respecting the main-

ICELAND

Religion

Government.

Taxes.

ICELAND. tenance of the poor are very strictly enforced, and are more burdensome to the farmers than all the other taxes. There are no Hospitals on the Island except a few small buildings for the reception of lepers, who are unfortunately too common. The sick, aged, and infirm are, therefore, billeted on the farmers, who are in all cases obliged to give shelter and relief to their kindred within the fourth degree of consanguinity. It often happens that a landed proprietor, who contributes only two rix-dollars to the public revenue, is called on for fifty as his ratio towards the maintenance of the poor in the district, when he is unwilling to receive any of them into his own habitation. Hospitality is a prominent virtue in the Icelfander's character. Not only are strangers kindly entertained, but when the farmers travel with their annual caravans they are welcomed at every house they meet with, and remuneration is seldom accepted by the host.

Population. There is reason to believe that Iceland was formerly much more populous than at present; indeed the History of the Island affords abundant proofs that the climate has been gradually growing more severe, and the soil more ungrateful than formerly. In 1703, the population was 50,500; in 1804, it decreased to 46,350; from that year it has increased with little interruption, and is supposed to amount at present to 50,000. There is a considerable excess in the female population, and the average longevity of the women is greater than that of the men, owing to the more frequent exposure of the latter to the hardships of the climate. In 1804, the number of farms were 4751, the horned cattle amounted to 20,325, the sheep to 218,818, and the horses to 26,524.

Reikiavik. *Reikiavik*, the chief place in Iceland, has risen lately into notice from being made the seat of the Governor, the Episcopal See, the seat of the Supreme Court, and the principal mercantile station. Singularly enough, it is built on the very spot where Ingolf the leader of the first colony fixed his habitation. This little town stands on the South side of a considerable inlet of the Faxé Fiord, on a low marshy piece of ground, between two eminences partially covered with grass, and studded with a number of small cottages. It consists of two streets, one running along the shore and occupied by the merchants, the other stretching backwards to the margin of a small lake, and containing the dwellings of the Bishop and others not engaged in trade. Some green islands in the bay form a safe anchorage, and harbour

great numbers of Eider ducks. *Reikiavik* contains about 550 inhabitants. The society of this town is perhaps the worst in the whole Island. The simplicity and integrity of the natives is here corrupted by an intercourse with foreign traders of the lowest description. The other towns marked in the Map of Iceland are, in reality, only farm-houses or townships. The ports or mercantile stations round the coast consist in general of a single farm-house, with a mercantile store-house adjoining.

About 15 miles from the South coast are the *Vestmanna Islands*, so named from some Irish emigrants, who took possession of them in the IXth century. They are 14 in number, but only *Heimaey*, or *Home Island*, is inhabited. The inhabitants of this bleak rock, only 160 in number, support themselves by fishing and bird-catching. They have two clergymen and a well-built stone church, nor do they yield in civilization to their Northern neighbours. The poverty and natural strength of this little islet have not been able to protect it from pillage. It suffered at different times from English pirates, but a worse calamity befell it in 1627. Some Algerine corsairs in that year carried off the inhabitants, of whom those who survived their sufferings were ransomed in 1636, but only 13 persons regained their native Island.

Islandicæ*, and Eichhorn's *Alg. Gesch. der Literatur*.

ICHNEUMON, *Mus Indicus*, or Indian Mouse; Gr. *ἰχνεύμων*, from *ἰχνεύειν*, *vestigare*, to watch, *quia vestigat crocodilos*. See the Quotation from Pliny. Vossius adds another reason for the name, because it roots or searches with its snout for its food. Also the name of an insect.

Now when he is lulled as it were fast asleep with this pleasure and contentment of his: the rat of India, or *ichneumon* above said, spieth his vantage, and seeing him lie thus broad gaping, whippeth into his mouth, and shooteth himselfe downe his throat as quicke as an arrow, and then gnaweth his bowels, eateth an hole through his bodie, and so killeth him.

Holland. *Plinie*, vol. i. fol. 209.

The insects that infest fruits are either of the *ichneumon-fly* kind or *Phalæna*. Plums, peas, nuts, &c. produce some or other *ichneumon-fly*. *Derham*. *Physico-Theology*, book viii. ch. vi. n. 4.

Herodotus (ii. 67.) states that the ICHNEUMON (*ἰχνεύμων*) is embalmed by the Egyptians, and buried, each in its own particular town. The reasons for these sepulchral honours are assigned by later writers. The combat of the Ichneumon and the Aspis is represented by Ælian (*Hist. An.* iii. 22.) as displaying much sagacity on the part of the former, who enters upon it not rashly nor inconsiderately, but after coating itself with mud, so that it attacks like a man armed at all points, and protected by cuirass and shield. A similar description is given by Plutarch. (*de Solertiâ Animal.* p. 966. *Ed. Xyl.*) If mud be not at hand, continues Ælian, the Ichneumon bathes itself in water, and then seeks a coating of sand, covering the tip of its nostrils, which are exposed to the bite of its enemy, by the sinuosity

ICHNEU-
MON.

of its tail. The nostrils seem the only parts in which it is vulnerable, and the Aspis triumphs if it succeeds in seizing on them. If not, the Ichneumon fastens on the throat of its foe, and speedily throttles it; so that victory wholly depends on the first bite. Schneider, in commenting on this passage, refers to Hasselquist (271.) for a description of the Linnæan Ichneumon, (see HERPESTES,) which, he says, in India is named *Munguse*, and is particularly hostile to the *Cobra di Capello*. In another place, (vi. 38.) Ælian relates that the Ichneumon destroys the eggs of the Aspis; and again, (viii. 25.) that when the Ichneumon is creeping up to strangle the sleeping Crocodile, the Trochilus, to which Herodotus has assigned a similar duty against another animal, the Leech, (ii. 68.) shrieks, and wakes his friend by flapping him on the snout. But the greatest wonder remains behind. The Ichneumon is of a very uncommon epicæne nature. Whenever two of them fight, that which is worsted is condemned to become a female, in order that, as a mark of degradation, it may encounter the pain and trouble of parturition, ὠδίνων τε ὑπομείναι, καὶ ὑπὲρ τῆ τέως ἀντὶ πατέρων γενέσθαι μητέρας. They are considered, perhaps on this account, sacred to Latona and Lucina, and are particularly venerated at Heracleopolis. (x. 47.)

Nicander, in his *Theriaca*, (p. 12. Ed. Gorræi,) has related the contest of the Ichneumon and the Aspis much in the same manner; and Phile (*de Anim. prop.* 83.) has transformed into Greek Iambics most of the particulars related by Ælian. Oppian, also, has versified the same stories, but with considerably more Poetical fire than his predecessor. The waking pangs of the Crocodile are told with great vigour of description.

αὐτὰρ ὅγ' ἐξ ὕπνου βαρυάϊος ἔγχετο δουλός,
καὶ κακὸν ἐν λαγόνισσι φέρον τέσον ἀπροτίλπτον,
πάντη μαινόμενος καὶ ἀμύχανος ἀμφαλάττει.
ἄλλοτε μὲν ποτὶ τέρεματ' ἰὼν μυχάτω ποταμοῖο,
ἄλλοτε δ' αὖ ψαμάθοισι κυλινδόμενος ποτὶ χέρσον,
ἄγχιον ἀσθμαίνων, στρωφόμενος ἀμφ' ὀδύνησιν.

Cyneg. iii. 421.

Ritterhusius, in commenting upon the above passage, notices a symbolical interpretation which has been given to the adventure of the Ichneumon and the Crocodile, almost too wild to be credited. *Theologi quidam, ῥήτορες κομψολόγοι*, (we will not weaken the justly expressive words by translation,) *Ichneumonem dicunt imaginem esse Salvatoris, et Crocodilum Diaboli quem Ille specie vili et abjectâ superavit.*

Diodorus Siculus (i. 87.) has made the Ichneumon coat itself with mud, not against the Aspis, but the Crocodile. Such a precaution does not appear to have been necessary in the dark voyage which the little animal was about to undertake; and the Historian himself seems to have doubted the transaction, which he describes as occurring παραδόξως καὶ παντελῶς ἀπιστημένη μεθόδῳ. Before this, he has stated an almost equal marvel concerning the same beast, which he says is the size of a little Dog; namely, that it destroys the Crocodile's eggs for no pleasure or advantage to itself, for it does not eat them, but simply out of good-will to human kind. (35.) Aristotle (*Hist. Anim.*) pits the Aspis against the Ichneumon, and increases the wisdom of the latter by affirming that he never joins battle without summoning his comrades as allies. M. Camus, the French translator, has illustrated this passage by a note, which contains references to many authorities concerning the Ichneumon.

One of the GRIPHI, which Athenæus has taken the laudable trouble to collect from the Comic Poet Eubulus, relates to an Ichneumon. We transcribe it below.

ἀττιλαβόφαλος, μὴ πρόστομος, ἀμφικνέφαλος,
αιχμητὴς παίδων ἀγόνων γόνον ἱξαφανίζων.
'Ichneumon Aigyptios.
τῶν γὰρ Κροκοδείλων ὄτος ὡς λαμβάνων
πρὶν θηρεῖσθαι τὸν γόνον κατὰ γνυσιν,
ἵπνισ' ἀφανίζει. διότι δ' ἀμφίστομος
κεντῇ κάτωθεν τοῖς δὲ χίλισι δάκνυι.

(x. 18.)

Well might Casaubon remark upon the above lines, *hic sanè opus habebamus Œdipo*. The learned Commentator proceeds to show, with much ingenuity, how the particulars which appear most opposed to the nature of the Ichneumon may in the end be reconciled to it; thus it is said to be *Locust-eyed*, when the eyes of a Locust are remarkably prominent, and those of an Ichneumon, on the contrary, are deeply imbedded in the head; the agreement, therefore, must be in keenness of vision, which, whatever may be the case with the Ichneumon, Casaubon admits, after all, is probably not so with the Locust. Secondly, the object of the riddle is not *sharp-snouted*, but the Ichneumon is particularly so; we must, therefore, either understand μὴ πρόστομος to bear a different meaning, (and *what* that meaning is to be seems doubtful,) or we must read in direct opposition to it, καὶ πρόστομος, or in a more qualified manner, μικρόστομος, *quod*, adds Casaubon, *nobis propè temerarium videtur*. The last epithet, *bolster-headed*, is yet more puzzling than the others; *quod ne Deus quidem Hermes rectè possit ἐρμηνεύειν*, and it is, therefore, proposed to read ἀμφικνέφαλος, very dark-coloured, or ἀμφικέφαλος, or, as would better suit the metre and afford the same meaning, ἀμφικάρηνος, *headed at either end*, a property afterwards expressed by ἀμφιστόμος, and plainly belonging to the Ichneumon, which is described to fight against the Aspis as much with its tail as its head. This is an exquisite specimen of commentatorial trifling, in which an obscure matter is involved in still greater obscurity by examination. Casaubon, however, had with his own eyes seen an Ichneumon at Frankfort on the Maine, and he has given a more accurately Zoological description than might be expected. It reminded him of a Ferret, *magnitudine felem superabat; rostrum illi peracutissimum, auriculæ perbreves et quarum rotundus ambitus; cauda pro cætero corpore admodum producta; color cinereus; sed in rostro et pedibus crebræ erant nigræ maculæ; irritatus pilos surrigebat.*

Pliny has related very briefly, as we have given it above from Holland, the stratagem employed by the Ichneumon against the Aspis. Ammianus Marcellinus appears strangely confused in his notion of this animal. After relating the kindness of the Trochilus to the Crocodile, he continues, *quod factum contuens Hydrus, Ichneumonis genus, oris aditum penetrat alite præviâ patefactum, et populato ventre vitalibus dilancinatis erumpit.* (xxii. 15.) *Hydrus* is a Water Snake, and the commentators would, therefore, substitute *enhydrus*, which is indeed applied to the Ichneumon both by Solinus and by Isidore, and which Hesychius describes as an amphibious animal like the Beaver. We do not know that this alteration would much improve the matter.

ICHNEUMON, in *Zoology*, a genus of stingless *Hymenopterous* insects, the type of the family *Ichneumonidæ*, established by Linnæus, and restricted by modern Entymologists.

ICHNEU-
MON.

ICHNEU-
MON.ICHNO-
GRAPHY.

Generic character. Maxillary palpi of five joints, mouth not produced into a beak, joints of the maxillary palpi unequal; antennæ filiform or setaceous; jaws two-toothed at the top; ovipositor hidden or slightly produced; abdomen oval or depressed, formed of five, or more, apparent rings.

The type of the genus is *I. sagittatorius* of Fabricius, figured by Schæffer, *Icon Ins.* pl. lxxxiv. fig. 9. Gravenhorst von Esenbeck and Olivier have published monographs of this genus, and Panzer has figured many of its numerous species.

The Ichneumons have been called by some authors Three-tailed Flies, from their three filiform valves, which form their ovipositor, and which are generally exposed. The French Naturalists call them *Mouches Vibrantes*, on account of the shaking of their antennæ, which are generally rendered more visible by this part being surrounded by a pale band.

The Ichneumons are more formidable to the larvæ of insects than the Ichneumon of the Ancients, which was said to enter the Crocodile's mouth while it was asleep and eat out its intestines, for the Crocodile could prevent its entrance by keeping its mouth shut; but the larvæ of insects can use no such precaution; and it is almost impossible for them to escape entirely. The female Ichneumon of those species is provided with a long ovipositor; when about to lay its eggs it searches for the larvæ of the particular kind of insect which is the general nurse of its young under the cracks in the bark of trees, &c. and introducing its ovipositor in a perpendicular direction into every hole which is likely to contain one of its victims. They generally choose those larvæ which are about to change into their pupa state. The animal, directly it is pierced, becomes sickly, but usually undergoes its change, and the place where the egg is deposited is marked by a small brown scar. The larvæ of the Ichneumons are small worms, destitute of legs, which live in the bodies of other larvæ as intestinal worms do in the body of larger animals. The larvæ of a few insects of this family form a silky case, and suspend themselves from the end of an oak-leaf. The pupa, in the cases which have been described by Reaumur, are said by that author to have the faculty of leaping when touched. See also an account of a similar pupa by Latreille in the *Bulletin of the Philomathic Society*. Others lay their eggs in the galls produced by the *Tenthredo*es. Degeer described a species which deposits its eggs in the bodies of spiders; and he also observes that the Plant Lice, who have so many enemies, as *Coccinella*, *Hemerobii*, &c. are also subject to the attacks of several species of this family.

ICHNOCARPUS, in *Botany*, a genus of the class *Pentandria*, order *Monogynia*, natural order *Asclepiadeæ*. *Generic character*: blossom contorted; corolla salver-shaped, throat naked; follicles two, divaricate; anthers free from the stigma; superior extremity of the seeds comose.

One species, *I. frutescens*, native of the East Indies. *Hort. Kew.*

ICHNOGRAPHY, } Fr. *ichnographie*; It. and
ICHNOGRAPHICAL. } Sp. *ichnografia*; Lat. *ichnographia*; Gr. *ἰχνογραφία*, from *ἰχνος*, *vestigium*, and *γραφῆ*, *scriptura*, *descriptio*, a description or delineation.

See the first Quotation from Evelyn.

Ichnography, by which we are to understand the very first design and ordinance of a work or edifice, together with every partition and

opening drawn by rule and compass upon the area or floor, by artists often call'd the geometrical plan or plat-forme, as in our reddition of the parallel. The Greeks would name it *ἰχνογραφία*, *vestigii descriptio*, or rather *vestigium operis*, the superficial efformation of the future work, which our ground-plot does fully interpret. Evelyn. *Miscellaneous Writings*, p. 371. *Of Architects and Architecture*.

Perrault has assisted the text with a figure, or *ichnographical* plot, *Id. Ib. ii. i. 1.*

I'CHOR, } Gr. *ἰχὼρ*, *sanies*, *vel sanguis nondum*
I'CHOROSE. } *præparatus*, *sive crudus*, Lennep; such as was attributed to the Gods by Homer, in *loco sanguinis*.

This said, she wip'd from Venus' wounded palm
The sacred ichor, and infus'd the balm.

Pope. *Homer. Iliad*, book v.

The pus, from an ulcer of the liver, growing thin and ichorose, corrodes the vesse'ls. *Arbuthnot. On Diet*, p. 297.

Blood follow'd, but immortal: ichor pure,
Such as the blest inhabitants of Heav'n
May bleed, nectarous: for the Gods eat not
Man's food, nor slake as he with sable wine
Their thirst, thence bloodless and from death exempt.

Cowper. *Homer. Iliad*, book v.

ICHTHYOLOGY, Gr. *ἰχθυόλογ-ειν*, *de piscibus disserere*, to treat or discourse of fishes, from *ἰχθὺς*, a fish, and *λέγειν*, to discourse.

Some [animals] there are in the land, which were never maintained to be in the sea, as panthers, hyænas, camels, sheep, moles, and others, which carry no name in *ichthyology*, nor are to be found in the exact descriptions of Rondeletius, Gesner, or Aldrovandus.

Sir Thomas Brown. *Vulgar Errours*, book iii. ch. xxiv.

ICHTHYOSARCOLITES, in *Zoology*, a genus of chambered shell, established by Desmarest in the *Journal de Physique* (July, 1817) for a fossil, of which only the internal coat has been as yet known. It has been placed near the genera *Hippurites* and *Orthoceratites*.

Deshayes has recently reexamined the genus, and has given the following

Generic character. Shell many-celled involute, whorls separate, the last forming a large area of a circle; cells simple, not sinuous, not jointed, without any syphon; shell thick, formed of a number of capillary tubes, separated one from the other, the dorsal one the largest, and apparently taking the place of the syphon; a bungle of others, rather larger than the rest, forms a depression on the concave part; the back of the shell has generally a crest formed of many ranges of tubes, similar to those out of which the shell is made.

This genus, which appears to resemble a very large *Spirula* in form, is found in the hard white limestone near Rochelle, apparently belonging to the *Oolite* series, and from the hardness of the stone the shells are very difficult to be detached in any thing like a perfect state. They agree with the *Nautili* in the form of the cell, but differ from them, and from all the other chambered shells, in the formation of their shell and in the dissepiment not being pierced with a syphon; from the *Ammonites*, *Bacculites*, and *Turrilites* they differ in the form of the dissepiment, which is not articulated. Deshayes has added a second species to the genus, under the name of *I. obliqua*. The type of the genus is *I. triangularis* of Desmarest, which has been figured by Defranc. The tubular structure of the shells was doubtless destined to render them, like the cellular cuttle-fish bone, more buoyant.

GRAPHY.—
ICHTHY-
OSARCO-
LITES.

ICICA.

I-CO-
LUMB-
KILL.

ICICA, in *Botany*, a genus of the class *Octandria*, order *Monogynia*, natural order *Terebinthaceæ*. Generic character: calyx four or five-toothed, persisting; petals four or five, broad at the base; style short; stigmas four or five; germen four or five-celled; fruit coriaceous.

Fifteen species, mostly natives of the East Indies and South America. Decandolle.

Name.

I-COLUMB-KILL, one of the Hebrides, or Western Islands of Scotland, situated at the Southern end of a large bay on the Western side of Mull, from which Island it is separated by a channel about half a mile wide, and of sufficient depth to allow the passage of large ships with a leading wind. By Bede, the Historian of its early Ecclesiastical establishment, it is called *Hii*, (pronounced *ee*), a name which, without the aspirate, it still retains on its own shores and their vicinity. In the Annals of Ulster, by a slight corruption, it is written *Iæ* and *Aoi*; and all three words in the Irish dialect imply *Island*. *I-thon*, in the same language, the *Island of the Waves*, was readily Latinized by Monkish writers into the more euphonous *Iona*; but this last name has been otherwise traced to the Hebrew *ינה*, *Columba*, and thus connected with the Gaelic *St. Colum*, in Latin *Columba*; to whom it is in like manner indebted for its more general title *I-columb-kill*, the *Island, the cell of Columb*, or as it is abbreviated *Icolmkill*.

St. Colum

The early History of Christianity in Britain is involved in deep obscurity; but the received belief, founded on the authority of Bede, affirms that the Southern districts of Scotland were converted by the preaching of St. Ninian in the commencement of the Vth century. It was not, however, till the year 565 that the knowledge of the Gospel became generally disseminated. At that time Colum, an Irish Priest and Abbot, quitting his own Country with 13 companions on a mission to Scotland, received from Bridius, son of Meilochon, King of the Picts, a gift of the Island Hy. Here he founded a Monastery, under the auspices of King Convallus, according to Boethius, (ix. p. 166.) which Usher believes to have been tenanted at the beginning by Canons regular. (*clerici*.) Henceforward I-columb-kill became a spot of peculiar reverence. The remains of the Saint, who died in 597, were at first deposited within his own walls, where his grave is still shown, though the Irish maintain that they were afterwards transferred to Down in his native land. There, it is affirmed, that so late as the days of Henry VIII. existed the following distich engraved on a tomb, beneath which lay the three Saints whom it commemorated:

*Hi tres in Duno tumulo conduntur in uno,
Brigida, Patricius, atque Columba pius.*

Boethius, ix. p. 170.

History of
the Abbey.

The Cell of Hy became the mother Church of 100 Monasteries; the young Princes and Nobles of Scotland and Northumberland were sent thither for education, and more than one Crowned head was enrolled among the members of its brotherhood. Such was the sanctity attributed to it, that it became the favourite sepulchre for Royalty. Yet, notwithstanding this celebrity, it was exposed to frequent ravages by the untamed Pirates of the North, and we read of the burning of the Abbey in 797, and of its plunder and the massacre of many of its holy men in 801 and 985. We know

VOL. XXIII.

not at what date the establishment fell into the possession of the Order of Cluny; but its decline may be traced from the reign of William the Lion, in the latter half of the XIIth century, when all the benefices of that branch of Benedictines in Galloway were transferred to the Monks of Holyrood House. In 1507, the Abbey was annexed for ever to the See of the Isles, from which originated the still remaining Bishopric of Sodor and Man. But, in spite of this perpetuity, Spottiswood states that, in 1617, it was given by James VI. to the See of Argyle. The Life of St. Columba has been written by two authors sufficiently near his time to collect all received contemporary information; and accordingly the pages of Adamnanus and Cuminus (both of whom are printed by Pinkerton in his *Vitæ antiquæ Sanctorum qui habitaverunt in eâ parte Britanniae nunc vocatâ Scotiâ vel in ejus insulis*) abound in the most extravagant figments.

I-columb-kill is about three miles in length by one in breadth, comprising about 1300 Scotch acres; its surface, as described by an eminent Geologist, Dr. Macculloch, one of its most recent scientific visitors, is low, rising into numerous irregular elevations, which seldom exceed 100 feet above the level of the sea; the loftiest, at the Northern extremity of the Island, is above four times that height. The coast is, for the most part, indented by small rocky bays, but at the North-West it presents a flat shore of sand; numerous small islands and rocks encompass its shores, and near the Southern extremity the green Island of *Soa* stretches a considerable distance into the sea. The rocks chiefly present different varieties of gneiss; on the coast opposite Mull is found a range of red, large-grained granite, which has been much used in building the Cathedral. A fine, white marble, which, however, will not admit polish, has been so largely quarried as to have but small remains left. In a bay on the West, *Port-na-Curraich*, the *Harbour of the Coracle*, whereat St. Columba is traditionally said to have landed, are found numerous pebbles, for the most part of serpentine, washed backward and forward by the tide, and sometimes raised in huge conical heaps, which are attributed to the pious labour of pilgrims in times past; to these the natives attach much veneration when worn as amulets. *Fuci*, many of them of rare species, are abundantly found in the neighbouring seas; the *Lichen omphaloeides* coats the rocks, and is employed in dyeing; and in the standing pools near the bay just mentioned, may be seen the *Atra* of Dillwyn, one of the most uncommon *Confervæ*. The climate, owing to the shelter afforded by Mull, is peculiarly mild; snow seldom falls, and never continues to lie. About 500 acres are in cultivation, and the grain, chiefly barley and rye, is generally harvested early in August. The upland is a chequered mixture of rocks and pasture, which in many spots is unusually rich, interspersed with moorish ground, and terminating in the North with a labyrinth of almost inaccessible rocks. The Duke of Argyle is proprietor of the Island, which of late years has much improved in agriculture and increased in population. Its rental, at the time of Dr. Macculloch's visit, (1818,) amounted to £300; its population to 450. This, in 1782, was 277, in 1791, 323, and in 1808, 386. A rapid advance during the space of little more than a single generation. I-columb-kill belongs in Ecclesiastical jurisdiction to the united Parishes of Kilfinichen and Kilviceven in Mull, by whose Ministers this first abode of Christianity among our Islands

I-CO-
LUMB
KILL.Face of the
Island.

I-CO-
LUMB-
KILL.Pennant's
account.

is visited four times a year for the performance of Divine service.

When Pennant visited the Island, in 1772, the tenants were on *run-rig*, a term used in Scotland when alternate ridges of land belong to different proprietors, and about 108 head of cattle and 500 sheep were supported; the population was about 150, "the most stupid and the most lazy of the Islanders, yet many of them boast of their descent from the companions of St. Columba." Pennant landed at the Bay of Martyrs, on a spot on which the bodies of those who of old were to be interred in the sacred precincts were received. Near to it is an oblong enclosure bounded by a stone dike called *Clachnon Druinach*, and traditionally supposed to have been a Druidical burial place. Pennant believed it to have been the common cemetery of the town, which lies close at hand. This was a mean village, consisting of about 50 thatched cottages. Hence he inspected the various antiquities in their order. The

Nunnery of
St. Oran.

first was the Nunnery of St. Oran, once belonging to Augustine Canonesses. The Church was 58 feet by 20, the roof of the Eastern end entire, the floor entirely covered with cow-dung, which Pennant was at the pains to get removed. He was repaid by exposing to view the tomb of the last Prioress, whose figure is carved on its face, together with that of a Virgin and Child, sitting, and placed foot to foot with the Prioress; above the Virgin's head, which is crowned and mitred, are represented the Sun and Moon; above that of the Prioress a little plate (Macculloch says, and he is probably right, a looking-glass) and a comb. At her feet, *Sancta Maria ora pro me*, and round the edge, *Hic jacet Domina Anna Donaldi Terleti filia quondam Prioressa de IONA quæ obiit año m° d° xi^{mo} ejus animam ALTISSIMO commendamus*. A broad paved way runs from the Nunnery to the Cathedral, and two others branch from it, one to the Bay of Martyrs, a second to the hills. On the main line stands an elegant cross, called that of Macleane. *Reilig ourain*, the burying place of Oran, is a vast enclosure filled with grave-stones, and overgrown with weeds. Here were the

Tombs of
the Kings,described
by D. Mon-
ro, Dean of
the Isles.

Tombs of the Kings, which we shall describe from the account of Donald Monro, Dean of the Isles, who visited Iona in 1549, and whose MS. *Description of the Western Isles* has been printed, not long since, in a Collection of scarce Scottish Tracts. "Within this isle of Colmkill, there is ane sanctuary, also a kirkzaird, callit in Erische. *Relig-Oran*, quhilk is a very fair kirkzaird, and weill biggit about with staine and lyme: into this sanctuary ther is three tombes of staine, formit like little chapels, with ane braid gray marble or quhin staine in the gavil of ilk ane of the tombes. In the staine of the ane tombe there is wretten in Latin letters *Tumulus Regum Scotiæ*, that is the Tomb ore grave of the Scotts Kinges. Within this tombe, according to our Scotts and Erische cronickels ther layes 48 crowned Scotts Kinges, through the quhilk this isle has beine richlie dotat be the Scotch Kinges, as we have said. The tombe on the South syde forsaide has this inscription, *Tumulus Regum Hyberniciæ*, that is the tombe of the Irland Kinges; for we have in our auld Erische cronickels that ther was foure Irland Kinges eirdit in the said tombe. Upon the North syde of our Scotts tombe the inscription bears *Tumulus Regum Norwegiæ*, that is the tombe of the Kinges of Norroway, in the quhilk tombe, as we find in our ancient Erische cronickels, ther layes eight Kinges of Norroway; and als

we find in our Erische cronickels, that Coelus, King of Norroway, commandit his nobils to take his bodey and bury it in Colm-kill, if it chanced him to die in the Isles: bot he was so discomfitit that ther remained not so maney of his army as wold burey him ther, therfor he was eirded in Kyle, after he stroke one field against the Scotts, and was vanquisht by them. Within this sanctuary also lyes the maist part of the Lords of the Isles with their lynage, M'Kynnon and M'Guare with their lynages, with sundry others inhabitants of the hail Isles, because this sanctuary was wont to be the sepulture of the best men of all the Isles, and als of our Kinges as we have said: becaus it was the maist honorable and ancient place that was in Scotland in their dayes as we reid."

Another reason which thronged this Island with the "mighty dead," is given by Pennant from an ancient Prophecy:

*Seachd bliadna roimh'n bhraò
Thig muir thar Eirin re aon tra'
Sthar Ile ghuirm ghlaish
Ach Snàmhaiah I Cholum clairich.*

Which, he says, is to the following effect: "Seven years before the end of the world a deluge shall drown the nations; the sea at one tide shall cover Ireland, and the green-headed Ilay, but Columba's Isle shall swim above the flood."

Of these tombs Pennant could discover but slight remains, built in a ridged form, and arched within. The inscriptions were lost. The spot is called *Jomaire nan righ*, the ridge of the Kings. Two Gaelic inscriptions with crosses were found, one, *Cros Domhail fa' asich*, the cross of Donald Longshanks; the other, *Cros Urchvine o Guin*; the letters were those of the most ancient Irish alphabet.

Within this space stands also the Chapel of St. Oran, to which the following legend is attached. Columba, according to Bede, had dreamed that a famine, which was grievously ravaging the Northern parts of Britain, would never cease unless he buried a man alive. Another version, which is adopted by the generality of writers on Iona, though we know not whence they obtain it, is that the remedy suggested in the Saint's dream was not to be applied to a famine, but to the dilapidation of this very Chapel which he was at that time building, and of which, by the agency of the Evil Spirit, as large a portion fell down every night as had been erected during the preceding day. Oran volunteered himself as the propitiatory victim, and Columba, anxious concerning his fate, visited the corpse three days after its inhumation. His surprise may be imagined when he found his friend still alive, and so inclined to be communicative relative to the secrets of the Spiritual World, into which it seems he had been admitted, that, in order to prevent indiscreet disclosures, Columba recommitted him with double surety to the grave.

In this Chapel are several tombs, and near at hand many more. One bearing a ship, which is probably Norwegian; one of the Father of Abbot Macfingen, dated 1489; that of Macdonald Innis, who accompanied Bruce at Bannockburn; some of the family of Macleane; and several that have lost all memorial of their tenants. A King of France, in like manner nameless, is said to lie beneath a red, unpolished stone, about 70 feet South of the Chapel. A well-known Physician of Mull, John Belon, who died in 1657, has been more

scriptions.

fortunate hitherto, and his inscription still remains. North-West of the door is the pedestal of a Cross; on it are some stones called *Clachabràth*, which are probably substituted for some Druidical globes, of which William Sacheverell, Governor of the Isle of Man, who visited I-columb-kill in 1688, has given the following account:—"We were obliged to pass by a place where had formerly stood three noble globes of white marble, I suppose design'd for some Mathematical uses: they were plac'd on three stone basins, and custom or superstition had taught all persons who pass'd by to turn them round. These globes were call'd *the Day of Judgment stones*, and the people were made believe, that when they had worn the sockets or pedestals by the continued motion of passengers, that then the World should be at an end. These Globes the Synod (of Argyle, about 1560) order'd to be thrown into the sea, perhaps hoping that when these dangerous instruments of it were removed, it might n'e're come to pass." This same Iconoclastic Synod enjoined also the destruction of numerous Crosses.

Cathedral.

The Cathedral lies North of this enclosure; it is cruciform; in length from East to West 115 feet, (Macculloch says about 160,) in breadth 23; the transept in length 70. It is crowned by a central tower, about 70 feet high. Sacheverell has described the interior as follows: "To say the truth every thing seem'd dispos'd to use rather than grandeur, tho' (considering the country and time in which it was built) magnificent enough." He mentions but three monuments in the interior, but adds, that "the Dean of the Isles, Mr. John Frazer, (an honest Episcopal Minister,) who since made me a visit, told me his father, who had been Dean of the Isles, left him a Book with above 300 inscriptions, which he had lent to the late Earl of Argyle, a man of incomparable sense and great curiosity, and doubts they are all lost by that great man's affliction. There is one thing yet which is very noble in its kind, which was the ancient altar of the Church, one of the finest pieces of white marble I ever saw; it is about 6 feet long, and 4 broad, curiously vein'd and polish'd, it is all yet entire, except one corner, which has been broke by accident." But a small portion of this altar remained at Pennant's visit, "and even that," says he, "we contributed to diminish." Abbot Macfingen, Abbot Kenneth, and an armed knight, are still sculptured on their respective tombs. In the Churchyard is a fine Cross, 14 feet high, of a single piece of red granite, on a pedestal 3 feet in height. Near the South-East end is a Mary Chapel.

Altar.

The ruins of the Monastery lie behind the Cathedral, and but a small remnant of the Cloyster remains. Herein were used to be kept, and are still said to be concealed, certain mystic black stones, upon which the Highland Chiefs were wont to make their contracts and alliances; and an oath ratified by which was considered as inviolable as that sworn by a Pagan Divinity on Styx. North from the Monastery are the ruins of the Bishop's house, a mount, the site of gardens, a kiln, a granary, a mill, and a pond.

lack
stones.Visit of Dr.
Johnson.

The visit of Dr. Johnson to I-columb-kill occurred in the year following that of Pennant, and was productive of a splendid passage in his *Journey to the Western Islands*, which must be fresh in the recollection of every English reader. The great Moralist on inspecting the tombs of the Kings, remarks, that "the graves are very numerous, and some of them undoubtedly contain the

remains of men who did not expect to be so soon forgotten." A similar train of thought was awakened in the mind of Sacheverell, and is, perhaps, yet more forcibly expressed. "This, said the person who showed me the place, (pointing to a plain stone,) was the monument of the great Teague, King of Ireland. I had never heard of him, and could not but reflect of how little value is greatness, that has barely left a name scandalous to a nation, and a grave the meanest of mankind would never envy."

Dr. Macculloch did not visit Iona in the spirit of Dr. Macculloch. Monro, Sacheverell, Pennant, or Johnson; but he carried with him a rooted scepticism most unfavourable to Imagination. The ruins, in his eyes, are all of much later origin than is generally claimed for them. The monuments bear in themselves no evidence of high antiquity. The end of the XIIIth century is the very earliest date which he will admit for any of the buildings. Of the Tombs of the Kings he speaks as a lying legend; and the Library, the treasures of which Boethius so loudly vaunts,—the plunder of Rome, which Fergus II. begged from his friend Alaric, and which was destroyed during the incursion of the Northmen,—he reduces to a few Biographies of Saints and some Breviaries. We should prefer all the hazards of implicit belief to this sagacious determination not to be even agreeably deceived.

ICONOCLAST, } Fr. *iconoclaste*; from Gr. *εἰκών*,
ICONOCLASTICK. } an image, and *κλαστής*, a breaker,
from *κλάειν*, *frangere*, to break.

An image-breaker.

I remember only one thing objected to this testimony of so many bishops, that they were *iconoclasts*, or breakers of images, and therefore not to be trusted in any other article.

Taylor. *Polemical Discourses*, p. 263. *Of the Real Presence*.

Under his auspices [Constantinus Copronymus] a council of *iconoclasts* was held, in which the adoration and the use of images was condemned. Their decrees were put in execution, and a massacre of painted and wooden gods ensued.

Jortin. *Remarks on Ecclesiastical History*, Anno 741

Both were embellished with a profusion of statues; most of those at York were destroyed in the first emotions of *iconoclastic* zeal; those of Burgos are still in full possession of the homages of the country, and consequently entire. Swinburne. *Spain*. Letter 44.

The name ICONOCLAST was first given to a Faction of the VIIIth century, which, in conformity with an edict of Leo the Isaurian, undertook to demolish all Images and Pictures in Churches as idolatrous. They were also called *Iconomachi*. Their opponents, who were supported by the Popes Gregory I. and II., received the name of *Iconoduli* or *Iconolatæ*.

ICONOGRAPHY, Gr. *εἰκονογραφία*, a description of images, from *εἰκών*, an image, and *γράφειν*, to write or describe.

The inspection alone of these curious *iconographies* of temples and palaces affects one as much by reading almost, as by sight.

Burton. *Anatomy of Melancholy*, fol. 269.

ICONOMICAL, Gr. *εἰκονομαχός*, one who is adverse or inimical to images, from *εἰκών*, an image, and *μάχη*, *pugna*.

We should be too *iconomical* [or quarrelsome with pictures—Margin] to question the pictures of the winds, as commonly drawn in humane heads, and with their cheeks distended.

Sir Thomas Brown. *Vulgar Errors*, book v. ch. xxi.

ICTERICAL, Fr. *ictère*, *ictérique*; Lat. *ictericus*; Gr. *ικτερικός*, from *ικειν*, *venire*, *obvenire*, q. d. *subitò adveniens vel occupans scilicet morbus*. Lennep. Sick of, troubled with, the yellow jaundice. Cotgrave.

IDEO'LOGY, } For the usage of this word by the
IDE'ATE. } Greek Philosophers, see the Quotation
from Holland's *Plutarch*; for the modern usage, see
those from Locke and Reid.

Idea is a bodilesse substance, which of itselfe hath no subsistence, but giveth figure and forme unto shapelesse matters, and becommeth the very cause that bringeth them into show and evidence. Socrates and Plato suppose, that these *ideas* be substances separate and distinct from matter, howbeit, subsisting in the thoughts and imaginations of God; that is to say, of mind and understanding. Aristotle admitteth verily these formes and *ideas*, howbeit, not separate from matter, as being the patterns of all that which God hath made. The Stoicks, such as were the scholars of Zeno, have delivered, that our thoughts and conceits were the *idea*.

Holland. *Plutarch*, ch. x. fol. 666. *Opinions of Philosophers*.

Within my hart though hardly it can shew
Thing so diuine to view of earthly eye:
The faire *idea* of your celestial hew,
And euery part remaines immortally.

Spenser. *Sonnet* 45.

That sadness past, which partings had contracted,
And fed their fancies with *ideall* shewes,
And careless what they did, as quite distracted,
All (breathing battel) talk'd but of ore-throwes.

Stirling. *Jonathan*.

A transmission is made materially from some parts, and *ideally* from every one.

Sir Thomas Brown. *Vulgar Errours*.

Sir, more than kisses, letters mingle souls,
For, thus friends absent speak. This ease controuls
The tediousnesse of my life: But for these
I could *ideate* nothing, which could please,
But I should wither in one day.

Donne to Sir Henry Wotten.

For *ideas*, in my sense of the word, are, "Whatsoever is the object of the understanding, when a man thinks; or, whatsoever it is the mind can be employ'd about in thinking." And again, I have these words, "Whatsoever is the immediate object of perception, thought or understanding, that I call *idea*."

Locke. *Works*, vol. i. fol. 376. *Letter to the Bishop of Worcester*.

With inward view,
Thence on th' *ideal* kingdom swift she turns
Her eye; and instant, at her powerful glance,
Th' obedient phantoms vanish or appear.

Thomson. *Summer*.

What the ancient philosophers call species, sensible and intelligible, and phantasms, in later times, and especially since the time of Des Cartes, came to be called by the common name of *ideas*.

Reid. *Essay* 2. chap. viii. *Of the Theory of Perception, &c.*

This language of Diderot's, "that every *idea* must necessarily resolve itself ultimately into a sensible representation or picture," (a relic of the old *ideal* system) they have not only rejected with contempt, but they have insisted, that when it was used by the Aristotelians, by Des Cartes, by Locke, it was meant by them to be understood only as a figure or metaphor.

Stewart. *Philosophical Essays*, ess. 4. p. 139.

One (mistake respecting the Berkeleyan theory) confounds the scheme of *idealism* with those sceptical doctrines, which represent the existence of the material world as a thing which is doubtful.

Id. *Ib.* ess. 2. ch. i. p. 53.

IDEA.
—
IDES.

The truth is that, whereas Berkeley was sincerely and bona fide an *idealist*, Hume's leading object in his metaphysical writings, plainly was to inculcate a universal scepticism.

Stewart. *Philosophical Essays*, ess. 2. ch. i. p. 56.

Our neighbours, in the mean time, have made choice of the term *ideology*, (a Greek compound, involving the very word we have been attempting to discard) to express that department of knowledge which had been called the science of the human mind.

Id. *Ib.* ess. 3. p. 113.

IDENTITY, } Fr. *identité*; It. *identità*; Sp.
IDE'NTICK, } *identidad*; Low Lat. *identitas*;

IDE'NTICALLY, } calls it—the being almost the very
IDE'NTIFY, } same. See the Quotation from
IDENTIFICA'TION. } Locke.

Identify; to be or cause to be, to show or prove to be, the same.

John Amersham was born in that small corporation in this county, bred a monck in St. Albans, whence he contracted not only intimacy but in some sort *identity* of affection, with John Wheathamsted, abbot thereof.

Fuller. *Worthies*. *Buckinghamshire*.

And Plato verily was of this opinion, (which he professed openly, and held as a firm and undoubted truth) that the soule of this universall world is not simple, uniforme, and uncompounded but mixed (as it were) of a certaine power of *identity* and of diversity.

Holland. *Plutarch*, fol. 54.

The *identity* of the same man consists in nothing but a participation of the same continu'd life, by constantly fleeting particles of matter in succession vitally united to the same organiz'd body.

Locke. *Works*, vol. i. fol. 144. *Of Human Understanding*, book ii. ch. xxvii. sec. 6.

Lady, your bright
And radiant eyes are in the right;
The beard's th' *identique* beard you knew,
The same numerically true.

Butler. *Hudibras*, part ii. can. 1.

To this intent, we may observe, that the greatest assurance and most eminent knowledge we can have of anything is, of such propositions as in the schools are call'd *identical*; as if one should say, John is John, or a man is a man.

Digby. *Of Man's Soul*, ch. ii. p. 18.

Let them be compounded of parts homogeneous, or heterogeneous, so long as these are parts in any sense of the word, they cannot subsist in one another, or be *identified*; they must be conceived as distinct from each other, and have distinct affections.

Law. *Enquiry*, ch. iii. *Of Immensity and Eternity*.

And to that purpose, reflecting upon those instances we have given of *identical* propositions, we may in them observe, that evidence arises out of the plain *identification* of the extremes that are affirm'd of one another: so that, in what proportion soever the *identification* of the extreme is plain, the truth of it is evident to us, and our mind is satisfi'd and quiet.

Digby. *Of Man's Soul*, ch. ii. p. 19.

I cannot remember a thing that happened a year ago, without a conviction as strong as memory can give, that I, the same *identical* person who now remember that event, did then exist.

Reid. *Essay* 3. ch. i. *Of the Human Mind*.

Neither unbelievers nor believers will allow to these middle men that a new-existing soul, which is only a quality resulting from a glorified body, can be *identically* the same with an annihilated soul, which had resulted from an earthly body.

Warburton. *The Divine Legation*, book v. sec. 6.

Let us *identify*, let us incorporate ourselves with the people. Let us cut all the cables and snap the chains which tie us to an unfaithful shore, and enter the friendly harbour, that shoots far out into the main its moles and *jetties* to receive us.

Burke. *On the Economical Reform*.

IDES, Fr. *ides*; It. *ide*; Sp. *idos*; Lat. *idus*. The Etymologies proposed by Plutarch are rejected by Vossius, who adopts from Macrobius the ancient Tuscan, *iduate*; *i. e. dividere*, to divide: (and *iduate*, according to Becman, is *eis dôw*, into two, *sc. parts* or portions) the *ides* being so called because they divide the month in *duas velut partes*.

IDES.

—
IDIO-
PATHY.

As for the *ides*, they took their name of this word *ἰδῆς*, that signifieth beauty; for that the moon being then at the full is in the very perfection of her beauty; or haply they derived this denomination of *ἰδῆς*, as attributing it to Jupiter.

Holland. *Plutarch*, fol. 702. *Rom. Quest.* 24.

There was a certain soothsayer, that had given Cæsar warning long time afore, to take heed of the day of the *ides* of March, (which is the fifteenth of the month) for in that day he should be in great danger. That day being come, Cæsar going into the senate-house, and speaking merrily unto the soothsayer, told him the *ides* of March be come: So they be, softly answered the soothsayer, but yet are they not past.

Sir Thomas North. *Plutarch*, fol. 613. *Julius Cæsar*.

IDIA, in *Zoology*, a genus of horny corals, belonging to the family *Sertulariadae*.

Generic character: coral plant-like; branches alternate, compressed, furnished with distant, prominent, alternating cells; which are acute and recurved.

This genus contains but a single species, which is one of the most singular of the family; it was discovered by Lesueur, who found it in his voyages to the South Seas. According to Lamaroux, the position of the cell makes the branches have the exact appearance of the saw-like snout of the Saw-fish, (*Squalus pristis*, Lin.) which has caused the species to be called *I. pristis*. It has been figured by Lamaroux in his edition of Ellis, pl. lxvi. fig. 10—14.

Tremenville has given the same name to a genus of radiated animals allied to Beroc.

IDIOM, } Fr. *idiome*, *idiotisme*; It. and
IDIOMA'TICK, } Sp. *idioma*, *idiotismo*; Lat. *idioma*;
I'DIOTISM, } Gr. *ἰδιώμα*, from *ἰδιος*, proper or pe-
IDIOMA'TICAL. } culiar; for *idiom* is a propriety or peculiarity of speech. It may be explained

A peculiar propriety of speech in a particular language, or a propriety of speech peculiar to a particular language: not reduced within the general rules of the grammar of that language.

Besides the ill habit which they get of wretched barbarizing against the Latine and Greek *idiom*, with their untutored Anglicisms, odious to be read, yet not to be avoided, without a well continued and judicious conversing among pure authors digested, which they scarce taste.

Milton. *Prose Works*, vol. i. fol. 136. *Of Education*.

Many times the literati and scholars coyn new words, and sometimes in common speech or writing in their native language, give terminations and *idiotisms* suitable to their native language, unto words newly invented or translated out of other languages.

Hale. *Origin of Mankind*, ch. iv. sec. 2 fol. 165.

But whence art thou inspir'd, and thou alone
To flourish in an *idiom* not thy own?

Dryden. *Epistle* xii.

When, upon a greater familiarity with the *idiotisms*, the sense, and the applicableness of Scripture, I came to survey it, I then in some places marked the whole chapter.

Boyle. *Works*, vol. ii. p. 321. *On the Style of the Holy Scriptures*.

We may have lost somewhat of the *idiotism* of that language in which it was spoken; and where the conceit is couched in a single word, if all the significations of it are not critically understood, the grace and the pleasantry are lost.

Dryden. *Prose Works*, vol. ii. p. 406. *The Life of Plutarch*.

rather, "plain in your ornaments." Milton mistakes the *idiomatical* use and meaning of *Munditia*.

Warton. *Milton*. *Horace*, ode v. book i. note 5.

Character has no manner of influence, in the case and freedom of conversation, on the *idiomatic* differences of expression which flow not from the manners, but from some degree of study and affectation, and only characterize their written and artificial works.

Hurd. *Works*, vol. iii. p. 38. *Preface on the Manner of Writing Dialogue*.

IDIOPATHY, Gr. *ἰδιοπάθεια*; Lat. *idiopathea*, from *ἰδιος*, proper or peculiar; and *πάθος*, passion or affection.

Applied as explained in the first Quotation from More.

Idiopathie, *ἰδιοπάθεια*, is one's proper peculiar *πάθος*, mine or thine, being affected thus or so upon this or that occasion.

More. *Song of the Soul*. *Interpretation of more unusual Words*.

For all men are so full of their own phansies and *idiopathies*, that they scarce have the civility to interchange any words with a stranger.

Id. *Ib*. *Preface to Psychathanasia*.

IDIOSYN'CRASY, } Gr. *ἰδιος*, *proprius*, and *σύγκ-*
IDIOSYNCRAT'ICK. } *κρασις*, from *σύν*, and *κράσις*,
mixtio.

A peculiar commixture or temperament, sc. of mind

For the soul in its first and pure nature hath no *idiosyncrasies*, that is, hath no proper natural inclinations which are not competent to others of the same kind and condition.

Glanvil. *Preexistence of Souls*, ch. x.

Whether quails from any *idiosyncrasy* or peculiarity of constitution do innocuously feed upon hellebore or rather sometime but medically use the same?

Sir Thomas Brown. *Vulgar Errors*, book iii. ch. xxvii.

We have observed, that the denial of God's moral attributes is the great barrier against religion in general: but it is more especially serviceable in his lordship's *idiosyncratic* terrors, the terrors of a future state.

Warburton. *The Divine Legation*, book ii. Appen. p. 217.

IDIOT, } Fr. *idiot*; It. and Sp. *idiota*; Lat.
IDIO'TICK, } *idiota*; Gr. *ἰδιώτης*, from *ἰδιος*, proper,
IDIO'TICAL, } peculiar, private.

I'DIOTISM, } A private person, opposed to one
I'DIOTCY, or } who had obtained public distinction
I'DIOCY. } or eminence; extended to the rude, unlearned, (as in the Quotation from Wiclif, and in v. 23, 24. of the same chap.) ignorant; then, further, to the simple, foolish; those destitute of the ordinary powers of mind. And see the Quotation from Blackstone.

For the legal enactments relative to *idiots*, see LUNACY.

For if thou blessist in spyrit, who filleth the place of an *idiot*, (*qui supplet locum idiotæ*), thou schal he seie amen on thi blessing.

Wiclif. 1 *Corynthians*, ch. xiv.

What, wenest thou make an *idiot* of our dame?

Chaucer. *The Wif of Bathes Prologue*, v. 3893.

And euerye man thought his own wysdome best, which God hath proued stark folyshnesse all, and moost *ydiotyshe* dottage.

Bale. *Image*, part i. sig. p. 7.

Turne a child loose into an apothecaries shop, or an *idiot*, that gally-pot which looks fairest, shall have his first hand, though full of poisonous drugs: where the judicious would chuse the wholesomest, led not by sense, but skill.

Hall. *Epistle* ix. vol. i. fol. 300. decade 3.

[No man can] think that there is any profit, any advantage in gaining the whole world, if accompanied with the least hazard or possibility of losing his own soul: and therefore the running that adventure is the greatest *idiotism*, the most deplorable, woful simplicity in the world.

Hammond. *Works*, vol. iv. p. 578. *Sermon* 3.

THEY. Why thou picture of what thou seem'st, and idoll of *ideot-worshippers*, here's a letter for thee.

Shakspeare. *Troilus and Cressida*, fol. 100.

Dr. Plot, in his *History of Staffordshire*, tells us of an *ideot* that chauncing to live within the sound of a clock, and always amusing himself with counting the hour of the day whenever the clock struck, the clock being spoiled by some accident, the *ideot* continued to strike and count the hour without the help of the clock, in the same manner as he had done when it was entire.

Spectator, No. 447.

Long mute he stood, and leaning on his staff,
His wonder witness'd with an *idiot laugh*;
Then would have spoke, but by his glimmering sense
First found his want of words, and fear'd offence.

Dryden. *Cymon and Iphigenia*.

IDIO-
PATHY.

—
IDIOT.

IDIOT.
—
IDLE.

The stupid succession persisted to the last, in maintaining that the sun, moon, and stars were no bigger than they appear to the eye, and other such *idiotic* stuff against mathematical demonstration.
Bentley. Of Free-thinking, p. 204.

If in reality his philosophy be foreign to the matter professed; if it goes beside the mark, and reaches nothing we can truly call our interest or concern; it must be somewhat worse than mere ignorance or *idiotism*.

Shaftesbury. Advice to an Author, part iii. sec. 1.

An *idiot*, or natural fool, is one that hath had no understanding from his nativity; and therefore is by law presumed never likely to attain any.
Blackstone. Commentaries, book i. ch. viii.

But with us, when a man on an inquest of *idiocy* hath been returned an unthrift and not an *idiot*, no further proceedings have been had.
Id. Ib.

IDLE, v.
IDLE, adj.
IDLENESS,
IDLESHIP,
IDLESSE,
IDLY,
IDLE-BRAINED,
IDLE-HEADED.

D. iidel; A. S. idel, aydlige, which latter Somner refers to *aidlian, irritum facere*; and *aidlod*, the past part. he interprets *irritus*, void, of no effect; also *vacans, otiosus*, vacant, idle. Hence he also says, an *addle* egg; and Tooke is persuaded that *addle* and *idle* (by sliding over the *d* in pronunciation *ail, ill*) are the past part. of the A. S. verb *aidlian, ægrotare, exinanire, irritum facere, corrumpere*. The D. *iidelen*, (*Kilian*), *inanire, exinanire, vacuare, evacuare*, is evidently the same verb:—to *ail*, to be or become empty or vacant, to render void, vain or fruitless, to spoil.

To render void, vain or fruitless, to spoil, to consume, to waste.

An *idle* man, one who wastes or trifles away; *sc.* his time; renders it vain, fruitless, or useless; one who is inactive, lazy, sluggish, slothful, unemployed.

Any thing *idle*; vain, fruitless, useless; trifling or trivial, unimportant.

Idle time; time unemployed, disengaged from active pursuits.

To do any thing *idly*; to do it vainly, fruitlessly, triflingly, carelessly.

Vor wanne men beþ al *ydel*, þat er batayles soȝte,
Her *ydelnesse* hem ssal brýnge to synne lecherye,
To tauerne, and to sleuþe, and to hasarderýe.

R. Gloucester, p. 195.

Also thei *idel* lernen to go aboute housis, not oouli *idil* but ful of wordis and curiouse speekynge thingis that behoueth not.

Wiclif. 1 Tymo. ch. v.

And also they learne to go frō house to house *idle*; yea not *idle* only, but also triflig and busye bodies, speakyng things whych are not comely.

Bible, Anno 1551.

Eterne God, that thurgh thy purveance
Ledest this world by certain governance,
In *idel*, as men sain, ye nothing make.

Chaucer. The Frankeleines Tale, v. 11179.

Than cometh *idleness*, that is the yate of all harmes. An *idel* is like to a place that hath no walles; theras deviles may enter on every side, or shoot at him at discoverte by temptations on every side.

Id. The Persones Tale, vol. ii. p. 346.

And if they techen to restreyne
My loue, it were an *idell* peyne
To lerne a thyng, which maie not bee.

Gower. Conf. Am. book iv. fol. 78.

Among these other of sloutes [sloth's] kinde,
Whiche all labour set behinde,
And bateth all besines,
There is yet one; whiche *idleness*

Is cleped and is the norice
In man's kynde of euery vice.

Gower. Conf. Am. fol. 69.

For of *idleship*
He [Loue] hateth all the felauship.

Id. Ib. fol. 76.

Neyther is it lawfull to forsake thy neyghbour, and to withdraw thyselfe from seruing him, and to get thee into a den, and liue *idly* profitable to no man.

Tyndall. Workes, fol. 154. The Obedience of a Christian Man.

A louer may bestride the gossamour,
That *ydes* in the wanton summer ayre,
And yet not fall.

Shakspeare. Romeo and Juliet, fol. 64.

But, when they came where that dead dragon lay,
Stretcht on the ground in monstrous large extent,
The sight with *idle* feare did them dismay,
Ne durst approach him nigh, to touch, or once assay.

Spenser. Faerie Queene, book i. can. 12.

Wherin of antars vast, and desarts *idle*.
Rough quarries, rocks, hills, whose head touch heauen,
It was my hint to speake.

Shakspeare. Othello, fol. 314.

KATH. Why do you talk so?
Would you were fast asleep.

FRANK. No, no; I am not *idle*.

Ford. The Witch of Edmonton, act iv. sc. 2.

On me the curse aslope
Glanc'd on the ground, with labour I must earne
My bread, what harm? *Idleness* had bin worse;
My labour will sustaine me.

Milton. Paradise Lost, book x. l. 1055.

All which my dayes I haue not lewdly spent,
Nor split the blossome of my tender yeares
In *idlesse*; but as conuenient.

Spenser. Faerie Queene, book vi. can. 2.

Diuerse delights they found themselues to please;
Some sung in sweet consort, some laught for ioy,
Some plaid with strawes, some *idlie* sate at ease.

Id. Ib. book ii. can. 9.

Is the man *idle-brain'd* for want of rest.

Chapman. Homer. Odyssey, book xviii. fol. 285.

You haue heard of such a Spirit, and well you know
The superstitious *idle-headed* eld.
Receiu'd, and did deliuer to our age
This tale of Herne the hunter, for a truth.

Shakspeare. Merry Wives of Windsor, fol. 56.

Else, when the flowrets of the season fail,
Though one would saue you, not one grain of wheat,
Should pay such songster's *idling* at my gate.

Parnell. The Flies. An Eclogue.

His friend smil'd scornful, and with proud contempt
Rejects as *idle* what his fellow dreamt.

Dryden. The Cock and the Fox.

The meditated blow,
Stooping, he shunn'd; the javelin *idly* fled,
And hiss'd innoxious o'er the hero's head.

Pope. Homer. Iliad, book xvii.

For who'd sustain war's toil and waste,
Or who th' hoarse thund'ring of the sea,
But to be *idle* at the last,
And find a pleasing end in thee.

Smart. Ode 1. Idleness.

For thee, O *Idleness*, the woes
Of life we patiently endure,
Thou art the source whence labour flows,
We shun thee but to make thee sure.

Id. Ib.

Forgive him then, thou bustler in concerns
Of little worth, an *idler* in the best,
If, author of no mischief and some good,
He seek his proper happiness by means,
That may advance, but cannot hinder thine.

Cowper. The Task, book i.

IDLE.

IDOL.

I'DOL,
IDO'LATER,
IDO'LATRESS,
IDO'LATRIZE,
IDO'LATRY,
IDOLA'TRICAL,
IDO'LATROUS,
I'DOLIZE,
I'DOLISH,
I'DOLISM,
I'DOLIST,
I'DOLIZER,
I'DOLOUS,
I'DOL-GOD,
I'DOL-MONGER,
I'DOL-SERVING,
I'DOL-WORSHIP.

Fr. *idole*; It. and Sp. *idolo*;
Lat. *idolum*; Gr. *εἶδωλον*, from
εἶδος, an image. See the first Quo-
tation from Tyndall.

An image, species or representa-
tion; emphatically an image wor-
shipped, adored: any person or
thing, adored, loved to excess.

An *idol* or image is also opposed
to a reality; thus Lord Bacon (see
the Quotation from him) speaks of
idols or false appearances; of which
he discourses at large in the IVth
book of the 5th chapter *De Aug-
mentiis Scientiarum*.

But of metis that ben offrid to *idolis* we witen that an *idol* is no
thing in the world, and that there is no God but oon.

Wiclif. 1 *Corynthians*, ch. viii.

To speake of meate dedycat vnto *ydols*, we are sure y^t ther is none
ydol in y^e worlde, and that there is none other God but one.

Bible, Anno 1551.

And while Poul abood hem at Atheynys his spirit was moued in
him, for he saigh the citee ghoun to *idolatrie*.

Wiclif. *The Dedis of Apostlis*, ch. xvii.

The angel of God hath me the trouth ytaught,
Which thou shalt seen, if that thou wilt reney
The *idoles*, and be clene, and elles naught.

Chaucer. *The Second Nonnes Tale*, v. 15737.

What difference is ther betwix an *idolastre*, and an avaricious
man? But that an *idolastre* peradventure ne hath not but o maumet
or two, and the avaricious man hath many: for certes, every florein
in this coffre is his maumet.

Id. *The Persones Tale*, vol. ii. p. 350.

And therefore sayth Seint Paul, that an avaricious man is the
thraldome of *idolatrie*.

Id. *Ib.*

And thus the fende from daie to daie
The worship of *idolatrie*
Drough forth vpon the fantasie
Of him, that were then blynde,
And couthen nought the trouth finde.

Gower. *Conf. Am.* book v. fol. 92.

If ye bestowe the fastynges and abstaynynges of the Scriptures
now, vpon such Jewyshe feastes, ye do as ded your pay pay, your
papa, I shuld saye, whyche appoynted thē to hys *ydolatrous* dayes
of ydleness.

Bale. *Apology*, fol. 55. sig. G. 7.

Serue none image in your harts. *Idolatrie* is Greeke, and the
English is *imageseruire*; and an *idolater* is also Greke, and the
English an *imageseruant*.

Tyndall. *Workes*, fol. 424. John, ch. v.

Whē such an image or *idolouse* prince is thus vp set or constituted
by authoritie, he maye in no wyse speake, but oute of that spirit y^t
their cōiurers, cōfessours I shuld sai, haue put into him.

Bale. *Image*, part ii. sig. K. 1.

That men beholding so great excellence,
And rare perfection in mortalitie,
Doe her adore with sacred reuerence
As th' *idole* of her Maker's great magnificence.

Spenser. *Faerie Queene*, book ii. can. 2.

I do find therefore in this enchanted glass four *idols*, or false ap-
pearances of several distinct sorts, every sort comprehending many
subdiuisions: the first sort, I call *idols* of the nation or tribe; the
second, *idols* of the palace; the third, *idols* of the cave; and the
fourth, *idols* of the theatre, &c.

Bacon. *Works*, vol. i. p. 387. *Of the Interpretation of Nature*.

I finde that Jesabel (that cursed *idolatrese*) caused the blood of the
prophets of God to be shed, and Naboth to be murdered unjustly for
his own vineyard; but yet I think she never erected half so many
gallows in all Israel, as mischeivous Mary hath done within London
alone.

The *Admonition of John Knox*, fol. 60.

— That uxorious King, whose heart though large,
Beguil'd by fair *idolatresses*, fell
To *idols* foul.

Milton. *Paradise Lost*, book i. l. 445.

Idol unto himself, shame to the wise,
And all that honour thee *idolatrize*.

Daniel. *The Complaint of Rosamond*.

CHOR. Yet with this strength thou serv'st the Philistines
Idolatrous, uncircumcis'd, unclean.

SAM. Not in their *idol-worship*, but by labour
Honest and lawful to deserve my food
Of those who have me in their Civil power.

Milton. *Samson Agonistes*, p. 120.

I do not tell you of miserable Indians *idolatrously* adoring their
devillish pagodes.

Hall. *Works*, vol. iii. fol. 111. *The Character of Man*.

As for those captive tribes, themselves were they
Who wrought their own captivity, fell off
From God to worship calves, the Deities
Of Egypt, Baal next and Ashtaroth,
And all the *idolatrics* of heathen round.

Milton. *Paradise Regained*, book iii. l. 417.

When they have stuff'd their *idolish* temples with the wasteful
pillage of your estates, will they yet have any compassion upon you,
and that poor pittance which they have left you.

Id. *Works*, vol. i. fol. 27. *The Reason of Church Government*.

How wilt thou reason with them, how refute
Their *idolisms*, traditions, paradoxes?

Id. *Paradise Regained*, book iv. l. 234.

— This pomp have brought
To Dagon, and advanc'd his praises high
Among the heathen round; to God have brought
Dishonour, obloquy, and op't the mouths
Of *idolists* and atheists.

Id. *Samson Agonistes*, l. 453.

— Thou'lt heare
How their cold language tells thee, that thy skin
Is but a beauteous shrine, in which black sin
Is *idolized*.

Habington. *Castara*, part ii. *Elegy* 2.

Before their mother's gods they fondly fall,
Vain *idol-gods*, that have no sense nor mind.

Cowley. *Women's Superstition*.

Begin thy reign with God; purge the church, demolish those piles
of abomination; abandon those *idol-mongers*, restore devotion to its
purity.

Hall. *Cont.* vol. i. fol. 1174. *Reboam*.

With these now nam'd the *idoll-serving* bands
What number loe (time past) their folly findes?

Stirling. *Doomes-day. The Sixth Houre*.

When I was at Maderas, or Fort George, I took notice of a great
ceremony used for several nights successively by the *idolaters* inha-
biting the suburbs: both men and women (these very well clad) in a
great multitude went in solemn procession with lighted torches,
carrying their *idols* about with them.

Dampier. *Voyages*, Anno 1687.

The Saxons were a sort of *idolatrous* pagans, that worshipped
several gods peculiar to themselves, among whom Woden, Thor, and
Frea, were the chief, which left their memories still preserved by the
common names of three days in the week.

Sir William Temple. *An Introduction to the History of England*,
vol. iii. p. 99.

Another may *idolize* his money, and make his gold his God; and,
in such a case, is it not really more profitable for him to lose an
earthly estate, than to have no treasure in heaven?

South. *Sermons*, vol. x. p. 141.

That is to say, this is the true Religion, and the way to eternal
life, viz. the worship of the true God by and through his Son Jesus
Christ; beware of *idol-worship*.

Clarke. *On the Trinity*, ch. i. sec. 3. p. 52.

Like a coy maiden, Ease, when courted most,
Farthest retires—an *idol*, at whose shrine
Who oft'nest sacrifice are favour'd least.

Cowper. *The Task*, book i.

The truth is this: The usurped right of punishing for opinions was
first assumed and long ingrossed by *idolaters*. And, if tradition may
be believed, Abraham himself narrowly escaped the fire for preaching
against its divinity.

Warburton. *The Divine Legation*, book vi. *Appendix*, p. 148.

IDOL.

IDOL.
—
IDOTEA.

Jeremiah draws them in the very same colour. Though they say, the Lord liveth, surely they swear falsely, i. e. vainly, *idolatrously*. Why? The reason is given soon after: they swore likewise by their idols.

Warburton. *The Divine Legation*, book v. sec. 2. p. 56.

As the renouncing him for king was the throwing him off as God; and as the renouncing him for God was the throwing him off as king; *idolatry*, which was the rejecting him as God, was properly the *crimen læsæ majestatis*; and so justly punishable by the Civil laws.

Id. Ib. p. 26.

I have observed the affectation, which, for many years past, has prevailed in Paris even to a degree perfectly childish, for *idolizing* the memory of your Henry the Fourth.

Burke. *On the Revolution in France*.

Though I be not such an *idolizer* of antiquity as Harris, yet they have great charms for me.

Warburton. *Letter 48. To Hurd*.

IDOMEA, in *Zoology*, a genus of stony corals, belonging to the family *Milleporidæ*.

Generic character. Coral fossil, branchy, stony, branches very diverging, twisted and curled, three-sided, two of the sides covered with cells; cells conical, truncated, prominent, separated from each other, and placed in transverse, parallel lines, dilated at the third side, slightly channeled, smooth or polished without any appearance of cells.

Fragments of this coral are found in the hard, white, coral-bearing limestone of Caen; they are generally about a line in diameter. The type and only species of the genus is *I. triquetra*, Lamaroux, who has figured it in his *Continuation of Ellis*, pl. lxxix. fig. 13—15. It is nearly allied to *Spiropora tetragona*, but differs in one side being poreless.

IDONEOUS, Lat. *idoneus*, perhaps from the Gr. *ἰδῖος*, proper, peculiar, and therefore,

Suited or adapted to, fit.

By which he expresses his conception and idea for the judicious collocation, *idoneous* and apt disposition, right casting and contrivement of the several parts and rooms, according to their distinct offices and uses.

Evelyn. *Miscellaneous Writings*, p. 371. *Of Architects and Architecture*.

Especially if, on the same sheet of paper, some other fit mineral water, or *idoneous* liquor be likewise dropped.

Boyle. *Works*, vol. iv. p. 806. *Memoirs on the History of Mineral Waters*.

IDOTEA, in *Zoology*, a genus of *Isopodous Crustacea*, forming the type of the family *Idoteidæ*.

Generic character. *Antennæ* four on a cross line, the side one cetaceous, composed of a great many joints, the middle one shorter, filiform, and formed of four joints; legs fourteen, hooked; the tail or hinder belly formed of three joints, of which the last is very large and simple.

Linnæus and Pallas placed these insects with the *Onisci*, or Woodlice; Degeer placed them with the *Squillæ*, or Martis Crabs: they have been lately formed into a family by themselves.

The body of these animals is generally divided by a longitudinal groove on each side, which gives them much the appearance of the celebrated *Trilobites*, or Dudley's Fossils; and indeed they are the recent animals, which appear to be most nearly allied to the Fossil Paradoxical Crustacea.

Degeer has given a very long and interesting description of the manner and organization of these animals. They live in the sea, swimming well, being aided by their legs and gills. They live on dead animal matter, and they are accused of destroying the fishermen's nets.

The type of the genus is *I. entomon*, the *Oniscus entomon* of Linnæus.

IDYA, in *Zoology*, a genus of soft radiated animals, allied to the genera *Stephanomia* and *Pyrosomæ*, established by Fremenville, and adopted by Ocken.

Generic character. Body cylindrical, smooth, in the form of a long bag, without any *tentacula* to the mouth, the substance composed of longitudinal tubes, divided by cross lines.

The type of the genus is *I. infundibulum* of Fremenville.

JE'ALOUS, } Fr. *jaloux*; It. and Sp. *gelose*;
JE'ALOUSLY, } Lat. *zelotypus*, *zelus*. *Zelus*, Vos-
JE'ALOUSNESS, } sius derives from *ξέ-ειν*, *fervere*, to
JE'ALOUSY. } warm, to glow, because it is properly that warmth or fervour of mind, which is distinguished in emulation or rivalry: it is then extended to invidious, suspicious, rivalry; to the suspicion of rivalry: to envy at the rivalry of another, at the good success of another. For a general description of this passion, see Cogan *On the Passions*, ch. ii. class 2. Also the Quotation from Spenser, *infra*.

Emulous, invidious, suspicious; looking, observing, watching with envy, with suspicion; suspiciously watchful or vigilant, careful or cautious.

In *gelesie* ioye less. and janglynge a bedde.

Piers Plouhman. *Vision*, p. 108.

Trewly if they were distroied *iealousie* vndone were for euer, and yet some manner of *iealousye*, I wote well is euer ready in all the hearts of my trew seruants, as thus: to bee *ielous* ouer himself, least hee bee cause of his owne disease.

Chaucer. *The Testament of Loue*, fol. 314.

Therwith the fire of *jealousie* up sterte
Within his brest, and bent him by the herte
So woodyly, that he like was to behold
The box-tree, or the ashen ded and cold.

Id. The Knightes Tale, v. 1301.

But finally to taken hede,
Men maie well make a likelyhede
Betwene hym which is auarous
Of golde, and hym that is *jealous*
Of loue.

Gower. *Conf. Am.* book v. fol. 87.

Wherof it is, that he conceiueheth,
That ilke vneasy maladie,
The whiche is cleped *jelousie*:
Of whiche if I the propertee
Shall telle, after the nicetee,
So as it worcheth on a man:
A feuer it is cotidian.

Id. Ib. book v. fol. 86.

But I wel se, Galathians, wherabout they go: some *jealously* woove you, and as it were enuiyng at me, labor to wyne your fauor.

Udall. *Galathians*, ch. iv.

It is one of the best bonds, both of chastity and obedience, in the wife, if she think her husband wise; which she will never do if she finde him *jealous*.

Bacon. *Essay 8. Of Marriage and Single Life*.

Foule *jealousie*, thou turnest loue diuine
To ioylesse dread, and mak'st the louing hart
With hatefull thoughts to languish and to pine,
And feed itselfe with selfe-consuming smart.
Of all the passions in the mind thou vilest art.

Spenser. *Faerie Queene*, book iii. can. 11.

That he did not mean hereby to contend with his lordship, through whose assistance he had always hoped that her majesty's safety (consisting in the true maintenance of her majesty's supreme government) should be *jealously* preserved.

Strype. *Life of Whitgift*, vol. i. p. 598. Anno 1583.

So fears the lover when his breast,
By *jealous* phrenzy is possess'd;
Forsores the nymph for whom he burns,
Yet straight to her whom he forsores returns.

Walsh. *A Cure for Jealousy*.

IDOTEA.
—
JEALOUS.

JEALOUS.

Forgive those foolish fears of fancy'd harms,
That stab my soul, while they but move thy tears;
And think, unless I lov'd thee still,
I had not treated thee so ill;

JED-
BURGH.

For these rude pangs of *jealousy* are much more certain signs
Of love, than all the tender words an amorous fancy coins.

Walsh. *Jealousy*.

If we love glory, we are *jealous* of partners, and afraid even of our
own instruments. Burke. *On the Policy of the Allies*.

Now in dreadful pause
His thoughts seem lost; then springing suddenly
He stamps the ground; then *jealously* casts round
His burning eyes, as if he fear'd his thoughts
Were listen'd to.

Mickle. *The Siege of Marseilles*, act iii. sc. 5.

JEAN, a species of Fustian manufactured from
cotton, principally at Manchester. It is noticed by
Fuller in his *Worthies* among the Fustians which, he
says, "anciently were creditable wearing in England for
persons of the primest quality, finding the knight in
Chaucer thus habited.

Of Fustian he weared a gippon
All besmottred with his haubergion.

Prologue to the *Tales*.

But it seems they were all Foreign Commodities, as
may appear by their modern names: 1. *Jen Fustians*,
which I conceive so called from *Jen*, a city in Saxony."
(i. 537. *Ed.* 1811.) Bolton, he continues, is the staple-
place for this commodity.

JEDBURGH, or as it was once written, and still is
vulgarly pronounced, *Jedwood*, or *Jeddarty*,—the name,
according to Sir J. Sinclair, is sometimes written with
a G, and he traces it to the *Gadeni*, a Tribe spreading
from the Teviot to Northumberland,—a Royal Burgh of
Scotland, and chief town of the County of Roxburgh,
agreeably situated on a declivity on the North side of
the river Jed. It is encompassed with lofty hills, and
the neighbourhood, not many years since, was very
richly wooded. The town chiefly consists of four prin-
cipal streets at right angles to each other, and meeting
in a central square. During the Border Wars it was a
position of no inconsiderable importance, and the castle,
which had for some time been in the occupation of the
English, was levelled to the ground, in order to prevent
this annoyance for the future, by the Duke of Albany,
who exercised the Royal power during the captivity of
his nephew James I. The town, however, suffered
more than once afterwards. In the beginning of the
XVth century it was burned by Lord Surrey, during his
second inroad in 1523; yet it maintained its station,
though frequently wasted by fire and sword, and at the
commencement of the XVIIth century was still one of
the chief places on the Border. Either from the
adroitness with which its inhabitants used the weapons,
or from a manufactory of them, Jedburgh gave its name
to an axe or partisan, chiefly used by horsemen; and a
cavalier mounted and wielding this instrument became
the armorial bearing of the Town. The prosperity of
Jedburgh after the Union was chiefly derived from con-
traband trade, more especially in malt and leather, for
which its position afforded very favourable opportu-
nities. On the suppression of this illegal commerce,
Jedburgh rapidly declined, till about fifty years since,
when the introduction of a coarse woollen manufactory
gave a new impulse to industry, and has produced con-
siderable increase both in the numbers of its inhabitants
and its extent of buildings. The greatest drawback upon
its commerce is scarcity of fuel, all its coals being
imported from Northumberland. Jedburgh returns one

VOL. XXIII.

Member to Parliament, in conjunction with Haddington,
Lauder, Dunbar, and North Berwick. Population, in
1813, 2827. Distant 45 miles South from Edinburgh,
11 West from Kelso.

Jedburgh Abbey, dedicated to the Holy Virgin, was
founded or rebuilt by David I. in 1138, for Augustin
Canons Regular from St. Quentin's at Beauvais. Two
cells were attached to it, that of Restenote in the Shire
of Angus, one mile East of Forfar, within which all the
documents and treasures of the mother church were
kept for the sake of security, as it stood surrounded by
a loch, and was approached only by a drawbridge; and
that of Canonby upon the Esk in Dumfriesshire. The
ravages committed upon Jedburgh Abbey during the
Border Wars, at length rendered it incompetent to
maintain its monks; nevertheless the present remains
avouch for great former magnificence. The lower part
of the wall, still existing, affords a specimen of much
older architecture than that of the XIIth century, and
corroborates the belief that David restored a Saxon
foundation. Part of the Western remains of this Abbey
have been judiciously fitted up as a Parish Church. The
estates were conferred as a temporal Lordship, with the
title of Baron Jedburgh, upon Sir Andrew Kerr of
Fairniehurst, by James VI. in 1602. Of this family
the Marquess of Lothian is the present representative.
A Convent of Carmelite nuns was founded in Jedburgh
in 1513, and an old house is still shown at the bottom
of the town, in which the unhappy Mary held a Justice
Court in 1566, and from which she paid a visit to
Bothwell at Liddesdale, a distance of 17 Scots miles,
and returned in the same day. The neighbourhood
once possessed numerous orchards, which were sedu-
lously cultivated by the Monks, and pear trees are still
shown which are believed to have been planted before
the era of the Reformation. The Parish of Jedburgh
is of very great extent, stretching from the Teviot to
the borders of Northumberland, and covering a space
about 13 miles long, and in some places not less than
seven broad.

JEER, v.

JEER, n.

JE'ERER,

JE'ERING,

JE'ERINGLY.

Skinner thinks most probably from
the Ger. *scheeren*, consequentially,
vexare, dictis et factis contumeliosis,
literally *scindere, secare*, (A. S. *scyr-an*
to shear,) to cut, to divide; the met.
(Wachter has no doubt) derived a *tonsurâ et vexatione*
servili ad contumeliam liberi hominis. Junius says, to
jeer, or *yeer*, and *yeery* is the A. S. *eorra*, from *corrian*,
or *eorsian*, *ge-orsian*, *geyrsian*, *irritare*, to provoke.
And to *jeer* may mean,

To speak provokingly, tauntingly, scoffingly; to utter
provoking, taunting jests; to taunt, to scoff, to mock,
or make a mock of.

The knight was courteous and did not forbear
Her honest merrith and pleasure to partake;
But when he saw her toy, and gibe and *geare*,
And passe the bonds of modest merimake,
Her dalliance he despis'd and follies did forsake.

Spenser. *Faerie Queene*, book ii. ch. vi.

The brave mind is allotted in the birth,
To manage empires from the state of thrones,
Fighting coy fortune, when she stern'st appears,
Which scorneth sighs, and *geereth* at our tears.

Drayton. *The Barons' Wars*, book iii.

PAS. Democritus, thou ancient fleerer,
How I miss thy laugh, and ha' since.

BAS. There you nam'd the famous *jeerer*,
That ever *jeer'd* in Rome or Athens.

Beaumont and Fletcher. *The Nice Valour*, act v. sc. 1.

MAD. ————— We *ieere* all kind of persons

We meete withall, of any ranke or quality,
And if we cannot *ieere* them, we *ieere* ourselves.

P. CA. A pretty sweete society! and a gratefull!

Ben Jonson. The Staple of Newes, act iv. sc. 1.

Call you this *jeering*? I can play at this,
'Tis like a ball at Tennis.

Id. Ib.

All this will not content some morose cavillers, whom I have heard *jeeringly* say "that many who were burnt in Fox in the reign of Queen Mary drank sack in the days of Queen Elizabeth."

Fuller. Worthies. Bark-shire.

What rejoicing and *jeering* the adversaries make; how the godly ministers are discouraged, I will pass over, &c.

Strype. Life of Parker, vol. i. p. 216. Anno 1561.

And, giggling thus at one another,
Each *jeering* lout reform'd his brother;
Till the whole parish was with ease
Sham'd into virtue by degrees.

Somerville. The Devil Outwitted.

But the dean, if this secret should come to his ears,
Will never have done with his gibes and his *jeers*.

Swift. The Grand Question debated.

Friend Tortoise, quoth the *jeering* Hare,
Your burthen's more than you can bear,
To help your speed, it were as well
That I should ease you of your shell.

Lloyd. Fables. The Hare and the Tortoise.

JEFFERSONIA, in *Botany*, a genus of the class *Octandria*, order *Monogynia*. Generic character: calyx five-leaved, coloured, deciduous; corolla, petals eight, spreading, incurved; capsule obovate, one-celled, bursting below the apex; seeds many, oblong, arillate at the base.

One species, *J. diphylla*, native of North America.

JE'JUNE, } Lat. *jejunus*, which Martinus
JE'JUNELY, } derives from the Gr. *κενό-ειν*, *evacuare*, to empty, for he is *jeune*,
JE'JUNENESS, } whose belly is *empty* of food.
JE'JUNITY. }

Jeune; empty, and therefore hungry; empty, void, vacant, destitute, poor, barren.

The Aristotelian hypothesis gives a very dry *jeune* account of Nature's phenomena.

Glanvil. The Vanity of Dogmatizing, ch. viii.

So that there are three causes of fixation; the even spreading both of the spirits, and tangible parts; the closeness of the tangible parts; and the *jejuneness*, or extream comminution of spirits.

Bacon. Natural History. Cent. 8. sec. 799.

No knowledge can be more pleasant than this, (the works of the creation) none doth so satisfy and feed the soul; in comparison whereto that of words and phrases seems to me insipid and *jeune*.

Ray. On the Creation, part i.

Other learned writers, who have had occasion to say something purposely of cold, have handled it exceedingly *jejunely*.

Boyle. Works, vol. ii. p. 475. On Cold. The Author's Preface.

The loud demand, from year to year the same,
Beggars invention, and makes fancy lame,
Till farce itself, most mournfully *jeune*,
Calls for the kind assistance of a tune.

Cowper. Retirement.

Pray extend your Spartan *jejunity* to the length of a competent letter.

Bentley. Letters, p. 261.

JELLY, see **GELLY**. So called because stiffened, thickened, concreted, coagulated, as if congealed.

Any thing concreted or coagulated into a viscous substance.

Call'd barnacles by us, which like a *jelly* first
To the beholder seem, then by the fluxure nurs'd,
Still great and greater thrive, untill you well may see
Them turn'd to perfect fowls, when dropping from the tree
Into the merey pond.

Drayton. Poly-olbion, song 28.

And for close of all a *jelly* made of y^e bones of beef, the best for clearness and good relish, and the most delicious that I had ever seen or tasted.

Evelyn. Memoirs, Feb. 12, 1682.

With wonder he surveys the upper air,
And the gay gilded meteors sporting there;
How lambent *jellies*, kindling in the night,
Shoot through the ether in a trail of light.

Garth. The Dispensary, can. 4.

And having fill'd his empty belly
With mutton broth and meagre *jelly*,
Gave him a robe of sleek prunella,
And very wisely made him fellow.

Cawthorn. Wit and Learning.

JENNET. See **GENETT**.

The 12 of December the emperour's majestie and all his nobility came into the field on horsebacke, in most goodly order, having very fine *jennets* & Turkie horses garnished with gold & siluer acountantly.

Hakluyt. Voyage, &c. vol. i. p. 316. Description of Russia.

Say'st thou this colt shall prove a swift-pac'd steed
Only because a *jennet* did him breed?

Hall. Satire 3. book iv.

Were they, like Spanish *jennits*, to impregnate by the wind, they could not have thought on a more proper invention.

Spectator, No. 127.

Watch not their steps—they're safe without thy care
Unless, like *jennets*, they conceive by air.

Churchill. The Times.

The fable relative to the conception of the Spanish **JENNETS**, to which allusion is made in some of the above extracts, is probably derived from an account given by Aristotle, if the *Hist. Animal.* be his. Mares, he says, at a particular season appear *ἐξανεμοῦσθαι*, (a word which Scaliger explains *ἐξ ἀνέμου, concipere*.) and therefore great care is taken in the isle of Crete not to remove the stallions from them. At this season they shun the common herd, and run wildly, not to the East or West, but directly to the North or South, and resist all approach until they are either wearied down by their exertions or have reached the sea. (vi. 18.) *Ælian* has copied this passage closely, (*Hist. Anim.* iv. 6.) and the account is poetically adopted by Virgil, (*Georg.* iii. 273.) in lines too familiar to require citation. Homer probably was well acquainted with the same story, when he attributed the Horses of Achilles to the parentage of the Harpy Podarge impregnated by Zephyrus; (*Iliad*, II. 150.) a God whom our own great Poet has sent "a maying" with a more delicate mistress. And again, when he makes *Æneas* describe to Achilles the 3000 Mares of King Erichthonius, of whom 12, if we understand the passage rightly, were beloved by Boreas, and produced to him colts, whose tread was so light that the corn did not bend beneath it, and who skimmed the main with as much agility as the Roman Epic afterwards attributed to Camilla. (Y. 221.) Varro and Columella both relate this tale undoubtingly. The first, while speaking of Horses, says, *in fœturâ res incredibilis est in Hispaniâ, sed est vera, quod in Lusitaniâ ad Oceanum in eâ regione, ubi est oppidum Olysippo (Lisbon) monte Tagro quædam e vento certo tempore concipiunt equæ ut hic Gallinæ quoque solent, quarum ova ὑπηνέμια appellant; sed ex his equis qui nati pulli non plus triennium vivunt.* (*de Re Rust.* ii. i. 19.) Columella writes much to the same purpose; he

JELLY.
—
JENNET.

JENNET. affirms that Mares will sometimes breed equivocally *cohortalium more avium*, like birds in a coop. Cum *it notissimum etiam in Sacro (Tagro) monte Hispaniæ, qui procurrit in occidentem juxta Oceanum, frequenter equas sine coitu ventrem pertulisse, fœtumque educasse, qui tamen inutilis est, quod triennio, prius quam adolescat, morte absumitur.* (de Re Rust. vi. 27. 7.) Silius Italicus, in lines far more explicit and much less poetical than those of Virgil, has extended the duration of the Lusitanian Jennets to seven years. He is describing the review of his troops by Hannibal after the fall of Saguntum,

*At Vettonum alas Balarus probat agmine aperto.
Hic adeo cum Ver placidum flatusque tepescit,
Concubitus servans tacitos grex prostat Equarum,
Et Venerem occultam genitali concipit aurâ.
Sed non multa dies generi, properatque senectus,
Septimaque his stabulis longissima ducitur ætas.*

(iii. 378.)

Pliny readily adopts all the marvels of the legend. (viii. 67.) Justin (xliv. 3.) alludes to it, and subjoins a very sensible explanation, that the fecundity and swiftness of Horses is so great in Galicia and Lusitania that they may well be said to be conceived by the very wind. If the reader wishes to be confirmed in his disbelief by modern authorities, he may turn to the two writers named below, under the grave guidance of a commentator on this passage in Justin. *Franciscus tamen Fernandus de Cordovâ, Hispanus, illam narrationem de equabus Hispanicis vento concipientibus, esse commentitiam, et auctoritate et ratione et experientia (three very powerful coadjutors in argument) docet in Didascaliâ multiplici, cap. 48. In quam sententiam concedit et Joh. Wouverius, Polymath, cap. 11. Fernandus de Cordova, with great candour, brings forward from Resendius the only modern authority which appears to give any support to the tale, and he sufficiently explains the occurrence which it recounts from natural causes. Resendius hanc opinionem nec improbat nec approbat: refert tamen quærentem se a quodam hospite suo agri Beneventani juxta Tagum ecquid hæc de re ipse sciret? hæc ab illo accepisse; nunquam scilicet hæc se aut vidisse aut audivisse, habuisse tamen pulcrâ quondam equam, quam, ut melius proximis nundinis vendere posset, in insulâ quæ in medio Tago est, solam inclusisset, ut pabuli abundantia saginaretur, eamque post duos menses gravidam reperisse, cum nullus illuc accessisset admissarius. Septimo deinde mense enixam esse non quidem animal, sed concreti sanguinis informem materiam, abortumque suspicatum.* On this narrative Francis de Cordova rationally observes, that the occurrence might arise either from a stallion having swum over, undiscovered, or (not quite so rationally) sanguinis ipsius equæ pabuli copia saginata superabundantia; he adds, however, as a saving clause from the doctrine of equivocal generation, *partum enim illum fuisse nec ipse hospes certò asseruit.*

One other writer must be mentioned of recent date, who is staunch in his belief of this marvel of the Spanish Jennets. Ludovicus Carrio, who died President of the College of St. Yves towards the close of the XVIth century, a Critic of deep learning, and, as he is styled by one of his contemporaries, *acerrimi judicii*, in his *Emendationes et Observationes*, twice avows his implicit faith in the fact, *quorsum tot exempla in rem incredibilem, tamen veram, necesse est comparare? Ipse Silius infra satis id manifeste docet; cui ut Hispano et*

testi oculato necesse est credere. And again yet more earnestly, *inter omnes certò liquidòque constat verè et historicè, non poeticè et fabulosè, e vento in illâ Hispaniarum parte equas olim concepisse, hodièque, si vera sunt quæ narrantur, concipere.* (ii. 4.)

JENNETING, said to be a corruption of *Juneting*; the name proper to certain apples because they ripen in June.

Contrariwise pomegranate trees, fig trees, and apple trees, live a very short time: and of these the hastie kind or *jenitings*, continue nothing so long as those that bear and ripen later.

Holland. *Plinie*, vol. i. fol. 495.

JEOfAIL, in *Law*, *j'ai faillé*. If a pleader perceives any error in the form of his proceedings and acknowledges it, he is at liberty to amend it by the Statutes of Amendment and Jeofails, which Blackstone (iii. 25.) cites as follows: 14 Edward III. c. 6; 9 Henry V. c. 4; 4 Henry VI. c. 3; 8 Henry VI. c. 12 and 15; 32 Henry VIII. c. 30; 18 Elizabeth, c. 14; 21 James I. c. 13; 16 and 17 Charles II. c. 8. (styled in 1 Vent. 100 an omnipotent Act;) 4 and 5 Anne, c. 16; 9 Anne, c. 20; 5 George I. c. 13. Such amendment is seldom actually made, but the benefit of the Acts is obtained by the Court overlooking the exception. Yet so tender is the Law of life, that none of the Statutes of Jeofails for amendment of Errors extend to indictments or proceedings in Criminal cases. (*Id.* iv. 29.)

JE'OPARD, JE'OPARDIZE, JE'OPARDLESS, JE'OPARDY, JE'OPARDOUS, JE'OPARDOUSLY. } Written *jupartie* by Chaucer, and *jubardy* by Sir Thomas More. Skinner says, *Jeopardy*, *periculum*, q. d. the Fr. *j'ay perdu*, literally, *I have lost*; or as the learned Th. H. prefers, *jeu perdu*, a lost game. Junius suspects it to be a word originating among gamblers, risking every thing upon the hazard of a die, and at every chance of the table exclaiming *jeu perdu*. Tyrwhitt rather believes it to be a corruption of *jeu-parti*. A *jeu parti* is properly a game in which the chances are exactly even: hence it signifies any thing uncertain or hazardous. *Jeu parti* is in Low Lat. *jocus partitus*; so said, when the power is given to any one of choosing one of two things proposed to him. (Du Cange.) To *jeopard* is

To risk, to hazard, to endanger, to imperil.

And whan he, thurgh his madnesse and folie
Hath lost his owen good thurgh *jupartie*,
Than he exciteth other folk therto,
To lose hir good as he himself hath do.

Chaucer. *The Chanones Yemannes Tale*, v. 16211.

And er that ye *ieoparden* so your name
Beth nat to hasty in this hotte fare
For hasty man ne wanteth neuer care.

Id. *The fourth Booke of Troilus*, fol. 184.

But God wold I had ones or twise
Icond, and know the *ieopardise*
That coud the Greke Pithagores
I shuld haue plaid the bet at ches.

Id. *The Dreame*, fol. 241.

Thus meane I, that were a great folly
To put that sikernes in *ieopardy*.

Id. *The fourth Booke of Troilus*, fol. 184.

For thus stant euery man's life
In *ieopardie* for his wife,
And for his doughter, if thei bee
Passyng an other of beautee.

Gower. *Conf. Am.* book vii. fol. 173.

As I yet intende not to come forthe and *iubard* myselfe after other of my frendes: which woulde God wer rather here in suertie, then I were there in *iubardy* with the.

Sir Thomas More. *Workes*, fol. 49. Richard III.

JEOPARD. Whye madame (quod another lorde) know you any thing why thei should be in *iubardye*? Nay verely sur qd. shee, nor why they should be in prison neither, as they now be.

JERID.

Sir Thomas More. Workes, fol. 49. Richard III.

Rather had I haue in you that, whiche is of lesse perfection, so that it bee *ieoperdlesse* that whiche is muche more commendable, beeyng yet suche as is ioyned with no small perill.

Udall. 1 Corinthians, ch. vii.

Better is it therefore to embrace thys libertie, yf it be eyther in thy power, or *ieopardles*.

Id. Ib.

To the whiche it was answered that it was both *ieopardeous* for y^e kyng & for his whole realme to haue their prince absent for feare of inuasions by vtward enemies.

Hall. Henry VIII. The twenty-fifth Yere.

But if thou canst not, no more than they, replied Philip, what wilt thou forfeit for thy folly? I am content (quoth Alexander) to *jeopard* the price of the horse.

Sir Thomas North. Plutarch, fol. 561. Alexander the Great.

This his goodly, valiant, and *jeopardous* enterprise (as it is termed) was represented with advantage by the Duke of Norfolk to the king, who highly praised and rewarded him for the same.

Fuller. Worthies. Cornwall.

But by the way, there is a great quicksand,

And a whirlepoole of hidden *ieopardie*:

Therefore, Sir Palmer, keepe an euen hand;

For twixt them both the narrow way doth lie.

Spenser. Faerie Queene, book ii. can. 12.

This letter I have exemplified in the Appendix, as containing some matters of remark: as, what hard and unjust methods were then used by the pope's creatures to bring the professors of the Gospel into *jeopardy*.

Strype. Life of Parker, Anno 1566.

Where is the mother, who thinks all her pain,

And all her *jeopardy* of travail, gain,

When a man-child is born; thinks ev'ry pray'r

Paid to the full, and answer'd in an heir?

Short-sighted woman.

Churchill. The Times.

JERCA, in *Zoology*, a genus of Fossils, referred by Lamaroux to the family *Actiniadæ*, and placed amongst the flesh imitable corals, which are without any central axis; but this wants further examination, as the fact of flesh substances being preserved in a fossil state appears very doubtful. He gives the following

Generic character. Coral fossil, simple, pear-shaped, pedicelled; the pedicle very large, cylindrical, spreading out into a roundish body, with a smooth surface, and pierced with tortuous tubes, becoming more close together as they reach the summit, which is truncated, and pierced with numerous roundish holes, at the termination of the tubes.

This fossil is described from an unique, very much water-worn specimen in the collection of the Caen Museum: it is figured by Lamaroux, in the Continuation of Ellis, pl. lxxviii. fig. 3. It was found in Les Vasches Noire, and from its flinty structure is supposed by Lamaroux to have belonged to the chalk.

JERID, or **JIRID**, signifies in Arabic a palm-branch stripped of its leaves, and as such branches are peculiarly fit for throwing to a distance, they are used in a favourite amusement among the Asiatics, which consists in forming two parties, each of whom, while their horse is at full speed, throw such a javelin at their adversary, and then, wheeling round, gallop off to avoid his blow in return. The skill with which these evolutions are often performed, and the agility with which many, especially among the Mamlúks, could pick up their Jerid from the ground, while their horse was nearly at its utmost speed, without losing their seats, was truly astonishing. This game, though excellent as a school of horsemanship and agility, is not without hazard; and very serious accidents often arise in these

mock equestrian combats. Murádjah d'Ohsson (*Tabl. de l'Empire Ottoman*, iv. 398.) says, that the Turks never play at the Jirid except in the Feasts of Beirám. Such may be the case at Constantinople, but is not so with regard to other parts of the Empire, when the Aghás and Beys assemble their friends for the purpose of enjoying this sport once or twice every week in fine weather; being themselves often merely spectators of the contest.

JERK, *v.* Skinner thinks *a sono fictum*; Junius **JERK**, *n.* (who writes it *yerk*) thinks it has a strong affinity with *irk-some*. Lye doubts whether it may not be from the A. S. verb *ge-reccan*, *corrigere*, *animadvertere*; to correct or punish. (Somner.)

To hit or strike, to throw, to take away, with a quick, short motion or action; with a sudden, smart blow.

What Stepney meant in the passage below is not very clear.

For this we see, the stiffe and strongest arme,

Which gives a *ierke*, and hath a cunning loose,

Shootes furdest still, and doth alway most harme.

Gascoigne. Vpon Fruite of Fetters.

Is't not sweete pride, when men their crownes must shade,

With that which *jerks* the hams of every jade,

Or floor-strow'd locks from off the barber's sheares?

But waxen crownes well gree with borrow'd haire.

Hall. Satire 5. book iii.

Last, that he never his yong maister beat,

But he must aske his mother to define,

How manie *jerks* she would his breech should line.

Id. Satire 4. book iv.

VAR. Let 'em alone Frank, I'll make 'em their own justice, and a *jerker*.

Baumont and Fletcher. Wit without Money, act iv. sc. 1.

Nor blush should he some grave acquaintance meet,

But proud of being known, will *jerk* and greet.

Stepney. Juvenal. Satire 8.

Instead of easy flapping side-ways it swims by rapid, brisk *jerks*, the quite contrary way.

Derham. Physico-Theology, book viii. ch. vi. note 17.

Bastings heavy, dry, obtuse,

Only dulness can produce;

While a little gentle *jerking*

Sets the spirits all a-working.

Swift. To a Lady.

At his heels,

Close at his heels, a demagogue ascends,

And with a dext'rous *jerk* soon twists him down

And wins them, but to lose them in his turn.

Cowper. The Task, book iv.

JERKIN, } Skinner thinks from the A. S. **JERKIN-MAKER**. } *cyrtelkin, tunica*; a diminutive of *cyrtel*, a tunic. See **KIRTLE**.

A short, close coat.

Thy bodies bolstred out with bumbast and with bagges,
Thy rowles, thy ruffles, thy caules, thy coifes, thy *jerkins* and thy jagges.

Gascoigne. Miscel. A Challenge to Beautie.

Their teeth are all filed, which they doe for a brauerie, to set out themselues, and doe jagge their flesh, both legges, armes, and bodies, as workemanlike, as a *jerkin-maker* with vs pinketh a *jerkin*.

Hakluyt. Voyages, &c. vol. iii. fol. 504. M. John Hawkins.

What delicacy can in fields appear,

Whilst Flora herself doth a frize *jerkin* wear?

Hall. Eclogue, Dec. 26th, 1616.

The 18th Dec. 1554 was a great triumph at the court-gate by the kings and divers lords, both English and Spanish: who were in goodly harness, and upon their arms goodly *jerkins* of blue velvet, and hose embroidered with silver and blue sarcenet.

Strype. Memorials. Queen Mary, Anno 1554.

JERID.

JERKIN.

J E R S E Y.

JERSEY. JERSEY, the largest and most Easterly of the Islands in St. Michael's Bay, belonging to the dominions of Great Britain. It is situated between Cape La Hogue in Normandy and Cape Forhelles in Brittany, and lies further to the South than Guernsey, or any others of the group. Its distance from Weymouth, the nearest coast of England, is 75 miles; from Southampton 120; from Carteret and Boil, the nearest French ports, 17. The longitude of the town of St. Aubin is $2^{\circ} 11'$ West, its latitude $49^{\circ} 13'$ North. Jersey, with the adjacent islands, is the last portion of the Duchy of Normandy that remains to the British Sovereign, and so late as the reign of the first Charles, Lord Coke spoke of the possession as still giving "good seizin for the whole Duchy." It is considered as forming parcel of the County of Hants, and in Ecclesiastical matters is incorporated with the See of Winchester. There is a tradition that the Island was once so contiguous to France, that persons passed over on a plank or bridge, paying a small toll to the Abbey of Coutances, but no direct Historical account either records or alludes to it. Another tradition has been handed down in Normandy, that there existed formerly between Jersey and Coutances a forest which extended from Le Mont St. Michael to Cherbourg; it is conjectured that the greater part of this forest has been absorbed by the sea, because at low-water spring-tides a number of trees and stumps are discovered; and it may be observed that old writings mention a forest called Sisci, of which no vestige now remains. Such traditions, though mixed with fable, strengthen the conclusion that a connection with the main land may at one time have actually existed.

Situation
and appear-
ance.

The situation of Jersey contributes much to its security. It is environed by a circle of rocks, which either tower to a vast height above the level of the sea, presenting a bold and inaccessible coast, or lying concealed under the surface of the water, form a secret and, therefore, more formidable obstacle to the approach of strangers. The danger is much increased by the force with which the Atlantic tide rushes into the Bay of St. Michael's, rising in many parts to the height of 50 feet, while in the immediate vicinity of the Island it is broken into an infinite number of currents, perpetually changing their direction, and hurrying along with the most heady violence. To navigate such seas safely, long experience is requisite. The height of the cliffs on the Northern coast varies from 100 to 200 feet, but the Island slopes gradually away to the South, and at the town of St. Helier is nearly level with the sea; hence it has been compared to a wedge, or with more accuracy perhaps to a right-angled triangle, of which the Northern cliffs form the perpendicular, the sea the base, and the surface of the Island itself the hypotenuse. Its general figure is that of an oblique-angled parallelogram, extending about 12 miles from East to West, and in breadth from North to South averaging about five miles, but nowhere exceeding seven. It contains about 40,000 acres, or $62\frac{1}{2}$ square miles, with no less than 365 inhabitants to each. It has two towns, St. Helier, the Capital, and St. Aubin, both situated in the same bay on the Southern coast of the Island; several villages;

three forts or castles, Fort Regent, Fort Elizabeth, and Fort Orgueil. The parishes are 12 in number, and these are so arranged, that each in some parts communicates with the sea. The surface of Jersey is uneven, being broken by several ranges of mountains, which diverge from the Northern chain, and stretch to the South, gradually declining in height along their whole extent. Their sides are often steep and rugged, but are clothed in many parts with thickly planted orchards, which add much to the beauty of the scenery, and at a distance present the appearance of one extensive forest. Between these ridges lie deep and narrow valleys, watered by numerous streams, with which no Country is better supplied. An old writer speaks of these as "dainty rills or riverets, in which watery commoditie Jersey hath questionlesse the precedency of Guernsey." The trees are of small size, but abundant in number. The land is subdivided into diminutive fields, and the hedges all round are thickly planted. This, although picturesque, is of course injurious to the interests of agriculture, and indeed the inconvenience from the number of trees overhanging the roads gave rise to a curious custom. At stated times, the Judge, accompanied by some jurors, the constable, and 12 chief men of the parish, proceeded to perambulate the highways. In front of the cavalcade rode the Sheriff bearing his rod of office, the end resting on his saddle-bow; if it touched a branch overhead, the owner of the hedge was fined; if any defect was found in the road itself the penalty was assessed on the overseer of the district. It was found necessary to restrain the general fondness of the Islanders for planting.

The climate is exceedingly mild, in consequence of the Southern situation and aspect of the Island, and the temperature being equalized by the vicinity of the sea. Frost never continues for any length of time. Snow falls but seldom, and melts immediately; and shrubs, which in the Southern Counties of England require care and shelter, flourish here luxuriantly in the open air. Even in Guernsey there is a sensible difference of climate. Melons are raised there in hot-beds, but grow profusely in the common gardens of Jersey.

Climate.

The soil in general is of a light but prolific quality, and is much improved by the constant application of *vrac*, or sea wreck, which is carefully gathered at stated periods, in summer and at the vernal equinox, and distributed by public officers among the inhabitants, whom it serves at once for fuel and manure. The high grounds are either bare rock, or are covered by a light, gritty substance of little value; but the low lands, and particularly the valleys, possess a rich alluvial mould of considerable depth. On the Western part of the Island there is a large tract, which is said to have been once highly fertile, but is now little better than a desert, in consequence of quantities of sand being thrown even to the tops of the loftiest cliffs, by the violent winds that sweep over the Atlantic.

Soil.

Agriculture is much impeded by the subdivisions of fields noticed above, and the number of little roads, which even two centuries back were so many as to occupy nearly one-third of the surface of the whole Island. The farmers, too, are by no means enterprising

Agriculture.

JERSEY. or active in character, whence arises the incredible quantity of weeds, which an English agriculturist has designated one of the crops of the country. The land in general, however, is well adapted for most of the ordinary crops, and for the pasture of cattle, which prevails to some extent. The pulse and corn are smaller than in England, but were formerly raised in sufficient quantity to form an important article of exportation; but this has long since ceased to be the case, and the inhabitants depend on other countries for the supply of nearly one-half the grain necessary for their consumption. Instead of the labour of the field, they devote their attention to the produce of the orchard, and Jersey has long been famous for the quantity and quality of its cider. Apple-trees grow along the hedges as well as in the regular plantations, and it is calculated that upwards of 24,000 hogsheads of cider are produced annually in this little Island; it is the common beverage of the people, and not more than 2000 hogsheads are exported to England; there is also abundance of pears, of which the *Chaumontelle* is in highest repute, and is cultivated with much care. The private gardens produce peaches and apricots of great size and beauty, with strawberries of superior quality. From the mildness of the climate, and the genial nature of the soil, these fruits are all of the finest flavour; most of the common forest trees grow in the Island, but they are not raised in any considerable number, and are generally stunted in growth.

Animals.

The horses are small, strong, and hardy; but, little attention being paid to the breeding or proper feeding of them, they are fitter for the yoke than the saddle. The cows are of the Alderney breed, and are much esteemed in England for the quality of their milk and the flavour of their beef. The sheep are small, and generally black, and are said to excel our sweetest mountain mutton, a consequence, probably, of the short, smooth pastures on which they graze. Mr. Falle, the Historian of the Island, mentions a breed of sheep now extinct. "Those famous sheep with six horns, three of each side, one whereof bent forwards towards the nose, another backwards towards the neck, and the third stood erect right upwards in the midst of the other two, mentioned by writers as one of the singularities of this Island, are become very rare." There are also hares and rabbits, but game does not abound here. The Jersey partridge, with its red feet, pheasant's eyes, and variegated plumage, was long a favourite and a curiosity in England. Bees are not now numerous, although the honey was once celebrated, and mead was used as much as cider is at present. Of noxious animals, the weasel and mole are the principal; and it has been remarked as a curious circumstance, that toads of unusual size are found in Jersey, whilst the air of Guernsey proves at once destructive to them. It contains also abundance of snakes and lizards, but it is believed that there are no venomous reptiles in the Island.

Fish

The fish in these seas are plentiful, and some of excellent quality: ray, plaice, turbot, soles, mullet, and especially congers, which have been known frequently to weigh from 40 to 50 pounds. The *ormer* is peculiar to these Islands; a fish shaped like a man's ear, and contained in a single oval shell, the inside of which resembles mother of pearl, and is frequently manufactured as such. It is cut from the rocks at low water in great spring-tides, and, when taken from the shell, is beaten

to make it tender; and, fried or stewed, is said to taste like a veal cutlet. To this list, the Historian, whom we named above, with the innocent credulity of his day, adds "the sirene, or mermaid, so called because it is said to have the breasts and teats of a woman; but this is not so common as the others." There is also plenty of oysters, lobsters, and crabs.

The only mineral of importance is the sienitic granite, of which the cliffs are composed. It is quarried to a considerable extent at Mount Mado, and exported to Guernsey and England, where it is applied to the purposes of paving, for which it is found well adapted. In Jersey it is frequently used in ornamenting the houses of the wealthy, or in building. It is of a reddish white colour, and capable of being polished in some degree like marble. Ochre is found, and also tripoli; and there are several chalybeates and ferruginous springs.

Minerals.

The trade of Jersey was once more considerable than it is at present. The grants of many of our British Monarchs, confirmed by a comprehensive Charter of Elizabeth, declared the ports of this Island, as well as Guernsey, to be free and neutral, even whilst the mother country was herself at war. This privilege extended to the whole range of sea visible from the shores of Jersey; and there are numerous instances recorded wherein restitution was made of vessels unjustly seized within the neutral limits. But however beneficial to the Islands themselves may have been this unrestricted freedom of commerce, it was found by no means equally favourable to the interests of Britain, and was, therefore, finally abolished by King William in 1689. When they ceased to be the depot of continental commerce, the inhabitants turned their attention to privateering; and it is supposed that, during the wars of William and Anne, the sailors of Jersey and Guernsey captured at least 1500 prizes. Since that period they have not been so fortunate; but the war with Bonaparte was productive of great benefit to Jersey at least, which became a grand military depot for Britain. Crowds of French and other emigrants thronged its shores; the war establishments received an unprecedented increase; numbers of workmen arrived from England, to labour in the fortresses and various public works that were carried on; its havens were filled with transport-ships and their convoys; and this continued influx of strangers, all carrying their incomes with them, gave a new and extraordinary stimulus to trade and commerce. The retail dealers first began to raise their prices, the farmers increased the quantity and price of their produce, the merchants sought new channels for their industry, and the whole Island presented the appearance of the most active exertions and increasing wealth. At one period there was considerable suffering from a depreciated paper currency; but time allayed apprehensions, and reduced matters to their former level. In 1812, 59 vessels, altogether of 6000 tons burthen, and navigated by 550 seamen, were the property of Jersey itself; during the subsequent year, when trade flourished with peculiar briskness, 734 vessels arrived at the ports, and 813 cleared out. Steam-packets (with the mail) ply regularly between St. Helier's and Weymouth; there are also steam-packets from Southampton, which make the passage in from 18 to 24 hours, touching at Guernsey, besides regular traders from these and several other ports.

Trade.

The quantity of leather, soap, and candles made here does little more than suffice for the use of the

Exports and imports.

JERSEY. native population. Of the 24,000 hogsheads of cider annually produced, about 1800 are sent to England, with fruit, potatoes, and cattle. During the five years immediately preceding 1813, the exports averaged 800 cows, 900 hogsheads of cider, and 1250 tons of potatoes. From England they receive in exchange corn, flour, seeds, live and dead stock, coals, cloth, linen, crockery ware, glass, and the finer articles necessary for domestic consumption. Salt fish is brought in great quantities from Newfoundland, whither a number of fishing-vessels are sent in the season, and a large proportion trans-shipped to the Mediterranean. A trade is also kept up with America and almost every nation in Europe. We have already mentioned the sienitic granite, of which about 5000 tons are yearly sent into England. But the great staple of Jersey exports, that for which it has been longest celebrated, is the article of worsted stockings. These were manufactured of the very finest quality, and many thousand pair were annually purchased in the warehouses of Jersey by merchants from various parts of Europe. So highly was this article at all times in repute, that the English Parliament, when prohibiting, under severe penalties, the exportation of our home-grown wool, always allowed an exception in favour of Jersey; and a certain quantity was each year sent there accordingly. In carrying on the general trade with Britain at the present time an affidavit of the contents of each cargo is filed in the Royal Court House, and the Governor is then empowered to give a certificate of exemption from Excise and Customs. During war he can also admit by license any foreign imports which are deemed necessary for the public convenience. The natives trade under the English flag, of which they enjoy the full privileges.

Government

The Governor is appointed by the Sovereign, of whom he is the representative; and his peculiar duty is to attend to the fortresses and the military defences of the Island. He has the nomination of all vacant Church Livings, except the Deanery, which is held by Letters Patent immediately from the Crown. The nomination of the Bailiff, a chief Civil Officer of Jersey, was formerly in his hands; but this patronage was found so little conducive to the pure administration of justice and the preservation of local privileges, that it also has been assumed by the King in Council. He possesses, besides, the power of convoking the Assembly of the States, in which he has a negative voice; a privilege, however, merely nominal, unless the Royal interest is concerned. The Assembly consists of the Bailiff and 12 Jurats, the Dean and 11 Rectors, and the 12 High Constables of the Island, aided by His Majesty's Attorney and Solicitor-General; there is a slight difference in the number of votes, as the Body sits in the character of States Deliberative or States of Election.

The States of Deliberation approach nearest to our Parliament, as they consider and decide all matters affecting the general weal, assess taxes, and inspect the public accounts. The revenue is chiefly composed of the general taxes, the harbour duties, the victualling licenses, and small lotteries, which afford a fund trifling indeed, but sufficient, with economy, to meet the ordinary expenses of Government. The States cannot, except in cases of emergency, impose any new tax, without previously obtaining the consent of the King. "The Islands are not bound," say Coke and Blackstone, "by any Act of Parliament wherein they are not particularly named." It was even held formerly that

no Act whatever would bind till it had been examined and registered by the Court of Judicature, but a recent Order of Council declared this form unnecessary. JERSEY.

The chief duty of the States of Election is to decide on contested returns of Jurats, who are always chosen by the people. When a vacancy in the list occurs, notice is duly issued to the district, and on Sunday, at the close of service, the Rector states to the congregation the occasion which calls for the exercise of their elective franchise, and a proper person is put in nomination. When the return is doubtful, or the circumstances of the election in any way informal, the ultimate decision is left to this General Assembly, which differs from the Deliberative Body only in having a few additional popular votes.

The Court of Judicature consists of a Bailiff and President chosen by the Crown, and the 12 Jurats elected for life by the people; to it belongs the charge of administering justice. Every crime is first investigated by a Petty Jury, seven of whom must concur, to find a prisoner guilty. Should he be dissatisfied with their verdict, he may appeal to *la grande enquête*, consisting of 24. Five votes out of this number is sufficient to acquit. When a criminal cannot afford to employ an advocate, the Court humanely directs one to plead for him. The jury do not absolutely acquit or condemn as with us; their verdict is *plutôt coupable qu'innocent*, or *plutôt innocent que coupable*. To decide questions relating to the inheritance of real property, the Court must consist of five Jurats at least; in matters touching chattels valuing above 50 livres Tournois, of three; from these there lies an appeal to the Court of Judgment, which consists of not less than seven members; and thence, if the matter in dispute amount to 40 shillings of freehold, or 40 pounds of personal property, to the King in Council. The unsatisfactory and dilatory remedy thus provided, has given birth to constant and well-founded complaints; and it would be better, perhaps, on the whole, that a casual injustice should be done, or a temporary error committed, than the stream of justice should be delayed in its course, till those who looked for its coming had sought other remedies, or perished unaided. Till the reign of Queen Elizabeth, the Justices Itinerant were sent annually or triennially to Jersey or Guernsey, to hear appeals from the Courts of ordinary jurisdiction; afterwards Commissioners were sent at intervals for the same purpose, and also with extensive powers to examine the state of the laws, supply defects, correct inaccuracies, and retrench what the Deliberative Assembly deemed superfluous. This custom ceased in the reign of James I.

Courts of justice.

The Ecclesiastical Court consists of a Dean and 11 Rectors, presiding over the 12 parishes of the Island. The former is Official to the Bishop of Winchester, and has the probate of wills, and the other emoluments of a Consistory Court. The Rectors are entitled to the small tithes, and, in some few instances, to the great ones, the remainder belonging to the Crown, and forming part of the Governor's salary. The Church Livings are, therefore, more properly Vicarages than Rectories. The parsonage-house, however, is always maintained at the expense of the Parish, so that the executors of a deceased Rector are not liable for dilapidations as in England. Jersey was converted to Christianity about the middle of the VIth century, by Sampson, Bishop of St. David's, who resigned his Church.

JERSEY. English See, and was presented with the Diocese of Dol by the Duke of Brittany. These Islands were added to his Bishopric by Childebert, the then King. When Rollo became master of Normandy, he attached them to the see of Coutances, with which they remained connected till Queen Elizabeth placed them under the See of Winchester. Magloricus, the successor of Sampson, is the most celebrated of the early Missionaries, and is still held in high reverence. St. Helier, the protomartyr, was murdered by the Normans in 857, but afterwards had an Abbey of Canons Regular erected to the honour of his memory on the islet in St. Aubin's bay, where fort Elizabeth now stands. His cell and bed of stone are still pointed out by the peasants among the rocks. Besides this foundation, Jersey contained the Priors of Noirmont, St. Clement, Bon-nenuit, and Le Lecque; they were all suppressed by Henry VIII., and the revenues conferred upon the Governor. Calvinistic principles having made their way into this Island and Guernsey, were permitted by an ordinance of Queen Elizabeth, in 1563, in the two chief Parishes of each; by the exertions, however, of Snape and Cartwright, they crept over the whole Country, and prevailed universally when Sir John Peyton was sent over as Governor by James. After a severe struggle, carried on without much respect for consistency or privilege on either side, he succeeded in restoring the Episcopal discipline, much to the satisfaction of the higher class of Society. A modified set of Canons was approved by the Council in 1623, for the regulation of the Church, wherein some concessions, in point of form, were made to the prevailing tenets of rigid Calvinism; these rules still form the Ecclesiastical Code of the Island. Of the temper in which the contest between the Sects was carried on, we may form some idea from the statement of Dr. Heylyn, who mentions, with rather candid exultation, the facility with which the Government Officers espoused the opinion of Sir John Peyton; and adds, "that one of the Constables preferred a Bill against the Calvinists in the *Cohue*, or Royal Court, wherein the ministers were indicted for hypocrisie, and their government of gross tyrannie."

Military
state.

By the census of 1821 it appears that the number of families in the Island at that time were 5813. The inhabitants were 13,056 males, and 15,524 females; 2310 families being employed in agriculture, 2756 in trade and manufactures. The number of houses was 4053. The Militia of the Island, 3000 strong, is regularly exercised on the sands between St. Helier's and St. Aubin's. Troops are sent from England to garrison the forts. The Island having been made a military depot during the late war, its defences were much strengthened; a chain of Martello towers runs round the coast, supported at all accessible points by strong redoubts and batteries. On the hill above St. Helier's stands Fort Regent, which is bomb-proof, and has been erected within a few years. Fort Elizabeth, so named from its founder, stands on the islet of St. Helier, and is accounted one of the strongest posts under the sway of Britain; it is approachable by land at low water by a causeway of stones and sand. In it was the residence of the Governor, and it is celebrated as the last place that held out against the victorious arms of Cromwell. The importance of the Norman Islands to England was sensibly felt at that time, when the privateers of the Royalists, sheltering in Jersey, swept the Channel,

and captured or destroyed the merchantmen of the **JERSEY.** Commonwealth. Fort Orgueil on the Eastern coast is commanded by an adjoining hill, and has therefore been permitted to fall into decay. Yet even in its ruinous state it looks down on the adjacent shores of France with an air of melancholy grandeur not unworthy of its name. In 1374 it defied the arms of De Guesclin and the chivalry of France; it is, perhaps, even more famous, as having been for three years the prison of William Prynne.

St. Helier's, the capital, and St. Aubin's are separated by a small bay. The former stands at the base of a long, high, rocky hill, and is a neat, clean town, containing about 1000 houses. There are several small villages in the Island, but none of any note. There are some antiquities to be found, principally Druidical temples and altars. The Cromlechs are here known by the name of *Pauquelays*. A curious circular temple was found in 1785, buried on the summit of a hill, near St. Helier's; it consists of 45 unhewn large stones, and was removed by General Conway to Park Place, in Berkshire, where it was erected in its original form. The architecture of the Churches is the pointed or Gothic; and they are remarkable as having the altars always directly under the pulpit, and not in the East end like ours. Roman coins have been dug up in various parts of the Island; and in the manor of Dilamont may still be seen the remains of what old writers suppose to have been a Roman camp. In the same spirit they suppose Jersey to be a corruption of *Cæsarea*, the Isle of *Cæsar*, *ey*, in the old language of the Northern Barbarians, signifying an Island.

The coast is a continued series of bays, which in general afford good anchorage, but being open to storms they are not peculiarly favourable to shipping. The two principal havens, St. Helier and St. Aubin, are dry at low water, the tide rising from 40 to 50 feet all round the shores. But a long jetty recently built in the former adds much to its convenience and security. Next in importance are the ports of Omelade de Lecq and Boulay. St. Brelade's presents no secure anchorage; Grouville is open to the East wind; and St. Quen, though capable of containing ships of the largest tonnage, is quite unsheltered from the West. This open position may, perhaps, contribute in some measure to the prevalence of ague; as in other respects Jersey is particularly healthy, and its inhabitants often attain extreme old age.

The importance of education seems to have been sufficiently valued at a very early period, and we find on record a petition from Jersey and Guernsey to King Charles I., praying a place for the admission of their youth at the Universities of Oxford and Cambridge. The prayer was granted; and Archbishop Laud having obtained from the Crown an appropriation of some escheated lands in Buckinghamshire and houses in London, founded a fellowship for the islanders, in each of the three Colleges of Exeter, Jesus, and Pembroke at Oxford. The rule by which they are distributed is, that the Islands get two and one fellowship each alternately; Jersey first taking two and Guernsey one, and on the next vacancy the proportion being reversed. Afterwards Bishop Morley, when diocesan of Winchester, founded five scholarships in Pembroke, three of which are appropriated to Jersey as the larger Island, the other two to Guernsey. In the deed which established the fellowships, it is

Topography

Bays.

Education

JERSEY.

expressly provided that the candidates shall take Holy Orders, for the purpose of returning to their native place, and supplying materials for a superior Order of Clergy and teachers. In 1498, a Free School was founded in St. Saviour's Parish for the education of males and females belonging to one half of the Island, and another in St. Peter's for the children of the other half. Some years since two Free Schools were established in St. Helier's by voluntary subscription; the plan succeeded and was extended, and the blessings of education are now diffusing themselves rapidly over the whole community of Jersey. St. Helier's possesses a Public Library, instituted at the expense of the Rev. Philip Falle, the Historian of the Island, and one of the chaplains to King William. It has received some liberal donations from the late Rev. Dr. Dumaresq. The town contains several schools for both sexes, and a number of private teachers in the various branches of education. There are two Reading Societies, and several private associations. Three newspapers in French are published every Saturday, and one in English every Monday. A handsome Theatre has been recently built, and Comedians from England perform in it occasionally for a few months.

Manners.

The inhabitants are most social in disposition; during the winter there is a continual round of Assemblies, Balls, and Subscription dinners, at which gaiety and good humour universally prevail, so that few places equally limited in extent enjoy a greater variety or frequency of amusement. The military reviews in summer contribute to the pleasure of those who love "the plumed troop and big drum." Dr. Heylyn describes the poorer classes as sturdy in disposition, and laborious in habits. He ascribes the increasing population to the law of gavelkind, the absence of traffic, &c.: that the former produces such an effect, seems unquestionable; but the other reasons assigned by him have since ceased to operate. The traffic is considerable, but the industry of the natives has not increased with it. They are proud of their Norman origin and their uninterrupted fidelity to the British Throne. They dislike to be thought French or associated with France, and seem fond of their connection with England, under whose protecting care they have from the earliest period of our History enjoyed many advantages. Even the tyrannical and treacherous John appeared attached to the Islands, which had been his appanage in youth; he clung to them when Philip had wrested all the other dominions of Normandy from his grasp, and of his own free grace gave them a new Charter and improved Constitution, which have made his memory cherished with gratitude to the present hour. This disposition in the natives was much increased by the constant communication with Britain during the last war. English habits were introduced, the English language became familiar to all classes, and throughout the whole of Jersey the barbarous Norman French may be pronounced on the decline. It is still, however, the public language of the Pulpit and the Courts of justice.

Laws and
privileges.

The Constitutional privileges of the inhabitants are very great; the only exception seems to be in the power possessed by the Governor, with the assent of two Jurats, to imprison arbitrarily on the suspicion of treason; he can, however, do no more than imprison, the decision of the case must be reserved for the Privy Council: to the honour of Jersey no necessity for exercising this

VOL. XXIII.

prerogative has occurred for some hundred years. In other respects the Governor has no Civil authority, and all matters are regulated by the decision of the laws. These owe their origin to four sources, the Grand *Coustumier* of Normandy, the local customs, the ordinances of the Privy Council and Commissioners of Appeals, under the title of *Règlements des Commissaires*, and adjudged precedents. It must be acknowledged that the principles of justice drawn from these various sources are by no means so clear or satisfactory as to supersede the necessity of a new and comprehensive Code. The paucity of complaints has in all probability been caused more by the personal discretion and probity of the Jurats, than by the general approbation of the laws which they administer: in their Code is one curious enactment, or rather custom, with regard to debtors. When a man is unable to meet the demands upon him, he files an affidavit of his insolvency in the *Cohue Royale*, and at the same time hands in a schedule of his debts and property. Four proclamations are then publicly made, and at the end of the fourth the creditors come in. The Judge commencing at the bottom of the list calls upon the last creditor, and asks him whether he is willing to receive the whole property of the insolvent into his hands, and undertake with it to satisfy the demands of all the prior creditors; should he decline, his name is erased from the list of claimants, and the same offer made to his immediate predecessor; if he also refuse, the Judge proceeds in a similar manner up the list till some creditor conceives that a sufficient number has been struck off, to admit a safe acceptance of the proffered condition. This inequitable procedure is more consonant to the simplicity of a rude people than the social relations of a civilized colony. In the laws of Jersey a bond is considered a sort of *hypothecation* of both the real and personal property of the obligor, and binds the heir in all circumstances, although he be not specially named. It is also observable that in all old deeds, the rent of farms is invariably reserved in so many measures of wheat. The interest of mortgages or borrowed money, and the payment of annuities, were always in quantities of wheat, and this circumstance long caused much fluctuation and uncertainty in the incomes of landlords.

The French have always regarded Jersey and its sister Islands with an eye very different from that turned by the Islanders on them. The possession of such stations for their ships, especially the privateers, would give them a preponderance in the Channel highly injurious to the maritime prosperity of England. National pride too may have had its influence, awakened by the sight of territories which nature had attached to France, but superior power had wrested from her. Many attempts have accordingly been made to regain the sovereignty of Jersey, but without success, nor from the feeling of the people does such a change appear at all probable. In 1549, during the reign of Edward VI., a formidable force was mustered at St. Malo's for an invasion, but was defeated by a British squadron under Commodore Winter. Another unsuccessful attempt was made in 1779, when the French were repulsed from the bay of St. Quen's by the native militia and a few regular troops. The most important attack, however, was made in 1781, when 800 men under the Baron de Rullecourt landed during the night in the bay of Grouville, on the Eastern coast. Marching rapidly forward on St. Helier's, they surprised the

Governor and a small detachment, and took possession of the town without a struggle. Having compelled the captive Governor to sign a Treaty for surrendering the Island to France, they advanced towards Fort Elizabeth to demand the fulfilment of the compact, but their reception from the guns of that fortress speedily induced them to retreat into the town. Meanwhile the British soldiers and the native militia had assembled in haste from all parts of the Island, under the command of Major Pearson, a young officer of distinguished merit. An engagement ensued in which the French commander was slain, and every soidier who had followed him either killed or captured. The loss on the part of the British was not material in numbers, but Major Pearson fell while cheering on his men in the moment

of victory. A monument in the church of St. Helier's records the grateful sense entertained by the Islanders of his worth and gallantry. The Baron Rullecourt has been always severely censured for his gratuitous cruelty in compelling the Governor to stand by his side during the whole engagement, exposed to a heavy fire from the British troops. He escaped, however, unhurt. The conduct of the native militia throughout the affair was brave beyond all praise.

See Camden's *Britannia*; Heylyn's *View of the State of Jersey and Guernsey*; Falle's *History of Jersey*; Lyte's *History and present State of Jersey*; Berry's *History of Guernsey and the adjacent Islands*; Plee's *Account of the State of Jersey*.

JERSEY.
NEW
JERSEY.

JERSEY, NEW, one of the United States of North America, situated between $38^{\circ} 56'$ and $41^{\circ} 20'$ North latitude, is bounded on the South by Delaware Bay; on the West by Pennsylvania and the river Delaware; on the North by the State of New York; and on the East by Hudson River and the Atlantic Ocean. The whole length of the State from North to South is 160 miles, with a breadth varying from 40 to 75. The superficial area is about 8320 square miles. It was formerly divided into two Provinces, the East and West Jerseys, but under the present Government the only divisions are 13 Counties, which are again subdivided into 116 Townships.

Surface.

The country is in general flat, and it is difficult to distinguish from a distance the ridge which separates the basin of the Delaware from the Hudson and the Atlantic; towards the South the whole country bordering on the sea is a dead level. A ridge of the Alleghanies crosses the State in the latitude of 41° , and another chain of hills in the North throws out some branches which intersect and diversify the surface. Among these hills the cold in winter is as severe as in Massachusetts and Vermont, but the heat in summer is intense. The climate, however, is fine. The crops rarely suffer from drought, frost, or rain, and constant light breezes temper the summer heat. Bilious and intermittent fevers are common in the autumn, particularly on the banks of the Delaware, but the greatest annoyance of the climate is the multitude of mosquitoes, which swarm in the low lands in summer.

Climate.

Soil.

This State is wholly agricultural. Among the hills in the interior the soil is sufficiently fertile; but in the low lands, towards the South, the barren flats incapable of cultivation are so extensive, as to form a fourth of the whole State. These flats are composed of sand or gravel, resting in salt marshes; shrub oaks and yellow pines are their only produce. Bog iron also is found in abundance in the sandy districts. In the North the land is of stronger quality, and the recent introduction of gypsum as a manure has added greatly to its fertility. In the natural state it is covered with woods of oak, chestnut, hickory, and mulberry; in cultivation it yields all the grains and fruits of the climate in abundance.

Trade.

New Jersey has no foreign commerce; its chief trade is carried on with the towns of Philadelphia and New York, which it supplies with provisions and agricul-

tural produce of all kinds. The Northern farmers have extensive dairies and large stocks of cattle. Their horses, also, are in repute for strength and hardiness. The orchards of Jersey are famous, and the cider produced from them rivals in quality that of the Island from which the Province takes its name.

The mineral productions of New Jersey are of the greatest importance. In one County alone are seven extensive iron mines, capable of supplying, it is said, the whole demand of the United States. The ore obtained in the hills and low barrens is of superior quality, and yields good malleable iron; that found in the rich bottoms is hard and brittle, and is often used instead of stone in building. The whole State produces annually about 1200 tons of bar iron, an equal quantity of pig iron, besides what is used in nail rods, casting, and otherwise. Copper is found in different parts of the State, but is not much attended to, though one mine, discovered in 1719, yields 75 per cent. of pure copper. Antimony was also discovered in 1808. Mines of lead, plumbago, coal, and ochre are also wrought with advantage.

With the progress of cultivation the native animals have nearly disappeared from this Country. The cougar, bear, and wolf are rarely seen. The herds of deer are much diminished, but the racoon is still common in the low lands, and grey and red foxes are numerous. Feathered game is more abundant, and the sea-coast and rivers yield large supplies of excellent fish.

New Jersey is watered by a great number of rivers, some of which are navigable, and facilitate the carriage of the agricultural produce to market. The bays and creeks along the coast are also numerous. In order to complete the facility of internal communication by water, the legislature projects the construction of a canal from Brunswick to Trenton, so as to connect the two great marts of New York and Philadelphia. A lake of considerable size on the mountains of the interior may serve as the reservoir to supply the canal, and lessen the expense of the construction.

The population of New Jersey has increased rapidly as that of any other of the Eastern States, except New York. In 1784 it amounted to 140,435, in 1800 to 211,150, and in 1817 to 345,822. Of this number about 10,000 are slaves. The free blacks

Minerals.

Water car-
riage.

Population.

NEW. amount to about 8000. Education was making but little
JERSEY. progress among the farmers of this Country, until the
JESS. recent provisions made by the Legislature for this im-
portant object. There are two Colleges in the State,
viz. Nassau Hall in Princetown, and Queen's College
in Brunswick. The latter of these was founded in 1738,
and holds the third place among the Colleges of the
Union. The students exceed two hundred. There are
16 incorporated Academies scattered over the country,
besides a number of inferior Schools.

The people of New Jersey are in general frugal, in-
dustrious, and hardy. But the various nations who
originally colonized this Country settled apart, and their
descendants remain so to this day. Hence the Dutch-
men, Swedes, Finns, Scotch, and Irish colonists may
be still distinguished by their language and their
manners.

Govern- The Provincial Government is composed of a Gover-
ment. nor, Council, and Assembly, all elected annually, the
Governor by the two latter Bodies, and these by the
people. Protestants alone are admitted to Civil power,
though all Sects are tolerated. The Governor unites
the apparently incompatible offices of Commander of
the Forces and Lord Chancellor of the State. The
Judges of the Supreme Court hold their office for only
seven years, and have a salary of only 1200 dollars.
They may be reelected at the expiration of that period
if their conduct have merited approbation.

History. The aboriginal inhabitants of New Jersey were a
tribe of Indians, who called themselves Linnellinopes.
It was first colonized by some Dutch, who settled in
Bergen about the year 1614; and afterwards by Swedes
on the Delaware, in 1627. After it fell into the hands
of the English, it was granted to private proprietors,
who finally ceded it to the Crown in 1702. It was
attached to the Government of New York from 1680
till 1736, when the form of government was established
which existed till the Revolution. New Jersey acquired
much honour by being the first State which returned
Delegates to the famous Congress of 1774, and it was
also among the first to ratify the Federal Constitution
of 1787.

Trenton. Trenton, a neat and thriving little town on the left
bank of the Delaware, is the Capital of the State. Here
the Legislature meets, the Courts sit, and the Public
Offices are established. The river is navigable as far
as the town for sloops of 90 tons burden; an elegant
stone bridge is built across it, a little above the falls.
The population of Trenton is about 4000. The other
towns, *viz.* Burlington, Brunswick, Princetown, &c.
are in general well built, but few of them contain above
200 houses.

*quia cum eis jaciuntur falcones et emittuntur ad præ-
dam*. See Menage. Hanmer, in his note on the passage
quoted from Shakspeare, says, "Jesses are short straps
of leather tied about the foot of a hawk, by which she is
held on the fist." And see FALCONRY, p. 801.

— If I do prone her haggard,
Though that her jesses were my deere heart-strings,
I'd whistle her off, and let her downe the winde
To prey at Fortune. *Shakspeare. Othello*, fol. 325.

Now wanting them he felt himselfe so light,
That like an hauke, which feeling herself freed
From bels and iesses, which did let her flight,
Him seem'd his feet did fly, and in their speed delight.
Spenser. Faerie Queene, book vi. can. 4.

JESS.

JESSO.

JESSAMINE. See JASMINE.

JESSO (also spelt Yezo, Eso, Jedso, and Insu) is
the name of a large Island to the North of Japan, and
separated from it by a narrow strait. Having been first
added to our maps by the Dutch navigators early in the
XVIIth century, their mode of spelling its name has
prevailed, but Ye-so, or Yezo, is preferable as giving
the proper sound of the Japanese letters with which
this name is written. The jealousy of the Japanese,
and the dangers with which the navigation of their sea
is beset, from the frequency of its storms and intricacy of
its many channels, prevented these coasts from being
known till a comparatively late period. Scarcely a
century has elapsed since Valentyn (*Oost Indien*, v.
Besch. van Japan, p. 20.) thought it necessary to enter
into a long detail of evidence to prove that Yezo was
not connected by an isthmus either with Nifon, or the
Continent of Siberia; and though he was well informed
with respect to the former, and maintained that Yezo
was an island, he does not seem to have received any
distinct accounts of its Northern or Eastern coasts. In
modern times it has been explored by La Perouse,
Broughton, and Krusenstern, to the last of whom we
are indebted for the most ample and authentic account
of it yet published.

Its form is nearly triangular, and its extent from
North to South about 300 miles, its greatest breadth
being about 280. Cape Nadezhda, (named from Kru-
senstern's ship,) in 41° 25' 10" North, 140° 5' East,
is its Southernmost point, and Cape Romanzov, in
45° 25' 50" North, 141° 34' 30" East, its Northern ex-
tremity: its centre being nearly in 143° East. The
Straits of Tsungár, or Sangár, named from the North-
Western promontory of Nifon, separate that Island
from Yezo, which is itself separated from Kimashiu,
on the North, by a narrow Channel, and from the
Peninsula* of Sakhalin, (properly Tarakaï, Sakha-
liên ula Khata, *i. e.* Rock of the Black River, being the
name of a rock near the mouth of the Amúr, and not
of the island, (Klaproth's *As. Polygl.* 301.) opposite to
it,) on the West, by La Perouse's passage. Its shores
are deeply indented, and form several secure harbours.
Volcano Bay, containing Endermo Harbour, on the
South-East side of the Island, is the best known of any,
having been thoroughly explored by M. Krusenstern in
1804. Yezo forms a part of the chain which connects
Kamchatka with Japan, and, as might be supposed,
consists of one or more ridges of rugged peaks, some of
which are active, others extinct volcanoes, and all pro-
bably volcanic in their origin: its appearance, there-
fore, is uninviting, and its soil appears to be generally
barren.

Its climate in winter time is extremely severe. In
the month of May M. Krusenstern rarely found the
thermometer 10° above freezing, but the cold is

Climate.

* M. Klaproth calls Tarakaï, or Sakhalien, an island; but he adds
not a tittle of evidence to disprove M. Krusenstern's statements, and
seems anxious to seize an occasion of speaking in very gross and con-
temptuous terms of that able navigator: M. Fr. Adelung (*Mithridates*,
iv. 248.) thinks the question completely set at rest by Krusenstern's
observations; but a better judge than either of them, M. Malte-Brun,
(*Précis*, iii. 460.) has discussed his evidence, and is of opinion that
it is not conclusive.

JESSO.
Animals.

much moderated by local peculiarities. The country round Endermo Harbour is fertile and well wooded, with most of the timber trees common in the North of Europe. The sea abounds in fish, some kinds of which, as an excellent species of anchovy, called *ni-sing*, are not found elsewhere. The *tripang*, or *bicho do mar*, (a species of *holothuria* much sought for by the Chinese,) also is found on the rocky shores of Yezo, with a variety of undescribed mollusca. Bears and dogs are plentiful and much valued by the natives, the first for food, the last as draught cattle, being trained to draw sledges in winter. They are of the same breed as the dogs used in Kamchatka for the like purpose.

Japanese
Colonies.

The Southern part of Yezo was known and possessed by the Japanese at least as far back as the middle of the XVIIIth century. (Valentyn, *Oost Indien*, v. *Besch. van Japan*, p. 19.) Their principal settlement, called *Matsūmaï*, was long considered as a separate island, or merely a peninsula of Yezo. They claim, indeed, the sovereignty of the whole Island, though it may be doubted whether they yet know more than a small portion of it. As long as they persevered in abstaining from any attempts to extend their dominion, the possession of a foreign settlement was not desirable, and they gave themselves little concern about the land of Yezo: but they seem for some time back to have relaxed the rigour of their system; and have now colonies on others of the Kurile Islands, of which Yezo is properly one, as will presently appear.

Natives.
Aïnos.

The original inhabitants of Yezo are a peculiar race, generally called Aïnos, from a word in their language signifying Man, but they are named Yezo by the Japanese, who apply that term to all the individuals of the same race. They are represented by their more civilized neighbours as perfect savages, and such they appear to be in a wood-cut in the *San kwē l'hung lan l'hu shwī*, (i. e. Delineation and description of all the sights in the three kingdoms,*) copied in Sir William Ouseley's *Oriental Collections*, (iii. 137.) where an eagle is seen in a cage, and a woman is suckling a bear's cub, while the bristly legs and arms of the man are represented, though somewhat symbolically, in the true Chinese fashion. The roughness and filth of these uncombed barbarians seem to have made a very unfavourable impression on the Japanese, who are cleanly to an excess, and shave the greater part, and often the whole, of their heads; whose hair, moreover, is probably scanty, as seems to be the case with all the Tatar race. Their drawings, which are complete caricatures, have given rise to a prevalent opinion that the Aïnos have naturally as thick, and nearly as continuous, a coat of fur on their bodies, as their dogs, bears, and foxes. Captain Spangenberg, a Dane in the Russian service, who landed on the Island in 1736, is the first traveller who verifies the Japanese report by his own observations; and Captain Broughton, who saw the Aïnos sixty years later, says expressly that "their beards were thick and large, covering the greatest part of the face and inclining to curl. The hair of the head was very bushy, which they cut short before on the forehead and behind the ears; behind it was cut straight. Their bodies were almost universally covered with long black hair, and even in some young children we observed the same appearance." But M. Krusenstern, who had more intercourse with them than any

of his predecessors, describes them as of a middling height, nearly black, with bushy beards, black, rough lank hair, but more regular features than the Kamchadales. Their women are extremely ugly; their hair hanging over their face, lips stained blue, and tattooed hands by no means diminishing their hideousness: they are also far from cleanly, but extremely modest, and, in that respect, the very reverse of the women in Nukahiva and Tahiti. A kind and open expression of countenance is almost universal, and was ever found accompanied by a corresponding excellence of character: they appeared entirely free from the selfishness and rapacity which are so generally observed in savages. Skins, and a cloth made of the bark of a tree, are the materials of their dress, when they are beyond the reach of Japanese influence; ear-rings are almost the only ornament they use. Hunting and fishing seem to be their sole occupations; and their disinclination from agriculture is, beyond a doubt, one of the qualities which makes them odious to the Japanese. Their quietness, equanimity, harmony among themselves, readiness to assist strangers, and singular disinterestedness, contrast them very remarkably with many of their neighbours and with most races of men, indeed, equally uncivilized. The whole number in the places visited by M. Krusenstern scarcely amounted to 400; a population so small, that it has been ascribed to the ill usage of the Japanese, who are supposed to take a very undue advantage of the mild and inoffensive character of their rough-haired neighbours, (Mo-sin, hairy-men, as they call them,) and to be gradually driving them out of the land of their forefathers.

The Japanese accounts, it must be confessed, give some colour to this supposition. The Mo-sin, they say, originally occupied the Northern parts of Japan, as far as Mount O-yama, but having been driven into their own isle, (*Matsūmaï*, or Yezo,) they have been gradually subjected, and now retain their independence only in the Northern part of it.* Swimming and leaping are their favourite amusements. Their villages are governed by hereditary Chiefs, who pay a tribute to the Governor of *Matsūmaï* in sea-otter, seal, bear, elk, and beaver-skins. They have little or no Religion, are quite uncivilized, brothers and sisters intermarrying, and each family forming a separate Tribe, which seldom unites with any other. Their obsequies are celebrated by mock-fights, which often end in bloody combats. *Matsūmaï*, at the Southern extremity of the Island, is the principal Japanese settlement, being a town of some size, and the residence of the Prince or Governor. There are ports, also, belonging to Japan, all along the Western coast, but the Northern and Eastern shores are still possessed by the Aïnos. Of the interior nothing is known, and it is probably in many places uninhabitable. The reports of a third and different race in the interior, mentioned by some writers, seem to rest on very slender foundations. The language of the Aïnos shows that they belong to the same race as the natives of the Kurile Islands, and it will therefore claim some further notice in the account of that remarkable archipelago, the Geography of which is not yet entirely cleared up, and was, till the latter half of the last century, the *locus veratissimus* of our

JEST, n.

JE'STER,

JE'STING,

JE'STINGLY,

JEST-BOOK,

JE'STING-STOCK.

Skinner prefers the Lat. *gesticulari*, and Junius, who decides for *gestus*, observes that the Italians say, *gestare*, *gesteggiare*, and *gesticolare*, for *gesticulari*, which the English expound, To mock a man by gesturing, or by moving his countenance, hand, or other parts of the body ridiculously, and to the prejudice of him, whom he intendeth to mock at.

To play or perform, merry or laughable tricks; to utter laughable sayings, to do or say things invented or feigned, for gamesome purposes, with mirthful or playful intention.

In our old Dramatic writers, to *jest* is to play or act a part in a mask.

Who raunge at random *iesting* at the iust
As though they raignde to do euen what they lust.
Gascoigne. The Fruites of Warre.

And if he haue children by another wife, then shall players & *iesters* raile and *iest* vpon thee, as a cruell step dame.
Vives. The Instruction of a Christian Woman, sig. D. d. 7.

And thus this foolish *iest*, I put in dogrill rime
Because a crosier staffe is best, for such a crooked time.
Gascoigne. Flowers.

For thy delicate pastimes (thou hast nowe) euerlastyng peine: for thy *iestinges* and songes, cōtinuall weping and howlyng.
Udall. Luke, ch. xvi.

Which beyng once knowne: Bathyllus for a time was all the *iestingstocke* of the whole citie of Rome.
Phaer. The Lyfe of Virgil, sig. M. 3.

Which when that scornfull Squire of Dames did view,
He loudly 'gan to laugh and thus to *iest*;
Alas for pitie that so faire a crew,
As like cannot be seen from East to West,
Cannot find one this girdle to inuest.
Spenser. Faerie Queene, book v. can. 5.

Let your *iests* fly at large; yet therewithall
See they be salt, but yet not mix'd with gall:
Not tending to disgrace,
But fairly given,
Becoming well the place,
Modest and even;
That they with tickling pleasure may provoke
Laughter in him, on whom the *jest* is broke.
Drayton. Odes. The Sacrifice to Apollo.

As gentle, and as iocond, as to *iest*
Go I to fight.
Shakspeare. Richard II. fol. 26.

BEAT. Why he is the Prince's *ieaster*, a very dull foole, onely his gift is, in deuising impossible slanders; none but libertines delight in him, and the commendation is not in his witte, but in his villainie, for he both pleases men and angers them.
Id. Much adoe about Nothing, fol. 165.

PETR. You'll let me, in I hope, for all this *jesting*.

MAR. Hope still, Sir.

Beaumont and Fletcher. The Woman's Prize, act i. sc. 3.

Kened, King of Scots, then in the Court of Edgar, sitting one day at table, was heard to say *jestingly* among his servants, he wonder'd how so many Provinces could be held in subjection by such a little dapper man.

Milton. Works, vol. ii. fol. 95. *History of England*, book v.

Thus Arcite: and thus Palamon replies,
(Eager his tone, and ardent were his eyes.)
"Speak'st thou in earnest, or in *jesting* vein?"
"Jesting," said Arcite, "suits but ill with pain."

Dryden. Palamon and Arcite.

But won't you then take a *jest*? Yes, but pray let it be a *jest*.
Spectator, No. 422.

But tho' each Court a *jester* lacks,
To laugh at monarchs to their face:
All mankind behind their backs
Supply the honest *jester's* place.
Dodsley. The Kings of Europe.

As lovesick Apollo, by Daphne disdain'd,
In Tempe sat whining beneath an old oak,
Bacchus happen'd to hear as he sadly complain'd,
And, shaking with laughter, thus *jestingly* spoke.
Boyse. Wine the Cure for Love.

The Scripture was his [Voltaire] *jest-book*, whence he drew
Bon mots to gall the Christian and the Jew.

Cowper. Truth.

JESUIT, } "Fr. *Jesuite*. A Priest of the
JESUITED, } Society of *Jesus*. An order of Reli-
JESUITESS, } gious men established by Loyola,
JESUITICAL, } a Spanish soldier. They pretend
JESUITICALLY, } to follow exactly the footsteps of
JESUITISM. } our blessed Saviour, whose name
they have usurpt. At first they gained to themselves
the people's esteem by their tolerable carriage: but now
they are generally hated and feared, because of their
devilish maxims, their bold enterprises, and secret in-
trigues." *Cotgrave.*

A *Jesuit* is, in English usage, an intriguer; a crafty,
subtle designer or plotter.

What they can bring us now from the Schools of Loyola with his
Jesuits, or their Malvezzi, that can cut Tacitus into slivers and stakes,
we shall presently hear.

Milton. Works, vol. i. p. 14. *Of Reformation in England.*

At Rome the Pope's Nuncio, and her *jесuited* mother here.

Then *jet* or marble farre from Ireland brought.
Spenser. *Faerie Queene*, book ii. can. 9.

The *geat*, which otherwise we call *gagates*, carrieth the name of a
towne and river both in Lycia, called *Gages*.

Holland. *Plinie*, book xxxvi. ch. xix.

— Amongst the Moors, the *jettiest* black are deem'd
The beautifull'st of them.

Drayton. *Poly-olbion*, song 26.

But most I wonder how that *jetty* ray,
Which those two blackest sunnes do fair display,
Should shine so bright, and night should make so sweet a day.
P. Fletcher. *Piscatory Eclogues*, ecl. 7.

Twice twentie *jettie* sailes with him, the swelling streame did take.
Chapman. *Homer. Iliad*, book ii.

Yet cherish'd there, beneath the shining waste
The furry nations harbour: tipt with *jet*,
Fair ermines, spotless as the snows they press.
Thomson. *Winter*.

His brother Niger too, and all the floods
In which the full-form'd maids of Africk lave
Their *jetty* limbs. Id. *Summer*.

I fed on scarlet hips and stony haws,
On blushing crabs or berries, that emboss
The bramble, black as *jet*, or sloes austere.
Cowper. *The Task*, book i.

Does your old master still persist to prize
His quondam mistress with the *jet-black* eyes?
Fawkes. *Theocritus. Idyl*. 4.

Many virtues are ascribed by Dioscorides, (v. 146.) to JET, which, as Pliny has stated above, derives its name from Gagas, a city and river of Lycia, near which it is abundantly found. Besides these particulars he has added some others, (xxxv. 34. *Ed. Hard.*) and Holland makes him speak as follows: "Blacke it is, plaine and even, of a hollow substance in manner of the pumish stone, not much differing from the nature of wood, light and brittle, and, if it bee rubbed or bruised, of a strong savour: looke what letters are imprinted with it into any vessell of earth, they will never be gotten out againe: whiles it burneth it yeeldeth the smell of brimstone: but a wonderful thing it is of this Jeat stone, that water will soone make it to flame, and oile will quench it againe: in burning, the perfume thereof chaseth away serpents, and bringeth women againe that lie in a traunce by the suffocation or rising of the mother: the said smoke discovereth the falling sicknesse and bewraieth whether a young damsell be a maiden or no; the same being boiled in wine helpeth the tooth-ach, and tempered with wax cureth the swelling glandules named the King's Evil. They say that the Magicians use this Jeat stone much in their sorceries, which they practise by the means of red-hot axes, which they call *Axinomantia*, for they affirme that being cast thereupon it will burne and consume, if that we desire and wish shall happen accordingly." (*Ib.* Holland, 19.)

Most of the professed writers on Gems have followed in the same course, and the reader may find corroboration of the above fancies in Orpheus, (*de Lap.* p. 332.

Ed. Gesner.) Solinus, (25.) Nicander, (45.) Marbodeus, (18.) and Aldrovandus, (iii. 19. *Mus. Met.*) in the passages especially devoted to *Gagates*. Isidore (*Orig.* xvi. 4.) repeats many of Pliny's words, but places the river Gagas in Sicily; he adds, moreover, that Jet is plentiful in Britain. Albertus Magnus, who in his *Tractatus de Mineralibus* (ii. 7.) confirms the hazard of its test to the gentler sex, adds another marvel in his little book *De virt. lap.* *Si vis esse victoriosus contra adversarios accipe lapidem qui dicitur Gagates, et est diversi coloris, et dicunt antiqui Philosophi fore expertum in Alcide principe, qui quamdiu eum portavit semper habuit victoriam, et est lapis diversi coloris sicut pellis capreolæ.* (p. 155. *Ed.* 1643.) This description, however, very little accords with Jet. Le Petit Albert (p. 17.) improves upon his type, and attributes the same curiously *inquisitive* powers, which others have ascribed to Jet, to amber, to *la semence de Pourcelaine* and to *la feuille de Glouteron et la racine*. Each of these, if reduced to impalpable powder, and drunk *in quovis vehiculo*, proves as certain in effect as the enchanted cup or mantle of Romance.

Jet is classed by Mineralogists as a species of Coal, Pitch Coal; it is solid, black, and opaque, brittle, and of a woody texture. It burns with a greenish colour, and exhales a bituminous smell. It occurs with brown coal in beds, in flæts, trap, and limestone rocks, and in bituminous shale. Hessia, Bavaria, Prussia, and Stiria produce it largely; it is found in the Isles of Sky and Faroe; in Prussia it is known as black amber; and on the English Eastern coast, near Lowestoft in Suffolk, and more particularly near Whitby in Yorkshire, it is very abundant, and is manufactured into various ornaments. The masses in which it occurs vary from an inch to seven or eight feet in length. Marbodeus (*ut sup.*) has noticed the British Jet as of the best kind:

Sed genus eximium longinqua Britannia nutrit.

And in this character Solinus (*ut sup.*) has agreed with him.

JET, } I believe, says Skinner, from the Fr.
JE'TTEE, } *jetter*, Lat. *jacere*, to throw, hence a *jetty*,
JE'TTEAU, } any thing thrown out or projecting. See
JE'TTING. } to JUT.

To throw out or project, to shoot out; to throw out or shake, (*sc.* the body in walking;) to strut along.

Jet, or *jetteau*, or *jette-d'eau*, a water-spout.

In such iollitye these louers *iet*.
That weale to them doeth seeme to bee but wo,
And grieve seemes ioye, they feede theyr fancies so.
Gascoigne. *Dan Bartholmew of Bathe*.

Yet neuer found I warmth, by *ietting* in thy iaggs,
Nor neuer can I weare them out, although they rende like raggs.
Id. *Weeds. The Complaint of the Greene Knight*.

And yet in towne, he *ietteth* euery streete,
As though the god of warres (euen Mars himself)
Might wel (by him) be liuely counterfayte.
Id. *The Steele Glas*.

I see Parmeno come *iettyng* like a lord, but see howe idle he is, as one out of all care and thought.

Udall. *Flowers*, fol. 97.

The Pharisee, he goeth *ietting* bolt vpright, being in an high conceipt of himself.

Id. *Luke*, ch. xix.

For they [her eyes] are blered
And she graye heared
Jawed like a *jetty*.

Skelton. *Elinour Rummung*.

You call me misbeleuer, cut-throate dog,
And spet vpon my *Jewish* gaberdine,
And all for vse of that which is mine owne.

Shakspeare. Merchant of Venice, fol. 166.

And howsoe'er French kings most Christian be,
Their crowns are circumsid most *Jewishly*.

Donne. Elegy 12.

2 GENT. Has made a thousand, sir,

And plaies the burthen to 'em on a *Jews-trump*.

Beaumont and Fletcher. The Humorous Lieutenant, act iv. sc. 1.

It supposeth that we were all under an obligation to observe the
same day of the week that the *Jews* were, unless Christ should give
a contrary command: but this is a great mistake; we are no more
bound to observe the sabbath, as it is a *Jewish* institution, than we are
bound to observe their new moons and solemn festivals.

Sharpe. Works, vol. iv. p. 222. Sermon 13.

A JEWS-HARP, as explained by Mr. Todd, is "a kind
of musical instrument held between the teeth, which
gives a sound by the motion of a broad spring of iron,
which, being struck by the hand, plays against the
breath." A figure of it is engraved, unaccompanied by
any description, in the *Musurgia seu Praxis Musicae*,
(p. 28.) of Ottoman Luscinius, a Benedictine Monk of
Strasburgh, who published at that City in 1536, and
an Analysis of whose little Work is given by Sir John
Hawkins. (*Hist. of Mus. ii. 441, &c.*) Luscinius
classes it with the drum, the bugle, a sort of French
horn, castagnets, a little bell, a pot with a stick, and a
smaller machine for noise, which we do not know how
to name. All these he honestly calls such *quæ strepitum
ciere possunt magis, quam amicum auribus sonitum
reddere*; and he excuses himself for touching upon them,
because *locus exigit ut post musica instrumenta etiam
ista quæ amusa sunt commonstremus*. Skinner seems
to have had an equal aversion from the Jews-harp
and the people after whom it is named. *Tuba vel
cythara Judæorum sic autem dicitur per contemptum.
Certè nihil magis absonum est et obstreperum, imo nec
cardinum aut rotarum stridor, nec catulientium felium
vagitus, quam Hebræorum in Sacris ἀμυσσος ille et ἀναρ-
μόνιος concentus.* (*Etymology, ad v.*) From this pas-
sage it might be supposed that there really was an in-
strument under this name pretending to make music and
employed by the Jews in their Religious celebrations;
but this opinion is sturdily combated in a statement
which Mr. Todd (*ad v.*) has cited from a diligent in-
vestigator of such matters. "The Jews-trump, or, as
it is more generally pronounced, the Jew-trump, seems
to take its name from the nation of the Jews, and is
vulgarly believed to be one of their instruments of
music. But upon inquiry, you will not find any such
musical instrument as this described by the authors that
treat of the Jewish Music. In short, this instrument
is a mere boy's plaything, and incapable of itself of
being joined either with a voice or any other instrument;
and I conceive the present orthography to be a corrup-
tion of the French *jeutrumpe*, a trump to play with.
And in the Belgic, or Low Dutch, from whence come
many of our toys, a *trump* is a rattle for children.
Sometimes they will call it a *Jews-harp*; and another
etymon given of it is a *Jaws-harp*, because the place
where it is played upon is between the *Jaws*." (*Pegge,
Anonymiana, i. 82.*)

Olaus Wormius, in his *Monumenta Danica*, (i. 7.)
speaks of an instrument which can scarcely be con-
sidered as any other than a Jews-harp, and is so under-
stood by Sir Thomas Brown, (*Hydriotaphia, p. 8.*) as
dug up in some sepulchral urns in Norway. *In Norvegiâ
prope Hollojen in Mandalensi territorio, non ita pridem
duæ effossæ sunt urnæ, in quarum alterâ cineres et
ossium reliquæ, in alterâ instrumentum musicum, Danis*
en Mundharpe, ex cupro deaurato nitidissimo, suo splen-
dore omnes in admirationem trahens.*

* *Mund harpe*, a mouth-harp. Ernst Wolff, *En Dansk eg Engelsk
Ord-bog*.

JEW.

JEW.

The phrase *worth a Jew's eye* seems to have been accounted for on a wrong foundation; namely, as if there were some positive value attaching to the eye of a Jew. Archdeacon Nares admits, that "the fine black eye of a Jew" is not a sufficient origin for the saying; but he deduces it, as we think without more reason, from the extortions to which the Jews were subjected in early periods of our History, when they were exposed to the most cruel mutilations if they refused to pay the sums demanded. He continues by referring to an instance which has been brought forward by Hume, (ch. xii.) and which is probably well known to most readers, from the allusion made to it by Sir Walter Scott in one of his most popular Tales. The original, which we shall cite, will be found in Matthew Paris, and presents a fearful picture of the barbarism of the times to which it relates. *Anno Dominicæ Nativitatis millesimo ducentesimo decimo. . . . Rege jubente capti sunt Judæi per totam Angliam utriusque sexûs, et incarcerati, pænisque gravissimis afflicti, ut de pecuniâ suâ Regis facerent voluntatem. Quorum quidam graviter torti dederunt omnia quæ habebant, et plura promittebant, ut sic possent evadere tot genera tormentorum. Inter quos unus apud Bristolium variis dilaceratus tormentis, cum se redimere, nec finem facere voluisset, jussit Rex tortoribus suis, ut diebus singulis unum ex molaribus excuterent dentibus donec Regi decem millia marcarum persolvisset. Cùmque tandem per dies septem tot dentes cum intolerabili cruciatu excussissent, et die octavo simile opus agere tortores jam inceperant, Judæus ille, utilium tardus provisor, dedit pecuniam memoratam, ut septem dentibus evulsis octavum sibi salvare liceret. (sub ann. 1210, p. 229.)*

The deduction made from this story is, that a Jew's eye no doubt was worth as much or more than a Jew's tooth. It surprises us that the example brought forward in illustration did not suggest a plainer exposition. In the *Merchant of Venice*, Launcelot, when warning Jessica that Lorenzo is about to seek her, says,

Mistress, look out at window, for all this;
There will come a Christian by
Will be worth a Jewess' eye.

Act ii. sc. 5.

i. e. well worth looking at by a Jewess; and such we take to be the general meaning of the expression *worth a Jew's eye*, namely, worthy of close inspection by those who are proverbially well acquainted with the value of commodities.

"In Jews' ears," says Sir Thomas Brown, "something is conceived extraordinary from the name, which is, in propriety, but *Fungus sambucinus*, or an excrescence about the roots of Elder, and concerneth not the Nation of the Jews, but Judas Iscariot, upon a conceit he hanged on this tree, and is become a famous medicine in quinsies, sore throats, and strangulations ever since." (*Vulgar Errors*, ii. 7.) The French give this mushroom the same name as ourselves, *Oreille de Judas*. Hill, in his *Materia Med.*, has offered a full description of it, which is extracted by Mr. Todd, *ad v.* It is tough and thin, rumpled, and with a hollow cup, into which its sides run in many places, so as to represent in it ridges like those of the human ear. It is found for the most part on the lower parts of decayed Elder trees, and has been named by Linnæus *Auris*, or *Auricula Judæ*. Sir Thomas Brown has an amusing Chapter, (iv. 10.) inquiring whether "an unsavoury odour be gentilitious or national to the Jews;" a question which he decides

in the negative, without touching upon the legend of the Jew's ear, which has been assigned as a cause for this ill property by some other writers. In a Note in Brande's *Popular Antiquities*, (ii. 587.) the following passage is extracted from *Paradoxical Assertions and Philosophical Problems*, by R. H., 1669, part ii. "Why Jews are said to stink naturally? Is it because the Jew's ears grow on stinking Elder, (which tree that Fox-headed Judas was falsely supposed to have hanged himself on,) and so that natural stink hath been entailed on them and their posterities, as it were *ex traduce*?"

Gower. Conf. Am. book vii. fol. 157.

JEZEBEL. For the application, see the Quotation.

It is my misfortune to be so posted, that my lodgings are directly opposite to those of a *Jezebel*. You are to know, sir, that a *Jezebel* (so called by the neighbourhood from displaying her pernicious charms at her window) appears constantly dress'd at her sash, and has a thousand little tricks and fooleries to attract the eyes of all the idle young fellows in the neighbourhood.

Spectator, No. 175.

JEWISE.

JEZIRA.

J E Z I R A.

JEZIRA, or more fully *Al-jezírah beín-al-Forát wa'l Dijleh*, i. e. the Peninsula between the Euphrates and Tigris, nearly corresponds with the Northern part of Mesopotamia and Aram naharaím, (Syria between the two rivers,) in Ancient Geography. (*Gen.* xxiv. 10.) Some places, however, beyond these natural boundaries are considered as annexed to Jezírah. (*Goliús, ad Al-fergan*.) It was divided by the Arabs into four Districts. (*Diyár*, Abodes, Habitations.) 1. *Diyár Bekr*; 2. *Diyár Modár*; 3. *Diyár Rabí'ah*; and 4. *Diyár-al-jezírah*; the first three being named from heads of the Tribes by which they were conquered, the last from an island in the Tigris called Jezírah ibn Omar, (i. e. the Island of the son of 'Omar.) Abú Bekr ibn Wáyil (son of Wáyil) was fourth in descent from Rabí'ah, brother of Modar, son of Naz'ar, and grandson of Adnán; the parent of these Tribes was, therefore, believed to be descended in the eleventh degree from Ishmael. (*Ismá'il*.) (*Pocock, Spec. Hist. Arab.* 45.) *Al-Jezírah*, according to the Turkish division of the Empire, contains the three Páshálics of *Diyár Bekr*, *Raccah*, and *Mósul*, and a few small tracts belonging to the adjoining Páshálics. The Northern part of this Peninsula is an undulating table-land, enclosed and intersected by low chains of barren calcareous hills of no very great height. The country, though fertile, is in general bare of wood; but its most barren and rocky tracts contain valuable minerals, and it has great natural resources, as well as an excellent climate. The weakness and disorganization of the Turkish Government, however, nearly counterbalances these advantages. The plains and valleys are, for the most part, occupied by lawless Kurds or wandering Turkomans; and the commercial industry of the cities is hampered and discouraged by their depredations, or by the exorbitant price claimed for their protection.

I. *Diar Becr*. The Northernmost division of this Peninsula is the Páshálic of *Diyár Bekr*, (*Iyyaleti Diyár Bekr, Jihán-numà*, p. 436.) which extends beyond the Tigris, (*Dijleh*,) and comprehends a part of Kurdistán. It

VOL. XXIII.

derives its name from the Tribe of Bekr ibn Wáyil, ibn Cásit, its Mohammedan conquerors, and is bounded on the North by Arzrúm, on the West by Sívás, on the South by *Raccah* and *Mósul*, and on the East by Ván. It contains 13 *Sanjács*, (military districts,) eight of which are hereditary estates belonging to the Kurd-Begs, and 10 Lordships, or hereditary fiefs. (*Hukümet*.) This viceroyalty furnished 7030 soldiers, (*kilijs*, swords,) having 42 *zi'ámets* and 688 *tímárs*, (great and small military fiefs,) and the force brought by the Begs of the Kurds was 1800 strong.

Amid, the *Sanjác* or District of the Páshá himself, contains seven or eight *cázílics*. (Civil divisions.) 1. *Amid*, in Syriac *Amid*, in Armenian *Amit*, and in Greek *Amida*, is called *Carà Amid* by the Turks, from the black stone (lava, according to Sestini, p. 93. basalt in the opinion of Mr. Buckingham, p. 208.) of which its walls and houses are built. It is also named after the whole viceroyalty, *Diyár Bekr*, and is situated on the Western bank of the Tigris, in 37° 54' 30" North, and 39° 57' 45" East. The origin of its name and the time of its foundation are unknown; the Cæsar Constantius enlarged and strengthened it, A. D. 339, and it became a place of note in that and the following centuries. It has been supposed to be the Tigranocerta of the Ancients, and if so, is mentioned by much earlier Historians; but that opinion rests on rather slender grounds. (*St. Martin, Mém.* i. 171.) The citadel, now in ruins, stands on a hill at the Northern extremity of the city, commanding the plain on the opposite side of the river, and the Páshá's palace is within its walls. (*Otter*, ii. 273.) The whole city is placed on a steep declivity of lava or basalt, and its walls are strengthened by strong towers pierced for artillery. Its position, and the richness of the surrounding country, backed by lofty mountains, and watered by the Tigris and its tributary streams, render it a striking and picturesque object. From a hill overlooking the place, Niebuhr counted 16 minarets, some of which are quadrangular, and supposed by the Christians to have been belfries. Some of them are richly

Amid, or
Cara Amid.
Amida.
1. *Diar*
Becr, or
Amid.

JEZIRA.

sculptured, and built in the Roman style of masonry, (Buckingham, 217.) The Great Mosque, or Jâmi', a handsome building, is said to have been a Christian Church. At about 1500 double paces below the Southern Gate (*Mârdîn câpûstî*) there is a stone bridge of 10 arches over the Tigris: its inscription, in the Cufic character, was in Niebuhr's time already too much defaced to be legible. (*Reise*. ii. 402.) Another in the town, near the Yenî Cápú, is dated A. H. 437. (A. D. 1046.) The houses, as in most Asiatic towns, are not closely packed together, being interspersed with gardens. Niebuhr supposed, in 1766, that 16,000 were inhabited, which gives a population of 80,000 souls; Messrs. Buckingham and Sestini (p. 95.) reduce it to 50,000, of which 1950 families (about 13,000 persons) were Christians, and 12 (100 individuals) Jews; the rest Musulmans. Niebuhr supposes the Mohammedans to be to the Christians as four to one; nearly, therefore, in the same proportion as at present. Twenty baths and 15 khâns (*caravanserais*) show what the luxury and opulence of Diyâr Bekr formerly was; its bázárs, though less splendid than is usual in large towns, are still well supplied. Silks and cottons, like those of Damascus, printed and embroidered muslins, morocco leather, hard-ware, pipes, and gold thread are the principal manufactures. Fifteen hundred weavers, 500 calico-printers, 300 leather-workers, 150 smiths, and 150 pipe-makers are the numbers stated by Mr. Buckingham; but he has not mentioned the data on which his calculations are founded. The whole force now under the Páshá is said by the same writer (p. 215.) to be 1000 men, infantry and cavalry in equal proportions. There are two Patriarchs resident in this city, one the Spiritual head of the Jacobites, or Syrian Christians, who is always styled Ignatius; the other, who is always named Yúsuf, is chief of the Nestorians, Jacobites, and other Sects reconciled to the Church of Rome, and here called Chaldeans; at Constantinople they are termed the *united* Greeks, Armenians, &c. This schism in the Eastern Churches was first brought about by the Jesuits in the earlier part and middle of the XVIIth century. There are only a few Shemsiyyehs, (worshippers of the Sun,) and they are under the protection of the Jacobites. They are, probably, a remnant of the followers of Zoroaster, who have been taught by persecution to conceal their Faith with the same obstinate secrecy as the Druzes and Nosaï-riyyehs.

2. Nardeen.

2. *Mârdîn*, a *cázilic* under Diyâr Bekr, is in the Arabian District of Diyâr Rab'ah, and in 37° 20' 30" North, 40° 35' 15" East. It is placed on a lofty and very steep hill. Its castle, on the brow of a precipice overhanging the town, is quite ruined; but fragments of the city walls are seen here and there. It is a long and narrow town, of which the Northern angle is the most elevated and best fortified. The iron gate and sculptured figures at the entrance to the castle are, probably, of the Lower Empire. The rock on which this town is built is a soft limestone, easily quarried; all the houses, therefore, are of stone; and they stand on so abrupt a slope, that the roofs of those in one street serve as a foot path for their neighbours above. They all overlook the extensive plains to the South and West, and their whole number cannot exceed 3000, two-thirds of which belong to Mohammedans; there are only a few families of Jews, so that the whole population may be estimated at 16,000 souls. There are

10 *jâmi's*, or large mosques, besides many smaller. JEZIRA. The minaret of the largest is handsomely ornamented with sculptures and an open stone gallery. The domes of it and of several others are singularly ribbed. The Medraseh, or College of Cásim Páshá, is richly endowed. The Deir za'ferán, a convent in a beautiful spot about four miles from the town, is the residence of the Jacobite Bishop. (Buckingham, 180.) The air of Mârdîn is very pure and healthy; but its great elevation makes it extremely cold in winter. The surrounding gardens are very productive, and peculiarly renowned for their excellent plums. Wild cherries and manna are gathered in great quantities in the neighbourhood. The Governor is a Voivódeh appointed by the Páshá of Baghdád; for this part of Jezírah is now included in that Páshálic. In 1766, the Shemsiyyehs in Mârdîn amounted to 500 or 600 persons. They have conformed outwardly to the Jacobite rite, and placed themselves under the jurisdiction of the Bishop of that Sect, in consequence of an order issued by Sultán Mustafá that all his subjects who were not Mohammedans, Jews, nor Christians, should embrace the true Faith, or be banished from his dominions. Mârdîn is called Merdin by the Armenians, Mardá by the Syrians, and Mardè by Ptolemy, (vi. 1.) who places it in Assyria. It is named Mardes, or Mardis, by the Greeks of the Lower Empire. (St. Martin, *Mém.* i. 160.)

3. *Meyyáfárekín*, or Mufárakín, in Modern Armenian Mufarghin, in the Ancient language Nprgerd, in Syriac Meifirket, is the Martyropolis of the Lower Empire; and is, probably, on the site of Carathiocerta, the Capital of Sophene. It is watered by a small stream called 'Ain-el-haúd, or Haúz, the ancient Nymphius. (*Jihán-numà*, 437.) Placed on the Southern declivity of a hill, and surrounded by a stone wall, it lies, according to the Arabian Geographers, in 38° 30' North and between 65° 66' East of the Fortunate Islands. (Otter, ii. 274.)

4. *Hesn Kēfá*, in Syriac Hesn Kēfá; the Castrum Cepha of the Imperial Registers, (*Notitia Imperii*), is a strong port on the Tigris, a little to the South of Cará Amid. It is protected by a castle placed on a high rocky mountain, and communicating with the city by a bridge. It produces an excellent kind of grape called *hhasí*.

5. *Nisibín*, the Capital of Diyâr Rab'ah, is a small town on the Western bank of the Hermás, (Mygdonius,) which descends the mountains to the North of it. The gardens on the banks of that river are said to amount to 40,000, and the roses about Nisibín are all white. (*Jihán-numà*, p. 438.) At this ancient town, according to St. Jerome (in *Genes.* x. 10.) the Accad of Moses, named Mázpín by the Armenians, (St. Martin, i. 161.) and called the Mygdonian Antioch by the followers of Alexander, (Strabo, xvi. i. 24.) Tigranes held his Court, as, according to the Armenian Historians, all the Arsacides did from 149 B. C. to A. D. 14. It was long possessed by the Kings of Persia, and is now included in the Sanjác of Mârdîn and Páshálic of Baghdád. There are still some remains of the citadel, a Temple, a bridge, and the Church of St. James, with a vast mass of other ruins; among which the present town, scarcely exceeding 100 houses, is scattered. The inhabitants, hardly amounting to 1800 or 2000, are principally Arabs and Kurds; the few Christians living among them being protected by their poverty from the ill usage which

3. Meafare-keen, or Moofar gheen.

4. Hesn Caifa.

5. Nessee-been. Nisibis, or Nesibis.

JEZIRA. their creed would otherwise provoke. "Near Nesíbín," says the *Jihán-numà*, (p. 438.) "is a village called Dārā, because it is the place where Alexander (Iskender) fought with Darius. (Dārā.)" Whatever be the value of that tradition, it is certain that Dārā, as fortified by Anastasius and Justinian, was one of the strongest bulwarks of the Eastern Empire. (Gibbon's *Decline and Fall*, vii. 139. 8vo. ed.) It was for some time called Anastasiopolis; but its original Asiatic name was preserved by the natives, and received from them by the Arabs.

6. Sinjar. *Sinjār*, a Sanjác to the South of Nisíbín, in the Diyár Rabí'ah, is a ridge of verdant hills in the midst of naked plains. This chain stretches from North-East to South-West for about 50 miles; and its summit, about 2000 feet above the surrounding desert, forms a rich table-land watered by copious rivulets. It is the only place in all Jezírah where the palm flourishes. The town of Sinjār is at the foot of the mountain, near its Southern extremity. It has a castle and many gardens, with abundance of water, and is famous for the excellency of its raisins and figs. Singara, the ancient town, near which Sinjār stood, was a Roman colony, and a place of great note under the Emperors; but it seems from Ptolemy to have lain between the hills and the river, to the North-East of the present town, which is on the Hermás, (Hermes?) or Mygdonius. A little to the South-West of Sinjār there is the hill called Chatal-gedúk, behind which is the lake Khátúniyyeh, (Ladies' Lake,) in the middle of which there is an island containing a large village. To the West of the lake there is a hill called Hevátiiyyeh, on which there is a large column, ('*amúd*,') called a pyramid by Otter (ii. 255.) and Niebuhr; (ii. 390.) the latter of whom understood it to be in the island, which, he says, is connected with the main land by a narrow embankment.

7. Se'ert. *Se'ert*, or *Se'erd*, is on a hill rising from a plain to the North-East of the Dijleh, (Tigris,) is well provided with springs which supply its inhabitants with water, and is famous for a kind of grape called *sháfí'i*. The river of Bidlis flows to the South of Se'erd, which is a day and a half (35 miles) distant from Meyyáfárekín Southward, and four days (80 miles) to the South of Amid.

8. Kharput. *Kharput* (from the Armenian Kharpert or Garpert) is a Turkish Sanjác, and an Armenian Archbishopric, in the ancient Sophene, on the South side of the Murád cháí, and North-West of Cará Amid. It is on the summit of a hill, near a small lake, and is called Kortbert by the Syrians, and Khartbert or Hisn Zeyyád by the Arabs. This sanjacate extends a good way on each side of the Euphrates to the Kurd Principalities of Chemeshezek and Pertek. The town, which has a market and a castle, is two days' journey (40 miles) from Malátiyyah. The district of Ulú-bád is dependent on it. (St. Martin, i. 95. Otter, ii. 284. from *Jihán-numà*, p. 439.)

9. Arghance, or *Arghnee*. *Arghana*, or *Arghani*, (Arghni, in Armenian,) two days' journey* (40 miles) from Diár-bekr, on the road to Kharput, is also a Bishop's See, and the residence of a Sanjác Bey. It is a small and populous town on the side of a lofty mountain, at the foot of which is the Lake Gógcheh, lying between it and Kharput. Its

wine is most abundant and excellent, and there are rich iron mines in its neighbourhood.

10. Siverig, or *Siverek*, (from the Armenian *Seváverag*, or Syriac Sibáberak,) is called Suweireik, in the diminutive form, by Niebuhr, (*Reise*. ii. 406.) who found its latitude to be 37° 46' North. It is an unfortified town which has a strong castle, three mosques, and as many *Hamáms*. (Baths.) Its inhabitants, in the middle of the last century, amounted to about 10,000; but do not now, according to Colonel Kinneir, (*Mem.* 317.) exceed 500.

11. Chemeshezek, (in Armenian Chmshga-dzak,) called Shúmúshkí by the Syrians, is on the side of a mountain near the bank of the Euphrates. It was, according to the Armenians, (St. Martin, i. 95.) anciently called Hierapolis, and received its present name from having been the birth-place of the Emperor John Zimisces.*

12. Máz-gírd, or *Magházgírd*, (in Armenian Medzgerd,) is near Pálú, and was a place of importance in the XIVth century.

Of (13.) *Acchah-cal'ah* and (14.) *Khábúr* nothing more is said in the *Jihán-numà*; the latter seems to be a part of the Páshalic of Raccah. The remaining districts belong to Kurdistán. On the North of Jezírah, Carájah,† tágh, the Masius of the Greeks, separates it from Armenia, and, towards the East, joins Mount Káreh, which stretches obliquely across Kurdistán. Parallel with the Tigris, and not far from it, is Mount Júdí, venerated by the Kurds as the resting place of the Ark. The division of this Páshalic into Sanjács has been changed several times, and thence the lists in different Works vary, as is the case with regard to other Turkish Provinces.

II. The Páshalic of O'rfah, anciently Raccah, is bounded on the North by Diyár Bekr; on the East by Mósul; on the South by the Desert of Sinjār; and on the West by the Euphrates. It is divided into eight Sanjács, and contains 38 larger (*zi'ámets*) and 615 smaller (*tímár*) feudal Lordships. Its annual revenue is estimated in the *Canún-námeh* at 6,584,981 aspers = 164,624 piastres. (4115*l*.) The most remarkable places in this Páshalic are: 1. *Rohá*, now called *O'rfah*, the ancient Edessa, (see *EDDESSA*, vol. xxi. p. 389.) in 37° 8' North, and 38° 38' East, according to Mr. Macdonald Kinneir, situated on the Eastern side of a hill, and varying little in level. Its walls enclose an irregularly shaped area of about three miles in circumference, nearly filled with houses, overlooking to the East and North-East a fertile plain, which loses itself in the desert. Numerous and well-supplied bázárs, especially that where shawls and other Indian goods are sold, kháns of vast size, and 15 Mosques, the largest of which was a Christian Church, even now render it one of the most splendid cities in the Turkish Empire. Its ancient castle, now in ruins, is distinguished by the two lofty Corinthian pillars (Buckingham, p. 89.) mentioned in the *Jihán-numà*; (p. 442.) and the fine Mosque and reservoir of Abraham, (*birket Ibráhím el khalíl*,) surrounded by richly ornamented buildings and public gardens, afford the traveller a variety of enjoyment which can scarcely be found elsewhere in the

* "Thirteen hours (= 48½ miles.)" Macdonald Kinneir, *Memoir of Map of Persia*, 335.

* Chmshgaí dzakumn (whence Chmshga-dzak) signifies the birth of Chemesheg, i. e. Zimisces.

† Not *Koruj*, as Mr. Buckingham spells the word.

- JEIZRA.** East, except it be in the Ghútah of Damascus. The population of O'rfah is estimated by Mr. Buckingham (p. 86.) at 50,000, comprehending 2000 Christians and 500 Jews: and according to him it is now governed by a Musellim, under the Páshá of Diyár Bekr. U'rfah, the modern name of Rohá, or Róhá, seems to be an Armenian corruption of Urha or Urrhaí, the ancient Syriac name of the Capital of the Osrhoene. 2. *Harrán*, in 36° 40' North latitude, according to the Arabian Geographers, and in the Diyár Modar, was anciently a very large city supplied by aqueducts with water from the mountains six miles to the South, and adorned with a Sabæan Temple, and believed to be the work of Abraham. The soil about it is red, and its ruins were still considerable in the middle of the XVIIth century. (*Jihán-numà*, p. 443. Otter, ii. 111.) Its Armenian name is Kharan, and it is the Haran of Scripture, and Charra of the Greeks. It was long the head-quarters of the Sabæans, whose tenets are very imperfectly known. (St. Martin, p. 158.) 3. *Serúj*, in Syriac Serúg, probably the Batnæ of Ammianus, (xiv. c. 3.) was formerly a large city and is one day's journey from Harrán, in 36° 50' according to the Arabian Tables. It had abundance of water, excellent gardens, and the best grapes in the world. 4. *Raccáh*, formerly the Capital of the Páshálic, and Diyár Modar, is placed by the Arabs in 36° North latitude, to the North-East of the Frát; (Euphrates;) it was also called Beídá, (white,) and Ráficah. It has long been abandoned and ruined. 5. *Bíreh*, or *Bírehjic*, a small town on the Eastern bank of the Euphrates, is the most frequented passage over that river. It has a strong castle, believed by the Asiatics to have been built by Alexander the Great. It is flanked by a fertile vale called Wádí-el-zeitún, (the Valley of Olives,) and appears to be the BIRTHA of Ptolemy. (*Geogr.* v. 18.) It was for about 20 years in the possession of the Crusaders, and its present Lord, or Sanjác Beg, sometimes acknowledges the authority of the Páshá of Aleppo, sometimes acts as an independent Chief, though properly subject to the Páshá of O'rfah. Being so great a thoroughfare it is still a place of some trade, as appears from the detailed account of it given in Mr. Buckingham's *Travels*. (ch. ii. p. 26—38.) The remains of antiquity found there are also well described by Maundrell. (*Appendix to Journey from Aleppo to Jerusalem*, p. 3.) 6. *Rás-el-'aín*, (spring-head,) also called *'Aín verdeh*, is a level tract in Dár Rabí'ah, where more than 300 springs of clear water burst forth and give rise to the river Khábúr, (Chabóras,) which gives its name to the Sanjác of (7.) Khábúr, containing two castles, and extending from the source of the Khábúr, near Kerek, in the mountains of Rás-el-'aín, to the Euphrates. The former of these rivers, having made a circuit round the mountains, falls into the latter at their feet. The Bení Ríshah Arabs, also called Mawálí, pass the summer here, but winter in Selmiyyeh. (*Jihán-numà*, 444. Otter, i. 111.) 8. *Zúrbúk*,* also called Búzúr, is a tract on each side of the Euphrates, from Bális to 'A'nah, so thickly planted with mulberry trees, that they form an impenetrable wood, except close to the sides of the river, where there is a public road; various Tribes live in tents in these places, and rear
- silk-worms, so that silk is produced there every year to the value of 300 or 400 purses, (i. e. 1500 or 2000 piastres = 500 to 700*l.*) and a tribute is paid in kind to the Mawálí Arabs inhabiting Búzúr, the chief Tribe of whom is the Bení Semek. In this tract (Búzúr) there are lions, lynxes, and other wild beasts. (*Jihán-numà*, 444, 445.)
- III. The Páshálic of *Músel* is bounded on the North by Diyár Bekr, on the East by Shehrzúr, in Kurdistán, on the South by the Savád of 'Irác, and by the Páshálic of Raccáh on the West. It is subdivided into six Sanjács, (or five according to the *Canún-námeh*.) (*Jihán-numà*, 433.) 1. *Músel*, or *Maúsil*, Capital of the Province, and also of Jezírah, (Mesopotamia,) is on the West side of the Tigris, in 36° 21' North, and 43° 12' 45" East, in a flat country. It was, according to Ab'lfedá, anciently surrounded by two walls, but they, as well as its castle, were, even in his days, partly ruined. (Otter, i. 136.) The single wall which now encloses it is broken down in many places, and most of its buildings are falling into ruins. It has seven gates, and a dilapidated castle on an artificial island in the Tigris, which is here only a hundred yards wide, but extremely rapid, and often rising to a level with the houses. Its coffee-houses, kháns, baths, and bázárs are handsome and well supplied; but the Páshá (who has only two *túghs*, or horse-tails, as marks of his rank) resides in a cluster of paltry buildings, his palace, the Cará Seráí, being no longer habitable. The Medraseh (College) of 'Alá-ed-dín Lúlú, the tomb of Yahyá abú'l Cásim, and the fine minaret and ruins of the Mosque of Sultán Núr-ed-dín Zingí, are beautiful specimens of Moorish architecture. The population of *Músel*, in Niebuhr's time, (A.D. 1766,) might be estimated at 50,000, including 6000 Christians and 1000 Jews. (*Reise*. ii. 358, 363.) Mr. Kinneir was told by the Páshá (in 1811 or 1812) that it amounted to nearly 35,000 souls. (*Mem.* p. 258.) The purity of the air and mineral springs in or near *Músel* are also deserving of notice: but the desolate state of the surrounding country, and the dark forests of cypresses which fill the burying grounds by which the town is surrounded, give it a gloomy appearance; and notwithstanding its excellent position as an emporium, which makes it so accessible and fit for a rendezvous (*Al Maúsil*) from all the neighbouring Countries, (Gol. in *Alfergan*. p. 233.) its trade is now reduced to little more than a mere transit commerce in gall-nuts and copper, which are sent down the Tigris to Baghdád, and exchanged for Indian goods suited to the markets in Armenia and Asia Minor. Its fine cotton-manufactures, called from it *Múseli*, and by the Venetians and Genoese *Musselini*, (whence our word muslin,) are lost. Opposite to *Músel*, on the Eastern bank of the river, are the mounds of rubbish which mark the site of Ninive. 2. *Tikrit*, in 35° 50' North latitude, according to the Arabs, is the last town in Jezíreh, (Otter, i. 145. *Jihán-numà*, p. 424.) and lies on the West side of the Euphrates, six days' journey from *Músel*. The canal called Nehr Is-hákí flows to the South and East of it. The castle built by Shápár, son of Ardashír (Artaxerxes) Bávik, has long been destroyed, and in its place there is a spring producing naphtha. This town is supposed to be the BIRTHA of the Ancients. It has now only 500 or 600 houses, two coffee-houses, and a caravanserai; and its population cannot exceed 2500. On the opposite bank of the river is the tomb of

* M. Malte-Brun, whose accuracy deserves great praise, has, in speaking of this tract, been misled by a blunder in the French translation of the *Jihán-numà*. (*Précis*, iii. 113.) so as to call this country Zombouk, and the Arabs Bení-Semen, instead of Bení-Semek.

JEZIRA. Mohammed Deir, one of the 12 Imáms, so much venerated by the Shi'ahs.

IGNEOUS.

IF. Skinner says: "If in agro Linc. Gif, ab A. S. gif, si: *Hoc a verbo gif-an, dare, q. d. dato*:" and this Lye quotes with approbation; and it is adopted by the Editor of G. Douglas, and by Pinkerton. Ray:—"Gin, gif, in the Old Saxon is gif; from whence the word if is made *per aphæresin literæ g*. Gif, from the verb gif-an, dare; and is as much as dato."

Tooke:—"If is merely the imperative of the Gothic and A. S. verb gif-an. And in these languages, as well as in the English formerly, this supposed conjunction was pronounced and written, as the common imperative, purely gif."

"G. Douglas almost always used gif: once or twice he has used if." "Chaucer commonly uses if; sometimes yeue, yef, yf." Ben Jonson, in the passage quoted below, writes gif.

Richard of Gloucester writes gef. R. Brunne, if.

Tooke gives the following resolution of the lines cited below from Ben Jonson. "She can be reclaimed; give that, my largesse hath lotted her to be your brother's mistress. She cannot be reclaimed, give that; my largesse hath lotted her to be your brother's prey."

Another example is:—"How will the weather dispose of you to-morrow?—If fair (i. e. give fair weather) it will send me abroad; if foul (i. e. give foul weather) it will keep me at home." Or making the datum (or thing given) a sentence. Thus:—if it is fair, &c. if it is foul, &c. the resolution will be—It is fair weather; give that: it will, &c.; It is foul weather; give that: it will, &c.

As þis dragoness forȝte þus, þe kynge hette Merlyn þere,
Forte segge, ȝef he couþe, wat þe tokenynge were.

R. Gloucester, p. 131.

"We mote," he seyde, "be hardy, and stalworþe, and wyse,
ȝef we wol habbe oure lyf, and holde oure franchise."

IGNITION,	
IGNIPOTENT,	
IGNIVOMOUS.	

IGNEOUS. mentative. To this Etymology it may be objected that it supposes the opinions of Philosophers respecting the element of fire to have been adopted before the vulgar name was affixed to it.

Fiery; of or pertaining to *fire*; having the qualities or powers of *fire*.

Though it be not quite full of body, yet it may contain some of the earth's magnetical steams, or of those *igneous* corpuscles that flow from the sun, or both of them.

Boyle. *Works*, vol. i. p. 223. *An. Examen of Mr. Hobbes*, ch. vi.

The *ignified* part of matter was formed into the body of the sun.
Stukely. *Palæogr. Sacra*, p. 20.

Yē heate with a long set of faire and warme weather had even *ignited* the aire and prepar'd the materials to conceive the fire, which devour'd after an incredible manner houses, furniture, and every-thing.
Evelyn. *Memoirs*, vol. i. p. 392. (1666.)

Now to contract this direction, there needs not a total *ignition*, nor is it necessary the iron should be red hot all over.

Sir Thomas Brown. *Vulgar Errours*, book ii. ch. ii.

Now such bodies as strike fire have sulphureous or *ignitable* parts within them, and those strike best, which abound most in them.

Id. *Ib.* book ii. ch. i.

To instance in the very worst of all the things named, *viz.* the volcano's and *ignivomous* mountains; they are some of the most terrible shocks of the globe, and dreadful scourges of the sinful inhabitants thereof, and may serve them as emblems, and presages of Hell itself.
Derham. *Physico-Theology*, book iii. ch. iii.

It drives, *ignipotent*, through every vein,
Hangs on the heart, and burns around the brain.

Savage. *On the Recovery of a Lady from the Small Pox*.

Whether thinking beings were of an ethereal or *igneous* nature, whether material or immaterial, was variously disputed; but that thinking is an operation of some kind of being or other, was always taken for granted, as a principle that could not possibly admit of doubt.

Reid. *Of the Human Mind*, ch. ii. sec. 6.

————— Parching thirst, anon
Drinks up the vital maze, as Simois dry,
Or Xanthus, by the arm *ignipotent*,
With a red torrent of involving flames
Exhausted. Thompson. *Sickness*, book i.

IGNO'BLE, } Fr. *ignoble*; It. *ignobile*; Lat.
IGNO'BLY, } *ignobilis*, from *in*, privative, and *no-*
IGNOBI'LITY. } *bilis*, from *notum*, known. See EN-
NOBLE.

Without renown; unknown, unnoticed, mean, worthless, base.

To locke up the gates of true knowledge from them that affectuously seeketh it to the glory of God, is a property belongynge only to the hypocrytysh Pharisees and false lawyers. A more signe of *ignobylytie* can not be sene then to hyde such noble monuments.

Bale, in *Leland's Newe Year's Gift*.

Ignoble French, your fainting cow'rdice craves
The dreadful curse of your own mother earth,
Hard'ning her breast, not to allow you graves,
Be she so much ashamed of your birth.

Drayton. *The Battle of Agincourt*.

York then, which had the regency in France,
They force the king *ignobly* to displace,
Thereto the Duke of Somerset t' advance,
Their friend, and one of the Lancastrian race.

Id. *The Miseries of Queen Margaret*.

The rich grow suppliant, and the poor grow proud:
Those offer mighty gain, and these ask more.
So void of pity is th' *ignoble* croud,
When others' ruin may increase their store.

Dryden. *Annus Mirabilis*, st. 250.

Yet now *ignobly*, you withhold your hands,
When nearer liberty your aid demands.

Rowe. *Lucan*, book ix.

The man we celebrate must find a tomb
And we that worship him *ignoble* graves.

Cowper. *The Task*, book iii.

I'GNOMINY, } Fr. *ignominie*; It. and Sp. *ig-* IGNOMI
IGNOMI'NIOUS, } *nominia*; Lat. *ignominia*; from NY.
IGNOMI'NIOUSLY, } *in*, privative, and *nomen*, *quia hâc* —
I'GNOMY. } *nomen amittitur*, Voss. *Nomen* is IGNORA-
MUS.

a word common to the Northern as well as to the Greek and Latin languages: Goth. *namo*; A. S. *nama*; Sw. *naum*; Gr. *ὄνομα*; Lat. *nomen*; It. *nome*; Sp. *nombre*; Fr. *nom*.

Loss or want of *name*, of good *name*; infamy, disgrace or dishonour.

That he might thereby, what lay in him, more deeply disgrace our innocent nation among the Germans, and Danes, and other neighbour countries, with shamefull and euerlasting *ignominie*.

Hakluyt. *Voyages*, &c. vol. i. fol. 553. *The True State of Iceland*.

Thus now may ye see how Christes fleshe, which he called bread, is the spirituall foode & meate of our soules. Whē our soules by fayth see God the father not to haue spared his onely so deare beloued sonne, but to haue deliuered him to suffer that *ignominious* & so paynefull death, to restore vs to lyfe.

Tyndall. *Workes*, fol. 459. *An Exposition of the sixth Chapter of John*.

But let vs loke for that greater rewarde of euerlastyng lyfe whiche shall then chaunce, when after the ende of this worlde, in the whiche the membres of Christ be vexed with many afflictions and *ignomies*, God the father shall open his glorie and magnificence, in them that be his true worshypers.

Udall. *Titus*, ch. ii.

And thou the Queen of Isles, Great Britain; why do ye
Your grandsire's godlike name with a neglectful ear
In so reproachful terms and *ignominy* hear,
By every one of late contemptuously disgrac'd.

Drayton. *Poly-olbion*, song 10.

Thus doth soft pleasure but abuse the minde,
And making one to servile thoughts descend,
Doth make the body weake, the judgement blinde,
An hateful life, an *ignominious* end.

Stirling. *A Paranesis. To Prince Henry, Son of James I.*

Who [the king] never call'd a parliament, but to supply his necessities; and having supplied those, as suddenly and *ignominiously* dissolv'd it, without redressing any one grievance of the people.

Milton. *Works*, vol. i. p. 365. *Answer to Eikon Basilike*.

TROY. Hence broker, lackie, *ignomy* and shame
Pursue thy life, and liue aye with thy name.

Shakspeare. *Troilus and Cressida*, fol. 105.

It brands a man with a lasting, indelible character of *ignominy* and reproach, and that, indeed, so foul and odious, that those usurping hec-tors, who pretend to honour without religion, think the charge of a lye a blot upon them not to be washed out but by the blood of him that gives it.

South. *Sermons*, vol. i. p. 527.

How much more respectable was Fabius Maximus in that caution which broke the power of Hannibal, than Pompey in that ostentatious confidence which preceded and partly occasioned his *ignominious* overthrow at Pharsalia.

Beattie. *Moral Science*, part i. ch. ii. sec. 5.

Rowe is chiefly to be considered as a tragic writer and a translator. In his attempt at comedy he failed so *ignominiously*, that his *Biter* is not inserted in his works.

Johnson. *The Life of Rowe*.

IGNORAMUS. See the Quotation from Blackstone.
The word is applied to "one who knows nothing."

————— Give blockheads beere,
And silly *ignoramus*, such as think
There's powder-treason in all Spanish drink.

F. Beaumont. *The Vertue of Sack*.

Let *ignoramus* juries find no traitors:
And *ignoramus* poets scribble satires.

Dryden. *Prologue to the Duke of Guise*.

It was thought observable that at the same time three sovereign princes should have made profession of philosophy, Choroës in Persia, the unfortunate Theodohatus in Italy, and he (Justinian) of whom we are speaking at Constantinople: which shows how much he is wronged by those who would make him such an *ignoramus*.

Jortin. *Remarks on Ecclesiastical History, Anno 527*. vol. iii. p. 150.

When the Grand Jury have heard the evidence, if they think it a groundless accusation, they used formely to endorse on the back of the bill, "*ignoramus*," or we know nothing of it.

Blackstone. *Commentaries*, book iv. ch. xxiii.

IGNORAMUS, in old Law proceedings, intimated that

IGNORANT. though the facts might possibly be true, that truth did not appear to the Grand Jury: but now they assert in English more absolutely, "not a true Bill," or (which is the better way) "not found;" and then the party is discharged without further answer. But a fresh Bill may afterwards be preferred to a subsequent Grand Jury.

IGNORANT, *adj.* } Fr. *ignorance*; It. *ignoranza*; Sp. *ignorancia*; Lat. *ignorantia*; from *ignorare*, and this from *ignarus*; in, privative, and *gnarus*, the old *gnarus*, from *γνῶσις-ειν*, to know.

IGNORANT, *n.* }
IGNORANTLY,
IGNORANCE,
IGNORANCY,
IGNORE.

Not knowing; having no knowledge, unknowing; uninformed, unlearned, untaught, unskilled, or unskilful.

To ignore is a favourite word with Boyle; it is common in Scotch Law, as *ignoramus* was in our own.

Therefore I seie and wnesse this thing in the Lord, that ghe walke not now as Hethene men walken in the vanyte of her witt, that han undirstondyng derkned with derknesses, and ben aliened fro the lyf of God by *ignoraunce* that is in hem for the blindnesse of her herte.

Wiclif. *Effesies*, ch. iv.

And as a wanton lambe full ignorant
How he is pulled and drawen to be bound
Unto the time he hath his deatnes wound.

Chaucer. *The Remedie of Loue*, fol. 324.

But folish *ignoraunce* misleadeth wading wretches by vncouth waies that shulen be forletten, and meketh hem blind fro the right path of true way, that shold been used.

Id. *The second Booke of the Testament of Loue*, fol. 305.

These so high things thou hast kept secrete and hidden from suche as after the world are reputed wise and politike, and hast opened the same to the litell tendre ones, to the inferiour meane sorte, to the *ignorautes*, & to such as after the iudgemēt of the world, haue no great wit nor experience.

Udall. *Luke*, ch. x.

And thys is the cause of the slayer that shal flee thither and be sauēd: if he smyte his neighbour *ignorauntly* and hated hym not in tyme passed.

Bible, Anno 1551. *Deuteronomium*, ch. xix.

So sore haue our false prophets brought y^e people out of their wittes, & haue wrapped the in darcknes, and haue rocked them in blyndnes and *ignorauncy*.

Tyndall. *Workes*, fol. 157. *The Obedience of a Christian Man*.

— Beldame, be not wroth
With silly virgin by aduenture brought
Vnto your dwelling, ignorant and loth,
That craue but roome to rest, while tempest ouerblo'th.

Spenser. *Faerie Queene*, book iii. can. 7.

We cannot know any thing of nature but by an analysis of it to its true initial causes, and till we know the first springs of natural motions, we are still but *ignorants*.

Glanvil. *The Vanity of Dogmatizing*, ch. xxi.

What pretty innocence in that day mov'd!
Man *ignorantly* walk'd by her he lov'd;
Both sigh'd and interchang'd a speaking eye,
Both trembled and were sick, yet knew not why.

Donne. *Letters*. To the Countess of Huntingdon.

And brutish *Ignorance*, yerept of late
Out of drad darknes of the deepe abysme,
Where beeing bred, he light and heauen does hate.

Spenser. *The Teares of the Muses*. (Thalia.)

If there be, at this day, any nations (as navigators inform us there are in Brasil, and some other parts of the Indies) that worship not God, they consist not of Naturalists, but brute and irrational barbarians, who may be supposed rather to ignore the being of God, than deny it.

Boyle. *Works*, vol. ii. p. 56. *The Usefulness of Natural Philosophy*.

Now, as we could not be armed against the tempter's methods, if we ignored them, so could we never safelier nor better learn them, than in his book, who can alone discover the wiles, and fathom the depths of Satan, and trick him through all his windings and (otherwise untraceable) labyrinths.

Id. *Ib.* vol. ii. p. 261. *On the Style of the Holy Scriptures*.

Why is he honour'd with a poet's name,
Who neither knows nor would observe a rule;
And chooseth to be ignorant and proud,
Rather than own his ignorance, and learn?

Roscommon. Horace. *Art of Poetry*.

Thus some, who have the stars survey'd,
Are *ignorantly* led,
To think those glorious lamps were made
To light Tom-fool to bed.

Rowe. *On a fine Woman who had a dull Husband*.

Yet ah! why should they know their fate?
Since sorrow never comes too late,
And happiness too swiftly flies.
Thought would destroy their paradise.
No more; where ignorance is bliss,
'Tis folly to be wise.

Gray. *Ode on a Distant Prospect of Eton College*.

IGUANA, Daud.; Guana, Brown. In Zoology, a genus of animals belonging to the family *Iguanida*, order *Sauria*, class *Reptilia*.

Generic character. Head slightly resembling a cone with four faces, of which the upper is most extended laterally, and covered, as well as the sides, with large scales of a pentagonal or hexagonal form; jaws furnished with numerous narrow, triangular teeth, their cutting edges irregular, two other rows also are found on the back of the palate; tongue fleshy, broad, slightly notched at its tip, and little extensile; under the throat the skin is pendulous like a bag, and pectinated in front; body and tail encircled with numerous rings, each composed of several small squarish scales, over-lapping each other; along the ridge of the back and the tail a row of thin lancet-shaped spines, of which the points incline backwards, the longest are between the shoulders, and diminish towards the tip of the tail; the legs strong, toes five on each foot, deeply cleft, and tipped with strong hooked claws; a row of tubercular follicles on the thighs.

This genus is distinguished from the *Polychri* by its dorsal crest, which they have not; from the *Anolii*, by its wanting the spreading oval membrane beneath the last joint but one of the toes; from the *Dracones* by the different direction of the ribs, which in them run into the membranous expansions forming their wings; from the *Basilisci* in the deficiency of the radiated membrane along the under surface of the tail; and from the *Agamæ* by the different form of the scales, in those reticulated, in these imbricated.

The Guanas are natives of the Torrid Zone, and vegetable feeders; they are not poisonous, but bite hard, and will not quit their hold till they have bitten away the piece they have caught in their teeth.

Five species are enumerated:

I. *Tuberculata*, Laurenti; *Lacerta Iguana*, Lin.; *Iguane Ordinaire*, Daud.; *Guana*, Brown.

I. *Cornuta*, Daud.; *Iguane Cornu*, Lacep.; *Horned Guana*.

I. *Fasciata*, Cuv.; *Iguane à Bandes des Indes Orientales*, Brongr.; *Banded Guana*.

I. *Cerulea*, Daud.; *Azure Guana*.

I. *Delicatissima*, Laur.; *Iguane à Col Nu*, Cuv.; *Naked-necked Guana*.

See Daudin, *Histoire Naturelle des Reptiles*; Laurenti, *Synopsis Reptilium*.

JIB, for the usage of the word see the Example.

I think these vessels are navigated either end foremost, and that, in changing tacks, they have only occasion to shift or jib round the sail.

Cook. *Voyages*, vol. vi. book ii. ch. iii.

JIB is the foremost sail of a ship, being a large stay-

IGNO-
RANT.
—
JIB.

JIB.
—
JIG.

sail, extended from the outer end of the bowsprit, prolonged by the Jib-boom towards the fore-top mast-head. In cutters and sloops the Jib is on the bowsprit, and extended on the lower mast head. The Jib is a sail of great command with any side wind, but especially when the ship is close hauled, or has the wind upon her beam, and its effect in *casting* the ship, or turning her head to leeward is very powerful, especially when she is working through a narrow channel.

The Jib-boom is a continuation of the bowsprit forward, run out from its extremity like a top-mast from a lower mast. It may be drawn in as occasion requires, to prevent its being broken when in harbour, to which otherwise it would be much exposed. Falconer, *Marine Dict.*

JIB-CRACK, perhaps, *Gim-crack*, *q. v.*

But to be made a whim-wham,
A *jib-crack*, and a gentleman o' the first house
For all my kindness to her.
Beaumont and Fletcher. The Tamer Tamed.

JIBE, also written *Gibe*, *q. v.*

For he [Tarquinius] would not suffer his wife's father (unkind onne in law he) to be interred: saying eftsoons in *jibing* manner, that Romulus also died, and was never buried.

Holland. Livius, fol. 34.

Where he all hopeless, lost, undone,
Sees cheerless days that know no sun;
Where *jibing* Scorn her throne maintains,
Midst mildews, blights, and blasts, and rains.
Lloyd. The Temple of Favour.

JIBLET, *i. e. Gible*, *q. v.*

Oh that's well: come, I'll help you:
Have you no *jiblets* now?
Beaumont and Fletcher. Love's Pilgrimage, act i. sc. 1.

JIG, *v.* } See GIG, (conjectured to be from
JIG, *n.* } the A. S. *gag-gan*, to go.) *Jig* in Ben
JIGGET, *v.* } Jonson, applied to a piece of low
JIGGISH, } humour, a farce. *Jigging* fools, in
JIGMAKER, } Shakspeare, silly poets,—*jig* denoting
JIGGUMBOB. } a metrical composition as well as a

dance.

Jiggumbob, another name (says Butler) for trinkets, or jimcracks.

And see DANCING, p. 548.

The trembling fowl that hear the *jigging* hawk-bells ring,
And find it is too late, to trust them on their wing,
Lie flat upon the flood.
Drayton. Poly-olbion, song 20.

What should the warres do with these *jigging* fools?
Shakspeare. Julius Caesar, fol. 125.

But as fiddlers, still,
Though they be paid to be gone, yet needs will
Thrust one more *jig* upon you: so did he
With his long complemental thanks vex me.
Donne. Satire 4.

A *jigge* shall be clapt at, and every rhyme
Prais'd and applauded by a clam'rous chyme.
F. Beaumont. Prologue to the Faire Maide of the Inne.

She is never sad, and yet not *jiggish*; her conscience is cleare from guilt, and that secures her from sorrow.

Habington. Castara, part i.

HAM. Oh God, your onely *jigge-maker*: what should a man do, but be merrie.
Shakspeare. Hamlet, fol. 267.

LUC. My husband?
My dearest Angelo?

NOR. More *jiggam-bobs*: is not this the fellow that swom Like a duck to th' shore in our sea-service.
Beaumont and Fletcher. The Knight of Malta, act iv. sc. 1.

And now the chapel's silver bell you hear,
That summons you to all the pride of prayer:

Light quirks of music, broken and uneven,
Make the soul dance upon a *jig* to Heaven.
Pope. Moral Essays, epist. 4.

JIG.
—
JINGLE.

The coquet therefore I must distinguish by the musical instrument which is commonly known by the name of a kitt, that is more *jiggish* than the fiddle itself, and never sounds but to a dance.

Tatler, No. 157.

She's a little blackish woman, has a languishing eye, a delicious soft hand, and two pretty *jiggeting* feet.

Female Tatler, No. 15.

He, who had so lately sack'd
The enemy, had done the fact,
Had rifled all his pokes and fobs
Of gimcracks, whims and *jiggumbobs*.
Butler. Hudibras, part iii. can. 1.

She *jigg'd*, and playing on the lute
Spread raptures o'er the soul of Bute.
Churchill. The Ghost, book iv.

JIG-A-GOG, from *jog*, *q. d. jog jog*, or *cheek a jog*.
Cheek by jowl is sometimes written *jig by jowl*.

An some writer (that I know) had had but the penning o' this matter, he would ha' made you such a *jig-ajogge* i' the boothies, you should ha' thought an earthquake had beene i' the fayre.

Ben Jonson. Bartholomew Fayre. The Induction, sig. A. 5.

JILL. See GILL. Supposed by Ray to be a nickname for *Julia* or *Juliana*.

Do ye snarle you black *jill*? she looks like the picture of America
Beaumont and Fletcher. The Knight of Malta, act v. sc. 1.

JILT, *v.* } Lye derives from the Is. *gilia*, amo-
JILT, *n.* } ribus *circumrenire*; which in Sw. is
JILT-FLIRT. } *gylla*, to deceive, and in English *guile*,
or *wile*, *q. v.* } *Jilt* is, probably, *guilt*, (*g* pronounced soft.) Applied to

A woman who *beguiles*, or by her *wiles* allures, a man to love her; and then again *beguiles* or deceives him.

Our fortunes indeed, weighed in the nice scale of interest, are not exactly equal; which by the way was the true cause of my *jilting* him.
Spectator, No. 301. col. 1.

Nor ask I vengeance on the perjured *jilt*,
'Tis punishment enough to have her guilt.
Walsh. Elegy. The Petition.

It is certain, that we are infested with a parcel of *jiltflirts*, who are not capable of being mothers of brave men, for the infant partakes of the temper and disposition of its mother.
Guardian, No. 26.

Why in sorrow my friend, who were always so gay?
Have you had any cross, any losses at play?
Whence arises this gloom, this uncommon dejection?
Are you *jilted* in love?

Cambridge. A Dialogue.

JINGLE, *v.* } As often written *gingle*, *q. v.* The
JINGLE, *n.* } noun is applied to
JINGLING, *n.* } The noise of small pieces of metal shaken together, of thin metal struck; met. to an affectation of musical sound. To *jingle*,
To make or cause such or similar sound, or affectation of sound.

If you plant, where savages are, doe not only entertaine them with trifles, and *gingles*, but use them gently, and graciously, but with sufficient guard nevertheless.

Bacon. Essay 23. Of Plantations.

The *jingling* of his gives
Might call fell things to listen, who have in them
A sence to know a man unarm'd, and can
Smell where resistance is.
Beaumont and Fletcher. The Two Noble Kinsmen, act iii. sc. 1.

You ne'er with *jingling* words deceive the ear,
And yet, on humble subjects, great appear.
Smith. To the Memory of Mr. John Philips.

JINGLE. Every pert young fellow that has a moving fancy, and the least jingle of verse in his head, sets up for a writer of songs, and resolves to immortalize his bottle or his mistress. *Guardian*, No. 16.

My very dreams were rural; rural too
The first-born efforts of my youthful Muse,
Sportive and jingling her poetic bells,
Ere yet her ear was mistress of their pow'rs.
Cowper. The Task, book iv.

I can by no means join in the invectives which some have poured out against it, [rhyme,] as if it were a mere barbarous jingling of sounds, fit only for children, and owing to nothing but the corruption of taste in the Monkish Ages.

Blair. Lecture 38. vol. iii. p. 111.

JIVES, also written GIVES, *q. v.*

CEL. So now my jives are off.
Beaumont and Fletcher. The Humorous Lieutenant, act iv. sc. 8.

ILCHESTER, or IVELCHESTER, a Borough and Market Town in the County of Somerset, the *Cairpensavelcoit* (Nennius, *Hist. Brit.* p. 144.) of the Britons, the *Ischalis* of Ptolemy, (ii. 3. 1.) and the *Gifelcestre* of the Saxons. It stands on the Southern bank of the river Yeo, or Ivel, which appears to have entered into all of the above names. Under the Romans it was a station of great importance, fortified by a strong square wall and wet ditch; the latter forms the road now called Yard Lane, and many vestiges of the wall are occasionally discovered. The Foss-way, which crossed the island from Devonshire to Lincolnshire, passed through this station, and its line may be still traced in one of the principal streets. Stukeley's measurement of the station is 300 paces by 200. At the time of the Conquest, Ilchester appears to have been a place of considerable note. It first returned Members to Parliament in the year 1297. This privilege was suspended from 1359 to 1471, and again restored by James I. in 1621; since that time it has returned two Members, and in some instances after very severe contests.

The Ivel is not navigable; it is now crossed by a stone bridge of two arches; in the time of Leland by one of seven arches. (*Itin.* ii. 90.) But little trade is carried on in the town, the thread-lace manufactory, which once flourished, having lately declined. Conjointly with Wells, Taunton, and Bridgewater, it forms the seat of County business, though the Assizes, by a patent of Edward III., were once exclusively held in Ilchester, and it still is the site of the County Gaol. Of its four Churches, which Leland describes as existing *hominum memoria*, (and others state six,) only one remains, that of St. Mary, a mean structure, with an octagonal tower. It belonged to a house of Grey Friars, founded before 11 Edward I. The Living is a Rectory, in the patronage of the Bishop of Bath and Wells. The four streets, of which the town chiefly consists, are by no means well built; and its only antiquities, besides the Roman station, are Whitehall, or Blaunchsall, (which was founded about 1226, by William Dennis or Dacus, an Hospital dedicated to the Holy Trinity, for the reception of poor pilgrims and travellers,) and a Monastery of Black Friars. Distant from London 122 miles West South-West, from Exeter 43 North North-East. Population, in 1821, 745. Ilchester gave birth, in 1214, to Roger Bacon, a name to which sufficient honour has never yet been paid.

Collinson's Hist. of Somerset, 111. 297.

ILE. See AISLE. From the Lat. *ala*, a wing. Applied to

The wings or sides of churches.
VOL. XXIII.

It is divided into seventeen *iles*, or naves, (each about twenty feet wide) by rows of columns of various marbles.

Swinburn. Letter 35. Spain.

ILE, } Lat. *ilia*, *ilios*; Gr. *εἰλεὸς*, from *εἰλεῖν*,
I'LIACK, } *volvere*, *circumvolvere*. Applied to the
I'LIACAL. } intestines from their *circumvolutions* or
involutions.

The *iliack* passion, a disease in the intestines.

Next to the bag of the stomacke, men and sheepe have the small guts called *lactes*, through which the meat passeth: in others it is named *ile*.
Holland. Plinie, vol. i. fol. 342.

Praxagoras is of judgment, that radishes should be given for to eat, unto them that are troubled with the *iliack* passion, to wit, the paine and wringing of the small guts. *Id. Ib.* vol. ii. fol. 39.

Two arteries likewise arise from the *ilical* branches, by which the infant receiveth the purer portion of blood and spirits from the mother.
Sir Thomas Brown. Vulgar Errours, book v. ch. v.

Here, seiz'd with *iliac* passion, mouthing Leech,
Too low alas! for Satire's whip to reach,
From his black entrails, Faction's common sewer,
Disgorges all her excremental store.

Falconer. The Demagogue.

ILEX, in *Botany*, a genus of the class *Tetrandria*, order *Tetragynia*, natural order *Rhamni*. Generic character: calyx four-toothed, corolla rotate; style none; berry four-seeded.

More than thirty species have been described, mostly natives of the Northern hemisphere. *I. aquifolium*, the common Holly, is indigenous, not only in England but also in Japan and Virginia. There are several varieties; the most remarkable are the various-leaved, and the hedge-hog.

ILL.

ILL, *n.* } Junius and Skinner think may be con-
ILL, *adj.* } tracted from *evil*, *q. v.* Tooke is of
ILL, *adv.* } opinion that *idle* becomes *ill* by sliding
I'LLNESS. } over the *d* in pronunciation. See IDLE,
and AIL. Shakspeare, "*Idle* weeds are fast in growth."
Ray, *Sc. Proverbs*, "*Ill* weeds waxes weil."

Ailing, unhealthy, or unsound, diseased, disordered,
sick: then applied more strongly, as evil, bad, pernicious,
injurious; unholy, depraved, wicked; causing
pain, or wretchedness, or misery.

Warner used *ild* as an adjective or past participle.

þat castelle was fulle strong, & ille for to wyne
þe Sarazins kept it long, þei wer inow þer in.
R. Brunne, p. 181.

God bring þam wele ageyn, & saue þam fro ille.
Id. p. 285.

þe dede þat I did ille, my foly it was,
I praye þe with gode wille, forgyue me þat trespas.
Id. p. 163.

Ill haile, Alein, by God thou is a fonne.
Chaucer. *The Reves Tale*, v. 4087.

How pleasaunt and deare vnto euey body is a virgin: howe
reuerent a thing, euen vnto them that bee ill and vicious themselues.
Vives. *Instruction of a Christian Woman*, sig. D. 8.

By day she sits to mark on the house top,
Or turrets hye, and the great towns afraies,
As mindeful of ill.

Surrey. *Eneis*, book iv.

This acte was of all the Spaniards much disliked and very ill
taken, so that they carried the Spaniard prisoner into Lisbon.
Hakluyt. *Voyage*, &c. vol. ii. part ii. fol. 182. *Spanish Barbaritie*.

She that is chaste is fair, well fauoured, rich, fruitfull, noble, and
all best things that can be named: and contrary, she that is vnchaste,
is a sea and treasure of all *illesse*.
Vives. *Instruction of a Christian Woman*, sig. H. 2.

I haue left to hir, the gardeins of Vulcan, whiche I caused to
make for her recreation. And if thou take it from hir, thou shewest
thyne *yllesse*.
Golden Boke, sig. X. 8.

My state and sex, not hand or heart,
Most valiant friends, with-hild
Me, wretched cause of your repaire,
By wicked Romans *ild*.

Warner. *Albion's England*, book iii. ch. xvi

Nought wants but time and place, which shortly shee
Deuized hath, and to her louer told.
It pleased well. So well they both agree;
So ready ripe to ill, ill women's counsels bee.
Spenser. *Faerie Queene*, book iii. can. 10.

The image answered him: I am thy ill angell, Brutus, and thou
shalt see me by the city of Philippes.
Sir Thomas North. *Plutarch*, fol. 616. *Alexander and Cæsar*.

Nath'lesse, th' euchaunter would not spare his paine,
In hope to win occasion to his will;
Which when he long awaited had in vaine,
He chang'd his mind from one to other ill.
Spenser. *Faerie Queene*, book ii. can. 1.

Ill seemes, said he, if he so valiant be,
That he should be so sterne to stranger wight:
For seldome yet did liuing creature see,
That curtesie and manhood euer disagree.
Id. *Ib.* book vi. can. 4.

Thou would'st be great,
Are not without ambition, but without
The *illesse* should attend it.
Shakspeare. *Macbeth*, fol. 134.

ILL.

The fear of God is freedom, joy, and peace,
And makes all *ills* that vex us here to cease:
Though the word fear some men may ill endure,
'Tis such a fear as only makes secure.
Waller. *Of the Fear of God*, can. i.

Observe the language well in all you write,
And swerve not from it in your loftiest flight,
The smoothest verse and the exactest sense
Displease us, if ill English give offence.
Dryden. *Art of Poetry*, can. 1.

What makes all physical or moral ill?
There deviates Nature, and here wanders will.
God sends not ill; if rightly understood,
Or partial ill is universal good.
Or change admits, or Nature lets it fall,
Short, and but rare, till Man improv'd it all.
Pope. *Essay on Man*. Epistle 4.

While his [the Prince of Orange] *illness* lasted and the event was
doubtful, all was in suspence, and none of the parties engaged seemed
to have other notions or sentiments than what were raised by the
hopes or fears of so important a life.
Sir William Temple. *Works*, vol. ii. p. 309. *Memoirs*, from 1672 to
1679.

It seems the part of wisdom, and no sin
Against the law of love, to measure lots
With less distinguish'd than ourselves; that thus
We may with patience bear our mod'rate *ills*.
Cowper. *The Task*, book iv.

A tatter'd apron hides,
Worn as a cloak, and hardly hides, a gown
More tattered still; and doth but ill conceal
A bosom heav'd with never-ceasing sighs.
Id. *Ib.* book i.

Alas! I only wish for health again,
Because I think my lover shares my pain:
For what would health avail to wretched me,
If you could, unconcern'd, my *illness* see?
Littleton. *Sulpicia to Cerinthus in her Sickness*.

ILL is much used in Composition, both as noun and
adverb: with the present participle frequently as a
noun. *Ill-divining*; divining ill or evil. *Ill-breeding*;
breeding ill or evil. *Ill* is never used with the adverbial
termination *ly*, probably on account of the difficulty
of pronouncing it. It is (as many other words have
been shown to be) conjoined to the word following by
an hyphen, serving the full purpose of an adverbial ter-
mination. See the Quotation from Tooke in *v.*
Hyphen.

We lost not any one, nor had one *ill-disposed* to my knowledge, nor
found any calentura, or other of those pestilent diseases which dwell
in all hot regions, and so neere the equinoctiall line.
Hakluyt. *Voyage*, &c. vol. iii. fol. 660. Sir Walter Raiegh.

I could here name many of our country buildings both large and
wide, neither *ilfaoured* in shewe, nor base in regard to their work-
manship, and costly firmnesse or strength.
Id. *Ib.* vol. i. fol. 577. *The True State of Iceland*.

The whiche counsell although in suche a case it be not worthy to
be reprocured: yet it fel out *ilfaouredly*.
Arthur Goldyng. *Cæsar*. *Commentaries*, p. 129.

Little of stature, *ill-featured* of limmes, croke-backed.
Sir Thomas More. *Workes*, fol. 37. Kynge Rycharde III.
Flee then *yl-suading* pleasures, baits untrue,
And noble vertues faire renown pursue.
Vncertaine Auctors. Musonius. *The Philosopher's Saying*.

ILL.

Wherefore the said spirite was *ilwylling* and loth to leaue his olde habitacion.
Udall. Luke. ch. viii.

Unhappy pen, and *ill-accepted* lines
 That intimate in vain my chaste desire.

Daniel. Sonnet 56.

How fond and idle then
 Will seeme the misteries of men!
 How like some dull *ill-acted* part
 The subtillest of humane art!

Habington. Castara, part iii.

And let the day be time enough to mourn
 The shipwreck of my *ill-adventur'd* youth.

Daniel. Sonnet 51.

Then why doost not, thou *ill-advised* man,
 Make meanes to winne thy liberty forlorne.

Spenser. Faerie Queene, book v. can. 5.

An *ill-affected* limbe (what er'e it aile)
 We cut not off, till all cures else doe faile.

Jonson. The Vnder-wood. An Elegie.

For ill it were to hearken to her cry;

For she is inly nothing *ill-appayd*,

But onely womanish fine forgery,

Your stubborne heart t' affect with fraile infirmity.

Spenser. Faerie Queene, book ii. can. 12.

But he was foull, *ill-fauoured*, and grim,

Vnder his eye-brows looking still ascaunce.

Id. Ib. book iii. can. 12.

The rebels mayntayned the fight for a small time, and for their persons showed no want of courage, but beeing *ill-armed*, and *ill-led*, and without horse or artillerie, they were with no great difficultie cut in pieces, and put to flight.

Bacon. King Henry VII. fol. 171.

With me it fares now, as with him whose outward garment hath bin injur'd and *ill-bedighted*; for having no other shift, what help but to turn the inside outwards, especially if the lining be of the same, or, as it is sometimes, much better.

Milton. Works, vol. i. fol. 110. An Apology for Smectymnus.

GLO. To say the truth, this fact was infamous,

And *ill-beseeming* any common man;

Much more a knight, a captain and a leader.

Shakespeare. Henry VI. First Part, fol. 110.

Whom, when I heard to been so *ill-bested*
 (Weake wretch) I wrapt myselfe in palmer's weed,
 And cast to seek him forth through danger and great dreed.

Spenser. Faerie Queene, book ii. can. 1.

My brother (I thinke, he holds you well and in dearness of heart)
 hath holpe to effect your ensuing marriage: surely sute *ill-spent*,
 and labour *ill-bestow'd*.

Shakespeare. Much adoe about Nothing, fol. 111.

My greatness threaten'd by *ill-boding* eyes,

My actions strangely censured of all,

Yet in my way, my giddiness not sees

The pit wherin I likely was to fall.

Drayton. The Legend of Thomas Cromwell.

QU. 'Twere good she were spoken with,
 For she may strew dangerous coniectures
 In *ill-breeding* minds.

Shakespeare. Hamlet, fol. 273.

They that from the beginning were crept in favour and friendship with this young *ill-brought-up* tyrant, by flattering of him, and feeding of him with vain pleasures, studied for no other thing, but to entertain him in love-matters, and other vain exercises.

Sir Thomas North. Plutarch, fol. 800. Dion.

— The things we deem

And hold in our *ill-cast* accounts, to be

Of highest value, and of best esteem.

Daniel. To the Lady Lucy, Countess of Bedford.

And thou unfaithfull *ill-compacted* pine,
 That in her nuptials didst refuse to shine,
 Blaze in her pile.

Cartwright. To the Memory of a Shipwrackt Virgin.

MAL. With this, there grows

In my most *ill-compos'd* affection, such

A stanchlesse auarice, that were I king,

I should cut off the nobles for their lands.

Shakespeare. Macbeth, fol. 146.

ILL.

For now they saw 'twas malice in the king,
 (Transported in his *ill-conceited* thought)
 That made him so to prosecute the thing
 Against all law, and in a course so naught.

Daniel. History of Civil Wars, book i.

A just warre is a thousand times more happy than an *ill-conditioned* peace.

Hall. Works, vol. i. fol. 6. Meditations and Vows, cent. i.

They pay most deerely for their speech, the lightest matter of all others (as Plato saith) in that they suffer this heavy and grievous punishment, to be held and reputed for malicious enemies, cursed speakers, and *ill-conditioned* persons.

Holland. Plutarch, fol. 101.

CLA. You cittern-head, who have you talk'd to ha?

You nasty, stincking, and *ill-countenanc'd* cur.

Beaumont and Fletcher. The Martial Maid, act ii. sc. 2.

By cursed hap his body being weak with sickness, and weary with the long journey he had made that day, he found himself very heavy and *ill-disposed*.

Sir Thomas North. Plutarch, fol. 314. Philopœmen.

It was the ignorance, and *ill-disposednesse*, of some cavillers, that taxed this course, as prejudiciall to preachings; since in truth, the most vsefull of all preaching is catecheticall.

Hall. Works, vol. ii. part ii. sig. A. a. a. 3. Epistle Dedicatorie to the Old Religion.

The *ill-disposing* only doth us set

In disarray, and out of order quite.

Daniel. Musophilus.

JULIET. O God, I haue an *ill-deuining* soule,
 Methinks I see thee now, thou art so lowe,
 As one dead in the bottome of a tombe.
 Either my eye-sight failes, or thou look'st pale.

Shakespeare. Romeo and Juliet, fol. 69.

— What we chang'd,
 Was innocence, for innocence: we knew not
 The doctrine of *ill-doing*, nor dream'd
 That any did.

Id. Winter's Tale, fol. 278.

QU. This way the king will come: this is the way
 To Julius Cæsar's *ill-erected* tower.

Id. Richard II. fol. 41.

— And then the king
 (Euryclea calling) bad her quickly bring
 All *ill-expelling* brimstone, and some fire,
 That with perfumes cast, he might make entire
 The house's first integrity in all.

Chapman. Homer. Odyssey, book xxii. fol. 346.

Euen all the nation of vnfortunate
 And fatall birds about them flocked were,
 Such as by nature, men abhorre and hate,
 The *ill-fac't* owle, death's dreadfull messengere.

Spenser. Faerie Queene, book ii. can. 12.

He had not passed farre vpon the strand
 When as two old *ill-fauer'd* hags he met,
 By the way side beeing together set,
 Two griesly creatures.

Id. Ib. book v. can. 12.

The north winds also where they blow, do cause apples to shrinke and rivill *ilfavouredly*.

Holland. Plinie, vol. i. fol. 440.

For all use, in all things if it be not stayed by cunning, will very easely bring a man to do that thing, whatsoever he goeth about, with much *ilfavourednesse* and deformitye.

Ascham. Works, fol. 118. Toxophilus.

Happie, but for so happie *ill-secur'd*
 Long to continue, and this high seat your heav'n
Ill-fenc't for heav'n to keep out such a foe
 As now is enter'd.

Milton. Paradise Lost, book iv. l. 372.

In slavish habit, *ill-fitted* weeds
 O'er-worn and soil'd;
 Or do my eyes misrepresent?

Id. Samson Agonistes, l. 122.

ILL.

O visions *ill-foreseen* ! better had I
Liv'd ignorant of future, so had borne
My part of evill onely, each day's lot
Enough to bear.

Milton. *Paradise Lost*, book xi. l. 763.

CHOR. Thy hopes are not *ill-founded* nor seem vain
Of this delivery, and joy thereon
Conceiv'd, agreeable to a father's love.

Id. *Samson Agonistes*, l. 1504.

Reclaiming them who are *ill-given* and about to practice mis-
chiefe, confirming and encouraging those who be well minded.

Holland. *Plutarch*, fol. 329.

Perhaps to your fond sons, your *ill-got* goods you leave,
You scarcely buried are, but they your hopes deceive.

Drayton. *Poly-olbion*, song 21.

If Petrarch's unarm'd bosom catch a wound
From a light glance, must Laura be renown'd?
Or both a glory gain,
He from *ill-govern'd* love, she from disdain.

Carew. *A Divine Love*.

I fear the dread events that dog them both,
Lest some *ill-greeting* touch attempt the person
Of our unowned sister.

Milton. *Comus*, l. 406.

This open'd wide the public way, whereby
Ruin rush'd in upon the troubled land,
Under whose weight it happen'd long to lie,
Quite overthrown with their *ill-guiding* hand.

Drayton. *The Miseries of Queen Margaret*.

As for other prisoners of the Athenians, the most of them died of
sickness, and of *ill-handling* in the prison.

Sir Thomas North. *Plutarch*, fol. 465. Nicias.

Amidst the bridale feast, whilst every man
Surcharg'd with wine, were heedlesse and *ill-headed*,
All bent to mirth before the bride was bedded,
Brought in that maske of loue which late was shoven.

Spenser. *Faerie Queene*, book iv. can. 1.

JAQ. O knowledge *ill-inhabited*, worse than Joue in a thatch'd
house.

Shakspeare. *As You Like It*, fol. 198.

Corrupted faith had bred
An *ill-inur'd* obedience for command,
And languishing luxuriousness had spread
Wayward unaptness over all the land.

Daniel. *History of Civil Wars*, book v.

Out-breaking vengeance uncombines
The *ill-join'd* plots so fairly over-cast;
Turns up those huge pretended heaps of shows,
And all these weak illusions overthrows.

Id. *Ib.* book iii.

Nay, the *ill-judging* world
Is likely enough to give them those characters.

Beaumont and Fletcher. *The Laws of Candy*, act iii. sc. 1.

Some honour I would have,
Not from great deeds, but good alone;
Th' unknown are better than *ill-known*;
Rumour can ope the grave.

Cowley. *A Vote*.

'Tis such another strange *ill-laid* request,
As if a beggar should intreat a king
To leave his scepter and his throne to him,
And take his rags to wander o'er the world,
Hungry and cold.

Beaumont and Fletcher. *A King, and no King*, act ii.

YORK. Well, well, I see the issue of these armes,
I cannot mend it, I must needs confesse,
Because my power is weake, and all *ill-left*.

Shakspeare. *Richard II.* fol. 33.

How too like is this bell to a scandalous and *ill-lived* teacher.

Hall. *Works*, vol. ii. part ii. fol. 140. *Occasional Meditations*. 57.

Yet happy—hapless day, bless'd *ill-lost* breath,
Both for our better fortune, and your own?
For what foul wounds, what spoil, what shameful death,
Had by this forward resolution grown.

Daniel. *History of Civil Wars*, book vi.

Whilst to the times, not to men's wits, pertain
The good successes of *ill-managed* deeds.

Daniel. *Musophilus*.

To whom thus Michael. These are the product
Of those *ill-mated* marriages thou sawst.

Milton. *Paradise Lost*, book xi. l. 584.

But your *ill-meaning* politician lords,
Under pretence of bridal friends and gests,
Appointed to await me thirty spies.

Id. *Samson Agonistes*, l. 1195.

To th' adjoin'd camp, the rest distracted fly;
And *ill-mix'd* wonders tell, and into 't bear
Blind Terroure, deaf Disorder, helpless Fear.

Cowley. *The Davideis*, book iv.

OB. *Ill-met* by moone-light,
Proud Tytania.

Shakspeare. *Midsummer Night's Dream*, fol. 148.

HUM. Nay, Elinor, then must I chide outright:
Presumptuous dame, *ill-natur'd* Elinor,
Art thou not second woman in the realme?

Id. *Henry VI. Second Part*, fol. 122.

Yet we have wits, and some that for wits go,
Some real ones, and some that would be so,
But 'tis *ill-natur'd* wit, and such as still,
To th' subject or the object worketh ill.

Brome. *Epistle to C. C. Esq.*

Then *ill-persuading* want, in martial minds,
And wronged patience (long oppress'd with might)
Looseness in all, (which no religion binds)
Commanding force, (the measure made of right)
Gave fuel to this fire.

Daniel. *History of Civil Wars*, book i.

Sweet beauty, the sad wrack of ruthless seas,
And *ill-plac'd* love, whom cruel destinies
Have food for monsters made and sport for waves.

Sherburn. *Forsaken Lydia*.

Thy *ill-pleas'd* eye from my misdeedes avert.

Sidney. *Psalm* 51.

When he had ceas'd his *ill-resounding* noise,
Another flap-mouth'd mourner, black and grim,
Against the welkin vollied out his voice.

Shakspeare. *Venus and Adonis*.

CLO. Truly thou art damn'd, like an *ill-roasted*
Egge all on one side.

Id. *As You Like It*, fol. 195.

Some o' th' their plants are *ill-rooted* already, the least winde
i' th' world will blow them downe.

Id. *Antony and Cleopatra*, fol. 350.

MENE. Consider this: he ha's bin bred i' th' warres
Since a could draw a sword, and is *ill-school'd*
In boulded language: meale and bran together
He throws without distinction.

Id. *Coriolanus*, fol. 17.

A woman mou'd, is like a fountaine troubled,
Muddie, *ill-seeming*, thicke, bereft of beautie,
And while it is so, none so dry or thirstie
Will daigne to sip, or touch one drop of it.

Id. *Taming of the Shrew*, fol. 229.

Th' abundant Latins then old Latium lastly left,
Both of her proper form and elegancy rest;
Before her smoothest tongue, their speech that did prefer
And in her tables fix'd their *ill-shap'd* character.

Drayton. *Poly-olbion*, song 5.

KING. Now lady of honour, where's your honour now?
No man can fit your palat, but the prince.
Thou most *ill-shrowded* rottenness.

Beaumont and Fletcher. *Philaster*, act ii. sc. 1.

The edge of warre, like an *ill-sheathed* knife,
No more shall cut his master.

Shakspeare. *Henry IV. First Part*, fol. 46.

And now how much better for him had it been,
T' endure a wrong with peace, than with such toil
T' obtain a bloody right?—since right is sin,
That is *ill-sought*, and purchased with spoil.

Daniel. *History of Civil Wars*, book v.

ILL.

ILL.

They swear that for religion's sake
We may not massacre, burn, sack;
That the beginning of these pleas,
Sprang from the *ill-spiced* A B C's.

Drummond. The Character of an Anti-covenanter.

Oh, the idle *ill-spent* cares of curious men, that consult with stars
and spirits for their destinies, under colour of prevention!

Hall. Works, vol. i. fol. 85. sec. 25. Heaven upon Earth.

KING. Thus euer did rebellion finde rebuke;

Ill-spirited Worcester, did we not send grace,
Pardon, and tearmes of loue to all of you?

Shakspeare. Henry IV. First Part, fol. 73.

There is no saying shocks me so much as that which I hear very
often, "that a man does not know how to pass his time." It would
have been but *ill-spoken* by Methusalem in the nine hundred sixty-
ninth year of his life.

Cowley. Essay 2. Of Solitude.

Now: how dost thou look now? Oh *ill-starr'd* wench,
Pale as thy smocke: when we shall meete at compt,
This looke of thine will hurle my soul from heauen,
And fiends will snatch at it.

Shakspeare. Othello, fol. 338.

When I consider thee,
The scorne of Time, and sport of Fate,
How can I turne to jollitie
My *ill-strung* harpe, and court the delicate?

Habington. Castara, part iii.

When those accursed messengers of hell,
That feining dreame, and that faire forged spright
Came to their wicked master, and 'gan tell
Their bootelesse paines, and *ill-succeeding* night.

Spenser. Faerie Queene, book i. can. 2.

Good expedition be my friend, and comfort
The gracious queene, part of his theame; but nothing
Of his *ill-ta'ne* suspicion.

Shakspeare. Winter's Tale, fol. 281.

CASSI. Hath Cassius liued

To be but mirth and laughter to his Brutus,
When grieve and blood *ill-temper'd*, vexeth him?

BRU. When I spoke that, I was *ill-temper'd* too.

Id. Julius Cæsar, fol. 125.

PAN. I haue had my labour for my trauell, *ill-thought* on of her,
and *ill-thought* on of you.

Id. Troilus and Cressida, fol. 78.

To wit, some *ill-tongued* varlet and pick thanke carry tale within
the house, or some flattering clawback comming between, and entring
into the house, or else some envious and malicious neighbour in the
city.

Holland. Plutarch, fol. 144.

FRA. Peace lady, pause, or be more temperate,
It ill beseemes this presence to cry ayme
To these *ill-tuned* repetitions.

Shakspeare. King John, fol. 5.

He'd bid, blot all: and to the anvile bring
Those *ill-turn'd* verses, to new hammering.

Johnson. Horace. The Arte of Poetry.

Why should we not think them (the children of a second matrimony)
more holy than the offspring of a former *ill-twisted* wedlock, begotten
only out of a bestial necessity, without any true love or contentment,
or joy to their parents.

Milton. Works, vol. i. fol. 175. The Doctrine and Dis. of Divorce,
ch. vi.

Bring it to that,
The gold I giue thee, will I melt and pour
Downe thy *ill-uttering* throate.

Shakspeare. Anthony and Cleopatra, fol. 348.

Ill-wean'd ambition, how much art thou shrunke?
When that this bodie did containe a spirit,
A kingdome for it was too small a bound:
But now two paces of the vilest earth
Is roome enough.

Id. Henry IV. First Part, fol. 72.

To whom thus Eve with sad demeanour meek.

Ill-worthy I such title should belong

To me transgressour.

Milton. Paradise Lost, book xi. l. 163.

As thou art, once was I, a gamesome boy,
Ill-winter'd now, and aged as you see.

Drayton. Eclogue 2.

That raven on yon left-hand oak
(Curse on his *ill-betiding* croak!)

Bodes me no good.

Gay. Fable 37.

For his manner of negotiating, I am confident you will find him
not *ill-bred*, nor offering to impose his measures, as you call them,
upon us.

Sir William Temple. Works, vol. ii. p. 119. Letter to my Lord
Arlington.

Time, if we use *ill-chosen* stone,
Soon brings a well-built palace down.

Waller. Of English Verse.

The prince, renown'd in bounty as in arms,
With pity saw the *ill-conceal'd* distress;
Quitted his title to Campaspe's charms,
And gave the fair one to the friend's embrace.

Prior. Ode to Mr. Howard.

What gravity can hold from laughing out,
To see him drag his feeble legs about,
Like hounds *ill-coupled*.

Dryden. Absalom and Achitophel.

How have I, Death so *ill-deserv'd* of thee
That now thyself thou should'st revenge on me.

Sprat. The Plague of Athens.

Soon he rears
Erect his towering front, bounds o'er the lawn
With *ill-dissembled* vigour, to amuse
The knowing forester.

Somerville. The Chase.

O! wealth *ill-fated*; which no act of fame
E'er taught to shine, or sanctified from shame.

Pope. Essay on Man, epist. iv.

Ill-grounded passions quickly wear away;
What's built upon esteem can ne'er decay.

Walsh. To his Book.

To find th' *ill-humour'd* pleasure at their need:
Curs'd when you fail, and scorn'd when you succeed.

Rochester. Artemisia to Chloe.

Though he were not naturally modest, he [Settle] should at least
have deferred the showing of his impudence till a fitter season: but
instead of this, he has written before his play the most arrogant,
calumniating, *ill-mannered*, and senseless preface I ever saw.

Dryden. Prose Works, vol. ii. p. 242. Remarks on the Empress of
Morocco.

Atrides' daughter never shall be led
(An *ill-match'd* consort) to Achilles' bed;

Pope. Homer. Iliad, book ix.

A long, long journey, choak'd with brakes and thorns,
Ill-measur'd by ten thousand barley-corns.

Tickell. Kensington Garden.

Ill-nature is such a disposition, as inclines a man to those actions,
that thwart and sour and disturb conversation between man and
man: and accordingly consists, 1st. of a proneness to do ill turns,
attended with a complacency, or secret joy of mind upon sight of any
mischief that befalls another. 2dly. An utter insensibility of any
good or kindness done him by others. Either of these ill qualities,
and much more both of them together, denominate a person *ill-*
natured.

South. Sermons, vol. i. p. 474.

Hell from below, and Juno from above,
And howling nymphs were conscious to their love.
From this *ill-omen'd* hour, in time arose
Debate and death and all succeeding woes.

Dryden. Virgil. Aeneid, book iv.

Methinks, when you expose the scene,
Down the *ill-organ'd* engines fall:
Off fly the vizards, and discover all.

Swift. The Athenian Society.

Know, then, for Phthia fix'd is my return:
Better at home my *ill-paid* pains to mourn,
Than from an equal here sustain the public scorn.

Dryden. Homer. Iliad, book i.

ILL.

ILL.
—
ILLATION.

Which show'd he would in dunghills love to dig;
Loue to cast stinking satires up in *ill-pil'd* rhymes,
And live by the corruptions of the unhappy times.
Otway. Complaint of his Muse.

There a thick grove of aged cypress trees,
Which none, without an awful horror, sees,
Into its wither'd arms, depriv'd of leaves,
Whole flocks of *ill-presaging* birds receives.
Buckinghamshire. Ode on Love.

(As well unhappy Wallace can attest,
Great patriot-hero! *ill-requited* chief!)
Thomson. Autumn.

When thus the grisly spectre spoke again:
Behold the fruit of *ill-rewarded* pain.
Dryden. Theodore and Honoria.

No plague's so great as an *ill-ruling* head,
Yet 'tis a fate which few young ladies dread.
Walsh. An Epistle to a Lady.

ILLAPSE, *v.* } Lat. *illabor, illapsus*, to fall into;
ILLA'PSE, *n.* } to glide into; (from *in*, and *labi*, to
ILLA'PSABLE, } fall or glide.)
ILLA'PSING, *n.* } To fall or glide into; generally,
to pass into.

Indeed they may be morally immutable and *illapsable*; but this is
grace, not nature; a reward of obedience, not a necessary annex of
our beings.

Glanvil. Preexistence of Souls, ch. viii.

The *illapse* of some such active substance or powerful being, *illaps-*
ing into matter and united to it, might form it into that constitution
which it enjoyed.

Hale. Origination of Mankind, sec. iv. ch. iv.

If men will needs suppose a formation of man by the *illapsing* of
souls into prepared matter, because they see this is the method of
formation in the ordinary course of generation now, they must also
suppose the progress of the formation and maturation of the human
nature.

Id. Ib.

So let us mind him [God] as to admit gladly his gentle *illapses*.
Barrow. Sermon. Trinity Sunday, 1663.

ILLA'QUEATE, } Lat. *illaqueare*, to ensnare;
ILLAQUEA'TION. } from *in*, and *laqueus*, a snare;
from *lacere*, to draw.

To ensnare, to entangle; to draw into a snare or
noose.

I am *illaquated*, but not truly captivated into your conclusion.
More. Divine Dialogues.

He also urgeth the word *ἀπὸ γένεσος* in Matthew doth not only
signify suspension or pendulous *illaqueation*, as the common picture
describeth it, but also suffocation, strangulation, or interception of
breath, which may arise from grief, despair, and deep dejection of
spirit. *Sir Thomas Brown. Vulgar Errours, book vii. ch. xi.*

Did our Inns of Court students come a little better grounded in
ethics and with some entrance into the civil law, such an history as
you are meditating would lead them on with delight, and innable
them to discover and penetrate into the grounds of natural justice and
human prudence, and furnish them with matter to adorn their plead-
ings, before they wholly gave themselves up to learn to wrangle and
the arts of *illaqueation*, and not make such haste to precedents, cus-
toms, and common-places.

Evelyn. Memoirs, vol. ii. p. 288. To Archdeacon Nicholson, Nov.
10, 1699.

ILLA'TION, } Lat. *illatum*, brought or borne
I'LLATIVE, *n.* } in or into; from *in*, and *latum*.
I'LLATIVE, *adj.* } (from *tolo, tolatum, tlatum, latum*,
I'LLATIVELY. } Voss. *de Anal.* lib. iii. c. 37.)

For the logical application of the word, see the
Quotation from Locke.

An *illation* and conclusion worthy of my refuter's logicke and
divinity.
Hall. Works, vol. i. p. 703. The Honour of the Married Clergie.

For by the Druid taught, that death but shifts
The vital scene, they that prime fear despis'd;
And prone to rush on steel, disdain'd to spare,
An *ill-sav'd* life that must again return.

Thomson. Liberty.

I propose, therefore, along with the rest, to pull down this whole
ill-contrived scaffolding, which obstructs, rather than forwards, our
public works.

Burke. Works, vol. iii. p. 290. Speech on the Economical Reform.

Like an *ill-judging* beauty, his colours he spread,
And beplaster'd with rouge his own natural red.
Goldsmith. Retaliation.

The very birds and monsters of the wood
Abhor th' *ill-scented* field and noisome food.
Lewis. Statius, book xii.

This [world] for that leads the text in, is both a relative, and an
illative; referring to what he had said in the foregoing words; and
inferring a necessary consequence of the one clause upon the other:
"Purge out the old leaven; for Christ our Passover is sacrificed for
us."
Bishop Hall. Rem. p. 186.

Illation or inference consists in nothing but the perception of the
connection there is between the *ideas* in each step of the deduction,
whereby the mind comes to see either the certain agreement or dis-
agreement of any two *ideas* as in demonstration, in which it arrives
at knowledge; or their probable connection, on which it gives or
withholds its assent, as in opinion.

Locke. On Human Understanding, book iv. ch. xvii. sec. 2.

His subtle demonstrations present me with an *inferred* and *illative*
truth at which we arrived not but by the help of a train of *rationa-*
tions.

Boyle. Works, vol. iv. p. 421. A Discourse of Things above Rea-
son.

From an *illustration* he makes it an *illation*.

Warburton. Works, vol. xi. p. 165. Remarks on Tillard.

Most commonly taken *illatively*.

Bishop Richardson. On the Old Testament, p. 434.

ILLA'UDABLE, } Lat. *illaudabilis*, not to be
ILLA'UDABLY. } praised; from *in*, privative, and
laudabilis; from *laus*, praise: in A. S. *hljos*, from
hljos-an, to celebrate. The old Vocabularies of Cocke-
ram and Bullokar both have the word.

Not worthy of praise.

For strength from truth divided and from just,
Illaudable, naught merits but dispraise
And ignominie.

Milton. Paradise Lost, book vi. l. 382.

Admitting that the Apostle's design here (1 Cor. vi. 7.) is to dis-
countenance this practice, not only as weak and *illaudable*, but also
as sinful and disallowable; yet I affirm, that he accounted it not sin-
ful from the very nature of the action, but only the irregularity of the
circumstance.

South. Sermon 8. vol. x. p. 260.

It is natural for people to form not *illaudably* too favourable a
judgment of their own country.

Broome.

ILLE and VILAINE, a Department of France, in
the North-East of Brittany, touching the English Chan-
nel, but nearly surrounded by the Departments of
Manche, Mayenne, Lower Loire, Morbihan, and Côtes
du Nord. It is watered by the Meu, the Seiche and
the two rivers from which it takes its name. The
country is for the most part level, and the soil poor,
light sand or marshes covering a large portion of the
surface. This Department has likewise a larger share
of forest and of those wild heaths, which are so common
in this quarter of France, than any other part of Brittany.
The agriculture is at the same time very rude, so that

ILLE.
—
ILLECE-
BRUM.

the corn produced in the Department is not sufficient for its consumption. The climate, however, is temperate, the pastures good, and cattle are bred with success: apples and pears grow as abundantly as in Normandy, and the cider and perry made here are excellent, but there are no vineyards. This Department is divided into six arrondissements, viz. Rennes, St. Malo, Fougères, Vitre, Redon, and Montfort. The population, in 1827, was 553,453.

Rennes.

The chief town of the Department is *Rennes*, formerly the Capital of Brittany. It is situated at the confluence of the rivers Ille and Vilaine, the former of which is navigable for sloops as far as the town. The Vilaine flows through the town, and is crossed by three bridges, the handsomest of which (the *Pont Neuf*) connects the upper and lower towns. The upper town, placed on an eminence on the right bank of the Vilaine, is by far the largest as well as handsomest part of Rennes. It has wide and well-paved streets, four or five spacious squares, with the houses large and regularly built and some imposing edifices. The lower town on the left bank of the Vilaine is exposed to inundations. There are eight Churches here besides the Cathedral dedicated to St. Peter, a plain but venerable building. The Arsenal, the Council House, and the Palace, in which the Provincial Parliaments used formerly to assemble, are the most important edifices. The promenades are the *Cours* and the *Tabor*; the former a mile in length, the latter commanding an extensive prospect of the surrounding country. This town is the seat of a *Cour Royale*, a Bishop, and of the General of the XIIIth military division. There is likewise a University or Academy here with two Faculties, Law and Medicine. A Public Library, Museum of Natural History, a Botanic Garden, and a Society of Arts and Sciences, promote the literary culture of the place. A little trade, and some trifling manufactures of sail-cloth, cotton stuffs, and leather, employ a population exceeding 30,000. The country round Rennes is extremely fruitful. 220 miles West of Paris.

St. Malo.

St. Malo, the sea-port town of the Department, is a place of great importance in time of war. It is built on the little Island of Aaron, and is joined to the mainland by a causeway only 54 feet wide, and above three-quarters of a mile in length. The entrance into the town from the causeway is defended by a castle flanked with towers; perpendicular rocks, ramparts and batteries, protect the town on every side. The harbour is large but extremely difficult of access, from the number of sunken rocks which lie in the channel. The spring-tides rise at St. Malo above 50 feet. The trade of the place is not great, but during the late war the harbour was the rendezvous of the privateers which infested the Channel. Population about 10,000. Forty-four miles North North-West of Rennes.

ILLECEBROUS, Lat. *illecebrosus*, *illecebræ*, from *illicere*, to draw to, to attract, to allure; from *in*, and *lacere*, to draw.

Attractive, alluring, enticing.

He [Alexander] had rather see the harpe of Achilles, wherto he sange, not the *illecebrous* dilectatyons of Venus, but the valyant actes and noble affaires of excellent princes.

Sir Thomas Elyot. The Governour, fol. 21.

The study is elegant, and the matter *illecebrous*, that is to saye, swete to the reder. *Id. Ib.* fol. 135.

ILLECEBRUM, in *Botany*, a genus of the class *Pentandria*; order *Monogynia*; natural order *Illece-*

breæ. Generic character: calyx five-leaved, cartilaginous; corolla none; stigma simple; capsule five-valved, one-seeded.

About twenty species, herbaceous plants, natives of the Northern hemisphere. *I. verticillatum*, the Knot-grass, is a native of England.

ILLE'GAL, } Lat. *in*, and *legalis*, from *lex*, *legis*,
ILLE'GALLY, } law. *Lex* (Tooke) is *legs*, the past
ILLEGAL'ITY. } part. *leg*, or *læg*, of the Goth. and
A. S. verb *lagyan*, *lecgan*, *ponere*, any thing laid down, as a rule of conduct.

Against or contrary to law, unlawful.

Whatever else men call punishment or censure, is not properly an evil, so it be not an *illegal* violence, but a saving medicine ordained of God both for the public and private good of man.

Milton. Works, vol. i. p. 66. *The Reason of Church Government*, &c. book ii.

Did not that cholerick and vengeful act of proclaiming him traitor before due process of law, having been convinc'd so late before of his *illegality* with the five members, and declare his anger to be incens'd?

Id. An Answer to Eikon Basilike, vol. i. p. 387. sec. 8.

Fifthly, the reformed, therefore, being by that Church *illegally* condemned for those points, are not Heretikes.

Hall. Works. The Old Religion, ch. iii.

When very *illegal* things were to be done, the common method was this:—a letter was drawn for it to be signed by the King, directing it upon some colour of law or ancient practice: the King signed whatsoever was thus sent to him: and when his letter was read in council, if any of the lawyers or others of the board offered to object to it, he was brow-beaten, as a man that opposed the King's service, and refused to obey his orders.

Burnet. Own Times, book iii. Anno 1678.

He and that engine [the fiddle] of vile noise,

On which *illegally* he plays.

Shall (*dictum factum*) both be brought

To condign punishment as they ought.

Butler. Hudibras, part i. can. 2.

Here it is not, how long the people are bound to tolerate the *illegality* of our judgments, but whether we have a right to substitute our occasional opinion in the place of law; so as to deprive the citizen of his franchise.

Burke. Works, vol. iv. p. 71. *Speech on the Middlesex Election*.

ILLE'GIBE, } These words, so common in speech,
ILLE'GIBLY. } have rarely occurred in writing. Lat.
in, privative, and *legibilis*, from *legere*, to read; the Lat. *legibilis* is not of Classical authority.

That cannot be read.

The secretary poured the ink-box all over the writings and so defaced them that they were made altogether *illegible*.

Howell.

Before I sent the MS. to the press, I discovered that an accidental blot had made all but the first syllable of this name *illegible*.

Mason. An Heroic Postscript.

ILLEGI'TIMATE, v. } Fr. *illegitime*; It. *illegit-*
ILLEGI'TIMATE, adj. } *timo*; Sp. *illegitimo*; Lat.
ILLEGI'TIMACY, } *illegitimus*; from *in*, privative,
ILLEGITIMA'TION. } and *legitimus*, from *lex*, a law
Illegal; not done, not caused, produced, born, according to law, or as required by law; base-born; spurious

Affirmed by churchmen (which should bear no hate)

That John of Gaunt was *illegitimate*;

Whom his reputed mother's tongue did spot,

By a base Flemish boor to be begot.

Drayton. England's Heroical Epistles. Queen Isabel to King Richard II.

Nor did I fear any *illegitimate* impression thereof, conceiving that nobody would be at the charge of it.

Brome. To the Reader.

Our Court mourneth this whole festival with sad frugality for the untimely death of the young Duke of Savoy, our Queen's nephew, hastened they say by the Cardinal his uncle, who would first have

ILLECE-
BRUM.

—
ILLEGITI-
MATE.

ILLEGITIMATE. *illegitimated* him, and that not taking effect by the supportment of Spain, he fell to other Roman arts.

Reliquiæ Wottonianæ, p. 479.

ILLICIT.

Richard the Third had a resolution, out of a hatred to both his brethren, King Edward and the Duke of Clarence, and their lines, (having had his hand in both their blouds,) to disable their issues vpon false and incompetent pretexts; the one, of attaindor; the other of *illegitimation*.

Bacon. Henry VII. fol. 28.

Thomas Cranmer did most ungoddily, and against law, judge the divorce, upon his own unadvised understanding of the Scriptures, upon the testimonies of the Universities, and some bare and most untrue conjectures; and that was afterwards confirmed by two acts of parliament, in which was contained the *illegitimacy* of her Majesty.

Burnet. History of the Reformation, Anno 1553.

Lord Roos, having been by act of parliament last year divorced from his wife, and his children by her declared *illegitimate*, and incapable to inherit, doth now press for an act to enable him to marry another.

Temple. Works, vol. ii. p. 195. From Mr. Secretary Trevor.

Zuinglius confutes that, and says, if the marriage be against the law of God, it ought to be dissolved; but concludes the Queen should be put away honourably, and still used as a Queen, and the marriage should only be dissolved for the future, without *illegitimizing* the issue begotten in it, since it had gone on in a public way, upon a received error.

Burnet. History of the Reformation, book ii. Anno 1539.

By this act, Gardiner had performed his promise to the Queen, of getting her *illegitimation* taken off, without any relation to the pope's authority.

Id. Ib.

But the most glaring note of *illegitimacy* is in the line,

Tithoni primâ quot abest ab origine Cæsar.

Hurd. Works, vol. i. p. 342. On the Epistle to Augustus.

They must, therefore, look on this gross and palpable defect of representation, this fundamental grievance, (so they call it,) as a thing not only vicious in itself, but as rendering our whole government absolutely *illegitimate*, and not at all better than a downright usurpation.

Burke. Works, vol. v. p. 116. Reflections on the Revolution in France.

ILLEVIABLE, from the Fr. *lever*; Lat. *levare*; to raise.

That cannot be *levied* or raised.

He rectified the method of collecting his revenue, and removed obsolete and *illeivable* parts of charge.

Hale.

ILLIBERAL,

ILLIBERALLY,

ILLIBERALITY,

ILLIBERABLE.

Lat. *illiberalis*; from *in*, private, and *liberalis*, from *liber*, free. Mean, ignoble, disingenuous, ungenerous, niggardly.

Not *liberal* science but *illiberal* must that needs be, that mounts in contemplation merely for money.

Milton. Works, vol. i. fol. 96. An. on Rem. Def.

The *illiberality* of parents, in allowance towards their children, is an harmefull error; makes them base; acquaints them with shifts; makes them sort with meane company, and makes them surfet more when they come to plentie.

Bacon. Essay 7. Of Parents and Children.

The reputation that groweth from small and base things is dishonourable, *illiberable*, vile, and of no worth.

Holland. Plutarch, fol. 39.

According to ordinary signification, the word is used in opposition to the *liberal* arts: whereas in propriety of speech those employments alone may be styled *illiberal*, which require only some bodily exercise, as manufactures, trades, &c.

Wilkins. Archimedes; or, Mechanical Powers, book ii. ch. ii.

One that had been bountiful only upon surprise and incogitancy, *illiberally* retracts.

Decay of Piety.

He is a man

More apt thro' inborn gentleness to err,
In giving mercy's tide too free a course,
Than with a thrifty and *illiberal* hand
To stint its channel.

Mason. Elfrida.

ILLICIT, Fr. *illicite*; It. *illicito*; Sp. *ilicito*; Lat. *illicetus*; *qui per leges non licet*. Cotgrave says, *illicitous*, unlawful.

Not allowed or permitted by law, unlawful.

Nor rape Herculean drew me to thy coast,
Nor was *illicit* venery my boast.

Lewis. Statius, book viii. l. 136.

Thus one *illicit* and mischievous transaction always leads to another.

Burke. Works, vol. xi. p. 193. On the Affairs of India.

ILLICIUM, in *Botany*, a genus of the class *Polyandria*, order *Polygynia*, natural order *Magnoliæ*. Generic character: calyx six-leaved; corolla, petals twenty-seven, disposed in a triple series; capsules numerous, forming a ball, two-valved, one-seeded; (petals sometimes six.)

Three species, natives of North America and China.

ILLIGHTEN, *i. e.* to enlighten, *q. v.* to illuminate.

When as th' *illightened* soul discovers clear
Th' abusive shows of sense, and notes with heed
How poor a thing is pride; "when all, as slaves,
Differ but in their fetters, not their graves."

Daniel. History of Civil Wars, book v. ch. iv.

Not to take in our way the full testimonies of Dennis the Areopagite and Origen; that of Tertullian is most clear, the flesh is overshadowed with the imposition of the hand, that the soul may be *illightned* by the Spirit.

Hall. Works, vol. iii. fol. 981. Imposition of Hands.

ILLIMITABLE,

ILLIMITATION,

ILLIMITED,

ILLIMITEDNESS.

Fr. *illimite*; It. *illimitato*; Sp. *ilimitado*; Lat. *in*, and *limes*, a boundary or landmark. That cannot be bounded or confined, terminated or determined; boundless, interminable.

Before their eyes in sudden view appear
The secrets of a hoarie deep, a dark
Illimitable ocean without bound,
Without dimension, where length, breadth, and highth,
And time and place are lost.

Milton. Paradise Lost, book ii. l. 892.

Some other things (and too many) her wicked apostasie hath devised and maintained abominably amisse; the body of her antichristianisme grosse errors, and (by just sequell) heresies; their popes' supracie, infallibilitie, *illimitation*, transubstantiation, &c.

Hall. Works, vol. i. fol. 548. An Apology against Brownists.

Neither can any creature have power to command it, but those only to whom he hath committed it by speciall deputation; nor they neither, by any independent or *illimited* authority; but according as it is regulated by just laws.

Id. Ib. vol. iii. fol. 799. Resolutions, decade 2. case 1.

As therefore he is that Infinite Spirit, who doth all things, and can do no more than all, so they (as his immediate subordinates) are the means whereby he executeth his *illimited* power in and upon this whole created world.

Id. Ib. fol. 963. sec. 4. Of God and his Angels.

The absoluteness and *illimitedness* of his commission was generally spoken of.

Clarendon. History of the Rebellion

Snatch me, ye whirlwinds! far from human race,
Toss'd through the void *illimitable* space.

Pope. Homer. Odyssey, book xx.

Horace was of opinion, that the chorus ought to have been retained, though the state had abridged it of the licence, it so much delighted in, of an *illimited* and intemperate satyr.

Hurd. Works, vol. i. p. 245. On the Art of Poetry

But while he measur'd o'er the painful race
In fortune's wild *illimitable* chase,
Adversity, companion of his way,
Still o'er the victim hung with iron sway.

Falconer. Shipwreck, can. 1.

ILLINOIS, a vast territory of the United States, which was admitted a member of the Union in 1818. It extends from North to South 350 miles, with a mean breadth of 200 miles, and is bounded chiefly by the rivers Ohio, Mississippi and Wabash. A parallel drawn

ILICIT.

ILLINOIS

ILLINOIS. from the Mississippi through the rocky mountains in latitude 41° 50', till it meets a line running Northward from the Wabash, constitutes the Northern boundary. The extent of this State is not less than 52,000 square miles.

Soil.

In soil and climate this is one of the most highly-favoured Countries in North America, or perhaps in the world. The low bottoms near the banks of rivers are indeed unhealthy, but the malaria is confined to narrow limits, and may be still further subdued as the rankness of wild vegetation gives way to culture. The wet prairies and salt marshes are the least productive part of the soil, yet they afford a rich and abundant pasturage. The dry prairies are of such inexhaustible fertility, that in some spots wheat has been grown for a century together without manure. Indeed, the wheat crops of new settlers often prove worthless from the too great fertility of the soil, which is composed of layers of decayed wood and leaves on a rich calcareous earth.

Rivers.

The numerous great rivers which flow through or communicate with this fine Country, open to it all the advantages of commerce. On the West, the *Mississippi* washes its limits for 600 miles. The *Wabash*, which is also navigable, forms its boundary on the East for 240 miles, and from the mouth of this river to the *Mississippi* the *Ohio* winds in a course of 160 miles. The *Caskaskias*, a navigable river falling into the *Mississippi*, flows through a most luxuriant country, and the *Illinois*, further to the North, may be navigated for 200 miles, and receives 20 smaller streams, all available for internal communication. Canoes may navigate this last-named river to within four miles of the *Chicago*, which flows into Lake Michigan; so that this short portage is sufficient to establish the communication with the great Canadian lakes, and it is said that when the rivers are flooded, canoes may pass from one to the other without unloading. The *Wabash*, also, approaches to within six or eight miles of the *Miami*, which runs into Lake Erie. The country watered by the *Wabash* is described by travellers as uncommonly picturesque and beautiful. Between that river and the *Illinois* lie extensive prairies, sometimes with an undulating surface, and covered with timber of extraordinary size, and occasionally spreading into level plains, which stretch to the horizon without a tree or an eminence.

Oak, poplar, and platanus of many varieties are found in the woods. The honey-locust, which grows in the valleys, reaches the height of 40, or even of 60 feet. The branches and trunk are armed with sharp, prickly spines, from five to ten inches in length; the flowers come out from the sides of the young branches, and are succeeded by crooked, compressed pods, from 10 to 18 inches long, and about two inches broad, which are filled with a sweet pulp. These pods are used in making beer, and afford for hogs and other animals a nutritive and abundant food. The black walnut, spice-wood, coffee-nut, sassafras, pawpaw, and many other trees are found in their congenial soils throughout the State. The wild vine is common in the Southern parts, and from the result of experiments made by the French settlers, there is reason to believe that wine may at a future day be one of the chief productions of the Country.

Minerals.

There is but little known of the Mineralogy of Illinois. Limestone seems to be the prevailing rock. All the tributary streams of the *Wabash* and *Illinois* flow over beds of limestone, and have in some places scooped

their channels through overhanging rocks and precipices. Coal has been found on the borders of the *Wabash*, and it is supposed that extensive beds stretch from it towards the East.

Animals.

Large herds of buffaloes formerly roamed over the wide prairies of Illinois, but terrified at the approach of Man, they are gradually retiring towards the Missouri. The red deer and the elk are still common, as well as bears, wolves, foxes, opossums, and racoons. The only venomous serpents found here are the common rattlesnakes and copper-heads. River-fish is abundant, and sturgeon is taken in Lake Illinois. Turkeys are numerous in the woods and hilly districts. Geese and ducks swarm round the lakes and pools in the North, whither they resort in quest of the wild rice, a favourite species of food. Pheasants, quails, and pigeons are also in great quantities.

Population.

Notwithstanding the great natural advantages of this Country, its extensive prairies are for the most part still unoccupied. The old Tribes of Indian warriors have dwindled away. The descendants of the French colonists, who settled on the banks of the *Illinois* from Canada, have adopted nearly all the habits of savage life. Their antique villages are scattered between the *Illinois* and the bank of the *Mississippi*. The more modern colonists, English and American, advance steadily forward from the *Ohio*. Among the most important of these settlements are those of Mr. Birbeck at Wanborough and of Mr. Flower at Albion. These estates are about 12 miles distant from Bon Pas, a creek on the *Wabash*. Several villages have been more recently erected, which may hereafter, perhaps, become great towns. The principal are Caskaskia, Vandalia, the seat of Government, St. Philippe, Wilkinsonville, and Shaunee-town. The houses are generally built of logs, but edifices of brick and stone are now beginning to make their appearance. The number of inhabitants in the State amounted, in 1810, to 12,000; in 1820 it had increased to 55,000; and possibly does not at present fall short of 70,000.

Productions.

The staple production of the Country, at present, is corn. Large tracts, from 100 to 1000 acres in extent, are cultivated in common by the people of a village. Cotton is also grown for domestic use, and will hereafter, probably, become an article of export. Tobacco, flax, and potatoes are also cultivated with advantage. The English settlers possess numerous flocks of sheep, which are found to do well. Cattle and horses are also in plenty; the latter are from the old Spanish stock. Herds of swine in a wild state frequent the salt marshes near the *Wabash*.

Illinois contains many of the ancient mounds and fortifications which are common in Ohio, Kentucky, and Indiana.

Birbeck's *Letters from the Illinois*, 1818; Flower's *Letters from the Illinois*, 1818; Welby's *Visit to North America*; Faux's *Memorable Days in America*; Wood's *Residence in the Illinois*; Warden's *United States*.

ILLISION, Lat. *illidere*, (in, and *læd-ere*,) to dash or strike into or against.

As for Cleanthes in his Commentaries of nature, having set this down, that the vigour and firmitude of things, is the *illision*, and smiting of fire, which if it be in the soul so sufficient, that it is able to perform the duties presented unto it, is called strength and power, he annexeth afterwards these words.

Holland. *Plutarch*, fol. 867.

ILLITE-
RATE.
—
ILLOGI-
CAL.

ILLITERATE, } It. *illetterato*; Sp. *iliterado*;

γραμμὴν. Scaliger, *de Causis Ling.* Lat. c. iv. Vos-
sius; perhaps from *litum*, the past participle of *lin-ere*,
to paint, to smear; and thus *obliterare* from *oblitum*.

Without, not having or possessing *letters* or *literature*,
learning or knowledge; *unlettered*, *unlearned*, *igno-
rant*, *rude*.

Others are not capable either of the employments or diversifications
that arrive from *letters*. I know they are not; and therefore cannot
much recommend solitude to a man totally *illiterate*.

Cowley. *Essay 2. Of Solitude.*

So many men speaking in the presence of the people of several
countries in their own languages so as they very well understood
them, did strangely amaze and confound them, when they found them
to be *illiterate* and home-bred Jews.

Stillington. *Sermon*, vol. iii. p. 482.

Social to all, and most of bliss possest,
When most he renders all around him, blest:
To unread 'squires *illiterately* gay;
Among the learn'd, as learned full as they.

Savage. *To John Powell.*

There are many learned men, who being acquainted with chy-
mistry but by report, have from the *illiterateness*, the arrogance and
the impostures of too many of those that pretend skill in it, taken
occasion to entertain so ill an opinion, &c.

Boyle. *Works*, vol. i. p. 354. *A Physico-Chymical Essay. Preface.*

As I believe that what I have mentioned gave rise to the opinion
of Shakspeare's want of learning; so what has continued it down to
us may have been the many blunders and *illiteracies* of the first
publishers of his works.

Pope. *Preface to Shakspeare.*

The more usual causes of this deprivation are want of holy orders,
illiterature, or inability for the discharge of that sacred function, and
irreligion.

Ayliffe. *Parergon.*

These observations will vindicate their character [the *Old and New*
Testament] from the *illiterate* cavils of modern libertines, who have
foolishly mistaken that colouring for the peculiar workmanship of the
speaker's heated imagination.

Warburton. *Works*, vol. iv. p. 175. *The Divine Legation*, sec. 4.

Both universities seem to have been reduced to the same deplora-
ble condition of indigence and *illiteracy*.

Warton. *History of English Poetry*, vol. ii. p. 452.

ILLO'CAL, } In, privative, and *local*, q. v. from
ILLOCA'LITY. } *locus*, a place.
Without, or not having *place*.

The fourth and last objection, against incorporeal and unextended
substance, is from that *illocality* and immobility (which will follow
thereupon) of human souls, and other finite particular spirits, such as
demons or angels; that this is in itself very absurd, to suppose these
finite and particular beings to be thus *illocal* and immoveable; no
where and every where.

Cudworth. *Intellectual System*, book i. ch. v. p. 783.

The notion of *illocality* is at least as old as Aristotle, but has been
continued down to the moderns, for Cudworth declares himself of that
opinion.

Search. *Light of Nature, pursued*, vol. ii. part i. ch. v. p. 107.

ILLO'GICAL, } Lat. *in*, privative, and *logicus*,
ILLO'GICALLY, } logical, from Gr. *λόγος*, speech.
ILLO'GICALNESS. } See the *Treatise on Logic*.

Without, not having or possessing, not following or
observing, contrary to,—*Logic*, or the rules or Art of
reasoning, or argument.

What is there among the actions of beasts so *illogical* and repugnant
to reason.

Cowley. *Essay 9. The Shortness of Life and Uncertainty of Riches.*

And 'tis not the *illogicalness* of the inference, that will excuse them
that have joined with Satan in temptation to make that conclusion,
nor deliver us from the destruction that follows it.

Hammond. *Works*, vol. iv. *Sermon 11.*

This distinction of precepts and counsels is *illogical* and ridiculous,
one member of the distinction grasping within itself the other.

South. *Sermon 6*. vol. viii. p. 146.

Thus there are divers texts of the Old Testament applied to Christ
in the New, which though they did not now inevitably conclude
against the present Jews, were without any *illogicalness* employed
against their ancestors.

Boyle. *Works*, vol. ii. p. 274. *On the Style of the Holy Scriptures.*

Though they [the Philosophers] sometimes dogmatized like luna-
tics, they never syllogized like idiots; though their principles were
often unnatural, their conclusions were rarely *illogical*.

Warburton. *Works*, vol. iii. p. 139. *The Divine Legation*, sec. 4.

From hence he would infer, and not *illogically* on such a gratuitous
principle, "that the Religion of Jesus is false,"

Id. *Ib.* vol ix. p. 252. *Sermon 13.*

ILLU'DE, } See DELUDE, and ELUDE. Fr. *il-*
ILLU'SION, } *luder*; It. *illudere*; Lat. *illudere*, (*in*,
ILLU'SIVE, } and *ludere*.) to play or sport upon.
ILLU'SORY, } To cheat, to deceive, to beguile; *sc.*
by assuming or displaying false appearances; it is in
old writers used as equivalent to *delude*, and to *elude*.

For holy cherches feith, in our beleve,
Ne suffreth non *illusion* to us greve.

Chaucer. *The Frankeleines Tale*, v. 11446.

To mochel folk we don *illusion*.

Id. *The Chanones Yemannes Prologue*, v. 16141.

Yes quod he sauynge that I take the byddyng by scripture for the
more sure. For there wot I well God speketh & I can not be
illuded.

Sir Thomas More. *Workes*, fol. 166. *A Dialogue concerning Heresies.*

[He] stryued ne lenger how to vnknit it, but out of hande cutt
with his sworde the cordes a sunder: therby either *illuding*, or
else fulfilling the effect of the prophesie.

Brende. *Quintus Curtius*, book iii. fol. 21.

Nor the doctours of Christes chyrch dyd euer mystrust the wonders
and meruayles that the paynims tell & write to haue bene done by
theyr false Goddes, but assygneth the to haue ben done by the deuill
thorough Goddes sufferance, for the *illusyon* of them that wyth
ydolatry had deserued to be *deluded*.

Sir Thomas More. *Workes*, fol. 130. *A Dialogue concerning Heresies.*

Sometimes athwart, sometimes hee strooke him strait,
And falsed oft his blowes, t' *illude* him with such bait.

Spenser. *Fuërie Queene*, book ii. can. 5.

Meane space flew Somnus to the ships, found Neptune out, and said.
Now, chearfully assist the Greeks, and give them glorious head;
At least, a little, while Jove sleeps; of whom through eury limme,
I pour'd darke sleepe; Saturnia's loue, hath so *illuded* him.

Chapman. *Homer. Iliad*, book xiv. fol. 195.

For feare least the Romanes should set upon his armie enclosed in
the vallies betweene the mountaines, he devised a stratageme, by way
of ridiculous *illusion*, to beguile the eyesight of his enemies and to
frustrate and deceive them of their expectation.

Holland. *Livius*, fol. 442.

In vain we measure this amazing sphere,
And find or fix its centre here or there;
Whilst its circumference, scorning to be brought
Ev'n into fancy'd space, *illudes* our vanquish'd thought.

Prior. *Solomon*, book i. *Knowledge*.

The wanton's charms however bright,
Are like the false *illusive* light,
Whose flattering unauuspicious blaze
To precipices oft betrays.

Thomson. *To Seraphina*.

And 2. To prove, that it is not an arbitrary or *illusory* distinction,
but grounded upon the nature of things.

Boyle. *Works*, vol. ii. p. 542. *Reflections upon a Theological Dis-
tinction.*

If the Gentiles meant that the miracles were not real, but only
illusions and false appearances, this was confuted by the testimony of
thousands, who had seen those wonderful works, and by the nature
of many of those works, which was such that there could be no deceit
in them.

Jortin. *Discourses concerning the Christian Religion*, vol. i. p. 46.

In yonder mead behold that vapour
Whose vivid beams *illusive* play,
Far off 't seems a friendly taper
To guide the traveller on his way.

Cooper. *The Tomb of Shakspeare*.

ILLUME. **ILLU'ME,** } Fr. *illuminer*; Sp. *iluminar*;
ILLU'MINE, } It. *illuminare*; Lat. *illuminare*,
ILLU'MINATE, v. } (in, and *lumen*, light,) to en-
ILLU'MINATE, n. } lighten. Tooke thinks the Lat.
ILLU'MINATE, adj. } *lumen* is from the A. S. *leoman*,
ILLUMINA'TION, } *leom-an*, *radiare*, *corruscare*,
ILLU'MINATIVE, } *lucere*; to irradiate, to glitter,
ILLU'MINATOR. } to shine.

To enlighten, to give light unto, to throw light upon;
 to make clear or bright; met. to throw light upon the
 understanding, to free from obscurity, to give power to
 see clearly.

O ye Muses nine
 Whilom ye were wont to be mine aid & light
 My penne to direct, my braine to illumine.
Chaucer. The Remedie of Loue, fol. 323.

And yet for al that, they haue ben illumined, and haue felte the taste
 of the celestial gifte.
*Sir Thomas More. Workes, fol. 544. The Second Part of the Con-
 futation of Tyndale.*

BARN. Last night of all,
 When yond same starre that's Westward from the Pole
 Had made his course t' illumine that part of heauen
 Where now it burns, Marcellus and my selfe, &c.
Shakspeare. Hamlet, fol. 152.

Vnmoing, vncorrupt, and spotlesse bright,
 That need no sunne t' illumine their spheres,
 But their own natue light, farre passing theirs.
Spenser. Hymne to Heauenlie Beautie.

And as he then looked behind him he could see the earth no more,
 but the isles all bright and illumine with a mild and delicate fire.
Holland. Plutarch, fol. 993.

Such illumines are our classicall bretheren.
Mountague. Appeale to Cæsar, p. 16.

Your limbs leave tracks of light, still as you go;
 Your gates illumination, and for you
 Only to move a step is to dispence
 Brightness, and force, splendour, and influence.
Cartwright. A Panegyrick to the Countess of Carlisle.

Some few Ages after came the poet Geffery Chaucer, who writing
 his poesies in English, is of some called the first illuminator of the
 English tongue.
Verstegan. Restitution of Decayed Intelligence, ch. vii. fol. 203.

What makes itself and other things be seen (as being accompanied
 by light) is called fire: what admits the illuminative action of fire,
 and is not seen, is called air.

Digby. Of Bodies, ch. iv. fol. 39.

Yon stars, yon suns, he rears at pleasure higher,
 Illumes their light, and sets their flames on fire.
Pope. The Dunciad, book iii. v. 260.

These glittering weapons, ere he sail'd to Troy,
 Ulysses view'd with stern heroic joy:
 Then beaming o'er th' illum'd wall they shone:
 Now dust dishonours, all their lustre gone.
Id. Homer. Odyssey, book xvii.

When this mild judgement was given, those who had supported
 him through the trial, expressed an inconceivable gladness, as if they
 had got a victory; bonfires, illuminations, and other marks of joy
 appeared, not on^{ly} in London, but over the whole kingdom.

Burnet. Own Times, book vii. Anno 1710.

It is far from arguing a divine nature in the bodies that are en-
 dowed with it [light], whether, as the planets, by participation from
 an external illuminant, or as the sun, from an internal principle.

Boyle. Works, vol. v. p. 188. On a received Notion of Nature,
sec. 4.

555

Proud castle, to thy banner'd bowers,
 Lo! Picture bids her glowing powers
 Their bold historic groups impart;
 She bids th' illuminated pane
 Along thy lofty-vaulted fane,
 Shed the dim blaze of radiance richly clear.

Warton. On his Majesty's Birth-Day.

This prelate employed at Venice and Florence many scribes and
illuminators, in preparing copies of the classics and other useful
 books.

Id. History of English Poetry, vol. ii. p. 423

The Jewish Festival of Lights, as its name implies, Jewish
 was accompanied by brilliant ILLUMINATIONS. Judas Festival of
 Maccabeus, after defeating Gorgias and Lysias, A. C. Lights.
 164, proceeded to Jerusalem, and purified the Temple.
 This new Dedication was celebrated during eight days,
 (1 Macc. ch. iv. v. 59.) and its observance was con-
 tinued ever afterwards under the same name, *φῶτα*, be-
 cause, as Josephus says, (*Ant. xii. 7. Ed. Havercamp.*)
 God was then pleased to bestow light on the children
 of Israel, by turning the darkness of their affliction into
 joy. Without adopting this figurative interpretation,
 the title may be more plainly derived from the employ-
 ment of lights as a testimony of joy. Our Lord him-
 self authorized this Festival, *ἐγκαίνια*, by his presence:
 (*John, ch. x. v. 22.*) whence Grotius and others have
 deduced an argument in favour of the institution of
 public national rejoicings, though not of Divine com-
 mand. The Rabbins have a tradition that the Greeks
 defiled all the oil in the Temple. When the Maccabees
 triumphed, they found only a single phial remaining
 under the seal of the High Priest, which miraculously
 supplied all the lamps for eight days, and in commemo-
 ration of this event the custom of burning lights was
 continued. (*Reland, Ant. Sac. iv. 12. 7.*) Maimonides,
 who makes the same statement, adds, that he who
 pays due honour to this Feast must light one candle on
 the first day for each person in his house, on the second
 day two for each, and so on; so that a house with ten
 inhabitants, on the eighth day, would burn fourscore
 lights. (*In Chanukah, iv.*) Some Feast connected with
 the History of Herod, his birth-day or inauguration,
Herodis dies, was observed in like manner, and Persius
 sneers at the greasy windows and unctuous clouds of
 smoke exhaled by the array of lamps. (v. 180.)

The *Λυχνοκαΐη* described by Herodotus as celebrated Egyptian
 by the Egyptians throughout their land, on one night Lychno-
 of solemn sacrifice offered up in the city Sais, are among chaia.
 the most ancient Illuminations. (ii. 62.) Of the adop-
 tion of a similar custom by the Greeks no mention Illumina-
 occurs to us. Beckmann, (iii. 382.) indeed, states that tions un-
 a passage in Æschylus confirms this usage among them. known in
 He does not give any reference: but if he intends (as Greece.
 we suppose him to do) to refer to the *Agamemnon*, we
 do not think the words of the Poet at all bear out this
 opinion. Clytemnestra, speaking of her watchings
 during the absence of her husband at Troy, expresses
 herself as follows:

ἰν ὀφθαλμοῖς δ' ὄμμασι βλάβας ἔχω,
 τὰς ἀμφὶ σοὶ κλαίονσα λαμπροῦς χάρις
 ἀτημλήτους αἶν. (862.)

 NATION

ILLUMINATION.

Roman Illuminations.

The passage is obscure; but it probably means no more (a meaning which Bishop Blomfield seems to approve) than that the Queen represents herself as painfully outwatching the midnight lamps.

But no doubt can exist that Illumination was commonly practised among the Romans. When Cicero returned from the execution of Lentulus, Cethegus, and the other Catilinarian conspirators, it was late at night as he passed through the *Forum* on his way home. The populace, intoxicated with joy, hailed him as their Saviour and the second founder of Rome. The streets were Illuminated with lamps and torches placed at the doors, while the women held lights from the tops of the houses, that they might see and compliment their deliverer. τὰ δὲ φῶτα πολλὰ κατέλαμπε τοῖς στενωποῖς, λαμπάδια καὶ δᾶδας ἰστώντων ἐπὶ ταῖς θύραις· αἱ δὲ γυναῖκες ἐκ τῶν τεγῶν προῦφαινον ἐπὶ τιμῇ καὶ θεᾷ τῷ ἀνδρὶ. (Plut. in Cic.)

Caligula, in one of his mad extravagancies, gave theatrical representations by night, on which occasion the whole city was Illuminated. (Suet. 18.) Unless, indeed, this may be supposed, as seems most probable, to refer simply to lamp-lighting rather than to festive Illumination. Xiphilinus, speaking of the public entry of Tiridates the Armenian into Rome, states, that πᾶσα ἡ πόλις ἐκεκόσμητο καὶ φῶσι καὶ στεφανώμασιν. We are inclined to think that this pageant took place by day, from the numerous ceremonies which Suetonius describes as accompanying it. (Nero, 13.) So, too, when Nero returned from Greece, the same author writes, ἐς τὸ Καπιτώλιον ἀνέβη καὶ ἐκεῖθεν ἐς τὸ Παλάτιον, πασῆς μὲν τῆς πόλεως ἐστεφανωμένης, καὶ λυχνόκαυτούσης, καὶ θυμωμένης. This custom of Illumination by daylight is very frequently referred to. Juvenal, as a mark of rejoicing for the escape of his friend Corvinus from shipwreck, adorns his house with green boughs and lamps, whose office, to glimmer in daylight, is sufficiently expressed by the epithet *matutinis*. (xii. 92.) Tertullian points to these decorations as profane, and to be avoided by Christians, *cur die læto non laureis postes adumbramus? nec lucernis diem infringimus?* (Apol. 35.) In later days, however, the Christians themselves fell into this fashion, at least by night; though the Fathers of the 1st century stigmatized the custom as little better than a species of Idolatry, and the 37th Canon *Concilii Eliberitani* expressly forbade it.

Adopted by the Primitive Christians.

Paschal Feast.

Eusebius, in his *Life of Constantine*, (iv. 22.) states that in the celebration of the Paschal Feast that Emperor turned night into day on its Vigil by the brilliancy of his Illuminations. τὴν δ' ἱερὰν διανυκτέρευσιν μετέβαλλεν εἰς ἡμερινὰ φῶτα, κηροῦ κίονας ὑψηλοτάτους καθ' ὅλης ἐξαπτόντων τῆς πόλεως, τῶν ἐπὶ τούτῳ τεταγμένων. Upon which passage Valesius observes that Constantine improved upon the practice of interior Illumination, already in use among the early Christians, by these far more splendid external tokens of joy. Gregory Nazianzen has pointed to the custom in his XIXth *Oratio*, speaking of the Paschal Vigil, ἡ λαμπρὰ νύξ λύουσα τὸ σκότος τῆς ἀμαρτίας, καθ' ἣν ἡμεῖς ὑπὸ πλουσίῳ φωτὶ τὴν σωτηρίαν ἡμῶν αὐτῶν ἐορτάζομεν. On the use and abuse of Christian Illuminations, the reader may find some further remarks in the elaborate Work of Lamy, *de Tabernaculo Fæderis*, lib. iv. c. 8. sec. 4.

The Works of modern Oriental Travellers abound in accounts of the splendid Illuminations in Eastern

Countries. Chardin, when describing the *Place Royale*, as he interprets the Persian *maidan chae* at Ispahan, says that the Royal Mosque and the great Market, which form the extremes of the *Place*, are arranged in a superb crescent. *Il y a autour de ces magnifiques édifices des échafaudages de Perches minces, qui montent jusqu'au haut, et qui sont faits pour porter des petites Lampes de terre, dont on fait les Illuminations dans les réjouissances publiques. Les Maisons de la Place en sont toutes couvertes sur le devant, depuis le premier étage jusqu'à la terrasse. Il y en a bien six vint à chaque arcade. Ces Lampes sont toutes si petites, qu'on ne s'en aperçoit pas à moins que d'y prendre bien garde, mais quand elles sont allumées, c'est la plus belle Illumination du monde; car ces Lampes montent toutes ensemble à quelques cinquante mille. Abas le Grand aimoit fort ce pompeux spectacle, et il s'en donnoit souvent le plaisir comme on le peut voir dans Pietro delle Valle. Son successeur, Sesi I., s'en soucioit beaucoup moins, et les deux Rois derniers moins encore. Abas II. et Soliman IV. n'ont guères fait faire de ces Illuminations que pour en régaler de grands Ambassadeurs comme je l'ai vu arriver entr'autres dans la province d'Hyrkanie pour l'Ambassadeur des Indes. (Voyages, iii. 17.)*

A Festival, called *Haia Chameh*, or the Feast of Lights, which used to be celebrated in Ispahan, and many other of the great cities of Persia, on the 13th of February, had been abolished by Abas II. not long before Chardin's arrival in that Country. This also was observed by Illuminations *aux portes des Logis et aux principaux Bazars, qui duroient toute la nuit*. By some, continues Chardin, this solemnity has been traced to *La Chandeleur* (the Purification) *des Catholiques Romains*; a strange conjecture, for which it is not easy to account. Others think it derived from the New-year's Feast of the Ancient Persians, which, though belonging to the Vernal Equinox, was movable on account of their months being lunar. It is probable that this was the opinion of Abas, who, when he suppressed it, remarked that Mohammedans ought not to have any thing in common with the worshippers of Fire, "*ni célébrer aucune Solemnité de ces Gentils.*" (Ib. 140.)

Thevenot witnessed the beginning of the Ramadan at Cairo, on the 12th of June, 1657. On the first night *Laylet el Kouvât*, on which the Koran is believed to have descended from Heaven, the great street and the minarets of the several mosques were very brilliantly Illuminated. Throughout the night, the streets were thronged with masqueraders carrying torches, and amusing themselves with fire-works. The chief delight of the rabble, in the end, appears to have been the destruction of most of the lamps. (*Travels into the Levant*, p. i. c. 14.)

Maillet, who was French Consul at Cairo, and whose *Description de l'Egypte* was the fruit of 16 years' residence in that singular Country, from 1692 to 1708, describes the beauty of the nights as much heightened by the frequent occurrence of festive Illuminations. *Ces nuits avoient aussi leurs agréments et leurs plaisirs par le nombre infini des lumières, qui les éclairaient, et les rendoient en quelque sorte aussi brillantes que le jour. Car il n'y a point de réjouissance, point de fête un peu considérable en Egypte, qui ne soit accompagnée d'Illuminations. On s'y sert pour cela de lampions*

ILLUMINATION.

Persian Illuminations

Egyptian

ILLUMINATION. qu'on met dans un gobelet de verre très long, ensorte que l'huile ne montant jamais qu'à la moitié ou au tiers de ce gobelet, ses bords plus élevés préservent la lumière, et l'empêchent d'être éteint par le vent. Les Egyptiens ont, je crois, porté cet Art au souverain degré de perfection. Il n'y a rien qu'ils ne figurent avec des lampes, des tours, des palais, des batailles mêmes. Rien certainement ne produit un effet plus charmant. . . . Les Illuminations de toutes les mosquées du Caire pendant toutes les nuits de la Lune du Ramadan, et celles qui précèdent les principales fêtes des Mahométans, regardées du haut des terrasses de la Ville, font un des plus beaux aspects du monde. Elles ne le cèdent en rien à celles qui se font à Constantinople, que quelques Voyageurs ont tant vantées, et qu'on découvre de si loin. (Lettre ii. p. 80.) He describes also very pompous water processions in the months of June, July, August, and September, on which occasion each boat by night bore the name of its owner figured in lamps..

Other Oriental Illuminations. Du Tott, in his *Memoirs*, describes the Turkish Feast of Tulips as celebrated by night with a mixture of lamps and flowers; or rather by Illuminated Gardens. In our account of JAPAN, (476.) we have already spoken of the Feast of Lanterns observed in that Country, and under CHINA (569.) of a similar celebration there also.

Candyan. Dr. Davy, in his *Account of the Interior of Ceylon*, has given a description of the *Karttie Mangallà*, the Feast of the Fortunate Hour, or the Feast of Lamps, the third annual festival celebrated in the Kandyan Capital, and especially kept for the prosperity of the Kingdom. It was observed "in the month of November, on the day preceding the full moon. The fortunate hour for lighting the lamps was previously determined and laid down by the Royal Astrologers in Nekat-wattoroos.* In the morning of the day appointed, lamps and oil were brought from the Royal store to the Nata-dewalé, where the Chiefs being assembled, and the Kappurawles of the four principal dewalés, the latter sang the Mangala-asta, a hymn of thanks and praise to the Gods, and offered up prayers for the prosperity of the Kingdom. They then distributed, with great ceremony, Neykat-wattoroos, with oil, to all the principal Temples. In the evening at the fortunate hour pointed out, the great square decorated with arches, and the palace, the temple, the dewalés, and the four principal streets were completely and brilliantly Illuminated." (174.)

European. In Europe, Illuminations have been very generally adopted (though we are unable to trace their introduction) on occasions of extraordinary public rejoicing. The most brilliant exhibitions of this kind are those which occur at Rome during the Holy week. On the Thursday in that week the Host is deposited in a sepulchre beneath the altar in the Pauline Chapel, which is splendidly Illuminated during the two days and nights which our Saviour lies in the grave. A cross of fire 18 feet in length is suspended from the dome of St. Peter above the tomb of the Apostle; and on Easter Sunday, the whole of the exterior of that immense Temple, its dome, columns, capitals, cornices, and pediments, are designed in tiers of fire, by innumerable lanternoni, or large paper lanterns; and a girandola of fire-works, such as English eyes are little accustomed

to witness, is played off from the Castle of St. Angelo. The lamps which light the dome are so contrived as to be Illuminated together almost at one moment; and the effect is described to be most sublime. The girandola, of late years, has been most commonly reserved for two evenings on the Festival of St. Peter.

ILLUMINATION. Du Cange describes an ILLUMINATOR to be *aurarius pictor qui libros variis figuris, eisque aureis, condecorat.* Illumination of Books. The art of Illumination was much cultivated by the Monks; and the specimens which remain to us from the Vth to the Xth century, are executed in a manner very superior to those which were produced during the five following centuries. Some fine examples of Anglo-Saxon Illumination are remaining to us; one of exquisite beauty, a MS. of the four Gospels, completed about the year 720, and preserved in the British Museum, (Cott. MSS. Nero, D. 4.) employed the labours of four distinguished theologians of their day. Eadfrid, Bishop of Durham, wrote the text; Ethelwold, his successor, Illuminated the Volume; Bilfrid, the Anachoret, covered it most richly with gold and silver plates and precious stones; and Aldred, of whose grade we cannot speak, added glosses, and recounted these particulars. A MS. note, in a later hand, at the commencement informs us that *Eadfrith, Ethelwald, Bilfrith, Aldred, hoc Evangelium Deo et Cuthberto construxerunt. Ex quibus verbis facile intelligamus eundem hunc Codicem esse de quo tot miracula recitantur in Cronicis et Annalibus Dunelmensis Ecclesiæ.* We should gladly cite some of these wonders if we knew where they are to be found. They are not in the History of Simeon of Durham. But William of Malmsbury, in his *Life of S. Wlstan*, Bishop of Worcester, has supplied us with a Legend respecting some other Illuminated Volumes, which, whatever may be the truth of its main subject, incidentally shows that the labour of the penmen was not always thrown away, but that the beauty of their work excited great attention in some instances, and created strong attachment to the Sacred pages upon which they engaged themselves.

Wlstan, in his youth, about the year 980, was educated under one Ervenius, *in scribendo et quidlibet coloribus effigendo peritum. Is libros scriptos, Sacramentarium et Psalterium, quorum principales literas auro effigiaverit, puero Wlstano delegandos curavit. Ille preciosorum apicum captus miraculo, dum pulchritudinem intentis oculis rimatur, et scientiam literarum internis hausit medullis.* Ervenius, however, regarding profit more than piety, disposed of these MSS. advantageously to King Cnute and Queen Emma. Wlstan was sorely grieved, and fell asleep amid sighs and tears for the loss of his favourite volumes. In his dreams, a person of angelic countenance appeared to him and promised their restoration, which accordingly happened, many years afterwards, in this wise. King Edward, having sent Bishop Aldred on an embassy to the Emperor Henry, at Cologne, that Prelate was very favourably received, and, among other presents which were offered him, a private individual tendered the very *Sacramentarium et Psalterium* so loved by Wlstan, both of which had been given to Cologne as a mark of especial grace by Cnute. Aldred, on his return, knowing nothing of their early history, nor of the prophetic promise, presented them to Wlstan as a memorial of respect for his holy life. *Suscepit ille cæleste depositum, magnificè gratulatus, et gratias agens Deo, quod Reli-*

* Of this and the other barbarous words, which Dr. Davy employs, no explanation is afforded by him.

Beseeching Almighty God so to prosper your adventures, from time to time hereafter to be made for reaping the fruits of my trauels (at your great charges, and to my no small dangers) that ye may plentifully gather in and enoye the same, to the *illustrating* of the Queenes most excellent Maestie, the honour and commoditie of this her highnesse realme, &c.

Hakluyt. *Voyages*, &c. vol. i. fol. 352. M. Anth. Inkinson.

A Christian Poet, whose Religion little needs the aids of invention, hath less occasion to imitate such fables as meanly *illustrate* a probable Heaven, by the fashion and dignity of Courts, and make a resemblance of Hell, out of the dreams of frightened women, by which they continue and increase the melancholy mistakes of the people.

Davenant. *Preface to Gondibert*.

Then praid *illustrate* Diomed: vouchsafe me likewise care,
O thou unconquer'd Queene of Armes.

Chapman. *Homer. Iliad*, book x. fol. 136.

Next, hast thou the *illustration* of this learned gentleman, my friend, to explain every hard matter of History, that lying far from the way of common reading, may (without question) seem difficult unto thee.

Drayton. *Poly-olbion. Preface*.

Who can but magnifie the power of decussation, inservient to contrary ends, solution and consolidation, union and division *illustrable* from Aristotle in the old nucifragium or nutcracker.

Sir Thomas Brown. *Cyrus Garden*, ch. ii. fol. 43.

Changeable conceits we doe contrive,
Purging and pruning with all industrie,
What's dead or uselesse, lesse demonstrative,
What's dull or flaccid, nought *illustrative*.

More. *On the Soul*, part ii. book i. can. 2. stan. 41.

They being many times delivered hieroglically, metaphorically, *illustratively*, and not with reference unto action or causality.

Sir Thomas Brown. *Vulgar Errours*, book iv. ch. xii.

Brave Warwick; that abroad so long advanc'd her bear,
By her *illustrious* Earls renowned every where.

Drayton. *Poly-olbion*, song 13.

The churches, especially of your native Country, under the discipline of which your birth and genius have render'd you *illustriously* happy, may be sensible of so much the more assur'd security in your protection, by how much you excel others in *lustre* and ability.

Milton. *Works*, vol. ii. fol. 182. *Letters of State*.

This fear could not come from the design of the infant [Jesus], but must needs arise from the *illustriousness* of the birth, and the prophecies of the Child.

Taylor. *Rule of Conscience*, book i. ch. iv. p. 95.

That sword great Anne
Fix'd not in vain on thy puissant side,
When thee sh' enroll'd her garter'd knights among.
Illustrating the noble list.

Philips. *Blenheim*.

While the storm was in its fury, any allusion had been improper: for the Poet could have compared it to nothing more impetuous than itself: consequently he could have made no *illustration*.

Dryden. *Dedication to the Æneid*.

To Mr. Banks also the public is indebted for the designs of the engravings which *illustrate* and adorn the account of this voyage.

Cook. *Voyages*, vol. i. *Introduction*.

They contain such a parade of common-place quotation, with so small a degree of *illustrative* science, that I have thought proper to expel them from this edition.

Mason. *Fresnoy. Art of Painting*.

They [comparisons] should be taken from those *illustrious*, noted objects, which most of the readers have either seen, or can strongly conceive.

Blair. *Lecture 17*.

The deep carnations in the Eastern skies,
When ruddy morning walks along the hills,
Illustriously red, in purple dews.

Thompson. *Sickness*, book iv.

I L L Y R I A.

ILLYRIA, (the Kingdom of,) an integral portion of the Austrian Empire. The Country on the North-Eastern shore of the Adriatic bore that title in antiquity; but when the Romans made the conquest of it, under the Consul Anicius, 168 years before the Christian era, they changed the name to that of *Illyricum*, which comprehended all the territory lying Northwards, from the shores of the Adriatic to the borders of Noricum and Pannonia. Under Augustus, this Province was increased by the addition of Liburnia and Dalmatia; towards the East, its limits do not

appear to have been precisely fixed. The territory included in *Illyricum* thus became so considerable, that in the partition of the Empire under Arcadius and Honorius, this Province was divided; one part being annexed to the Eastern, the other to the Western Empire. The name, however, was soon after totally lost, as the Northern hordes took possession of the Roman Provinces; and in modern times was only revived in the official Latin of the Austrian Government, which gave the name of Illyria to the Hungarian Provinces below the Drave. By the peace of Presbourg,

ILLYRIA. in 1809, Napoleon obtained possession of Carniola, Friuli, Istria, part of Croatia, of Dalmatia, and of the Tyrol; all which territories he incorporated with his Empire, under the name of *Provinces Illyriennes*. When Austria, in 1814, regained possession of this Country, she separated Dalmatia, Croatia, and the Tyrol from the remainder, which, with the addition of some of the Venetian territories and the Circle of Clagenfurt, was formed into the *Kingdom of Illyria*, to be unalienably united to the Crown of Austria. The Kingdom was at the same time divided into the two independent Governments of Laybach and Trieste. Its boundaries are, on the North, the Duchy of Austria, Styria, and part of Croatia; on the East, the remainder of Croatia; on the South, the Adriatic; and on the West, the territories of Venice and the Tyrol. It comprehends a surface of about 14,000 square miles. The Government of Laybach is subdivided into the Circles of Laybach, Neustadt, Adelsberg, Clagenfurt, and Villach. The Government of Trieste comprises the Circles of Gorz, Istria, Fiume, and Carlstadt.

Government The Emperor of Austria rules the Illyrian Kingdom with uncontrolled authority; in Carniola and Carinthia, indeed, there exist Constitutional Assemblies, (*landstände*;) composed of four classes, Prelates, Lords, Knights, and Burghers; but these Assemblies have no legislative powers, and meet only to assess the taxes. The Supreme Court of Appeal is at Clagenfurt, but in the military and financial administrations, the Kingdom of Illyria is not separated by any precise line from the other Austrian dominions. The revenues are supposed to amount to about six millions of florins.

The physical description of the interior of this Country will be found under the heads CARINTHIA, CARNIOLA, CROATIA, and FRIULI. We shall here accordingly confine our observations to a few topographical particulars omitted in those Papers, and to a general account of the sea-coast.

The Loibel. The Kingdom of Illyria is, taken as a whole, a mountainous country, but the mountains terminate rather abruptly on the South; and the sea-coast is a low flat, sandy on the Western side, and covered with marshes towards the East. The Austrian roads through this unequal region are the finest in Europe. The distance between Kirschtheur and Krainburg, about 20 miles, is called the Pass of the Loibel, which must not be considered as a single mountain, but as a long range of mountains, rising one above the other, and round which the traveller keeps continually winding, till he arrives at two pyramids, which mark the highest point, and form the boundary between Carinthia and Carniola. This is one of the loftiest high roads in Europe; and the solidity with which it is constructed places it on an equality with the greatest works of antiquity, being on one side principally hewn out of the steep rock, and supported by strong walls on the other. Towards the precipice, it is fenced with rails and stone parapets.

From the Pass of the Loibel to Laybach, the road leads through one of the finest valleys in the Austrian dominions. The river Save embellishes the scenery of a fertile and well-cultivated plain. Laybach, called *Lublana* by the Sclavonians, is a pretty little town, containing a great number of large, elegant structures, some of which are public buildings. The Churches, 10 or 12 in number, are in better taste than those of Germany. The Cathedral is said to resemble in

its interior that of St. Peter's at Rome. It is entirely painted in fresco; and though not in a first-rate style, yet every thing indicates its vicinity to the frontiers of Italy. The Public Schools form a large handsome building. The Jesuits' convent is at present converted into Assembly rooms. The castle, situated on an eminence close to the town, is now visited only on account of the prospect it commands; it serves as a prison, and as barracks for recruits. The river Laybach runs through the town; but though navigable, the use made of it is inconsiderable. Population nearly 10,000.

About 30 miles from Laybach is the village of *Idria*, in the Circle of Adelsberg. Idria, so celebrated for its quicksilver mines, lies in a valley surrounded on every side by lofty mountains, covered by thick woods. The valley being extremely narrow, the houses stand detached on the sides of the hills, each with a garden annexed to it, in which the miners raise a few vegetables, notwithstanding the inclemency of the climate and the sterility of the soil. The little river Idrizza, in winter a formidable torrent, runs through the midst. The inhabitants of Idria, separated by high mountains from the rest of the world, are about 3500 in number, and are all miners or belong to miners. The number of labourers above and below ground is stated at 900, exclusive of upwards of 300 wood-cutters, who fell timber in the forests, which they float down the rivers or prepare in various ways. The annual produce of these mines amounted formerly, for a considerable period, to from 500 to 600 tons of quicksilver. The greatest part of it used to be exported to Spain, whence it was sent to America for the amalgamation of silver ores. But the revolutions terminating in the independence of the Spanish colonies, effectually interrupted those dealings, and as the market for the produce was diminished, the mines at Idria were wrought with less vigour. A great part of the quicksilver is conveyed to Vienna, and sold on account of the Emperor. England, it is said, takes the largest share.

The mines. The mines of Idria have the reputation of being the most magnificent in the world. The galleries and adits are so neat and spacious, that no disagreeable exhalation is perceptible. The entrance is by a lofty vaulted cavern, conducting to the descents; these are formed by clean stone steps, which are kept in excellent order. The steps have several landing-places, paved with broad flags, and provided with benches to rest on. As the miners proceed deeper into the pit, the passages continue to be arched over, and provided with steps. In a very few places the vault is supported with wood, and occasionally the solid rock is cut through, which, of course, needs no support. The ore is not of a uniform richness; some specimens furnish 80 per cent., but the average does not exceed 50; the small quantity of virgin quicksilver that is occasionally found is shown as a rarity. The principal shaft is 86 fathoms in depth. In the beginning of the present century, the wood-work in the galleries of these mines took fire, and the conflagration raged so obstinately as to threaten the destruction of the whole. The heated sulphureous exhalations prevented the workmen from approaching the scene of danger, and the flames could not be extinguished until the river was led, by an artificial channel, to discharge itself into the mines.

The mines of Idria belong to the Government, and are wrought entirely at its expense. The officers have

ILLYRIA. very moderate salaries; the pay of the miners begins with five kreutzers (about twopence farthing) a day, and gradually mounts to 17, which is the highest ever allowed; for this they must work eight hours below or 10 above ground. Notwithstanding the precautions taken in the management of these mines, to escape or counteract the noxious effluvia which belong to quicksilver ores, yet the insalubrity of the occupation is evident in the reduced value of life among the miners. Few of them live much beyond 50; the greatest mortality being amongst those whose business it is to roast the ores. Their scanty subsistence, and the hardships of their mountain climate, concur with the baleful atmosphere of the mines to shorten their existence.

Caverns.

The rock in which these metallic deposits are found is a bituminous schist; but the great mountain chains which branch through Illyria, the Noric and Julian Alps, are principally formed of secondary limestone, a species of rock remarkable for its cavernous character. The mountains composed of it appear in general to be hollow. The subterranean rivers in Illyria are as numerous as those which flow above ground; in some places they gush from caverns; then after a considerable course suddenly disappear, and further on emerge again; or they flow during certain seasons, and then disappearing leave their channels quite dry. The singular lake of Czirknitz (see CARNIOLA) presents a phenomenon of the same nature.

At Adelsberg.

It is said that there are above a thousand caverns bearing names in the mountains of Illyria. The most remarkable are, the Magdalen Grotto near Adelsberg; that of Lueg; that of St. Servio near Trieste; the Grotto of Corgnale; and those of the lake of Czirknitz. The great cavern of Adelsberg is said to be two leagues in length; at the extremity of the Magdalen Grotto is a pool, which attracts the attention of Naturalists from the circumstance of its nourishing that singular little animal the *Proteus Anguinus*. At Lueg there are three caverns, one above another; the lowest of them cannot be explored, as a rapid torrent flows through it; the second is about two miles long, uniformly spacious, and decorated with columns and a fretted roof of stalactites. In the wide aperture of the uppermost Grotto some one conceived the extraordinary idea of erecting the Castle of Lueg. This building, which is said to be very ancient, is capacious, but dark, damp, and gloomy. A great portion of it has fallen to ruin. From the rear of the castle is a communication with the Grotto. The Grotto of Corgnale, not far from Trieste, is said to surpass every other known cavern in the size of its massive stalactites and the brilliancy of its incrustations; it has never been completely explored, but is supposed to have a second opening at a distance of nine miles.

Lueg.

The cavernous district between Adelsberg and Trieste is a desolate, barren, and rocky tract, thinly inhabited, and still worse cultivated. The country grows still more naked and dreary as the traveller climbs the long ridge of the Karst towards the South. At length, having reached the summit of the Karst, he finds himself on the brow of a bold precipice, which would make him shudder if it were not for the smiling prospect which lies beneath. In the front is the Adriatic, the bay of Trieste with all its promontories, Istria on the left, and on the right, along the Northern frontiers of Venice, a lofty range of Alps covered with eternal snow. The summit of the Karst, and the country lying immediately below it, differ as much in climate as if they were

separated by a distance of ten degrees; there is no spot in the world, perhaps, where so sudden a transition may be experienced. From a bleak and barren region, a very rapid descent conducts to one in which the chestnut, the cypress, the fig, the peach, the almond, the olive, and the vine, flourish with the luxuriance of Italian vegetation.

Trieste, the *Tergeste* of antiquity, rises in an amphitheatrical form to the summit of a mountain, the base of which is washed by the sea. The houses are well built, and the streets very wide, and paved with flagstones of great size. The harbour of Trieste was for a long time only a simple anchorage place. The magnificent mole was constructed by the directions of Maria Louisa. It extends about 1500 feet into the sea, and has room on it for 50 pieces of cannon. Opposite the mole, on the other side of the town, is the New Lazaretto, with a distinct harbour. The Castle stands on an eminence above the town, and was once thought a strong fortification, but the French dismantled it in 1813, and a few guns planted there at present serve only to salute the vessels entering the harbour. The harbour is secure and commodious, though exposed to the *Bora*, a furious wind from the South-West. Two large canals run out of it for a considerable distance into the town, and afford a place for the reception of a large number of vessels. These canals were the labour of an early period. Trieste has few handsome buildings. The Church of the Jesuits, nevertheless, is handsome, and the Exchange is a model of good taste. In the Cathedral is a monument raised to the memory of the celebrated Winkelman, who was assassinated here by his servant. The population of Trieste is nearly 40,000. The prosperity of the place may be ascribed to its privileges as a free port. It arose as Venice declined; but the commercial charter lately granted to the ancient Queen of the Adriatic, may, perhaps, check the growth of the rival town.

A few miles to the Westward of Trieste, a little village, with about 800 inhabitants, retains the name and marks the site of the ancient *Aquileia*. Towards the East is the peninsula of *Istria*, as remarkable for the fertility of its soil, as for the supine laziness of its inhabitants. Oil and wine are almost all that Man requires from the soil in these Cantons, and they are procured with little labour. The sea also affords here an unusual abundance of excellent fish, and supersedes the necessity of constant occupation. To the indolent habits of the people, and their immoderate use of wine, may be attributed the frequency of gout in Istria, which is the chief seat of that disorder, as Styria is said to be of wens. One of the great advantages of Istria is its valuable forests. From these the Republic of Venice derived the greater part of its timber for ship-building; but their extent contributes, perhaps, to the general insalubrity of this Country, which in a great many instances proves fatal to foreigners.

The town of *Capo d'Istria*, about 10 miles South of Trieste, was known in the earliest Ages by the name of *Ægida*. In the course of time, however, it abandoned that name for the more Courtly one of *Justinopolis*, given to it either by the Emperor Justin or Justinian. The town stands on an isle, which has been united to the mainland by a causeway half a mile in length. It is a Bishop's See depending on the Archbishopric of Udina, and notwithstanding its small extent and population, (not much exceeding 5000,) it contains 40

ILLYRIA. Churches, exclusive of the Cathedral, and has 30 Con-
 vent s. Its salt-pits and vineyards furnish the most im-
 IMAGE. portant articles of its commerce; and its air, though
 not perfectly salubrious, is less dangerous to health
 than that of the other maritime towns of Istria. The
 Rovigno. town of *Rovigno*, further South on the peninsula, is a
 more agreeable and more populous place, though less
 frequently visited by strangers. The quarries from
 which Venice was supplied with building stone, were
 in its neighbourhood, and the intercourse maintained
 by it on this account with the architects of Italy, may
 have contributed to the general elegance observable
 in its buildings. The Cathedral is a fine, large, Gothic
 edifice, majestically situated in the highest part of the
 town; it is particularly remarkable for the height and
 beauty of its steeple, which bears a close resemblance to
 that of St. Mark's.

Pola.

Near the extremity of the Istrian peninsula stands
 the town of *Pola*, originally *Pietas Julia*, which pre-
 serves many more traces of its ancient grandeur than
Ægida or *Capo d'Istria*. It gave its name to the gulf
 and the promontory, and under the Emperor Severus
 assumed the proud title of *Respublica Polensis*. It has
 now, however, dwindled down to a few houses with
 about 700 inhabitants, dispersed within the walls of a
 town, near which stand the ruins of an Amphitheatre,
 capable of containing many thousands. Its only defence
 is a wretched citadel, left unfinished by the Venetians,
 and garrisoned in time of war by a detachment of 20
 men. The walls of the Amphitheatre are still entire;
 it has three stories, each of which contains 72 arcades.
 The steps and benches were probably of wood, and

have totally disappeared. There is also a Temple here
 dedicated *Romæ et Augusto*, and built in the finest
 style of the Corinthian Order. On the flat frieze in the
 front of the portico is the inscription mentioned above,
 which is described by Spon as perfectly legible. The
 steps conducting to the portico and the pedestals of the
 columns are buried in rubbish. The people of the town
 call the Amphitheatre the *Casa Orlandina*, or house of
 Roland. There is also an ancient Triumphal Arch in
 perfect preservation, which is considered as one of the
 gates of the town, under the name of *Porta Aurea*.
 It is a simple but very beautiful monument, recording
 not victory and conquest, but the affection of a wife
 towards her husband. There are also many other
 remnants of Roman grandeur in this interesting spot.
Fiume is the last place of any importance in Istria. *Fiume*.
 It is a free port, with an active trade, and a population
 of 8000 souls.

ILLYRIA.
IMAGE.

To the district of *Fiume* are annexed the three Islands The Islands
 of *Veglia*, *Cherso*, and *Ossero*. The first of these sup- *Veglia*.
 ports about 11,000 inhabitants, and exports wine and
 marble. *Cherso* has a population of 6000, and is *Cherso*.
 remarkable for the extreme smallness of its horses,
 which are not, however, deficient in spirit or in symme-
 try of form. The island of *Ossero* is separated from *Ossero*.
Cherso only by a narrow canal, which is not navigable
 for ships of any burden; it resembles that island in its
 fertility and salubrity, exporting honey, wine, oil, and
 fruits in abundance.

IMAGE, v.
 IMAGE, n.
 IMAGER,
 IMAGERY,
 IMAGEINE,
 IMAGEINABLE,
 IMAGEINANT, n.
 IMAGEINANT, adj.
 IMAGEINARY,
 IMAGEINARILY,
 IMAGEINATE,
 IMAGINATION,
 IMAGEINATIVE,
 IMAGEINER,
 IMAGEININGS,
 IMAGE-BREAKER,
 IMAGE-GRAVER,
 IMAGE-MAKER,
 IMAGE-MONGER,
 IMAGE-WAR,
 IMAGE-WORSHIP.

Fr. *image*, *imaginer*; It.
immagine, *immaginare*; Sp.
imagen, *imaginar*; Lat. *imago*,
imaginari. *Imago*, says Vos-
 sius, is, if we assent to Festus,
quasi imitago, from *imitor*,
*quia imitatur et representat suo
 modo id quod exprimit*; or it
 may be from *εἰμα*, *imago*, from
εἰκ-ειν, *simile esse*; to be like.
 Any thing made, framed,
 figured, or fashioned, carved, or
 painted, in imitation, likeness,
 or representation; a semblance
 or resemblance, picture or copy,
 a figure, statue or effigy; met.
 that which is, or which is formed,
 in the mind, as a picture or re-
 presentation, or resemblance.

To *image*; to form, to
 conceive, such *images* in the
 mind; to picture resemblances or representations; to
 depicture, to devise.

Hym þougte þe ymage in hys slepe tolde hym hys chance.
R. Gloucester, p. 14.

Therefore as we han born the ymage of the ertheliman, bere we also
 the ymage of the heuenli.

Wiclif. 1 *Corynthians*, ch. xv.

And as we haue borne the ymage of the earthly, so shall we beare
 the ymage of the heuently.

VOL. XXIII.

For sum visioun is bodili, as whanne we seen ony thing with bodili
 igen. some is spiritual or ymaginarie, as whanne we seen slepyng or
 ellis wakyng we biholden the ymagis of thinges bi whiche sum other
 thing is signified.

Wiclif. Prologue on *Apocalips*.

To which image bothe yonge and old
 Commanded he to loute, and have in drede.

Chaucer. *The Monkes Tale*, v. 14167.

Philosophers, that highten stoicians, wend that images and sensibi-
 lities, that is to saie, sensible imaginations, or els imaginacions of sen-
 sible thinges, were emprinted into soules, fro bodies without forth.

Id. *The fifth Booke of Boecius*, fol. 245.

But many subtil compassings
 As babeuries and pinnacles
 Imageries and tabernacles
 I sawe.

Id. *The thirde Booke of Fame*, fol. 280.

And thus by wit and subtil enquering
 Imagined was by whom this harm gan spring.

Id. *The Man of Lawes Tale*, v. 3309.

Man is a reasonable two-footed beast, and how so that this knowing
 is vniuersall, yet nys there no wight, that ne wote well, that a man is
 a thyng ymaginable and sensible, &c.

Id. *The fifth Booke of Boecius*, fol. 240.

Lo, what a gret thing is affection,
 Men may die of imagination
 So depe may impression be take.

Id. *The Milleres Tale*, v. 3612.

Also imaginacion, albe it so, that it taketh of witte the beginnyng,
 to seen and formen the figures algaates although that wit ne were not
 present, yet it enuironeth and comprehendeth all thynges sensible,
 not by reason sensible of demyng, but by reason imaginatife.

Id. *The fifth Booke of Boecius*, fol. 240.

4 c

IMAGE.

And he bethought hym, how he might
Unto this tyranne do likynge.
And of his owne *imaginyng*
Lete forge and make a bulle of bras.

Gower. *Conf. Am.* book vii. fol. 162.

And to beware either of makynge *imagery*, or howyng themselves
vnto *images* saying: ye saw no *image* when God spake vnto you,
but heard a voyce onely.

Tyndall. *Workes*, fol. 22. *Prologue on Deutoronomy.*

Therefore is his case both playn against Goddes open precept, & the
dispensacion straunge and withoute saumple, no cause appearing nor
wel *imaginable*.

Sir Thomas More. *Workes*, fol. 1193. *The second Booke of Com-
fort agaynst Tribulacion.*

The kynge enclyned well thereto, but the duke of Burgoyne, who
was sage and *ymagynatyue*, wolde nat agree therto.

Lord Berners. *Froissart. Cronycle*, vol. ii. ch. 181.

The Duke of Bretaygne was a subtile Prince and *ymaginatyfe*.

Id. Ib. ch. 206.

For men of warre inclosed in fortresses are sore *imagyners*, and
whan their *imaginacion* inclyneth to any yuell dede, they wyll craf-
tely colour it.

Id. Ib. ch. 167.

The whiles, some one did chaunt this lonely lay;

Ah see, whoso faire thing doost fain to see

In springing flowre the *image* of thy day.

Spenser. *Faerie Queene*, book ii. can. 12.

Egwin the monke (after made bishop) had a vision from God,
wherin he was admonished to set up the *image* of the mother of God
in his Church. The matter was debated; and brought before the
Pope in his See Apostolike: there Egwin was sworne to the truth of
his vision. Thereupon Pope Cōstantinus sent his Legate Boniface
into England; who called a counsell at London; wherein, after prooffe
made of Egwin's vision, there was an act made for *image-worship*.
Hall. Works, vol. ii. part ii. fol. 23. *The Old Religion*, ch. x. §. 1.

Praxiteles was ennobled for a rare *imager*, and cutter of stones
and marble: hee eternised his memoriall by making one *image* of
Venus, for the Gnidian, so lively, that a certaine young man became
so amorous of it, that he doted for love thereof, and went besides
himselfe.

Holland. *Plinie*, vol. i. fol. 175.

And there beside of marble stone was built

An altar, carv'd with cunning *imagery*,

On which true Christians bloud was often spilt,

And holy martyrs often doen to die,

With crewell malice and strong tyrannie.

Spenser. *Faerie Queene*, book i. can. 8.

Therefore he her did court, did serue, did wooe,

With humblest suit that he *imagine* mot,

And all things did deuise, and all things doo,

That might her loue prepare, and liking win theretoo.

Id. Ib. book iv. can. 2.

Produce any rule of nature, or naturall justice, by which inferior
criminals ought to be punished, but kings and princes go unpunished;
and not only so, but tho' guilty of the greatest crimes *imaginable*,
be had in reverence and almost adored.

Milton. *Works*, vol. i. fol. 497. *A Defence of the People of England.*

Hence Story is full of the wonders it works upon hypochondrical
imaginants; to whom the grossest absurdities are infallible certainties,
and free reason an impostour.

Glanvil. *The Vanity of Dogmatizing*, ch. xi.

And (we will enquire) what the force of *imagination* is; either
upon the body *imagent*, or upon another body.

Bacon. *Natural History*, Cent. 10.

Let others sing of knights and palladines,

In aged accents, and untimely words;

Paint shadows in *imaginary* lines,

Which well the rich of their high wits records.

But I must sing of thee, and those fair eyes.

Daniel. *Sonnet 52.*

The advantages of princes are, we see,

But things conceiv'd *imaginarily*:

For ev'ry state of fortune, in degree,

Some *image* hath of principality.

Id. History of Civil Wars, book viii.

Whereas the *imagine* facultie of other living creatures is un-
movable, and alwaies continueth in one: in all it is alike, and the

same still in every one, which causeth them alwaies to engender like *IMAGE*.
to themselves, each one in their several kind.

Holland. *Plinie*, vol. i. fol. 161.

Now our simple apprehension of corporal objects, if present, we
call sense; if absent, we properly name it *imagination*.

Glanvil. *The Vanity of Dogmatizing*, ch. xi.

Perhaps to highten your fancy in writing, you are wont to sit in your
doctor's scarlet, which, through your eyes infecting your pregnant
imaginative with a red suffusion, begets a continual thought of blush-
ing.

Milton. *Works*, vol. i. fol. 99. *Animad. upon Rem. Def. &c.*

The faculty and power of sense is proper to the soule, the instru-
ment belongeth to the body; but both the one and the other apprehendeth
external things, by the means of the *imaginative* faculty, or
the phantasie.

Holland. *Plutarch*, fol. 683.

Others think also, that these *imagers* invented that they spake of
their own heads.

Sir Thomas North. *Plutarch*, fol. 121. *Camillos*

If good? why doe I yeild to that suggestion

Whose horrid *image* doth infixe my heire,

And make my seated heart knock at my ribbes,

Against the vse of nature? Present feares

Are lesse then horrible *imaginings*.

Shakspeare. *Macbeth*, fol. 133.

Though *image-breakers*, foes to Papall power,

In whose vast minde, Religion's part was least.

Stirling. *Doomes-day. The Ninth Hour.*

For the wives he married, there is no mention made of the first,
saving that Cephisodotus the *image graver* was her brother.

Sir Thomas North. *Plutarch*, fol. 629. *Phocion.*

Phideas the *image maker* (as we have told you before) had under-
taken to make the *image* of Pallas. *Id. Ib. Pericles*, p. 145.

His [Raphael] departure from before the throne, and his flight thro'
the quires of angels, is finely *imaged*. *Spectator*, No. 327.

That the mountains are pleasant objects to behold, appears, in that
the very *images* of them, their draughts and landskips are so much
esteemed.

Ray. *Of the Creation*, part ii.

"And whence," said I, "canst thou have dread or pain?

What can thy *imagery* of sorrow mean?

Secluded from the world and all its care,

Hast thou to grieve or joy, to hope or fear?"

Prior. *Solomon*, book ii. *Pleasure.*

Many men, who now are conscious and willing to acknowledge,
that they act contrary to all the reasonable evidence and convictions
of religion; are nevertheless very apt to *imagine* within themselves,
that if the great truths of religion were proved to them by some
stronger evidence, they *should* by that means be worked upon, to act
otherwise than they do. *Clarke. On the Attributes*, p. 450.

No man who reads Josephus's History of that dreadful and unpa-
ralleled calamity, (the destruction of Jerusalem,) can, without the
greatest obstinacy *imaginable*, doubt of Our Saviour's divine fore-
knowledge. *Id. Ib.* p. 391.

We found it so exceeding (and scarce *imaginably*) difficult a matter,
to keep out the air from getting at all in at any imperceptible hole or
flaw.

Boyle. *Works*, vol. i. p. 10. *New Experiments touching the Spring
of Air.*

The vaulted isles, and shrines of *imag'd* saints,

The caverns worn by holy knees appear'd,

And to the sun were op'd.

Warton. *Eclogue 4.*

The dauntless maid with hardy step explor'd

Each room, array'd in glistering *imagery*;

And thro' the enchanted chamber, richly stor'd,

Saw Cupid's stately maske come sweeping by.

Id. Ode 5.

These properties [of being] Mr. Addison had reduced to three
general classes of greatness, novelty, and beauty; and into these we
may analyse every object, however complex, which, properly speak-
ing, is delightful to the *imagination*.

Akenside. *Pleasures of Imagination. The Design.*

Poetry, however, in its antient original condition, was perhaps
more vigorous than it is in its modern state. It included then, the
whole burst of the human mind; the whole exertion of its *imaginative*
faculties *Blair. Lecture 38.*

IMAGE. When time shall once have laid his lenient hand on the passions and pursuits of the present moment, they too shall lose that imaginary value which heated fancy now bestows upon them.
 IMBARK. Blair. Sermon 3. vol. ii.

Pope Gregory II. sided with the *image-mongers*.
 Jortin. Remarks on Ecclesiastical History, vol. iii. p. 188.

The History of the *image-war* is written by Maimbourg, more Maimburgiano, that is, with flagrant insincerity, and a multitude of misrepresentations.
 Id. Ib.

IMATIDIUM, in Zoology, a genus of Tetramerous Coleopterous insects, belonging to the family Crioceridæ, established by Fabricius, and forming the passage from Hispa to Cassida.

Generic character. Body nearly orbicular, shield-shaped; thorax recurved, the head on a deep anterior neck; antennæ cylindrical.

These insects are proper to the warmer parts of South America. They are generally ornamented with five colours, and sometimes their thorax and elytra are ornamented with various-shaped projections, which give them an extraordinary appearance. The type of the genus is *I. Leayanum* of Latreille, figured in his Genera of Insects, pl. xi. fig. 7, and named after Mr. M'Leay, the late Secretary of the Linnæan Society.

IMBALM, commonly now written *Embalm*, q. v.

Many a man lives a burden to the earth; but a good book is the precious life-blood of a master-spirit *imbalm'd* and treasur'd up on purpose to a life beyond life.

Milton. Works, vol. i. fol. 143. Of Unlicens'd Printing.

IMBAR, commonly written *Embar*, q. v.

There are no mighty mountains interpos'd
 Between thy beams and us, t' *imbar* thy light.
 Danici. To the King's Majesty.

Howbeit, they would hold vp this Salique law,
 To *barre* your highnesse clayming from the female,
 And rather chuse to hide them in a net,
 Then amply to *imbarre* their crooked titles,
 Vsurpt from you and your progenitors.
 Shakspeare. Henry V. fol. 71.

IMBARGO, now commonly written *Embargo*, q. v.

That the public service might not suffer by any delay that could be avoided, the Commissioners of Parliament caused an *imbargo* to be laid upon all the vessels then in harbour.

Ludlow. Memoirs, vol. ii. p. 219.

An IMBARGO, which word appears to be borrowed from the Spanish *embargo*, as it is often written in English also, is an arrest upon ships or merchandise in port, by authority. By 27 Edward III. c. 17. in case of any public dispute with a foreign Power, the merchants of that Power were to have forty days' notice, in order that they might sell their goods and depart. We know not at what period the contrary usage became common; but the ships of foreign nations are now generally seized upon the breaking out of a War. Ships, also, whatever colours they may carry, sometimes under an Imbargo have their merchandise taken out, and are pressed into the service of an expedition. The Royal Proclamation for an Imbargo in time of War is equally binding with an Act of Parliament. In time of Peace the power is doubtful, and whenever it has been exercised it has been accompanied with an Act of Indemnity.

IMBARK, more commonly written *Embark*, q. v.

First *imbarking* my selfe in a good shyppe of yours, named the Swallow, at Grauesend, hauing a faire and good winde, our anker then weyd, and committing all to the protection of our God.

Hakluyt. Voyages, &c. vol. i. fol. 343. M. Anth. Jenkinson.

Philopœmen being advertised therof, *imbarqued* his men suddenly and set upon his enemies ere they wist it, or had any thought of his coming.

Sir Thomas North. Plutarch, fol. 311. Philopœmen.

I know not by whose order, but we marched away and left them burning; at the brest-work we *imbarked* into our canoas and returned aboard our ships.

Dampier. Voyages, Anno 1685.

The Parliament being *imbarked* in the same vessel, would find it necessary, as well for their own security as for that of the people, to leaue the sword in faithful hands at the time of their dissolution.

Ludlow. Memoirs, vol. ii. p. 291.

IMBARREN, also written *Embarren*, q. v.

The most generous and vigorous land will in time be *imbarrened*, when always pinched with the plough, and not permitted to slumber at all, and lie fallow some competent time.

Fuller. Worthies. Gloucestershire.

IMBA'SE, } Also written *Embase*, q. v.
 IMBA'SING, n. }

Now in all this humble shew and lowliness of his he did not so much *imbase* his dignity and greatness, which the common people thought him to have at the first; as he did thereby cut off envy from him, winning again as much true authority, as in semblance he would seem to have lost.

Sir Thomas North. Plutarch, fol. 86. Publicola.

Martius also, though it liked him nothing to see the greatness of the people thus increased, considering it was to the prejudice and *imbasing* of the nobility, and also saw that other noble patritians were troubled as well as himself: he did persuade the patricians, to shew themselves no less forward and willing to fight for their country, than the common people were.

Id. Ib. fol. 187. Coriolanus.

If any be but partly adulterated, preserve the good portion by purifying it (by the cupel or some other fit way) from the falsifying alloy, by whose admixture it has been *imbased*.

Boyle. Works, vol. i. p. 591. Preface to Chymical Principles.

IMBASTARDIZED, degenerate,—as *bastards*, or base-born;—as spurious offspring.

Except some few who yet retain in them the old English fortitude and love of freedom, and have testify'd it by their matchless deeds, the rest *imbastardiz'd* from the ancient nobleness of their ancestors, are ready to fall flat and give adoration to the image and memory of this man.

Milton. Works, vol. i. fol. 363. An Answer to Eikon Basilike.

IMBATHE, also written *Embathe*, q. v.

Methinks a soveraigne and reviving joy must needs rush into the bosome of him that reads or hears; and the sweet odour of the returning Gospel *imbath* his soul with the fragrance of heaven.

Milton. Works, vol. i. fol. 2. Of Reformation in England.

Who [Nereus] piteous of her woes, rear'd her lank head,
 And gave her to his daughters to *imbathe*
 In nectar'd lavers strow'd with asphodil.

Id. Comus, l. 837.

IMBATTLE, also anciently, and now usually written *Embattle*, q. v.

In expressing the counsailes, deuises, conuentiōs, progressions, enterprises, exploitures, fourmes, and facions of *imbataylynge*, he seemeth to put all other wryters of lyke matters to sylence.

Sir Thomas Elyot. The Governour, book i. ch. xxi.

But he nat knowynge, but that they came to endomage hym, armed hymselfe and suche seruantes as he then hadde with him, and dysposed theym aboute the *imbatylmentes* of his house.

Id. Ib. book ii. ch. ii.

Huge hosts of thoughts *imbattled* in my breast,
 And ever busied with intestine warres,
 And like to Cadmus' earth-borne troupes at iarres,
 Haue spoil'd my soul of peace, themselves of rest.

Stirling. Aurora. Sonnet 6.

Let them gather themselves, and be scatter'd; let them *imbattel* themselves, and be broken; let them *imbattel*, and be broken, for thou art with us.

Milton. Works, vol. i. fol. 29. Of Reformation in England.

IMBAY.

IMBAY, also written *Embay*, *q. v.* by Hakluyt.IMBEL-
LISH.The 14 day in the morning we were so *imbayed* with ice, y^t we were constrained to come out as we went in.*Hakluyt. Voyages, &c.* vol. i. fol. 447. *Pet and Jackman.*In the evening it pleased God to giue vs for the space of one quarter of an houre cleare weather, by which we found ourselues to be *imbayed*. *Id. Ib.* vol. iii. fol. 199. *M. Charles Leigh.*IMBE/CILE, *v.* } Fr. *imbecille*; It. *imbecille*; Sp.IMBE/CILE, *n.* } *imbecil*; Lat. *imbecillis*, or *imbe-*IMBE/CILITY. } *cillus*, from *baculus*, a staff; because he leans upon a *staff*, who is weak or infirm of foot. *Vossius.*Leaning or relying upon, and, thus, needing or in want of, a stay or support; and as the Fr. *imbecille*, "Weak, feeble, strengthlesse, faint, forcelesse." *Cotgrave.*To *imbecile*; to weaken, to enfeeble.

Of this full well thou art resolute
before kyng Tullie gan
So tyrannous a monarchie
imbecelyng freedome, than
By vertues spray, the basest borne
might be the noblest man.

Drant. Horace. Satire 6.

Those wryng, and wrest the meaner sorte,
whose myndes and tongues are free,
And so *imbecill* all theyr strengthe,
that they are naught to me.

*Id. Ib. Satire 5.*The seconde plage of the seconde angell, as the seconde iudgemente of God againste the regiment of Rome, and this is *imbecelynge* and dimynyshe of their power and dominion, many landes and people fallynge from them. *Udall. Reuelacion*, ch. xvi.Christes bodye and bloude is in deade a substance there present, by Goddes omnipotencye onely to be comprehended by fayth, so far as may be vnderstanded of mannes weaknes and *imbecillyte*. *Stephen, Bishop of Wynchester. Of Transubstantiation*, fol. 104.Euen so sith we are not of power and habilitie to performe the law of God, and yet beare a good hart towards God and his law, lamentyng our *imbecillitie* that we can do him no further pleasure: then will God recount vs not as his enemyes, but as his deare children and beloued frendes.*Frith. Workes*, fol. 31. *An Aunsweare agaynst Rastel's Dialogue.*Princes must in a special manner be guardians of pupils and widows, not suffering their persons to be oppressed, or their states *imbezill'd*, or in any sense be exposed to the rapine of covetous persons. *Taylor. Holy Living*, ch. iii. sect. 2.It is a sad calamity, that the fear of death shall so *imbecil* man's courage and understanding, that he dares not suffer the remedy of all his calamities. *Id. Holy Dying*, ch. iii. sect. 7.

And thereupon in sorrow thus complain:

"What wondrous inconvenience do they feel,
Where as such *imbecility* doth reign,
As so neglects the care of commonweal?"

Daniel. History of Civil Wars, book v.We in a manner were got out of God's possession: were, in respect to him, become *imbecile* and lost.*Barrow. Workes*, vol. ii. *Sermon 22.*Clemency is produced by magnanimity and fearlessness of dangers, so is cruelty by cowardice and fear, and argues not only a depravedness of nature, but also a meanness of courage and *imbecillity* of mind.*Sir Wm. Temple. Workes*, vol. iii. p. 164. *Introduction to the History of England.*And as it always happens in this kind of officious universal interference, what began in odious power, ended always, I may say without an exception, in contemptible *imbecility*.*Burke. Thoughts on Scarcity.*

IMBE/LLISH, } Also anciently, and now com-

IMBE/LLISHMENT. } monly, written *Embellish*, *q. v.*When we see our garden *imbellished* with flowers, the earth is full of the goodness of the Lord.*Ha'll. Workes*, vol. iii. fol. 472. *The Devout Soul*, sec. 3.They should lay away all delicate, wanton, and costly *imbellishments* of the body, and acquaint themselves with simple and plaine attire. *Holland. Plutarch*, fol. 720.Jews and Gentiles might have good cause to be assur'd, that God whenever he meant to reform his Church, never intended to leave the government thereof delineated here in such curious architecture, to be patch'd afterwards, and varnish'd over with the devices and *imbellishings* of man's imagination.*Milton. Works*, vol. i. fol. 43. *The Reason of Church Government*, book i. ch. ii.Indeed, from such people, nothing (as they think) comes gracefully, unless it be *imbellished* with the ornament of some silly word they have taken up, either a round oath or a curse, or the corruption of one, or something that is near akin to it.*Sharpe. Works*, vol. iv. *Sermon 18.*By this plain and unadorned way of writing, I unkindly deny my essays many *imbellishments*, which I might give them, and which perhaps you will think they do abundantly need.*Boyle. Works*, vol. i. p. 317. *On Experimental Essays in General.*

IMBE/ZZLE, }

IMBE/ZZLING, }

IMBE/ZZLEMENT. }

Also anciently, and now more commonly, written *Embezzle*, *q. v.* Fr. *embler*; to steal, filch, lurch, pilfer, nim, purloin, *imbezel*, convey away. *Cotgrave.*They w^t in a fewe dayes after had caused a golden cup to be purposely conveyed out of the waye: which y^e ministers hauyng *imbe-seled*, made complaint vnto Alexander for the losse therof.*Brende. Quintus Curtius*, book ix. fol. 275.Which the whole army by consent agreed to present unto Marius, excepting nothing, saving, that which was *imbezzelled* and conueighed away underhand.*Sir Thomas North. Plutarch. Caius Marius.*The issues, fines, amerciaments, which shall happen to be made, and all forfeitures which shall happen before you, you shall cause to be entered without any concealment or *imbezling*, and send to the Court of Exchequer.*Milton. Works*, vol. i. fol. 339. *Observations on Peace between the Earl of Ormond and the Irish.*But first I must require you to use diligence in presenting especially those purloinings and *imbezlements*, which are of plate, vessell, or whatsoever within the king's house.*Bacon. Works*, vol. ii. p. 557. *Judicial Charge upon the Commission for the Verge.*I have this day erected a Court of Alienation, by the Statutes of which the next akin is empowered to beg the parts and understanding of any such person as can be proved, either by *imbezelling*, making a wrong use, or no use at all of the said parts and understanding, not to know the true value thereof.*Tatler*, No. 302.Felony by *imbezling* or destroying the King's armour or warlike stores is, in the first place, so declared to be by Stat. 31 Eliz.—Other inferior *imbezlements* and misdemeanors that fall under this denomination, are punished by Statutes 9 and 10 Wil. III. &c.*Blackstone. Commentaries*, book iv. ch. vii.

IMBI/BE, }

IMBIBITION. }

Fr. *imbiber*; It. *imbevere*; Sp. *em-beber*; Lat. *imbibere*; (*in*, and *bib-ere*, to drink;) to drink in.

To drink in, to suck in: generally, to draw or take in.

Which [the German tongue] he will find very difficult and with much regret, and many conflicts attained unto, after the facile and more smooth languages are once thoroughly *imbibed*, not omitting (comparatively) even the French itself.*Evelyn. Miscellaneous Writings*, p. 50. *The State of France. Lewis XIV.*After this *imbibition*, when that the frumentie hath thus drunk up all the water, there must be added thereto a sextar of ewe's milke, or goat's milke, and in the end a little honey.*Holland. Plinie*, vol. ii. fol. 139.Sweet-breads and collops were with skewers prick'd
About the sides; *imbibing* what they deck'd.*Dryden. Homer. Iliad*, book i.IMBEL-
LISH.

IMBIBE.

IMBIBE. If this leather were a substance as little obnoxious to corruption as a sponge, it would, by its copious *imbibitions*, and emissions of the aërial moisture, be a fitter matter, than any other I had employed, for a hygroscope.

Boyle. *Works*, vol. iii. p. 789. *A Statical Hygroscope, &c.*

Here the wild horse, unconscious of the rein,
That revels boundless o'er the wild campaign,
Imbibes the silver surge, with heat opprest,
To cool the fever of his glowing breast.

Blacklock. *Psalm* 1.

IMBITTER, see EMBITTER. A. S. *biter-ian*, from *bit-an*, to bite.

To cause to be biting, piercing, pungent; and, thus, painful; destroying the ease, pleasantness, or sweetness.

We beseech Almighty God to stir up the hearts of all his people professing the orthodox religion, to resolve upon the common defence of themselves, and the mutual assistance of each other against their *imbittered* and most implacable enemies.

Milton. *Works*, vol. ii. fol. 189. *Letters of State*, June 8th, 1655.

Unhappy parent of a short-liv'd son,
Since Jove in pity by thy prayers was won
To grace my small remains of breath with fame,
Why loads he this *imbitter'd* life with shame?

Dryden. *Homer. Iliad*.

Samson challenges him to the combat; and after an interchange of reproaches, elevated by repeated defiance on one side, and *imbittered* by contemptuous insults on the other, Harapha retires.

Johnson. *The Rambler*, No. 139.

IMBLA'ZE, } Also anciently, and now perhaps
IMBLA'ZON, v. } more commonly, written *Emblaze*,
IMBLA'ZONRY. } *q. v. en*, and *blaze*, *q. v.* As applied
by Milton,

To adorn with the heraldic *blazonry* of arms.

Who forthwith from the glittering staff unfurl'd
Th' imperial ensign, which full high advanc'd
Shon like a meteor streaming to the wind
With gemms and golden lustre rich *imblaz'd*,
Seraphic arms and trophies.

Milton. *Paradise Lost*, book i. l. 543.

Or in their glittering tissues bear *imblaz'd*
Holy memorials, acts of zeal and love
Recorded eminent.

Id. *Ib.* book v. l. 592.

Or to describe races and games,
Or tilting furniture, *imblazon'd* shields,
Impresses quaint, caparisons and steeds.

Id. *Ib.* book ix. l. 34.

Him round
A globe of fierce seraphim inclos'd
With bright *imblazonrie*, and horrent arms.

Id. *Ib.* book ii. l. 513.

Sudden a burst of brightness smote my sight,
From arms, and all th' *imblazonry* of war
Reflected far.

Warton. *Eclogue* 5.

IMBODY, also anciently, and now commonly, written *Embody*, *q. v.*

For never since created man,
Met such *imbodied* force, as nam'd with these
Could merit more than that small infantry
Warr'd on by cranes.

Milton. *Paradise Lost*, book i. l. 579.

The soul grows clotted by contagion
Imbodies, and imbrutes, till she quite lose
The divine property of her first being.

Id. *Comus*, l. 468.

The saline parts of aqua-fortis being *imbodied* in the metals, and of a very fusible nature, impart that easiness of fusion to the metals they are mixed with.

Boyle. *Works*, vol. iv. p. 280. *The Chemist's Doctrine of Qualities*.

IMBOLDEN. So written in the first folio. Shakespeare. See EMBOLDEN.

Tis necessary he should dye:

Nothing *imboldens* sinne so much, as mercy.

Shakspeare. *Timon of Athens*, fol. 88.

IMBORDER, to bound or confine with an edge or border. See BORDER.

Neerer he drew, and many a walk travers'd
Of stateliest covert, cedar, pine, or palme,
Then voluble and bold, now hid, now seen
Among thick-woven arborets and flours
Imborder'd on each bank, the hand of Eve.

Milton. *Paradise Lost*, book ix. l. 438.

IMBOSK, It. *imboscare*, to lie in ambush, to conceal or be concealed. See AMBUSH, and EMBOSS.

They fear the field of the scriptures, the chase is too hot; they seek the dark, the bushy, the tangled forest, they would *imbosk*.

Milton. *Works*, vol. i. fol. 13. *Of Reformation in England*.

[Sancho] said as much to his lord, requesting him to depart presently from thence and *imbosk* himself in the mountains.

Skelton. *Don Quixote*, book iii. ch. viii.

IMBOSOM, also anciently, and now commonly, written *Embosom*.

And ready now
To stoop with wearied wings, and willing feet
On the bare outside of this world, that seem'd
Firm land *imbosom'd* without firmament,
Uncertain which, in ocean or in air.

Milton. *Paradise Lost*, book iii. l. 75.

IMBOSS, also anciently, and now more usually, written *Emboss*, *q. v.*

I suppose (excepte I be moche deceyued) thou seest me nat stare with myn eyen, or my mouth *imbosed*, or the colour of my face chaunged, or any other deformitie in my persoue or gesture.

Sir Thomas Elyot. *The Governour*, vol. iii. ch. xx.

But on this target smothe, dame Io standes, with hornes upright,
Imboasid pure in gold, euen like a cowe, with hear in sight.

Phaer. *Aeneidos*, book vii. sig. X.

Hermitee liue secure
Obscure in rouses *imbost*.

Warner. *Albion's England*, book v. ch. xxvii.

For on the shore the hunters him attend,
And whilst the chase grew warm as is the day,
(Which now from the hot zenith does descend)
He is *imbos'd*, and weary'd to a bay.

Davenant. *Gondibert*, book i. can. 2.

This dried mixture (will) be a good while after it is perfectly cold not only soft, but so near to fluid, that I have cast it into moulds, and made *imbossed* images of it.

Boyle. *Works*, vol. i. p. 439. *The History of Firmness*.

Though it be credible that their great law-giver interdicted the use of hieroglyphic characters, yet the ideas of them were deeply imprinted on their minds, and came out on every occasion, in those symbols and emblems, with which, under the names of riddles, parables, and dark sayings, their writings are so curiously variegated and *imbossed*.

Hurd. *Works*, vol. v. p. 241. *Sermon* 9.

IMBOW, usually written *Embow*, *q. v.*

For *inbowed* windows, I hold them of good vse; (in cities indeed, upright do better, in respect to uniformity towards the street;) for they be pretty retiring places for conference; and besides, they keep both the wind and sunne off.

Bacon. *Essay* 45. *Of Building*.

IMBOWER, also written *Embower*, *q. v.*

Thick as autumnal leaves that strow the brooks
In Vallombrosa, where th' Etrurian shades
High overarch't *imboure*.

Milton. *Paradise Lost*, book i. l. 309.

IM-
BOLDEN.

IM-
BOWER.

IMBOWER.

IM-
BRIGHT-
ENED.

But far beyond Menestheus' mark it took
Its stand, and, as portending ruin, shook
The pillars that support the sylvan scene,
And shady roof, *imbower'd* with living green.
Lewis. Statius, book vi.

IMBRACE, also anciently, and now usually, written
Embrace, *q. v.*

There, with great ioyance and with gladsome glee,
Of faire Pœana I receiued was,
And oft *imbrac't*, as if that I were hee
And with kind words accoyd, vowing great loue to mee.
Spenser. Faerie Queene, book iv. can. 8.

Hence they *imbrace* not vertue for itself but its reward; and the
argument from pleasure or utility is far more powerfull, then that from
vertuous honesty.

Sir Thomas Brown. Vulgar Errours, book i. ch. iii.

Her lips, most happy each in other's kisses
From their so wisht *imbracements* seldom parted,
Yet seem'd to blush at such their wanton blisses.
Spenser. Britannia's Ida, can. 3.

They are both able to enquire after truth, and ready to *imbrace* it
by whomsoever and on what occasion soever it is presented them.
Boyle. Works, vol. i. p. 468. Physiological Considerations.

IMBRAID, also written *Embraid*, *q. v.* equivalent to
upbraid, *q. v.*

Yet he thought it best to dissimule the matter, tyll suche a tyme
were come as he might fynde the kyng without strēth, and then to
imbrayd hym wyth the pleasure that he had done for him.

Hall. Edward IV. The fourth Yere.

IMBRANDED, perhaps armed with *brands*.

She ended, and the heav'nly hierarchies,
Burning in zeal, thickly *imbranded* were;
Like to an army that alarum cries,
And every one shakes his ydreaded spear.
G. Fletcher. Christ's Victory and Triumph.

IMBRANGLE, to entwist, entwine, or entangle. See
BRANGLE.

Untill with subtle cobweb-cheats
They're catch'd in knotted law, like nets:
In which, when once they are *imbrangled*,
The more they stir, the more they're tangled.
Butler. Hudibras, part ii. can. 2.

IMBRED, see, *infra*, **INBRED**.

Sithence then to be wise, that is, to search the truth is a disposition
imbred in every man, they debarre themselves of wisdom, who
without any examination approue the inuentions of their ancestours,
and like vnreasonable creatures, are wholly led by others.

Hakewill. Apologie, book iii. sec. 4. fol. 288.

IMBRICARIA, in *Botany*, a genus of the class
Pentandria, order *Monogynia*, natural order *Sapotæ*.
Generic character: corolla, petals five; stigma capi-
tate; capsule covered by the calyx, two-celled, many-
seeded.

Two species, natives of New South Wales.

IMBRICATION, from the Lat. *imbrex*, *icis*; a
gutter-tile for carrying off rain, (*imber*);

A hollow, or concavity, like that of a gutter-tile.

And let us consider that all is covered and guarded with a well-
made tegument, beset with bristles, adorned with neat *imbrications*,
and many other fineries.

Derham. Physico-Theology, book viii. ch. vi.

IMBRIGHTENED, *in*, and *brighten*, *q. v.*

Whose garment was before indipt in blood,
But now *imbright'ned* into heav'nly flame,
The sun itself outglitters, though he should
Climb to the top of the celestial frame,
And force the stars go hide themselves for shame.
G. Fletcher. Christ's Triumph after Death.

IMBROIDERY. See **EMBROIDER**.

Who led from room to room amazed is to see
The furnitures and states which all *imbroideries* be.
Drayton. Poly-olbion, song 26.

IMBROL-
DERY.

IMBRUTE.

IMBROIL, also anciently, and now usually, *Embroid*,
q. v.

My fancies straight againe *imbroyle* my state,
And in a moment make me glad and sad.
Stirling. Aurora. Sonnet 6.

IMBROTHEL, dwelling in a *brothel*. See **Bro-
THEL**.

But men, which choose
Law practice for mere gain, bold souls repute
Worse than *imbrothel'd* strumpets prostitute.
Donne. Satire 1.

IMBROWN, also written *Embrown*, *q. v.*
To render *brown*; to give a *brown* hue or colour;
the hue or colour of any thing *burned*.

Nature boon
Pour'd forth [flours] profuse on hill and dale and plaine,
Both where the morning sun first warmly smote
The open field, and where the unpierc't shade
Imbrown'd the noontide bow'rs.
Milton. Paradise Lost, book iv. l. 246.

For time shall with his ready pencil stand;
Retouch your figures with his ripening hand;
Mellow your colours, and *imbrown* the teint;
Add every grace, which time alone can grant.
Dryden. Epistle 14.

The pine and oak's huge sinewy roots uptorn,
And from their beds the dusky sands, upborne
On the rude whirlings of the billowy sweep,
Imbrown the surface of the boiling deep.
Mickle. Lusiad, book vi.

IMBRUE, anciently, and now, also, written *Embrue*,
q. v. To moisten, to soak, to steep, to drench.

[Mine eyes] that long haue had my loue in chase,
With teares no more *imbrue* your mistresse face
But to your springs retyre.
Turbervile. The Louer hoping assuredly, &c.

Whose manly hands *imbrew'd* in guilty blood
Had neuer been, ne euer by his might
Had throwne to ground the vnregarded right.
Spenser. Faerie Queene, book i. can. 7.

The Senate consulting together, sent Ambassadors unto Cinna and
Marius, to pray them to come peaceably into Rome, and not *imbrue*
their hands with the blood of their citizens.
Sir Thomas North. Plutarch, fol. 368. Caius Marius.

The favour of God is the very life of the creature; and if the devil
can but prevail with a man to sin himself out of it, he prevails with
him to cut his own throat, and to *imbrue* his hands in the blood of
his own soul.
South. Sermons, vol. viii. p. 42.

He view'd the Pagan's gaping wounds, he view'd
His side and thigh with purple streams *imbru'd*,
And hop'd, with ebbing strength, he soon must yield
To him the glory of the well-fought field.
Hoole. Orlando Furioso, book xli. l. 118.

IMBRUTE, to *brutify*, to reduce to the state of
condition of a *brute*.

See **EMBRUTE**, and the second citation under **IMBOD**.

A foule discent! that I who erst contended
With Gods to sit the highest, am now constrain'd
Into a beast, and mixt with bestial slime,
This essence to incarnate and *inbrute*,
That to the height of Deity aspir'd.
Milton. Paradise Lost, book ix. l. 167.

IMBRUTE.

IMITATE.

Had mobs distinguished, they who howl'd thy fame,
The icicle from the pure diamond's flame,
From Fancy's soul thy gross imbruted sense,
From dauntless Truth thy shameless insolence.

Beattie. *The Judgment of Paris.*

IMBRYNG, see EMBER-DAYS. Minshew also writes it *imber*.

They faste the holy *imbrynge* dayes.

Bale. *Image*, p. 3. sig. C. c.

IMBUD, to *bud*, to throw or thrust forth *buds*.

What a return of comfort dost thou bring,
Now at this fresh returning of our blood;
Thus meeting with the op'ning of the Spring,
To make our spirits likewise to *imbud*.

Daniel. *To the King's Majesty.*

IMBUE, Lat. *imbuer*; from the ancient *buere*, (says Vossius,) existing only in composition; and *buere*, from the Gr. *βύειν*, to fill. *Imbutum est, quod cujuspiam rei succum bibit*; that which has drunk the juice of any thing.

To steep or soak; to stain or die.

What fell Erynnis with hot burning tongs,
Did gripe your hearts, with noysome rage *imbew'd*,
That each to other working cruell wrongs,
Your blades in your own bowels you embrew'd?

Spenser. *The Ruines of Rome*, by Bellay, st. 24.

They satiate, and soon fill,
Though pleasant; but thy words, with grace divine
Imbu'd, bring to their sweetness no satietie.

Milton. *Paradise Lost*, book viii. l. 216.

Copper plentifully dissolved in aqua-fortis, will *imbue* several bodies with the colour of the solution.

Boyle. *Works*, vol. i. p. 782. *Experimental History of Colours.*

She [the mind] should *imbue* the tongue with what she sips,
And shed the balmy blessing on the lips,
That good diffus'd may more abundant grow,
And speech may praise the pow'r that bids it flow.

Cowper. *Conversation.*

IMBUSHMENT, *i. e.* *ambushment*.

He with an *imbushment* of Englishmen laye in a valey nye to the fortresse.

Hall. *Henry VI. The nineteenth Yere.*

IMGRAM, doleful, harassed. See GRAM.

A patrone of a benefice will haue a poore *ymgrame* soule, to beare the name of a parson, for twentie marke or ten pound: and the patrone himself will take vp for his snapshare, as good as an hundred marke.

Wilson. *The Arte of Rhetorique*, fol. 37.

I'MITATE, } Fr. *imiter*; It. *imitare*; Sp. *imitar*; Lat. *imitor*, quasi *mimitor*,
I'MITABLE, } from *μιμηται*, the initial *m* omitted.
IMITATION, }
I'MITATIVE, } Vossius.

I'MITATOR, } To do or make any thing after
I'MITATORSHIP, } or in the manner of another, in the
I'MITATRIX. } likeness or resemblance of another;

To copy or counterfeit, to follow or pursue the mode or manner of another; to mimic.

For he that so receiue the bloude of hys Redemer, that he will not yet *imitate* and follow his passion, he hath put the bloude but vpon one post, whiche ought to be put vpon both the postes of the house.

Sir Thomas More. *Workes*, fol. 1346. *A Treatise vpon the Passyon.*

Wherby they do express theyr disposition, to the *imitation* of those thynges, be they good or yuel, which they vsually se or here.

Sir Thomas Elyot. *Governour*, book i. ch. iv.

There are three kinde of stiles in a poeme, ether actiue, ether *imitatiue* which Græcians call *Dramaticum*, wherin are persons brought in speaking, without speaking of the poet, such as tragædies, and comædies are.

Phaer. *The Lyfe of Virgill.*

O *imitators* seruyle beastes
how haue your tumultes vyle
Full oftens rasde my collar vp,
and oftens made me smyle.

Drant. *Horace. Epistle to Mecænas.*

Thence passing forth, they shortly doe arriue,
Wheras the bower of bliss was situate;
A place pickt out by choice of best aliue.
That Nature's worke by art can *imitate*.

Spenser. *Faerie Queene*, book ii. can. 12.

It matters not what Baronius says against Justinian, for Pope Hadrian IV., who is much more to be credited, commends him, and propounds him as a great example *imitable* by all Princes.

Taylor. *Rule of Conscience*, fol. 556. *Of Supreme Civil Powers*, book iii. ch. iii. rule 5.

Imitation is a facultie to expresse liuelie and perfitelie that example, which ye go about to folow.

Ascham. *Works*, fol. 296. *The Scholemaster.*

They [the Parliament] knew the King to have been always their most attentive scholar and *imitator*, and of a child have suck'd from them and their closet-work all his impotent principles of tyranny and superstition.

Milton. *Works*, vol. i. fol. 427. *An Answer to Eikon Basilike.*

My soul adores judicial scholarship,
But when to servile *imitatorship*,
Some spruce Athenian pen is prentized,
'Tis worse than apish.

Marston. *Scourge of Villainie*, iii. 9.

Why, friend, they either are men's souls themselves
Or the most wittie *imitatrixes* of them
Or prettiest sweet apes of humane soules,
That ever Nature fram'd.

Sir Gyles Goosecappe, (1606,) act 3. sc. 1.

Acts of benevolence and love
Give us a taste of heaven above;
We *imitate* th' immortal powers,
Whose sun-shine, and whose kindly showers,
Refresh the poor and barren ground,
And plant a Paradise around.

Somerville. *Fables. The Faithful Minister.*

I have followed him every where, I know not with what success, but I am sure with diligence enough: my images are many of them copied from him, and the rest are *imitations* of him.

Dryden. *Prose Works*, vol. iii. p. 326. *Letter to Sir R. Howard.*

Fat crumbling earth is fitter for the plough,
Putrid and loose above, and black below;
For ploughing is an *imitative* toil,
Resembling nature in an easy soil.

Dryden. *Virgil. Georgics*, book ii.

Vices in Poets, Wits, and Kings,
Are catching *imitable* things.

Lloyd. *A Familiar Epistle to a Friend.*

This primary or original copying, which in the ideas of Philosophy is *imitation*, is in the language of Criticism called invention.

Hurd. *Works*, vol. ii. p. 111. *Poetical Imitation*, sec. 1.

Were Rousseau alive, and in one of his lucid intervals, he would be shocked at the practical phrenzy of his scholars, who in their paradoxes are servile *imitators*; and even in their incredulity discover an implicit faith.

Burke. *Works*, vol. v. p. 309. *Reflections on the Revolution in France.*

IMMACULATE, } Fr. *immacule*; Sp. *immacu-*
IMMACULATENESS. } *lado*; It. *immaculato*; Lat. *im-*
maculatus, sine maculâ, without spot.

Without spot or blemish; spotless, unblemished, pure, unstained, undefiled.

The moste pure and *immaculate* lambe, the newe and true paschall lambe, offered hymselfe in the aultar of the crosse for vs to God the Father.

Udall. *Matthew*, ch. xxvi.

For to be just is to give every one his due; and how can endless unsupportable punishments be due to innocent spirits, who but the last moment came righteous, pure and *immaculate* out of their Creator's hands; and have not done or thought any thing since, contrary to his will or laws, nor were in any the least capacity of sinning?

Glanvil. *Preexistence of Souls*, ch. ii. sig. B. 4.

IMITATE.

IMMACU-
LATE.

IMMACU-
LATE.IMMA-
NENT.

Candour and *immaculatenesse* of conversation is required of such, as are sequestered for God, by some vow or consecration.

Mountague. *Devout Essaies, Treat.* 12. sec. 2.

So first to preach a white-glov'd chaplain goes,
With band of lily, and with cheek of rose,
Sweeter than Sharon, in *immac'late* trim,
Neatness itself impertinent in him.

Pope. *Satires of Donne*, sat. 4.

Had they maintain'd allegiance firm and sure,
And kept the faith *immaculate* and pure,
Then the proud eagles of all-conqu'ring Rome
Had found one city not to be o'ercome.

Cowper. *Expostulation*.

IMMAILED, clothed in *mail* or coats of *mail*.

Whilst their inhabitants, like herds of deere
By kingly lyons chas'd, fled from our armes
If any did oppose instructed swarms
Of men *immayl'd*: Fate drew them on to be
A greater fame to our got victory.

Brown. *Britannia's Pastorals*, book ii. song 4.

IMMALLEABLE, *in*, and *malleable*, from the Lat. *malleus*, a hammer.

That may not be *hammered*, or wrought, or beaten with the *hammer*—so as to spread.

Though it [aqua-fortis] make not a permanent solution of crude tin, it quickly frets the parts asunder, and reduces it to an *immalleable* substance.

Boyle. *Works*, vol. iv. p. 319. *Of Corrosiveness and Corrosibility*, exp. 11.

IMMANACLE, *in*, and *manacle*, *i. e.* bands or fastenings for the hands (*manus*) as *fet-ters* for the feet.

LAD. Fool, do not boast,
Thou canst not touch the freedom of my mind
With all thy charms, although this corporal rind
Thou hast *immanacled*, while heav'n sees good.

Milton. *Comus*, l. 665.

IMMA'NE, } Lat. *immanis*, *quia non bonus, sed*
IMMA'NELY, } *crudelis et terribilis*, because not good,
IMMA'NITY. } but cruel and terrible; *manis* from the ancient Lat. *manus*, *i. e.* *bonus*. See Vossius and Martinius. Isaac Vossius from *ἐμπάνης*, *furibundus*; from *μαίνεσθαι*, *furere*, to rave or rage. *Immane* is used as equivalent to

Fierce, cruel, terrible, barbarous. Cotgrave explains the Fr. *immanité*, *immanity*; *inhumanity*, cruelty, felness; *outrageousnesse*; *hugeness*, excessive greatness.

KING. I marry vnckle, for I alwayes thought
It was both impious and vnnaturall,
That such *immanity* and bloody strife
Should reigne among professors of one faith.

Shakspeare. *Henry VI. First Part*, fol. 114.

Morindus, his son by Tanguetela, a concubine, who is recorded a man of excessive strength, valiant, liberal, and fair of aspect, but *immanely* cruel.

Milton. *Works*, vol. ii. fol. 10. *History of England*, book i.

To forget all old *immanities*, what should I shew you the flames of our late Marian times.

Hall. *Works*, vol. ii. fol. 422. *The Defeat of Cruelty*.

Neither could so vast a design as the destruction of this empire have been undertaken by him, if the *immanity* of so many vices had not been covered and disguised by the appearances of some excellent qualities.

Cowley. *Essay 1. Of Liberty*.

What *immane* difference is there between the twenty-fourth of February, and commencement of March?

Evelyn. *Silva*, book i. ch. xviii. sec. 3.

IMMANENT, Lat. *immanens*, from *immanere*, to stay or remain in, (*in*, and *manere*, to stay or remain.)

Staying or remaining in; having no external effect. See the Quotations from South and Reid.

The internal and *immanent* faculties and acts of the reasonable soul (besides those of common sense, phantasie, memory, passion and appetite, common to men and inferior animals) are intellect and will.

Hale. *Origin of Mankind*, ch. i. p. 28.

We ascribe intellections, volitions, decrees, purposes, and such like *immanent* actions to that nature, which hath nothing in common with us, as being infinitely above us.

Glanvil. *The Vanity of Dogmatizing*, ch. xi. fol. 101.

It [the bare decree or purpose of a thing] is, as the schools call it, an *immanent* act; that is, such an one as rests wholly within God, and effects nothing without him.

South. *Sermons*, vol. viii. p. 88.

Logicians distinguish two kinds of operations of the mind; the first kind produces no effect without the mind; the last does. The first they call *immanent* acts; the second transitive. All intellectual operations belong to the first class; they produce no effect upon any external object.

Reid. *Essay 2*. vol. i. ch. xiv. p. 292.

IMMANIFEST, *in*, and *manifest*, *q. v.* Lat. *manifestus*, coming quickly to hand.

Not easily found or plainly seen, or appearing.

The Heathens (as Varro accounteth) make three distinctions of time: the first, from the beginning of the world unto the general deluge of Ogyges, they terme *Adelon*, that is, a time not much unlike that which was before time, *immanifest* and unknown.

Sir Thomas Brown. *Vulgar Errours*, book vi. ch. vi.

If the body were under any violence, it was exercised by usual, but often *immanifest* agents, though perhaps their compulsion were not less, but only less heeded.

Boyle. *Works*, vol. iii. p. 783. *A Paradox*.

IMMANTEL. See **EMMANTEL**.

The dewy night had with her frosty shade
Immantled all the world, and the stiff ground
Sparkled in ice.

G. Fletcher. *Christ's Triumph over Death*.

IMMARCE/SSIBLE, } Fr. and Sp. *immarcessi-*
IMMARCE/SSIBLY. } *ble*; Lat. *immarcessibilis*, from the Lat. *marcessere*, to wither or waste away.
Incorruptible, undecaying, unfading, unperishable.

Solomon's rich diadem of the pure gold of Ophir, is long since dust: these crowns of glory are *immarcessible*, incorruptible; beyond all the compass of time, without all possibility of alteration.

Hall. *Works*, vol. iii. fol. 981. *The Invisible World*, book iii. sec. 5.

Did not St. Peter himself say to all the Bishops of Pontus, Galatia, Cappadocia, Asia and Bithynia, that they should feed the flock of God, and the Great Bishop and Shepherd should give them an *immarcessible* crown?

Taylor. *The Liberty of Prophecy*, sec. 7.

The honour that now I reach at, is no less than a crown, and that not fading and corruptible, (as all these earthly diadems are,) but *immarcessibly* eternal. a crown of righteousness, a crown of glory.

Hall. *Works*, vol. iii. fol. 1002. *The Invisible World*, book iii. sec. 12.

That *immarcescible* crown, as St. Peter calls it, which the Gospel promises to them "who by patient continuance in well-doing, seek for glory and honour," will make a rich amends for the declining of a fading wreath here upon earth, where reputation is oftentimes as undeservedly acquired as lost.

Boyle. *Works*, vol. iv. p. 64. *Of Theology*.

IMMARTIAL, Lat. *in*, and *martialis*, warlike.
Unwarlike.

The helme-grac't Hector answer'd him; Renowned Telamon,
Prince of the souldiers came from Greece; assay not me like one,
Yong and *immartiall*, with great words, as to an Amazon dame.

Chapman. *Homer. Iliad*, book vii. fol. 100.

Whom by powres are vnfit, to verge so farre,
My selfe *immartiall*.

Id. *Ib. Odyssey*, book ii. fol. 19.

IMMASK, to cover as with a *mask*, to conceal or disguise. See **MASK**.

IMMA-
NENT.

IMMASK.

IMMASK I have cases of buckram for the nonce, to *immaske* our noted outward garments.

IMMATE RIAL. *Shakspeare. Henry IV. First Part, fol. 50.*

IMMATCHABLE, not to be *matched*, or *mated*.
See MATCH, and UNMATCHABLE.

Where learned More and Gardiner I met,
Men in those times *ismatchable* for wit.
Drayton. The Legend of Thomas Cromwell.

He [Darius] yielded unto the virtue of Alexander, to his magnitude, fortitude, and justice, admiring that heart of his, invincible of pleasure, unconquered by travels, and in gratuities and liberality *ismatchable*.
Holland. Plutarch, fol. 1041.

IMMATE'RIAL, *adj.*

IMMATE'RIAL, *n.*

IMMATE'RIALLY, *n.*

IMMATERIA'LITY,

IMMATE'RIALISM,

IMMATE'RIALIST,

IMMATE'RIALIZE,

IMMATE'RIATE.

Fr. *immatériel*; It. *im-materiale*; Sp. *immaterial*; Lat. *in*, and *materia*, which Vossius thinks is so called *a matre, quia in corporum ratione se matris instar habet*. See MATTER.

Not having, void or free from, *matter*, or body; incorporeal; spiritual.

Met. not pertaining to, or concerning the *matter* or subject; of no importance, unimportant.

There is a world, a world of perfect bliss,
Pure *immaterial*, as brighter far from this,
As that high circle which the rest enspheres
Is from this dull, ignoble vale of tears.

Drummond. Sonnet 18. part ii.

It is true that there be some scholasticall and *immateriall* truths (the infinite subdivision whereof have rather troubled than informed Christendome) which for the purchase of peace might be kept in, and returned into such safe generalities as minds not unreasonable might rest in.

Hall. Works, vol. i. fol. 477. The best Bargaine.

Thus more perfect apprehenders misconceive *immaterials*; our imaginations paint souls and angels in as dissimilar a resemblance.

Glanvil. The Vanity of Dogmatizing, ch. vii. fol. 67.

There are sicknesses that walk in darkness, and there are exterminating angels that fly wrapt up in the curtains of *immateriality* and an uncommunicating nature.

Taylor. Sermon 8. part iii.

The visible species of things strike not our senses *immaterially*; but streaming in corporal rays do carry with them the qualities of the object from whence they flow, and the medium through which they pass.

Sir Thomas Brown. Vulgar Errours.

For though possibly assiduity in the most fixed cogitation be no trouble or pain to *immaterializ'd* spirits; yet is it more than our embodied souls can bear without lassitude or distemper.

Glanvil. The Vanity of Dogmatizing, ch. xii.

But wee, that hold firm to the works of God; and to the sense, which is God's lamp, (*Lucerna Dei spiraculum hominis*;) will enquire with all sobriety, and severitie, whether there be to be found on the footsteps of nature, any such transmission and influx of *immaterial* virtues.

Bacon. Natural History, Cent. 10.

The soul therefore, the whole conscious being; the power of thinking that resides in it, as well as the bare *immaterial* subject or substance itself; (whatever may be said concerning the power of God in this question;) will clearly, notwithstanding what any finite power can do, of necessity be naturally immortal.

Clarke. Works, vol. iii. fol. 762. A Defence of an Argument, &c.

* Going to England very young, about 13 years ago, he [Dr. George Berkeley] became founder of a sect there called the *Immaterialists*, by the force of a very curious book upon that subject.

Swift. To Lord Carteret, Sept. 3, 1724.

All the great ends of morality and religion are well enough secur'd, without philosophical proofs of the soul's *immateriality*; since it is evident, that He who made us at first begin to subsist here, sensible intelligent beings, and for several years continu'd us in such a state, can and will restore us to the like state of sensibility in another world, and make us capable there to receive the retribution He has design'd to men, according to their doings in this life.

Locke. Works, vol. i. fol. 251. Of Human Understanding, book iv. ch. iii.

VOL. XXIII.

The notion of the soul's *immateriality*, evidently facilitates the belief of a resurrection and of a future retribution, by securing a principle of personal individuality, upon which the justice of all reward or punishment is grounded.

Clarke. Works, vol. iii. fol. 851.

As well might nothing bind immensity
Or passive matter *immaterials* see,
As these should write by reason, rhyme and rule,
Or he turn wit, whom nature doom'd a fool.

Harte. Essay on Satire.

In the early part of his own life, accordingly, he [Dr. Reid] informs us, that he was actually a convert to the scheme of *immaterialism*; a scheme which he probably considered as of a perfectly inoffensive tendency, as long as he conceived the existence of the material world to be the only point in dispute.

Stewart. Philosophy of the Human Mind, ch. i. sec. 3.

IMMATU'RE,

IMMATU'RELY,

IMMATU'RENESS,

IMMATU'RITY.

It. and Sp. *immaturus*; Lat. *im-maturus*, (*in*, and *maturus*, of uncertain origin.) That is properly said to be *mature*, which is neither too quick or early, nor too slow or late. Vossius.

Immature; too quick or early, hasty, unripe, imperfect, incomplete, undigested.

The earth was form'd but in the womb as yet
Of waters, embryo *immature* involv'd,
Appeard not.

Milton. Paradise Lost, book vii. l. 277.

This only is our comfort and defence,
He was not *immaturely* ravish'd hence,
But to our benefit, and to his own
Undying fame and honour let alone
Till he had finish'd what he was to do.

Brome. An Elegy on the Death of his Schoolmaster.

Perceiving that the force and vigour of that law was dallied with and avoided by the *immaturity* of young espoused wives, as also by often changing of marriages: he brought into a narrower compass the time of wedding and having such spaces, and also limited divorcements.

Holland. Suetonius. Octavius Cæsar Augustus, fol. 54.

Though *immature* I end my glorious days,
Cut short my conquest, and prevent new praise;
My life, already, stands the noblest theme,
To fill long annals of recording fame.

Rowe. Lucan, book v.

It was easy for me to represent to you, how unfinished and unpolished the trifles you called for were; especially considering the *immaturity* of some of them would not probably be the chief thing, that would make many think they come forth unseasonably.

Boyle. Works, vol. ii. p. 323. To Sophronia.

Now these are expressly said to be abrogated in the dispensation promised, it being declared that the virtuous, though dying *immaturely*, should be as if they had lived an hundred years; and sinners, though living to an hundred years, as if they had died *immaturely*.

Warburton. Works, vol. vi. p. 88. The Divine Legation, book vi. sect. 6.

To fit a man for managing his own affairs, a certain *maturity* of age is necessary. What that is and how far the validity of contracts may be affected by the contractor's *immaturity* of age, it belongs to human laws to determine.

Beattie. Moral Science, vol. ii. part iii. ch. i.

IMMEABILITY, Lat. *in*, and *meare*, to pass. See IRREMEABLE.

Arbuthnot, in whom alone the word has been found, interprets it, in a note upon the passage following, "what renders impassable."

Such a state of the fluids at last affects the tender capillary vessels of the brain, by the viscosity and *immeability* of the matter impacted in them, and disorders the imagination.

Arbuthnot. On Aliments, ch. vi. prop. vii. sect. 29.

IMMEA'SURABLE,

IMMEA'SURABLY,

IMMEA'SURED.

In, and *measure*, from the Lat. *mensura*.
That cannot be *measured*;

4 D

IMMATE-
RIAL.

IMMEA-
SURABLE

IMMEASURABLE. exceeding or surpassing *measure*; boundless. See also IMMENSE, and IMMENSURABLE.

IMMEDIATE.

What availeth, sir, your proclamacion
Of curious talking, not touching to sadness
It is but wind, flattering and adulation
Ymeasurable thought, of worldly wilderness.
Chaucer. Certaine Balades, fol. 341.

Tyl he either sometime for theire *immeasurable* outrage, or comenly for their finall impenitence, finallye reiecteth and refuseth them.
Sir Thomas More. Workes, fol. 590. The Second Part of the Confutation of Tindale.

No doubt excessive sorrow and heaviness, *immeasurable* joy and gladnesse in the soule, may be aptly compared to a swelling and inflammation in the body, but neither joy nor sorrow simply in itselfe.
Holland. Plutarch, fol. 64.

Her graces so *immeasurably* flow'd,
That such a shape, with such a spirit inspir'd
Even of the wisest made me most admir'd.
Drayton. The Legend of Matilda the Fair.

They brought forth giants and such dreadful wights,
As farre exceeded men in their *immeasur'd* might.
Spenser. Faerie Queene, book ii. can. 10.

Live you long happy in a settled state;
'Tis our's to wander still from fate to fate.
Safe have you gain'd the peaceful port of ease,
Not doom'd to plough th' *immeasurable* seas.
Pitt. Virgil. Aeneid, book iii.

A stream, that silently but swiftly glides
To meet eternity's *immeasur'd* tides!
Broome. On Death.

"For here forlorn and lost I tread,
With fainting steps and slow;
Where wilds, *immeasurably* spread,
Seem length'ning as I go."
Goldsmith. The Hermit.

IMME'DIATE, } Fr. *immediat*; It. and Sp.
IMME'DIATELY, } *immediato*; Lat. *in*, and *medius*.
IMME'DIATENESS, } Following, or succeeding next;
IMME'DIACY. } without any thing amidst, (or *in medio*.) without any thing between; any thing intervening; instant, acting instantly.

The light of grace will not appeare as longe as the prelates pretend that their authoritye is so high and so *immediate* to God that the people are bounde to obey them, and to accept all that thei do and teache, wythoute argumente, resystence, or grudging.
Sir Thomas More. Workes, fol. 893. The Apology of Sir Thomas More.

The rumour was, how that Alexander satisfyed with the actes he had done, pourposed *immediatlye* to retourne into Macedon.
Brende. Quintus Curtius, book vi. fol. 141

He led our powers,
Bore the commission of my place and person,
The which *immediacie* may well stand up,
And call itselfe your brother.
Shakspeare. Lear, fol. 307.

Though the fore part of the way to Heaven be a good life, the latter and more *immediate* is death.
Hall. Works, vol. i. fol. 115. A Meditation of Death.

For when the world found out the fitness of my soil,
The gripple wretch began *immediatly* to spoil
My tall and goodly woods, and did my grounds enclose.
Drayton. Poly-olbion, song 13.

Who sees not then a manyfest imparity in our Saviour's own choice, in the first gathering of His Church, wherein His Apostles were above His other disciples, the twelve above the 70; above them in privileges, especially in the *immediatenesse* of their calling.
Hall. Works, vol. iii. fol. 146. Episcopacy by Divine Right, part ii. sect. 2.

The third admirable demonstration of the *immediateness* of the Divine power, wisdom, and ordination, is this, that vegetables, as also animals and mankind, were endued with a power, faculty, and a certain law fixed and radicated in them, to transmit their specifical

nature to succeeding individuals by propagation and seminal traduction, wnerby their species might be preserved.

Hale. Origin of Mankind, ch. ii. sect. iv. p. 301.

The gun,
Glanc'd just and sudden, from the fowler's eye,
O'ertakes their sounding pinions; and again,
Immediate, brings them from the towering wing,
Dead to the ground: or drives them wide-dispers'd.
Wounded, and wheeling various, down the wind.

Thomson. Autumn.

They believe, that on the dissolution of the body the soul *immediatly* enters some other animal, and that after using as vehicles every species of terrestrial, aquatic, and winged creatures, it finally enters a second time into a human body.

Beloe. Herodotus. Euterpe, ch. 132.

IMMEDICABLE, Fr. *immedicable*; It. *immedicabile*; Lat. *immedicabilis*: *in*, and *medicabilis*, from *med-eri*, to heal or cure.

That cannot be healed or cured, or remedied.

On baleful henses (as the fittest grounds)
Written with blood thy sad memorials lie,
Whose letters are *immedicable* wounds,
Only fit objects for the weeping eye.
Drayton. The Legend of Robert, Duke of Normandy.

Where the deadly hemlock chills
Th' unfruitful glebe, and sweating yews distil
Immedicable poison.

Cooper. The Power of Harmony, book ii.

Gross riot treasures up a wealthy fund
Of plagues: but more *immedicable* ills
Attend the lean extreme.

Armstrong. The Art of Preserving Health, book ii.

IMMELODIOUS, Lat. *in*, privative, and *melodus* sweetly sounding.

Sounding unpleasingly; dissonant.

My lute, be as thou wert when thou didst grow
With thy green mother in some shady grove,
When *immemelodious* winds but made thee move,
And birds their ramage did on thee below.

Drummond. Sonnet 10. part ii.

IMMEMO'RIAL, } Fr. *immemorial*; Lat. *in*,
IMMEMO'RIALLY. } privative, and *memoralis*; from *memor*, mindful. As the

Fr. *immemorial*, "without the compasse, reach, or scope of *memory*." Cotgrave.

And as the Arcadians and Attiques in Greece for their *immemorial* antiquity, are said to vaunt of themselves, that the one are *αἰσχρολογία*, before the moon; the other *αὐτόχθονες*, issued of the earth itself; so the Biscayner hath such like rodomontadoes.

Howell. Letter 59. book ii.

This Constitution of the States had been established from time *immemorial* in the several Provinces of the Low Countries, and was often assembled for determining disputes about the succession of their Princes, where doubtful or contested.

Sir William Temple. Works, vol. i. p. 47. On the United Provinces, ch. i.

The truth and authority of the Scriptures, and consequently their not being contradictory to themselves, hath been *immemorially* believed by the learnedest men in the world.

Boyle. Works, vol. ii. p. 282. The Style of the Holy Scriptures.

To introduce a new Faith, a new way of thinking and acting, and to persnade many nations to quit the Religion in which their ancestors had lived and died, which had been delivered down to them from time *immemorial*, to make them forsake and despise the deities which they had been accustomed to reverence and worship, this is a work of still greater difficulty.

Jortin. Discourses on the Christian Religion, dis. i. vol. i. p. 59.

IMMEN'SE, } See IMMEASURABLE, ante. Fr.
IMMEN'SELY, } *immense*; It. and Sp. *immenso*;
IMMEN'SITY, } Lat. *immensus*; (*in*, privative, and
IMMEN'SURABLE, } *ensus*;) *unmeasured*.
IMMEN'SURATE. } *Unmeasured*; having unknown
dimensions of magnitude; having unknown bounds or limits; boundless, unlimited.

IMMEDIATE.

IMMENSE

IMMENSE
—
IMMERGE

Discov'ring daily more and more about,
In that *immense* and boundless ocean
Of nature's riches, never yet found out,
Nor fore-clos'd with the wit of any man.

Daniel. *Musophilus*.

The *immenseness* of whose excellencies (is) too highly raised for us.
More. *Conj. Cabb.* p. 43.

Yet thou 'rt now
Thy Maker's maker, and thy father's mother,
Thou hast light in dark, and shutt'st in little room
Immensity, cloister'd in thy dear womb.

Donne. *Holy Sonnets. Annunciation*, son. 2.

Here we find pride so much out of the way to heaven, as that created nature, (which was placed so near it by creation, that it was a wonder how he could miss the way,) did notwithstanding mistake it by presumption; and fell into an *immensurate* distance from it, carrying the next excellent nature to his own along with him.

Montague. *Devoute Essayes, Treat.* 9. sec. 1.

Who ask and reason thus, will scarce conceive
God gives enough, while He has more to give;
Immense the power, *immense* were the demand.

Pope. *Essay on Man*, epist. 4. l. 165.

This power of repeating, or doubling any idea, we have of any distance, and adding it to the former as often as we will, without being ever able to come to any stop or stint, let us enlarge it as much as we will, is that which gives us the idea of *immensity*.

Locke. *Works*, vol. i. fol. 64. *Human Understanding*, book ii. ch. xiii.

What an *immensurable* space is the firmament, wherein a great number of stars lesser and lesser, and consequently (according to the foregoing supposition) farther and farther off, are seen with our naked eye, and many more discovered with our glasses.

Derham. *Astro-Theology*, book i. ch. iii.

Homer mentions the temple of Jupiter at Dodona, and that of Apollo at Pytho, or Delphi, as being illustrious in the time of the Trojan war; and represents the latter as *immensely* rich.

Jortin. *Remarks on Ecclesiastical History*, vol. i. p. 263.

But as with upward flight,
Soaring, I gain th' *immensurable* steep,
Contiguous stars, in bright profusion sown
Through these wide fields, all broaden into suns.

Mallet. *The Excursion*.

IMME'RGE, *v.* } Lat. *immergere, immersum*; *in*,
IMME'RSE, *v.* } and *mergere*, to plunge or sink,
IMME'RSE, *adj.* } (into the sea, *mare*.) See EMERGE.
IMME'RSION. } To plunge or sink; to sink, to overwhelm.

Will not all wise men in the world conclude, that the Church of God which was then holy, not in title only and design, but practically and materially; and persecuted, and not *immersed* in secular temptations, could not all in one instant joyn together to alter that form of church government, which Christ and his apostles had so recently established.

Taylor. *Sermons*, part iii. fol. 50. *Preface to a Consecration Sermon preached at Dublin*.

Lord Bacon hath observ'd, Time is a river, that has brought down to us what is more light and superficial; while things more solid and substantial have been *immersed*.

Glanvil. *The Vanity of Dogmatizing*, ch. xv.

And besides, I practise, as I do advise: which is, after long inquiry of things, *immerse* in matter, to interpose some subject, which is immaterial, or less material: such as this of sounds: to the end, that the intellect may be rectified, and become not partiall.

Bacon. *Natural History*, Cent. 2. sec. 115.

We took about a glass-full of luke-warm water, and in it *immersed* a quantity of the leaves of senna, and presently upon the *immersion* there did not appear any redness in the water, but dropping into it a little oil of tartar, the liquor soon discovered a redness to the watchful eye.

Boyle. *Works*, vol. i. p. 759. *Of Colours*.

What makes many men so strangely *immerse* themselves, some in chymical, and some in mathematical enquiries, but because they strangely love the things they labour in.

South. *Sermons*, vol. i. p. 259.

If we add to this, that the common people, who compose the gross body of mankind, and for every individual of which religion is intended, are, by their station and employments, most *immersed* in matter, we shall need no further proof, that a mere mental intercourse with God, which makes religion only a divine philosophy in the mind, is altogether unfit for such a creature as man in his present station upon earth.

Warburton. *Works*, vol. vii. p. 58. *Alliance between Church and State*, book i.

These the Moldaw's raging flood
Swept with their wattled cotes, as o'er its banks
It rose redundant, swol'n with beating rains,
And deep *immers'd* beneath its whirling wave.

Warton. *Eclogue* 1.

Beveridge ascribes a kind of apostolical authority, 50th canon, which requires of the bishops and presbyters that they should make use of a three-fold *immersion* in baptism under pain of being deposed.

Jortin. *Remarks on Ecclesiastical History*, vol. i. p. 317.

IMME'RIT, } Lat. *immeritus*, undeserving,
IMME'RITED, } worthless.
IMME'RITOUS. } The common word is *demerit*,
q. v. : want of merit, or of desert.

And gives sentence that his confuting hath bin employed about frothy, *immeritous*, and undeserving discourse.

Milton. *Works*, vol. i. fol. 306. *Doctrine and Dis. of Divorce*.

When I receive your lines, and find there expressions of a passion, reason and my own *immerit* tell me it must not be for me.

Suckling.

Those on whom I have in the plenteousest manner showered my bounty and *immerited* favour, have darted on me.

King Charles, in the *Princely Pelican*, p. 279.

IMMETHO'DICAL, } *In*, and *methodical*; Lat.
IMMETHO'DICALNESS. } *methodicus*, from *methodus*;
Gr. *μέθοδος*; *μετά*, with, and *ὁδός*, a way. See the General Introduction, or Preliminary Treatise on *Method*, p. 2.

Having or keeping no orderly way or progress; disorderly; irregular.

Like those women, 1 Tim. 3. 7. ever learning and never attaining; yet not so much through their own fault, as through the unskilful and *immethodical* teaching of their pastor, teaching here and there at random out of this or that text, as his case or fancy, and oft-times as his stealth guides him.

Milton. *Works*, vol. i. fol. 573. *The likeliest means to remove Hirelings out of the Church*.

First, if you would work out your salvation, then digest and dispose your work into a right order and method. *Immethodicalness* breeds confusion, and makes that a tumult and a heap of business, that would otherwise become a trade in Christianity.

Hopkins. *Sermons*, fol. 631.

An *immethodical* discourse (though the materials of it may be precious) is but a heap, full of confusion and deformity.

Wilkins. *The Gift of Preaching*, sec. 2.

Sometimes too, the seeming *immethodicalness* of the New Testament is due to the inconvenient distinction of chapters and verses now in use: though it be a very great help to the memory, and be some other ways serviceable.

Boyle. *Works*, vol. ii. p. 272. *The Style of the Holy Scriptures*.

Almost every Poem consisting of precepts is so far arbitrary and *immethodical*, that many of the paragraphs may change places with no apparent inconvenience.

Johnson. *Works*, vol. ii. p. 60. *Life of Pope*.

IMMIGRATE, } Lat. *immigrare*; *in*, and *migrare*.
IMMIGRATION. } See EMIGRATE.

To move or pass into.

Hitherto I have considered the Saracens either at their *immigration* into Spain about the ninth century, or at the time of the crusades, as the first authors of romantic fabling among the Europeans.

Warton. *History of English Poetry. Dissertation* 1.

The *immigrations* of the Arabians into Europe, and the Crusades, produced numberless accounts, partly true and partly fabulous, of the wonders seen in the Eastern countries.

Id. *Ib.* vol. i. p. 101.

IMMEW.
—
IMMIT.

IMMEW, see EMMEW. To coop or pen, to confine.

I have seen him scale
As if a falcon had run up a traine,
Clashing his warlike pinions, his steel'd curasse,
And at his pitch *innew* the town below him.

Beaumont and Fletcher. *The Knight of Malta*, act ii. sc. 1.

I'MMINENT, } See EMINENT. Lat. *imminere*,
I'MMINENCE. } (in, and *manere*, to stay,) to stay
over or upon. Martinius thinks from *minæ*, eminences.
Staying or remaining over; dwelling upon; over-
hanging, impending, and, consequently, threatening.

Repentance requireth of the repentaunt person, not only taming
of the fleshe against the sinne *imminent* or to come, but also punish-
mente by fastyng and other affliction for the sinne already done.
Sir Thomas More. *Workes*, fol. 370. *The first Part of the Confu-
tation of Tindale*.

Malbecco stopt in great astonishment,
And with pale eyes fast fixed on the rest
Their counsell crav'd, in danger *imminent*.
Spenser. *Faerie Queene*, book iii. can. 10.

Their eyes ever *imminent* upon worldly matters.
Milton. *Prose Works*, vol. i. p. 21. *Of Reformation*, book ii.

I doe not speake of flight, of feare, of death,
But dare all *imminence* that gods and men
Adresse their dangers in.
Shakspeare. *Troilus and Cressida*, fol. 105.

There's too much reason to fear that some of all orders of men,
even magistracy itself, have taken the infection: a thing of dreadful
consequence and most *imminent* danger.

Bentley. *Sermons*, p. 41.

So it is certain, that it is absolutely necessary my life should be out
of *imminent* hazard, before I can take a delight in the sufferings of
others, real or imaginary, or indeed in any thing else from any cause
whatsoever.

Burke. *Works*, vol. i. p. 146. *On the Sublime and Beautiful*,
part i. sec. 15.

IMMINGLE, in, and mingle; from A. S. *mæng-an*,
meng-an, to mix.

To mix, to blend, together.

When vitall breath is fled from me,
Let earth with fire *iminged* be.

Holland. *Suetonius*, fol. 199. *Nero Claudius Cæsar*.

The rude, the delicate, *iminged*, tell
How Art would Nature, Nature Art excel;
And how, while these their rival charms impart;
Art brightens Nature, Nature brightens Art.

Savage. *Public Spirit*.

In graceful dance *iminged*, o'er the land,
Pan, Pales, Flora, and Pomona play'd.

Thomson. *Castle of Indolence*, can. 2.

IMMINUTION, Lat. *imminuere*, *utum*, to lessen.
See DIMINISH.

A lessening; a decrease; a diminution.

Though darkness be confessedly a privation of light, and the degrees
of it gradual *imminutions* of light; yet the eye, that is, the percep-
tive faculty, by the intervention of the eye, may well enough be said
to perceive both light and darkness, that is, both a positive thing and
the privation of it.

Boyle. *Works*, vol. iii. p. 738. *Of the Positive or Privative
Nature of Cold*.

And where is the absurdity of Dr. Spencer's gradual declension or
imminution of the theocracy, which Mr. W.'s gradual withdrawing of
the extraordinary providence is not liable unto? Or was not the gra-
dual withdrawing of the extraordinary providence a proper *imminu-
tion* of the theocracy?

Warburton. *Works*, vol. v. p. 254. *The Divine Legation*, book v.
sec. 2.

IMMIT, } Lat. *immittere*, in, and *mittere*, i. e.
IMMISSION. } *facere ut eat*, to cause to go. See
COMMIT.

To cause to go into; to put, place, send into.

The vale of Cluyd freely receives the wholesome blasts of the
North wind (much accounted of among builders and geoponies for
immission of pure air) coming in from that part which lies open to
the sea.

Drayton. *Poly-olbion*, song 10. *Illustrations*.

The effect of this *immission* of the Holy Ghost was to fill all things
and that for ever, to build up the church of God until the day of
consummation; so that the Holy Ghost abides with the church for
ever, by *transmitting* those revelations, which he taught the apostles,
to all Christians in succession.

Taylor. *Polemical Discourses*, fol. 4. *An Apologie for set Forms
of Liturgie*.

The colour of the grapes was less altered here, than in the re-
ceiver, into which air produced out of pears had been *immitted*.

Boyle. *Works*, vol. iv. p. 533. *Physico-Mechanical Experiments*.

Having stopped it [a receiver] close with a screw, I filled it further
with air, which I *immitted*. Id. Ib.

IMMI'X, } In, and *mixtum*, from *miscere*, which
IMMI'XTURE. } Tooke thinks is the A. S. *misc-an*; to
mingle. See MIX.

To *mix* or mingle into or together; to blend together.

Immixed (in, privative) is used as equivalent to *un-
mixed* in the Quotations from More and Evelyn.

Which when she sawe, downe on the bloody plaine
Her selfe she threw, and teares gan shed amaine;
Amongst her teares *immixing* prayers meeke,
And with her prayers, reasons to restraine
From bloody strife.

Spenser. *Faerie Queene*, book iv. can. 3.

Full lightly it ascends into the clear,
And subtile aire devoid of cloudy storm
Where it doth steddy stand, all-uniform,
Pure, pervious, *immix't*, innocuous, mild.

More. *Song of the Soul*, book ii. can. 2. st. 22.

So that we are, as I may say, allowed what our nature aboundeth
the most in, which is sorrow, to make up that wherein our loue is the
most defective, which is simplicity and *imixture*.

Mountague. *Devoute Essayes*, Treat. 14. sec. 3.

His mouth and nostrils spout a purple flood:
His teeth all shatter'd rush *immixed* with blood.

Pope. *Homer. Odyssey*, book xviii.

Now to assure you, sir, how pure and *immixed* the design is from
any other than the public interest, propounded by me, and to redeem
the time to the noblest purposes; I am thankfully to acknowledge,
that, as to the common forms of living in the world, I have little reason
to be displeased at my present condition.

Boyle. *Works*, vol. vi. p. 291. *Evelyn to Mr. Boyle*, Sept. 13,
1659.

IMMO'BLE, } Fr. *immobile*; It. *immobile*; Sp.
IMMOBILITY. } *immobile*; Lat. *immobilis*; (in, priva-
tive, and *mobilis*, movable, or that can or may be
moved.) See IMMOVABLE, *infra*.

That cannot be *moved*.

And therefore be lawes called holy) because it is not lafull to breke
the: but they be ferme and *immobile*.

Joye. *Exposicion of Daniel*, ch. v.

The same answer which was insisted on before, concerning the con-
formity of Scripture expressions to men's capacity and common
opinion, may well enough satisfy all those other arguments, which
seem thence to affirm the Earth's settledness and *immobility*.

Wilkins. *Works*, vol. i. p. 181. *That the Earth may be a Planet*,
book ii. prop. 5.

The objections from Scripture are such as seem to assert the *immo-
bility* and rest of the Earth, and the motion of the Sun and heavenly
bodies.

Derham, *Astro-Theology*, part i. p. xxi. *Objections against Coper-
nicus Answered*.

IMMO'DERATE, } Fr. *immodere*; It. *immode-*
IMMO'DERATELY, } *rato*; [Sp. *immoderado*; Lat.
IMMO'DERATENESS, } *immoderatus*; (in, and *modera-*
IMMODERATION. } *tus*, participle of *moderari*, and
this from *modus*, a measure.)

IMMIT.
—
IMMODE-
RATE.

**IMMODE-
RATE.** Beyond or exceeding *measure*; exceeding a due
mean; due bounds or regulations; intemperate, ex-
cessive.

**IMMO-
DEST.** Whereupon we may well gather, that *immoderate* sorowe is not
natural. *Wilson. The Arte of Rhetorique*, fol. 78.

Lest in lacke of lawe to doo it for thē, they shold in folowyng theyr
yrous affecciō, reuenge thēselfe *immoderately* w^e theyr own handes.
Sir Thomas More. Workes, fol. 87. *A Treatise vppō Wordes of
Scripture.*

He despaired of God's mercy in the same fact, where this pre-
sumed of it; he by a decollation of all hope annihilated his mercy,
this by an *immoderancy* thereof destroyed his justice.

Sir Thomas Brown. Vulgar Errours, book i. ch. ii.

And now this wish'd-for, but yet dreadful prey
To Achis' Court they led in haste away,
With all unmanly rudeness which does wait
Upon th' *immoderate* vulgar's joy and hate.

Cowley. The Davideis, book iii.

Hugo Grotius, a man of these times, one of the best learned, seems
not obscurely to adhere in his perswasion to the equity of those impe-
rial decrees, in his notes upon the Evangelists; much allaying the
outward roughness of the text, which hath for the most part bin too
immoderately expounded.

Milton. Works, vol. i. fol. 167. *Doctrine, &c. of Divorce.*

It is for the Christian heart to be taken up with other desires, such
as wherein there can be no danger of *immoderateness*: these are the
holy longings after grace and goodnesse.

Hall. Works, vol. iii. fol. 519.. *Of Contentation*, sec. 23.

He is wealthy enough, that wanteth not. He is great enough,
that is his own master. He is happy enough, that lives to die well.
Other things I will not care for; nor too much for these, save onely
for the last, which alone can admit of no *immoderation*.

Id. Ib. vol. i. fol. 51. *Meditations and Vows*, cent. 3.

Whence multitudes of reverend men and critics
Have got a kind of intellectual rickets,
And by th' *immoderate* excess of study
Have found the sickly head t' outgrow the body.

Butler. Upon Human Learning.

I distinguish these from those diseases of animals, that proceed, as
the rot in sheep often does, from the exorbitancy of the seasons, the
immoderateness of cold, heat, or any other manifest quality in the air.
Boyle. Works, vol. iv. p. 94. *Of Hidden Qualities of the Air.*

In the fourth place, from all that has been said, we should learn
never to be *immoderately* anxious about our external situation, but
submit our lot with cheerfulness to the disposal of heaven.

Blair. Sermon 12. vol. ii.

IMMO'DEST, } Fr. *immodeste*; It. and Sp. *im-*
IMMO'DESTLY, } *modesto*; Lat. *immodestus*; (*in*, and
IMMO'DESTY. } *modestus*, which, says Vossius, pro-
perly denotes *modum servans*;) preserving the measure;
sc. of what is decent or becoming.

Indecent, unbecoming; shameful, (as applied to the
act;) shameless, (as applied to the agent.)

She no less glad, than he desirous was
Of his departure thence; for of her joy
And vaine delight she saw he light did pass,
A foe of folly and *immodest* toy,
Still solemne sad, or still disdainfull coy.

Spenser. Faerie Queene, book ii. can. 6.

Whom ouertaking, shee in merry sort
Them gan to bord, and purpose diuersly,
Now faining dalliance and wanton sport,
Now throwing forth lewd words *immodestly*.

Id. Ib. book ii. can. 11.

She shames to think that ought within her face
Should breed th' opinion of *immodesty*.

Daniel. History of Civil Wars, book viii.

For a man to deny that ever such things happened in the world,
but that they were all meer forgeries and designs to cheat posterity,
this were to subvert the credit of all history; which is so *immodest* a
thing as any sober man would be asham'd of.

Wilkins. Of Natural Religion, book i. ch. vii.

May I have leave, I say, to inform my reader, that I haue confined
my choice to such tales of Chaucer, as savour nothing of *immodesty*.
Dryden. Works, vol. iii. p. 630. *Preface to the Fables.*

Lucian was partly a Sceptic, partly an Epicurean, an elegant, in-
genious, loose, and *immodest* writer.

Jortin. Remarks on Ecclesiastical History, vol. ii. p. 80.

I'MMOLATE, } Fr. *immoler*; It. *immolare*; Sp.
IMMOLA'TION. } *immolar*; Lat. *immolare*, from
mola, says Festus, *id est, farre molito, et sale hostiam
perspersam sacrare*; to sacrifice a victim besprinkled
with ground corn and salt.

To sacrifice, to offer a sacrifice or victim.

The Englishe hereof is this. After this it is asked whether that the
priest doth, may be saide properlie a sacrifice or *immolacio*: & whe-
ther Christ be daily *imolate* or only ones.

*Stephen, Bishop of Wynchester. The Confutation of the Sacrifice
of the Church.*

Although his vow run generally for the words, Whatsoever shall
come forth, &c. yet might it be restrained in the sense, for what-
soever was sacrificable and justly subject to lawfull *immolation*.

Sir Thomas Brown. Vulgar Errours, book v. ch. xiv.

I cannot bring myself to imagine, that such gentle deities can like
such barbarous worshippers, who not only *immolate* to them the lives
of men, but, what is far more precious, the virtue and honour of
women.

Boyle. Works, vol. v. p. 262. *The Martyrdom of Theodora.*

The Ministers exhausted the stores of their eloquence in demon-
strating, that they had quitted the safe, beaten highway treaty between
independent Powers; that to pacify the enemy they had made every
sacrifice of the national dignity; and that they had offered to *immo-*
late at the same shrine the most valuable of the national acquisitions.

Burke. Works, vol. viii. p. 278. *Letters on a Regicide Peace.*

IMMOMENT, of no *moment* or importance, of no
value; trifling. See **MOMENT**.

— Say (good Cæsar)
That I some lady trifles haue reseru'd,
Immoment toyes, things of such dignitie
As we greet moderne friends withall.

Shakspeare. Antony and Cleopatra, fol. 366.

IMMONASTER'D, dwelling in, secluded in, a
monastery, *q. v.*

Immonaster'd in Kent, where first she breath'd the air.

Drayton. Poly-olbion, song 24.

IMMO'RAL, } Lat. *in*, privative, and *moralis*,
IMMORA'LITY. } pertaining to manners, from *mos*;
which Martinius thinks is from *meare*, to go, and pro-
perly signifies *via*, a way. Vossius that it may be
from *νόμος*, *quia consuetudo est lex quædam*.

A *moral* man, is a man whose way of life, whose
mode or *manner* of acting, is guided or governed by the
laws of natural or revealed Religion.—An *immoral* man,
one who transgresses those laws; an *immoral* act; an
act in transgression or violation of them.

Luxury and sloth and then a great drove of heresies and *immo-*
ralities broke loose among them; and these begot envy, hatred, and
discord, which abounded everywhere.

Milton. Works, vol. i. fol. 494. *A Defence of the People of
England.*

He undertook by the advice of Sanders, a learned but a very *im-*
moral man, to overthrow the charter.

Burnet. Own Times. Charles II. 1682.

A restlessness in men's minds to be something they are not, and
have something they have not, is the root of all *immorality*.

Sir W. Temple. Works, vol. iii. p. 536. *Of Life and Fortune.*

Those things it is in our power to do, which depend upon our will;
and from them proceeds whatever may be called *moral* or *immoral*,
virtuous or vicious, praiseworthy or blameable, in our conduct.

Beattie. Elements of Moral Science, part i. ch. ii. sec. 1.

The writing of books or epistles under borrowed names, and im-
posing them as genuine upon the public, is a thing of bad conse-

**IMMO-
DEST.**
—
**IMMO-
RAL.**

IMMO-
RAL.

TAL.

quence, and an *immorality*; yet hath it been done by men who perhaps in other respects were honest.

Jortin. Remarks on Ecclesiastical History, vol. ii. p. 23.

IMMORI'GEROUS, } Lat. *in*, and *moriger*, qui
IMMORI'GEROUSNESS. } *facile morem gerit*, obsequens
est; who readily follows or complies with *manners*, is obsequious or compliant, yielding or obedient.

Unyielding or disobedient.

Such who love to hear but not to be doers of the word, such as are perverse and *immorigerous*, such who serve a humour, or an interest, an opinion, or a peevish sect in their learning.

Taylor. Rule of Conscience, book ii. ch. iii. fol. 332.

We shall best know that our will is in obedience, by our prompt undertaking, by our cheerful managing, by our swift execution, for all degrees of delay are degrees of *immorigerousness* and unwillingness.

Id. The Great Exemplar, part i. disc. 2. fol. 65.

IMMO'RTAL, } Fr. *immortel*; It. *immortale*;
IMMO'RTALLY, } Sp. *immortal*; Lat. *immortalis*;
IMMORTA'LITY. } (*in*, privative, and *mortalis*, from *mors*, death. The A. S. (says Tooke) used *morth*, *morthē*, *mors*, *i. e. quod dissipat* (*subaud. vitam*); the third person of the verb *myrran*, to mar, to dissipate, to disperse, to spread abroad, to scatter.)

Never dying or perishing, never ending or coming to an end, everlasting, perpetual; living, abiding, or enduring for ever; living for ever or everlastingly in the memory of mankind.

Wicklif's words are *undeedli*, and *undeedlynese*.

She set hire down on knees, and thus she sayde,
Immortal God that savedest Susanne
Fro false blame.

Chaucer. The Man of Lawes Tale, v. 5059.

Whereby the Macedons accustomed to be governed by kinges, but yet reserving a greater shadow of liberty than other nations, did withstand him more arrogantly in affecting of his *immortality*, then was either expedient for him or them.

Brende. Quintus Curtius, book iv. fol. 73.

Truly reportyng his right noble estate
Immortally whiche is immaculate.

Skelton. The Dethe of Northumberlande.

O what availes it of *immortal* seed
To been ybred and neuer borne to die!
Farre better I it deeme to die with speed,
Then waste in woe and wailefull miserie.

Spenser. Faerie Queene, book iii. can. 142.

And though some impious wits do questions move,
And doubt if souls *immortal* be, or no;
That doubt their *immortality* doth prove,
Because they seem *immortal* things to know.

Davies. The Immortality of the Soul, sec. 30. rem. 6.

There is your crowne,
And he that weares the crowne *immortally*,
Long guard it yours.

Shakspeare. Henry IV. Second Part, fol. 95.

You begin with a distinction [*Præmon. sec. 3.*] that the souls of some men are made *immortal*, by the Spirit of God, to happiness; and the souls of some others, by the will of God, to punishment. Now what can be more precarious and groundless than this distinction? For what real difference is there in the thing itself, between being *immortalized* by the Spirit and by the will of God?

Clarke. Works, vol. iii. fol. 722. *A Letter to Mr. Dodwell*.

It is, on the contrary, evidently far more agreeable to right reason or to our notions of God, to derive the *immortality* of the soul, and especially of a miserable one, from its own nature than from the Divine pleasure; that is, to suppose the soul to have been at first created such a substance, as, by the ordinary concurrence of Divine Providence, would continue for ever; than that it was created of a mortal and perishable nature, but by the extraordinary and miraculous power of God, is continually supported only to endure torment and punishment, beyond the capacity of its own nature, to eternity.

Id. Ib.

They [the Egyptians] are also the first of mankind who have defended the *immortality* of the soul.

Beloe. Herodotus, vol. i. p. 360. *Euterpe*.

The meek intelligence of those dear eyes
(Blest be the Art that can *immortalize*,
The Art that baffles Time's tyrannic claim
To quench it) here shines on me still the same.

Cowper. My Mother's Picture.

IMMOR-
TAL.

IMMUND

IMMORTIFICATION, a word of common occurrence in J. Taylor's Chapter on *Mortification* in the *Great Exemplar*.

Want of, denial of, *mortification*: *i. e.* of killing, destroying, subduing, *sc.* the lusts of the flesh.

Something is amiss in us, and it wanted a name till the Spirit of God by enjoying us the duty of *mortification*, hath taught us to know that *immortification* of spirit is the cause of all our secret and spiritual indispositions.

Taylor. The Great Exemplar, part i. sec. 8. p. 132.

For this state is a denying of our affections nothing but the sin, it enjoys as much of the world, as may be consistent with the possibilities of heaven: a little lesse then this is the state of *immortification*, and a being in the flesh, which (saith the Apostle) cannot inherit the kingdom of God.

Id. Ib. p. 124.

When the violence of our passions or desires overcomes our resolutions and fairer purposes against the dictate of our reason, that indeed is a state of infirmity, but it is also of sin and death, a state of *immortification*.

Id. Ib. part i. sec. 9. p. 155.

IMMO'VABLE, } Lat. *in*, privative, and *movere*,
IMMO'VABLY. } to move, to change or cause to change place. See **IMMOBILE**.

That cannot be *moved*; that cannot be stirred from its place or position; cannot be borne away, carried, shaken; unstirred, unshaken.

Then no reason defendeth, that some thing ne may be in time temporall moving, that in eterne is *immouable*.

Chaucer. The third Booke of the Testament of Loue, fol. 317.

In that countrie is a lake (the dead sea) which for the greatness thereof, and for the *immouable* standing of the water, is called the dead sea. For neyther is it moved with y^e wyndes, by reason the bytumen resisteth the force of them, wher with all the water is made to stand *immouable*.

Arthur Goldyng. Justine, book xxxvi. fol. 139.

The Earth was in the middle centre pight,
In which it doth *immouable* abide,
Hem'd in with waters, like a wall in sight:
And they with ayre, that not a drop can slide.

Spenser. Faerie Queene, book v. can. 2.

Thou mournfull'st maiden of the sacred nine,
That baleful sounds *immoveably* dost breathe,
With thy swoln visage and thy blubber'd eie,
Let me to thee my sad complaints bequeath.

Drayton. The Legend of Pierce Gaveston.

If God has made (or can make) matter finite in dimensions, the material universe must consequently be in its nature *moveable*; for nothing that is finite is *immoveable*.

Clarke. Leibnitz Papers, p. 125.

Amongst all the Scriptures no one has stood so directly and *immoveably* in their way as this first chapter of St. John's Gospel.

South. Sermons, vol. iii. p. 295.

Immediately he [Gama] gave his sails to the wind; and so much affected were the many thousands who beheld his departure, that they remained *immoveable* on the shore till the fleet, under sail, vanished from their sight.

Mickle. History of the Discovery of India.

IMMUND, } Fr. *immonde*; Lat. *immundus*; *in*;
IMMUNDI'CITY. } privative, and *mundus*, clean, neat.
Unclean, dirty, filthy.

How can they be excused that have a delicious seat, a pleasant aire, and all that nature can afford, and yet through their own nastiness and sluttishness, *immund*, and sordid manner of life, suffer their aire to putrify, and themselves to be choked up?

Burton. Anatomy of Melancholy, fol. 83.

Whosoever will enter into a course of purging his nature of that humour, (which I may call a moral jaundies that discoloureth the whole skin of civill conversation, and putteth us out of taste of the

IMMUND
—
IMMU-
TABLE.

sweetness of purity) shall recover the right savour and gust of purity, by the same degrees he is cleansed from the other immundicity.
Mountague. Devoute Essayes, Treat. 12. sec. 3.

IMMUNITY, Fr. *immune, immunite*; It. *immunita*; Sp. *immunidad*; Lat. *immunitas*, (in, privative, and *munus*.) Varro, lib. iv. and Scaliger, *De Causis*, ch. xxxi. differ about the Etymology of *munus*, and Vossius from both: he (Vossius) derives from the Hebrew, and thinks it properly is, that which, any thing which, is offered, *sive officium, sive donum*, whether as due, or as a gift. *Immunity* is

Freedom or exemption, (from duties,) liberty, privilege.

She [Quene Margarete] declared and shewed the cause, why she could not come to the in time, as she gladly would have done, and for what purpose and intent she had then taken *immunitie* of sanctuary.

Hall. Edward IV. The tenth Yere.

Some say there were but two tribunes created, and no more in the Mount Sacæ, and that the sacred law was there made concerning their *immunitie*.

Holland. Livius, fol. 65.

All nations all *immunities* will give
To make you theirs, where'er you please to live;
And not seven cities, but the world would strive.
Dryden. Epistle 14. To Sir Godfrey Kneller.

But man is frail, and can but ill sustain
A long *immunity* from grief and pain.

Cowper. Expostulation.

IMMU'RE, v. } Fr. "*emmurer, to immure, or*
IMMU'RE, n. } *wall about; to close up in a wall,*
or between two walls; to flank or defend with walls."
Cotgrave. In English, the common usage is

To confine (within walls,) to confine closely, to shut up (in a place of gloomy solitude.) Shakspeare uses the noun.

As if it liv'd *immur'd* within the walls
Of hideous terms, fram'd out of barb'rousness
And foreign customs, the memorials
Of our subjection.

Daniel. To Sir Thomas Egerton.

And their vow is made
To ransacke Troy, within whose strong *emures*
The ravish'd Helen, Menelaus Queene,
With wanton Paris sleepes, and that's the quarrell.
Shakspeare. Troilus and Cressida. Prologue.

While Arcite lives in bliss, the story turns
Where hopeless Palamon in prison mourns.
For six long years *immur'd*, the captive knight
Had dragg'd his chains, and scarcely seen the light.
Dryden. Palamon and Arcite, book ii.

And (sad reverse!) exil'd from cloudless days
The golden sun above, and starry rays,
He shuts us here in dreary glooms *immur'd*,
Our purpose thwarted, and our fame obscur'd.

Hoole. Jerusalem Delivered, book iv.

IMMUSICAL, usually written *Unmusical*. See **MUSICK**.

When therefore we consider the dissention of authors, the falsity of relations, the indisposition of the organs, and the *immusical* note of all we ever beheld or heard of; if generally taken and comprehending all swans, or of all places, we cannot assent thereto.

Sir Thomas Brown. Vulgar Errours, book iii. ch. xxvii.

All sounds are either musical sounds, which we call tones; whereunto there may be harmony; which sounds are ever equal: or *immusical* sounds, which are ever unequal.

Bacon. Natural History, sec. 101.

IMMU'TABLE, } Fr. *immuable, immutable*; It.
IMMU'TABLY, } *immutabile*; Sp. *immutabile*;
IMMUTABILITY, } Lat. *immutabilis*, (in, privative,
IMMU'TE, } and *mutabilis*, from *mutare*, to
IMMUTATION. } change.)

That cannot be changed or altered; and as the Fr.

"Unchangeable, steadfast, firm, settled, constant, resolute." Cotgrave.

Immution (in, emph.) in More and Hall: mutation, change, alteration.

He ment not by thys worde, it must be in one place, that is to say in heauē, that it must so be in y^e one place till domes day, that it might in the meane while be in none other beside; & that it must bee so of an *immutable* necessitie by no power chaūgeable, whereof the cōtrary were by no power possible.

Sir Thomas More. Workes, fol. 839. The Answer to Frithes Letter.

That which was so sensibly affected with so inconsiderable a touch, in all likelihood would be more *immuted*, by those greater alterations which are in cadaverous solutions.

Glanvil. The Vanity of Dogmatizing, ch. xxi. fol. 206.

Although the substance of gold be not *immuted*, or its gravity sensibly decreased, yet that from thence some vertue may proceed either in substantiall reception or infusion we cannot safely deny.

Sir Thomas Brown. Vulgar Errours, book ii. ch. v.

Changer of all things, yet *immutable*;
Before, and after all, the first and last:
That moving all is yet immovable.

G. Fletcher. Christ's Triumph over Death.

But though we were thus inconceivably happy, yet were we not *immutably* so.

Glanvil. The Preexistence of Souls, ch. xiv.

Which word *μῦστα* he often uses in setting out the steddiness and *immutableness* of the matter, in that sense that Plato uses it speaking of the stability of the earth.

Dr. Henry More. An Appendix to the Defence of the Philosophicæ Cabbala, ch. viii. fol. 137.

Lo what delightful *immutations*
On her soft flowing vest we contemplate!

More. On the Soul, book i. part i. st. 23. p. 6.

And, if there fall out any preternatural *immutations* in the elements, any strange concussions of the earth, any direful prodigies in the skie, whether should they be imputed to these mighty angels, whom it pleaseth the most high God to employ in these extraordinary services.

Hall. Works, vol. iii. fol. 963. Of God and his Angels, sect. 4.

For the removing this wicked principle out of our minds, let us always take care to represent God to ourselves as a being the most perfectly and *immutably* holy, and pure, and good, that is possible to be conceived.

Sharpe. Works, vol. vi. p. 112. Sermon 6.

There is therefore no such thing as eternal, *immutable*, everlasting truth; unless mankind, such as they are at present, be also eternal, *immutable*, and everlasting.

Tooke. Diversions of Purley, vol. ii. p. 404.

The *immutability* of God is the surest basis on which their hopes can be built. It is indeed the pillar on which the whole universe rests.

Blair. Sermon 4. vol. ii. p. 82.

IMP, v. } A. S. *imp-an*; Ger. *imp-fen, implan-*
IMP, n. } *tare, inserere, to implant, to ingraft.* See
Tooke, vol. ii. p. 311. and Steevens, note on *Henry IV. Second Part*, act v. sc. 5.

To implant, to ingraft, to insert; to insert, *sc.* a feather into the injured or deficient wing of a hawk; and thus, generally, to add that which will increase the power.

An *imp*, a graff, scyon, shoot, offspring; a child: now usually applied to a mischievous child; a child of the devil.

I was continually a fryer
And the couentes gardiner for to graft *impes*
On limitors and lifters, lesynges I *imped*
Tyll they beare leaues of smouthe speach.
Piers Plouhman. Vision, pass. 6. fol. 22. p. 2.

Impe on an elderne, and if thyne apple be swete
Muchel maruaile me thynketh
Id. Ib. pass. 10. fol. 44. p. 1.

IMMU-
TABLE.

—
IMPACABLE.

Thus taught and preached hath Reson
But Loue split her sermon
That was *imped* in my thought
That her doctrine I set at nought.
Chaucer. The Romant of the Rose, fol. 140.

Of feble trees ther comen wretched *imps*.
Id. The Monkes Prologue, v. 13962.

Farewell a payre of hellyshe *impes*
Of cankred Sathan's race :
For you are enemies vnto God,
And his in euery place.

Drant. Horace. Satyre 5.

They saten hem down all thre
Fayr under an *ympe-tre*.

Ritson. Met. Rom. vol. ii. p. 251. Sir Orpheo.

That pretty Cupid, little god of love,
Whose *imped* wings with speckled plumes are dight
Who woundeth men below, and gods above,
Roving at random with his feather'd flight.

Drayton. Pastorals. Eclogue 7.

For I dare say

We all are fool'd if this be not a play,
And such a play as shall (so should plays do)
Imp Time's dull wings, and make you merry too.

[Beaumont and Fletcher. The Little French Lawyer. Prologue.]

Is this the vertuous lore ye train'd me out to?
Am I a woman fit to *imp* your vices?

Id. Valentinian, act i. sc. 2.

Nothing is more dangerous than to be *imped* in a wicked family ;
this relation too often drawes in a share both of sin and punishment.
Hall. Works, vol. i. fol. 1269. *Cont. Jehu with Jehoram, &c.*

Now when the said cliff was made, they held it open with a wedge
of wood put betweene, untill such time as the *impe* or graffe being
twitted thin and sharpe beneath, were set handsomely close within
the rift.
Holland. Plinie, vol. i. fol. 517.

Well worthy *impe*, said then the lady gent,
And pupil fitt for such a tutor's hand.
But what adventure, or what high intent,
Hath brought you hether into fary land,
Aread, Prince Arthure, crowne of Martiall band.

Spenser. Faerie Queene, book i. ch. ix. st. 6.

He took upon him to protect him from them all, and not to suffer
so goodly an *imp* [Alcibiades] to loose the good fruit of his youth.
Sir Thomas North. Plutarch. Alcibiades, fol. 166.

With cord and canvass, from rich Hamburg sent,
His navy's molted wings he *imps* once more :
Tall Norway fir, their masts in battle spent,
And English oak, sprung leaks and planks, restore.

Dryden. Annus Mirabilis.

But, as the Devil owes all his *imps* a shame,
He chose th' apostate for his proper theme.

Id. Absalom and Achitophel.

Excursive, on the gentle gales of Spring,
He rov'd, whilst favour *imp'd* his timid wing.

Blacklock. To the Rev. Dr. Ogilvie.

But why should I his childish feats display?
Concourse and noise, and toil, he ever fled,
Nor cared to mingle in the clamorous fray
Of squabbling *imps*.

Beattie. The Minstrel, book i.

My honourable friend has not brought down a spirited *imp* of
chivalry to win the first achievement and blazon of arms on his milk-
white shield in a field listed against him.
Burke. Works, vol. x. p. 91. *On a Bill for shortening the Duration
of Parliaments.*

IMPACABLE, Lat. *impacatus*, not appeased, or in
a state of peace, (*in*, privative, and *pacatus*, from *pax*,
peace.)

That cannot be appeased or kept at peace.

But those two other, which beside them stood,
Were Britomart, and gentle Scudamour,
Who all the while beheld their wrathfull mood,
And wond' red at their *impacable* stoure,
Whose like they neuer saw till that same houre.

Spenser. Faerie Queene, book iv. can. 9.

So happy are they, and so fortunate
Whom the Pierian sacred sisters loue,
That freed from bands of *impacable* fate,
And powre of death, they liue for aye aboue,
Where mortall wreakes their blis may not remoue.
Spenser. The Ruines of Time.

IMPACA-
BLE.
—
IMPAIR.

IMPACT, Fr. *em*, or *im-pacte* ; Lat. *impactus*, par-
ticipule of *impingere*, (*in*, and *pangere*,) to fix.

Fixed to, driven close to, fast to.

The seed of this hearbe remooveth the tough humours bedded in
the stomacke, how hard *impacted* soever they be.

Holland. Plinie, vol. ii. fol. 73.

Such a state of the fluids at last affects the tender capillary vessels
of the brain, by the viscosity and immeability of the matter *impacted*
in them, and disorders the imagination.

Arbuthnot. On Aliments, ch. vi. prop. 7. sec. 30.

IMPAINT, to paint, to colour. See DEPAINT.

And neuer yet did Insurrection want
Such water-colours, to *impaint* his cause.

Shakspeare. Henry IV. First Part, fol. 69.

O'er altars thus, *impainted*, we behold
Half-circling glories shoot in rays of gold.

Savage. The Wanderer, can. 4.

IMPAIR, adj. Fr. *impar* ; Lat. *impar*. See IMPA-
RITY.

Steevens, in his note on the passage cited below,
from Shakspeare, produces the instance of the usage of
this word by Chapman.

Nor is it more *impaire* to an honest and absolute man.
Chapman. Preface to his Translation of the Shield of Homer,
1598.

His heart and hand both open, and both free :
For what he has, he giues ; what thinks, he shewes ;
Yet giues he not till iudgement guide his bounty
Nor dignifies an *impaire* thought with breath.

Shakspeare. Troilus and Cressida, fol. 98.

IMPA'IR, v.

IMPA'IR, n.

IMPA'IRING, n.

IMPA'IRMENT.

Anciently written *Empair*, q. v.
And see APPAIR. The Fr. *empirer*,
Menage derives from the barbarous
Lat. *impejorare*. Skinner from Fr.
pire, pejor, worse, q. d. *impejorare*, to make or become
worse.

To make or become worse, or less, to lessen, reduce,
or diminish, *sc.* the quality or quantity.

Full many persons of right worthy parts,
Both for report of spotlesse honestie
And for possession of all learned arts,
Whose praise heereby no whit *impaired* is.

Spenser. Colin Clout's come home again.

The church that before by insensible degrees welk'd and *im-*
pair'd, now with large steps went down hill decaying.

Milton. Works, vol. i. fol. 9. Of Reformation in England.

Tis both, what all thy peeres expect,
And in the royall right of things is no *impaire* to thee.

Chapman. Homer. Iliad, book ix. fol. 117.

The consuls had bent all their might and main against the con-
tinuity of the tribuneship, as earnestly, as if a law had been pro-
pounded, tending to the *impairing* and abridging of their majesty.

Holland. Livius, fol. 104.

Time sensibly all things *impairs* ;
Our fathers have been worse than theirs ;
And we than ours.

Roscommon. Horace, book iii. Ode 6.

Wherein (in public trusts) I laboured, and wasted my youth and the
vigour of my days, more to the service of my Country and the *im-*
pairment of my health, than the improvement of my fortune.
Dryden. Prose Works, vol. iii. p. 230. The Character of Poly-
bios.

Fair to the view old Ebor's Temple stands,
The work of Ages, rais'd by holy hands ;
How firm the venerable pile appears !
Reverend with age, but not *impair'd* by years.

Fawke. Bramham Park.

IMPALE.

IMPA'LE, } Also written *Empale*, q. v. Fr. *impaler*; It. *impalare*; Sp. *empalar*; to spit on a stake, (Cotgrave,) or *pale*.

To pierce with a *pale*; to surround or secure with *pales*; and, generally, to enclose, to surround, to secure, to fortify.

For having few about them of their own,
And by the English so *impal'd* about
Saw that to some one they themselves must yield.

Drayton. *The Battle of Agincourt*.

For it was but yesterday, or two days ago, as one would say, my good friend, and namely, since young lads began in Greece to disrobe and turn themselves naked out of their clothes for the exercise of their bodies, that it (love) crept into those *impaled* places, where youths prepare themselves for the wrestle.

Holland. *Plutarch*, fol. 925.

And thus we find here that the rules of Church discipline are not only commanded, but hedg'd about with such a terrible *impalement* of commands, as he that will break through wilfully to violate the least of them, must hazard the wounding of his conscience even unto death.

Milton. *Works*, vol. i. fol. 43. *The Reason of Church Government*, &c.

First let them each be broken on the rack,
Then with what life remains, *impal'd*, and left
To writhe at leisure round the bloody stake.

Addison. *Cato*, act iii. sc. 1.

The flowers' forensic beauties now admire,
The *impalement*, foliation, down. attire,
Couch'd in the pannicle or mantling veil,
That intercepts the keen or drenching gale.

Brooke. *Universal Beauty*, book iv. l. 402.

The horrible punishment of IMPALATION is mentioned as early as the days of Plato, *μαστιγώσεται, στρεβλώσεται, τελευτών δὲ πάντα κακὰ παθὼν ἀνασκινδυνεύσεται* (*de Rep.* iii.) for so *ἀνασκινδυνεύσεται* is explained by Hesychius, *ἀνασκολοπισθῆναι*; and, again, *σκόλοψις* is similarly interpreted, with a levity ill adapted to the subject, *σκόλοψιν, ὡς ὅπτησιν τὸ γὰρ παλαιὸν τὰς κακῶν γέντας ἀνεσκολόπιζον, ὁξύνοντες ξύλον διὰ ῥάκεως καὶ τὴ νύτῃ, καθάπερ τὰς ὀπτωμένους ἰχθῦς ἐπὶ ὀβελίσκων*. This manner of inflicting death was known to the Romans, though not practised by them. It is alluded to by Mæcenas in that well-known passage expressing such tenaciousness of life, which Seneca has preserved. (*Ep.* ci.)

*Vita dum superest, bene est.
Hanc mihi, vel neutā
Si sedeam Cruce, sustine,*

and by the Philosopher himself in more than one place (*de Consol. ad Marc.* xx. *Ep.* xiv.) There is an odd passage in Pliny, stating that Polybius, when he accompanied Scipio in his African expedition, had seen Lions Impaled, (for so Lipsius (*de Cruce*, i. 6.) very reasonably understands *crucifixos*;) for having devoured some men, a habit of which they grow fond in old age, in *terrorem* to their fellow-beasts, *eâque de causâ crucifixos se videresse cum Scipione, quia cæteri metu pænæ similis absterrerentur ab eâdem noxâ*. (viii. 18. *Ed. Hard.*) The great Naturalist does not add whether the punishment (thus inflicted doubtless for its legitimate end) produced the desired effect.

Impalation, as is well known, is used among the Turks, by whom Thevenot (part i. 49.) says it is confined to Christians who say any thing against the law of the Prophet, who intrigue with a Mohammedan woman, or who enter a Mosque. To the disgrace of civilization it may be added, that it was the death, accompanied by savage previous mutilation, by which Suleyman, the

VOL. XXIII.

wretched fanatic who assassinated General Kleber, was executed, in the presence of the French Army of Egypt, in 1800.

IMPALE.

IMPAN:
NEL.

IMPALLID. To render *pale*, or *pallid*.

This [envy] the green sickness of the soul, that feeding upon coals and puling rubbish *impalids* all the body to an hectic leanness.

Feltham. *Resolve* 54.

IMPA'LPABLE, } Fr. *impalpable*; It. *impal-*
IMPALPABI'LITY. } *pabile*; in, and *palpable*, from the Lat. *palpare*, to touch, to handle.

That can or may not be *touched* or handled; that cannot be felt by the *touch*; insensible to the *touch*.

If the visible creatures were in the Sacrament by the presence of Christes body there truly present, beinge invisible also as that body is, *impalpable* also as that is, incorruptible also as that is, then were the visible nature altered, and as it were confounded.

Stephen, Bishop of Wynchester. *Explication of the True Catholique Fayth*, fol. 118.

He [Epicurus] made a division, as it were, of one thing into two parts: whereof the one in truth is not subsistent, but termed by you *impalpable*, void and bodiless.

Holland. *Plutarch*, fol. 913.

If they had pretended, that after his resurrection, his body was present, but after the manner of a spirit, i. e. after an invisible, *impalpable*, unintelligible manner, the world would have despised their testimony.

Stillingsfleet. *Sermon* 12. vol. iv.

He and Eutychius, the Patriarch of Constantinople, had a curious dispute, whether the bodies of the righteous after the resurrection, should be solid or thinner than the air? Gregory (the Great) was for the palpability, and Eutychius for the *impalpability*.

Jortin. *Remarks on Ecclesiastical History*, vol. iii. p. 170.

IMPANATE, } Fr. *impane*, *impanation*; Lat.
IMPANA'TION. } in and *panis*, bread. The *impanatores* were originally those who denied that the bread and wine were transubstantiated into the body and blood of Christ. Subsequently, (adds Du Cange,) the Lutherans were so called, who dreamed that the bread remains with the body of Christ in the Eucharist.

To incorporate or embody in bread.

Therefore in this mystery of the sacrament, in the whiche by the rule of our faith Christes body is not *impanate*, the conversion of the substance of the visible elemētes shuld not therefore be.

Stephen, Bishop of Wynchester. *Explication of the True Catholique Fayth*, fol. 115.

The solution of the seconde reason is almost as soundely handled, alludynge from *impanatio* to *inaquation*, although it was neuer sayde in scripture, this water is the Holy Ghost.

Id. *Ib.* fol. 127.

If the elements really contain such immense treasures, what need have we to look up to the natural body above? or what have we to do but to look down to those *impanated* riches?

Waterland. *Works*, vol. viii. p. 249. *The Sacramental Part of the Eucharist*.

This conceit (that our Lord's divinity becomes personally united with the elements) has sometimes gone under the name of *assumption*, as it imports the Deity's assuming the elements into a personal union; and sometimes it has been called *impanation*, a name following the analogy of the word incarnation.

Id. *Ib.* p. 271.

IMPANNEL, also written *Empannel*, q. v. Fr. *panne*; a skin, felt, or hide.

To inscribe or write the names of the jury upon the *pannel*, (sc. skin or parchment;) to call upon or summon them to serve.

Therefore a jurie was *impaneld* straight,
T'enquire of them, whether by force or sleight,
Or their own guilt, they were away conuay'd.

Spenser. *Faerie Queene*, book vi. can. 7.

4 E

IMPAN-
NEL.
—
IMPARITY

More cruel than the craven satire's ghost,
That bound dead bones unto a burning post;
Or some more strait-lac'd juror of the rest,
Impannell'd of an Holyfax inquest.

Hall. Satire 1. book iv.

Twelve gentlemen of the horse-guards were *impannelled*, having unanimously chosen Mr. Alexander Truncheon, who is the right-hand man in the troop, for their foreman in the jury.

Tatler, No. 253.

Clergymen are usually excused, out of favour and respect to their function; but, if they are seised of lands and tenements, they are in strictness liable to be *impannelled* in respect of their lay-fees, unless they be in the service of the king or of some bishop.

Blackstone. Commentaries, vol. iii. book iii. chap. xxiii. p. 364.

IMPAQUETED, *i. e.* packed, or put up in a *packet*, *q. v.*

The rest I have named I lent to his countryman, the late Duke of Lauderdale, who honouring me with his presence in y^e country, and after dinner discoursing of a Maitland, (ancestor of his of whom I had several letters *impaqueted* with many others,) desired I would trust him with them for a few days.

Evelyn. Memoirs, vol. ii. p. 291. To the Dean of Carlisle, 10th Nov. 1699.

IMPARADISE. See **EMPARADISE**. *It. imparadisare.*

To be, or cause to be happy, as in *Paradise*; to enjoy the bliss of *Paradise*; to enclose, or include, as in *Paradise*.

My hopes do rest in limits of her grace,
I weigh no comfort, unless she relieve.
For she that can my heart *imparadise*,
Holds in her fairest hand what dearest is.

Daniel. Sonnet 12. To Delia.

Sight hateful, sight tormenting! thus these two
Imparadis't in one another's arms,
The happier Eden, shall enjoy their fill
Of bliss on bliss.

Milton. Paradise Lost, book iv. l. 506.

My better self, my heaven, my joy!
While thus *imparadis'd* I lie,
From Fate I scarce can think to crave
A bliss, but what in thee I have.

Fenton. A-la-mode.

Or in fair Madum's (Maidstone's) vale
Imparadis'd, blest denizens, ye dwell.

Smart. The Hop-Garden, book i.

IMPARALLELED, now written *Unparalleled*, *q. v.* without *parallel*; unmatched.

Pisga the height of Abaris, and this
The height of Pisga over all doth stand,
That is the eye of mighty Abaris
Surveyeth the *imparalleled* land.

Drayton. Moses. His Birth and Miracles, book iii.

IMPA'RDONABLE, } Now written *Unpardonable*,
IMPA'RDONABLY. } *q. v.*

Not to be *pardoned* or forgiven.

They (may) indeed prove such as have no conscience but horror; who by the same crimes will be made irreconcilable, for which they deserved to be *impardonable*.

South. Sermons, vol. v. p. 78.

Surely were this true, he might be an happy arbiter in many Christian controversies; but must *impardonably* condemn the obstinacy of the Jewes, who can condemn the rhetorick of such miracles, and blindly behold so living and lasting conversions.

Sir Thomas Brown. Vulgar Errors, book vii. ch. xvi.

IMPARITY, *Fr. impar*; *Lat. impar, imparitas*; unequal, inequality, (*in*, privative, and *par*, equal.) See **IMPAIR**, *ante*.

Inequality.

Neither can all the shifts in the world elude that pregnant vision and charge of the blessed Apostle St. John, in whose longer lasting

time the government of the church was fully settled in this threefold **IMPARITY** of the orders and degrees.

Hall. Works, vol. iii. fol. 154. Episcopacy by Divine Right, part ii. sec. 7. **IMPART.**

But suppose Tertullian had made an *imparity* where none was originally, should he move us, that goes about to prove an *imparity* between God the Father and God the Son, as these words import in his book against Praxeas?

Milton. Works, vol. i. fol. 36. Of Prelatical Episcopacy.

IMPA'RLE, } See **EMPARLE**. From the *Fr. IMPA'RLANCE*. } *parler, loqui*, to speak.

To speak to, to talk with, to confer, to discourse.

These requests and persuasions by Hersilia, and other Sabyn women being heard, both the armies stayed, and held every body his hand, and straight the two generals *imparted* together, during which *parle* they brought their husbands and their children, to their fathers and their bretheren.

Sir Thomas North. Plutarch, fol. 25. Romulus.

But, with rejoinders or replies,
Long bills, and answers stuff'd with lies,
Demur, *imparlance*, and essoign,
The parties ne'er could issue join.

Swift. Cadenus and Vanessa.

He is entitled to demand one *imparlance* or *licentia loquendi*; and may before he pleads, have more time granted by consent of the Court, to see if he can end the matter amicably without farther suit, by *talking* with the plaintiff.

Blackstone. Commentaries, book iii. ch. xx.
